Subject: Development of the lowewrchurchill

Why don't the Private sector develop this project ? Why should Government take all the risks?
What's happens if Labradoreans decide to become a Territory ? Which will probably happens down the road
.Will NI interests be protected if Labrador becomes a Territory? Can Labrador utilize this new power that will
be generated by this development of the lower Churchill? Surely Labrador should be able to use this power
since they own the resource.

Respectfully ,
