## SESSION 1915

WEDNESDAY, April 7, 1915.
His Excellency having tixed the hour at which he proposed to open the present session of the Legislature at three of the clock in the afternoon of this Wednesday the 7 th day of April, Instant, the Members of the House of Assembly met in the Room at a quarter to three o'clock in the afternoon when Mr. Speaker took the chair.

At three of the clock a message from His Excellency the Governor was dellvered by the Gentleman Uaher of the Black Rod, commanding the immediate attendance of Mr. Speaker and the House in the Councll Chamber. Accordingly, Mr. Speaker and the House attended His Excellency the Governor in the Councll Chamber, and, having returned to the Assembly Room, Mr. Speaker informed the House that when in attendance on His Excellency the Governor in the Council Chamber, His Excellency had been pleased to make a gractous speech to both branches of the Legislature, a copy of which, for purposes of greater accuracy, he had obtained, and which he then read to the House.

> SPEECH FROM THE THRONE. Mr. President and Honourable Gentiemen of the Legislative Councli: Mr. Speaker and Gentlemen of the Honourable House of Assembly:

The great War in which our Empire is engaged, and which, in order to provide for the Colony's participation therein, compelled your beling convoked in Extraordinary Session last September, still continues. The progress of the struggle has been such thus far as to give Britons cause for pride in the achlevements of the Naval and Military forees of the Empire, and in the splenald spirit of union, and cooperation manifested towards the Mother Country by the Dominions beyond the Seas. Equally have these ev. ents been such as to establish beyond doubt that Vietory will in time crown the arms of Britain and her AlHes, and secure to the world not alone a lasting peace, but also a protection against the unscruplous ambition of militarist cliques in countries which have defied the civilizing spirit of the present age.

Under the terms of the measure enacted by you at the Special Session, the enlistment of a force for military service abroad was proceeded with. It
is a source of sratification to me, as It must be to you, that the response to the call for volunteers proved so large that the original number proposed was speedily doubled, and now bids falr shortly to be trebled. Signal honour has beon pafd to the First Newfoundland Regiment by the Impertal suthorities, and all accounts agree that the men who have gone forward are doing oredit to themsely. es and their country; while it is almost needless to express the confldent belfef that when their period of training is completed, and they undertake aetive service, they will acquit themselves in a manner that will teave nothing to be desired.

Concurrently with the creation of this force, the entargement of the Newfoundland Naval Reserve, which my Ministers engased to increase from Six Hundred to One Thousand men, was carried on, and it is equally satisfactory to know that the number was duly 'enrolled, and sdditions to this body are still being made. In this branch of our tighting force the Colony has already pald a substantial toll In human TIfe, through the loss of three of His Majesty's ships containing complements of our men, but the relatives of those who have given their Itves In the defence of the Emplie will have the satisfaction of knowing that the sympathy of thefr fellowcountrymen goes out to them in the fullest measure, and may well be proud that in the greatest crisis in the history of the British race, sons of the Oldest Colony were found nobly doing their duty and sacritieing life itself beside their brothers of the parent land, and kindred Dominions.

You will be invited to consider a measure to provide financial assist. ance towards the malntenance of those who suffer partial or total disablement while on active service, or
to the dependents of those who lose thelr Ilves whille so engaged. To this measure 1 nm sure you will give your most generous and sympathetic consideration.

It is gratifying to observe that private philanthropy has already been enlisted with highly beneffelal results on behall of those whose ordinary sources of income are impaired or cut off by the absence of their breadwin. ners at the Front, and in this respect the generous contributions towards the Patrlotic Fund attest anew the Wherality of the people of Newfound. land, while the efforts of the Women's Patriotic Association on behalf of the sick and wounded in the War, and for the provision of comforts for our own forces, deaerve equally fayourable notice. Their zeal and selfsacrifieing efforts will, I am satisfled, rank among the very best achleved by the women of any portion of the Empire.

The Colony, in common with the other portions of the Empire, has suffered in its Trade and Commerce, as the result of the War, but it is reassuring to remeraber that the fears ontertained at the outbreak of hostillttes, as to the pesstble distocation of pur bueiness enterprises and the marFeting of our staple products. have been dispelled and that, during the past half year, the prices realized for our coaflish have been amongst the very best on record.

The unfavorable outlook of the Seal Fishery this year is to be regretted, but there is this cause for comparative satisfaction, that the escape of so many young seals will contribute to the conservation of this industry, so that while those engaged in the ven. ture will lose the returns whleh it brings to them ordinarily, the poten tial weatth which the seal ftshery re.
prenents $\mathbf{w m}$ bo tmeh enhumeed In fater years.

If reuponae to a requast by my Mipifiens that the Fhatiry Blownd of Scotit itt woult phires at thitr ctepocat the servicer of ane of tis experts to eb(quiritiato and report upout the tiahery Dotabilitias of the Colores, one of tis heibeuinth was derpotched bere in the tearly menthe of 1914, and spent mome *ecitar atriuggt be clovely ebserving uir fintiry menoder ith the havitr of thin verlous tisties that rasort our flution. His mport, a copy of which Qilt be liald before yuu, wili probably ifpinat istruaity to thiose tutererted tal the filhlug industry, and may, I trust, form a barta for practical action at your hasida.

An unnounced to you a year ago, Irofeneor Wynflaiu R. Dumatan, the tiat of the traportar Inatitute in Lorl-
don, was invited to undertake such an examinaton of the Colony's mineral wealth as was possible during such time as he could spend in the Colony, and he devoted several weeks to this mission last year, visiting different parts of the lsland and studying the mineral formations, The intervention of the War has delayed his report thereon, but I am hopeful that it will be received in time to allow of its being submitted to you before the present session closes, and I feel confideat it will prove of no small value in assisting all to arrive at an estimate of Newfoundland's possibilities as a mineral producing country.

A year ago a Joint Committee of both branches of the Legislature undertook an investigation of Fishery problems of pressing importance, but, being unable to complete the work before the session closed, the gentlemen composing it were appointed a Commission under the Great Seal to continue these labours and report at the present session. That report will be laid belore you in due course, and you will be asked to give effect by enactments to the recommendations contained therein.

Under the authority of the Act passed at the Special Session, a Commisston was appointed to enquire into and report upon the circumstances attending the death of members of the crew of the steamer Newfoundland, and the loss of the steamer Southern Cross and her whole crew; the manner of prosecuting the Sealfishery, and the provislons made for conserving the health, comfort and safety of the persons engaged therein, so as to ascertain the causes which have contributed to the above disasters, and which may possibly contribute to the causing of others in the future, and to suggest such remedial measures as may be tesirable to render similar dis-
asters unlikely hereafter. That Comimission, after an exhaustive enquiry, has made a very full report, which will be submitted to you, together with a measure designed to ensure greater safety to our people engaged in this oecupation.
Negotiations are in progress between my Ministers and a Corporation which proposes to establish in this Island and on Labrador an industry of exceptional magnitude involving the expenditure of many millions of dollars in the developing of our water powers and the utilizing of some of our valuable natural resources in the manufacture of a variety of commodities. The enterprise promises to be one affording new avenues of employment for sreat numbers of our people, and serving as an auxiliary for our staple industry. To this and other measures dealling with undertakings of lesser scope your early attention will be invited.
In leaving you now to your deliberations in a session which marks a unique period in the history of the Colony and the Empire fraught with momentous possibilities for our future, it is with special sollicitude that I invoke Divine guidance for your labours.
MOTION FOR ADDRESS IN REPLY.
MR. DOWNEY.-In undertaking to move for the appointment of a Select Committee to dratt an Adaress in Reply to the Speech with which His Excellency the Governor has opened the present Session of this Legislature, I would take the occasion to say that not only does this Legislature and the people of this country, but that the great majority of public opinion throughout the world, doplores as sincerely as we do the calamitous war that is now frogressing and a reference to which constitutes the first paragraph in the Speech from the Throne.

Those who have read carefully the state papers, dealing with the war and the causes that have led up to it, that have been submitted to the pub lic by Great Britain and her Allies, can come to no other conclusion thans that the present war was unrighteously and wantonly preelpitated by Germany, her motive being the selfish one of self-aggrandizement at the expense of the weaker powers and, if possible, of the humiliation of our own Empire. I am no doubt exhibiting a considerable degree of temerity in daring to differ with so many others in ascribing to Germany one special motive for precipitating the war at the moment that she did. It is true, no doubt, that Germany's object is selfaggrandizement, and for the struggle that should come before this could be attained she has been preparing for decades, but my reading of Germany's motives convinces me that Germany delayed as long as she dare delay with any hope of eventually winning the war that should be fought and won to ensure the realization of her hopes. Germany's status as a military and naval power was greater than that of any single Continental power, and, possibly, fully as great as any two of them combined. Her expansion from a military and naval aspect was also almost immeasurably greater than that of any other Continental power, and had she but those antagonists to reckon with she could have calmly afforded to wait the measure of development that would have ensured victory to her. But fortunately for Europe and for humanity there was one country whose rate of development vastly exceeded even that of Germany; this is our own Empire.

Germany prophetically foresaw that the day was fast approaching when no antagonist could reckon upon dealing single-handed with Great Britain as a foe; that the rapid development of Britain's daughter nations, Canada,

Australla, South Africa and New Zealand, leaving out our colossal ally, the Indian Empire and its tributary states, would in the course of another decade or two have so commercially and in point of population dominated the world as to mean the annihilation of all Germany's hopes, if the war, that she hoped was to secure her a predominant position in Europe, was not immediately fought, so that the great potential strength that would have come to Britain a few years hence might be anticipated and discounted.

Germany's preparations were undoubtedly methodical, far-reaching and heroic, and I think it may be safely said without any disparagement of our brilliant Allies, that but for our entrance into the war to prevent the realization of the unholy aims of Germany, very possibly her ends would have been achieved.

At the present time I don't think there can be any person competent of forming an impartial and Just opfinfon of the conduct and trend of the hostilities now being carried on, who can come to any other conclusion than that this war must terminate, and will most likely terminate, within the period of the present year with absolute and unqualified victory for ourselves and our Allies, and it will be our duty when this is attained, in the interest not alone of Europe bot of the universe and of humanity, to effect peace upon such conditions as will onsure the peace and tranquility or Europe for a centiry hence.

The Speech from the Throne speaks in most favourable terms of the highis rratilying result from our effort to extend ald to the Mother Country in the present struggle. I am Justified in congratulating the country, which justified this Legislature in the extra session held a few months back, upon the spirit of loyalty which dictated the polley that enabled us to contrib-
ute a quota of men for both land and sea services of the Empire, fully as great proportionately as that of any of the great Overseas Dorninions, and this generous response upon our part to the call of the Motherland will have the result of placing us upon an equal ity with the great Overseas Dominions in the memberahip of the British Enupire.

1 would take this oppertuilty further to congratulate the fathers and mothers and families of those who have volunteered as seamen and soldters on the spirlt of self-sacrifice they have exhibited, and on the meritorious work that we are asaured, upon the best authority, they have performod since entering upon active sorvice, and with the progress of the war and its victorious conclusion I have no doubt whatever that they will establish a record that will reflect credit upon themselves and upon this country, and no effort that we can make to protect those who have so volunteered In the defence of home and country, from any ill-effects that may follow from the dread possibilities to which they are exposed, will be grudged.

I would also extend my sincere sympathy to the familles of those who have thus far lost their Hves in the service and devotion to their country that they have exhibited, and I am convinced that a practical expression of this sympathy will emanate in due courae from this House The readiness with which our young men have and are respondIng to the call of Country is beyond all praise. The continued needs of the Empire seem but to fincrease the spirit of loyalty that has been manifested from the first, and 1 have no doubt that so long as country calls, the people of this country will be ready to respond.

The Speech from the Throne further intimates that a measure will be in-
troduced providing assistance for those who may suffer disablement by accident or fllness during the prosecuthon of the war, and I feel sure that i am absolutely safe in predicting that this measure when introduced finto this Parliament will meet with an unanimous, patriotie and generous support.

Not alone have we as a people contrilhated our sons to the cause of the Fampire, but we have also made beroic efforts in contributing towards the comfort af all those engaged in the present struggle. To the ladies of this country it would be, I think, impos sible to afford the messure of praise that their great efforts entitle them to. It is further sratifying to know that these efforts were given without any regard to subsequent recognition, ano that all that has been done by the Patriotic und other Associations workting towards this end, have been done in the spirit of loyalty to the Empire that reckons not the cost of doing, but desires only to do its utmost.

We have been further informed in tho Speech from the Throne that in common with other portions of the Empire the country suffered in ita trade and commerce during the early stages of the war, but that it is reassuring to remember that the fears entertalned at the outbreak of hostllities, as to the possible dislocation of cur business enterprises, were entireIy unwarranted, and we are thankfal to Providence that through the fighting qualities of our seamen and the marvelous preparedness and efficiency of our Fleet, that the intentions of the enemy to dislocate our commerce and so effect the ruin of our trade have been thwarted, and that to-day we are in the proud positton of being able to do business as usual, whilst the enemy's trade and shipping have beon driven from the seas.

The next paragraph in the Speech refers to the very unfavourable out
loak in connection with the prosecution of the present sealfishery. This le undouthtedty a mitter of regret, but It may be but a blessing in disgulse, as very many amongat us are imhued with the bellef that the conservation of the seatthaery catls for tho giving thereto of a period of reat-in other words, of the imposing of a clone time of one or more seasons duration. If this better be warranted, thetr de sires will have been partially met by the results of the present season's thehery, as it can now, I fear, be safely assumed that a very large proportion of this year's young seals will escape, and in a year or two will serve to recruit the ranks of the breeding mem bers of the seal herds, and that we will be retmbursed by the incressed eatches of the future tor our loss in the present year. I may say, parenthetically, that I am amougst the number of those who betieve that the preservation of our sealfishery calls for the enforcement of a close time. My vew of the matter is that for practically 25 or 30 years we have been kitiling of the entire herd of young seals each year, and that practically none escaped to replace those which. In the natural course of things. reached the limit of the procreative atage. There are to-day tens, posillly hundreds, of thousands of old seals who hive gone beyond that stage, and It in very questionable indeed if any constideratite number of young have ascaped for years past to recrult their .anks, so that to me it appears quite possible that any year we may suddenly find the young seals so dopleted in number as to make the prosecutlon of the royage unprotitable. I carnestly hope that this theory of mitne will not pass finto realization, but sbould it unfortunately be the case I certalnly will not he surprised at the result.
The paragraph fa His Excellency's Speech dealing with the probable exceptiontly keen demnad for food
stufts is one that appeals to us in a two-fold chameter. First, as owing to the largo areas in Europe how being occupled by hostile armies, and owing to the very large numbers of men that are withdrawn from industrial life for military purposes, it follows that the acreage under whent will be very materially reduced, and that where a normal erop may be obtained there will be great difficulty, owing to the scencity of labor, in harvesting it, so that it may safely be nosumed that the price of wheat must secome aboormally hich, and an it seems a foregone conclusion that there can be no ceasation of hoetilltles at least before late August or enrly September, when it wouta be too tate to plant, the high prices must inevitably continue until well Into the next year, and as we of thls country connume der capita more flour than. perhaps, the poople of any other country, It behooves us to take any stop posalble that will enable us to reduce the present very large consumption of tlour.

The most ready and practicablo means that suggeste liself for the accompllshmant of this object here is by uur people planting more largely than usuat of potitoes in the contug epting There can be no doubt that from 50 to 150 thousand barrels more can be raised than are betng rateed at present and as food value of potatoes compared to flour is reckoned as belag $21 / 2$ to 1 , an additional $\$ 0.000$ or 100 . 000 harrels to the crop would materkally lessin our flour bill, but if the high cost of wheat affect us adverseiy, ns it will to a certaln extent, we can reasonably expect compensation In the equally high prices that our fish may be expected to command in the coming year.

Owing to the destruction of a number of flahing vessels and owing to the large number requisitioned by the

Impertal Goverumient for war pars pown, and owtag an weil to the Dog: ur Bank belag within the nawe of operations of Gurman submarines, Hahery operations there are entirely suspeaded; the Frunch finherlos, tos were practically abondomed, so that there should be a kreater dearth of finh in Europe in the coming year than has been experiencel alace the dara of the Pentasular War when, we are told on good authority, our filh reached the highest price ever attaitsed ta the hatory of thin country, and which atinormally high pricest it is quite posalble, may repeat themuelves in the coming yesr. It does not do, howerer, to depend upon these to rocoup as tor the additional expendstures that we masy be called upen to make the the providing of other regulaite Foodstufte, biat it is erratifyles to know that it the hich prices muest prevall, that for an, at least, there in a cllver lining to the closi, and that we may reasonably hope to be largely relimbersed throueh aar fiab for what we will be called spos to pay tor other commodities.
It is regrettable to be futormed, as we are in the Speoch, that there ta a dafielt in the preest geary revenke There seems to be somethlak prophes. If in the timehonotired adage that "comlag events cast their ahadown be fore them", and tt would appenr to have been verified th the case of the present war tor the finametal markets of the world felt in ndvance ite ce preaning influetice and a shortened coasutaption, and consequrntly lensebef revenuen were in eriflemen ntmort the worlid over durting 1912. We our aelrea had a deficit to that year and In the preseat year it is now crideut that a ceflict will be again ith evidence of course the larree expenditure for war purposes that the Colony has been oblised to make is roxpons. utble in a large measure far the deficit to the present year, and from thin ex-
penditure there was mo cetcape. We Lad to dip our hanile deeply in evir pocketa and contrituta our quotia of ald towands the sacred duty of Ereptige then has that has waved for a thousund yeans sill waving and trikumphant, and to transmit uimimpalrel mad uasullind to our successorit the moble and ascred berliage that we is. Lerlied from our foretathers. 1 km , theretore conflident that the necessary Eepe to protect the country's financtal laterests dhat will be submilted to this Howne will meet with universal approvil
It la pleantog to know that every preatible ecomony lins been exereland by the Government in tratuine the Eetination for the coming year so as क. redice to the lowist figure oar mational expenditure
The garacrapt in His Excelleper's Epeech that recalls the riait of His Eogal Hichneas, the Dake of Cobgamelt, tin the last summer conveys an wexuranee that this visit var enjoyed by the Deke and his party and we ware equaly plased at the opportualty presented to as of eatibiting our loy24 and respect to the floyal familly, shid it-is carnestiy to be hoped, as the Governar expresses itthat the visit of thin past year many be but the forerumper of many such pleasant reuntons of Royaity and peopie and from whlch much can be expected it the way of anatrise a coathued permaneney to the happy kovernmental sjutem under which we exist.
We are aiko reminded th the Gorenorin Speecb ot the rist here a fex amothe stact of the Domintons Royal Comulasion that has been holding altthese in this chlet Orerneas Domataloas fre tho pait three years and from *hose latours very many valuable reparts upse the possithe further consollidation of the Eupire. and on the uaifleation and developmient of the interestr have reached the Impertal Gov-
ertmeat and, throuth them, been atbmitted to the Dominions interested. Whatm the paat few days an Interim repert dealting with Nesfoundland has been receired but sufflelent thme has not yet been glven'for a critical analysle of thin rejortatill Tdonot think that there can be a doubt that much good can be expected to follow fram thet work of this Commlianlon so far as te strectis this country.

Tho next paragraph in the Bpeech is one of very conniderable importance for un. It refers to tha action of the Government In having induced the Scottinh Fishertes Hoard to send one of their expert officials to thls country to enquire finto net report upon the possifititien of further development of our caried finheries and when thif Report is tahled, as it will be in the cruirse of a fer daje, it vill furnilsh much moterint for aerious thought en our part towands devintng methods for the realination of many of the vatulitie sitisecoftions that the rvport offers. To me it appears eminently praeticabte that a most marked tmprovement may be effected in our Harrilis thatary. We arn all more or lesn conversant with the magnitude of the Scotch Herring fishery and the groat value of the product in the Eurepean markets and the very large mensure of reward reaped by the fishermen and others faterested in the prosecuttion of tife thatery. It is tinpost alle to conrlnce me that we may sot equaliy participate in a like meas ure of suicesss and reward from the einptoynitit of Imprared methodis fin the prosecution of our own Herring thinery. We have the fint tis alourdance; we have wadoubted asxurance that they are folly the eqeat of, and posalbly superfor to the Beotch ber-ring- We have alno the incontrovertfble fact that fin the past three years it certain few amoagnt us who have trhen the roquisite deurree ot eare and
employed the required methods in Doch carlng and parking have realised flewres cennliderably over double the price that has been reallied from the erdinary pack for many years past. What has thus been fone ly the few It tre guith podathie for us to makn prasticahin for all those engrged th this taluing the mecessary instrueinduatry if we but determine to place withla thetr reach the means of attion and tho other requiremente that go to rasare a pack that will be accepted in the forolgn markets an beIng equal to Scotel eure. I know that in the past year some packers in the District that I hiave the honor to topresent have wold thetr herriag for f5 a barrel and those who bad but a thomand harrels to eell were anked to tupply thirty thousand. I seed not enterge upon this qubject. Every honsurable member of this Hoase ean pleture for himmait the beseffilal reasts that would accrue from the cure and 3ack of our enttre annnal herring catch in the manner that would enable the realtration of auch prises.

The Governor next reminds un that Irofensor Duastan, an eminent EngItsh ectentlat, who viatted the country last year with the view of perionally examining and reportige upon the poantbillties in our milneral wealth, devotod his personal attention durios qeveral weeks to this work but that the suffortumate outbreak of the war tas delayed the expected report trom Profewor Dumatan, but it is erratirying to froer that sutficient has heres as eertalped to warrant our expecting a very fivorable report from Protessor Dunstan, and from the reputation whlch he has and from the confidence with mhich his statements are accepted by capitalists, it is not too mueh to hope that the publieation of hise re port when it reaches un will result in the development of a new Interest in our natural resourees that will reant
advantageously to the Colony in the emplicyment here of capltal for the fictrieving from nature of the vast quantity of valuable minerals which are now lying dormant in our soilis.

The Governor conveys to us the pleasing assurance that the Jolnt Committee of both branches of the Legielature that was appointed in the last bession, and which sat as a Commission atter the Sosston closer, has reported and that thits report will be tabled durlng the present aesatou. This repert, too, should contain for as much that will call for the most serf ous constderation and it ta to be hop-ed-as it may rensonably be expected -that from the character of the mon who composed this Commisstan a report will reach this House that will recommend only such improvemeats as will be found practicable.

We also have the assurance from His Excellency that the Commission appointed under the sutbority of the Act passod in tho last Semaloa to enquire tnto the lamentable loss at the scaifishery of 1914 bas concluded its labours and that fts report will be tabled during the present Sesslon I have no doubt that this Legislature will sive every conatderation to thla report and will aet promptly upon any suggestions therein that will tend towards the minimising of the marine dangers to which our peoplo are expoaed, so that we may, ressonably hope, to far as human preceutions can ensure it, to be exempt from repets. tlons of such dire cisasters in the filture.
The concluding paragraph in His Excellency's Speech couveys the pleasIng assurance to us that et the present time negotintions are being actively carried on between the Covernment and a wealthy scientist, as Mr, Willson, of Ottawa, with a viow to the establishing in Newfoumdiand of an Industry of vast dimenstons and one
that it fs mont earnestly to be hoped that the Government will do its utmost to encourage, as the establlatment of such an Industry hero will mean far more for as industrially than any or posably all the other industrial enterprizes that lave go far heen exploited. Very many of us are aware of the lienetits that acorue to this country from the creation of the Grand Falls incustries, but I think it will become self-evident, es the detaila of this soheme will be submited to thin House, that the reallation of this project trolds twore for ua than ali that we have hitherto attained in an indurtrial way. Thio industry is intented to compass the concentration of the water powers of a certala section of the country to an extent sufflatent to furnish power for mechanicaf operations of the greateat magnitude. These I belleve, I am correct in stating comprise the manufacture of fertilizers and of puip, and ab I am ripeaking on the authorlty of the Rnghteer, spon whose advice Mz, Wilson and the other capitallats are proceeding, my atatement that the expenditure comprised in the realization of this zeheme embraces the stapendous cotal of from ten to eleven million dolfrirs, may be riken us accurate. The damming and Itakfog-up of the water powers in contemplation will afone calt for in expenditure of slx million four fundred thousand dollars ( $86,400,000)$ and the milla for the reduction and fncorporation of the different constituents that go to produce the finfished fertiliaing product will call for a further expenditure of $\$ 4$, 000,000 , and as the requisite yearly Income from this enterprise to cover ufong the fnterest on the capttal and to proride for depreciation must bo at least a million dollars or more, It follows that the volume of labor to be emplored must be exceptlonally large and as all that any country

MA. PAREONS-Mr. Speaker. In firing to second the motton before thin Howin, 1 hartly lmow whete to I gion. My bon trined, Mr. Downey Ins delivered morls as mlin mditreas I ed hat soo teltry pone flerourh the Averch frem the Thruse that perhape 1 hal lotier farm to another matter: in 11 taki this erportuelly is the first face, ang it feal it my duty ma a par \&ot to thank life Ereellency and Eady I vilama, nail aluo the Patrlotie As doclettios of the coumtry and Sitr Ed. *rand Morris and the ofter seattemen

In eonnection with the Committee formed for the comfort and reception of our boys across the water. I say, Sir, that on behalf of the volunteers and their parents 1 feet it my duty to put this before the Honse, and I also think it my duty on their behalf to thank one and all in connection with these Committees, We apprectato what was done, and recognize the fact that every effort was put torward for the comfort and solace of our volunteers. I say, Sir, that when the call came "T0 Arms"! "To Arme!" there was a noble response through the country from East and West and North and South-in fact all over the Emplre-and we must not forget that our mothers and grandmothers plied tie needle to fit them out with comforts. Why, Sir, I am overcome with emotion when I think of these old ladles plylicg thelr needles and knitting hundreds of pairs of socks and cuffs for our boys. It demonstrated this fact, that they ase the stock from which we came, tise English, Irish and the Scotel. I feel, Sir, I cannot dwell much along the line of warfare today for reasons I need not mention here; but I would ask the patience and indulgence of the House white 1 refer to one or two matters in connection with the figheries. It may be of interest to members of the House and our friends, and particularly our young people if I read a note or two in connection with the Canadian Fisheries.

Reterence is made in the Speech from the Throne to the Fishery Commission appointed at the last Session of the Legislature, I note that the Report of that Committee will be tabled in a little whlle. I may say for the information of my hearers that this extract 1 propose to read is from a iamer devoted to the young, and the luadring of the article is: "Incr sashig

Catuda's Income Through Her Fistiarics," by J. J. Cowle of the 14 spariment of Naval Snrvice Cttawa. I read tilis to show how the fisberies of NewI tuddand could be Increase 1 by propul wwention, and by beint fostered. ast by everyone t-ying to pull together for the benefit of the Colony and the adrancement of the revenue.
"The fishing industry oa the Pacifto Cerst is new compared with that on the Atlantic, but in a marvellonsiy short time it has grown to such an extent that British Columbia now produces a much greater value of thah than any of the Atlantic provinces.
"The value of fish taken from all the waters of Canada to-dey amounts to a sum of which we have every reason to be proud. I do not want to trouble your heads with long columns of dry figures, but a fow figures showing how the industry has flourished in the course of the last 20 years, and the kinds of fish thet contribute to our wealth, may not be out of plece.
"In 1890 the total value of our fisherles was $\$ 17,714,902$; in 1900 it was $\$ 21,557,689$; in 1910 it was $\$ 29,965$, 433 ; while in the season of 1913, the lest year for which we have complete Algures, it was $\$ 33,207.748$. To the latter total the sea fisherles contributed $\$ 29,472,811$, and the varlous inland fisherles. $\$ 3,734,387$.

| British Columbia | \$13,891,398 |
| :---: | :---: |
| Nova Scotia | 8,297,626 |
| New Brunswlck | 4,308,707 |
| Ontario | 2,674,685 |
| Quebec | 1,850,427 |
| Prlnce Elward Isla | 1,280,447 |
| Manftoba | 606,272 |
| Saskatehewan | 148,602 |
| Alberta | 81,319 |
| Xukon | 68,265 |

"The salmon fishery of British Columbla is our greatest individual pro-
ducer of wealth, while the lobster and cod fisherles of the Atlantic come next in order.
"The value of a few of the chief kinds of fish caught during 1913 may be given here:-

|  |  |
| :---: | :---: |
| Lobsters | 4,710,062 |
| Od | 3,387,109 |
| Herring | 3,173,129 |
| Halibut | 2,08 |
| Mackerel | 1,280,819 |
| hiterish. | 927,962 |
| ok | 841,5 |
| ts | 810 |
|  |  |

The article goes on to say there are in all about 100,000 persons engaged in the fisheries It continues:-"In addition to these there are a vast number of people, such as ship-bullders, ssilmakers, rope makers, coopers, teamsters, etc., who earn a Ilvollhood indirectly through the fisheries. And if you take into conalderation the tamilies of those directly or indirectly engaged in this work, you discover that a very large proportion of the people of Canada are really dependent for their daily bread on the operations of our lardy tolfers of the deep."

Now, for the sake of comparison, let us look at our own exports for the yoar ending June 30th, 1914. We oxported fishery products amounting to $\$ 10,907,687$. or in round numbers, $\$ 11,000,000$. Now, Slr, I would like to point out, and we must not lose sicht of the fact, that in addition to the eleven million dollars worth exported, we have a very large home uonsumption. There is a very large consumption all around our coast, vast, west, north and south, and I siould Judke that it can be valued at niet much less than a millifon dollare. Now, 1 am sure that if we had some way hive to foster and encourage our tisheries, by encouragling our young people in the way that Canada is do-
ing. it would bo of great benefit. There are some people, and I have known them, who are ashamed to acknowlodge their calling. I am not a fisherman myself, but I am the son of a fisherman: I am a mechanic, and I am not ashamed of my calling. No man, no matter who he is, need be ashamed of his calling. Every calling in life is honourable, provided it is cmrried along on moral and social lines, and every man, I care not who he is, should stick to his business, put his energy into it and be not ashamed of his legitimate calling. We want our lawyers and our professional men, and our military men-our Kitel-eners-and we want our boys in blue and our volunteers.

I must apologise, Mr. Spenker, for again approaching the subject of war, but at the present time it is a subfert that occupies our minds to a great extent; although I hope it will soon terminate, and that victory will perch on our banners.

In cpanection with our fisherles and the Canadian figures I have fust quoted, I want to point out that we have 40,000 men engaged in them, while in Canada, according to the figures of the Department, there are 100,000 toen. They export about $\$ 39,000,000$, while our fisheries are worth about $\$ 12,000,000$; and I think we should make every effort to further foster and encourage this industry, and hold what we have got.

Now, Sir, there is another matter I want to refer to, and I do not wish to delay the House. I simply wish to rectify a mistake regarding recruting at Harbour Grace, I would like to pay a tribute to the gentlemen who came out to encourage recrulting. They did a noble work. They went around amongst the people, and some of them at their own expense, to try and forward the recrufting movement. Now some misconception has arisen regarding recrulting in the District

1 have the honour to represent. I have obtained a copy of the recruiting Hgures from the Magistrate, and while I do not whst the House to Infer that we did anything more than our share, or even that we did enough, I wint to see the District 1 represent getting credit for what it has done. 1 think: that is only right on my part. We have over 100 naval reservista gone to the front from our diatrfet. We atso had another hundred as recruits for the First Contingeut from the District, and thirty more from Bay Robserts. In round figures, we had over two hundred, not counting those who enlisted in St. John's. These young men that I have referred to Jofned hands with others from all over the country, and to-day they are across the water or going to leave before long: and we wish them God-npeed and God's protection; and we trust that the issue will be victory, and we can only hope that our boys will have a safe return. We read in the Good Book that 32,000 men or more mobillzed for certzin purposes: but the honour and klory fell to men who trusted in a Higher Power, and victory came to 300 , whose watchword was: "The grord of the Lord and of Gideon." I felt my blood tingle as T read an account of the Canadlan troops' conduct in one of the bittles In France. The order was given, and they charged with a rush and drove back the enemy with shouts of "Canada and Old England." Sometimes when I He at rest I see our boys lined up, and I think I hear the order given, and I see our boys rushling forward with the battle-cry of "Newfounlland and OUd England."

Mr. Speaker, 1 have a paluful duty to perform. Of these who went down In the Viknor and Clan MoNaughton, slx came from the dlatrict I have the hohour to represent; and 1 must not forget siso three of our soldier boys whe died in hospital, making in all
slxty-ftve trom Newfoundland who have already given their lives. I feel sure that this House teaders its deep sympathy to thelr parents and relatives. They died at their post, it may have bean in contlict with the enemy, or the storil. What of the storm of foday t The calm of to-morraw whispers a requiem, which lesseas the tention of grief. The day will come when they shall come forth to their reward, having died for a righteous cause. There is not a true British heart pulsating in this House or in the Emplre but will Join with me in saying:-

> "God save our Eimpire now
> Ani never let her bow At tyrant's knee.
> Preaerve her; strong for right
> And ever brave to fight,
> Detending truth with might, While Empires be."

MR. KENT-Mr. Speaker, before I refer to he Speech from the Throne, I must mention the two addresses whlch we have just heard. I think that Mrs Downey should be complimented on his carefully consldered speech: and also Mr. Parsons, whose lieart, us we all know, is in what he sald, and who put so much fire and eathuslasm intn bit remarks, 18 sm sare no one was disappointed in the manner in which they auddressed the House. They recquitted themseves in i. mamer that we would have expected them to do.
As we meet hore to-day our minds are natarally filled with the great war that is being fought out in Europe When we met here last in September, it was with a vlew to providing measures whereby the Government might have legislative aanction for auch acthon as it might deem neceasary in case of an emergency. At that time. the eltuation in Europe was eritical; we folt somewhat anxions; the German army wae rushing on Peris, and
had not yet been checked by the allied farces, its result was still uncertain. Since then, however, events have developed which have rendered the British people conflitent of ultsmate victory.

The issues of the present war are so vital that they cannot be deelded in any way but by a decisive victory. You know sir, that the issues that are involved, are not those of mere material conflict of interests. They are of a far more vital character. Great Brltain and her allies are wagling war against a domineerlig militarism; she represents the role of law and Justlee as against a civilisation which upholds the supremney of force and state expediency. The two are irreconeilable, and not until we have a complete victory, and German militarism is crushed, can we have a permanent peace.

The war was started by a dellberate act of aggression on the part of Germany; an act which was a violation of sacred promises and the rights of a small country of which Germany had undertaken to guarantee the neutrality. Nor is this an tsolated act of ingustlee, Sincf we met here last, Germany has almost daily committed gross violations of international law; her conduct in respect to neutral countries has been outrageous. These things we see continually referred to in the dally papers. In the meanwhile Germany has been nursing her fleet In the Kiel Canal Issuing out only to kill defenceless women and chilldren; senaing atr craft aeross to drop bombs upon unfortified towns, and then there is the submarine blockade of the Finglish coast, the slaking of unarmed ships and drowning of their crews. Never before in the history of civilisation have such outrages been recorded. Erery rule of the sea has been outraged. When merchantmen
are captured in war time, it has always been customary that they be taken to port and given a fair trial before the Prize Court but these German plrates not only slnk Miners in mid-ocean but do not give the passengers and erew an opportunity of escaping This outrage has never been heard of before in history; much less in these times of modern civilisation. We have many instances of those on board merchantmen not being allowed to escape, and consequently losing their lives. At the present time Great Britain rules the seas, and controls the commerce of the world, and in vlew of what has happened her action in instituting a blockade and preventing foo stuffs from going to Germany is amply jus fified. She would not have taken such measures, but was compelled to do so by the action taken by the Ger man Government.

There is no question, but that we have before us a long struggle, neverthelegs we are determined to win, and win we must. The war has not yet reached that stage when responsible statesmen can talk of or even consider peace or terms of peace. The principles of international law are at stake, and not until the rights that have been taken from Belgium are restored, will terms of peace be discussed.

One of the great facts that stand out in connection with the war is the unity which has been displayed by the British Empire in this gigantic struggle between right and wrong. We have seen every dominion and colony of tie Empiric contributin; glatily to the fullest extent of its resources. Newfoundland has contributel its best manheod to the great war that is in progress. We, here in this country, have done our share. Already one thousand volunteers and an equal
number of naval roserviste have gone forward, freely; and with a high patriotism to give their lives, if need be, for the great cause in which we are all so mueh concerned. We sincerely hope that they will return in time of victory. Already some of our young men have puld their last trlbute whlle guarding the coast of the old country in His Majesty's ships. I think that the names of these men, which have been recorded, will be written in the heroes' book of Newr foundland.
In dealing with the matters that we shall eonsider here during the coming session, we must hear in mind that the Fingire is at war. The responslble ministers of the crown will receive no opposition from this side of the House, concerning any measures dealing with mattere arising out of the war, or which are intended to alleviate the stress and strain that is on our people as a refult of the war. But we must remember the people who sent us here and do our duty toward them. The more strenuous the times, the greater the responsiblity and the greater the need for fair criticlgm which the Government will surely re: cetve at the lands of the Opposition. We cannot expect to do justice to the country if we do not thrash out the questlons bronghit before the House. In matters unconnected with the war we thatl do our duty and give such orltielam as the occasion requires, though, 1 hope, without any bitterness or partisan feeling. It is not my intention to go through the various paragraphs of the Speech from the Throne; that will come in due courge later on in the zession as theasures are brought in. when we shall have an opportunity of doing them Justtce. But, I wish to make some reference to the matters of flnance which were mentioned in the

Speoch. The war is imposing on us heavy financial obligations and it behooves us to make every preparation possible for them. 48 the war continues the obligntions will be becoming greater. We find, according to the speech of the Governor, which of course, is in fact the statement of his ministers, that there is a deffelt in the revenues of the eolany. If I ro member correctly the deflcit was in the relghboarhood of $\$ 237,000$ at June soth lust. The defficit at the end of the coming year will be larger still; a great deal larger than the balance of the reserve still left in the Bank of Montreal. But there is no indication in the Governor's speech. We shall probably have an explanation of that from the Prime Minister when he spenke. Another fact is the loss that would be caused by tho almost total fallure of the seal flalery; and of course that will greatly influence the revenue of the country by reducing the imports during the next few months. It is fortunate that commerce, during the past year, has not been interrupted by the war to the extent that was expected. and we hope that this state of affairs is going to continue.

The Eritish fleet has opened the seas to us, enabling us to carry on commeree almost sis usual. It is to be hoped that this will have a great effect upan the price of our fishery products, which should rise in sympathy with other food etuffs. Thif would have a great effect upon the fmperts from which the revenue is derived, It is especially necessary in the present erisds that the Government should adopt a plan of strict ecenomy and If thif is dote there is no reason why the colony should not be able to meet all its ordfary obligatlons out of cur. rent revenue

In conclusfon, I think, I may
express the hope that when we meet here agaln, the war will be over, and that we slinll be congratulating ourselves upon a decistivo victory, and that the Germin factor in the world's affaits will have been ellminated by a padteat operntion. I think that evon then when these happy conditions retarn, thera will come heavy obll gations arising out of the war. It will leare a sad tegacy of widows amd orphavs, and of parents who have lost their sons. These will have to he provided for by means of pensions in keeping wfth the posttions which these people. III. Theso point to the ebilgation on the Goveramont, of as prudont mufuinistration of the finance of the cotany, with it great responstDility attachec.
RT. HON. THE PRIME MINISTER. - Mr. Spesker, I deaire to delay the Honse for a very few minutes to refer to two or three matters that have been engaging our attention this ofternoon. In the first place, I destre to follow the load of my hon. frlend, the Leader of the Opposition. in congratulating the gentlemen who proposed and neconded the motion for the uppointment of a Select Committee to draft an Addresa In Reply to Hls Excellency's Speech. I think that I can conselentioualy puiforso everyiting that the Leider of the Opposition lus antd in regard to both these apeeches. Mr . Downey'n was a carefuily prepared speech denting with all the finportant queations reterred to In the Speech from the Throne: 1 am quite sura that it will be a gource of informatfou sin value to ay who bave hearit 1t, as well us to a larger auffeuce that it will subsequently have when it appaare in the pubilo pritite. I would niso the to congratulate my frlend, Mr. Parsons, on the very fine utdreen that he hae siven. I am sure that every word he has uttered in resird to the prort ptayed by Newfouma-

Lanil In this sigantio atruggle, came from the bottom of his heart, as was ovidenced by the cholce dictlon in whith the couched the atatements he uttered, and I am sure that the addrese will form a valuable contribution to the war litprature of this country dind will rladden the hearts of those Wha read it. And if congratulations are in order, I do not thlink that I ean be conslifered as in any way golng out of the regular course of my duty if I offer my congratulations to the fearned Laader of the Opposition, on the rery able address that he has delivered this evening. It was an adGrees that was worthy of himsett, one that those who know htm would paturally expect him to make, one that Was worthy of the position which he to ably eceuples. It woult be atsuird for anyoze on thls side of the House to expect the Opposition, even in time of war, to abidcate its important functions of citleising affairs of public Importance along reasonable tines. We ns a Government have come here thin sesston, to defend every possible action of the Government in relation to the carrying on of public afrairs of the country, and all we expect is that we will recolve that fatr play from the Opposition which was such a marked feature of the last seselon, and which is a feature not ztone of this country, but of the whole Empire and its parliaments in dealing with matters in connection with tho was.

- And now, before goling to the limmediate question before us, 1 should like to tender my congratulations to thy triend, the funlor member for Honayfita, Mr: Morine, who has returned to this House this afternoon, ofter In absence of something tike pine years. I was here as a Junlor tuember in 1886, and Mr. Morlae folfowed me the year after, and for twenty years I was in the Legislature with hfm untll he restgned in 1905 or

1906. I can bear eloquent testimony to the inlustry and ability displayed by him in sll that twenty years; but my testimony is unnecessary, because the records of the Honse show the work he lias donc, and although wo have differed on many matters of pubHic importance and slall probably continue to differ, It is only Just that I thould on this occasion weteome him back. It is in no offleial sense that I do this, but from my hoart that I extend to him my congratulations on his veturn. During the whole time that he has been here, with the ex. ception of one or two years, my friend his been in Opposition, and perhapas he bas got so fond of it that that in the reason he has selected the other slde of the Fouse on this oecasion. I know his heart is with us here, and it be consulted his wifhes enttrely, he would be sitting on this side of the House. But he has eleeted to sit on the other side of the House as an independent member. I am sure that from time to time we will have the benefit of his wise counsel In dealing with matters that may came before the House.

There are one or two matters, Mr. Speaker, that I would Hke to say in regard to the fiscal question referferred to by Mr. Kent. He sald that the time has arrived when we should piat our house in order, so that when any dirlicutly may arise we may not bo found in any disadvantageous position. Well, I can say, Sir, that that If the most important, the principal matter wift whith the Goveriment has had to deal, and that it will recelye every consideration. I do not look at the finamefal situation of the Colony efther from a Government or trade standpoint with any pessimism whatever. In faet, considering the circumstances through which we are living at the present moment, I can say that I look forward to the future with
every optimism. My learned friend hiss referred to the deficit in the pubHie accounts at the end of the fiscal year last June. He is quite correct that there was a shortage in the revenue over expenditure on June 30th last, and when we were in session in September last I think it was estimated at $\$ 240,060$. But to be absolutely securate, I thfok it will be found when the accounts were settled that it was nearer to $\$ 800,000$. The accounts were not complete when the session was held in September, and when the Auditor-General and those in charge of the financisl affaits of the Colony completed thetr audit, it was found that the deficit was In the nelghbourhood of $\$ 300,000$. That was met out of the Hquid asset of the Colony held In the bank for years to meet such an tmergency as thits. I remember when that fund was started in the Bank by Sir James Winter's Government in 1898 or 1899. It began, I thinik, with $\$ 270,000$ and grew until it stood at $\$ 500,000$. It was an amount put in the hank to meet such an emergency aa we now face, and it was very fortunate for the Colony that last June we had that fund there. It has been treated as trust money by every Government that ever came In , and no Govermment has touched it, no matler how much they may have been tempted, to expend it on public works. From that sum we have taken $\$ 300,000$ to mont the deflcit, so that we began the year whth $\$ 200,000$ intact. What the exact deflcit mext June will be it is fmposaible to tell. Bat whether or no It will be large, will depend to a lurge extent upon those who are engaged in the trade of the Colony, it vill depend upon the purchasing power of the people, it will depend on the imports made into the country and these factorx will all be affected by individual action. If people are timid, if people are fearful even to expend
their legitimate earninge and legitlmate incomes, if people with money to apend practice cconomy where economy becomes a crime, then we will have a ehortage of revenue, But if the supplying merohant will remember that this in a year when lie ought to risk a little of the money that has been hourded up in thousands and miltiona money that hes been made out of the country and out of the figherles, it he will remomber that this th the time to remember the condition of the country, the searcity of labour, the exlistence of poverty, aud bardehip, and if he will spend his money in the importatione that are necessary for tho trado of the country then we will have no Geficit. But If the supplying merchant says that this la a year when economy must be practiced, If erery man who has a fob to do pite it off because of a false idea of economy, if every man who wants a new coat pretere to go round in hif old one because of fear of overexpendture, then we will have a deficit. I liope there will be no deffcit, but even If thare is a deffit, we will probably get round the corner all right. We will probaby find fundr to meet it along legitimate lines and in ways that will not be oquestionable, but will be Justifiable. Wa might have had more money to our credit if this war could have been anticipated. It was never contemplated a year or two ego. If we could have antielpated that we were to be plunged into thls gigantio enterprise, then we might have added another million to our liguld aseet in the bank. Durlag the years that we were in office prevlous to the tast election from 1900 to 1912 we had eurpluses of nearly $\$ 900,000$. In the year 1909 there was a denctit of $\$ 160,000$. We lad nothing to do with that. We had nothing to do with the expenditure of that year. The next
year we had a surplas of $\$ 460,000$. I Chink the next year it was 8270,000 . Next year it was $\$ 160,000$. In other words between 1009 to 1912 we had nearly $\$ 800,000$ in the way of surplas es. Some person may say: why did you not put that in the bank? Why did you not anticipate a ralny day? Because we considered that there was enough there to meet any possible contingency. No one could have foreseen such a contingency as this, We gave brek the curpluses to the people. We gave them back in llghthouses, fog alarms, new achools, brtdses and all the neceseary public improvementa all over the country; interest on Railway Loans, Old Age Penafone, and a thousand and one other ways in which there was neces nity. That is where the surpluses went. Fivery dollar of them in the accounts there to-dny will spenk for themselyes, But I may that if we had antleipated this war, the difficulty and emergency we are now feolng, it would have bern an easy matter to have allowed the pulilo workझ to have re mafned, and to have put that money fn the bank for a rainy day. But the difienlty wo are now confronting came on us unawares. I quite agree with any learned frlenil's remarks this evening on the subject of this war, If ia the most gigantic and most awful war that has ever visited the world ain far as buman bistory can tell, but out of the eurrounding gloom our viston ts gladdened by that great unity of the Empire which was the one factor that has declded the suoceastul outcome of the struggle. This war hiss Eiown to the world a solid Empire; still more, it has proven to ils that if we are to remnin a solld and united Mmpires, if we are to stand toyether to exerclse the clvilising Influence that han been the domfnating olanracteristic of our existence, we
must all unite in contribution to the upleep of such force as will be necessary to defend us agoinst unwarranted aggression in the future. In the past the taxpaycr of Great Britain has beon satiafied to pay the whole bill. We have never expected sud have never been asked to contribute one cent Tndfa with ber $300,000,000$, Ans: tralia with her $4,000,000$, New Zealand with her $1,000,000$ and Canada with her $8,000,000$ people, all have looked to the British soldier and saflor for protection. And when we eaw the British war ahip and the British tar there was a thrill of patriotism and of pleasure; but we have never realised untll this war was thrust upon the how dependent we were upon thom for our absolute protection. And now the war has come and we all realise that this Emplice of ours with its $500,000,000$ peoplo cannot exist if the $45,000,000$ of Great Britnin alone are to bear the burden of defence. It has not been our faut that we liave not contrlbuted before. The Brilish people have been satisfied to bear the burden, they have been satisfied with the trade and commeres that has come to them from the Colonles and from other countries owing to their nupremacy of the seas, But now if we are to bold this Emplite we must be prepared to police it. We must be pre pared to sustalu an army and aary thet will uphold those principles of justice and liberty that the Empire otands for, pgainst every poseiblo combination of nations. I join with the Hen. Leader of the Opposition in the hope that when we come buck here next sesslon this war will be over, that a lasting peace will be established, that the nations now struggities against us will have been defeated and that a peace satistying to all will have been accomplished, a peace satisfactory not alone to the British Empire but also
to Belgium. France and Russia. The trouble is that while there are some losses that money can renay, while Belstum may be pecuniarily satiatied for her monetary losses, while our loss and dawage in trade may be made up by 4 money payment there are losses, the loss of the boy or the husband, that mo money can make geod. To thidee that have gose down, to those that may so down in the fature the sratitude of the country goes out, and I hope that the measures that will be proposed by the Government in this diraction will meet with the genutams mepport of the whole House There are thone, sons and fathers, who have gone forth to right for the rights and libertles for which thelr fathers and forefathers have fought In yeara gone by on many a battlefletd. To those who dio in euch a struggle we cannot offer too great a gratMurte. Our one and only hope th that a speefly end may come to the war and that when the terms of peace come to be sattled they will be satisfactory and satisfying to all.
MR. MORINE-Mr. Speaker, I think that it would be ungracioun of me to allow phas without any cormment on my part, the rery courteous personal romarka that bave been uttered by the Pxime Minfiter. I am sure that the House will understand that it is a very great pleasure for me to find mysolf sltting here again for Bonavista, an honour due in the first place to the kindnces of the hon. member who alta on my right, Mr. Coaker, in making room for me, and secondly to the support of my old constituents in the district. It is quite true, as the Premler has salid, that be and 1 are lu one sense the two oldest members of the House, that is in the sense that we haye boen here for a longer perfod than any other member. He If now the father of the Honse, and I
must say that he has behind him a very large and promiaing family. As I sat bere this afternoon listening to him speaking, I could close my eyes and almost imngine that twenty years had not passed away. He was singlig the same old song that be sang then. almost in the same old words, and possibiy with the same old effect. He called to mind the fact that there wero certain dissimilarities in our careers One of those is that he has always stuck to the Government, whereas it have always stuck to the Opposition. There is, however, this difference also. It is evident that I fhave becone broader in my vlows, because I fin 1 myself today, if not a Liberal, at laast altting behind the leader of the Liberals. And I tind my learned triend is the leader of the Torles, and as 1 look back into the past, I cannot help of the House a detalled statement, congratulating him for leading the most Conservatiro party of Tories that I have ever seen, certafnly to his own profit it not to the profit of the country. One thing he will at least admit and that is that in the past, as 1 hope th the future, my criticism of any measure in this House has boen of a constructive nature. I have nevor criticised except in a constructive way, to build up tor the good of Newfoundland, a country which I love no less than those who have been born in it.

## COMMITTEE ON ADDRESS,

The following Committee was appointed to draft an Address in Reply to the Speech from the Throne, name 1y:-Mr. Downey, Mr, Parsons, Mr. Grimes, Mr. Stone, Mr. M. Kenaedy. Mr . Higgins.

MR. MORINE-Mir, Spiaker, with folthnce ta the sueseation to aend these Bills to Select Commtitees after fround readina, might I sugest that fi reiald be hetter to flrat po into a Fommlttee of the Whole House for The purpons of a foll alvcunsions of the Fartoun matrere contained in the Bilis, fad sfter that discussion. refer them fol Betect Cormmittees, then the Cominitters rould have a linowledse of the oplalons of the Fouse to guiAe them In their werk, whereas if you firna them to Select Committees Firat. Iomes meviliners would porkaps not feel et lherty to fally tehate them, and etternarile the mork of the Select Commitieen mileht ley inneked to pleces by a Committee of the Wante House.

RT, HON, PRIME MINISTEA-Mr. Spenknr. I have no potjection to the fulrkantion. As a rule Rilla have been fent to Select Commlitieps atter seecond roarlas; lint I cas see no ponaible projection to the muggention of the hon member.

MR. MORINE--In teclenical quenfions the other le the better way, but in the preseat instance, it think, this fis prethriabte:

Then Bill waw rraid in firut time, and tintervid to bie read a second time on to tworrew.

## PATENTS AND TRADE MARKS BILL.

Pursuant to order, and leave grantefi, and on motion of Rt. Hon. the Prime Minister, the Bill entitiod "An Act respecting Patents and Trade Marks," was introduced.

RT, HON. PRIME MINISTER.-Mr. Speaker, I may say that this is along the lines of the Imperial Act, dealing with the nullification of Letters Patent tasued to citizens of countries at war with His Majesty.

The Bill was read a first time nind ordered to be read a second time on to-morrow.

## ADDRESS IN REPLY.

Mr. Downey, on behalt of the Seleet Committee, appointed to draft an Address in Reply to His Excellency'a Speech, preaented the report of the Select Committee as follows:-
" House of Assembly of Newfoundland.

- To His Excellency Sir Walter Edward Davidson, K. G.M.G., Governor and Commander-in-Chiet in and over the Isiand of Newfoundland and its Dependencies:
"May it Please Your Excellency,-
"We, the Commons of Newfound: land, In Legislative Session assembled, beg to thank Your Excellency for the Gracions Speech which Your Excellency has addressed to both Houses of the Legislature.

Signed,
J. F. DOWNEY, EDWD. PARSONS, M. J. KENNEDY. W. J. HIGGINS.

Assembly Room, April 8th, 1915."

MR. DOWNEY moved that the report be recelved and adopted:

MR. CLIFT-Mr. Speaker. Before that motion is adopted I should like to make one or two observations.
One would naturally suppose, Sir,
that at a time like this-the first paragraph in a speech from the Throne would deal with the subject of the sreat war in which the Empire is now engaged. This House, Sir, met in neasion lat Septomber for the purpose of considering certain measures that were deemed necessary to be brought forward in connection with the war. Upon that occaston the House was assured that any measures introduced by the Goveriment in connection with that subject would not only receive the hearty support but the endorsation and sympathy of every member on thls slde of the House and I think we may safoly say at this time that any such measures as may be deemed necessary during the present session also will meet with the same hearty support and assistance from this side of the House. At that time, Slr, a heavy war cloud was hanging over the whole Empire; today that cloud has to some extent been lifted and we are beginning to feel that things are a little brighter than they wore at that time. At the same time, Sir, we must not ahut our eyes fo the fact that it may be a long time yet betore peace will be proctatmed. Authorities differ as to the probable duration of the war; but we are as. sured by those who have charge of the naval and military operations so far as Great Britain and her allies are concerned that eventually victory will crown our efforts. We must not however, reat upon that. We must prepare for the worst rather than for the best; and it behooves us in this country as a small portlon of His Ma. festy's great Dominions to do our share of the work that must necessartiy fall to His Majesty's subjects wherever they may be. In this country we have done something. We have equipped and sent forward to Join the forces of His Majeaty a Regiment of
about 1000 men. We liave sent forward to the Admiralty a contribution of 1000 to man His Majesty's ships. We miy be called upon to do more. It tiehooves us, Sir, 1 think, to atill cortinue enlisting for both the Army and the Navy io that we mey be prepared -or may help to prepare ratherfor the daye that are to come. The response from this country, 1 think, has been a noble one. When one constocers the fact that we are not a mitrary peopte, 1 thatnk the manner in which our young men have responded to the call of duty-the call to serve thelr Kive and Country-should make us feel proud of them. I belleve that as time goes on and if there ahould be greater neceasity to send forth our men that thoy will not be backwara; that they will to a greater extent re spond to that catt whiten ts Imposed upion them by the constitution; ren spond to the call to serve thelr Klag and conntry in the hour of lts sreat need. We may well indeed, Str, conEratulate those men who so promptly and heroloaliy came forward and offered thelr servioes whotiser it be our the land or on the sen, and we havo every confldence that If more men are neaded to sarve in the army or the navy they will be fortheoming. A spifit of loyatty and patrlotism has gone throughout the land and I feel that we all can rely upen those who are physically fit to come forward shonld the need become-grenter and ahould their services be colled upon. For the prosent time we have carred out the obligationil that were undertaken by the Government, and the number that were promised have gono forth. We wish them Goil-speed. We hope the day may soon come when this ertel war will be over and our men will come back with victory perehed upon their banter. I say,Six, we may well congratulate ourselven
upon feeling that our young men have come forward as they have; but after afl they lave only done their dutythey liave only done Sir, what we would have expected from them. It If plensing to note that they have done it so readily and so cheerfully. Our duty to the Empire is our first and paramount oare. We are here to-day, Sirs, as a Leginlature only because we have un army and a navy. We go about our ordinary avocations, we conduct our business, our trade and our commerce, only because we have the protection of the Empire; the protection which the Bmpire affords us through the medfum of its army and navy and I say, Sir, that during this seasion of the House and for all time we must ever bear in mind the faet that we only exiat and earry on our trivial bushese and our leglsla. flon and our other avoentions because we are under the protection of the Brftish flag. Our paramount duty then is to our Emplre and no matter what mensures may come before this House durini the present seasion the good of the Empire should be the prevailing thought and the prevailing conelderation.

We are told in the Address that A measure will be fritroduced for the purpose of providing financtal assistsuce to those who may be realareal destitute or brought to distress by reason of the fact that those upon Nhom they were dependent have pal. lon in the war or have been disabled Sach a mennure, Sir, is only right and Freper. The State must take care of those who have been left behind, and thisie who are dependent on our mea who have so cheerfulty gone forward In the perlours warl of defending the Elruplie. It is gratifyligg to know that such it liberal response has been winde to the appeal that was lssued by the Patriotic Assoclation for the
patriotic fund obian mas erestat for the parpose of prorillian mertatane to the dipendents of these whe have cone farwand to the war
 to the ebfotets to whek ithe Patrixul Fund way to ba applied. but. Sir there tan be me farther minatoritire slen bernizie these obldecte have pow beea clearly act ferih; and if is a matter of entreme fmportance that every man In the comumuity thole know exaclly what the objects of this fred ate, and how the maney wit be appiled, to that he nay lise at op turetumity of suacerbing to the funa and foeting aseured that it lin woll anif fathtuilly applled, 1 billeve thana ara man, mea in this coummolty, who hare not suscribed, who could have dane Th. hertor rutmined from dethr to tr reason of melsappratiension of its obs Jecth. ence and tree development at smaller nattonalities, third, the substitution for force, for the clash of competing ambitions and for grouping alliancee, of a real European co-partnership. Sueb, Sir, fs the high afm of Britain to thla War as expressed by Its Premfer, nad is it not worthy of every aeslatance we can give and every gacriftee we can make? What do Mr. Asquith's statements mean? If they mean unything it is the construction of some International machinery that will lend to the settlement of disputea between nations by arbitration, inatead of by the aword. Well may we feel proud that our hoys are fightIng for auch great principles to govorn the future conduct of nations. Our every hope and prayer should be that such will be the ultimate outcome of the present great struagle. Where the Government has been assisting in this direction it han my cordial support. Eut Sis, once we leave matters of Emplre and touch upon our own local affairs, it is there we go by different roads. The Government takes one road. We, on the Oppoalton slde, take the other. I take it that the Governor's Speech is fntended to outilne what the Government will do durlng the present session. There are some mattere to which the Government promfees to give attention, which are of deep concern. There are other matters of very sreat and grave fm portance to whitch no reference is made. I shall refer to thene. There are unhappy conditfons existing in the country torday. The War and condtions of trade in other countries are being blamed for thelr existence. They may have played a part but not wholj\%. Another cause can be found, and that is the wanton extravagance of the present Goverament. All theBe with the bad fiwhery of last year and the closling down of the mines have placed many of our people in a very unfortunate position, and I cannot see
snytbing outlined in the Governor's Speech that will provide rellef for them. It is true that at preeent the Government is allowing the Poor Commissioners to give out rellef to those in destitute circumstances. But what does the rellef amount to? A Ittie flour, tea and molasses. What a dlet on which a man must depend to sustain life for himself, his wife and little ones. I do not know how the members of the Government would like to live on such a diet I do not think they would have the same ruddy countenances or such well-developed bodles as they show today Why do they not do something? Have thoy no heart? Are they loolding for procedent in this country. If none, let them look at Australle and Now Zea land tonday and they will find that their Governments out of the large loans they have borrowed since the war, are usling a constderable portion for relleving the unemploged. Australla is spending $\$ 18,000,000$ in this direction by giving employment on publle worke of varlous kinds. New Zoaland is also epending part of her lonn in this way, and where shortly after the war there were 75,000 men out of employment, only a few thowsand are in that position to-day and they are recelving attontion. It is the duty of the Government to provide egalnst the atarvation of its people. Money can be provided by our Goverament for the Army and Navy, and It is right that it ahould do so. It is also right and proper to provilie our fishermen, our miners, our laborers and all others rendered poor by the war, bad trade and the other causea, rgatnst needless hardship and sufferIng. If we cannot do without our aokdiers and our sallors, no more can we do without our fiahermen, miners and other workers. They are equally usoful to the State, equally necessary for its upkeep. They produce the wealth of the country and make the
whents of tudustry revilve Once they atop, the whole toitentry utops, end the country le parstyzed. No soldar could make war, no army conlat tleht whithoat the worther fn' thin mitais mat factues. MR. HALFYARD- Itr. Epeater, I fiee to meke a fer briet remarla om the adoptling of the Adiresu la Reply to His Fareelleney't Spench.

The subject whileh is eppormost in the minits of the people of thite country, as =oll as in all parte of the Bm fins, in fact through the efrilizal world is the mighity econfiet whlich in how Leling wased ly Mrituln and har Allies on the cate side and Germany and her Alfies on the other. The confilet affecte eraryone from the higbent f. the lownst. In the speech it oces fles the Evaiter part and overalacous trergthine elee. Prerloar uptakern fare allinted in flownt and patriotic fanguage on the port that ull Bettis). irn are ptayite fo the sreat ntrusgic. sant bave faid particular empanet) be What Newfoundtind tas done t -haip the Motherlend in ber bour of cuanlict yad trial. I corroborate all that hat teen sall coneursing the action of pur brsve wolunteers and the burcula pacrifice of out Nival Reacrvinta who have etren thelr tives treety is 40 fence of Finpire and thome, ts to the canse of the war, thare is no diftortilce of eptaton although we miny clio Ier in elving exprcaiton to that eptrilon:

Hy the methofis of warlare sitopted by Germany to necompllah her dendgus and gatn the victors, we miny look up: on lier as the mont barbarous natlon fa the world. But we mant remember fliat war in Hell, aleo that our feellinge
are very blasod agalinst our opponents, so that we only see their faults, and we give them no credit for having any good points at all. The pollcy of the German Emperor is to gain the mastery of the world. He has sald "Our German people will be the cranlte block upon which the good God may complete His work of civilising the World." THIs waa the policy sugbeated to our bleased Lord by the devil at the opealing of Hile minlatry,-a polley which is instantiy rejected with the wards "Get thee behind me Satan," The aplrit of the Christ would bave become an altogether different apirit If he had decided to win the world by tho sword instcad of by the Croas. Whille the German Emperor ciafms to have God on his side, we have the speotacle of seelng millions of chris tlana fighting millions of other chrlstiana. Ged cannot be on both sides, whetory to one wreake death, deatruotion and vengeance on the other, and no one can Imagtie the Almighty setting up his kingtiom on this earth by force, bloodshied and murder. England to mafntain her prenent dignity and bonor among the nations of the world wax compolied to engage in thla war. She ind glven her elgnature to a treaty to protect the neutrallty of Beigium. When that treaty to wheleh Germany was a sigsatory was ruthleasly broken by that nation, nothing elise was left for Britaln but to take up the nword to malntain the prlaclple of Justice and right, and to show to the world that fer word or signin ture was her bond, and no macrifice was too great so that lier Integrity and honour may be maintained. As the world and socioty is constituted at the present time, I belleve that it Germany fo to be conguered, which wo all in our hearts belleve and pray for, It must be accompilshed by force, therefore we an at colony of the Brit-
fih Emplre belleve in the freedom and fustness of the British constitution must do all in our power to asslat tho motherland which we look to so deazIy to bring vietory with honour, to the canse which mreans so much for the weal or woe of the nattons of the warld.

There is one paragraph in the Speech: "to constder a measure to provide timanelal Essistance towards their mnintenance whlle on ective service or to the dopendants of those who lose their lives whille so ongnged." To this mesture 1 give my hearty support, wheh so vitally affeets many of our peoplo Who have lost those upon whom they were depending for support in the naval disastora which have caused tho denth of so many of our brave fellow countrymen.

I have a letter here from Rov. J. O. Britnell of Fogo which is a concrete exnmple of the atrattenced and distrosaing elreumotances of many of our poople who have lost thofr loved ones upon whom they were dependent for support. The letter refers to the loss of one of my brave constituente of Pogo who wrent to his death in H. M. S. Bayano, and with the permiers ton of tho Houne I will read part of the letter which ata forth in a more expliolt and convfnclag manner than any words of mine can, the true condition of thinge that obtaln.

## (Reads lotter.)

Our brave naval reeervlets have freely ahown thelr patriotiam and herolam by glving their lives in our defence, and 1 trust that all we can poselbly do will be done to provide for the wants of those who are left to mourn the lons of thelr loved ones. 1 wan pleasod to hear trom Mr. Clift tho hon. member for Twillingate, that the fonde of the Patriotic Aasociation
will be uned to asalst such caees as I have mentioned. No fund will be more highly appreciated and be devoted to any more deserving or honourable use.

The Speech also refers to the seal fishery:-"The unfarourable putlook of the Seal Fishery this year is to be regrotted, but there is this cause for comparative satisfaction, that the es. cape of so meny young seals will contribute to the conservation of this induatry, so that while those engaged in the venture will loee the returns which it brings to them ordinarily, the potontial wealth which the Scal Flehery ropresents will bo much enhaneed in later years."

We deplore the fact that there wIII be a great shortage in the earnings of our people by the faflure of the seal fishery thls spring. It seems that nature has enforeed practically a cloge season for the killing of seals, and what could not be accomplished by legialation the elements of Nature have brought about, which we hope will be for the benefle of future genera. tions, although our needs are so great st the present time that any set back In any of our fishery fudastrles will entalt hardship and suffertige. The conserving of any findustry or asset the country may posses, of course is foretgn to the pollcy of the present Government. Our natural resources on the land if not on the sea must be exploited and if posslble turned into money to provide blg grants for party supporters and Govornment members. The pollicy of the present Government has been to fncrense the public debt of the Colony with no commensurate industry that will give employmont of a permanont nature or inerease the earning power of our people by one dollar. Debts are being plied up so that taxation hangs jike a millstone on the necks of the peo-
ple, and future generations will have to boar the burdons brought about by the wanton extravaganee and blundering poliey of the present Government.

Another paragraph says:- "The Revenue for the past fiscal year showed a deflelt, the reault of the depression which had been manifeeting itsolf for some time previously in Nowfoundland, as well as in other parta of the world. This condition of affatrs was rondered more aeute by the outbreals of the war, and for the current fiseal year an even greater shortage is apprehonded,"
No one expected that the revenue would be anything but short. Effects always follow causes. The Government had sown to the wind and now they were reaping the whirlwind.

Money had been scattered broadcast to the hungry crowd of heelers and supporters. Positions, salaries and sopa had to be provided to entiefy the swarm of office seekera, till a depleted troasury finds the country bordering on the brinic of financial chaos and vuln. The popularity of the Government is now on the wane, and a disappointed electorate is only walting the opportunity to put saner and easor men in charge of the shlp of state and save ber from becoming a dereHet.

There is one thing which seems contradictory in this speech and that is this sentence:-
"Towards reduclng this adverse balance my Ministers propose to utllIze the Cash Reserve provided for euch emergencles, and proposals will bo submitted to you for dealling with the amount which will romain to be liguldated."

The Premter has stated that $\$ 800-$ 000 of that Cash Reserve had already been taken to make up the deflcit in
revenue for the year ended June 30th, 1014. The rescrve now is $\$ 200,000$. and with this amount the Government is eoing to pay off an adverse balance which is foreshadowed in the Speech as biefng greater than that of last year. How the Premler is solng to pay a debt of $\$ 300,000$ or more with $\$ 200,000$ - 1 will leave htm to explatn? This be will undoubtedly $\begin{gathered}\text { o } \\ \text { to the }\end{gathered}$ owa ratlisfaction if not to the satis. faction of an intelligent electorate. We are told that a defleit must be treod, but what we muit conilder In critictsing the polley of the Governmeat is not the future or present defleit but the deffelt of last June before there was any tallt of the war, nithough they hed four monthe prevloun to the close of the Budget year to collect revenue from the increas. ed texation of hast February's session. That increabed taxation for the four monthe was supposed to give them: 3200,000 extra. The war had nothing whatever to do with the defleft of last June. That deficit was due to the lack of foresight and blundering wasteful policy of a Qovernment com. posed of metn wittiout any financiat nbillty whatever.

The Regerve of $\$ 500,000$ which had beap set aalde for a rainy day by a whie and sano Government, had -io be takn to pay the dehts incurred by tie boodling policy of the pres ont Government. If any businese coneern spends all tts capital elttout makfing any provision for the future In the way of a corresponding asset as a accurity in the time of depression of trade, what will happen?-bankruptcy and rutn.

It is Just the same with an individual and a Goverument. We have to deplore the condition with watci we are free to fice today through the unwise pollcy of an tneapable adnatnistratlon. The poor old Coloay is now
hard and fast on the rocks, and me thinks new men will have to take cotamand if she is over to float in the calm water of independence and securlty.
To remedy exlating coadtions the Premiler suggested that all who could should buy a hev overcont, meaving of course that we should conttrise bus iness as usual. It might be unite easy for the members of the Coverament and their supporters to follow the Promiter's advices, but the most of un on this side of the House muet be content to cut our garment according to our cloth. He, the Premier, also atated that ocmomy at the present tlme was a crime, Aecording to the wastefal, extrivagant polfoy of the Government we quilte belleve that eoonomy has been considered a crime by them. In handling the revenue of this country efnce thoy asaumed office in 19i9-a polley or doctrine which has beea so strictly adhered to that now we find wilful waste briaging woofil want.

We were told by the Icaders of eoelety at the opening of the war, that economy shoutd be practiced by all, every nickelahould be saved, for hard and trying times wero yet to come.

In view of exieting conditions tho cetimatee have been prepared to meet coly tridspenastic requirsmenta. From thin intatament we conclude that we have beens subfected to unnecessary expenditure in the past.if any curtall. ment in the estimatoa is to take place now. This is an admission of unnecessary and wasteful expenditure which has brousht us to our present deplorable condition.

We are also told in the Speech "that an findustry of exceptlonal mignitude, Involving the expenditure of many militions of dollaris in developing our water powern and utiliting some of our vatunble tutural resources th the
manufecture of a varifty of commedItens, will be propoand for our attentom. We are promised a lanit flowing with mittr mit foncy. 1 critt Hin how future enterprisos will help us out of our prosent difliculties, The sins of the peet and the shorcominge of this

I comid not help thinking tait sumvint whent war was first declared of the hefplese conutition of tivis cliy to dafend itmelf agnioat an attack from 4 Cerman crulper, How ensy it wat It there was nal Refithat anyy to dread, for one of thosio ablips to land a crew Aml loat the banks and commerclal flrmes alone Water Streot, thus loaving the counitry in a rutred condition. Brt. tutnis mupramnoy of the sea has seved us from much is fute.
it huve not leard any opinions ex. Trment as to how thivornbly the ConItnsent bent by Newfoundland may compere to that sent by Canadis. I tend in the 'Weekly Witnase' of Moutreal in-ahort time ago, that out of the flrat sonttorent reut from that seuntry, comiluiar at 82.000 men orily t.006 were Caniallin bart, 4,000 BritInh, und 1,000 Itrench Canailnas. Now

Sir, I belleve that the Newfoundland Contingent were the descendants of Newfoundlanders for three generations or more, and in that respect at least, 1 think we can compare favorably with our larger neighbor. At the same thme there seems to exist a spirit in the British horn, a pride of Empire which is not so easily aroused in the Colontal born.

When I went back to the District after last winter's seasion and told the people there of the increased taxation, there was naturally a great deal of complaint, thay considered it was dee to bid taanagement on the part of the Government and should have been avoided, but I have never heard a. afngle complaint because of taxee duoto the war. If you can get the people to realize that increase in the tarif is due entirely to that cause and nothing else, I belleve the great majority are willing to bear their part of the burden and not blame the Government for conditions over which they had no control, but 12 months ago it was difforent, when the Government had to increase taxation for roasons which some of us at least belfeved might have been avolded.
That clause referring to the maintansnce of those who sulfer partal or total afsablement while in the service of thelr Klag and Emplre will of course have the full support of thls House, Oppoeltion as well as Government.
1 am very sorry, Mr. Speaker, for the rallure of the geal fishery. We have for the past thiree weeks, in the Distrlct of Twillingate, been able to see from our hills the steel shlps fammed In the lce, unable to reach the seals. Maybe, some people think that we of the North are glad of the fact that these elips missed the seale, but such is not the case. We realize that the great, shortage in the catch
will be badly felt at St. John's, and what affects trade here in the efty affects more or leas the whote island. I am pleased to hear, however, that the ships are now free, and hope they will be successful in gettling sav. ing trips.

I greatly regret the financial defleit whleh we now face and trust that there will be found some way out of the trouble. It is certalnly too bad, the burden of taxation seems alrendy more than we can bear, and I hope that in regulating the tariff, the fincreased burden will be placed on those best able to bear ft.

Referring to the Clvil Sorvice, it has beon remarked that thess officials are poorly paid. If this is tho case, how is It so many people are after the folss. They certalnly go to a lot of trouble to get an appolniment and have a fair understanding of the salary offered before applying. Once in the eervice they say they cannot live on the salary given, and ask for an fnerease; now it the salary wad not good enough why seek for the position and it not satisfled I suppose they can get out. It their ablilty la such that they cannot possibly be spared, they should be pald accordingly, but 1 think we are doing all the country can afford at the present time in tha? direetion, and should cut the sarment aecordling to the cloth. I know the feeling of the people with regard to the Clvil Service, and nothing would be more unpopular than increaped expenditure for that purpose under the prement circumstances.
I am glad to be able to say that there is but little destitution in Twillingate District. This is citefly owing to the herring fishery, the spring fishery on the South Sile, and the fall's fishery on the North SiCe, coupled with the logging industry which is so near at hand.

The ohore cod fishery was extremely bad, and if there had been no herring fishery, seores and possibly hundreds of famflles would have been in a state of destitution. It is fincumbent on the Government of thls country to do all in their power to preserve and promote thle Industry.

MR. COAKER, Mr. Speaker, 1 suppose, as leader of the Union Party, it would be indiscreet on my part to allow the Address to pass without a fow remarks. I was exceedingly amused to hear the Premier's remarks on yesterday in connection with this question of economy. I agree with the speakers on this stde of the House when they say that they believe he was not sincere, and that he really and truly could not mean that to economize was a crime. Now, if he belleves that, I would like to know why ho has not advised the ReldNfld. Co. against dismissing 500 of their employees-turning them out in the dead of the winter to exist as best they may-and putting up the ples that they did it because of war conditions. We find the Government, who had authority lust year to raise $\$ 2,000,000$ to complete, or partly complete some of those branch ratlwayg, coming back from Loudon with one million temporary loan in order to ald the Reld Company to complete some work on those railways during the past season. Now, it they got one million dollars they might have got two milHon, hecruse the Fremier then certainly knew the condition of the finances of the country so far as Customs returas were concerned, and might have aided the Colony by givIng labor had he secured the other million dollors. Although be went over in March, he knew from the statements made here that the rev. enue would be very short; and when he found that he could not raise a permanent loan, he ought to have done hle utmost to ralse a temporary loan,
not of one million dollars, but of two millions, and then he would have had an extra million to help tide the people over the present crisis caused by the wat; but he did not do so. He states now that the Water Street merchants have millions of dollara laid by from profits made in connection with their businosses during past years, and he calls upon these men now not to be tlmid, but to be venturesome. Well, the Reld-Nind. Ca, who have accumulated so many milliona from work done in this country since they have been here, might have done something in that ufrection. After all, they have contracts to build certain branch raflways, to complete them and to operate them, and it certainly would not have been too much to expect that they would make on effort to tide the people, which they had in their employ, at any rate, over the winter; but we find that these were the very men who led the way in the dismissal of thetr employees. Last yenr the Government promised in the Speech from the Throne on the openfing of the House that the oranch rallways to Trepassey. Heart's Content and Bay de Verdo would be in operation during the year. Thoy ere not in operatlon to-day, I preeume because there is not sufficlent ralling stock and focomotives to operate the line; but here is what the Government sald lingt year:-"Fallway extenston during the year has been rapld and emlaently eatisfactory. The equivalent of sixty-four-miles of rallway has been completed. The Trepassey Branch has been all but finished, and ta now being operated to Renows on Echedule time. The early summer monthe ought to be sufficient to have this line brousht up to contract specificetion, so that the autumn may seo the entire branch operated."
Now, the Trepassey branch is not yet completed, although the atatement here is that it was all but finished at
that date, and was belis operated to Renews on schedule time. The sutumn did not see the Branch opersted.

The Speech goes on: "The Heart's Content branch has also been practically completed, and will bo operated early in the prosent year."

This stntement war made last Junuary, and the Feari's Content branch is not yet completed, or at least if it is completed, it is not in oparation: and if it is completed it is a very grest retlection upon the Government that they do not make the Reid-Nefl. Compiny operate it. They have a contract to operate it. The people on the couth side of Trinity Bay do not know what the Government put the rallway there for. They are using it now to haul wood over, No effort is being made to compel the Company to operute the road; and yet the Premiter comes In here and tellis us thist we ought to get the second overcoat, if we have one, in order to keep the country goling and to ald cuetoms returns. The Speeeh of last yerer goes on to say that "The Bay de Verile branch has been graded, the rails and ballasting far adranced, and some of the stations built. It should be ready for operation in the early fall. The Fortune Bay Branch has been graded for blxteen milles and ralls lafd to the fifteenth mile, but not yet ballasted. The Bonne Bey branch wad commenced late in the seanon, and the work done to tate in hut prelfminary."

Whienil was down in Bay do Varde district the people from one and of the district to the other were indignant beceuice of the non-operation of the rallway and wanted to know for what purpose this railway had been bullt. Stations have been bullt during the electlon campaign of 1918 . That fall there were 1500 men employed on rallway work in that district. Statlons were buift then that havo never been used, that an operator has never been

In; roads that bave never been used Were then buft connecting these etations with various settements As I bave sald, over 1500 men were employ. ed in thits work during that fall. For what? In order to secure votes for the Government supporters. Now, the people of Bay de Verde know that more than a million dollara has been speat on that rallway, and they want it operated. The ralls are there, the statfons are there, the roads are there; everything is ready; and they want to hear the sound of a whistle. Why have these roads not been operated as the contract provides? And yet the Premier wante to know why We have not bought a second overcost1 I might ray, though, that some of our man did have a certain amount of bellef in what he stated, because three of them actually did go and get. overcoats to-day. Now, they had the pluck to carry out the Premier's suggestion, and I hope the Government nombera will do Hikewige.

It is a sertous thing, Afr, Speaker, that we have not had a greater effort made by the Government in order to afford the people an opportunity to earn surfictent to thde them over thls great crisis. Many thloge conld have been done. Wo are all aware that the Government Just now have not a bed of roses to Ho upon, We keow that conditions are pretty hard with thom. But yet look at the wonderful things which are belng doas in England at the present time, and they are only belng Cone because the Government is couraseous and determined to do the utmost in their power to help the peoplo out. To-day, in England things are being done by Mr. Lloyd-George, the Chancellor of the Exchequer, Which, if they were done by him two or three years ago, would have earned for him the name of being the greatest Socialist that ever existed.

But he has done thess things and come out on top. He had the foresight and the courage to carry out the suggestions which were made to him, I presume, by men who knew all about these various matters, and as a consequence Great Britain has not suffer. ed to any great extent because of the wer. Now, we in Newfoundland have not ecrioualy consldered the aituation of the country as it stands. I don't think that flve men out of a hundred have seriously thought of what our poaition at the preaent time really is. Last year we had a shortage of 250 , 000 guintals of tish for the year, which at $\$ 6$ a guintal means a milion and a half dollars; in addition to that there were a million quintals which were sold at a loss of 50 cents a quintal: because of the conditions which prevailed at the time the fish was shipped; that is a half million more whiteh the flshermen lost because of war conditions. Of course, the money that was lost because of tho shortage in the catch was not the result of war conditions, but at the same time it meant a millifon and a haif out of the flsiermen's pockets. Then there is another half million that has been taken out of the earnings of the fishermen because of the excessive profits charged on provisfons owing to war conditions. That mekes a total of 23 million, which is guite a lot of monay when you come to look into the earnings of the people It does not comes as a surprlse to me that the revenue is short. Anyone with common sense who looked around him knew that it must be so. They atate that there were $\$ 300,000$ short last year, and the amount this year will be a. great deal more. I am somewhat

- surprised at the figure for Inst year because when the House opened in September we were told that the shortage would be $\$ 237,000$, and the
difference between that amount and $\$ 300,000$ is considerable. This was caused throush the policy of the Government, and throngh lack of economy in pdministering the affairs of the colphy The Government last February put on taxation that permilted them to raise $\$ 250,000$ more than they otherwise would have recolved from the time that they put the taxation on until the end of the fiscal year. That meant $\$ 550,000$ that the Government were out in their estimate for the year 1913-14, if we add the $\$ 360,000$ covered by loans spent is 1913, it will total $\$ 910,000$. Now Mr. Speaker, we are aurprised that there was a shortage of $\$ 800,000$ last year and we are surprised to be told that the deHiclency for the present year is gofing to amount to a greater sum than that, 1 have heard men who have been. watehing the revenue during recent months cinim that $\$ 500,000$ will be the deficiency for the curront year. Well, if $\$ 500,000$ is the deticlency for-1914-15, what is it going to be at the end of 1915-16? We cannot expect any great improvement in trade, the seal flahery has beon a blank-there is going to be a loss to the Goverament of from $\$ 200,000$ to $\$ 250,000$ on that account alone-and we certalnly won't be able to make un in any way that I sec any great amount of revenue from ordinary sourecs. I would like to know what is going to happen when the war ceases. A great sum of money will have to be raieed in order to make two ends meet and enable us to live as an independent colony. There is this miltion which the Premfer got last summer; the other million that he did not get; there is a million which will have to bo raleed to meot the war expenditure; he will have to get at least two millions more in arder to complete the remainfng unffnished branch rallways, (last year
we were told that two millions would be about enough to complete all the remaining branches, but I dare say when we get down to facts and figures, we will find that two millions have already been spent and that at least the government will want at least another two millions to com plete the contract). That will be nt least five millions that will have to be rafsed. Well, I would inke to know who would want to be Premier of Newfoundiand and have to face the London markets and secure this loan. Sir Eldward Morris will certalnty be entitled to our deepest gratitude If he can go across at the end of the war and ralse $\$ 5,000,000$ at 4 per cent in order to get us out of this hole in which be bas placed us. A loan of $\$ 360,000$ was authorized last year to pay for expenditure fincurred In 1918 that I suppose a cent has not yet been raised on, and there were several temporary loang from the banks that when added will probably come to another million; then we will have to lose a certain amount in ralsing the loans as we did on the other loans, and before we are through with these obligations that the country has incurred, it will mean not less than $61 / 2$ or 7 militon dollars. Then when we take into account the deficiency for 1915-16 and $14-15$ which will amount to $\$ 800,000$, I have not the slightest healtation in saying that by that time there will not be fifteen men in the whole country who will know the right thing to do.
The Government say in thetr speech that "Negotlations are in progress between my Ministerg and a corporation which proposes to estabilish in this Island and on Labrador, an Industry of exceptional magnttude, involving the expenditure of many millions of dollars in the development of our water powers and the utilizing of some
of our valuable natural resources in the manufacture of a variety of commodities. The enterprise promises to be one affording new avenues of employment for great numbers of our people, and serving as an auxiliary for our staple industry. To this and other mensures dealing with undertakinga of lesser seope your attention will be invited."
Isn't it pecuilar that every time the House meets there is a pragraph similar to the one I have Just read in the Governor's speech. There is always something wonderful golng to happen in a few months time. Last year we had this in the Speech:-
"My Ministers have also been for some time, and are at present, engaged in negotiating with British capitalists for the construction of a railway from Notre Dame Bay to Bay of Islands, and for the establishment of a train ferry service between Bay of Islands and the Eastern Seaboard of Canada, for the purpose of estabHishing better transport facilitles and of developing the fishing Industry of the Island."
When that was put there they knew very well that nothing was golng to come of it, and do they thinls that there are twenty men in the whole country today who believe that anything is going to come out of that paragraph in thefr speech this year?

## Here is another one:-

"It is encouraging to observe that your efforts to attract the attention of outside capitalists to the varled and natural resources of the country are gradually bearing frult. My Minlsters are at present in negotlation wlth the representative of a large group of Brltish Investors wifh a view to the utilfration of some of the vast water powers of Labrador and the estahlishment of very large Industries calculated to
aflord permanent employment to numbers of our people, and to reproduce in that land the transformation that has been effected in our own Island in recent years,"

Now, what do you think of that? Last year we were golng to have a man come down here and take charge of Grand Falls, in Hamilton inlet, and establish a tremendous induatrial un aertaking; put up tremendous machinery, and all that sort of thing. The whole country was going to blossom as a rose. The wonderful thing about this is that the Premier never seems to learn anything; he does not appear to get wise from year to year; surely he ought to know by this time that he cannot eod the House with this sort of thing any longer. Now we are golng to have more great maehtnery, great mills, great dams. Mr, Downey told us that there is a Company going to spend eloven milions, onily eleven millions, and that within two years they are golng to have all the maczinery in operation. Well, now is the time for these great things to come along. What we want is something material, something to work on. We have had all we want of great promises, protty speeches, bright phraseg. Now, I hope, if I have the pleasure of sitting here again another year that I will not hear any more such paragraphs as that in the Speech. If the Premfer will take a suggestion from me ho will leave them out In tho future. Do the best you can in those mattere, and if your negotia. tfons come to anything, then tell us sbout it, and we will give you all the credit that you deserve.

Now, I would like to know whethor the Government intend to bring in any further legistation thils year th strengthen the Act in connection with combines and monopolies, which was passed here at the last session. Up to
the present the Act has been Inoperative because of the fact that there is an penality imposed for the breach of It. There were a number of cases during the last year in whfeh a Commission appolnted under that Act might have been called upon to Invear tigate certain combineg which wero believed to exist, but an Investigation would be useless because even if it were found that any wrong had been done there was no way in which the gullty partles could be punished. They would only laugh at us. Thero are lots of things which we know of and perhaps lots of thinge that wo do not know of in this respect, but we do know thls, that there have been combines existing in St, John's for many years. During the past fall there have been several comblies in existence, but there was nothing which we could do to prevent them from operating. There was no use in calling the at tention of anybody to what was goIng on, because the Aet was inoperatIve so far as getting atter the people responsible was concerned and the matter had to be overlooked. Now, here is a chance for the Coverament to do something, if, as they say, they really and sincerely wish to ald the common masseg against the injuries that result from thase combines.

Now there is another thing that I wish to call attention to, 1 hope that the Supervisor of Debates, or whoever is responstble for having the debateg published, will see that the speeches from thls side of the House are correctly reported. The reports of our speeches last year were simply an abomination. There was no songe in them, It was a case of simply putting in as sentence here and there. On the other hand, I noticed that all the speeches of members on the other side were splendidly reported; so that We were not given a falr show. If you
are going to publish the speechas, then publish them correctly; if you cannot do it correctly, then don't do It at all. As I have sald I don't know whether the Supegvisor is responsible or not, but if he is not then I think he ought to see that whoever is responsible is brought to book and that, there will be no repettion of what occurred last year.

The Minlser of Finance and Customs is not present. I was goling to ask htm why he permitted the Bonsventure to sail from Channel on the 10th March Instead of on the 13 th. The law as passed here last session, provided that steel ships could not sail south or west from St, John's until the 13th March under a fine not exceeding $\$ 4,000$. The ship salled on tho 10th. The Act provides that any three members of any crew may take action against the owners of the ship for salling before the time. And that is what is intended to be done. But the Customs people should hare been more alive to thelr duties, and should not have permitted the ship to sail.

There is a lot of talk about a duty going on molasses, i notice that nothing has been said in the Speech regarding this, and I hope that the Government does not intend to do anything in this connection. The cost of motasass is really 10 cente a gallon hfgher than last year, and if it is intended to put 4 or 5 cente more on it, then it wIII merely moin that the poar people will be compelled to use fess sweetentig.

You must not increase the price of molasses for if you do, you deprive the fishormen of one of their most used commolities. I ask the Government to take thifs matter into consideration, Our frlend, Mr. Clift, bas suggested that there be a decrefise in expenditure, Something must be done to prevent this outrageous expenditure
now golng on. Do not try to meet fr creased demands by taxing the people of the Colony any greater. If the Colony is in such a desperate condltion that you must find more money do not Increase taxation but reduce expenditure, I find that that there are men standing around at many places who are Government officials colng nothing. You have a man at Morton's Harbor, holling a Government position there, who gets a salary of $\$ 400$ or $\$ 500$, and ts not earning a fifth of it. There is another at Lewlsporte getting $\$ 900$, and another at Exploits getting $\$ 500$, with nothling to do. If these men are not earning their money, they are not wanted. Poor fishertuen have to bear the burden imposel upon them, as a result of paying these Idle Government officials large salarfles. Theres are three Custom officials in Twillingate District, and don't earn $\$ 200$ for which the work could easily be done. With regard to the explanation ziven by the Hon. Colou fil Secretary, In respect to the matter of wrong doing in the Registration Department of the Post Offica. Now, we look upon the Colonial Secretary as a man who is honest and rellable He admitted that there were irregularlties in the Registration Office of the General Post Olfice. Why did the matter not come before the Government? He might have said: "Well, I did not know of it until now, but I will do everything in my power to get at the root of the matter." The books in that department of the Post Oilice are short by \$180. I do not care who is offended, but this kind of thing must not go on. If I were head of any putHie department I should punfsh any one who did any wrong. Is the Government golng to allow that sort of thing to go on? Pat the pruning knife fnto all those matters and try to adrafnister justlee to all.

There is another matter of whinh I wish to spealc. I was very sorrs to read in a paper today a report trom one of the memberg of the Upper Houel, who talked about the prien of fish beeoming lower in the fature I think that the hon, member ought to have refrained from apeaking upon that subject. It is very poor encouragement for our toiling fishermen to hear of such afterloge, Times will be hard during the coming year. We ought to encourage our men fnatead of discoaraging them by anylag that the price of IIsh will come dowa in value. Why should it come down? If the war continues why ahould the price of fish be any lower than it is now. If they buy cheaper the fiah will be in the buyers stories when the price stdvances sogain, and they will agaln make blg proflts. The price must koop up. I am sorry that this statemont was ever made and 1 hove that the Government will do sll it can to remove that impression from the minds of our fishermen. As it is, salt will be fifty cents dearer than it was last year. In Ract, supplies generalIy will be very much highor in price. The Goverament ought to try to glve a ifttle advaniage to the fishormen of the country, and give them a chance to get to the fiahery thif year. If there were no men to prosectuce the fishery, It would be at sad state of affairs. There are men in Bell Tsland who have not a chance to work; and over a thousand men in Conception Bay who are looking for something to da. Something must be done. There ought to be some way of arranglag supplies for those men the coming speing. Cur men are anxious to work If they ean enly find work to do. If the Govermment does not do some thing to ald thoaed men it will be very injirious to the finances of the Colony. There will be no employment up
the country, and there will be very little work at the minee or mills, hence the men miuat fish or starve.

There is a lot, of diecrepancy In the manner in whicis relfet is gtven but to our people. I hope the Government If not responslble for that. Reliof ls being given to some and denled others just as badly in need. Men are refusad, and because they are not Torles, The man askg for some asslstance, but does nint get it becansa he Yoted on the wrons side of politics. No able bodied man wants pauper money, He dealres work for ald given him, but work is denled him, During the winter I sugsested that the Government misht talce drums and hoops from mon in Conception Bay, And if thase men had the opprtunity of sell. Ing such it would help many over the hardest thme this Spring. Do not make paupers of those. men. There are public worke to he attenced to in Coneaption Bay whieh would, if atart. ed, help these people out. There is no destitntion in Green Bay or Fogo District, and not much in Bonavista and Trinity Districta. The men in these bays cnn go. Into the lumber woods and earn enough to supply their presulng requirements. I ask the Government to Issue grants to parts of Conception Bay and supply employment during the next month. Put it In the hands of nome public-spirited men; I do not care who they nre. We oright to do all that fs possible to ensen the burden of the fiahermen of Conceptlon Bay during the next few weeks.

Now, Mr. Speaker, there is another mattor whtel I wish to mention betore I talre my geat. The Allan people are getting $\$ 20,000$ subsidy for trins. Atiantic service between here and the Oll Country. The Government ought to see that they put deeont boats on the service: I think that the
time has come whien the Government ought to see that this is done. We have one company getting $\$ 20,000$ subblay which is giving a 50 per cent worse service than amother whith gets no eubaidy from the Colony. I refer to the Furness-Withy Co. $\$ 20,000$ should not be thrown away on the Allans, and they ehould be compelled to put on flrst class boats for this money.
In regard to the war, I endorse all that has been sald by the varlous opeakers. I am sorry that it took us so long to make up the thousand men for the Naval Reserve. 1 think that the authoritles are responsible for much of the stacknese in enlisting for the Navy. The Naval Reservists are getting only twenty-alx cents a day, whille the volunteers for the Army get one dollar a day. When the fishermen come here to foin the Naval Reserve and find that the pay is only about one quarter of what the voluntears are getting, many of them turn away from the Navy and foin the voluntears. If it had been assured these men that efter the war they would get one dollar a day the same as the volunteers the response would have been much larger. After the war you will find that it will be difmcult to win the favour of the flshermen towards the Naval Reserve. They are continually complaining about the treatment accorded them, and they come to my office with thetr complaints, and I know what their feelInze are towards the Navy. They complain that tho whole town turns out to bid adieu to the volunteers, but the Naval lads leave without any farewell or fuss, These men who have lost their lives have given all they possessed for King and Country. There is no eause so noble as that of fighting for King and Country, and I am sure that the memory of the lads who have
sunk beneath the waves will always be appreciated by thelr fellow countrymen. The king, flag, and the throne was as dear to them as thelr lives, and they died to uphold the glory and honor of the same. If, by any possible chance, the Germans should destroy a part of our fleet and men were wanted to mian warships it would bo found that 5,000 of our fishermen would willingly come forward and take their places on the fleet. Some now think the Empire can get along without them, but if the call to duty was urgent it would be found that there would be a ready response. The de pendents of these brave men who have given their lives for the Empire ought to be properly eared for; and I hope no mean pension will be awarded them when the matter is being arranged. The Government may do wrong, and aet unfairly, but the fault is not attributable to the Constitution, for under it we possess every liberty availsble to man. If wrongs are committed we have to blame but ourselves and our fndifference to the principles of Gemocrucy. We can't blame the Constitution or the Flag or the Throne. The country will regard these men who have gone down, as heroes, and the youngex men coming ap will be influenced for good by the examples of these brave men who sacrificed their lives at the aftar of duty in order to do their all to protect our liberties and freedom.
On motion the debate on the Address in Reply was adjourned until to-morrow.

Mr. Abbott gave notice of question.
Mr. Winsor gave notice of question.
Mr. Lloyd gave notice of question.
Mr. Grrmes gave nolice of question.
Mr. Kent gave notlice of question.
Mr. Coaker gave notlce of question.
Mr. Coaker gave notice that on tomorrow he wonld ask leave to intro-
duce a Bill entitled: "An Aet to regulate the employment of the men engaged th Loggling."

It was moved and seconded that when the House rises it adjourn until to-morrow, Friday, April 9th, 1915, at thrse of the clock th the afternoen.

The House then aljourned aecordIngly

FRIDAY, Aprll 9th, 1915,
The House met at three of the clock in the afternoon, pursuant to adjoarnment.

## BEPPORT TABLED.

Hon. Colonial Secretary tabled Fourth Interim Report of Dominions Royal Commitation.

> QUESTIONS

MR. WINSOR asked the Minlster of Marine and Fisheriea to lay upon the table of the House an Itemiged etatement of all expenses connected with the propagation of lobsters in Bonsvista Diatriat the past year, 1914, and the names of persons to whom smounts were pald, the amounts pata to each, and for what purpose.

MINISTER MARINE AND FISHER-IES.-The answer to this question in beling made ready.

MR. Lloyd asked the Hon. Minister of Ftasnce for a statement showthig the quantities of goods tmported, and the revenue received respectively from thera: ( $a$ ) between March 11th, 1914, and Juno 30th, 1914; (b) between fuly 1st, 1914, and March 21st, 1915; under the heads and sub-heads, bet forth in the Revenue Act, 1905, as smended on Mareh 11th, 1914, showing In each case the fncrease of revenue umiler these heads from the increased turif of Marcis 11tis, 1914.

HON. MIN. FINANCE-The anaver is beling prepared.

MR. GRIMES asked the Minister of Publie Worles to lay on tho table of the House returns of all moneys npent in Bay de Verde District on roads
the past twelve months; to furnifh a Het of amounte sent out to each setthement in the District, and to whom sent.
MINISTER PUBLIC WORKS -The answer is in course of preparation.

MR. GRIMES asked the Hon. Coloalal Secretary to Iay on the table of the House complete returns of Patriok Doyle, Relleving Officer of Gull Is lunt, and of William Garland, lato Re Heving Officer of Lower Island Cove, both in Eay de Verde District, for the years ending 1911, 1912, 1913, 1914 and for 1915, to date; to furnish the names of all persons to whom rellef or donstlons of Government moneys of any kind have been given out through the abovenamed persons, and the amounts to each.

HON. COLONIAL SECRETARY. The answer is belng prepared.

MF. KENT asked the Hon. Minister of Finnnce to lay on the table of the House a statement showing the reyenue and expenditure of the Colony to each of the six months, ending January 31st, 1915, and for each month in the corresponding period in the years 1913-14 and 1912-13.

HON. MIN. OF FINANCE.-The annwer is in course of preparation.

MR. KENT asked the Ft. Hon. the Prime Minister whother any loan or finumelal asslstance has been recelved by the Government of this Colony from the Imperial Government; if ao, what is the amount thereof, for what purposes, and on what terms and conditions was the same recelved; has any expenditure or appropriation been tuade therefrom; if so, for what umount and for what purpose; also, to lay on the table all despatches, correspondence and othor papers relating to the same between the Government, the Imperial authorities or any person else.

RT. HON. PRIME MINISTER-THE Imperlal Government has made an advance of one million dollars to this

## ADDRESS IN REPTY.

The adjourned debate on the Adthese in foply was resumad.

MR. STONE-Mr. Speaker, I rise fos the purpose of maiding a few remarks for I do not want to let thls opportunity sifp by without mnking some silight comment on the speech from the Throne. It is fadeed of an extraordininy nature, but perhapa this Is owlng to the war conditions now prevalitig all over the world and is I may kay, Slr, not altogether so retasurkible for what it contains as it is for what it does not, When we chme fnto the Hease and were confronted by the fliga of Great Britain and the Alles, we were reminded how the mother country is fighting for her existence, and it is gratifylige to per-
eefve that in the present conflict the people of Newfounilland maintain wo patriotic a view, The intense serious. ness of the situation is brought home to us by the fatet that alrondy some of our men, who bravely went forth to dafend the Emplre have sacriffeed their lives, And it makes as teol very proud, when we consider that thuy have done so. Never before In the annals of hifetory have we had the ocea. slon. I hope, however, that soon this Furopean war will be over, that fhis war forced on the world by the German Emperor will be brought to an early end, and that Great Britain will emerge victorious. A great number of our men have responded nobly to the eall, and I feel that they wII give a good account of themselves, so that we here in Newfoundland will be proud of them, proud of their comine forward to protect our dear old Newfourdland. I think it sutflefent to say but a tew worla concerning the war because it lyan atready been discussed and dilated upon very fully in this House and all over the country. With regard to the Speech from the Throna. I confess I sim altogether disappofited to find there is no provision maile for the people of this colony who to-day aro out of e/a ployment I am thoroughly in acoovd with the proviaions of the speeca in reference to those who guf. fer partial or total disablement Whllst engaged on active service-t measure which I feel eure will command publie sympathy. On this side of the House we shall bo gind to give. all the support we possibly can (\%) this measure. Some financial provision, of courae, must be afforded io those left behind deperdent. As rogards the seal fishery, I may say thist 1 regard this as one of our most Important assets. It is unfortumately very bad thle year, and the soal tish:

 Finell the manding of the Adinom If Be hon manhior for Hiarhor Gonos,

 gest that will be a freat pincaure to HIt that mant tif. I tote phat in lifs foreds he laso kreat ntren one the then
that he was the son of a flisherman He was very proud of it and told us that none should be ashamed of hls calling and ho dwelt at great length upon that point. I was wondering Why the Covernment had assigned that duty to him and why he dwelt on the questlon of calling and it struck me that the reason why the Goverament had assignod the seconding to him and the reason why he dwelt so muck on this quention was that the Prime MinIster naw the end of his term of office approaching and lie thought it fit to ask one of the calling followed by Mr. Parsons to "undertake" the duty of attending to the obsequies.
Sir, it is natural that the war should overshadow evarything-it enters into an our ealeculations, this kreat event of the past. year, this great event that hangs over us but there was another event that had a marked effeet on Newfoundland and I was pleased to note in the Speech from the Throas that the Government fintends to introduce legitalation as a result of findtinge of the Comminsion to enquire into the sealing disaster. Let there be no possible doubt but that such legislation is necessary. I remember a remark made some years ago by the then Colonfal Secretary, Mr. Joseph Chamberlain, in reference to a certain Indusery. It was to the effect that if that inductry could not be carried on except by the loss of a large number of lives, then let that industry ga . This is the question we have before us; if the sealing fudustry cannot be tarried on without, or cannot bear the cost of preventing disasters and loess जf He, stech ne we experlenced in 1914. let that induatry go. it it not worth keeping if it costs us 250 men . The dangers are great and at every move the life is risked. We should considor whether the voyage is worth the rlak which is tnvolves.

A good deal has been said in refer:
ence to the sealing disaster and the punishment of those responsible and 1 want to define my position. I beHeve that it is possible to assign responsiblity in these cases but this House must assign responsibility only by lectalation. This House is not fitted to be a tribunal. Thas Houso in not a court of Justice, and it is not proper that this House should inflet pumlahment directly upon the offenders. What they should do is to make a law, under which persons responElble for such condact, would be tried before a Court in the ordinary way.

Now, Sir, to make reference to the deflett of this year and the deficit of the past year ending June 30th. That deficit was not unespected on this stide of the House. It was foretold long before the session met; it was foretold last session by the Opposition on account of the Government not making atitiftectory finan fial arrangements for the year.
It will be remembered that even the House was distinctly warned of it. and the budget of 1913 was termed an election budget of course the sug gestion was disregarded, but now it appears we were correct. It wIll be remembered that when the duties were taken off, it was pointed out here that with the reduced revenue it would be fimpossible to meet the usual expenditure. The Minister of Flinance told this Honse Just previons to the eiection that that Budket would produce a surplas of $\$ 50.000$, and now he armits that ingtead, there was a deficit of $\$ 300,000$, or that his estimate wus $\$ 850.000$ out. Last session he had the means of reconsiderling his posttion. He could sately have reconsidered the matter and come in with his story, and we could not hilve satd but that it was to some extent genuine. It will be remembered also that he made a proposition for taxation to the Government here. He computed that
the proposition suoll lirian fin 1730 , 000 per year. as the roxute of what meemed to lifte to tol an extrinerathary year, lhe found it necesperr to hropesa is further tere in the torm of a =ruax ef to per eent, which be rald would strafghten thtuis in. This St mithin: ed woald bring in seep,00e extra, atad tepe got towarin the firmat rear endlar Jusen soth' lunt. So the ponttonn of affitin in this: in the preveedier year he mide that there would lae a iituptian of $\$ 50,800$. Tho turat murlar the came back and anked for t2texe0 meve, to that Mis esthunten were seariy sabepee oat but with this extra fire visi gathe to meat the expmathere. A few dugr amo the Cunrifian Coveramont obtalined is low, which thive had ofternd 18 manther aipo at 4 per Gent; with the spproral at the Ctam eillop ot the tricliequer. How Davil Hoyd George, they sot it wa the mar-
ket, but at $4^{13 / 2}$ yer eent and at 99. That la; for every $\$ 99$ they recelve, they must pay back $\$ 100$ with $41 / 2$ intereat. It is unlikely that we are going to do better than Cannila in this respect. This is but one instance of the lack of financlal foresight on the part of the present Government. Bifindfolded, the expenditure has been increased regarilless of the reverue. We were told the other day that the cost of the pablic service for the last 4 or 5 years had incrensed $\$ 900,000$, End yot we find thet last June there was a deficit of $\$ 300,000$ in ane year, and, I fear, a kreater deficit for the coming year. So reckless has been the financing of the present Government that we have not even got the $\$ 500,000$ reserve that we had to our credlt a year ago, $\$ 300,000$ having been taken to balance up the accounts last June 30 th, and the other $\$ 200,000$ with the extra faxation is to be ubod to level up the cefloit of this genr. That is, Sir, our present position, the worst the Colony has had to face, and this side of the House is anxiousiy looling forward to the outcome.

There is hope in the fact that in spite of war which eommenced last August, and the consequent dislocation of trade, through the effectiveness of the British Navy our trade was goon running as usual, and thus far only one of our fish vessels has been sunk by Germany, notwithstanding the fact that we have been over since carrying on our trade with Spein, Italy, Greece and Brazil. I have been in this country for a Jong tlme, some 25 years. and have seen some things of the recuperative power of the Colony, I remember the great fire of 1892 , and saw how quickly the city whs rebnilt; 1 saw the 1894 Brnk Crash, Bud how quickly the people recovered. and how in 6 years we were sgain in a state of prosparity. It is in the recuperstive powers of the Colony, then, that Hes the hope of our getting out of
this without firancial disaster,
RT. HON: PRIME MINISTER-Mr. Speaker. Just two or three words in reply to the hon. member. I did not Intend to add anythine further to the debate, but I think the observations Which he has made call for two or three remarls from me in reply.

I alwayn like to hear tho hon, momber speak, and as a rule, if properly interpreted, sornothing can be learaed from hin remarks; but I am afraid he is too often a Cassandra, a prophet of evil. That is really the only fault I have to find with him; in other reupecte I rather lilee him for the fearless and open way in which he puts forward his case. But that is the position which an Opposition han nlways to take. The moment the Opposition ceares to come out and make at least an effort to put forward a strong case againat the Goverament, they are under suspicion. Their very life depends upon attacking the Government. It does not matter whether the Government is right or wrong the Opposition has to conidemn it.

My learned friend opened here today as a prophet of evil, and told us that we were right up agrinst a funeral, and that we anticipated this by putting forward my friend from Harbor Grace as the Uniertaiker. Whell, I think every one in this chamber will say that if this ofuneral goes on, the chief mourmer ought to be my frlend on tha other side, because be would fill that bill better than any man I know in this House or in thia community. He won't require to wear any crape; he has been a mourner in this House as long as I can remember hlm. Now, 1 conld close my eyen this afternoon and fancy myself back bere thirty yearg ago, when I heard exactly the same old statement-that we were golng on the rocks; and $I$ hare listened to it anuually from the other side
of the House ever since. It was always the same old story-that the country was, as my friend from Trinity Bay safc, in a most deplorable condition. But he had the trankness to say that be was perplexed as to whom to believe. That was the burden of his iny. Some one had met him down on Water Street this morning and told fhim that the country was in a most deplorable condition; but from what he had heard from other people who ought to know something about it, things were the very opposite; and he hardly knew how to make up his mind as to whether we were in a good or a bad condition. But my learned frfend, the hon, member for Trintity, has no doubt on his mind. He telig us this afternoon that we are right up agaiost a first class funeral. Well, I have only to say in reply that 1 have listened to that prediction too. for the last thirty yeara. When I came bere in 1886 it was the same thing. When Sir William Whiteway advocated the railway across the country. and was supported in his views by the very best minds fn the community, he was told that it meant ruin. and Confederation, and other catastrophes for Newfoundland. He had practically, to leave public life, in 1886, very largely for that reason, and an entirely new Government was called In because the country was stampeded by exactly the same cry that we are listening to today, that things were in a moat deplorable condition and that the bottom was dropping out of everything; and the people who do Hot always consider what they are doing were fooliah enough at the time to be mialed and carried away by these prophets of evil. And what happened? Within four years the whole country, from north to south and from east to west, wag crying out for the the return of Sir William Whiteway;
the men who turned him out were snowed under, and their names are forgotten to-day in Newfoundiand, (unlese it to be to Identify them with the depression and bad times and low prices for tish and stagnation for the three or four years that they were in power) And then Str Willam Whiteway came back in 1889. He came fa on the pollcy of building the rallway -first to Explaites, and then on to Port aux Basques-and then we bad to listen to the same tune, played by different, people it' is true, but the same old tume on the game old fladle: that we were on the eve of bankruptcy; that we were in a hole; that the country was on the rocks; and thas there was no hope of redemption. And we went on; and the Firc, to which my hon. friend has referred, came in -92, and the Bank Crash came in tha, and the Colony, through no fault of her own, went through a perfod of severo financial depresaion. We were told then that the end had come, that the: 0 was no hope-no chance of saving tac vid ship from the rocks. And what happened? After a while everythlog was put in order, and we have been salling along ever since, prospeity following prosperity, good times fotlowing good times, our revenue lacreasing simost every year imports anit exports lnereasing, until to-day we have doubled the value of our imports and exports compared to what they were in what was then considered good times. Then another change came in 1897, and Sir Whlam Whitoway was turned out again by a Party who very largely depended on the very cry that we are listening to today, namely, that we were at the end of taxntion; that no more money could be obtained for the publlo service of the colony without bankruptey. And what are the tacts? We have more than doubled our revenue sinc
then, and still the country is not insolvent, and has not gone into conrederation, or been annexed by the United States, or become a Crown Colony. If you will look at the Est1mates for 1897 you will find that slnce that date the colony has added over $42,000,000$, to the cost of carryling on the publifo servien of the colony. And then Sir Robert Bond came fito power. He came in 1900, and then there were men in the Hoase who said that we would nevar agnin see a bit of prosperity; that his comfng in meant the end of all prosperify and advancement; but he went on for eight years, and when he lald down the conduct of public atrairs in 1908 we had increas. ed our public service during that time $\$ 1,000,000$. And we were told here yesterday by the hon. member for Twillingate (Mr. Clift) that we had increased the public Rstimates, or the cost of the public serrice, sfince we have been in office nearly $\$ 1,000,000$. That is quite true, and I am only sor. ry that we have not been able to trcrease it by a greater sum, because there is a crying need all over the country for further Increases. But what I object to ts the unfairness of saying that we have done anything which cur predecessors did not do. If Mr. Speaker, you will look at the flgures, you will flind that from 1900 to 1900 -the elght years during which Sir Robert Bond was in power the public service of this colony was in. creased by between $\$ 800.000$ and $\$ 1$. 000,000 : and I make bold to say that for the fncreases whith have taken phace during the last 6 years, by which we bave thereased the annuat pablle vote by a proportionate amount, we are able to show value for value as compared with the in. creases mate by him. Why have we added $31,000,000$ a year to the vote for the public services? Because when
we came in we found most of these services absolutely perishing for need of asslstance. Take the rote for edrcatlon; we added $\$ 100.000$ a year to the pay of the starving teachers to edueate the poorest chlldren in the colony. There is a hundred thous: and dollars which might have been saved, if you like. We might have had the Estlmates $\$ 100,000$ less, but we could not have increased the teachers' salarles and we could not lave kept the schools open. We have added $\$ 30$ 000 a year for new lights and new fog nlarms to keep our people from going ashore in the fog. Does my learaed friend want us to put these lights out? We have added $\$ 80,000$ a year for ord Age penslons. For years be fore we put that vote on the statute book, Party after Party came into ofHee, very often on the promise to carry that out, and never did it. The same is true, Mr. Speaker, of all the other votes. Take the Marine and Fisherles Department, take the rellet of the poor, take the eharitable instltutions, the hospitale and all the other institutions in the country, take the Customs service, and you will find where the milion collars went; and I am only soryy, Str, that the tempor: ary set tack caused by the war and by the depression that preceded the war, does not enable us to come in here and ask for still further increnses in relation to these various public ser. Hices.
Whenever my hon, friends on the other side have no other subject to discuss they alvays fall back on the rnillway branches and their cost, on the principle that any stick is good enough to beat a dog. We bultt the railway branches, it is true, but we bullt them because we had a mandate from the country to build them; we bullt them because for years in this House, from both sides, resolution af-
ter resolutiun had been gansed cattlog for the- conutruction of theae rallway tranehes, in order to elve to the Outport people, those whio were being taxet for the main trunt and getting no advantage from it, nome of the Henaliges and advatages of millway connection it was no haphazard polJey: It was not done in the dark; we did it with our eyes ojich; and to day I way that except for the moro tomporary depresation all that we have dane in the way of durreased public nervies is more than Jnastified by the condftom of the country, I thinle it Is a mintake for these who hold pubtie ponitions in thite country to be continually and at all timen taking such a Eloony जल of our ntritrs soth publie and commerelal. I to not beHeve th the princtple of atieking our hesis in the wand and molng along as if everythtor were perfoct. 1 am : thorough bellever is publie crittolem, the Ifuilenh, ventilation and the fullest examination of all our puhlic matters, but the memiters on the other wite of the fouse know that the condition of thia country to-day is not fairly de ncribed when we are told that the Col. ony's affairs arth in is mont deptoratle condition. It is true we have hul a deticit-a deficit on the 80 th June last of $\$ 500,000$. It hus been stated agatnist me hert thit evening that when we were in war session. I made the statement that the deflicl wouta be $t 240,000$. Now, when thent statement wis mate $1 t$ ftid not questlon it. It wan eande ty oue han member on the other side and all the others that have followed have cuioted the same fig: eres. If is quite poustile that if I wore anked there inst year it a defteft was 1hiely. 1 mny have made ath enthnate, but 1 could onity have mude an extfriste The Andtor Gexiernt of the Colony did not know in the month of Oetober what the exact doficit

Was: and 1 farlite the hou memtier who made the atatement now to quote the worls 1 uned in reference to that. it Till he found that there was some enlculation In relaifion to it. But whether it was $\$ 240,006$ or 2300,000 . If was dive entirely to the caunen 1 sumensted hare on the opening daydies to the dupreastion that has beon felt all over the world and in whith thin colony bua shared. We cannot rum awny from the cyclen of capronnion any more than we can from the cyclen of promporliy which follow countries. We have only rot to fook at the nefgtbouring country of Cannda and the Provinces that make up that Domtalon, to seet phat that whole cauntry lins been afpected in preclanly the sami way, Then thls depremilon haa been tollow: ed by the mar, and if there is a defelt on the 20 th June next it will haralty loe cortended that we are to blame for that shartage or thet we are th my way reepotasble for it. I can dity bay lurn thtir eventng, Mr, Speaker. that I ami quite eatiafled that before this sesafon doses the Minister ef Fiarnise will be able to lay a atatotiont before the House whith will bin hatiefantory to everyone in it an re farde the prement tinauclat position of the Colony-or at lonit emitafactory to thoso who wast to be sintlafled and vhou ure sot iliscrastis pubile affairs from a purely party eitandpoint with fhe desire to makre a point againut an epponant Look at the cliangres which ve linve made in the polilio service of the Coloty during the fast six 3 wom, und nett thame all up, and then y ou will meiferstand why it is that we Eave lecreased the wote for that sorFice withis 8100.00 e of 87.000 .000 dur. ite that perrige Hom membira forEet the ndrance which the comatry hae Enale richt alotes the Hites not alone In ita exporth, hat to its tmporta,--atil *hen I suy ituporta I do pat refor to
that clans of importa whieh camnot falrly find a plact amongat thome whleb reprosent the earulog powera of the poopte-tirge timportations for Indastrial eomatruection and that wort of thlng-lust 1 mefer to the imports of lant year and the yenr botores, when very hutin =fil be foums in the tilt ons. cept ioed and clothes and cotelorts for our pnopis And what do theme figuren show? In 1800, the year Slr roburt Band ontme ftre power, the Raftil)atne votpet here in thin Chamber were 81,900,000; the gear he went out they atrounted to nearly $\$ 2.500 .000$, or an tiotitue of $71,000,000$ th round numhers. Now, we have been the offlee els yumrk, nint nfmost a stmither Increase hini taken plice in ofhor words. we hitve trereased the puttic wervice of the Colony in six years an mueh as our previecmmars theremsod it tr etght, but there lias been a larke proportionate therease in the earnilus pawer ot our people, as mameured lay the imparts and erpertr of the Colotry. If youl witt look at the traports for 1900, Mn, Speaker, you will flud that they amouated that year to क5.4Ftamen in 199世 thry hnt gove im to $111,150,000$. or an lacrease in elfight years of $\$ 4$ e 000.000 : and during the lant ulx yeara they lave increaned over thione.000. Now, I trike it thist this lo aboul aid fair a tent of the prosperity of the Colany as one could find. side by side with that youl have your exports, chometry is properttintitir tilofifitu. In 1500 the total experta frome Newtoundland amovinteil to $\$ 5000,060$ ( 1 mm apoaklag la reand anmbera)s in isots हैहोt Jiati iftichanti, they nmpumted to ith,0e0,00e; and that yoar thiey amounted to $\$ 16,00 e$ not. If that is not a test of thn sdrancement and
 tresaed purchatas powur it then peaple, then 1 dout know aripling inbout it. Nuw, what aro we guldg to Jo" Are we solng to slt diwn and not
thelp the country? Are we golng to be conlent witb the aume namber of I fhthounes and tog alarme that were to existence forty years ugn? Are fer polngs to deay the petilomer that come in lient day after diey from the cid people of the coantry for old agw genalons and continue to dole out frimer rellet at 3ce in fayt Aro we gotory to contime to permitt the chitldfun all over the country to grow Into manhood without knowing the rualmenta of educatton? Or, are we going to do as we have done, increase the Elucution sraut in 6 years by 3100,000 ?
These are the rearons why there is * tiefleit today, and I think they are tury commenduhte reasons, I to not thare the हloom of my friend from Trieity who has fust apoken; On the eontrary, 1 think the outlooir for the tutare te liriaht for Newfoundiand and for evergome In It, and I Justify that etatement hy the atatlatics of the past.
look at the tmporte and exports of thls country for the linst fitty yoirs. and 1 see the arnafuat limpirovemisat in the condition of the people of the country as meatared by these figurea. Gur people are liviag better. They urn hetter fed, better cfothis, and better educated. There was a tume when many a man who today in wearthe broadefoth had to put up with in eanvall Jumper and take 70 cents a day, where today he is getting $\$ 1.50$. And that beisr out the statement Ghlek I have made Thine is mo Justi Hication whaterer for the gloomy ouflook that has been paluted here thts traithg: We could nint bave avolded thle war, Countries that are not aklu to the Britinh Emplite, as we are, are tuffering today. Our Itnanrial porition today in not any worse than that of Cannia, our areat nelchbor of s.000-600 people at aur doors. Because fie spinder thrae wittios is na reasum why another shoulit spend two multiens; it may len a ixuacan to the contrary: the baposathire of one mittica mas Sinte the acher as extrmentinces anat Jet be niturn he is fartined in delag so fiecuent hin itit it hefore whoe he wan Is sinathis Government if is not a dertification. bet a enoulemention.

There le waother carfoes thlog that 1 naler med waniler shertber be bad ever hat doens to ameloanty cotanlder It. Al-
low the to quote a rew figureg concerning the revenue of the country:

In 1260 the imports were valued at $\$ 7,400,000$; the exports at $\$ 8,000,000$.

In 15 vs the imports were valued at $811,000,600$; the exports at $\$ 11,000$; 000.

In 1914 the imports were valued at $\$ 16,000,000$; the exports at $\$ 16,000$. 000.

That means prosperity. But it motans something else, namely, that everytiting that the country earas, it spends. There ie not a dollar left in reserve. If the exports of this Colony were $\$ 8,000,000$ in one year, and ithe importe were oaly $\$ 2,000,000$ that would be money saured and hept in the country. But when you look at what the exports and imports actually amount to, you find another state of nifairs. The reault is, there must be depression. The foult is not with hif Governmont any more than with any other Government. There are ceprcseione in the hiftory of every country. We all know it. Then why not provide accordingly? That is the reasen for the conditson of the country at present.

Now then there is another thing that has not been taken notice of: these flgures proye that the expenal. ture of ell the borrowed money in this country, las not created any prodnctiveness in the colony. The price of codisis had slsen, but that is not through any expenditure of money in this country. We are depending solely upon the ammal production of thls country.

1 find that there are certain feat. ures in the financing of this Colony that no one lias pald any sttention to. Improper expenditures are not conflued to any one Qovernment in thils country If fis no use to discusa now who does ft , but what has been done. What are the fundamental crrors?

How can they be obviated? My learned friend talks about the future in a very optimistic vein, but the financfal condition of the Colony is worse than It was represented today. This is not a time to talk too mach about that, bue the Premier must not be led nway by his great tendency to be optimistic. There will be no such immedate rush of prosperity when the war ands. The depression then will be tweaty times worse than it is now. took at the millions of men struggling back from the armies finto the factorles of the world. Every country at war is now expending vast loans, and while this expending goes on prosperIty seems to abound. That is what is wrong here today. When the war is over, can the world immediately respend after the great loss that has taken place. We have to expect a still worse depression than we have at present What did an hon, gentleman say in the Upper House in movIng the Address in Reply? That we mitast look for a decrease in the price of fish. Upon what ground did the hon, gentleman base this view? We have got to ask the people of this Colony to belleve that economy is necessary, It is better to tell the people the truth. What we spend they have Eot to provide, It aeems to me that that is the true patriotic way in which to look at it. We had better not make too much notse about our diffculties just now; but we should not enfeavor to delude the people into an optimism not based on fact,

The Gebate was adjourned untll Monday.

The remafoing Orders of the Day were deferred.
It was moved and seconded that when the House rises it adjourn until Monday ilext. April 12th, at three of the clock in the afternoon
The House then adjourned acu mil ingly.

MONDAY, April 12th, 1915.
The House met at three of the clock in the afternoon, pursuant to adlournment.

## REPORTS TABLED.

RL. Hon. Prime Minister tabled the Report of the Commisetion of Internal Economy.

The Hon. Mintster of Finance tabled the following financial statements:-

Detalled Statement of Game and InInad Fisheries Board, 1913-14.

Colonial Secretary's Department Trust Account, 1913-14.

Statement of Current Account of the Goveroment of Newfoundland for the year ending 30th June, 1914

Balance Sheet of Treasury Account for the year ended 30 th June, 1914.

Public Debt to 30th June, 1914,
Statoment of Teacherg' Pension Fund for the year ending 30th June, 1914.

## PETITIONS.

MR. DOWNEY-Mr. Speaker, I beg to present a petition from the inhabitants of Codroy and vicinity for the oroction of a lighthouse on the S.E. end of Codroy Istand. There ts urgent need for the erection of a light on this particular point, as Codroy Is the only larbour of refuge on the sitretch of one hundred and sixty miltes of coast between Port aux Bascues and Boy of Islands. Owing to Codroy falund being in the shadow, se it were, of the Cape Angullte Mountatns, which rise sheer from the water immediately belind it, it is almost impogetble to dletinguiah the Island from the mainland in stormy or foggy wenther. When maling for the eutrance to Codroy, the light on Cape Auguille is obseured, which intenaifies the difficulty. Many vessele bound into and out of the Gutt of SL. Lawrence have uow to fight out many a hard time in open water, which they could readily avold were the light here sought for in operation. I beg that this petition be
referred to the Department to which it relates.

1 have also a pettilon from Flat Bay -a place of some 500 peoplo-ialcing that that place be made a flag stattom of the rallway. Owiog to the absence of a regular station, the gooda bul. fer considerable damage. . They ask the House to make a provision for the amme It would be a matter of very little expenditure, I bes leavo to refor this petition to the Department to whtel it relates.

I also beg leave to present a petftlon from the residents of Flat Eay. asking that the Legislature will order the construction of a freight shed and walting room there. The tratris already stop at Flat Bay, but as there is no way of protecting freight rocelved of brought to the slaing, for shlpment, from ratin and snow, much loss occurs. Flat Bay is an Import. ent settlement. The interests of 300 people are involved in this roquest, and I certainly hope the House will be able to accede to the prayer of the petitioners. I aak that the petition be raferred to the Department to which \& relates.

MR. CLIFT-I beg leave to present a Detition from Samuel Paraons and othors of Lugh's Bight in the Diatriet of Twillugate, wherein the petitioners ask for a telephone connectlon with Caldwells. The distance is not very great, and the poles are already there to be used in connection with telograph service. So, therefore, it would merely be a matter of putting up the wires. As this is extremely importsut for the Inhabitants of that part of the country, I would ask that it recelve a favourable respouse from the department to which I asil that it be reterred.

I also beg leave to present a petstion from the fahabitants of Frlday's Bay, in reapect of a road, and alto a petition from Eenu Hewlett and others of Port Anson, asking that that place

## LOGGING BLLL.

Second reading of Bill entitled "An Act to regulate the Employment of the Men Engaged in Logging."

MR. COAKER-Mr. Spenker, In moving the second reading of this bill I do not intend to delay the House with any lengthy remarks. This Bill is very much like the one presented lapt year that passed through his chamber with one or two slight alterations. Last year's bill provided that each man should be supplifed with a mattress. That elauge has been taken out, and we are leaving the matter of beds to the discretion of the Govern ment Inapector, who was to be adpointed under the sth Section of lnst year's Bill. I do that becuruse I find that the employers are anxlous to do all they can to fit sleeping bunke as comfortably as possible, and I think It better to leave that to the Government Inepector. Ariother thing I dis coverod while up vistling the camps and that ts that mattresees were provided in several camps, but at the end of the season they had to be thrown away. They could not be used again. The system of employfig men tu the camps was such that It would be unsanitary to keep mattresses there. One crew would come in October and lonve at the end of December, Another crew would come then end stay untll Febraary. Then another lot would come. The same bed would bo used by threo men in succession. That was a matter which last year caused some rrletion amongst etuployers.

The Anslo-Nfld. Development Com: pany hnve agreed with me to provide a canvas bettom in the bunki. If they do that, all the trouble and dlscomfort will be removed. At the present time there sa trouble similer to that in regard to the senilag stenmers. The bottoms of the beds are formed of reugh lamber.. The men put down green bows. The A.N.D. Co, provide
a canvas covering on which the mon can put muterinl, elther hay or sprace tops or birch rind, which they ean always get around tho camps. Then when a man leaves, ho leaves the coverlng, and the next man comlng along can make a new bedding for himself. This covering is tnken from the campts at the end of the reason and washod, so that it is used again next season.

There is also an alteration in Section 4. The Section now glves ton days after any complaint is made by the inspector before any action is taken. Last year's Act provided that the Inspector should complain, and if there was no remedy of it, he could take retton. Now, 10 days are given before netion is taken.

The clause about a minimum wage was taken out last year, and it oan stay out.

All the other clauses are exactly similher to the Act of last year.

I do not think thare is anything in this Bill that employers can object to. It is very clear and very reasonable. Whon we consider that there are such a large number of men engaged in lossing, we must come to the conclufito that it fa important to lavo the industry properly run. These companles have made it a permanent in. dustry. They intend ta go on from yoar to year cutting logs, and so they must see that it is to their own bonefit to make the men comfortable. The men wre more content than ever, and are rettine more used to the busin esas.

They find the food fe Improving. fiecommodation is tmproving, and there is an limprovement In the cimips throughout the past twelve months. Miny of tho campe bullt since lant year hurve been fitted us tatid down in this BiII. They hare put in board Zlooring and board roote. No one could complain of the food that I found in the camps at Badger. I beld a meoting there one night, and asked the men if they had any complaints.

Betne of the boansa Fure there. One or two thoutht they thould have some thinge from boans at broalfant. it whin a constaucus feast of beank. If they could zut petatone it woald be a chrpge, and the Companles aris polng
 botailant. Some mpon thought ther should zet is tutle checse for tom. The Companles are solag all is their power to mite the ziofic combitht, becanne they will wot be ulile to gent the men to do thas worlir eutise they make the campe comitortable.

Thily हot if goont wime. The win are promalied कis a moum, trat rany zot te5. Sourt tich wha fo 日p with A promion of \$3s got valy tit becaune thiry are in ftetle ntack. Theiri were very fow complainta, and they are not tavture an mituch troulte nis in the pant. I lo not want to lave any frictron betwoen the Comparies and the mes. They are doing their bent to tioty tho titrir buit Gut the mitil are of oplaton that the Legtelature should take the mattier up and somethlag whould be tone. We found tremant utir tiontin it Council moolugin apmiant the Upper Honne ta not pasa tige thle meurure I hope we won't have any troubte this pear. ## NATURALIZATION OF ALIENS BHLI

Beomad readins of Hill entilled "An Net reapecting the Natarnallation of pliems:-

RT. HON. THE FRIME MIMISTER -Mr. Bperker in mortant the second trodine of thls bill 1 may say that it In fructically a copy of the lmperial Aet dealleg with the satamillsation of fillums it in the outerme of a groat tamy nugutiatloms and conferences that have been splak on for a great fuatiy years betwean the Dominlons fad the mother country. The prin. tiplie of the Bint hase beenf put in a fery attnactive form by the statement if one utatestian: hes said it means that a Britioh subject anywhere is a Jrithab subliect everywhere. In this fountry we hure had ou the Statute fook an Act rempecting the matarall filfor of Allithis. It goes back to a tirmen prior to the old comiolidation of Sis72 and atnce then there have bern nmenctmonter dealling wthl the rishta of allems in rezard to bolding land ind other rifhis.
An unemaly that has exinted for thn Joint lias boon that a Britiah ambject tinturalired is one domintori lir not a tiritish abject when te fenves that Demintom, and any rehtis and privl fugs which they exercised when Flirond were due more to the courtesy of The Mafenty'n Hovernment and hir plonipotentiaries than to any rigits For tobtince ith American who went to live is Canada and becante a Brit. tsh aubloch, if he left Canarda and Went to the States he became an Am-

land he would represent no nationality whatever as far as his rights were concerned. Thls anomaly has been considered for a numbor of years, and this Bill ie the outcome of negotintions, and comblines all the good points in our own legislation with the unlty eiven by the Imperial Act making a Britiah aubject in any dominion a British aubject anywhere throughout the Empiregiving him all the righte of a Brttish suliject all over the world In other words it is Imperial naturallisation. This Act while conferring these righta and privileges thronshout all dominions does not deal with the question of the righes of eltiven. ship. It does not touch that at all.

As I said the matter has been for some years the aubject of negotiation between the Dominions and the motheer country. It was before the Imperial Conference of 1907 and in 1908 it was considered by all the Dominions In 1911 it was again before the Im: pertal Conference and the followlag propositions were then agreed to:-
(1) Imperial naturalization ahould be world wide and uniform. Each dominion can bo loft to deal with it by Legislatlon as it thfoke fit,
(2) England finds it necessery to maintain five years as a qualification pertod.
(3) The grant of Imperial natur allipation is in every ease ciscretionary and shall be granted by the govern: ment of the area in which the last twelve months was spent.
(4) The imperial Aet should be so framed as to Induce every Dominion to adopt it.
(5) Nothing now passed shonld affect the validity of local lawe.
It will be noticed that the qualification period to become a British eutbjeet mey be spent anywhere $\ln$ tbe Empire but the last year must be spent where the naturallsation is granted.

If hom. members will look at the Bill I will describe brleily the Soctions so that we may be able to follow it a little moro closely when we go into Committee.

Section (1) simply deals with the derinttion of a Bettish subject, in othat words who may be deomed a raturalieed British subject,

Section (2) deals with the form of certificste and its contents.

On pare 3, Section 3, the effect of the certiflcate of naturalization is dealt with. In other words the righta to which he would become entitied on recelving a certificate.

Section 4 deats with special certlflate in cases of doubt.

Section 5 deale with the case of thoee under a dieability such as minors.

Section 6 covers cases of those atready naturallsed.
Section 7 deals with revocation of certificate.

Section 9 - This section deals with those Dominfons specified in gohedule 1 of this act (for this is in ${ }^{3}$ parta of which this is Part 2.) who hire not adopted Part 2 of the Brit (sh anturallsation and status of Allens Act 1914.
Part 1-Page 5-Sec. 10 deals with the national status of married women and infant chllaren.

Sec. 11 dealin with the national stathe of Beltish and Alien wldows.

See 12 deals with the national status of chlldren, while minors.

Sec. 13 denle with those who voluntarlly become naturalized into any other country.

Sec, 14. Page 6, deals with persona who though bora British subjects hare boen adopted by some forelgn country.

See. 15 dealis with British subjoots realdent in certain forelgn states.
Suc. 16 deals with tibertles dutfes, and obligatlons of those who hare ceased to bo Britizh sabjectio.
see. 17 doals with the Status of A.1 tue an regards pruperty.

Boe. 15, Pare 7 , deals with the trial of alfens atif if naturatborn fir* tele soljecte.

Bec. 19. gives tho Governar $\ln -$ Coun ell the poreer to make regulatlone getenitly fir earryling into elfect thy otr feeta of thes Act. and almo dente whts Home particular cases tuifonte1.

Formeriy all these Boards wora appointed by the Governor and Counell; but lately a practice has grown up of arranging for meetings to be held and Boards elected wherever the peopls asked for it and then the Governor-inCouncll would appoint the Boards so electod.
1 say that the information obtained fram thif report is not at all practical because Mr. Speaker, the de afre of the Government this sesalon is to bring in a bill that will suit the desires of the people and especially the people of the outports to whom the Act will apply.
It may be dealrable at this junction to give a short history of this movement. Local Road Boards were flist appolated in 1832, and were appointed by the Governor in Councll. The malso up of such boarde was faulty and objectionable fos such a board would nuturally be. The yarious membera of the board moreover were uspatd, and had to perform their onerous dutles freety and often at their own expense. Like the School Boards they worked for nothing. Whlle there might have been milatalies in the past Te are hopefal that there will be leas in the future, and wo must give them all credit for the valuable and gratultons work they have done.
In 1888 an act was passed under gir Robert Thorburn's Premierahip and mnother nupplementary one was pacsed in 1890. Under that act power was conferred upon the Governor In Councit to define necessary limits as they thought fit. The petition under that blll had to be approved of by two thifda of the qualifled electors, and on a petition signed by these beling presented to the Governor in Councfl, It was ordered accordingly. Under this blll a majority of the electors will suffice for this same purpose. This act was law until 1897,

In that year the first 17 aections were repoalod and before any benefit or otherwlse had reaulted, in 1898 a bilt was passed reverting in the matn back to the bill of 1890; "An Act for the Adminiatration of Iocal Affaira in outport Districts" The point is how over that none of these acts were ever avalled of, or if they were it was only in very rare cases. Every effort was made to make these arrangements as simple as possible but the people did not take advantage of them, although they have been on the Statute Book so many years.
In the menntime a systom has grown up by which boards are elected In a very stmple manner by public meetinga prasided over by a Magistrate; and these boards are recognized by the Governor-in-Councll and are appointed just as if the exact letter of the liw had been carried out. Today wo have elgit of these boards in Twillingate district, three in Fogo, sixty in Bonavista, twenty-seven in Trinity, ten in Port de Grave, one in St. John's East, at Bell Island, one in Fortane Bay, one in Burin, and thirty In the district of St. Barbe. Now, as I have sald, these boards have been elected in a vory simple way by rulea and regulations which have been formulnted by the Attorney-General, and they seem to work out all right as far as these particular districts are concerned. Whether the whole, or a rearonable and falr proportion of the people within the boundarles, are enabled to get to the election is a matter, of course, that I am not able to speak about. After all, one of the principles that we will have to afm at in any logislation will be not to make the boundarles of the vartous distriets no large that a great number of the people will be precluded from being at the mecting when a Board In belng ctocted. In some places, such as Grand Bank, Placentia prop-
er and many other settlements that we know of and are familiar with, the boundaries are very small, and it is a very easy matter to have an electlon with a fair hope that all the votcrs in the settlement will be there. Take Grand Bank, with 1600 people and probably 400 voters, as an Illustration. There you have a settiement not much larger than Bannerman Park. Probably there are not two houses in Grani Bank a quarter of a mile from each other, so small is the radius. But on the other hand, take a case like this ( 1 am merely citing this as an llustration): In one section of the district of St. Barbe, where the Board has $\$ 124$ to expend, there are included the south side of White Bay, middle Arm, Beck's Arm, Bear Cove, Wild Cove, Pound Cove, Westport, Purbeck Cove, Beeches, Hampton, and one or two other settlements. Each little place has a small expenditure, and the diftioulty would be to get a falr proportion of the people within those boundaries to come to a common meeting. 1 have had prepared a list of all the road boards all over tho country and the area over which they exercise jurlsdiction. That will be important and of value in arriving at any decision on the question of settling the division of the jurisdictions. 1 have also had a statement prepared showing the population of the settlemonts in each district. For instance, there are something like 1500 settlements in Newfoundland. of these 1500 settlements, 950 have a population of lees than 100. Take, for instance, the district of Fortune. There are 107 settlements in that district, of which there are 69 with less than 100 people; 23 with under 200 people; 11 with under 300 people; and oaly 4 with over 800 . Now, a population of 300 would probably represent about 60 votere, so that you see it will not be a very easy matter to deal with, unlesa you group a number of amall set-
tlements together in order to bring the prorisions of this Bill into operation. On the other hand, there are a number of important settlements in the Island that might adopt some sys. tem. For instance, thare aro 63 settloments with over 500 of a population; 5 with over $3.000 ; 7$ with over 2,000 ; 26 with over 1.000 , and 46 with over 700. Many of these settlements, I have no doubt, would bo very glad if some simple way were devised by which they might avall of the Act. The difficulty will be, I think, in linkfing up sparesly settled plasea at a considerable distance apart. Now, this BII proposes an amendment to the legislation to which 1 have referred end which is at present on the Statute Book, to the effect that the Governor-fr-Councll may upon petition sfgned by a majority of the duly qualified eleetors of any town or settloment having, within a radius of three miles, not less than one hunired electors, from time to time, by proclamation prescribe sectional divisions in this Coloay, to which this Aet sinall apply; and shall by such proclamation define the limits and boundaries of each aectional diviston; which seotional divisions aro in this set deseribed as a section. Now, that can be reduced. if desirable, or the radius can be fricrtased, or the number of duly quallffed electore can be redueed. The next section merely deals with determining the valldity of the signatures to the petition. As 1 sald before, Mr . Speaker, I know we aro all very ansious that a bill may bo the result of the resolution of last session. I think that when we get into Committee on this BII-as I propose to send it to a Select Committee-we may be able to arrive at a conclusion that may be satisfactory.

MR. KENT.-Mr. Speaker, I don't think this Bill ought to go to second reading this afternoon. I must say frankly that I am very much disap-
pointed with the Bill, and I think it meets neither the need nor the deaire that exists almost universally throughout the country for some reform in the matter of loenl adulintsitration. Recognizing the difticulties which had to be faced in dealing with thls matter. we on this alde of the House propared resolutions a year in advance, in ordor that the problems which the question involves might be taken up serlously during the year that elapeod between the holding of the last session and the present one. Everyboily must recognize that in approaching the problem of organizing a syatem of control of local affuirn in this Colony we nire up agafust serions dificulties that no person can minimize, but I think that If these difficulties are aerionsly faced with a dosire to produce rosulta, thoy can be overcome. Now, the measure which is before us this afternoon is, 1 think, no improvoment on the conditiona which exfit it the presont time. However, the Prime Minister has in his possession, which he proposea to table, a quantity of fifformation which ho obtained from various sources in the country and which he lad compiled by the Department of Public Worlss. This, 1 think, ought to be submitted to the House, so that the House would liave time to conelden the information which it contains. But I cannot help remarking here that I think it is a plly that this information has not beon more serfourly dealt with turing recess, and some form of proposale terfously made for the purpose of organising the country on the lines that were univeranlly accepted by the Houne last sesuion. i don't think that this Bill ought to go to socond readins this afternoon, and I would ask that the matter stand over until we hgve had an opportunity of examintog the information whitch the Prime Minister proposes to table.

RT. HON. PRIME MINIBTER.-Mr. Speaker, I have no objectlon what-
ever to the Bill standing over until to-morrow for second reading; but I cais nesure my learned friend that the matter hin boen talten up most serlously. What the hon. member asked for last gession was that the whole country should be dirided into districte, sections or diviaions. That would meun, it done properly and leg: dilly-if you have an enquiry, and there is no other way of doing it-an expeaditurs of thousanda of dollars. Now, I am propoaing here a very sim. sle way in whileh the present system may be extended. If that is not desfrable, I am propnred to ncoopt any propoed that may bo made by any member on the other slde of the Fouse, if it he fair and reasonitble, as I liave no đoubt it will bo; but I objeot to my learned triand malting the statement that what in anbmitted here this aveulug bas not been serloualy considered. I cas assure hlm that it hat beca soriously considered, mand if there is no bill here thits evenlag divielnes the country up Into divisfonal diatricts or sections, it is on account of the groat dificultios surrounding the question. You have only got to look at the paperis that I propose to table to see where theas difficultes come in. There are cases where there are a dozen settlements under ono Road Board, expatiding $\$ 100$, with a furlsdiction of twanty miles. Well, now, if you think you are mofag to get people to travel twenty or thirty milles merely to cast a vote in relation to a smatl tocal rond bonrd with rin expenditure of $\$ 100$, you have very much mare falth thin I bave. But, however, ba that as it may, my only denire now to to give the very best measure pos. sible to the outports in relation to the election of thelr rond boards, and I shall be very glod to have any proposal from any member on the other side of the Housie or on this stide in relation to porfecting the measure. I am merely goling back in this Bill to
the principle that was affirmed 25 yeara ago in this Legislature:

MR. COAKER-Mr. Speaker, may I ask the Premler, befors we go lath the second reading of this Bill, whethor he has the original bill, which is now belog amended, printed, so that we may see the whole Bill?

RT. HON. PRIME MINISTER-It is beling printed now, I anticipated that very reasonable and proper deslre, and gave instructions to hare the bill introduced by Mr. Morine 1898, printed It will be here to-morrow.

MR. COAKER-Is that the latest BII?

RT. HON. PRIME MINISTERThat is the latest. There was a silght amendment made in 1899. The diflculty was this: The Act introduced in - 38 provided that the Governor-inCouncll should divide the whole country into ail the sections that should be required; then the Goverament discovered that that was impossible, unless engineers were sent out or some other way was deviged of getting the boundarles of ill the places that woro to have elective boards; then an amendment was mado under which the Governor-in-Councll were given power to deffine from time to time, from week to week, month to month or year to year, such places as it was thousht desirabte to bring undor the provisions of the Act. For instance, suppose the people of Cuptds asked for an elective board. The Government would declde on Cupids; then the people of Bonne Bay asked to have the Act applied to that place, and that would be declied on. But there are a number of very small places that it is Impossible to friclude under the provisions of thts or any other Act, no matter how you may desire to do 1t. To give an example, there fi a settlement in my own district, Blaclichead, about four milles from St. Johin's. There ape seven families In that settlement. Now, how are you going to deal with Blackhead? Are
you soing to send a Magistrate out there, have an olection take place and a. road board appointed, where the expenditure is about $\$ 30$ and the expenses of the election wonld probiably be more than that? Well, there are 900 setulements in Newfoundland today, having a population of less than oae hundred, and there to the difficuity.

MR. COAKER-What do you do with Blackhead?

RT. HON. PRIME MINISTER-WE leave it entirely in the hands of the Road Inapector He goes out there two or three timeg a year and deals with whatever work is to be done in connection with the repair of the roadis in that neighborhood. The game thing is done in connection with another settlement, about nine miles away-Maddox Cove, I think there are about 29 families there.

On motion, the second reading of this Bill was adjourned until to-morrow.

SEAL FISHERY BILL.
Second Rearling of Seal Fishery Bill.

RT. MON. PRIME MINISTER-Mr. Speaker, 1 beg to move the second retaling of thls Bill.
MR. MORINE-Mr, Speaker, I was just wailing for the Prlme Minister to make the motlon. I am solng to ask him to defor the aecond reading of this Bill I would ifice to make a surgention, and that is that in future all bllle down for second reading ahall not be proceeded with until 24 hours after the printod bills are lild hefore us. Then we will have had a chance to read the bill, we will know what the princlple of it is, and we will not have to be aslding to have it deferred. Under the present syatem of linying the printed bill on membors' deske fust as the motion is made, nobody can posaibly know what the priaotpls of the BII fs, and members
sometimes make unneccssary objections that would not be made if it were a rule of practice that bills should be in members' hands 24 hours before second reading.

RT. HON. PRIME MINISTER-I have no objections Mr. Speaker. I would poln out to the hon member that this has been the practice.

On motion, this order was deferred until to-morrow.

## PATENTS BILL.

Second reading of Bill respecting Patents and Trade Marks.

RT. HON. PRIME MINISTER-Mr. Speake- This is a bill of one section. 1 have alroady explained it to the House. It is a copy of tho Imperial Act, giving the Governor in Councll power to make rules and regulations suspending any letters patent granted to $a$ subject of any nation at war with His Majesty and also the registration of any trade marks the proprietor whereof is a subject of any nation at war with His Majesty. That is the whole effect of the Bill. We have been asked by the Board of Trade through the Secretary of State to take powers so that if desirable we may be able to annul these letters patent and registration of trade marks. I move the second reading.

On motion, the Bill was read a second time and ordered to be referred to a Committee of the Whole House on to-morrow.
DEBATE ON ADDRESS IN RE-
PLY.
The debate on the Address in Reply was resumed.
MR. ABBOTT--Mr. Speaker, 1 wlsh to make one or two brief remarice in reference to the matter now before the House, namely, the Address in Reply. The Speech from the Throne, which we hod the privilege of hearlag tast Weinesday, Hke other speeches from the Throne bitherto delivered
contained very little that would justify criticism.
In my humble opinion Mr. Speaker, 1 think His Excellency'g Ministers In preparing the Speech took good care not to outtine the polfcy of the Government as it shonld be outlined. There are many thinge, Sir, which one would expect to appear in the Speech which do not appear at all. Juaging from its contents, one would fmaghe that this little country of ours was gettingelong fairly well and was in a very good condition financlally, and the gentlomen that compose the powers that be were dolng their very best to carry out their promises formerly made to the people. But this is not so Mr. Speaker, but rather to the cuntrary. I do not pretend to know what should be the construction of a Speech from the Throne, but this much I do know that the Gaveriment of today promlise much and performed very little. "Like cats' feet Sir, they showed soft pade but carrled sharp claws". They promised faithfully to punish wasteftl expenditure, and manage the affatrs of the colony in the very best poss!ble way, and along the most economical lines without any extre tasation. This they did not do for we are awakened to the fact that taxation has been finereased to such an extent that the taxpayers are unable to shoulder the burden. I think Mr. Speaker It can be conscientiously safd that no Government Party since Britain our noble Motherland handed over to our forefathers the gift of respoasiblc government, has wasted as much public moneys as the present Government since they took charge of the public affairs of our Colony in 1909 up to the present time. I think Sir, I am perfectly safe in making that statement

It is sald Sir, that cause and effect work together in this world. "That there is no offect without a cause"

Well, Sir, the caase for the financial conditions of our colony at the present time is misrule, not war. Bad management not adversity, Government eonditions, Mr. Speaker has come about by extravagance. It has come about Sir, by building all kinds of rallways to all letnes of places stmply to catch votes.

The hon. member for Fogo Mr. Hallyard safd in one of ble speeches which be made here last winter 1914 that nearly all of the members of His Majeaty's Government were bound together by a golden chain, I think the hon, member was protty nearly right In mile'ng that statement. In fact, Sir, I think we munt all admit that he was absolutely right when we come to consider the enormous amounts paid for arbitratton rees, the big sums paid for trips abroad, the huge prlues paid for lond for rallway purposes, ten times what it was worth, and the other uselese expenditurea that have boen made too numerous to mention.

1 fall to see Mr. Speaker very much that the present government has done that has been a revenue frereasing industry, in 1908 and 1909 the Prime Minlster fiformed the electorate that If he and hls Party were returned to power of all the good thinga they would do for the peopte. They would opon new markets in Central and South America and ailso in Mexico for our codflish: they wovid give us pest to take tho place of coals. They would bulld $\mathrm{us}_{\mathrm{s}}$ five branch railways for $\mathbf{6 1 ,}$ 000,000 with no increasod taxation They would erect a number of balt depoti to provide bait for the fiehormon to help them to catch more fish, and a lot of ether things they promised to đo. But what do we find when they got the chance to redeem theee promtses.

There is no market opened in Centrai and Bouth America and Mexico. There
fis no peat to roplace the black diamond The branel rallways will cost us only about $\$ 10,000,000$. There is no balt depote establishid to assist fishermen to catoh more fish consequently the unlvorgal cry from the fishermen in the months of July and August the twa bes: months in the year for fishermen to secure a livelihood is no bait. If some of these promises were carried out the burden of living would be somewhat lessened. I would like to bee Str. all these promises outlined in the Speech from the Throne so that the poople may see that the Government hamn't entirely forgotten all about these good things that they for merly promised to the people.

The former part of His Excellency's Speech, Mr. Speaker refera largely to this awful war that is now overshadewing the whole of christian Europe, and a part of the Orlent as well. I do not profess to know very much about this war or what brought it about, but what puzzles me is that in this enHightened age in this noontide blaze of the gozpel of the Twentieth century that christlan nations cannot aettie disputes by international arbitra. Elon Instead of strife. Great many people say that the cause of this war was due to the assassination of the Auntrlan Aroh Dulse. I don't think, Mr . Speaker, that is hardly correct, I think Germany was malking preparntion for thls war for many years. I think, Sir, that the Sarajevo murder was the oceaslon, and not the cause. The reat cause it is satd Sir, was on thls wise, The German Fimperor sald to be the helr of the Austrian throne "you want to get to the Aegean, I want to get to the Euglieh. You take Servia and I will take Belghom.

Servia is exhausted by two wars, Belslum will not face me. You will of courso, have to deal with Rassla; but athe will only act like a jack in the box, pep up to very soon pop dowa

These blesplese shonld tead us te tho our writy lecrt to sortat the mother country in this awfat cristis.

This is no time, Mr. Speaker, for Suy toyat \#rittins subs) to tild his arimic. Thilir ts mo than to tean on our cara. We can't do too much Sir, to
assist in thit great struasle to pree serve Britinh Llierty.

Our protiction by the Britich Nivy, Sir, is something beyond our isptinatlon, We cam think God todey thit the horoce that compose the erewit of the Britifih dresdricughti, eruluers, and siabmarlines are our eafety In thla awful erlele The herotam of the men. Mr. Speaker, is something furprising. Thke for instanco the eughneer anid flremen who go down tinto the bowole of these ehtipe and intay thore for houre in a tomparnture of 120 degreas, almost naked, black ia Fithoilans, plling to coals and forclue the shitp to tta utmont epeed. 'Txeble men Str, ill tumy cneet win the naval battlen.

It Is sald, Mr. Spenker, that the beet of history hiar never been written. It never has. I feel lilre uring the words of a certatin poet, who satd:
"Iunt paney a flroman down below,
In the kwhul hent and torture of the firea that teap nuid dance
In and out the furnace doora that paver closa,
On In sllence he muit work,
For with lim there't ne'er a chance On hls brow to teel the outer breeze that blowe.
Flor thoy have locked him in a raom down below.
In a burnine blazing tomb down befow.
Whare he cannot see the nicy, eannot learn in time to fy
Whan destriction etaliketh uigh down below,
"Though hls anme is never mentioned,
Though we see or fmow htm not.
Thiouga the ceeds may naver biring fifn worlitly fame,
He. lo a man nocve tho otherr,
And the braveat of the lot,
And the hore of the battle funt the same.
He thif man who doen the work down below.
Form the latiour does not shilre down betow.
He in whovelling day and night, Feqding tames nblaxing bright,
Koeping up a kiling fight, down be low.

## Herolsm Indeed Sirl

Hitherto, Mr, Speaker, England has been tighting our battios, and wo as a Colons have been doing nothlng. We have not done or pald a proper part Nol is mant not in dollar fiss the Colony contrithuted to the upkeep of this great Niry which has been dotag ito much for un.

We hive fecopted all our former blesilnga, so to inerle, without even Baying thank you, and the benefite without contribution. We seted real mean, Mr. Speaker, and coneented to be riciplonte at the expense of our follow Britishern on the other aide of the water. Our former netions as the eldest disughter of the noble Motherland, rominds me of an old story whith I read some time ago of an old taan, b/s wife, and a hear. I guess muny of you have heard or read the netory; but for the benafit of thome Who aftrit hear or read it, and by why of Illustration I will stve you the bonefit of it. The atory runs thus -An old mnn and his wife were in their liftehen quittly enjoging thamselves with the door open. Unexpectedly a bear walked In. Naturally you expect the man to aasiat in gotting the hesir from the bome, or at least you'd expect him to lead in the fight, tut, Bir, in thin cuse it whe other wise. Whin he linw the bear he ran for the chimney comer and climbed upor what the old folles called the potatieks, and left Bettz, his bettor fulf, to fighit the bear alone; but courageous Betty got a rifle, almed, fired, and lilled her enomy. After the baar lay dead on the floor, atter the vlctory thits man on the potaitcks, that played the coward, ehouted out to the tap of hin volee: "Clory be to God. Betty and I idtled the liear."

Affer the victory was won you see: the man that played the coward feemed to want an equal tilinre of the work poor Betty accompltohed slagle handed. Now. Mr: Epoaker, in my humble opin. Ion, we have been doing something
slmiltar with Britain. While tho dear old Motherland has fought and won provioun battles, Newfoundland, her eldest daughter, has played the coward, acted the man on the potaticks. But now, Mr. Speaker, the scene is changed, and Nowfoundland is expected to do her duty, and she is intenided to do so. Fingland today in in great peril. This is the greatest orts. Is that we have ever seen. As an Ern plre our very extstence is at stake. England needs our help. A message comes over the water to the effect Your King and Country Need You, and Newfoundiand, Sir, is nobly responding to the call. She is letting the outside world know that part of the British Lion Is on thls side of the Attantic. We ousht to be proud of the beautiful sacrifices they have made. Mr. Parsons, the hon. member for Harbor Grace, in seconding the Speech, gave us the number that has gone from his District. I Con't ex. actly know the number from Bonavista District, but in Boniarista town where 1 live, we have contributed about 80 for the Army and Navy. One father there, Sir, has given his two boys, his only boys. They were fitted out for next summer's fishery; but the two boys went to flght for King. Country and Brilish freedom, and left father behind to paddle bis own canoe. Beautiful sacrifice for the preservation of British Liberty, Othor young men have gone and left only mother th the liome Words fall to express, Bir, what these mothers feel in parting with their boys.

I wlah to say, Mr. Spenker, that I ann not a bollever in war, but rather the contrary. I fuel like classing mysolf with Wellington, who sald: "The military peofession is a daminble professton": with Guneral Sherman, who sain: "War is helly" with Martin Luther, who sald: "Cannons and firearms are cruel and murderous
machines;" with George Fox who enild: "There nover was a good war or a bad pence;" with John Wesley, who satd, "War is the bustness of tiell;" with Moses in the Deconogue. who through Almighty God. sald: "Thou shult not kill;" with Jesus, the Peacemaker, the carpenter of Nazarcth, and the Saviour of the World, Who sald: FTake not up the sword, they that take up the sword shall perleh by the sword," But, Str, although war is horritle, cruel and devilish, I belleve Britain is perfectly Juatifled before God and man, in the action ele has taken in fighting to defend the woak "and to stop the ideals of the Corstean from obliterating by force of arms the Idenls of the Mru of Galllee."
I sincerely hope and trust, Mr. Epeaker, that Britain will win in this battle, and when the smoke is cleared away that the time will speedily come whon the universal brotherhood of man and the unfversal fatherhood of God will be more fully recogaized, and that forts and warships will so out of existence, and "swords will be beaten into ploughihares and spears into pruning hooks," "and the wolf will dwell with the kid", "the leopard will He down with the lamb," and "the calt and young llon and fatIing together, and a little child shall lead them."

MR. WINSOR-Mr. Spenker, I did not Intend to take any part in this debate on the Address in Reply to the Speech from the Throne, but seeing it has prolonged to such a length, I feel I would not he dolng my duty If I let the opportanity pass without maling a few remarks, I must say, In my humble opinion the Speech from the Throne is so flat it is almoet Impossible for an ordinary speaker to hook fast, yet 1 must endorse the former part of the Speech which makes reference to the great strugslo
out Mother Contitry la now enzaged in. I do not intend to deal on the cane or mature of thile war, for I think tiy hon colleague, Mr. Ahbott. who hane funt spohen, did fustice to that part, and I mast congratulate him ot tha luplendt imfltess. But I whali to unaure the Covernment I am with them in every remsonnble way to cumble the Mother Country to come off ilictorfous. Ats a lover of hume and country it ta un unvelcome feollige to mas to think that my soonad an oual sanaton fil thts Houme finde our beloved Motherland fighting her life ant chath strussle, the srentest lnowis in the civilized worla, not a ittrusele betwoich cirlized anid ancivllized, but we may say a atruggle be tween hrothers and brothers. Yet we emmint for in moment think that the land that gura gar fathera bitth is golag tuder, for we beileva an aure an the zun tlien and sets, so sure are wo that the Mother Country will be victorious is this egreat confilet, a oonfitet on principle, tor right and therts, whlch all under lier nohle flag (d) andoy, and witheat a doulht whet thfe strugsle is ended thate will be themands more added to that great utumbor thetct torday do liearitly eting Hale Bettunntin, for her ruling meaniz treetum whether on sen ur land, and which Inmpired ull of her Colonitea to botily risputa to help her in tme of aend. Mr. Speaker, 1 think we shonld tecl proud of the young men of this Colingy whe so aobly repponited to the chlt, Hid are gore to cerand the Moltierland and the land that gave them birth, when we think that they never lireathed in a military atmos therin never fomint the chais of swords or the roar of the cannow. but always folt sate uader the wing of the Britlah Eanplre.

Thite lo one matier I winh to mentlon before this House, that is, during the winter moat of our publie papers tande referenion to the young men of
the oucports. nis to whis there were nut greater sumbers coming forvard to polunteor, as well us the clty lade Aa E reprasuluther of in ontjort ithitio ! I wish to asaure hon, membera of this House that the soung men of the outpurte are zot ane blt illaloy. We tue
 dier ao brave and herole la bencauen the man ti commanid sky, fottow mii and charge the anemy. Idoa't beliave the sublle nioctiane held by tainliters and magiatrites ie going to hirv tho devired effect upon the youns fren of the oniporth What IF Mrated 年 aome man that has afferof his ser vice for King and Conntry, to ray to the younk men, follow me, jour Mother Country is at ettake and nonds your help to thif strugsle. Now, sir, If the age limit was adranced a little more, the apeaker before yous would be reatly for this part of the work. But when we cundider the number atreatly sone trom Bonaviata District. I don't think we are far behlai, if not teading. In thin alinre of the tielp given the Mother Counisy:

1 wish to refor to the clausay in the Speech from the Throne which ratres Bome teferative to the greit prospocts to our people who will enamito th the finhurion the preseat bension. I zope thin seill ba so, wul yot as we have been havtias in thie past, sreat proar pectas hofore the flas whas canutht, but when it was ready for shapping they would find thinge in it hopelessis condrtion. Our men are Just abont thet of thia treatmeat, eepeoinily our yang man and the independent piantera They feet more like dropplas the (whole thing that thoy do to onnthume. They are getting dishenrtiniod over penst treatment in prfecis of Tirh. It wre want to develop the carning roiourcen of this colintry, internat muat be taken in our tistierles. The Gowerrment aliould tako some active fitepe in this matter, nad not so allow grat occurrencos: to be ropeated.

While listening to the interesting remarks from the bon. member for Hr . Grace, Mr. Parsons, as he told this House of the Increase in the Canadtan tisheries, and gave us some well-pre pared figures to Justify hiz statement, I thought that what tiss given them thly fuccreaso, is it becnuse the Canadion fielermen are any better than our Newfonndland fiahermen. That is not $50, \mathrm{Mr}$. Sppotker, but it is because of the Interent taken by the Canadian Government in her tishories thet gave them this incruase. And I bay, if some of thio thousmnds that the present Covernment have whsted on a tooliah agricuturai policy and pienic purties and other uneloss thingo, if the money liid been turted over to the Minfator of Marine and Fisherlea to be used necording to his knowledge titout our fisficries, there wouta ntio be an facremse th our fishery, as well as the Cunadlan flshery.

Farther on tn the Speech reterence fir mndo to the deffelt for the past ycar. The war conditions have been somowhat held responelbto cor thile. But I say that it is not the war that fins cansedt thin fiffett, it tis the uhasleas expenditure, spending und living above our means. What applies to an fidirifonl applies to a country. No one cin tive thote thatr meant and spend miore than they are earning. But this is what the present Government has becin folng, ind taves poor old Nevfoumdtiuld stricit a totht wreek. I muppoes the Hon. Premler wilt eny, as he told my triend, Dr Hoyd, in Hette time rigo, when he mantfored about the condttion of the couns. try, that the laberal party was playIng the vamo old tune on the same of flatto thay atways hat, I thought to mysalt if the latberat party onty hand one tune for their fiddie, the Government only got oue record for their gramoptione, and that recont is a mindite from the people to bulld Braneis rallways: So just a word of
nulvice to the leater of our Union party, if ever he sets a munical instrument for our party, to mule bure and have more than one tune or one record. The Hoi. Premler sald they might lave been prepared for thls if they bad foresoen the pressent war, for, sald he, we have had a surplus पt 5990,000 the past five years, But, he eald, we gave it back to tho people aguin to bulla light nouses, tog alarms and teteplionies. I say the Hon. Fremier is not right in this statement, for the money that buft our Hisht houses, tog slurms and telephones was borrowed, the sum of $\$ 250,000$, which wras included in the loan of 1910, and not the money that was tuken from our poople lyy taxes. I hiave no doubt that it went back to the people, as the Hon. the Promler steted, but 1 do qoulit if there that pald in meat, got most back, and wo heve searcely anything to show for the expenaiture of This woriferful mirplus Govertment money is a bit different from other meney. It has two returns to show it has beon apent, one fa lebour and one an paper, but 1 am atraid that ton some of this surptus thore are no returns, nelthar on tabour nor on paper, for we lrnow of some thotisands of dollars that have been out for two and three yearb, nobody reaping any teneft but the holder, btill the Govfroment is troutifing nothing about it. Therefore, how can we refrain from itincking tho Government when we know of such transactions I have reforred to.

The tiat clause of the speech from tha Throne is full of glowing promtises for the utilialng of some of the testural resources of our country. This beems to be a prinelpal polnt to be practieed by the pregent Goverument trom itie infancy, painting fancy pictures of fmagimition, bullaing castles fon thin ufr, funt to decefre the peopte Why do they act thus? One would bo led to ask the question, If it is
hereditary or environmeat that has caused it. Surely it cannot be heriditary, for my hon. colleague, Mr. Morthe, toll us that the Hon. Premier was a descendant of the Lifberal party, so It must be cnvironment and not herldItary, for the Llberal party, bad ae they were, never practiced such decolt. Conaldering the wonderful promIEes Inctoded tn the Speech from the Throne hast year, added with thome of this year, one would bay a government with such means could build a prosperons country on a troxen zone. I think it is time, Mr. Speaker, that these glowing promines ahould have more than mere deceptlons for its parpose, for poor old Newfoundland le Elooded with promises, but starving for want of fulfilment.

Hefore closing my remarki 1 bay again 1 am with the Government in any move they make to strengthen the forces to ald the British Empire In the conflict before her. But In the meatime I um atill an opponent to many of the actions of the present Government.

MR. KENT-Mr. Speaker, I do not intend to addreas the House at any length, as I have aready spoken in coanection with the Speech from the Throne; but there are one or two matters to which I would Hike to reter betore the debate closes.

I could not help thinking whon the Prime Minister, was spealing the other day that he had not attempted any Juatification in repily to the commeale or uny answer to the criticlome that have been dirceted againat the, Coverament's policy from thle slde of the House and particularly by the member for Trinity. Dr, Lloyd. Dr. Lloyd had directed a criticiem fairly, honest. Iy and spuarely bgatnst the finanelal actlons of the government and the critical condition to which these setona land roduced the colong. The Prime Minfster fustend of answerligg
these criticlsms as one would have expected he should have done, treated them lightly by referring to therm as beling slimilar to those he had been hearing from the Opposition for thisty yoars in the Hoube. Parhaps, there if a certain amount of truth in the faet that generally the opposition doed not see cye to ege with the government, as you always expect critichm of ita-setions from this side of the House, and to that extent it is probably true that the government must expect its wrong dolings to be dealt with by us. I know supporters will not do so.. It is one of our first dutlen to crittolse to criticite fairly and honestly, asd I think the criticiem directed from this slide of the House durlns thla debate has been falr and honest and made in diecharge of our publlc duties towards the electors of the country. It is a confersion of weakness, to answer criticlams of this kind by commontaries such at those the Prime Minioter han used.

If you conslder the gresent poultion of the Colony and if you impartially Judge the actions of the present government sineg thoy asmumed power. whit canclusion must you come to. I should like to premlse my remarks by saying that Newfoundland as a whole in a esond country, it has valueble resources, It has a flie geographical positlon, It has a splendld and virlle people. Nature hase in some respects been kind to tt. All it re quires is a fair opportunlty to develop alone natural lines. If it is given the chance ft will take ita placo and rank firat amongst the Domintons of the Eripire But, you may have a bealthy state and bave poor administrators, and many of the ille that affect the state may he asicribed not to the condition of the state liself, but to the actions of thase tho rule it. In the present case, I am sorry to say that the condtion whiteh you find in this
ennmtry today is attributable to the pollcy, or rether wiut of poliey, that
 eoming into jewer. Thep have boen In power about ste jaark At the time thry assumed offeen this country van ta a motuid trmmathit obuiltiton. Freathins whel vere mot as promining fin thiny wore. Another feature of that tlame anas the ymarly increalas bab ance of tride, Mick vas contfruitty fevcuring the enlony athawteg the Colfivy at thint time to be ahnolutaty aund in overy way. To-day the anmen fonourcas are thers, but they art not, foins ured in a way that the peoplof this colony thould mapect. To-day tire pleture to reverued. Dirtas tho trat yoars of the presant governmants adiaizintration there wore atill in 2uefics and frulte of the adele:Caztngs of the provlqui Garartment ind 1 -uptisity whict had finurtahad at that time continued to flowriah. It continued in nptte of the actlona of the presont Government But as time * out on and ns the ineritable connesuecres of the pollcy of the promerst Corernmpat worked ltselt out you have today inereaned takatlon. so very hiavy burden of eubt, ma setverue bat ance of tmile ant no ressirve. Thut in a cosdition, that oueht not to exhat. It In that fiue to any posaltitity of tho Colony teeil. 1 satd befors, New. foundland is nounal throught and Itroush. All it neode is proper adminfirration in order to recupernter rapidty from the present condition to thich lto aftales have been ruducod. the onty undartalidge of any marmbfude by the premint gorernmont has feen the construction of bimmels rallFayn and this was done under the varet posithis condttones. it le net
 fory of that undertakiag. I have repested it yoar aftur year. It to one of Itsese thinks it is necessary to keep hufore wh will the time. The Prtme atholater the other day sold that bee Fan in mandate frum the poople to fulld these rallways. Yes, be 414 Alve a mandate to bulld traneh rallकare but he had mo mandate from the Frople to earty out the sontracts upon to terms and conditions and abllik.
tions mbinitted to thile Houses. To-day the condition of borrowing on the forelgn finsmital mirket showe bow foctrsh it was for this country undes the circumatinces to have enbatitutod the payment of the eantractor in gold theteed of bonds. The prtme mintutik potnted oit thint the coacession for this was that $\$ 500$ a mile was taken off the contract price. Even on the contract itself ill I pointed out tapt yenr that was onty in nomitnit coneession becuuse where it is tahem off the tilfeako construction prlce it Iif more thin made up on the payment for materlal. But even auppose it was. look at the iffterance in amount patd contractors as between $\$ 660$ a mille and the amount that will be lost ou the netunt contract price (whicti will probably be in the vtelnity of $\$ 10,000,800)$ hefore it is fintahed duie to the payling In gold thintead of bonde. Today, Sir. you Fould probably have to pay - ar the Dominion of Conada has had to pay-four and halt per oent. you would certalniy have to pay four, as the Prlme Minlster found last year when le went to float a loan whilch had been paspod throngh this Houne at 3 后 to spite of the warninge and the protests which we milde dartig the Session.

The expenditure कras nnother matfor the Prime Mininter referred to the other day and the fact that the Government during the term of its nd mintetritton hind had surpluses as: EREATIng 8900,090 and that thay gave thite back to the people. These aur phase\# are due not to the careftul minmgement of the revenue, not to care ful expenditure of the revenue, not to the fact that publie worke were cootomically carried on, but due pri. mirilly to the fact that workin which other zoveraments in this country have alway performed out of eurrent aceomt, were executod mader Lomin by the prement Government. Take
thils condrtion inf 1909. Thero was a Iran Tril thit गetur of $\$ 430,000$ part of which whas to cover what was termed a deflef out the prevtous year's acsoint, I dealt will thila lat year and Fhowed rom the Rigures that the doflett wae In no way tracantile to the prevtoun ailmintstration whelh had ot4y oncupled ofties for twro thirds of the yeur, tind hud no voice in malting uip the ncoounts, There was another tran bill for $\$ 400,000$ in 1910. In 1921 thire was one for $\$$ 荡20,000: In 1912 tant . 000 und to 1014 \$3ate,000, fn all \$1, 2 R0 0n0. If you tuike off that 1910 foun which whe hever ralsed and which जns triphtedly oarcelted the foltowlas year, there remain $\$ 1,570,000$. You must add to that the amount of the surplus Truet Fund that was left there by preoeding Governments and whinh andounted to $\$ 580,000$. Thal klves you $30,060,000$. It was by borfowing these acmounte thet the Government wall sblo to parry on thils vorl sted show surpluses of 3900.000 . In reallis: our finances of these yents thow deficits which would have been tepparent it you lind onrried out pubHie wayks on Current account ins is lieual in this country) if it was the fintentlon to cover these werks by loans then the firat thing the doverament phould have done when it came into power in 1803 was to meet the umount whith woutid be ntroceted to egipital Hecount by reducton of texation at 3hat time, Inatend of that we all tinots the unfortunate hiatory of thelt dentfing with tuxation.

The Besslon before last-proceding the Cleneral election-a most sweeptas roductiou of taxation was brought if by tho Ninlator of Finance, He at that time tudteated a surplus for the fext year, a zurpluas of ahout \$ato,000 Before that year expfreit, last year dun Inge the peation be foumil that bife itHancini proplonition would not wors put an he had beon toid it would work
out and he not only replaced an amount equivalent to that previously remoyed but placed an amount of nearly three quarters of a million dollara a year on the ordinary taxation. This, was all before the War occurred, and berore the war was even thought of being in course of development. This was in tace of the statement of two or three months before that he had anticipated a surplus. His anticipated surplua was turned into an actual deffect of $\$ 300,000$. HIs predictions were made at a time when the government, through the Minister of finance painted the condition of the country as being of unprecedented proaperity.

Just one or two worde more, I would lile to refer to our rebources for a minute. 1 mean our internal resources. 1 do not thituk the Government bas had any deflntte pollcy regarding the development of our resources. They propose year after year projecta which never materlalize. Year after year we have heard in Governor's speech after Governor's speech that negotiations have been entered fato but we never lave anything derinite or concrete that you can point to as a definite concrete business like propoaltion. Now we have todlay a propoaition which from the language itaelf would puzzle the wit of man to find out what it means. The Speeel from the Throne says:

## (Quotes paragraph.)

I had hope that that velled cloud of words which is placed in that parsgraph would have been explained by the Prime Minlister or by some person else in the course of debate on the Address in Reply I think, when Ministers, put a proposition like that In a Speech from the Throne and when you ask the Governor of the Colony to read that serlously in his Speech then if you do not conslder it expedient to put some delinito in-
formatlon concerning it in the Speech, some explanation or some outline of the proposition or somethins concerning the subject matter of the negotiations ought to be explained to the house during the debate. I came neross a cutting the other day in a paper. I do not know if it refers to this proposition. It is taken from a Canadlan paper and is dated St. John's Nild. January 22. The extract is as follows:- "The extraction of nitrogen from the atmosphere on a large scale for use as a fertilizer is proposed by capitalists who have just obtained a concesston from the colonisi government for the use of Grand Falls in Labrador. The plans call for the development of one million horse power from the falls to generate electrielty."
I do not know whether that is the proposition, If it is I would like to ask the Prime Minister, or the Mintster of Agriculture and Mines if he wero here, whether there is any truth in the statement that this concession of Grand Falls Labrador has been made.
RT. HON. PRIME MINISTER-Na.
MR. KENT-I am glad to know that.
RT. HON PRIME MINISTERThere is no concession. They have been given the right to examine it.

MR. KENT-WIII we get particalars?

RT. HON. PRIME MINISTER-Yes, the whole agreement will bo tabled.

Ma. KENT-That brings me to a point 1 want to accentuate, and that is that all our deallings with our valuable natural resources, our mining, lumberIng, pulp and paper and other resources have been on an altogether wrong bisis. I thlink it is due to the people of this Colony that the Colony should get a groater revenue from these than it has been getting. They to-day form the subject of dealing by speculators who never intend to
deal seriously with them. 1 ais pire pared to admit that a cortalu amoumt of spertistion te neecmary, if you want to develiop these resuurces, but f thint thint it oarcht to bo horne to mind that these valualite resourcee are the property of the people of the country. Theke New Yealund Nem Yelinnt dertver : wery targe wovener from the fact that in lirge portion of the pubtic properity of that kint is controlled by the Goverament of if not exactly controlled, the Covim. ment deriver $\#$ 3-gree revenae from them. Here we practically receive nothing. The revenus trom the Crown Landa Department a few yoarl hiko mnte in rfint whim to mimber of people rmabed ta there, but today. an mag be wefte trom the aludter. Generai's last report, it in practionlly hect to There $4 t$ Tnst $4 \mathrm{~m}-100 \mathrm{~m}$, This In largely due to the fact that our Crown Latiln det and the regulationa whlch govern these requarces are on
 it in too late and find these ghimus all pansed sut of our centrol I think it In uecenary to eobucrye theme reofurcor IIt fir tr poatrite

In shaselug thruagh the Stanitard of Bhppire 1 anticed an- Hew in weterence to the oxport of mantifacturet went. I fie net know the otletin of it emepl that it la from the Newfoundland corrempondent of that paper who in. 1 un terntand, the Hon. Mr. Whtson Referrfag to the fret that layt year the emhargo कns rateed on ptt props throuigh patriotic motiven, it sayn:-
A campalgn to now in progrees in tire Cifiony for this minorit of the prolifitinn aratost the upport of wnmanufactured Food, which hat alwiys been operatite, hat was temporarily miliot ing soptemter to \#1fmit of thr ahipplag of timber to Fogland for nes en plt preps in the coal mines there. Thie bowerer, was anly made effecthre for the prenent reamen, ton $m$ mless the Leglalatare at the semation
now dob extonita the Act for a farther feriod, if wil bo tisposuritle to make tee of it after the end of 1915. It ir pov tuelur arruet that not coly should the termi for whilh thife arrangumest Ii effective be extendid unttt the clone of the war, but that $m$ zerminal of the * bote coloniat polticy in thle firnetton a hich elemed at thes stimutarion of io col maniufncturen, ousht to be natdertation."
That, of course, denls with one of our mont important resourcen, atid I fopedthit the corimment witi not be Wiksly to be Intuaneed by any camtalm. howevar ntrongly it may be candacted, for reverimes the policy of the weuntry to thit comneetlon. The poti lies follownd an tar for preacrithe fiir forest weath and mation it a taluible sutet of the Colony has been का mound ones and should be pernlated fe. and I Bopo that the Covormment vill persint it it This ellpptng: which In from a very reaponalble fraper, that whleb comes from a person ef cotnliderable infiamee, does not I hope, in any wiy tinumice the pottoy of thin Government.

Thire was nhother matten to which 1 wnat to rotur, and it fir one whiteh I Eiluli 11 was Cap to the Houac that Etin Prime Mintatar or some member of the Clovarntant should thive dealt with turcore How, and 1 ata murpitaed that is has not bees dealt with. 1 Fefer to the ficet that the Mintatur of Agrimiture und Mine and the MinLuter of Justice do not alt in the E cane. That नas the rubject ot ctis funatus here last goar. Dar virwz on the mastier we thes placed as atrons If st me coald before the Oevirnment Etres iben deretopments have takis ghacr, and the ponition hane chaneed zulf rhanmel Ter mach for the worne
The incumbents of theme oftices are Ifr. 1thmatfort, who ta Mftulater of Aro riculuire and Mines, sud Mr. Squiren, Whe to mindetar of Justioe. Mr. Hinntforit sought efectloe ini Minister
of AkMleulume and Mines at the hands of the pcoplo of Bonavista, and ho was decietvely defeated, und the will of the electoris of that constituency pronounced In no uncertaln mamer as to Mr. Blauifori rejresenting the dtstriet. In spite of that, and in spite of the will of these electors, Mr. Blandfard whe retrined in the portfolio of Agriculture and Mines, and without even secking saother constituency, as it might be aaid that there was some partientar reason for not bilng elected In Bonavista District, he is put finto the Leglolative Council in order to retain this portfolio in defiance of the will of the electorate.

Then, Mr. Squires was also defeated -by the electora of Trinity Districtand he was appointed Minister of Jus. the in place of another candidate who wes defeated in Bonavista; and Mr. Squires la not sent back to the District Which he formerly repregented, or to any other aletrict to seek election at the hands of the people, or confirma. tlon of the reppolntment which has beon made. Then, he also was appointed to the Upper Honae. That brings us to another feature of thle questlon, which is objectionable, The fact that thiese men are appofinted to portfolius in deffance of the will of the eloctors, is one point. The Government cannot offar the excuee, that thes have not men in the party who could fill thesp offices. Surely the Prime Mintster could find a men in hate party who could fill the office of Miniator of Asriculture and Mines as well oe Mr. Blandfora, or probably better. Surely he could find a man who would fill the office of Minister of Juntice as weil as Mr. Squires, To say otherwise is to admit that these other men are totally incompetent and unfluted to fill these poritions. Then as to the question of the posttion in the Upper House, I submil that the appofatment of Mergrs. Blanaford and Sgulres to the Upper House is
palng the Upper House for a purpose for which it was never intonded it should be used. It is necessary to have a certain amount of representation of the Government and of the Executive Councll in the Upper House for the purpose of taling charge of Governmient Legislation and cxplainlag the motives and tho object and the polfcy of the Government to members of the Legialative Council; but makfigg the Logisinture a mere partisan Chamber is wrong and the appointment of four members out of alne of the Executive Councll to the Upper House is wrong, and is diverting the Legtalative Council from the consthtutional purpose it was intended to serve. The Legislative Council, is suppesed to consist of the mature minds of the Colony, men wha have had experfence In busfness, fin polltics and in other directlons, and who have won distinction and whe can debate the matters which perhapa here would not receive the attention which maturer minds might give them, but to turn that body into e partisan body contalifing four members of the Executive Council out of nine is alverting it entiraly from the purpose for which it is intended; and besides it is bringing It directly into conflict with the will of the electors. The present case of two men decisivaly defeated being placed in the House bringa the Council as a body that holds such a position in our constitution, into vialent confitet with the will of the electors, and unnecessarily 1 think, and to serve no useful purpose. Now, Mr. Speaker, 1 thfolk it is time that the Government should recognige the tact that the financlal condition of the Colony is not the eame as when they took charge. 1 think they ought at least enter on a more careful policy lo connectlon with our finances than they have hltherto cone. I have aiready referred to the financlal policy of the Govern-
ment up to the time of the war. Now nfince the outbreak of the war these dutles are stronger and more neces saly. In thmes such as those broughit about by the war the duty of economy and prudent administration is more necespary than at another time, becaute difticuttles will probatily ar lee that we have not hitherto experfinced and that we can hardly fathom at the present time, difinculties artetrig out of the war which have never oecurred on wuch a large scale in the history of the world before. Such diforgantation of trade and busfness calls for careful. prudent and economteal government, and eapecially in eonnection with the obligations of the Government artsing from the war. These the Goveramant must deal with. But I thini that the Government which under the present circumatadees bhows extrayagance or deals extravagantly in publie affatre or faile to take sdvantage of the warnings given them, will desarve the censure of the Deople of the conntry and will probably get if when the time comea,
mr. devereaux-Mr, Speaker, I would the to make a few observations on the matters now under discussion. The motion has been fully and liber ally discussed, and still with, 1 am giad to state, bet little sertmony. The first paragraph of the Speech caste a shadow over every fulsequent paragraph Just an the subject it treats casts a gloom over the Empire and the ontire world. It has been satd on the oppoatte side of the Howne that the speech in thoged with norrow. The inmense eftorts of the Motherland are roflected in these paragraphs, and surely, surely it must be permented with a doed and unforgettable andnesa. Sure ty, the men or the body of men who have had the privflege and opportuntty of framlog these sentences, were Imbued with a deep eympathy with the tragedy of the subfect diseunged, else
they were unfit, incapacitated by lack of sympathy for the position which exacted from them tho framing of those tentences. Sorrow! Is then this a time for the flippant alisursion of a worla's tragedy, the echo of which is found so ntrongly in the opening parakraph of the Speech cellvered by His Exscellency the Governer?

All we are sure of the vietory that awaits us uitimately-for have not an yet many thousmads given up thetr pery lives-s0 we determine to ald the Motherland in thlis her hour of need, that the mighty fatiolo of her Fmplre towaris the framing of whleh was nhed the blood of those brave men of yore, our ancentors, the blood that tinglea in the veins of we today, might be upheld and kept firm, as ftrm se it thas ever been throughout the ages. This should be the fixed idea of every British sublect. Ther must be true and they will be trie, and nill of us will giadly belp and contribute in keeping intact that of which we are all so proud, the Mutherland. Thls feeling permentes with pride every one who belleves in her power, prentige and high moral standard, and the tio tory of the fiag will be victory over militariam and all its evils.
They tell us wo here-were unpro. pared for this catastrophe, Well. Tingland confesses that mhe was unpre pared. France-through her Forelign Minfster-tells uts she was mipropar ed. Rusela was unprepared. The world wae unprepared. Why thon, Sir, should we be connidered singular because we tiad no perfect knowledge of thene thlugs that lung over us invialbly. Yet, Sir, we are told here in thie House we should have been propared. We were not prepared-no more than was Australla, Canada, and the reat of the world-and then, at the procfamation of this war, with one united effort. We kathered up all our sfrength and forces so that England whieh
means for us freedom and liberty, might maintain her unequalled superiority.

Sorrow! It was a dignified sorrow. One that never will be obliterated from the hearts of men. Our own brothers here at the call of the Emplie, did they not go, did not our Legislature make provision for them? Do we not know how some of our man that went forth, some of our bravest and best, lie fifty fathoms deen in allen seas. Sorrow! Is not this a subfect for sorrow, and does it not briag us Into a wonderful sympathy with the Empire. We know, however, it ean only be victory that awaits us. Thus our sorrow is mingied with hope. Victory! The triumph of those princlples-the production of ageefor which we have for centurlea bled to malntain. Freedom! The freedom born of victory, that makes overy man a ling in hla own bome and orery woman a queen. Are we not proud to maintain a liberty Hike that?

As the shades of evening tell the coming of night, so did the signs of events around us warn those who knew that war was to come very soon, and even many months before war actual. Iy wan declared money was tight, and commerce ctrcumscribed. Men began to economise and the good days of prosperity rapidly were passing sway. The fil came imperceptibly, and many monthe before the war actually was Imminent a dark gloom was folt the world over, and we naturnilly were affected to a great extent, and the difficulties that have resulted in a deflelt for us were felt the world over; If we take up the financlal statements of France for last year, or even Canada, we see this depreasion most distinctly for months previous to the war. The war affected the British Emplre for more than ten monthe at teast, before actually materiallaing into the most terrific International Hie
struggle that has ever been. We can only do ns Canada, Australla and Enig. tand bave been tolog, maintaln our busingres at home at the same stand. ard as ever, that those at home thise who mafntain the homelind, while othera go forth to fight for hor, in the rame position as prior to the war. For we mast not think that the bravest alone go. Brave men at home and women also perform indispensable work in keeping the home and its responelbilitlea as it should be
We ate not slugular then in bringing to a deffcit because the country is less prosperous than it may have been. The country is not in a bad atate at all it we compare this country with others during this trying time, If you go to any of the largy citles of Cansda you will find in many, largeri and smaller than St. John's, a state of poverty unknown here. reeking in a much largar mesaure than we have in this Ialand. Porerty there is recosnized as the patural outcome of the great war. Everyone has in some measure to bear thetr burden in this atraggle, and my advice to the Government would be this, that, In a crisfo such as this, every poss. fble industry be maintained to conthee business normally, and those who help to do this do as much in a quiet way as those who are prominentty indentified with tho fighting Hine. It is this that we are proud of in our Bouls, that England can do this, thie quiet kind of patrlotism, while our enemles cannot, that our Generale and Adrifrals in thls war have been able to maintaln England's prestige in the fleld and on the sea, and have shown that savie courage and skill thas wo find in Wellington and Nelson and In all our national heroes. The British blood today is as it was in their day When Ingtand conquered the world a little less than a century ago. Today England goes forth to conquar
miltarism. She stands for honour that honour that she has brought unstaitied down through the ages. Today slic shows Germany the significance of her Hignature. We are fighting a greater battle than has been ever fought, an 1 on the same principles that we have alwnya fought. And he is a traitor, who has not the courage of his convtettons, who finds fanlif with the Government at a moment auch as the preeent; at thif time when England is in such a postiton, surely, whatever might be proper anu befitting in the nature of eriticlam at othor times now is so out of place that it is distoyal and unpatrfotio, Nor is Newfoundland it auch a bad position as might be im agtned. At the time of the bank crash everyone was talklug of blue ruln, but the rapidity with which the Colony recoverd itaelf, I am certaln will be again repeated when this preant tima of difllentty shall have passed away. Who can say what the next months may have in store for us, All bad thmes come to an f 'rua have given of our hest and bravest, blood of our blood, and love of our love. They go forth soldilers to death if need be, because they have taken the orth of alTeglance and that means death if King and Country demand it. At a time like this everyone is ready to do all that in posstble, to pass unstained the flag (as it was passed down to us,) unte our children's chlldren, Aa for taxation, We are not alggular in this respect. Canads is Increasing her tariff, and otherwise taxing herself. Hut she is proparad to do her utmost to maintain the flag, and is satiefied to tax her people, so that vletory be for the Empire. Newfoundland bas nothing to be discouraged at and mech to be thankful for. But at this cructal moment we are under the capable hand thot has gulded us the last few years, and a compotent and stable executive, without which whero

Would we be now? I feel sure that when these yeara are passed anyone exam ining the records and archites of this Govermment, may fifty yeara fience, will immedfutely purcelve that these months through which we now are passing aro some of the brighteat and most capably oonducted, periods In the parllamentary amnals of the Colony The recorile will be a lasting. incontrovertible proof of the worth of our Executive, and with us here with buch a stfong man, ba our present Prime Minister undoubtedly is, at the head of afrairs at a time like thla there is no room for despondeney or dread. I trust the Government will take lnto consideration that every pubtio woris posiabla shall be carrind on, that lusiness muit be maintnined and kept solig 'as usual.' No adverse criticiem can be of aty avail but will merely stand out vivtdly as unpatrotlo and opposed to the best interests of the Colony. We hare no cause for despondency but rather a causo for self-eongratulation on our present position.

On motion the debate on the Speech in Reply was adjourned till to-morrow.

Rt. Hon, the Pitme Minister tabled Report of Seoretary of Publle Works, respecting the estabilahment of a better systom of the Local Adminiatratton for the Colony.

Mr. Halfyurd gave Notlee of Quear Hon.

Mr. Abhott gave Notiee of Queation.
Mr. Coaker save Notice of Ques. tion.

Mr. Kent gave Notice of Quention.
Mr. Stone gave Notice of Question.
Mr. Grimes gave Notlee of Queation,
Mr. Winsor gave Notlee of Question.
Mr. Targett Rave Notice of Ques tion,

## DEATH DUTHES RRSOLUTIONE

Hon. Minister Pinance gave notice that on to-morrow he would move the

Honse Into Committees of the Whale to consider certaln Reacletions in reference to the huposition of dutics on the Retates of Deceased Pirnone.

The other Ordere of the Day ware deterred.

It whe moved and seconded thint when the Houme risell it ndjeurn init to-morrow. Trenday, April lathy at thres of the clock in the aftarnocin.

The House then adjourned mooorsh Italy.

TUESDAY, A pril 18th, 1915.
House met at 3 pam., purasiant to anljournmunt:

## PETITIONS.

MR. JENNINGS-Mr. Speaker, 1 ask teave to present a peltition from the people of Tviltizgnte Jaland anlitiog that the law reguiating the keeping of dogn be amended. At presmet in dog owner hant to pry $=$ ecrtion tuw, and that tax is supposed to be used to pay any person who han lost an animinl from dogs. They are palia the value of the aufmat thot frum thit timm of monoy: They want the law changed. H0 that every man shall chaln up lits dog every night, and it he to found at targe lie miny be atiot on aftht If any cattie are injured, the owner of the dog that is remponilble will pay the value. Every dog not chatned up uthoutat the remponsftile for the fumse doas. This petition is signed hy ,.hate peopto, and there are many different optrions on this subject. In any case, they cunnot eot along to Twnilngate without dogs, and if have to doubt that it will be ensy to amend the Isw. anit I trust the Gevertment witt takie the request of the pettfomare tuto their conaideration.

MR. COAKER-Mtr. Spenker, 1 bes to support the priver of the petfition Just presented. I do not linow anything that le ao diaturbing the feeltage of the peopie so much na thin gututime of doge The have hat quite

2 Lot of truable for the least two gran in cuanoctlon with thene taxeb. The Lw is that a man roeping (50m, piys to the maciatrate lile proportion of the dimage dopa in Twililggate these tures have boen pati to the zaacis trate, but the marintrate rill zot afre ouy emlanktimg of That he has tene Fith thin motry, I have vritton to him and he has refueed to gire any futormation in regurd to its oxpendf. ture. Thit has caused conuldermble fiction amongst the people. I was ropthe thas if we had suchi if thith as nemfalpit toarati, this matter pilght bo feft to thum. It suemis it trifitog resttar to be lirlaging bufare the Fouse, of A ceembly, and if we hat properiy conrtituted bourds, they could koep doges or ahoot dogs, or pay taser as thoy pleaced. You centiot got the pluople of Twfiting te to glve up thetr dogse At Chabge Iulande the dog qucotion In alion at live onie They are allowed to lkeep alophend dors, and pocople are rutting these coltier for no other purpose than for hautiag. I Wrould lino to the when we got thin fload Boand matter In Committeo that we ahonld get the question settlud.
MR. GTONE-Mr, Spenker, I lave is tumbiber of petittons here itlmod by fifo rolitumin of a number of townis arownd Trinity in relation to the appolntment of Mr, Somerion as masiatrate at Trially. These pettilans ahow thin seattionent of thrise people At is convemilinn of the P.P.U. they panied resolutions in connection with the samin matter. The petitions are to the ellieet that the peopile do not whab to कnve Mri, Bemertmo MIH Mristrate drer them, an lie was wo rocentiy a polliscel portizin; and thug desire to luve Atisi transtorred to forme ollicic atatrict. The petitions are from Catalina, Cliarsuvitte. Hithitou, Engttai Hr, Thiterea Folst. Bhael Ifr, Britith Ifr, BurFoyna's Cove, Bt. Jopes Withln, Pope's Hr, New Bonaventure, Port Mexton: 3roaty. I trast, Mrr. Spaaker, that
tbese petitions will have the fall attention of the Departuent to which they will the retorrict. This poojtie of Trinity. lmowlas that Mr: Bomertet wau golng to be nppotated magtrinate, appealind to mes and 1 semi a Jetter to the sime Mintater, a copy of which I wale leave to ruad to this Hioune.

## Youre fatthfulty.

## (Sgさ.) EP. MORIL18.

## D. Q. Bitone, Bu. MH. A. city.

Now, Mr. Speaker, we cannot expoct auy consideration from the Ex ecutive. Triaity han an represents tive on that Councll. It in true, Sir, that Mrr. Squifes' is thire, but he doen mot represent Trintis. 1 cortatnly hope that the Government will harken. fo tite prayeri of theno potitfors mid fet atcorilingly. Peraonally 1 have not the allghtent objectlon to Mr. Bomerton, but it is my duty to earry out the Whites of those I mppresent.

MR. TARAETT-1 rise Mr. Spenlo ir. 60 support the pottifons preacnted iy my trinnd and collemge, Mr. Stone and would heartily sapport the same.

MR. COAKER-1 would like, Mr. Speaker, to cuitorne the petitluas prerented by Mr. Etome, I think, Sir, that it was unfatr on the part of the Coverament to act as they did tu npite of the atrons protent of the poople throung thelr roprementative, Mtr. Btose. We lnow that Trinlty hise no reproamtative on the Bxecutive Couneft, for we do not call Mr. Squires a fipresiontittive or rocognize fifm as mach, Dist we did expeet tatr play trom the I'rimes Minister, and thought that be would catur to the wiakes of the people. HoL, 8tr, ao nitice war taken it the peopters wluthes, and the nippointment whis made directly contrary to the whates of the people. More boer, the Premier seld that the Govirnmust thd not know of any surh appofritment, and that be would tet Mr Ftrane lanol.
fT. HON. PRIME MINISTERVelther of these statemente in in my futter.

MR. COAKER-(Re-ruad letter to The Ilonee): "The aubject mattor with
respect to the retiring and pensioning of Magistrate Lilly and the appointment of a suecessor to him has not yet come before the Government in any shape or torm."

RT. HON. PRINE MINISTER-Up to that time the application had not come up before the Government in any shape or form. The question came up subsequentiy, and was deeided not at one meeting, but only after two or three. What is the churge agninst Mr. Somerton? Is it that he was a supporter of our Party?
MR. COAKER-MF. Somerton wan th the employ of Dr. McKay, but while In that capacity he so grossiy offended the peopla that they-jolined and pre valled upon Dr. McKny so that for the good of the buoinesa Dr. McKay aeked Mr. Somerton for his resignation. Now that man, the man whom the peopte so obfected to, is thefr Magts. trate, - the man to interpret their lawg, It is a wonder, Sir, that there is no revoll. The people have had absofutely no say at all, the whole matter being in the hands of Mr. Squires. 1 bay, Sir, that the Government has treated Trinity Bay disgracefully. They hive lad no regard for the peogle, absolutely none. Do they want the Goart House or a few other buildings tora down by the infuriated electore? Tho way the northern people have been treated, Sir, is diagracetul. It appears that it is the poilcy of the Government to make the people of the rorth angry imd ugeriasfive, and then to eend our voiunteers, with their qutck-firing machiae guns, against them to shoot them down.

MR. HALFYARD-I would thee, Mr. Speaker, to support these petitions. I do not think the wistere of the people have been rogarded at all by the Government. What the people want is not Injury to Mir. Somerton. He had been a trac supporter of the Government ind deserved some appolntment. but why wat he not aent nomewtiero
else? If the people are so overlooked they are likely to become unmanageable, and being casily led, might do untold damage without being accountable for their actions. What makes us feel sore, Sir, is the action of the Government in appointing this man. when the electors of the district asked that he might not be appointed. This seems entirely contrary to the atatement made last year in the House to the effect that such appointments were left entirely in the hands of the representatives of the diatrict. This is nothing more or leas than a concrete example of the manner in which the members of the Opposition side of the House and the electors of the Opposition districte are treated. We heve nothing againat Mr. Somerton peraonilly. Our only objection and the only objection of Trinity is him political dealing. Personally, I think the is a very worthy gentleman, who, having acrved his party well, deaerved an sppointmont, in some other place, and I hope, Sir, the Governmont will sea thetr way clear to appolnt Mr. Somerton to some other place with a good selary.

The pettition was by consent of the House referred to the Department of Justice.

## QUESTIONS

MR. HALFYARD asked the Hon. Coloniel Secretary why the Fogota was not permitted to call at Grate's fove during the past season, as she ormerly did.

HON. COL. SECRETARY-ThIS matter has beea raferred to the Post-master-General, and I hope to have the required information soon.

MA. HALFYARD asked the Hon. Colonial Secretary to lay upon the table of the House (a) a atatement elrowing the number of tripa made by the S.S. Prospero during the season of 1814-15; (b) the number of trips called for by the contract and the , mount patd on account of same.

HON. COLONIAL SECRETARY-I expect to be in a poaition to tablo the ninawer to this question liter today or tomorrow.

MR. HALFYARD anked the Minister of Marine and Fisheris to lay on the table of the House coplies of the returns of money expended on the Government whart at Fogo during the years 1913 and 1914; what amount was granted for the sald wharf; what amount has been expended to date.

MIN, OF MARINE \& FISHERIESThis is in course of preparation. On Its belug ready the information will be tabled. I may say, Mr. Speaker, that such dolays as this would not be in evidence if sumfient time were given the clorks to prepare the royufreit information beforehasd.

MR. HALFYARD asked the Hon. Cotonfal Secretary to lay on the table of tho House (a) a etotement showlug the amount of money given out as reliof on the Labrador by Jostah Gosse, the Rellevfing Qffieer for Labrador, during the years 1913 and 1914; (b) the numes of the parties whs recelves rellef and the amounte pald each; (c) the cost to the Goverament ha travellfng expenses for the suld Jostah Goese dorlng the years 1918 and 1914; (d) what amount was collected by him for the sale of Iamber on Labrador, the nismee of the parties who purchased any lumber and the quantity purchased by each during the years 1913 and 1914.

HON. COLONIAL SECRETARYThis matter has been raferred to the Commissloner of Public Charltien, who is prepariag the answer: Immedtately on recefpt of tile I will table it.

MR. HALFYARD asld the Hon. Minister of Finance and Customs to lay on the table of the House a statemont showing the amount of curtoms' dutien collected by Jostah Dobse on Labrador during the years 1313 and 1914; the names of the parties who
paid any duties and the amount paid by each.

HON. MIN. OF FINANCE \& CUS. TOMS.-This statement is in course of preparation.

MR. ABBOTT aaked the Hon. Mintater of Financo and Customs to lay upon the table of the House an ItemLed statement of all expenses in connection with the customs in Bonavista district from 1911 to date.

HON. MIN. OF FINANCE \& CUS-TOMS-Thls, also, is in course of preparation.

MR. COAKER asked the Rt. Hon. the Prime Minister to lay upon the table of the House the report of the Hospital Commission, the evidence taken by that Commission, and the cost of the same to dnte.

RT, HON. PRIME MINISTER-THIS leport is not yet in the hands of the Gorerament. It is expected soon, however, and will at once be tabled.

MR. COAKER aglted the RL. Hon. the Premier whether the Government Intends to place a coastal steamer on the route between St. John's and Cook's Harbor, in the district of St . Barbe, during the coming season.

RT. HON. PRIME MINISTER-Mr. Speaker, this matter is under consideration of the Government, but as yet there is no report to make.

MR. COAKER asked the Rt. Hon, the Premier when the Heart's Content and Grate's Cove branch rallways will be complotely operated.

RT. HON. PRIME MINISTERDoes the hon, member mean completely constructed?

MR. COAKER-No, but operated.
RT. HON. PRIME MINISTER-We hope to have it operated as soon as the spring opens.

MR. COAKER asked the Rt Hon. the Premifer whether the Government vould object to the introduction of a Bill dealing with a Water Company for Botwood, Bonavista, Catalina, or any other towns. along the same con-
fimons an the Carbcbear and Herbour Graco Act
RT. HON. PAIME MINISTER-1 dact' thint thure would be any obs Jetlon it the yroper pettlath was ment in from the proper peopie it might be necrssary to smad the Goversment enplivert to tee th the meter =utply. ote, Fert nutalile.

MR. COAKER-Tht Goveramest would have no obloction if the propoltes compliny tiontt tomity जोt all the regulationat

HON, PRIME MINISTEA-NIO I don't tatith at 1 Ithalk the Govern-
 to do Just man Hr , Grace, Carbonear and Piacentia have done- I do not trave completely abeat the other two
 of whiles the Government guarantced faturent; but they lanve hect able to pity this themsatver

Mr. cosken-llotwaod would need un ouitay of 550.000 which they are wiling to expend and grarantee $5 \%$ tmterent:
fT. HON. PAtME EHNISTER-The Interest on the atook of Placentia was nuaraateel. The eompeay was ntartot with te.one capttat int aftar as thille it rumad it to 93.000 , Thitereat was guitranteed on this suatiay at the rate at 4 4 In the mase of Carbonear
 In the muantimes.

Mr CDAKER nelied Rt Hon. the Premier (a) It way amousta have been frotif to Jiltrus of thir Bitmitire Catirt utice the House fast met. as payments on moremat of Election Pettilome. It any have beep pald. to whom pald mid what momatit

RT. HON. PRIME MINIBTER-la reply, Mr. Spinkier, I may may the tmiges sent in ar bill for \$100 for \$109
 ormment referrod the matter to the Department of Juntice. The Attorney General edvtaed that the Goverwment
whin tiable, baslus bif views oa is Judstrictht of Chter Justien Latule, a num ber of yenre tra, in a pertition in ehfeh Mir. Mortne wint more of the coumed. Finding thenimelves Hathe therefore the Government pold the tmoente. I will get a full atatement for the Howe however, and will almo table copy of the foigment tunter Thleb the Govorument was bett roapourlble.
(b) Whether there is at greaent Setore the Court a clatm brought apulant ther Cotomy ofr nincuint of pirn voes remitered by Str Jna. Whater at the Harve Court of Arbitratlon. If \#h, what amount is clafmed, who ano the commel reprebeating the chalmants, who represants the Colomy, and when will the case come betore the Court?

RT, HON, PRIME MINISTER-In quawer to this I midy nay that there If a cane before the Couri, between the Butete of Sir Jas. Winter and the fovernment i heve meted the De partment for full partieulars and will lave them for the next session of the House. The amornt claimed is for I Nlance due as Counacl at the Harse dirbitration. The counnels are--Cinimants, Messra, Furlong, K.C. ind Wibter; Government Mesurn. Hon, IL A. Equilres. K.C., Attorney Geaeral, and F.J. Mtorris. K.C.
(c) Whether Sir E P. Marris and Ifr. Doatall Morlson have axy clalm troatuat the Colony for services is connection with the Hagus Artitr: flon Award. If mo, what are the pumpunts of their clafms?

In naswer to thin I may say fhat: I tave no etaim againut the Governfuynt in thim nounsetions.

As for Mr. Morison $I$ eannot asy. I cannot any whether the amount pild him whe on accomit or not. It in now five yearil stace the happenfore and Tri Morfons bue preforred no clatm an
yet, so 1 hardly think such a step likely. I cannot asy definitely. As far an I know at present there is no claim uyalnst the Goverrument, and as tar as I remember the amount pald was on account. I will have the matter looked up bowever for the Hon, member.
(d) What progress has been made to date by the Commission appointed to consolidate the Statutes? (e) Who catapose the said Commission?

RT. HON, PRIME MINISTER--I have written the Chairman to ascertain the information for the Hon. member, and will table it as soon as I recelve it
(f) What paymeuts have been made on account of the same? To whom have these payments been made, and do they represent their full clalme for services to date, or have they only been paid on account?

RT. HON. PRIME MINISTER-ThIS is in course of preparation.
(E) How many days has the MinIster of Justice been absent from St. John'e from the date of his appointment up to the present time? For what reason was the so abisent? (h) How many Crown cases has he dersonnily cenducted before the Supreme Court, atid how many have boen conducted by other counsel? How much thas been puid to him stnee his appointment, distingulahing salary from other paymenta To lay on the table a atatement ahowing the amounts and dates of each payment, and on what socount?

RT. HON. PRIME MINISTERThis is also being propared.
(1) It any Solteltor has been appointed in connection with the Act paseed last Session relating to death duttes, and on what tormis?

RT, HON: PRIME MINISTER-1 am not aware of any such appointment I will loolt the matter up for
the hon. member and will table the information so obtained.

MR. GRIMES asked the Rt. Hon. the Premfer, fin the absence of the MIntster of Justice, if the fine Imposed on Joseph Walsh (Lamaline, Distriet of Burin), by Magistrate Benning haa been pald.

RT. HON. PRIME MINISTER-I may say that on the recommendation of the department of Justice, this fine was refunded. As to the reason I will have thls Information at the next sltting of this House.

MR, GRIMES asked the Hon. Colonlal Secretary how many officials are engaged In the Postal Telegraph Of fice at Brigus, Port de Grave dietriet; also the salary pald to each and the average amount of recelpts for telegrams for the past three years.

HON. COLONIAL SECRETARYThis information is in course of preparation. 1 hope to have it for the hon, member to-morrow,

MR. KENT asked the Minister of Marine and Fisheries to lay on the table of the House a statement, In detall, of all monlea approprlated to or spent by the Bell Isfand Local Counell, or any officer or member thereot, from January, 1913, to date; also a copy of all returne in relation thereto,

MINISTER OF MARINE \& FISH. ERIEG-This information is boing prepared.

MR. KENT asked the Hon, the Colonal Secretary to lay on the table of the House a statement, in detail, of all moneys appropriated to or spent by the Bell Island Local Counell, or any officer or member thereof, from January, 1918, to dato throush the following departments: (1) Publio Charitles; (2) Publle Health; (3) Under order of the Governor-in-Councll. Al. so, the returns made by thie Councll of all such appropriations and expenditures.

## LOCAL AFEAIRB BILL

On motion, the bll entitled "An Act to Amend the Law Reipoctis the Aamifuinitration of Local Artatris" was read in second time and was ordered to be submitted to a Commitien of the Whole House un to-morrow.

RT. HON. PRIME MINISTER-I may say for the Information of the House that when we so thto Commilstee to-morrow oh thit nith, 1 proposn to have the Bill roforred to a Select Committee, largely if not entirely me preseatative of the outport constitsencies, with a vew of having the mort perfect mmmure powible report. ed to the Howse: Os yeaturday, after noon the han. member for Twillingate, Mr. Conker, anked to hisve the 15s8 Aet printed. That tan beent dene, and the Act is now on the desks of hoomembers.

GEALING BII.t.
Second reading of Bill entilined "All Aet respecting the Seal Jishorg"

RT, HON, PRIME MINISTER-I desire to move the second readtig of thls BIII, the efrect of which in to mafeguard an fiur in possible the Itves of our poople who prosecste the seal fiuhery. Nearly everyone in this Hotnse, 1 think, at the fast semalon. took occualan to deplore the sad calamity which befell so many of our men at the eeal fimery last year-the low of the crew of the "Southern Crois and of that of the "Newfoundland" It misht appear from some viow polints that our polley tn briuging in thin iercisation to-lay is nomnthitas like eloetur the stable door after the horse is stolen-bringing in a remedy after the fimare bas been done; but 1 think everyone, both in the House and citaide, witt appricinte thint thin It an induatry whlech has bees folng on for the lunt hundred yoars, and that up to the prenent time we have been coutent with the lerfetation which is at preaent on the Statute book to hodge around our people with every nafefuard that wan connidernd necennary. The proncht Bill contuins the reoommendntions of a Commisnion which vas appolnted some monthis ago, conslattrie of the gentlfmen who constltute the Supreme Court. It in ponnible that when we get into Committeo the Houne may be satiaflod that the recommendations slich they have unde are whes and should be placed on the statute book alone or together with other recommenidations whith thay be made from time to time, last yoar'i lous at the seal fiahery wms, 1 felleve, the wonst in the hifutory of the Celeng the eme approaching to It betok that which occurred in 1598 to the crew of the Grecmland, when something ine 48 or 50 mon lont theis tives slace the fiatiery lum been prosscuted there have been lonses from
time to time. Several of the old records show where 20 or 30 or 40 men have been lost, but in those daye the dangor was mintmised to some extent by the mon being distributed among the large number of ships that wrent out. The 12,000 men who at one the went out to the seal fishery were conreyed by three or four hundrod vessols: this year the number of stifpes thint went out whe 1 think thirteen; and as the number of vessels have been reduced, so in the same proportion has the danger of a large disnster increased, I don't knaw that it will nerve any good pur pese at this date to muke any further enquiry as to the canses whioh brought ahout this deplorabte renult. When the needent accurred, a year ago, there was no power to make the enquiry on onth that bas since bean mude. At the last rorsion, it will be ramembered, a speelat Act was passind empowering the Governor in Council to appoint a Cominisston. That Commisslon was appointed. Meu were selected whe could not be said to have any blan whatever in relation to the matter; men who were secustomed to legal exguirles; men who both at the Bar and on the Eench have been Identifled with sealing matters and the resulting faw-sutts. All the intereats. Ithink, were reprosented before them, and we have had a report from them in which they malte certatn rocommendations with in vow of enfeguardIng our people. Both the majority and minority reports were tabled sorne days ago. I have anked the Cterk to have them printed, so that they may be in the hands of hon. members when we go into Committee, As 1 have sald, It may be found when we discurs this matter in committee that there are points which have not been , covered by the Commissioners. There may be other suggestions whifh may come from members on both slides of
the House which will assist us in putting on the Statute Book a measure vhich will be of value to our people; uitid in that spirlt I ask the Hoase to receive the second reading of the Bill.
It will be poticed that tho first seo tion of the Bill provides that it shall te unlawful for the Master of a steamer to sond upon the ice any members of the crew of his steamer a dietance greater than that which is reasonablo to enable them to perform the work ordered or required of them, and return to the steamer within one hour after sunset on the same day as that on which they are sont In other words, it any prosecution ar ises under that section, the onus, as it is termed, or the burden of proot will lie upon the person charging that the men were sent beyond a reasonable distance. That is largely etecre tionary. I gather from the reports that certain witnespes were in favor of fixing the distances, but eventually the Commissloners thought that it was better to leave that in the hands of the Master, subject, of course, to a very severe penalty. The second section of the Ball provides that it shall be unlawful to kth any seais found upon the tee, or to take any seal pelts, or to remain upon the fce fin charge of seal pelts except between the hours of zunrise and sunsct; and no peraon beling a momber of a crew of any uteamer shall, without lawtul exouse, be or remain upon the tee or suay from the shlps after one hour att er kunset or before suarise. Sectioa \$ deals with the property in the seals. Paminis sluall confer a right of property in seals subject to the following conditions and Ilmilations, Fallure to comply atrictly with those conditions sball take awny such right of proper ty und the right of property ehall absolutely cease after 24 hours from the dnte of panning and fligeging.

There shall be one flag for every ten seal pelts, and there shall not be less than ten seal pelts under a flag. The day and hour when seal pelts are nanned and flagged shall be marked on each thag pole, No steamer carryIng more than 150 men shall be cleared for the seal fishery withont a medical officer on board. No wooden steam vessel shall be cleared for the fiehery unless she is provided with suffient sall power to work to windward without the aid of her engines in open water and under ordinary weather conditions. No steamer shall go out without a certificated Master on board. Section 7 provides that in the gvent of nny member of a crew engaged in the seal fishery not having returned to hia ship after one hour from sunset, sulforiag injury from exposure on the ice: (a) If death results from the finjury, if he leaves any dependents wholly or partially dopendent upon hit earnings, the owners of the ship shall pay the sum of $\$ 1.000$ as compensation to the dependente, invested and distributed in manner aimilar to that provided with respect to sums payable under the Workman's Compensation Act, provided that 'he fujury causing death is not attributnble to his serious and wilfol migconduet, and provided siso that the amount of any weekly pay ments and any lump sum paid in re demption theroof, shall be deducted from such sum,
(b) When total or partial incapacity for work results from the infiry, a weekly payment shall be made by the owners of the shap during the Incapacity, not exceeding fifty per cent. of his average weekty earntign durling the previous twelve months stich weeldy payment not to exceed fivo dollars, provided that in case of partal Incapacity the weflay payment shiall in no case exceed the difference between the amount of his average
weekly earnings before the accldent and the average weeldy amount which he la ctining or sble to earn in some suitable employment or business after the aecident. When any weelly pay ment has continuod for not lese thas six months the liabllity therefor may. on the applleation by or on behalt of the owners of the atifp, be redeemed by the payment of a lump aum to be settled in default of agreement by the Supreme Court or a Judge thereof, and such lump aum may be order od to be investad or otherwise applled in manner similar to that provided Ii respect of sums payable under the Workruan's Compensation Act, proFlaed that said weeldy paymente and fump sum together shall not exceed 81,000 , pnd provided that the sald in jury or accident is not attributable to bis serious an wiful misconduct.

Sub-section (c) provides that any party suffering injury as aforessid and. where death results from the infury, his dependents may proceed in the Supreme Court either by personal action agrecable to the owners of the ship or against the ship in an acthon on the Admiralty side of the sald court for the recovery of compensa thon as aforesald, and shall lave a Hen therefor apon the ship and her cargo in like manner and with the bame priorlty as in the case of seamen's wages. Section 8 deals with nothee of elatms and the effect of failure to give notice. Section 9 provide8 that if the Governor in Counell, after triting stops to ascertnin the Vlews of the owneris of the steamers and seallog crew, is satisfied that any scheme of compensation, benefit or insurance for the sealling crew of any ship whether or not such scheme incledes other sealing steamers and their crewa, provides compensation not less favorable to the seaters and thefr dependents than the compensation provided in section 7 of this

Act, and that whes the ncheme providen for coatribution by the seatera, oonfers bonetits it leait equivalent to thime contributtons, fre retation to the benefits to which sealers would have boem entitled under this Act. and that a majority of the nealers to Whom the scheme if mppticntio are in favor of melh a meletent the ownor of the gteamer may contrnct with uny of the sealers euploged by him
 be auletitated for the provistons of thie Aet and thereapon the athly and ite owner, except as heretmafter prothand shatl be linkle emly in trecorsance with the acheme hat save as sforemald, this Act ehall apply not--lthrtnnding any contraet to the contruy mote nffer the commencoment of thin Act. Provided that if any scheme is subatituted for the compenimitton menttonet in Section 7, ant $\pi$ breach of geetion 1 , finm been sompmittel by the Miaster of a steamer. the owner of such ntenmer shall there upon become tiatie to i pematty of bot loss than $\pi$, 000, recoverible of sumthary convieties and paynaile hait to the lifformer and hatt to the Treastry. Seetlon 10 provitien that every ateamer enimued tn the weal flihery, whetenver any of late crem it or are absent after darlc, or in tog, mlit or fintint or dritting mom, thatl mnter vith her steam whlufle or otherwise a nound ntgnal, at faterrais of not more than two minutes, a prolonged tifnt

I have no doubt, Mr. Speaker, that masy of there mugrontions will comminn themsetras to the House. There tung bee some that arn not practicntite, and that may require some amendment; and it may be thiso that some of thase the the Hobise who have liad exporiance may be able to engeent additional safeguards; so that the Bill which we will put on the stat ite tooli may tie inuch as ta prevent

2 recurrence of any acoident similar to that of lat ycar, I beg to move the meicond ronding of the BIII.
MR. KENT-Mr, Speaker, 1 don't think It would serve any purpose to fincurs the Bim at this stare. Every: Fody ls afreed an to the desire of the 13il. We can discuss it in Committee.
MR. MORINE-WII the Fremler explain whether the bit was prepared by then Commilastaners?

RT. HON. PRIME MINISTER- t tise bown mettied by the Attorney: Geneml and the Solleltor of the Houne as a result of the recommendations of thin Commienton. As a matter of dact, many of the sections are verSutim from the recommendations of the Commlerion, and 1 think there have hem samervitons from the Commintionirn duiring the drafting of the bilt.

MR. MORINE-What 1 want to knaw Is whether the Commlasloners Ire thamselves renponaible for the vorblege of thes bill?

## RT. HON. PRIME MINISTER-No.

Ois miotlon, the Bill was read a sen and time and ottered to be suhmitfed to a Committen of the Whole House on tomorrow.

## NATURALIZATION OF ALIENS BILT.

Comaituen of the Whote on Bill "An Ast Respecting the Naturallation of Allens.'

Os motion, the Hunse remolved itarif into Committise of the Whole an fuls Biti.
Mr. Speater left the Chalr.
Mif Farmons took the Chalr of the Committie:

RT. FON, PRIME MINISTER-Mr. Chairman, 1 may any for tha information of the Houst- I am not quite eartaln whether I ntated it at the second reailing this Bill in a rerbatim copy of the tuperial Act, which is very carefully drawn. The only alteratlous are thone necessary to make
tho Act appligable in this Colony.
MA. MORINE-Why is the Colonlal Secretary sfiven theme powern whtch appear fin the Bill?

RT. HON. PRIME MINISTERWell, he takes the place of the Secre tary of State. Under the Imporial Act certain powers are conferred upon the Secretary of State. These poweris are glven in thils Act to the Cotomlat Soo tary.

MR. MORINE 1 pregume it is dif. fleult here to know who is the proper official to do that sort of thing. The Coloninl Soeretary is given tromandous power under thls Act He might almost have the power of 1 fife and death over an alion.

RT. HON. PRIME MINISTERTuke, for tnstimed, nection 2, part 2 , That is the first reference. It saye: "The Secrotary of state miny mrant \& certiftente. Well, we have fanerted. "The Colonial Secretary of this Colony"; and in all the other sections we have dong the same. If you look at our own Natarallizatlon of Allens Act you will natice it says: "Any ntlen. not helng under any dirablitity, who shall destre to become naturalized as a British subject, may make and slgn before a Stipenillary Magletrate, ote," So that in that case it rests upon the Magistrate

MR MORINE-However, 1 have no better suggestion to make. It is the nearest we can get here.

MR. KENT-Mr. Cunirman. in Sec: thon 8 of this Bill there appears to be some mistake. The section purporta to legislate for Great Britain and for other Demifnions. We have no power to legislate beyond our own jurisdietion.

RT. HON. PRIME MINISTER-In this case we are leglelating for them as woll as for ourselves.

MR, KENT-ND, only for aurselves.
RT. HON. PRIME MINISTER-Yes, and for them.

MR. KENT-Excuse me. Under thita fot oue Teglslation would apply to other Domituionis to well as our क्षn.

MT. HON, PRIME MINISTER-A then tiny come liera anit quality for antumblisation in this country after reAldanon of five years in euy othar part of the Eirptre.

MA. KENT-Yes, but putting that ngetion in here does not mean anything Of course, ir is dolng no harm.
hif. MORINE-Thut nection hus no slatht to be in our local bill at all. It is ope of the proviaions of the Imperinl Act, und lias no application here

RT. HON. PRIME MINISTER-1 think it may have,

MR. MORINE-It does not apply tiere It is part of the Tmperlal Aot. but not part of our Act.

MR. KENT- it is Imperial legista. tion.

RT. HON. PAIME MINISTER-BuL ft aeoms to me that it might be of value, The imperial Act states that the Government of any British Posseswion ahall have the same power to grant an certifieate of naturalization as the Secretury of Stute has under this Act.

MR. MORINE-Was this bill sent out to be passed in this form?

RT. HON, PFIME MINISTER. Thifir Act bas been passed by the Imperial Govermment and by those of feme of that Dominions. When I firat fead it, I held the aame opinton as my fenmed frtend but on further consld. eration it seems different.

MR. MORINE-There hre Bome worde loft out in seetlon 8 of the bill, which are very fmportant.

RT. HON. PRIME MINISTER.Do you not read that section to mean that the secretury of State han the power to naturalise. It is rivins him the same bower ay we are giring to the Colonial Secretarg.

MR. MORINE-I notice thit there

Is a very important provision that has not been put in this Act at all. We do not want to put snything in, that woutd be absurd, for it lias to go to the Otd Country. I suggest that we might let these sections stand over for further conslderation.
MR. JENNINGS-Mr. Chairman, with regard to this btil, 1 wish to refer to a class of allens. The one class in particular to which I wish to refer are the Syrians, who come here as peddlers and small traders. They are non-producers. The country is certainly not deriving any beneflt from thom whatever. I understand that there is no law interfering with those people. They do not keep the commandment to keep holy the Sabbath Day. There ought to be a law preventing theee peoplo from dieregarding the eabbath day.

MR. HIGGINS-Mr. Chatrman. I think my hon. frfend, the member for Twillingate is confusing two different classes or races of people. The Sy rians who come from the locality of Mount Lebanon are a Chrletfan and very religious people, but there are others who come here from the same part of the world who are of a different race and follow different customs. These are Turks, and they and the Syrlans have nothing in common at all. They are an entirely different people, with entirely different tdeas. These two peoples are vfolently opposed to one another In manners and customa and particularly in rellgions tenehing, and I think the Syriangthe real Syrians-are not the people who would be referred to in the hionourable member's remarkn. Now my learned friend the leader of the $O D$ position and my hon, friend Mr. Dwyer can bear me out in this. Wo have a number of thone people over in Bell Istand, and they are a particularly devout people. They not only do not engage in trade on Sunday but
in the observance of the sabbath.they aro an improvement on many of us. I only speatk now In Justice to these people, because later on when the records appear they might bo wrongly conntrued and I am aure it is not the intention of my hon. friend that anythtng like that should be done.

MR, MORINE-Bolore we go any further with this bill. Mr. Chairman I call the Premter's attention to sections 8 and 9 for the purpose of asking $\mathrm{h} / \mathrm{m}$ after he goes through a Uttle farther to let the Committeo rise and report progress while the Law Officers of the Crown look a Littie more carefully into these secHons I think they will find obvious errors, and that both these sections need reconsideration and redrafting. Thoy are manifeatly drafted without much consideration of section 8 of the Imperial Act. Naturalization tor Imperial purposes is primarily a matter for the Imperlal Parliament, and It Is quite proper for the Imperfal Act to provide that the Secretary of State shnill have the power to grant a certifieate of naturallzation; but tor us to provide the same thing and to say the "Secretary of State and the Government of any British possesston shall have the power to grant a Certificate of Naturalization" is a manifest absurdity. People would think we did not know what we were tatking about. The Secretary of State hat the powers given to hlm by the Imperial Parlfament, and tho foason the worde are used in the Imperial Aet te that tho Colonios eannot linve the power thereln conferred unless given them by the Imperfal Parliament. All our section 8 should provide for, is that the certficate of Naturalieation given by the Seerotary of State or Governor of a British possession khould have the torce and effect of one granted by our Colonial Secretary.

Now 1 find an error in seetion 9. The section rands:
(9) Section 8 of this Act shall no! apsly to any of the Dominions apeci fiad in the Fyrat Schedule to this Act. inless the Legfistature of that Domin. lon añopts Part II of the British Nationility and Btatua of Allens Act 1014.

Now when I tarn up the Imperlal Act I find that what it says is that "this part of the Aot shall not apply" It doea not mean section 8, but thet whole part of the Act in reference to the nuturaliantion of alfens.

Then in the firat sub-section of seethon 8, there are two or three lines of the Tmperial Act left out which are necobsary to mnke sense. As it standr at present it is not sense. I would therefore suggest that the Committee rise and that the Law Offlcer of the Crown look into the matter again. Thanks are due to Mr. Kent who brought thls mattor to our attention. Othorwise it mfight have sllpped through and gone down to the Com misston who are consolldating the statutes and given them a great deal of trouble.

The Committoe rose and reported progrens und asked leave to sit agatn on tomorrow.

PATENTS BHLA.
Committee of the Whole on Bill "An Aet respecting Patents and Trade Marki

The Chintrmnn from the Committee reported that they had considered the matter to thim referred, and had pas Fiod the Bill without amendment.

Ois motion this Report was recelved and ailopted, and it was ordered that the Eill bel read a third time on to norrow.

## ADDRESS IN REPLY.

The debnte on the Address in Reply was resumed.

MR. DEVEREUX-Mr. Speaker. In reationtis the debitite on the Addreas
in Reply I must observe, Sir, that in my opinion the policy of tha present administration should be the same as in the past or as near as it is posaible for that polley to be with regard to the aifferent position and different conditions in which we now live. There has been throughout the Colony a cry that we ought to practice economy. I may say, Sir, that economy like pesilmiam, may be fust as illjudged, Just as unwise and Juat an dangerous in connection with a gorernment as it may be in counectlon with an individual. As I observed leat evening the danger in England today is not as much the provisions for ite soldiers, the fear that they may not be properly provided for is not Within the hearts of the British Empire; but leaders in the Mother of Parliaments to-day are more concerned with the subsidiary regulathons that must be made and are in the maidig with regard to the labourers, the artisans, the man who staya at home and hes not only to take the rapponsibility that otherwise wonld be his but to malntafn as well the responsibilitien of those who have given up practically their positions as ofvilians, in order that they may wear thakd, and maintatn the power and preatige of Eareland on the plains of France and Belgium. Therefore, Sir, it has been consldered and well considered by the leaders of the Labour Unions, in England and other parts of the British Empire that it is not well that we should an be inclined to an error that may have the ultimate result of creating a monument of pauperiam, as a result of the war, that may last not only through the war but may continue for generations to come

It has been stated in another place that we have to be extraordinarily carefal, that we must be more than economical, because it is sald, our
staple ladustry will not be during the course of the war as valuable as it. has beeri prior to the war. The staple findurtry of this country is our cod fishery and the man that dares to interfere with ita value would bo Just as unfair and just as dishonest as a man that would voluntarily by fils position whatever position of responslbility he would occupy, wonld commute the value of a five dollar bill into the value of a four dollar bill for private poin. Men in publie positions and Important poaltions ought not be obsessed by one Idea, an fidea which assoclates with itself pessimism and despondency and lack of British courage, lack of that British spirit which makes the eltizens of the Brittsh Fmpire envied in every country outside Itself. It is a dangerous thing, Sir, to interfere with the people's bread, and I trust that the despondency which has been voiced in this Chamber wilt not continue. 1 have no destre to make any reflection upon any individual or anybody in this House. I am asaured to-day as I hear my own volee that there is no difference on alther side of the House with regard to British cittzenship and our ldeas of it. I belleve that the Opposition has shown its loynlty in every particular. Some of them have given up thelr dearest and best Others Hike my hon. friend Mr, Stone have otfered themselves to go to the front. (Not only that but Mr, Stone went around hil own district and other parta of the Colony invittog those who are fit to go into the trenches to go and help to matutain practically and personally these ideals of Eumpire of which we are 30 proud). The hon. member for Trinity and the hon. member for Twilingate, Mr. Conker, have in every way shown thair loyalty and their desire for Newfoundland to do the pert expected of us by the Imperial Government, and so no obser
vation of mine should be taken, nor whs ever meant to be taken as tm plying any reflection upon any findividual to the clumber.
Now, Sis, I should like to make a fow remarka in rolation to our outport Naval Reservists and Soldlers that have gone and are golng to fight for our sovereign lord the King. It han been stated since the war began especiatly in thle efty and sometimes through the prese that our outport youns men wore not logal, that they bad not a fltting conception of thetr position as members of our Royal Naval Reserve; that they were slow in coming forward and that they did not feel, because they did not seem to show, that enthuslasm which was so creditatity displayed in the elty. That was an unfair reflection upon the cutport young men of this country, and upon their fathers and thole anothers and their gisters; and these young men have lately given the lle to thant monstrously unfair reflection that was made by someone or some body of men in relation to our outpert people in connection with this war.

Anyone who has had the opportunsty of observing the difference between conditions in the outports and in the city can understand the onthuningm you had hero in the elty, the example of the Boys Brigndesand our nolle boys have shown what proper teaching ean do-had much to do with it. You have had these brigndon for more than twenty years na an example to the young men of the elty; and yon tind in addition the city papers and the elty pulpits and all that soes to bulld up proper tdeas of $c^{t}$ tisenslip. While we have aome of those thinges in the outports, it is impossible for us owing to our situation, to be moved to such an extent as the people of St. John's. It is true and I am proud that it is true, that the city
responded nobly. All that the city ever gave to thege boys brigades has been returned a thousand fold. We are proud of these three or four hundred sturdy, healthy young men, with their souls filled with the sublime idea of British eltizenship. But, some of us have felt the unfalr reflection that was thrown upon our outport boys.
1 trust now, Sir, that during the war at least this Parllament, thls Commons of Newfoundland, will follow the example of the Mother of Parilaments and that it will be fllied with the same spirlt that has permeated the Parliamento of our aintor Dominlons. The maln tdea and object of our deliberations here ought to be the welfare of the Empire, especially while the war is on. Afterwards let us have crittcism here, severe though it may be, lyper-criticism thoush it may somotimes be. It is the duty of the Opposition to punctuate, and puncture if possible, the observations made from this side of the House. But this is not the time for such. This is the time to help, to give help fatrly and sympathetically, and the independent electorate outaide of this House will Judge you and will give you the support you were prepared to give the Empire and the country in its hour of need.

Before 1 aft down, Mr. Speaker, 1 should like to offer my congratulationa to the honourable member tor Bonavista, Mr. Morlie, upon hils return to the House. I was a constituent of hia for many years. I had the privflege of heariag him on many a platform, and though I was perhaps most of the time politically opposed to him, yet 1 never for a moment could but acknowledge hls brightness of lintellect and that urbanity of his which made the people of Bonavieth for nearly thirty years net only consider him highly from a politionl point of view. but look upon him as their best friend.

I should also like to congratulate the late member for Bonaviata, Mr. Conker, who not only had the privilege of a seat for Bonavista last session but has now the double bonour of takIng a seat for a district that has been represented by many great men in the past. I trust that owing to his sincority and the great amount of work he is able to do, as their representative, ho will satisfy the people of that district, and when the years shall pass away and we shall took back upon this period, we shall be able to congratulate both those dis triete on their selections.

On motion of Mr. Parsons, seconded by Mr. Higgins, the Report of the Select Committee appolnted to draft a Reply to the Speech of His Excellency the Governor, was adopted.

## NOTICES OF QUESTION.

Mr. Coaker gave notico of question.
Mr. Dwyer gave notice of question.
Mr . Stone gave notice of question.
Mr . Grimes gave notice of guestlon.
Mr . Abbott gave notlee of question.

> SAW MILLS BILL.

Mr. Jeanings gave notice that he would on to-morrow aak leave to introduce a Bill to smend the Saw Mill Act passed March 11th, 1914, In rela. tlon to Section 6 of the said Act.

## TEMPERANCE RESOLUTIONS.

Mr. Hickman gave notice that he would on Friday ask leave to introduce a Resolution expressing the desirabil. ity of the Government bringtng $\ln$ a Eill prohibiting the manufacture, importation and sale of Intoxicating isquors in the Island of Newfoundland and its Dependencles.

The remaining Orders of the Day were deferred.

It was moved and seconded that when the House rises it adjourn until to-morrow, Wednesday, April 14th, at three of the clock in the afternoon.

The House then adjourned nccordIngly.

WEDNESDAY, April 14.
The House met at three of the clock in the afternoon, pursuant to adjournment.

## PETITIONS.

HON. C. H. EMERSON - Mr. Speaker, I beg leave to present a petition from Mr. T. J. Grandy and others of Garnish, Fortune Bay concerning some fishery matters. The petition shows that owing to a fishery rule at present in force, while the people of Grand Bank ean haul herring at cortain close seasons of the year they cannot, on aceount of being torbtdden to haul in certain localities, I would ask that this be referred to the Marine and Fisheries Department and I trust that something will be done in the way of altering the rules in accordance with the prayer of the petitioners.

MR. E. PARSONS- 1 beg leave Mr. Speaker to present a petition from the inhabitants of Bishop's Cove, Upper Ialand Cove and Bryant's Cove, concerning fishery matters. The petition shows that in the opinion of your petitioners trapsetting is detrimental to the hand-line fisherles. Your petitioners beg that traps be not permitted outside 50 fathoms from the shore. The petition is very largely signed, 175 names, and I would ask that it be referred to the Department of Marine and Fisheries, where I trust it will receive the attontion which such a petition merits.

I also beg, Mr. Speaker, to present a petition from the residents of Riverhead Harbor Grace, Your petitioners pray that the platform at the station be extended. At present this extends only 6 or 8 eight feet beyond the station, and it is consequently dangerous. They also ask that a light be placed near the station, so as to allow the residents to carry on thelr
business at the station. I would asit, Mr. Spealcer, that this petition be reforrod to the Dopartment to which it relates.

MINISTER MARINE AND FISHER. IES-Mr. Speaker, I beg to support the petition presented by hon. friend, Mr. Parsons.

MR. CURRIE-Mr. Speaker, I beg leave to present a petition from the residents of Point nu Gaul, in the District of Burin, praying that that place be made a port of call of the S. S. Argyle. While I recognize that the Argyle is alroady overworked, and have so written the petitioners, nevertheless I would ask that this petition be referred to the Department to which it refers for conslderation.

MR. LEFEUVRE-I beg leave Mr. Speaker, to support the petition of these people just presented by my hon, friend and colleague, Mr. Currie.

MR. STONE-Mr. Speaker, I beg leave to present a petition from the inhabitants of Cooseberry Cove with respect to trawl fishing. It is signed by forty odd fishermen, and I would ask that it bo received and referred to the Department of Marine and Fisherles for consideration.

QUESTIONS.
HON. COLONIAL SECRETARYI beg leave to table the reports of the Bell Island Local Councll, asked for yesterday, by Mr. Kent

MINISTER MARINE AND FISH-ERIES-I beg leave to table answers to questions as follows:-Mr. Halfyard's of Aprll 14th; Mr. Coaker's of April 13th; Mr. Kent's and Mr . Stone's of April 13th.

MR. COAKER asked the Rt. Hon. the Premler to lay upon the table of the Honse a copy of the reply of In spector-General Sullivan to the report of Constable Cramm ro the Rus sell-Pelley Fox Case as tabled yestor-
day, wheroin Constable Cramm demands action by the Crown against Messra, D. F. Plercey and H.D. Reld.

RT, HON, PRIME MINISTER-In reply I may say that I wrote this morning to the Inspector General, and I hope to havo that reply to-morrow.

ell, $\$ 50.00$; John Doyle, 874.60 How much was pald Mitchell for board and lodsing per day on thls Job? How much was paid John Doyle for board and lodging per day on this job?
(e) In relation to Placentia Bay Cable:-(1)-T. J. Kennedy, \$124.20. What was amount pald for? ( 2 ) Best and Travers, $\$ 114.00$. What was smount paid for? (3)-C. F. Lester, $\$ 200,00$. What was amount paid for? (4)-D. Stott, $\$ 100.00$. What was amount pald for? (5)-George Veltch, $\$ 75.00$. What was amount pald for? (6)-Johu Doyle, $\$ 25.00$. What was amount pald for: (7)-What rate per day for board and lodging was pald; (a) D. Stott; (b) George Veitch; (o) John Doyle white engaged at Placentla Bay Cable? (8) Owners S. S Baleine, $\$ 2,037.40$. Did the charter of the Baleine cover all oxpenses fo crew, steamer and Government employees engaged at laying the conble? How many days was steamer engag. ed on this job?
(1) In relation to Natre Dame Bay Cable:- (1) - John Doyle, s17.00. What was amount pald for? (2)-Oyrers S. S. Baleine; $\$ 1,500.00$. Did the charter cover all expenses for crew, steamer and Goverument employees engased in laying the cable? How many daya was steamer engaged at this job? (3)-Capt, George Mercer, $\$ 175.00$. What was amount patd for?

HON, COLONIAL SECRETARY. I would like to say that I think th= thanks of the House are due to the fhon member for Bonavista, Mr . Morine, for suggesting to the Spreaker to forego the reading of the questions and to ank them by numbers. Thifs question is a pretty sood instance of what this susgeation means. Now if he would suggest some abbreyfated way in which queations of thin frort could be answered, we would bo still more srateful to him. This fo a very comprehensive question, atid
its leogth $t_{3}$ oaly exceeded by the amount of detalled matter that it requires to be furuished. I hope, however, before the House closes to bo able to give the information required.
MR. MORINE-Mr. Speaker, I woutd nugrest that the questiona be numbered on the Order Paper.

MR. GRIMES anked the Hon. Mhr. Ister of Finance and Customs to lny upon the taste of the House a copy of the names of all persons recelving Oid Age Penatoas in the District of Port de Orave, together with the nameo of the localities to whith they belong.
HON MINISTER FINANGE AND customs-That is in course of preparation.
MR. GRIMEs anked the Minister of Publle Works to lay upon the table of the Honse a sitatement of the cost of rephirs effected to Brigus post offlee in the District of Port de Grave, If the amount hne been pald, and to Whom, tund from what grnnt taken.
MINISTER PUELIC WORKS-Th reply to that quention haa atready been tabled.

MR. GRIMES asked the Mlalater of Fublle Works for a detalled statement of all moneya sent to Cuplds, Fort de Grave divitrict, for local, main tine apectal or other purposes, and the names of persons to whom sent. for the years 1911, 1012 and 1013.
MINISTER PUBLIC WORKS-That is in course of preparation.

MR. GRIMES asked the Miniater of Marine and Mabertes to Iny upon the table of the House a detailed statement of all moneys sent from his department for expenditure in Cuplda, Detrict of Port do Graves, and the names of versons to whom sont, for the years 1910, 1911, 1912 and 193.

MINISTER MARINE AND FISH:

ERIES-1 will bave that reply to-morrow.

MR. ABBOTT asked the Miniater of Marine and Kisherles to lay upon the table of the Howse (a) an ftem Isod atatemeat ahowing the amount of $\$ 5,000$ pald the Reld Newfoundland Compuny on account Gape Bonavlata Fog Alarm; (b) the amount paid the foremun; (c) the total cout of the Fog Alarm at Cape Bonavista.

MINISTER MARINE AND FISH ERIES-That is in course of propistntion.

MR. KENT asked the Rt. Hon. Prime Mintster to lay on the table a statement showlag the partlei with whom the Goverument to negotiating ns referred to in the lant but one paragraph of the speech from the Throne, the object of such negotintlons, and all correspondence, papera and agroemente in relation thereto.

RT, HON. PRIME MINISTER Thore are two matters beling consldered. The ftrat is a contraet in relation to the dovelopment of water powers on the Humber Rtver, at Bay of Allands, for the purpose of manufacturing fortilizer. The Government has bean dealing with Mr. Willson in relation to thiat 1 -understand that he If associated with the Reid Newtoundland Co, and with some peoplo ta the United States. The other agrea nuent In with Mr. Edward St. John Howley, who resides at New York. and some caplialists there, in retathon to cold stonage for fresh fish. Neffier of those asreements have yet been concluded, but it is hoped that they will bo signed during tho veok. Immediately on their befng nlened I shall table them and also any correapondence which may have taken place concerning them.

MINISTER PUBLIC WORKS- 1 beg to table answer to a question aiked by Mr. Dwyer; also a state-
ment asked for by Mr. Stone in reference to affnirs at Grand Bank,

SAW MILLS BILL.
Pursuant to notice and leave granted, and on motion of Mr. Jenninge, the Bill entitled: "An Act to amend 4 George 5, Cap. 17," waan introduced and read a first time and ordered to be read a second time ou tomorrow.

## PATENTS BILL.

Purauant to order, and on motion of RL. Hon. the Prime Minister, the Bill entitled: "An Act Respecting Patents and Trade Marks" was read a third time and passed, and it was or dered that it be engrossed, being on titled as above, and that it be sent to the Legislative Council with a message requesting the concurrence of that body in its prorlsions.

## CUSTOMS BILL.

Second reading of Bill "An Act to Amend the Customs Aet, 1898,"

HON. MINISTER OF FINANCEMr. Speaker, I wish to make Just one or two remarks in explanation of this Btil. The need for this change in the Act has been felt for some time, and we had recommendations last year from the Board of Trade asking that the alteration be made. Under seetion 19 of the Customs Aet of 1898 there is no power given to deal with the goods brought into the stores of the several shipping compsites from time to time. We have had several communications from Harvey $\&$ Co, the Fumess Withy Co, and the Reld Newfoundland Co. last year and the year before, to the effect that an onormolys amount of goods was left on their premises after the arrival of each ship; in fact, they complained that therr premises were being turned into public warehouses, Under the Act as It stande at presont, goods are supposed to be removed within ten days after arrival. But what real-

Iy happens is this. Goods are brought in and are not promptly removed. Before the expiration of the ten days another eargo arrives, and it is plled on top of these goods; then when the owners of the goods find it convenient to come and take delivery of them they find it impossible to get them. The trade have therefore asked that regulations be mide to make it Imperative on the Importers of goods to remove them within a reasonable tima. The change is a very simple one. We are asking that atter the expiration of five days after the arrival of a shlp or train depositing goods, the Customs may have authority to remove the goods if the owners are not prepared to take deliv. ery of them. That is the priacipal effect of the amendment. Uader Section 19, the Collector or othor proper oflleer may permit the master of ady steamboat, under such rules and regulations as the Governor in Councll may make, to deposit the oargo in a warehouse to be provided by the owner or agent of the boat and approved of by the Minlster of Finance and Customs, the owner or as. ent of the boat haring first stiven general security by bond, in the form preseribed by the Governor in Councll, with two sureties, for the piy. ment of the full dutles of Importation on all such poods as shall be at any time so warchoused therein, or for the exportation thereaf; and goods 50 depositod shall be deemed to be on board the importing steamboat, and shall be subject to the same regu'atlons, Denalties and forleltures as if they had not been talsen theroout; and the master or owner of the steam boat shall have the same Ifon on the goods for frelght or other charges an If the same lind not been deposited in the warehoave, but shall not bo entitled to any ronte for the gcois so deposited. The owner or consignae
of the goela mast male Aut eatry thervot within tue tayn from the time of thetr betng wo Geposithet of the warekoues; provitidt that fo case necb entry is oet mate wirtin the time meatincet the thecetver cenecal way appty the proctalons of section If at this Act, io far as it may be deter to ench soofe

Under that nectlon tmin dayn are allowed for the importiris to take ge: Hvery of their mocti. Air 1 have sa-c, the Boerd of Trate have rupremented that that perfoal Is too tome and thay ank that 't be ehorteiced to five dayp. At the expiration of five dayne it the goode are uot taine delivury of, the Customis biny remure flems to any bueded warchouse in the elty, stil the orteer wefl to Hakle for the cort ef ramoral sail fou dit starsere of thet coods until ant them an they wra takes. I aurgest to the Promier to atfow the Comamitive to rise and ack fenev bath on a later slate.

RT. HON, PHIME MINISTEA-That *hy mive inteution. I entirely agreo
with the hon. member for Bonavista, that it will be a great advantage for the Select Committee to have the benefit of the views of the Whole House before taking up the matter.

Mr. Speaker resumed the Chair.
The Chatrman from the Commiltee reported that they had conslidered the matter to thom referred, had made some progress, and asked leave to sit agatin on Friday.

On motion, thls Report was received and adopted, and it was ordered that the Committee liave leave to ait agnin on Fridny:

## NATURALIZATION OF ALIENE BILL.

Pursuant to order, and on motion of Rt. Hon. the Prime Minister, the House resolved liself into Committee of the Whole to consider the Bill entitlod "An Act reapecting the Naturalization of Allens,"

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Commiltee.

Mr. Speaker resumed the Chatr.
The Chairman from the Committee reported that they had considered the matter io them referred, had made aome progreas, and alked teave to alt again.

On motton, this report was received and adopted, and it was ardered that the Committee have leave to sit agaln on to-morrow.

## NOTICE OF QUESTION.

Mr. Kent gave notice of question.
Mr , Abbott gave notice of question.
Mr. Jenninge gave notice of questlon.
Mr. Winsor gave notice of question.

## PENTTENTIARY ENQUIRY.

MR. COAKER-ME. Speaker, 1 wish to draw the attention of the Premier to a letter which has recontly been received by mo. It ia in reference to the condition of the Pententlary. I think the Government ought to investigate that Inatitution Immedlately, If the conditions are anything like those
reveated in this letter, I aak leave to read the letter for the House. It is from a constituent who was recently ia prison:-
Dear Sif-On the 24 th Detober. 1914, the Grand Jury went down to Invesligate matters at the Penitentiary and, as a rule, the Superintendent took them through the prison and broomshop. They asked, through their foreman, it there were any combplafnts to be made. The Supt. sald that things were working alright. Now, Sir, where is the Board of Health and Why does not Dr. Brehm pay a visit and see the nutsance pit and the twa closets right under the north window of the prison? Some time ago Dr. Wakefiela was lecturing about germs, which are carried by Iles, being the cause of tuberculotit. Now, Sir, tn the summer season. when the Idtchen windows are open, the nulsance plt is only about a hundred yards away,and when flies are plentiful you can lm asine what quantities are on the pans when the prisoners go for their punky. If it is the case that flles carry germs, then there are lots of germs In the oatmeat and molassés, so, Sir. I think this matter should be looked into at onco.

Is the Government paying Dr. Keegan $\$ 800.00$ per year to look after the heatth of the prisoners in the PenItentlary? If bo, why is it that when prisoners are sick, they cannot have the Doctor's attendanco in person? The writer asked for a doctor three Hraes, and the answer he got was "I'll see." On Feh. 26 th, 1915, I-saked to see the Doctor again. The Supt. sald: "You will see the Doctor to-lay or tomorrow. He ls coming to the prison." But I nover saw him. When the doctor does come, it is to the Superintendent's office he goes, and not to the prisan, nor does he see one of the prisoners. He only accepls the Superintendent's report. The writer was
stek for three doys, and did not eat a mouthful except soaked bread anil cold water.

On Jen 15th Mr. Honla came to see James MeGrath. Now, Bir, why whs ho not taken in his prison clothes ragred as they weret No. Mre McGrath was taken to the bathroom and given a good sult of clothes and then taken to see Mr. Bonia in the little office.

On Jan 2tst the Grand Jury carne on a visit to thie Penkentiary, A. C. Peters. Esci-i foreman, All the prlsonors were called to No. 1 Ward to toe the line The Supt introduced the Grand Jury, and asked if there were any complatits to make. The foreman snff that the prisoners had on poor clothes. The Eupt. sail that those were their working elothes,anh their Sunday olothos had not arrivea. yet. What a blutt Now, Sir, why shoult some prisoners get good clothes sil the time and others get. rage whon both are हerving the sumbe penalty? This is a matter which I do net understand. I should think that prisoners should be treated alike in the clothitge thee. Thie prtagners whio go to the Hospltsi and Government House utways luve sood clothes, while the priaoners in the selis and troom ahop fuve to pit up whe whit they can get. There are a few ex. ceptions and these can get Sunday elothee every day. This thine should not be tolernted. All prisoners should be trented silike in clothing and all rags should be burnt. Thare are clotnes worn in that prison which are not fit for any humen befing to wear. The Scripture sayo that cleanliness is next to Godiliness.

Now, Sir, there are thre monthis In the winter when youl tiave to uso your alon kettlo to scrub your cell every Friday morning, with no water to wash it out and mo Afrinfectant either. For No, I Ward and the two top
corridera clean kettles are found, but stop kettles are used for the cell. It Is time for the Grand Jury and the Covernmeat to lools into this matter.

Why ahould the prisoners who work at Goverument House and the Generat Hospital get a plot of tea fn the morraines white the prisoners in the broomahop are supposed to work on oatmeal, hard bread and cold water in the morning, and only one pint of ten during the dsy? According to the seale of board, the six or tweive rouiths men are supiosed to get a kitl of motnsses per day, Dut the prisotice who work in the broom shop don't get a gill of malasses a day, not by mesaure The broom shop is the only part of the institution that pays. ant the prisoners who work thero zhould set tea in the mornings as well as those who go outside to work. The prisonars who work at the General Hospital get two meals whlle they are there, aso they fare well, better than the prisoners in the broom ahop, which te not "equal rights to prieonars."
It is time in the 20 th century for the Government to cliange things and tiave a retormatory in the prison, and find manual labour for all instead of talf, and thus prevent the prisoners peling locted ap, whith is infurfous to tiealth. There are quite in number of vasrants who make the Penttentlary their home, and they get a better zhow than minny of the prisoners Who go in there on thelr first and only term. These vagrants should be reformet and gtven ptenty of work to do. and not encouraged in their laviness, bo that they will not be truating to the Penitentiary as a boardinghoure or a home. The Gov. firnment of the present day should keep abreest of the tlmes in reform for prisoners, and treat them the Hume as they are treated in other countries. The Goverument has plen-
ty of land down there which could be cultivated by the prisoners, the produce of which could go to supply the prison, instead of buying such supplies as potatoces and turnips from onteride. The potatoar bought for une in the fartitutlon this year wero of II bad quallty and fit onls for cattic This would mean a save to the Gor ernment of quite a fow dollars. Onder the presebt arrangement, why does the Supt, reap the benafit of the jooceeds?
Why is It thint 8 man who to not convicted of any crime, but is wastung trala, to turned over to the offictile to the Penttenttury, stid that is poilice officer is allowed to come to the PenItentrary and make that man tahe off hifs winter clothos and put on sumber ones? Mind you, it was winter timus, and the man was not convicted when thls was done, and that man oid nat get a change of underwear for four months, although he had clothes of his own whick he asked for and which could hate been given him. He asked for a change of underwear twlee during the first month and a half that he wan awaiting tulal This wame man, althoush he was not in the Penitentiary for puniahment, wats puntshed aiong with the convicta. Why is it that a man walfine triat is confined in the Penitentiary when the Pententinty ts as prace for coil viets and eriminala? Why is it thas: a man this awaiting trial and contined to the Penitentiary is aot given just as gond as the best the prisum can afford? Some of the convicts conflinel there get better food than he does. The British law says that way one suapected of ertme and hold for trial should be conslaered as innocent until fonind sulty, and that, as firr as poseible, ho alanll be treated as such. Why fir it that after one is confined in the Ponitontlary, it hed is sick, he cannot get a doctor

Without asiting a number of times? I know of one case where a man, who wis only awaiting trinl, asked five times for a doctor, four times during the month of December, 1914, but he nover saw one ailliough the doctor called at the Penitentlary during tha time to see other priboners On Dec. 24th, 1914, thiss man was not allowed to nee lum, and on the morning of fan. 13th. 1915, this same man was ordered to get out of his bed nt 7.15 a.m. When he answered the head warden and sald he was sick and wanted to see a doctor. The warden told bim thit until the doctor sald he was stek, he was not siek, and was to ger up and make his bed. Later in. the same day the Superintendent told the fian he would get a doctor for him. On March 17th, 1915, Mr. A. B. Morino came to see the eald man, and brought him a shifting of his own fanide clothes, and orcered a doctor to see him. The doctor then came, arramigaments were made, and tio was ordered botter food and mediotne.
We timprove with the improvement of tumanify. Without an improvement of the whole, can you hope that our own moral and material conditions Will improve? The apirit of liberty is not, as muldtudee imakine, a jealousy of our partcular rights, but a respeot for the rights of othera.
Faithiful friendship is like the needte which speodily repeirs the puncture wth the thread in its wake. There in bardly a thing wo do which does not requite someone alse to do somethlag else. The reason why so muny people seem as small ts because thoy meaaure others by thelr own messure.
My letter is rather long, but the aubjoct fer new and ought to be farreaching in the cause of humanity.
It is and that the Supt, gets a bonus of te, per doz, on brooms, and
the Deputy 2c. per doz. Why is this bonus patd?

I trust you will pardon me for the length of my letter.

## Yours truly, <br> PRO AND CON.

It is a very serious thing to my mind, that this man should have to Wash up his cell, with the utensils doscribed haviag no disinfectant. I trust. however that the Goverument will glve this matter immediate attention.

MR. MORINE-Mr. Speaker, 1 had no Intention of bringing this matter before the public notice, but, on hearing the letter whch has just been read, seel that I ought to say what 1 know about it, is 1 am fntimately connected with the case. I ought to have brought this matter before the publio earlier perhaps, but rofrained from doing so, thinking it might not be wise in the interest of this prisoner. He was brought to St, John's from Bonne Bay on the 3rd of last December, eharged with arson and tarcelly and thas not yet been tried. Is that in accordance with British juetlee? I understand that the excuse was that witnesses could not be brought round, but if he could be brought round, why could not they? This man who was put into gaol without trial, was, in the eyes of the law, innocent. He should have been tried and set free long before Christmas Day. He was by it trick deprived of bis clothes in the Penitentiary by the pollee, who had no authorlty whatever to act as they did. They took away from him hle winter clothing not telling him that they intended to deprive lifm of It. I tried to get It back. and so did the Superintendent of the Penitentiary, but without avail. He was left exposed to the cold weather of winter, bocause the had not suffictent elothing to keep him warm. Fin-
ally 1 had to bring him down a suit of my own underwear. Worse than that, for four monthe, he was not given a change of underclothing; but had to wear the same thin cotton underwear. He was only able to wash His underclothing in a hand-basin, and then try and get them dry by next morning, very often going with no underclothing on whatever. On sev. eral occasions he asked to see the doctor. but no doctor came He asked to have his underclothing returned to him, but if was not done. He had not a bath for four months. His food was on the poorest scale; though in Justice to the Superintendent 1 must say that this was in accordance with the regulations which prescribe the same food and treatment for persons awaiting trial as for prisoners sentenced to loss than els months, which is poorer food and less of it than for conviets who have to perform hard labour: The treatment of this prisoner was disgracetul-a disgrace to any country. I feel that thls state of affairs demands an immedlate enquiry and a remedy.

RT. HON. PRIME MINISTER Mr. Speaker: It is unnecessary for me to say that this is the first intimation 1 have had of this, or any other member of the Government so far ag I know, We hear it now for the first time, and whilst I would not for if moment doubt any statement that has been made by the hon member. ind by Mr . Coaker in the letter that the read here this evening, I shall feel disappolnted Indeed it the Superintendent of the Penifentlary is not able to fully explain every statement made there

MR. MORINE-Elvery statement I have made was admitted by him.

RT. HON. PRIME MINISTER 1 have known hlm for years and I know him to be a most humane gentleman.

MR. MORINE-I must ERy th Justice to him that he seemed surprised at the whole thing. As to the clothes which were taken by the police, the Superintendent thought that thay had the power to do so.

RT, HON. PRIME MINISTER1 shall have enquiries made fnto the statements minde in the letter, and by Mr. Morlne

The remalning Orders of the Day were deterred.

Mr. Speaker announced that 11$\}$ Excelleney the Governor would secelve the Address in Teply at 2.30 p . m. on to-morrow.

It was moved and seconded tiat when the House rises i tadjourn until to-morrow, Thureday, April 15, at nalf past two of the elock in the after. noon.

The Howse then adjourned accordtingly.

THURSDAY, April 156h. 1315,
The House met at hall-past two of the cleck in the aftarnoon, pursuant to adjournment.

## ADDRESS IN RELLPY.

Mr. Speaker informed the House that, in accordance with the intimnthon recelved, His Exceltency the Gowernor would recelve the Address of Thanks presently.

Accordingly, Mr Speaker and the Howse proceeded to Govermment House, and, being roturned to the Aosembly Room, Mr, Spenker Informeal the House that Hha Excellency bind recelvod the Addreas of Thanhs and had been pleaged to repiy thereto as follows:-

[^0](Sgd.) W. E. DAVIDSON, Goverame,
Aprll 15th 1916.

## PETHIONS.

MA. GRIMES-Mr. Speakcir, 1 ask feave to preseat a petition from the frhatitants of South Brigus, asking that a sum of money be allocated for the purpose of making an addition to the publlic wharl at that place I might vay, sir, thet this wharf is used by quite a large proportion of the reoidents who roslde in that locality and the rudjoining settiomente. There are intiout seven thousind people, I think, intereated in that wharf, and who use it conelderably during the apring and fill seaions At the present time the people have no opportuntty of tringfing a vessel near the whart, because the topth of water there is not auftcient to permit a vessel of any size-to get within fifteen or twenty feet, and thiny heve to go out in boats in order to got what they want, or else they have to so three or four folles distant from the residence, which is a cobsidornble itronrenfance, eapecially whien there is is starm on. This grant, If the Government could see Its way clear to grant it, would ald considerubly aino in rolfeving the distress that prevalls around that locallty just now. becatuse of the fallure of the fishery fant year and tho clocing down of the Flell Inland mines, upon which a large unmber of people depenided Mor their support ha a reault mary of them are now deponatig upon the Poor Comralsaloner for relief, and they are not able to set sufficient to provide themwelves und their timilies with the. pecesisaries of life. I trust the Gov. canment will aee its way clear to grant the pricyer of the petition, and thus relleve the very great ditress whiloh at present exists in this locality.
MR. MORINE.-Mr. Speaker, I ask Ienve to prosent a petition from Jcsieph Mons and others of St. Chads and Etuld Thclle, Bonarista Bay, askfaig for the cum of $\$ 300.00$ for the construction of it road over a very dificult hill. I ask that this petition be
received and sent to the Board of Works, in the hope that it may be possible to do something towards accedting to the rejuest of thie pettifonere durins the session.
MR. CLAPP.-Mr. Speatier, I ablk leave to present a petition from the Inhabitants Groats Istanis, asking that that place be made a port of call for the Prospero. The petitioners set forth that it is a great hardehip for them to bave to tale thetr wivea and children and lishery suppiles to the Island in open boat. This is the sec ond time that I lave had an oppor-tunity- 1 was golag to asy troubleof presenting a petition on this subJect, and nothing has been done in the mitter. Now, I hare been informed by men who lonow that the approach to Groais Ialand is just es good as that of Greemepond and some other plucos. I had occasion last fall to call upon the Colonial Secretary In connuction with the case of two mon who, while carrying the mall from Conche to Groals Istand, were caught on the Lsland. The Colonis! Secretary was very courteous in the matter and ordered the "Prospero" to go and take these mea off, and no difficulty was found in doing it I think that the Government should make this Ialand a port of call, or an alternate port of call, If the "Prospero" called there six times during the summer and fall, the petitloners would be perfectly sattsfied. I hope that thifi is the last thme that I shatl be oblised to present a petition on this subject, and that it will now recelve faverable conalderation.

MR, COAKER-Mr. Speaker, I wish to support the petition Just presented by the hon. member for St, Barbo. Last yenr I supportod a similar petition, and I think I had some communieation with the Government upon the matter during the ear-

Iy part of the Spring. They did, 1 think, take some steps to bring the matter betore Bowring Bros, and 1 had some communicatlon with them. I was given to understand that the "Prospero" could not call at Groais Island bocause Captafin Kean objected. I then thought to get her to call there me trip in the Spring when the women and children were going down from hore, and again in the fall to take them back here but no arrangement conta be made. Now, it number of the Groals Island people live up here in winter time In the spring they go down there with their familles, and in the fall they take their fnnullies back here again. There are es. I say quite a number of them. I should say there would be about a bundred passengers go down there in the spring. These have to be landed at Conche and taken to Groais Island in an open boat with thelr supplles. It can be readily understood what a great inconvenience this is to these people, Now, Groals Island is rot a port that would be called a bold one to approach. and the steamer ought to be ordered to go there b couple of times at any rate, during the spring and fall. It is not really as bad a placo as Horse Islande to call at, and 1 have no doubt that if the 'Prospera' goes there she won't Btrike a rock.

MA. MORRIS-Mr. Speaker: I ask leave to present a petition from the inhabitants of Whitbourne, Colinet. Haricot John's Pond and North Harbor, in the electoral districts of Trinity and Placentia and SL. Mary's. The pettion sets forth the following matters:
"Whereas the settlements of Colinct. Haricot, John's Pond and North Harbour are without means of intercommuication or of communteation with the outside world, much hard-
ahtp and ineonventence are caused thereby.
"In many instances suffering and even death might have been obviatod hind twese settlements beon in tele phone or telegraph communication with Whitbourne.
"Wlthout such means of communlcation it is now impossible to quickly get in touch with clorgymen ar doctors when emergencles arise.
"The people of the above sottle ment are also much inconventenced In orilinary matters of buslness, besides belng almost completely fioh:ed in other regards from the outside world.
"That a large number of the realdents of Whitbourne who are employed in the three millis at Collnet during the Summer months would fiad a telephone communication ber tween the two places of a great convenience.
"That thls unfortunate state of atfalra may be remedied, the people of Whitbourae, Colinet, Haricot, John'e pond and North Harbour do hereby humbly request your Honcurable House that the necessary steps may be Immediately initiated to provide telephone connection between Colis. et and Whithourne"

Thie petition, Sir, is signed by some 200 residents of the localities mentloned, and I notice amongst the alknatures that of the Fight Honourable Sir Robert Bond. Now, I think this is the first time in the history of this Legislature that a pettiton has been presented signed by Sir Robert Bond, and for that reason I think we ought, In rocognition of the valuable sorvtoes he bas rendered the Colony durtas lall of hits life time, sanction this petition. This House ought to sanction the reguest of petitions on such un important matter and $\$ 300$ or $\$ 400$ should be allocated to the dis-
tricts for the construction of this very necessary worl.

MF. DEVEREAUX,-Mr. Speaker, I bave much pleasure in supporting the petition just presented by my hon. triend. Mr. Morris, as these waces form a very important part of the dill trict. It has been a gront disudvintnge to the people that there has been no telegraph communication to these places. The pooplo are always anxious to get news of their ships coming home from Labrador and so forth; but are unable to do so because there is no telograph office 'there Colinet, for Instance, if the centre of a large milling business, and the trouble fa that those who deal in lumber have to fend vessels thero on specutation without knowing whether there is any lumber there or not. If there was telograph commanication to these places it would do away with a lot of expense, because they could flind out for 20 c , before sending their vessels. One feature of this petition is that the RL. Hon. Sir Robort Bond has signed hils name to it. $\mathbf{1}$ thluk that for that reason if no other, It deserves more than ordinary conslderation at the hauds of this House I trust that the Government will make some allocations, and make it possible during the present year to have this thing attended to. In North Harbour and In Colinet espectally.

MR. WALSH-Mr. Speaker, I am very much pleased to give my support to this pettion. North Harbour is the mont important of those settlements and is the only good harbour on that silde of the hay. The boats coming home to St. John's in the fall often find it necessary to call into North Harbour, and thele friends are very anxlous to know ahout them, but ere unable. Now, that would be removed by orecting a telegraph syztem there. There are people from othar placea la the bay who go over there
to work, and a telephone conneetton there woull greatly facilitate matters However, 1 trust that the Governmant will rerfously consfine it

MR. LLOYD-Mr. Speaker, 1 rhe to support the petition presented by the hon. member for St, Mary'i, Mr. Devereaux. 1 liave not seen IL, but have heard of the necesaity for telearaph or telephone commimication to these places.

MR. STONE.-Mr. Spenker, 1 support the petitions presented by the how. member for Placentia and St. Mary's. I hopee that the Government will moe Ita way cloar to grant what the poople are akking for.

MR. TARGETT-MIr. Speaker, I also support the pettion fust presented. The Government shonld grant a sum of money for the erection of the much deatred telegraph connection.

MR. WINSOR.-Mr. Speaker, I beg leave to present a pettiton from the fnhabitanta of Hare Bay thet that place be made a port of call for tho 8. 8. Dundee.

MR. COAKER.-Mr. Speaker, 1 beg leave to present petitions from Blackhend, Eay Roborti, Northern Bay, Kitchuies, Bacon Cove and Weatern Ray, conceralng the Bin relating to the curreat price of Labrador fish.

## QUESTIONS.

HON. COLONIAL SECRETARY.Mr. Speaker, I beg leave to lay upon the talie of the Fouse the reply to a question asked by Mr. Halfyard.
MINISTER OF MARINE AND FISH-ERIES.-3tr. Spenker, 1 lieg to talite a reply to the question naked by Mr. Grimes on April 14th; und also the reply to a quention auked by Mr . Ab bott.

MR. KENT asked the Hon, the Colonial Secretary to lay on the table of the House a copy of all corresponaence between the Bell Ialuna Loenl Council or any officer of member thereof, and the Government or the

Depirtment of the Colonial Secre tary, from January, 1915, to date.

HON. COLONIAL SECRETARYIt will be tablod to-morrus.

MR. ABBOTT asked the Minister of Maritie and Fisheries to lay upon the table of the House a copy of returtis, thowing the smount of $\$ 500$ that was ailocated to a Mr. Long of Tiokte Cove. Boanvilita District, for a moertrig chain. and atro who requested that the allocation be granted.

MINISTER OF MARINE AND FISHERIES:- 1 beg to table the anawer.

MR. JENNINGS aliked the Hon. Minister of Fintince and Custome to lay upon the table of the House a statement Ahowling who are revelving ona Age Penslons at the present time it the Distriet of Twillingate

HON. MINISTER OF FINANCE AND CUSTOMS.-The unswer in in course of prepiration.

MR. JENNINGE nolsed the Hon. Col. ontal Secretary for a statement giving the names of the coarters employed during the past wlater and summer in the Dintrict of Twillingate, the amount pald por trip thie year and laat year, anit the extimated cost of each courler for the past winter.

HON. COLONIAL GECRETARYThle answer le la course of preparatfonand 1 hope to have it to-morrow.

MR. WINSOR asked the Hon. Colonidl Secretary to lay upon the fable of the House in statement (a) showing why Writor Browtr, matl colirier of Ktigiz Cove, whe dismissed with. out notice; (b) it he recelved a tuonth's wage after dismissal; (c) if to. Why atia be recelve It?

HON. COLONIAL SECRETARY.The same answer applies.

MF. LLOYD.-Mfr. Spenker, I zheuld Itre to know when the Ministor of Finance will have that information rendy, in connection with the batancen on curfent accomit in the banke.

HON. MINISTER OP FINANCEThat information is lieles propareal, and vill be rendy tin about ten days.

MR. LEOYO-It mither mirpriver ane that thle information abould still De in the conree of proparation. Last year I recelved the atame information unf i topied it of in flre miturtes. Why ahould it now take over a week to prepare? It shoukt have been ready before the Hevae met, wo that it might culue ni detiay:

MR. KENT.-d may may that we oushit to be able to get all anewers to quentions in connection with finance beforo the House goes into Committe of the Whole on Supply.

MR. LLOYD. -1 caninot wee how they cin' tale so lang to prepare.

## LABRADOR PISHBRY BILA.

Aecous reading of the fill entitied. -An Act relations to the Bale of Cod: finh on the Labradoe:"

MR. MORINE-MIn Spraker, In moving the peconif ratling of the Bill relather to the ante of cotriat on Tabrador. 1 woald agy that this if an honest uttempt to meet very great difficutties, which have been in axfutenee for many yearn. I am afrald that even it it becomes lisw it will not cure ail the diffioultien, but at least, if will be an honest effort in that direction.

My aim in drawing up this bill was to avold interference with froedom of contract while at the same tfme profuctir is moliture whith wouth sfve in rempormble prospect of talmeser to both sities. The present practice of the sale of coffith on Lalirador withotut the price seting ficut tit wikit rogir and bayer except. by somit vague and indeflafte perhape la mome cases cal calatesty Indetinite, phrase such as
 ly lends iteelf to aboues.

This bili deulis ofily with firh sold and shipped on the Lalirador. It ehtecty arfint the tiiterente of the ttvters
ant the Oonceptitin Buy mein whe es *p there and realite in summer. Is this trade the eusteme lise almot enl. zennally liees not to fir the prife at the time of the mais, bat to give re teipts for the fish in which the terms th which the priee is to be arrived at zare variously aet down. On Inventh. sution I have found the price wet down in the fnttowing ways: "The cur rent price," "whatever price is paid on the const of Laliradar," "at gonaral current prices "current price," "the currant dealing price;" nometimes at "whintever price lis pald by supplying merchanats"" "current coast price," "\$4.89 and current price," "\$3.00 and the rise" On other oecratoris 1 huve foum that 15 matr yronises to puy as mach as another mas, whom the names, or "as mach as othof kurntying merchatis payt of "a quitiar tititient thuyer, ot hur minch as anyone ches" I have not cotae hicruse any case th which the eract price to namme. There tis mo frewtorn of contrurt on the Lahratur. The zaerchant plays with loailed diee be cause the current price is fixad by the buyers thenuetves, whe meet at the Board of Traite late th the year when thoy have recelved enough in. fornatlon to lenew what is nite for them to phy. They naturaily aim to pay an little an they can , and whatever they aucree upon fa the law for all purtics. Thin hair been the porumption ap to the present tume by all parties. Thls year the kroatur zumber of the merchinte pald 8260 for 'quintal for slop fink which war ahtpped at least two monthe before the price was fixed. Whem the fish If at the market they can make a ale enlculatien. I way that that ts pleyise with losded dice Now, I am not atSempting to cearurn the enniturt of those sho were buying; but it is the Iocicat reault of the eystem in fores. The seller has nothing to to with fixthas the prien tie is to get. If the hag:
ers agree amongst themselves and maintuin their agreement, they can fix their price according to their own free will. There is ouly one chance of getting mors, that is when some of the merchumts break the agracment, when they begin to compete in an underhanded way amonges themaelves or make surreptitious bargains it is only then that the fisherman lias any chance of obtaining anythink more than these gontlemen are willing to pry. Last year there was an agreement mades by a namber of merchants who shif from the Labrador to pay 89.60 , This agreement was arrivod at early in November. Thera was no representative of the seller present at that meeting. nor was there any publication of the information onwhich the prlce was based. They used fouded dtee. Thiare ts something to be thankful for; that these merchants have not aqueesed the life out of these fishermen altogether. I hive a letter here written th September, from one of the most respected supplying tuerchants to a seller. It fis toot unfair. With the permission of the Honse If will real it.

Sept. 8, 1914.
"From a letter recelved from Mr Earle by the S.S. Sagona, we understand that - bas been up and offered you an additional frotght of 20 cents on all your tlish it you will ship it to him . We can only eny that if Mr . actuaily did make you this offer he has committed a great breach of faith with the rest of the Labradior Exportera. Mr. in talleing the outlook over with un not ten days ago strongly advocated, along with us and others, to give you fishermen simply a receipt for your fiah with the distinct promise of paying you the highest price possible as soon as ever we were in a position to innow the market value of Labrador Cod.
"Now Sir, we would not go back on
our word for Mr. _ or indeed for all the filh down hhere: but if you vill write us and tell $u s$ what actunily offered, we will give you the same figure; und you probably know us longe onongh to know that our promilse we resiutil every time as sacred.
"The actual ourrent price of fish has not been settied, and we havo no means, nor has anyone else, to tell you any figure. We would strongly udvise you not to allow any price to be mentioned on your receipt, as by sm dolng you may dficover later you are a heary loser. The Erench fisharmen are ocelapled to-day with war, and thls will make the French Cishery ufmosit nothing:, and this fo bound to fielp prices whon pieace is restored.
"We hope you will not give thle eateh of yours to anyone else, and you. can rest assured that we will treat you fulrly when the time for settling wp comes,"

Then he goas on to give his reasons why he thinks the prise should go up. Then pgain, Bli, 1 um in poas bearion of a letter from the same gentleman to anotzer person, written in wrombier, and this other person the writer thought was a jurchaser of tish. He miatook the name and dincussed procee in a way be woutd ant heve dope if he had known the man was it seller of fish and not is purchatier. He हoes on to asay:
"in confirmation of our reply to you thin morning by wire that $\$ 3.60$ In all we nre giving as the current pirtee of tish bititping to us at Labrador: we may say we are toing this in conjunction with all the St. John's merthants, viz: Winter, Ryan, Munn Terrplathin, and Mrepae and Duff in our bwi Bay. This geems to have been mutnally egreed upon by all of the ahove, and we belleve ult are bolding firm at this figure
"As you doubtless are sware, however. Messra, Baine Johnston ac Co.'s

Agent, Mr. Croucher, has settled with his men at $\$ 4$ and this is what is cansing all the trouble We are telling our dealers however that this was done merely for a purpose, via: to get this steamer away quiokly and are not forgetting to tell them that when she did get away the then dropped to $\$ 8.60$ which we belleve it correct.
'Current price' has been detined legally we belleve as, "the price paid by the majority of representative men In the trade." (I may say Mr. Speaker, that I have not been able to find any such legal definition, although there are commercial definitions, ) "and accordingly if the rost of us hold firm the fishermen have no logal case agsinat any of us for $\$ 4.00$, as Balne Johnston \& Co, are only one firm, and there is nothlug to prevent any individual firm from paying $\$ 10.00$ per quintel if he feels inclined to do so,
"We may say in two cases only we have patd $\$ 4.00$, but the recelpts which were fesuod early in the season in these instinces, were worded: "as ligh as any supplying merchant on the coast," and In these instanc es we feel we were both legally and morally bound to do the same as Baine Johnston \& Co.
"All cown this way are determined to hold at $\$ 3.60$ and we trust you will do the ssame
"We are,
Yours truly,"
This is a plain acknowledgment of a combination to keep the price at a certain figare and a platn invitn. fion to the main to stick with them to teon It at tho same price, and that is the face of the fact, as 1 believe will be admitted by everybody, that in Noveniber the markets warranted truch higher prices than these.

I fint that the Hon. John Harvey
in speaking in the Legislative Counfil at the opeaing of the sesston sald: "We hegin the year 1915 with unprecedented prices for our staple proAucts, These values in my opinion are more or less artiffelal and temporary. Thoy are based upon values ruling in only one of our markets. No other market warranted a price at all approsehtng the figure at which fish has ruled here for the last three or four months", showing that the price in this market during the past three or four months and at the end of last year were conslderably high or than in the.early part of the season and much higher than had been paid for these fish by these peoplo under thite combination. I belleve I am correct in saying that if the same fisil could have been brought to St . Jolin's and sold in the open market, and in open competition, the price would have been a dollar more than these people had been getting it for. But it was not possible to bring it here, and theretore these fishermen bad to take any arrangement that was offered to them, and put up with these prices. Now here is the position of affairs. The men who catch this fish on the Labrador have no means to ship it, they cannot bring it away, and very poesfbly could not convenfently make it if they did bring it home. It must be sent in vessels which come to the Labrador, and therefore the buyer can make his own terms. There is no freedom of contract about that. We have had an ungent request. in earnest request, an invitation in the Speech from the Throne at the beginning of the session that anybody who could should ongage in the fishery. Is it conceivable that any sane men who cin keep out of ft will engage in the flahenles when they are hound hard and fast to the merchtint who takes their fish, and must submit to his terms, good if he hap-
pens to be generous, but very bad if be happens not to be very gencrous. It appears to me that a continuance of this fishery cannot be expected unless we can fin some way provide for 'a fairer system. I look forward, Sir, to the day when elther through the Depsrtment of Fisherfes or some other neans to be devised, this Labrador catch wilt be shipped away to market for the benefit of the people who eatch tt , and the middleman will be ontirely cut out, and the fish will only bear the expense of marketing, and the net proceeds will go back to the fishermen. I belleve that will yet come to replace the unsatisfactory methods which obtain at the present moment, Now, I have tried in a very humble way to grapple with this, and the underlying principle of my bill is that where the parties are willing there shall be a tribunal having the character of an arbitrary board. I have provided in section 2 that the Board ahall be constituted by the appointmint by the Prestdent of the Board of Trade of one member; the Presidenx of the Eishermen's Union shall appoint another. these two shall choose a third and these three shall constitute the Board. Now, it is quite evident that to fix a price we cannot have a saries of arbiltrations because that would be too expensive for the fishermon who are interested. and would not result in equality. On the othor hand it is quite apparent that whit might be callod the Interest of the buyer is represented by the President of the Newfoundiand Board of Trate and the fiterest of the seller would in the main fatrly be sald to be represented by the President of the Flahermen's Protective Unton, It may be at first very properly objected to that the President of the Fishermens Union does not in any why represent all the fishormen, and I admit that-nelfher does the Presi-
dent of the Board of Trade represent all the buyers. But what 1 want to point out is and I hope it will be recelved without partizanship, that the President of the Fishermen's Union represents, if not all the fishermen. at least the interest that is common to the fishermen, that is the interest which he does represent is one in common with all the other fishermen, as being opposed or antagonlstic to the interest represented by the Presldent of the Board of Trade on the other alde; and the Fishermen's Union appeara to bo the only constituted fishermen's body that deals with trade and commerce to any extent whatever. If there was any other body of that Ifind I should have adopted it instead of thls Fishermen's Protective Union in order to ket clear of any charge of that lind. But it scems to me that the President of the Union is the only one that can be said to represent the interest of the fishermen, as opposed to the interest of the fish merchants as represented by the President of the Board of Trade. Then having provided a Board there is some machinery aitterwarde to provide that there shall be no fallure to make the appointments. In section three it is provided that if the appolatments or any of them shall not be made on or before the safd date (July 1st) the Supreme Court or a Judge thereot ahall make such appointment or appointments within ten days after ripplication by any of the persons authorized to make such appolntments. Then the appointments having been made the Minister of Marine and Fieheries is notiffed and the names are published in the Royal Gazette. The Board is then given one month to fix a fait and reasomabite price; and it is further provided that if they fail to do that the Suprome Court or a Judge, thereof may do it; and it provides also that for the purpose of fixing that price the Court may summon witnesses and
mny appoint counsel. It Is provided that the counsel representing the Board of Tralde and the Fishermen's Union shall not be paid, and that the witnesses shall not be pald, because we are endeavouring to make this as inexpensive as possible, and all the withesses can be got hare. The only case in whith raybody is paid is if the Supreme Court appoints counsel of its own; and in this chse they are paid out of the Coneolidnted Fund of the Colony, but as that is not Irkely to occur there should be no expense involved in this Bill.

Now the next thing I wish members to notice is that having got a tribunal ready to make a fair price. and having got that price made I do not attempt to impose it on anybody. Section 10 provfdes that
"In the following events the prices fixed as aforasald miy be recovered, In any action at law for codilish sold on the Labrador Coast in the calendar yoar durlng which they were fixed; that is to say:-
(a) It the buyer and seller do not themselves agree upon and name the precise price, or
(b) If they agree to pay the "current prlce'."
Or any plarase to that effect.
That leaves anybody perfectly free to make any bargain he Mkes when buying or selling fish. If one says, "I will give no much for fish," and the other says, "I will take it" that setHes the price But if they do not name the prtce, or if they agree for the "current pirice", or by any words of similar meaning, then the price flxed by this Board will apply. How much better is it to have the price rixed by thie Board than by a little committee of merchants meeting down Ifl a room th the Board of Trade by themseives and with no represrentative of the fishermen there, and the fishermen linowlag nothing ahout ft at all.

Then sub-section (c) provides that the price Eixed by the Board shall apply if the buyer and seller "agree as to the price in words which shall be beld to be of like meaning as the words 'current price' or which are of an indefinite meaning." My object in this is to prevent the fooling of fishermen, whell goes on by using such words as "the highest price," "as much as is belng pald on the coast," etc. All that indeffnite language will be swept away, and what the fisherman will get, unlees he apecifically ngrees on a price himself, will be what the Board ssys is a fair and reasonsble prlce. Now, you will see it you study 1t, that I have avolded any interference with the liberty of parties or their freedom to contract for themselves. I have simply substituted a Board which is representative for a Committee which is unrepresentative, and 1 have given this Board power to get all the facts together and fix a reasonable price, instead of allowing the committee of merchants to come together and making up what is the lowest price they can get the fishermen to accept. I can quite see that this Bill may be evaded; that if the buyer and seller have to agree upon a price, the buyer will name a low price, My first answer to that is that you can do that to-day. We are is no worse position under the Bill; and my record is that if it is found iuoperative, then we can at the next session of the Legislature denl with the matter again. We know, however, that a combination of buyers has exinted this year, and this combination we are now trylng to fight in another place.

Now, when you remember, Mr. Speaker, that a very large cuantity of fish is shipped from this coast, you will see that this is a very important matter. We find, for inatance, that in 1912 there were 195,000 quintals of fish shipped from Labrador; in 1913,

142,000, tinit in 1914, 91,000 -golng all the way in value from 8860,000 in 1914 to $\$ 652.000 \mathrm{ftr}$ 1018. Tho inforence, theretore, is vary clear, The thing ought to be dealt with fimmedfately nud a remedy provided; and this BIII is an honest and impartial endeavour to find a way out of the diticulty, in the interest. I belleve, of the trade of the country; of the merchants on the one haud and of the fishermon on the other, becanse after all in the long run they go hand in hand and unless something of this sort can be done, hin I anid before, I see the day is approaching when somehody will have to Interfere in the intereat of the fiel. ermen and ship the whole of the eateh and glve him tha net proceeds and cut the milditeman out altngether,

RT. HON. PRIME MINISTER-Mr. Speaker; the Bill that is now before the House on second readligg ts one that I fancy must of necessity have the sympathy of everyone intereated in the great industry of Newfoumdland, whethar it be the shore fishury or bank fishery or Labrador fishery, The ponitton put hare this evening by the Introducer was put tin a very fufr way, and ith such a way, I think, as to win over, if it over existed, any pre jualice againat suolt i- meamre. Speaktrg personnlly, and 1 thitnk on betialf of my frlende on this side of the House, we care not from what side a measure comes, what organiantlon or body miny be represented on any Bonrd, if there is any reasonable hopethat the lot of the people of thie country, sutil esperfally the fishermen who earn thatr llvelihood no hardly, may ba in any way improved or in any wny allevinted. The very hardest lretirt must at times feel for all they salfer and all they go through and the amall reward they receive even if they are sucresstut th thetr avocattons Thise of us who haye gonc around the country und seen the people in their homen and seen their contented cond.
thon even when surrounded by all khads of misfortune, will I fancy be over ready when un opportunity offers like this to help them, if that be possible.

Now, the mensure liere before the House in, nis has been pointed out, entrety expertmentat. There fo no compulsion on any one to axail of it, and unless a man shows that he is attiatied with the Board and enres to avall of the provisions and atvantages of thel Bili, he can bo by on the other side und remain cutaside of the provisions of the Bill and be ta no way afrected. On the other hand, if this Board can remove some of the confurion that exiets and has axisted for years in relation to the price of Lubrador fish, and not so mueh the price Hselt as tac pasoibility of folng for a whole Beason without ascortaining what the price 1s, and what is "the current prfee, or "Hie lifichust price" or whatever torms ere fixed in the contract, something will be secomplished. But there is unother polnt wtich appeats to me fil this matter, and that lis that if thie Eill in mecenaful, and if it is adopted, it will so a long why towarde settliag the constant conflict which exista amel will criainue to exiat down on the Latirnior in relation to the shipping of flah. The last five or stx yoms this wes more apparent than at othor tirues, amo striken have taken place down thare and vessels lave bean field up-rishity so, perhaps, from the men'o ndrndpoint-and generally conditionis have artsen down there which aien not of a destrable claracter; and ft seema to me that if you can devies some means by whieh an impartial trlbanal will he created to fix theo price of fish, then that condition of flainse will no longer continue, bes culuee both partles will have to te bound by the price no matter shat that price may be Now, what is the samis of thife conflict and confunton on the isatradory The men that eatch
the finh are not able to shlp it and they canuot learn or agcertain its true value; and then the only remedy they see is to hold the ressels and not ai low the fish to be shipped. The result of this is that shippers of fish find it difficult to get charter parties for vessels, and that creates difficulties with regard to supplying for the fishery The figures cited by the introducer of the BIII show that the Labrador flahery is golng down every year. Why, it amounts to a trekedy it you compare the Labrador fiehery to-day with what it was twenty-five years ogo in the days of the Donnellys, the Alunns, the Dawes, the Rorkes and the Duffs, and all those who were prepared to invest large sums of monay in relation to the Labrador fishery, which at the very best was always a highly speculative undertaklag. First there is the risk of going down, thon the risk of getting the fish, the riakof making it, the risk of shipping it, and then the rlak of sellting It. Some of these men have lost fortunes, and some have made a few dollars; but the resuit is that as an industry the Labrador fishery, whether as prosecuted by the "floaters" or the "Iivlers" has been gradually golag down; and if this BHI which has just been read a second time wit Introduce an element of certalnty, you may have more people supplled and in that way belp this industry along. This is a measure asked for by the people who are interested through their representatives. The fishermen of this coun-try-the Labrador flehermen-who ure more tnterested in this than any other clase, have asked for thly Bill. Those who do not care to avall of this Bill need not do so; and for these reasons I think, Mr. Spoaker, the House will be willing to sive the measure a reasonable trial.

We lave seen the fieherles of thls country declining from time to time: but we have seen them ptck up sgain.

The Bank fishery to-day ta in a moet flourlshtig condition, and only a feir years ago that was a deciying intustry. Now it is commis up agaín se causo it is properly attended to and proparly looked after, and the men and merchants are sitisfled. Tike our latister fiahery. That is declining Btendily since 1899 when we exported 80,000 cases until last year when we exported only 12,000 . Forty or fifty years ago you had 13,000 men gotng out in 400 vessels carrying on a sealing industry worth mearly two million dollare. To-day it is brought down to fifteen or sixteen ships with prohably a thousand mer. And the fridustry is probably not worth a half a milHon dollare.

If we are not to regret the winding up of the Labrador fishery, it is about Lime for something to be done to re move somo of the objections and some of the defecta by which it is surround. ed. I think that this measure is worthy of the cons/deration of the House, and though I agree with my learned friend the introducer that it to ourpounded with difficulties-and some of them very grave dimentilis-and that at the most it is experimental. (and as a matter of fact I have no doubt that the reason this has not been dealt with before was the ditt culty of deallig with It), that ahould not frlghten us from making an effort, and if anything can be accomplished by this Board, then our work will not have been altogether In vitn.

MIN. MARINE \& FISHERIES-MTr. Chairman, I destre to suy one or two words on behalt of the Bill now be fore the House. For a number of years 1 was in the hablt of gotig to the Labrador, and more eapectally in company with those persono who hafl from Conception Bay. In former daye vessels known as Cartels conveyed trom seveaty to elghity fishermien and thefr families to the Coast, but that day to now paseed. To-day we tind
wors few Cartels on the Labrelor, ani! the firbersers of Cumerption biy am obliged to aval thempetran of the mail boat to couven them tin the Tatinator in the Serine of the yoar. Thit of coene, leaves them wthout sar cots venlence for the hrioging of thertr fist bome, and to coaseguvace thisy ure eompotted to anell raetr Net to the dis ferest buyers who viett the cosent, and an the hon. Itutroflacer of this bill has stated, the finh buyers senta to bive many prient funerally to sult themnelven. The flaherman lonown very well that he must difmone of hife fiab on the Labrudor, bopatue be lang net the menni of gettinit it Mame to Newfoundlant, and for the lant tures ot four yeark they have mutferod be easpe better prices have been siven to, and razlired' by the fishermes of the Northers Pistriets whin wers in a posttion to bring thatr worsec ton हि. Joher's where they olituined bettar prices from purchnsers on Wister Bi ft han beet mees that thass who lavk hait un to thate fint rill very tite in the dutaman bave got lietier grtors, nl-
though the fiab wat exactly the same grade as that frum the Laterndor. White it is evident that many tilt calltes will be met in marcsing out then provislena of thto Bill, I may way that I evenider 4 : 2 more fir the riftht atrection. I do not denire to dalay thits
 probatlon by saytur that 1 comifiter this titt vilt be thit mosmi tir tha malar future of our menn remalinisg that ot lest is the bletory of Xirsionemiand the Legtolature hat made oll. Manas moce fo the tirnetior of 'hehthr them In the parset of thelr calline

once get suispletous, it is only in ylew of the way that they have been treated in the past that they are susplefous. They cemand tair play, and this is their right. Let them know the freight and the lnsurance, let them know the facts as they are, let them see how thlngs are belng arranged in St. John's, and they will be found to be most rensonsble. These things have been discussed fully at our councils In Conception Bay attended by men from all parts during the winter. These men have awakened to their rights and they say that the day fo now come there must be a change. Last year they were led to betieve that they would get $\$ 4.00$ on the coast, whereas in reality they only recelved $\$ 3.60$ which naturally caused a tremendous wave of indlgna. tion to sweed over the districts of Conception Bay. It is for the purpose of removing these diffeulties that we now ask that this blll should become law. If gomething is not done in the direction aimed at by this bll we will find that less men will prosecute the flishery on the Labrador coast. In 1912, 195,000 quintals, in 1913. 125,000 and 1914, 91,000 quintals were shipped from Labrador, whloh shows a marked falling off from a quarter of a century ago, when the firm of Munns alone shipped about 190,000 gtls., a greater amount than the whole catch on the Labrador in 1912. The men are so difgusted that they will not go to the fishery under existing conditions. We must endeavour to encourage them to prosecute thls frudustry by providing them with motor boats, glll nets, facllities for trawling, and for obtalning bait and they mist not be permitted to go to the Labrador solely depending on traps for a voyage. With the proper faclitites within their reach, there is no reason why one and a half miltion could not be caught in.
stead of three hundred and sixty thousand quintala. It the government had epent oniy one millien dollara in as sisting the fishermen with motor bonts and bait, larger roturns would be oftained. It is owing to the fact that no encouragement was given that we find today the young mon refus. Ing to go to the Labrador. I hope the government will take the matter Into consideration and provide the man of Conceptton Buy with those facilitles in order that they may bo enabled to catch one million quintals on the Labrador instead of about onethird of that catch. The fishermon are well aware of the value of the $\mathrm{Hish}_{\mathrm{h}}$ they catch and to have a representative of thelr interest in fixing the price in the Intereat of beth parties will be found to considerably faciltate matters on both sldes. Thls matter must recelve immediate attention otherwise strikes are liable to occur. In the past personally 1 have done all I contd to mintmize the offect of this bad system, and I hope this measure will set things right. I do not intend to delay this House with any further remarks at preaent, when we get into Committee we call discuas this matter as fully se weo desire, and I hope the Legiginture will see fit to adopt this measure.

MR. KENT-Mr. Speaker, I have Hatened to the remarke that have been made in regard to this BIII with a great deal of interest and profit. It appears to me that this Bill provides an exceilent remedy for a condition of affalra that requires immediate attention. Now, I do not suppose there is any country in the world that is so dependent upon a single induntry as Newfoundland. Our fishery stands out preuominant over every other reature of our economic conditions. We have depended upon it ever since Newfoundland was discovered, and we will be dopending upon it for

The ofll futrodnced liere thls atternoon while not containing so drastic a remedy as was then Introducedicontainif the name principle and nims at fixing the price of fish so that the people may get confrience as to the prices which they obtain. At the pres ent time there is conaiderable disatIsfaction prevaling on the part of the tishormen, particularly In Brigus dis. trict. The consequence has been that they bave taken advantage of every opportinity to take up any other oo cupation in the place of rlshtng. The rouut has been a considerable decline in the Labrador Clshery. This Eill may offset thle deciline. Now that the fishermen have some protection tu regard to the price they may he nncouraged to go into it again. They Well know thit in the case of aspute thetr atfairs will be fisndled by an honorable and impartisl Board. I hope the bill will receive all tho support nocesuary, and that the offect produced will be such as las been out. lined.

HON, MIN, FINANCE \& CUSTOMS -Mr . Speaker, Just one word. This belng a tiehery bili it appeats to me that I ouzht to say a fer words. I was tent here because I wae supposed to know somothing about the fishery and I am alwaye Intereatel in any mearure that is for the improvement of the fiehermen.

1 congratulate the fatroducer of this bill it is a more of the right drection I know that as if ntande It cannot bo claimiod thet it to perticot, but none the leas it is is step forwatd. Personally I cannot sey thint I linow very mueh about the Eabrador flish ery. 1 um more tequain (ed with tho

Benls and Shore flahery, But I know that there are soveral thousands of pasple brought down to Labrador every year by the Coastal boats and coasters. These people land along the coast at varloue pointe and fit out a kmall boat or trap boat which per haps has been left down on the Labraflor since the season before. With this small outfit these people prosecute the flishery and at the end of the season their fish in there on their hands and they have to get rid of it while on the Labrador. In the past they paive had to take the first offer. The supplier kept a sharp eye on them and when the fish was ready they came round to collect it, but conditions the to pricess as in everything else bave changed. They have changed considerably in the past twenty yeara. At that time they had a mall boat once is montly and eo other connection with Newfoundland. To-day there hre soveral marconl stations along the const and mall connection ts made three times a month. Conditions have changed considerably but none the less I agree with the introducer of this (bill, that the people working on the coust there are in a position where they cnn be taken adrantage of by thele merchants and suppliers. The object of this bill is to ofrset that, and t can see no reason why it should not troccive the unanimovis support of the whote House, The Labrador fiahery is fialling short year by year. We as teistalators must ask ourselves the reason for this. The answer is plain and eney to find, The Labrador fisharmen have found a better, a more -Herative source of livelihood.

Wa were told hore this afternoon That we ms a goverament ought to Thave done thls and that-if we had eqent $\$ 1,000,000$ on one matter sach would have been the result. This is the wiral opposition attack. If the government has spont millions of dol-
lers at rullocois and other publle utilities in the pant aeven or elght yours we hare dent it vill a purpose. We have liene wild that aur poller lhas been the caum of the folling off th tamitor Fiblerry. That fo sot so. No sound argneorat has lieva adduced to show that at all. The Promber referted to the Bank fitherg 1 have bind experionce to the Bank finbery and 1 inere that as geant aro any amoust of fidh was to be had as the Grand Banla. Thie same le trun of Latroter. What happenedt The awrkets pot glatthe. There were some gumhusts in this dity who had more Boh in thelr steres than whs cauphe ai Labrador lant mammiar. What poub Uun were the fistiermes in then? They "nro loaded down with fistr and could not gnt rid of il. There was no diaramion about cull then. There in ao cull today hecause tilih in $\$ 6.00$ and
37.00 a gulutal. But when you have a large catch on the Lalurador a large Bank flemery, a large shore fathery, and a targe French and Novs Scotit catch, then sou will lige pleaty of cull without any law on the point. I am on a risbery commission appoluted by both Houses of the Leglislature and this cueation las been Lefore thom. It will come up before uis in a day or two when their repont is tabled and while we alt hope it will do something I am afraid it will do aothings.

Twenty years ingo 250 vessels promecuted the Bank fishery. These versels have disappeared because the price of tielh put them out of butinces. There was nothing tinne in those fagn to help the fishermen and I hope that will not happen again. 1 hope that the cateh of fiab will never agsia be a drug on the market.

A gentleman stated this ovening that if thia Government had apent $\$ 1,000,000$ on the rinherles it woutd have done somvthing and then be sat đown. He did not tell us in what wiy it ahould have boen apant or what rezutt woutd have beon obtained. there are other people who hive mitde that statement before but it hes thad Titte offect.

I rose thle afternoon to make a kew remarka an I thouglit it wae my duty to give my support to this Bill I sth prepared to glve an honcest opinton on afl mattera that come before thif House but f am not prepured to listen to any romarlics by any member who simply wishes to Disane the Government fo- not dolns more than was possible.

MINISTER OF PLULIC WORKS.Mr. Speaker. I Junt wizh to Bay a fow worde in aupport of the meneure. I do ant claim any pragtical knowledge of Thabry matters but I reptesent a large section of the Pisharmon In a dlatrict that depends for its IVelihood largely on the Labrador fishery and
there is an insistent complaint about the unsteadiness in the price of Labredor fith. They have been so digfosted that for the past number of yeara they have bought employment fin other dircotions. If the bill can ronew the confidence of these man by fixing a price upon which they can rely then you will have a revival of this business on the part of those men Fho had given it up or intended to do 80.1 trust that the measure will be a success and I am sure that every member of this Houac will give an unquatiliod approval to any such mee. turn Intended to give such good rehults to the Colony. We cannot get away from the fact that wo depond wholly and solety upon the fisherles of this country. We are not a mining country nor a manufacturing country. gor an agricultural country. This year we should reap a harvest from our fistierles because of the high price. The reporta from the West Coast Bonls Hishory are encourasing and we ought to be eatiefied with that.

Fish cannot go down low agatn be cause food stalls all over the world tre very high and why not tibh? The large popalatione of Canada and the Stateq sre demanding larger sapplies of our finh. We have one of the finest Gheries in the world and any meature for their incroaze and develop ment musht to recelve hearty support from this House.

MR. YOUNG. -Mr . Speaker if you vould allow me I would like to say a word or two in reference to this fishery bill. It seems quees that mention le made of a Board but no mention all of whom that board ahall constet Who, Sir shall compose thls Bourd? Where are we going to get men for this, and whom are we golar to get? in the firat place I may say that $1 . \mathrm{am}$ much interested in this bil. 1 appreclate very much the bill, and wll certainly aupport it. But, Sir, the point is where are we going to get
the mien from? Are we solng to take thia in our own hands agnitnat the seven or eight mets who supply the fish. ermen? Are we kolng to comblne agningt those mas as we plase7 Are they going to have this carried ont? 1 do not thak they will. I am not astisfied with it, for 1 am afratd it will intertere with supplying.

Mr. Speaker, thore hail boen a lot of dikeusion athest the Labirador fiehery. I would like to lenow why they aro discusslag thia. In the firnt place, If a perion lis golig to the Labrador flehery, ho muat get nomeone to aupply himi. Now Str, who is golug to supply hilm, If thife bin goen through? Who ts gotas to send him down there? Ir he going to be cut off from his suppiferst He witutes to Enow before he goea where be ls solnk and where hate supption are coming from. That ie why Sit, In my optrifon the supplierit ousht to the coninited.
In thil hill Mre. Spenker, when it comes before the House, I trust there will bo further aections dealing with the nujplea down on Labrailor. It is negcanary to have aupplles there nir, when evergthing tu eloated up for we cannot overcomo that, wir, aven our tieadroughtis cumpt farce the lee barrlam. 1 agree witis the Hon. Minlster of Fimmeen wh what he sald about this mafter I do not soe unything wrong in the filt, bitit it hardly full enough as I liave stich, I do not think mon thould touel these things they know nothing nbout. 1 represent Sir, one of the ment tritelligent diatricts in the Colony, or tit least I clum' I do, and one of thin mone interested fo the Ler tratior firthery. We rever saited for such letislation an lo provided tor fin thil bill. We would like to have a pelce fised; but where are we going
 send un dowis is the first ponstiderstion. There fa me mention of this in the lill heiore uis. Sond un down with
suppllee and then fix a price for our fish. Good prices are of no use unless we can get the fish. Are we to sattle on the price of fish, and is it for this that the fishermen have sent as here? Who in to settle the prlee of fish, someone who knows nothing about it? How will the auppllern troat an if we do thrn?
I would eny Sir, that much a bill as this munt be carefully drufted and made to sult the fishermen, becnuse thiog are the parties interested. You sir, Iti your own district of Carbonear fepresent a large number of fiakermen, and these like the large number 1 have the honor to represent are dependent upon the fishery which twight be affected by the pasuage of this bill. We must ask men prepared to supply tu now in April, for it is now we want aupplies not sometime th July or November; and must not make lawa without considering them. Fo do that would be to risk our rupplien. We have to-day times to supply un. hut they will not without some pros Fit in inght.

What about the bank craah; what tioppetied then? The merchants last sear were tottaring with money, but it Fall different the time of the bunk araph; they wers in a different poai tion then. We need the supplies; and werneed atso the putice We to need the prices. We noed a roformation but first of ull wo mand to conalder what is right trrespective of whether we will bo returned or hat when noxt we flice the country, I know I will eome thack if I want to if I vote according wo the wlahea of those who aent mo here So now, Mr. Speaker, I Hilk that my flews be consilerei. Whit is wanted is supplien for the people, and fravtige obtatned thene, and having caulit the flifithen it will be the proper time Sle, to fix a price and to teal with the fill.

MR. DOWNEY,-I wiah, Mr. Speals-
er, to express my approval of the bill now introdnced. I do not elaim to have had any considerable experience in fiahery matters but think that the objections ralsed should be removed and remedled. I may also hope that the degree of confldence displayed by the expression of opinlons here is likely to assure serious consideration of the bill. Now, Mr. Speakor it is my belief that the price of fish is going to rise and is likely to remain high hereafter, in common with the other necessities of life which have soared in price since the opening of the war, it is highly probable that fish, also being an article of food will soar with the rest.

A few years ago, the United States of Amorlea was a large exporter of food stuifs of all classes, but now, owing to the great increase in her population she has become an Importor. The loss of such a aupplier would be very likely to open up new markets for our fish and consequeutly the price would rise. During the past year also very large imports have been made for home consumption, and thus green fish, our Industry, has become of great Importance.

The great war in Europe has shut off many of the sources of supply of fish, and 1 think 1 am warranted in saying that this will undoubtedly havo a good effect upon the sale and price of our fish; and it is not at all unllkely that fish will become a commodity in more general use. This is a question that directly affects us, and I welcome this bill and stncerely trust and hope that It will be speedily enacted and that great benefits will accrue from the present condition of affairs.

MR. JENNINGS-Mr. Speaker, I would like to make fuet one remark In answer to what the hon, momber for Harbor Grace has sald. As far as I can see, the best thing the mem-
ber can do is to leave the reat of us and go on in his own lone way.

MR. HICKMAN-Mr, Epeaker, it will be a surprise to some in the House to know that I am golng to support this bill. I know that there are a great many difficultles in the way of fixing the price of fish on the Labrador Coast, but there is no đoubt a way cut of these. I will have an odportanity of further discussing thls matter while the bill is in its Committee stage.

There is one polnt however that I would like to Inform thls House of and that is why there is a falling off of the Labrador tishery, it have made this statement before in this House, but I think that it is very important and a matter that should be counteracted immediately.

The fact is Sir, that vessels use trawls on the banks which are but a few miles from the shore, and catch large quantities of spawning fish; and at the end of the day I sm told you will sometimes aee the spawn on the deck of the sehooner six inches thick. Now Sir, it these vessels are allowed to k+1l out the breeders an extensitely as thls, there can be no other result thon the falling off of the fishery as in recent years. The game thing applles to the West Coast fishery. We learn that twenty yeara ago flsh was very plentiful on the Grand Banks, It used to be a common sight to see thousands of quintals of flsh stranded on the shore at low tide but now that there are vessels prosecuting this fishery sights Hike thls are never seen. I will have further opportunity to remark more fully on thie subject later in the seesion.

Pursuant to order, and on motion of Mr. Morine, the Bill entitled: "An Act relating to the Sale of Codfish on the Labrador Coast," was read a second time, and it was ordered to be
referred to a Committee of the Whole House on to-morrow.

LOGOING BHLL.
Second reading of Bill entifed: "An Act to regulate the etmployment of men engaged in logsing."

MR. COAKER-Mr. Speaker, I would like to call the attention of tha hon, members of this House to several changes made in the logging bill of last year. Section 3 provides for a sleeping compartment and an eating compartment, and it does not make it necessary to have mattrosses as old the bill of last year. By this section sleaping berths shall be fitted subject to the approval of the Government Inepector.

Section 4 provides that any complaint against the Inspectors for neglect of duty be slgned by one hundred loggers. In last year's blll the number of signatures necessary was but fifty but now the number has been made one hundred to eliminate the possibility or unfounded charges agatnst any Inspector: All signatures moreover must be slgned In the pre. sence of a witness who shall prove the same by affidavit. This would make the Inspoctor careful in the performance of his duties, and leave him to the tender mercles of the loggers In case of trouble Section 8 of last year's bill has been completely cut. out of this year's bill.

In eection 12 of last year's bill it provided that all camps sball be cov. ered with board, sheathed with feit and otherwise made watertight. In this year's bill, this applies only to those camps that shall be constructed hereafter

I have had protests from the companiea about aection 9. They eay that last year the Anglo-Newfoundland Development Company lost $\$ 7.000$ in $6 x$ panses connected with the rumning of the Hospital and Docfors. The men
they say are willing to pay 40 centi per month, anl they are willing to keep and operate a Hospital if the mea will contribute thif much. As the mean tre willing Mr: Speaker, I Ree no objection to inserting this sec. tion.

Section 10, Last year we overlooked the Government Inspectors. In this bill it is provided that should they be there a night or two the employere are to find them board and lodeings at their own expense; and also the representative of the men when such is requested.
Section 11 deals with the fines to be imposed for breaches of this bill. of course, it is taken for granted that the employers so liable shall be warn bd and given notice that what they are doing fa incorrect, for it would be unfair to have them committed without having received this; for example, if there should be fault found with the cooking. If such a thing occurred it would certainly be made right when reported.
An attempt is now belng made to create a large industry on the West Coast. If that Company maturea they are going to manufacture sulphite pulp, and they cexpect to handle 250 corcis of pulpwood a day. To do this they will need 1,200 men. If they em ploy that number of men it will bring the tatal number that will be ongaged in logging in Newfoundland up to 4,000 . That will be a larger number of men than at present prosgeute the seal fishery; and if it is necessary for us to pass bills here providing for the health, accomodstion and food of the men who go to the seal fishery for a month in the year, then it surely ought to be racurnbent upon us to make provasion for 4,000 men who go up in the wanis and otay there for flive months of the year. I belfeve that the time is com-

Ing when the fishermen who go up in the lumber woods must go with their minds made up to remain dusing the whole scason, otherwise they will come out with very little money; and if the camps are comfortable, clean and tidy they will be more tikely to be satiefied to remain for the five months, and they will be able to do better work and give better satis. faction. Now, I hope that the bIll will become law. If there fs any information that is required by any hon. member when we are in Conmittee, I will be very glad to furnish it,

Pursuant to order, and on motion of Mr. Coaker, the Bin entitled "An lct to reculate the Employment of the ten Engaged in Logsing" was read a bicond time, and it was ordered to be referred to a Committee of the Whole House on to-morrow.

> SAWMILLS BLLL.

Second Feading of the Bill "An Act to Amend 4 George 5th, Cap. 17, entitled "An Act in relation to Saw Mills."

MR. JENNINGS.-Mr. Speaker, the first section of this Bill refers to clause 6 of the Saw Mills Act. This aection is for the purpose of rectifying a difference of interpretation. As the law reads at the present time "The Governor In Counell shall have the right to reacrve, by proclamation in the Royal Gazette, such sections or arean of Crown Land as may, from time to time, in the public intereat, be deomed expedient, and to prohiblt the cutting of timber on such lands for milling purposes, and the penalty for eutting timber on such lands shall be fixed and determined in such proclamation; provided, however, that no such reservation shall be made until publlc notice has been given to those residing in and near the locallty in which the land proposed to be reserved fs situated." Now, a great many are under the fmpression that "milling purpotes" only applies to milling oper-
ations, and does not prohiblt a private individual from going on those reserves, cutting a certain amount of timbar, and takeng it to a mill to be sawn. Now, as the House will eartly Bee, If the Act were interpreted in that way, and cutting by private individtuls peruilted, it would in the end bring about the same result as milling operalions on any particular reserve. As a case in point, 1 may say that a certain man in the district of Twillingute had two men and a horse operating out Thwart Islands last year, in spite of the fact that the Ieland las teen fceerved for \% number of years The amount of thmber cut ( 1 got the figurea from the man who scalel the timber whils pasaing through on my way tere) was 509 loge of from 20 to 30 feet in length,amounting to a total of 28,000 feet of lumber. We protested against this man's operations, and be replfed to the Department of Agrlculture and Mines something to titis effect, that he was only cutting n small amount of timber for bullding purposea. Now, I think anyono will quite understand that that amount of timber was not intended for building purposes slone. It is to meet condltions of this kind that I bave brought In this ameadment. It reads as fol-lows:-

1-The words "milling purposes". in Section 6 of the Act 4, Georgo $\mathrm{V}_{\text {. }}$, Cap. 17, ahall be held to mean sawing or otherwlse manufacturing at a mill. The penalty for cutting timber on any kands regerved under the proviatons of sald section shall not be less than twice the value of auch timber when sawn or manufactured, and shall be recovered in a summary manner from the owner of such mill by any pernon who shall sue for the same.

Section 2 is an additional clause. It fs as follows:

No peraon ehall have any right of property tin any timber cut on any Crown Lands except under the pro-
rietome of a Howish, duly landen, unleas bo ahall within ohe ywar trom the date of cstitng गemore auich timp ber to a place of anfoty under his cuttrat.
That in for the purpoes of menting conditione of thas nature: 1 san worry to any that a largn amoant of timber tian beach destroged, in the thiurtet of Twilingate at any rati, ly men who have cut it and luft it where it hes fallen and allowed it to atay there and rot, and ft is for the purpose of patting a stop to thin that 1 lave inkerted thls clause. I beg to move the necond reading of the biil

Truntuist to oftar, ant on mottod of Mr Jesinhes the Bill eatiled -An Act to Aumed 4 George V. Cap. if. taulitel "An Aet Rempetlug the ppor-
 enic times and it ras ardered to De referred to a Compalties of the whele Howe of toparruz.

4R: MOATNE-ME Speaher: Last - tirth, befure ther Hoese closec, I a titr mexcuten to the mattier of omb 4inines al the positenaliary This Eemlar's heme of the Dally Newn revtitas some crinetares, shiget to dave heas made by the Mirlitar of 2urtion upwn the remarlan whlch I thade is fle Hocte 1 lave replied erer my ours stmatere to this eventar's liane of The Mait, und 1 ton't intend to delay the Foume now mote
thafl a minute, but as I brought the matter up liere last evening I feel that it it due to the House thint I fhoutd make some reforonce to the statements attelbuted to the simiater of Justlece. If is protabte that the MInfater, In a hasty report, has been milarepresonted, an I do not thinit he could have made the statements attributed to him.

In the first place, with reforctice to the man Snowden, to whom I was reforring the Minster is made to say that bestdes the one act charged egalnat lifm, and for which he was committed, there are two others which are betig investigated. That is not correct The two others to whleh lee refers come out of and are part of the one tranmaction. The eharge ngafngt him fir that of buruing down a house und stealling money in the house at the time. The man then went to Cannts, and returned bringing beck bome koods with hifu, and he was charged with smugetitig these goods He was arrested in the month of November, was committed on tho 23 rd November by Magistrate March, anid sent to the penitenitiary on the Ard Decombor He hag been five monthe in the penitontiary awafting trint. The remark that I made in this connection last night was that it be could have been bronght on here on the 3rd December last, why shonld not the witneares against him, who would tio caming from the asine place, lave been brought on at the same time, the case tried, and tho witaeseus returned to thelr homes before the close of merigatlon? That wes not done, Later on, nfter my roturn from Canada, I was retefned. I then made enquiries, but, of cepurse, found that In middinter it would be a rery difficult matter to get a trial, Late in the mont $\mathrm{h}_{\mathrm{L}}$ of March I appronebod the Departmeit of Justice il sucond trie. and got Mr. Squifea himself He had
been away. He said that the admitted the hardihip of the case, and that if the man could give bail they would accept il. I pointed out to him that the man was a total stranger here and that batl could not be sot. There were nobody, except some people in Boane Bay, who lmew anything at all about tim, and that consequently it was cuite imposulble to get ball, and to sugerat the thing was abaurd. 1 giso pointed out to the Minlater of Justice, as I do here now, that the fact thet the man could not stre ball. wha no reason whatever why he should bo left in the Ponitountiary from the month of December untll the month of March without trfal.

Then one other polnt. On yeater diy I carefully refrained from blam fig any partloular person in this matter, and I don't wish yet to charge any person. When I faformed Super tatendent Parsons that the man's clothes had been thken away; that he had been without warm clothtng for four months: that he had been wearing one suit of underclothing literilly every day for four monthas: and that he had not had a bath, the Superintendent in the flrat place sal4 that he could not believe that it was true, and he was sure the clothen had not been taken away from the may in the Peultentiary, At my request tio sent for the man and for tho tharden, and then admitted to me that if was true that the Warden had taken the man's clothea away from hitm under the orders of the Pollee. 1 polnted but to Mr . Parions that when a man was sent to the Penituntiary tho Police har no authorlty over him, and that kit fhoult nou have aflowed that sort of thing to happen. He mald that he would certafnly not aflow it to happen 1 zs in . Ho express tot regret for what mat occurred, and particularis because of that 1 made no statement about it the publle uatil
last nignt, when 1 felt compelle! to Co so. 10 that the Minister of Justice is said to have replied that the Superintendent had stated that no application on the part of the man for clothes had been refused, Now, the contrary is true. The man, through the Warden, sent repeatedly for ats clothes. Superlntendent Parsons admitted that to me, and told me that he had asked the Superintendent of Police for the clothes and the SuperIntendent of pollce had refused to glve them up, and he had sent back word of that fact to the man. He snid, however, that the man might have had other prison clothes it he had asked for thom. I said: "How was he to know that? Did you offor them to him ? Did you take any care to see that he had clothes?" He satd "No." Then I said: "What about the man's bath? What about his having a chance to wash?" He gald: "He might have had that too. If he had asked for it." "But," I said, "surely Mr. Parsons, you don't allow any person to remain in the Penitentiary for four months without seefng to hils cleanilness? And if he won't wash himaelf you take some means to force him to do it. In the interests of the health of the other prisomers' it is your duty to see that nobody remfains unwashed and unbathed in your Institution for four months," He admitted trankly that I was right in that. I then asked that tho man should be sent for and that the warden should be instructed to allow him the privilege of bathing: and that was granted him.

Now there is one other statement that the slinister la sald to have made, namely, that the man was sup plled clothes after I had Interviewed him. Now, I don't know what happened after I taterviewed bim, but I know that the man was supplled with no clothes until I took my own clothes down to the Penitentiary and
passed them into film through the gates. But the man should not have had his own clothes taken away from him. He should not have been asked to put on prison clothes that had been worn by other prisoners at othor times. I think it is a most glaring instance of inhumanity, 1 belfeve that the Minister of Justice and his Department know nothing about this. How could they know? So far as the Superintendent of the Prison is concerned, the worst that can be sald of him is that he did not know what was taking place, and because I was satisfied that that was correct, and because he was so very emphatic about It, and so very sorry, I made no mention of the matter in public, and I was quite surprised when the letter was read last night; but as it was read, I felt that It was for me to say something.

RT. HON PRIME MINISTERThe hon. member for Trintty, Mr. Stone, asked for some information in connection with the Naval Reserve, also In connection with the Volunteers. I beg to table that. Also particulars asked for by Mr. Coaker in connection with the case at Lowlsporte.

## NOTICE OF QUESTION.

Mr . Abbott gave notice of question.
Mr. Stone zave notice of questlon.
Mr . Grimes gave notice of question.
Mr, Haltyard gaye notice of question.

PETITION OF RIGHTS BLLL
Mr. Kent gave notice that he would on to-morrow ask leave to introduce a bill enttled: "An Act respecting Proceedings against the Crown by Petition of Right."

Mr. Jenninge gave notice of question.

MR. COAKER-May I aak the Premier It he has aby report to make in connection with the Penitentiary.

RT, HON PRIME MINISTERThis morning I sent your letter and a coly of the statement made by the hon. member for Bonavista, as taken down by the shorthand reporter, to the Department of Justice, and 1 hope to be abte to talte the reply to-mar row.

Mr. Woodford tabled surwers to certata questions.

Hon. Colontal Secretary tabled asowers to certain questions.

MR. COAKER-May I be permit, ted betore the Houne ailjourns to eay a word in connection with the "Terra Nova'a' crew at Port aux Bacquer They wired me this mornfrig making certaln statementa, and I wired back asking for full infor matton. i recefred a reply this afternoon.
Now, I would ask that the Premier (I den't know any person in the Houso who could, by rensom of hits position, deal with the mntter beforol AD proach Bowring Brothers and able them to provide these strikiers on the Terra Novn with the smount of $\$ 4.00$ each; thie amount to which they would bo. entitled if they wore betng paid of here in St. John's, and let them go to thetr homes. These men don't want to feave the ship without retting thls aum of $\$ 4.30$. There are 30 of them on hourd and the whole crow tre tr sympulhy with themand won't allow the Captato to land them without troutle If Bowring Bros. could be tultured to pay thets the 81.00 , due them under the law, they could go ashore and the whole tronble would be endee.

1 have spother megrige from the Etik:
I advised the then three or four days ago to go ahead and prosecute the fishery. They telegraplied me three or tour slays ago, and I wired back that they ifrotifi do the best they could. obey the Coptais and prove:
cute the royage, and that in all probalality they would not be out very tons ln any event.

Mr. Mortne gave notice of question.
RT. HON. PRIME MINISTER.Just one worit 1 would like to say to the bon, member, Mr. Coaker, that the chese he refers to ts beting very tarefully considered both in the finterent of the men and of the owners, and the beet that can be doun will be done I understand that the Attorney Gescral has had some interview with Bowrtig Broltiers.

Mh. COAKER.- Is there mything that I could telegraph them?

RT, HON. PRIME MINISTER.-Not at present. It will have to stand for a tittio wilte.

It was moved and seconded that when the House riges it adjourn untll to-morrow, Friday, April 16th, at three of the clock in the afternoon.
The House thon adjourned accordingly.

## FRIDAY, Aprll 16th, 1915.

The House met at threo of the clock In the aftemaon, pursuant to adjournment.

## REPORT TABLED.

Hon. Colonial Secretary tabled the Report of the Goverament Engineer xpon the Government Rallwaya.

MR. SPEAKER-I have been asked to call the uttentfon of the House to the fict that the Order Paper fa not In its proper form. Notices of motion should come after, and not betore the Order of the Day. It has been customary for years past to have it in thin form, but that does not make it the thore correct. We shall endeavour to follow the proper form in future.

PETITIONG,
MR. STONE-Mr. Speaker: I have in number of petitions from the Dis trict of Trinity, from Catalina, Clirthville, Etheton, Petley, English Hr., Fonster's Point. Shoal Harbour, Mel-
rose, Waterville, Burgoyne's Cove, St. Jones' Withln, Pope's Hr., New Bonaventure, Part Rexton. Trinity, TrinIty West and Scilly Cove. These petitions, Mr. Speaker, are all in connection with the timber limits on Bons. vista Peninsula. I trust the Government will sive the petitions every connideration. At the F.P.U. Conventhon held in Catailina last Fall we passed resolations in connection with the aame thing; and as these petitions are largely slgned, I trust that the Govornment will accedo to thelr roquest.

MR. LLOYD-Mr. Speaker: I did not rise tmmedfately, because 1 thought it possible that the Promier, in the absance of the Minister of Ag riculture and Mines, who is concerned with this petition, might have afforded the Houso eome information in reference to it it will be within the knowledge of most of the members of the House that last November a strong protest was made in the Press in reference to thll matter. That protest was by no means a party protest, beenune it was voleed by now日papera representing both sides and every section of the House The protest was against the granting of certain timber lands on the Penlnsula between TrlnIty Boy and Bonavista Bay. A similar quention had arison some yearis proviously. a similar protest had been male, and the Goverament of that dsy had revolked the grant. Now, owr ing to somie cause-I dan't know what It may have been through an over-algbt-a grant of much the same land Was made last season by the Executive Government, on in application that was approved by the Departinent of Agrteutcure and Mines. It was understond at the time the protest was made that the Premier of the Colony hid no knowledge whatever of what had been toae, and that he strongly disapproved of what had been done. lut up to the present time, as far as I lnow, there has been no publication
of any action of the Government in reference to the protesta; and it was, therefore, Slr, thiat I kept my suat for a minute or so in order to afford the epportunity to the Premier to atate exactly the position to-day of this protest and grant Now that I have specially drawn hie attention to the matter, I have not the faintest doubt that he will give us some informa. tion concerning it.

RT, HON. PRIME MINISTER-Mr. Speaker: In relation to the petitions which have bean presented, it is quite correct as stated by the hou. member. that these protests came before the Goveramont; and I may any in reply. to hfm, that since then nothing has been done in the way of grantiog these lands. As a metter of faet, Mr. Stone, one of the members for the District, came and saw me last year, and I think I gave him that informartion at the time.

MR. LLOYD-Am I to understand from that, that the application that wai approved by the Governor in Councll, has fallen through?

RT. HON. PRIME MINISTER-I do not lnow that that is exactly bow 1 would describe tt; tiut as far as the Goverament is concerned, they do not propose to give a title to that particslar plece of land. As a matter of tact, as 1 explained futly to Mr . Stone, when he culled to see mee there was considerable doubt in relation to exactly the land that was covered in the application. It did not appear that these lands that were the subject mutter of objection some years ago, were-covered by that applicatlon, and when that application was approved, that was the way in which the Councl understood it. It afterwaris transpised on enquiry that a portion of the fand that had theen the subject of dfr-pute-that is the land lyine between the two Baye-had been approved in thir ripplication.

MR. LLOYD-Fighty-elght square milles.

RT. HON. PRIME MINISTER-I Am not quite sure; but I think that would be about one-half of the land of the subject matter of dispute nome yeare aga.

Mr. LLOYD-A Httle over helf.
RT. HON. PAIME MINISTER-Under the land is diapate eix or seven yeara ago thors wain no land west of the fullersy trank it pll; but mat e comaideralale porilion of the land sotsprised in the appllontion was on the other alde of the triels, on the left hand nide of the rallwny track tis you so north-about one quarter of ic. Under the application approved nome yours ago there war none on that side at all. Now I think it will be satis. factory to the hon member when I aay that ull the publlic. intereat there will be conserved, sul none of the land on that side of the rallway track granted.

MR. DOWNEY-Mr. Speaker: I beg to present a petition from the Inhabs tante of Humbermouth and Corner Hrook Hay of lalnnde, asking for a sum of money mutfetent to oover the grac. Ing of two miles of road that was projected, nurveyed, brushed and stumped in the diyn of the late Rev, Mr. Curtting, thirty ftve yerrs ago. The need was apparent in these daya, and is mach more appatent at the preent time, as owing to tha developtwent whlch has teren place sfirce the inception of the ratlway and other publie warka, it le friposaible to-diny to eecure a building site in that 10 enllfy withert openting up tant romote from the sea shore. Fur Hal remanus the pettioners ank the allocation of an amount atificient for this work. I very etronity urge the grauting of tha request of theno pauple, as 1 know the necenalty for this piece of road. I woutid rempectrully Aftk thint thir pot! thon bo recetred ntid referred to tho Departmeni of Fublie Works

## NOTICR OF QUBSTION

Mr. Halfyard save notice of quem tion.
Mr. Thrgett gave notice of quartan, sind drbw attention to the fact that gome quentions ailked ly him on the 13th Inat. haf not yot beon answered.
MIIN. OF PUALIC WORKS-These anewers are helug prophred. and sou FIll have them very noon.

Mr. Whiser gave notice of queation, QUESTIONS.
MR. MORINE uasked the Bt. Hou. the Primlor to lay on the table the last maunl return to the Governar fo Counall by the Commtsninner of Filotm, under Section 19 of Cap. 24 George 5.

RT. HON. PRIME MINIETER-THIT if beint prepured and I stinll table it on Mondig.

MR. MORINE niked tho THL Hon. the Promior whit part of the genern expetrees of the Hague Tribunal of Arbitration, 1910, thia Colony is liabla for: bow much that liability in expectac to be; If any part of it han got been patit thy the Colney; if not, why pot; bow miuch has been paid tor obIIsattons locally ineurred in the mattier; what chalm are outatimding snd pnsettled: why have they not beeth tetalod?

RT, HON, PRIME MINISTER-I mm firving the information preparad There aro some portlonas of it I chm knswer now or yun can bave it all foguther.

MR. MORINE-Let us have it nll torether.

MR. ABEOTT anked thil fit Hon. the Promiar in the absence of then Alinister of Agriculture and Minos. to lisy upin the table of the Hetuse - a statement uliowligg (a) how muich wan patd yearly for the maintemance of the egrleultimal butl at Weoleyville; (b) It any manuy recelved trom them ciale of thin tuill by the party til starge Whe forwardell to the Government; if no. kow much?

RT. HON. PRIME MINISTER-1 beg to table the informiation.

MR. STONE anked the Mininter of Public Works to lay on the table of the House a statement inhowias the number of Elective Rond Boarde in the District of Trinity for 1914 und 1915; also, the appolatel Boards for eame years giving name of each place where sald Boards are in operation.

RT. HON. PRIME MINISTER-I ahall have that on Mondny.

MR. STONE asked the Rt. Hon, the Prime Mintater to lay upon the table of the House (1) the date of Magtstrate LIlly's retirement; (2) if Mr. Litly asked the Gorernment to be penaloned; (3) at what data did Mr. Somerton come under the pay of the Government; (4) at what date did Mr. Somerton make application for Mr . Lilly's position, and when the Government considerad the appilication, and what date his commisgion was to uned?

RT. HON. PRIME MINISTER-I shall table that next duy.

MR. STONE-I may say that I thtur some of these questions could have been answured right oft, as thero ware vouchers for the expenditures and tho vouchers were locked up laat yenr, and should be in the Accomint'si Department now. I do not think the answers would have been much trouble, and I lnow some of the answeri could have been forthcoming.
RT. HON. PRIME MINISTER-I think the hon. member han misunderatood the queation. The queution I was referring to was in connection with Magfintrate Lilly. That hase nothing to do with vouchers, I liave given tratructions to the Deputy Colonial Secretary to have the misutes of Councll looked up, and I shall have the information on the next day,

MR. STONE naked the Hon. Colon: fal Secretary to lay on the table of the House anuwers to the tollowins
quentiona vta: (G) Is relation to Eam. es Cathle 1-Duchoss of Corswall $\$ 600.00$ : Duchewis of Cornmall. z280; (a) Frum whom was the Duchoss of Cormwall charterud; (b) what rate per day; (e) did the charter fnclude nll expemien for crew, steamer and Corermment employees engaged at cable; (d) what tumount, if any, clarged the dovernment for auppllee for Duchemit of Cornwail; (e) how many days unguged at. cahle laying. 2.-Schooners at $\$ 45.00$ per day, 2555.00 (a) From thom were uchooners hls kat; (b) what wern they employed att How many nchacmers were engaged. 2 Capt. I. Kecping'i schooner, ten chaya, 810.00 . What was achooner emDloyed at? \&-Rope, fabor and provietons, 8718.00 , (a) what amount pate. for rope. (b) what amcuat pald for provisions: (d) what amount pald for labor tarfuded in abova $\$ 713.00$. (c) Whit was thin proviston for; ( 1 ) what was the repeffor; (g) what was the latior enrazed at; (h) what dirposithon was mnte of the rope and left over supplies, 5 -John Penney and Sons, 741814 Give particulars of this payment. If it way for supplites to What use were anch nupplies put? 8-James Abbett, $\$ 105.00$. What was amount paid fort Thos. Moulton, $\$ 195.40$. What was amount patd for? 7-For What was the amount of $\$ 120$ pald Captain E. Finglish of the Fiona? Was the amount patid aver and above Ate regtiler monthly natiry ne Captatn of the Ffonal 8-Were the amounta pald the members of the Floria's crew und chargod to Ramea Cable over and-above thetr regulter malary? ?Aly whoee suthorly wert them nqueunte pald? Ons ishose recommenilaton $110-\mathrm{D}$, Stott. 8220.00 , (a) Whet porthon of thes amount whe pald to D. Btott for homrt and lodgtog while entEged at Bamen Cable; (b) whit rate per day for board and lodstagi (c) Low many tays enguged at the work? 11-Georime Veitch; 595 in wher por:
tion of this amount was paid for board and lodging? 12-Did D. Stott and George Vettch live and board on board the steamer Flona whifle easaged at Ramea Cable? If so, how many daya each lived and took their meals on board that ship? 13 -Did D. Stott and John Doyle and George Veitch live and take their meals on board the S.S. Balcine when the steamer was engaged laying cables in Placentia Bay? If so, give number of days of each on board said steamer? 14-Have D. Stott and George Veltch and John Doyle submitted vouchers for actual expeases when engaged at Postal Telegraph work during the past ton years? Have they submitted separate vouchers for board and lodging, and for train, atcamer and other conveyancea.

HON. COLONIAL SECRETARY-I may eay I asked Mr. LeMessurier about this, and he told me it would take some time to prepare the nnswor. As soon as it is prepared I shall table t.

MA. STONE-That is the question I was referring to just now.
MR. GRIMES asired the Minfeter of Marine and Fisheries to lay upon the table of the House a statement of all moneys spent on the publle wharf at Kitehues West, in Harbour Main District, by David Costello, during 1911 and 1912.
MIN. MARINE AND FISHERIESI beg to table the information.

MR. GRIMES nsked the Minister of Marine and Fisheries to Iay upon the table of the House a statement of all moneys spent on the Central Wharf at Conception Harbour, Harbour Maln District, during 1913, and the names of these to whom sont?
MIN. MARINE AND FISHERIESI beg to table the fifformation.

MR. GRIMES asked the Minister of Public Works to lay upon the table of the House a statement of moneys spent on maln roads between Concep-
tion Harbour and Bacon Cove, and the names of the persons to whom sent.

MIN. OF PUBLIC WORKS-I shall thave that statement on Monday.

MR. HALFYARD asked the Hon. Colonial Secretary to lay on the table of the House any reports of the Lumacy Commisstor, made to the Executive Councll during the lnst sizteen months, and a copy of all minutea of the Executive Councll in reference to the Lamatic Asylum since January lst, 1914, to date.

HON. COLONIAL SECRETARY-In reply to the hon. member 1 beg to table the information.

MR. HALFYARD asked the Minlater of Fublic Worke to lay on the table of the House a statement show. Ing the cost to date of the public bulldings at Harbour Grace, Spantard's Bay. Bey Roberts, Channel and Freshwater; the cost of the bullaings at each place to be glven separately.

MINISTER OF PUBLIC WORKSI may have that atatement at any moment this afternoon.

MR. JENNINGS asked the Minister of Public Works to lay on the table of the House copy of returns of ezpenditure of two grante of $\$ 50.00$ each allocated in 1913 to Mark Rideout, of Whate's Gulch, for the purpose of making a public well in that locallty.

MINISTER OF PUBLIC WORKSThat if belng prepared.

MR. LLOYD-I ber leave to draw the attention of the Minfater of Finance to a qquestion I asked.

HON. MINISTER OF FINANCE-I have that information and also information in relation to another question, which I beg to table

MR. LLOYD-Yesterday the Minlster of Finance said that these were repilee to two other quentions that would take considerable time. I can quite apprectate that; but what I would like to ask now to if any portion of the information hes boen prepared yet.

HON. MINISTER OF FINANCE-1 left the queation with the Clerk, and asked him to attead to it and told him to send it to the House when it was prepared.
MR. LLOYD-May I ask if, at the next nession of the House we can cet may portion that is ready.

> HON. MINISTER OF FINANCEYes.

TEMPERANCE RESOLCTIONS.
MR. HICKMAN-Mr. Speaker: I beg to move the Fouse Into a Committee of the Whole to conalder this Theotution with reference to Prolitbl. tion of Liquors.

MR. MORINE-I second the mottion.
HON. MR. EMERSON-Mr. Speakor: Beforo this motion is carried I would suggest to the hon. member, the introducer of this measure, that it is herdly fair to ask thits Hocune to consider to-day such an important and far-reaching queation as that of total prohibition. In view of its importance, Str, and fir-ranching cotrsequences, 1 would suggest to the hon member that he consent to one day next wook being set down as a fit and proper time for thls House to conalder that important question. It muast be retuembered that as yet there are hoa. members in this House who are not aware of these Resolutlons beling printed-they certainly have not been distributed-and I thinit myach that it ts th the recollection of every hon. member of this House that when the Oppouition during the past week asked for the postponement of a certain matter on the gromnds that they had not yet read the Bit and that the Bill was not dhatributed, we on thil slde of the House very readfly acqulesced fo the suggention and cois. sented to the postponement. In view of these tacts, and particularly an we have not seen the Resolutions, I now throw out the zugrestion to the hon. member that he consent to a day next
week-say Tuedday or Wedneaday being bet down for the House to consider this Resolution.

MR. HICKMAN-Mr Speaker; In reply to the hon. member 1 beg to say that I have no objection whatever to having the matter came up some day tiext week. Wednesday would salt very well. My only object in moving the Resolution to-day was to get through with it, but I am willing to convent to some day next week.

MR. MORINE Mr. Spenker: 1 would suggest that it be placed firit on the Order of the Day for Wednes. day. and that th the meantime falter Resolutions be printed and clrculated emongst the members.

On motion, it was ordered secordIngly.
NATURALIZATION OF ALIGNS BHLI.
Pursuant to order and on motton of Kt Hon, the Prime Ministor, the BII entilled "An Aet respecting the Naturalization of Alfens" whe redd a third tine and passed, and it was ordered that it be engrossed, belng catitled as above and that it by aent to the Leslalative Council with a riessage requentigg the cotcurrence of that body fie fts provisions.

LOCAL AFFAIRS BILL.
Pursuant to oriter and on motion of Rt. Hon. the Prime MIntstor the House resolved fiself Into Committen of the Whole to eonisider the bil entuled MAn Act to amend tho law resepecting the Atministration of Local Affatra,

Mr, Speaker luft the Chair.
Mr. Parions tholk the Chalr of Lom. mittee.

RT, HON PAIME MINISTER.Mr. Chalrman. it will be remeumbered thint when thite matter wan bofore the Houve the last day, I explafted it inf fuity ir the friformation then in my poesession enabled me to do and 1 Intimated that I proposed to ask
the House to send the bill to a Select Committee in order that we migat dis cuss the various amendments that may be necessary to make thls measure as perfect as possible. It was then suggested that instead of sonding it to a Committee then wo might. have a day set for a discussion of the Hill in Committee of the whole Housa and that way ellcit the opinions of members-partieularly those representing outport constitiencles-so that when the bill goes to a select Commalttee it ehould zo there with practically the instractions from this Committee, at least to some extent, us to the form the Bill should take. Now the prevent bill before the Committeo fs retally a bill of one pection, and that in providing a means by which the Governor-la-Council can ascertain whether a settloment or a number of sottlomenta require to elect a Rosd Board. At present there is no way 1 take it of dolng that except by the arbitrary fixing of a division.

I bave already explatned the principle of this bill, and it is not my intention to add anything further now to the remirks whileh 1 made on its aecond reading; as I have already pointed out, this bill repeals the fourth seetion of the Act now on the statute book, as fellows:- The Governor-lnCouncil may from time to time by proclamation preacribe sectional divisions in this Colosy to which this Act shall apply, and stath ty such proclamation define such limits and boundarles of each sectional diviaion, which seetional divistion is in this Act described as a section," and the following substltuted therefor:
(4) The Governorin-Councll may upon petition signed by a majorlty of the duly qualified electora of any town or settloment having within it radtnis of three miles not less than One

Hundred electors, from time to time, by proclamation preseribe sectional divisions in this Colony, to which this Act shall apply; and shall by such proclamation define the limits and boundaries of eseh sectional divislou: whifoh eectional divisions are in this Act descelbed as a Section:
(a) For the purpose of determining the validity of the signatures to such petition, and the fact that the number of signatures constitutes a majority of the electors living in the town or settlement within the radius aforesald. such petition shall botore presentation to the Governor-in-Councll be taken to the nearest Stipendlary Maglstrate and be by him examined, and after examination, if the Magistrate is antfiffed with the number of the signa. tures and the qualiflcation of the persona so slgning, he shall upon satd petition certify such is the fact, and such certiticate shall be conclusive evidence that the persons stgntng are quallfied electors, and that the numbor constitutes a majority of the elbetors as aforesaid.

I trust that the deliberattong of the Select Committee will result in a bill which will be found to be workable and remove the dificultien which surround us under our pres. ent systom of expenditure of public moneys.

MR. KENT-Mr. Chatrman. It is hardly to be expected that we can give mature criticism on the bill now betore us at the present time. I feel liound to express my regret at what I conslder a mistake, that thls subject has not been brought down to more defined lines during the year, that has elapsed since the resolution was brought in here last year dealing with local affairs. However, 1 think It will be a mnch greater mistake for us to allow thls present session to go by without some substential effort be-

Ing made on our part to reform in some measure the system by which Is governed the tocal affatrs of the colony. For I do not think that the present syotem is a system at all. 1 am aurprined that it has worked glong for oo many years. It has been a subject of universal complaint. For the money expended, the returns have been small. There seems no sense of responsibility in those controlling. the expenditure, and I think that if a greater measure of local responsiblity is adopted in the elective system, the results will be considerably better. There are several reasons malring this imperative, one of the first of which that if the people themselves in the loealities affected by these local boards have control of their own affalrs, they will take an interest in their affairs. This will totally annflilate the system of what are commonly called "family grants" Our system ought to be if possible so airanged that the management of local affairs should be entirely remov. ed from political influence, by which I moan from being affected by the party politics then prevalent in the country.

I think these matterg should be fully discussed in the House in order that the speclal cormittee whith the Prime Minister is about to appoint should have the full benefit of our argument, which should develop the sallent features and, important detafls of the scheme, as I belleve nothing else can, but the whole House, whers we have the opinions of representatives from all over the country. We must at least evolve a measure which will be workable until is more lasting measure will be produced, and first of all I think we ought to adopt an election system whereby members of the Board should be elected by duly certified electors. As regards the ac-
tual working of this bill, I think it would considerably faclitate matters were the following method adopted; that there be two classes of settlements, large settiements and smaller bettlements. If the smaller settle ments so desire they can amalgamate with and come under the Jurlsdiction of the larger settlements. If they are not desirous of such co-aperation they may be granted local boards or couneils of their own. Now, of course a minimum size must be arrived at, and 1 would suggest that Instead of a hundred electors as suggested in the Bill, that say, eighty electors might petition the Governorin-Council, doseribing the area which they desire comprised under the Jurisdiction of a Board and that, if that petition is signed by say $40 \%$ of the people in that area or district, the Governor in-Council should issue a proclamation making that section an area; and if the petition is so signed it ought to be acted upon unless reasonable argument lies against it to the contrary. Take for instance the case of one large settlement with several smaller settlements under Its proposed jurisdiction. In that ease 1 do not think the petition ought to be acted upon unless sugned by say filty per cent of the electors of the smaller area.

Then of course we have the difflculty of deciding the manner in which the election will take place. In default of proper machinery for this I would suggest, that a meeting of electors, of which due notice should have been given, should be arranged. This meeting should be presided over by a Justice of the Peace, or some person in authority. The candidates will then be elected in the usual way. It would be dealrable that as far as possible these elections should be held at the same time, or on the same day all over the country ev.
ery second year, say in the month of January, so that the elective council will come into existence on the first of February or thereabouta. This Mr. Chairman deals with what might be termed the larger settlements, Thil syatem might bo found foacible thraughout the country. I have not however had much opportumity of thinicing these things out at great length.

A variety of mitters of course will come under the furlediction of thife Board such in questions in connection with rosds and Marine affairs to their respective diatriet; I think also that questions relating to the keeping of dogs, should bo placed under locel control. Then, of course, there are other questions which we discussed last year here, such as the quaitfon of special erants and so fortio, maln line and others. These are sublects which would have to be considered in connection with each locality individually, for you will have to be acqualnt. ed with the conditions prevalent there before anytbing deflnite can be cecided upon. of course the quastion of special grants is different. These are intended to provide for special needs which arlse during the year in every locality. Casos of exceptional neecsatty involving the allocation of extra money may be consfidered in the same way, but in eny case, when the money is allotted, the responslbility of all diebinreoments should devolve on the shoulders of the representatives of each locality. In Sunt John's of course it is different, and I need not go finto that. 1 meraly offer theso as suggeations, and my mind. is open to argument on both eldes, Many matters relative to the workIng out of the machinery relative to these affalrs will have to be declded upon later. The Act of 1898 whlch was, I think, Introduced by Mr. Morine
solves many technical difficulties and Hkewlse the later bills brought in by the Prime Minlster will I think throw Heht on these queations, I have no fised opinion of these matters and my mind is open on the whole subject, and I merely state the ldeag I have evolved from general knowledge and the difecussloss on these points that I hate had lately with various people for the purpose of getting such information and opintons as may assist mio in the perusal of thls bill. 1 am conflident of this one thing that no fixed or everlasting form of local govorument can be settled during this present session. It is a matter that ought to be taken up serlously by the membera interested during recess but I would susgest that this elective aystem be adopted as far as poo-- shle as soon as can be conventently done. The total elimination of parties and politics will be the first sted necessary for success and the results which are expected to accrue from its alloption, and then Mr. Speaker, I belleve that we will at last begin to reelise satisfactory returns for the time and money that these mattera have involred, and immediate attenHen will be able to be given to the very unsatisfactory state of affairs provalent at the preaent time.

MR. MORINE-Mr. Chairman, 1 pan of the opinion that no further attempt to proceed with this Bill ought to be made during thls present bession, for I am convinced that it s a subject demanding the special attention of all memberg whom this bill finmedlately concerns, attention which will demand the time afforded by receas. I am confldent that if this bill is adopted we shall obtain much better returns for our money, than ws evgr ean under prevalling conditions which are, of course, as all are well
aware most imperfeet and unantistac lory.
The Iaw relating to the Govern ment of tocal affains fo one of the most extensive and dimeult that has ever engaged the legielature of othei countries and, 1 think, it th a sitfect chat will have to be dealt with most thoroughly to have the effeut destred. A fall and general measurs of tocal goverament will flret hinve to be eleborated, outiling the respective requiremente of the varlous localities, all on an elective bate. I thitit the time lias arrived when there mistiere should be folly and compreheneively dealt with because the popuiation of the country is growisg and buntiese is on the increase to such an extent that the preaent systera is totnily insdequate. This eluetirs usetem, If carried out on politically tmpartial lines oaght to bring in very muth better returns for the miney upont and would in every way be more benetrial for thate concerned. Wo cannot prevent the presen: dic teta now, and Indeed. I am afratic thint it ly almost certaln to increase. It present coaditions esntinue mueh tonger, aud' it is only adopting a navins system efficleatly, that we can eurtall our Internal expendturea, Our present source of revenve, the ourtoms, durtes, cannot long be sufficent to meet our constantly facreasing public expenditare. It fa certain that our syatem of government of loeat alfulirs must be placed in the hands of the people themselves.

You mist remember that about the moet oxpenalve way to rafge money for pintic expenditure is by increas finf cuetoms duttes bocsuec the merchant who pays customs dutios expects a proft on the money be ro expenth and for every dollar hie pigys In such a way the contumer will pay a dollar and a hulf. It would be much better that he should pay the dollar
to some local institution which he controls hifmself The money he will pay will be less and the return will be far greater.

Anothier reason why I would expect great behefl to acerue to this colony from local ficorporation is this. You have only to look around this House and perthapa moro particularly on this slde of the Houre and you will find a class of men who are well fitted to control aur affatrs. I look upon municlpal incorporation at a moann of odveation in every sense of the word. If we had conintry, town or village councils the patural adaptability in the people to public affaire would show ftself. We have in this House at present and more particularly on this Eide example of the stamp of men Who would undortake thls work. They would get to know the value of pubilie money. They would not over expend B. dollar of it. There is no country in which it is not apparent that municipal incorporation is the best firoke in the direction of education that has been attempted for many years.

I wish to any as I have sald many ttraps hofore that 1 am an avowed confederite. I am strongly in favor of the confederation of this country with Canada, but I can say that the greatest pafeguard that you who disbelieve in confederation can have tgainat it is Muniefpal Incorporation, because by incorporating the country you give people control of their own affairs. You control expenditure of publie money and take the very best btene to aafeguard yourse weo againat confederatlon. So that 1 sm offerlag this to you despite my own convictions upon another question,

Now, Str, the diffeutties which the Prime Minfater talked about to-day are there is eome measure, but not nearly in so great a measuro as he thinite. If it were not that the meaa-
ure is so difficult it would not be worth our consideration. I know of nothing that is worth getting for which we have not to work. You cannot change the whole fundamental fabric of a country, you cannot incorporate a whole taland without putting your shoulder to the wheel for once and making an effort, but it is better that that effort should be made for something large and tangible than for something small and unsatisfactory. If you pass this amendment you leave it with the Governor-in-Council to detine the aress. How can he do it without sending a surveyor round the country? You have got to get a survey to iny down the villages and settlementa and towna. You have got to get a survey to define the ifmite of the roads of each town. Then you have to determine what powers they ahall exercise. What control they shall have of main roads, the question of poor rellef. 1 tind that the Mu nicipal uct of Ontario, which has boen copled in Menitoba, and British Columbia, covers 250 pages all of whith were found necessary in order to cover the large fleld and convey the necesoary powers upon every kind of body. When you get into the tet you may be able to cut some of it out, but very little because as my friend Mr. Kent has sald there are many powere which you will have to convey. But when you come to look at the Act you will find that it covere all the powars which you noed liere. For instance in this act you liave provistong for the incorporation of countles, districts, cities, towns, rillages, townehips, and rural districta; all in the same act, all by the same machinery and it is a question of local cholce whether they will become a town or village and so on. In Bonaviata for example they would have a town Council. The town would be aivided up Into wards and
each ward would elect its representative and in that way you would get over the necessity of people having to travel a long way to east a vote. In the case of a rural community each sottlement would elect its own represontative and these representatives would meet at some central polnt and form a rural Councll-town like Hr . Grace and Carbonear would have a town council. Small villages would have a village council. A number of swall Dlaces would have a rural councll and every little town elect its own representative, In this way you would get clear of all your diffioultles. When we see how Important a matter thla is it is quite apparent that we should not deal with it in a ollpshod fashion. Look at some of the powers conferred by thls Act They have power over the erection of bulta ings, powers to make regulations about public health, power over traf fic, dogs, telephones, statute labour, street lishting, tree planting, publle parks, all of these are covered by a Munieipal Council in a general act and we should cover the same things. Then the act goes on to provifie for the điviaton up of places, how to make warde, who may vote. This net has been introduced in nearly all the provlnces of Canada and has been found workable and to great advantage It talkes a lot of amall trivial matters from this House and takes sway the political and partisan aspect from the matters. It would relleve a number of our institutions and give local control to the people 1 will give you an fnstance. In Toronto they have put up a hospital at a cost of $\$ 4,000,600$. Toronto city contributed $\$ 1.000,000$ as its whare and yet anyone who goes into that hospltal has to be pald for elther by himself or by the clty that sends him there with the result that the hospital has only cases that are necessary to be treated there; and at
the same time it gets a revenue. Now, what is taking place here. It is one of the scandals of the country. We hava a good hospital, but everyday it is costing more and it has now about reaehed almost all the cost it can bear and there is a domand for more. What has happened is this that whereas a tew years ago the people were stratd to go to the hiospital to-day everyone in the country desires to 80 there. The result is that people are coming into the hospital from the out ports who ean afford to pay and do not. I have seen atriking cases in my own knowledge where people who could afford it have pald nothing because no one else did; what is going to be the next dovelopment? Outport doctors who have a tedtous case will send it in to the hospital so as to avold the trouble that it would give them. I have seen chronte casen taktag up beds in the hospital white forty or fifty palents outaide are provided with boarding houses walting to get In. They cannot be put out of doors and they ought not to be occupytng beds, that perhaps 20 emergency cases might requife to ocenpy, people who are aent to the howpital because they have bad health and require to be bullt up. The ro sult is that the cost is constantly Increasing and the purpose for which it is in exietenco is beling destroyed. And, I eay to-day that there is only one cure for that and that is the in. eorporation of your constituencies in the country and make each corporation responsible financlally for every case that comes from that town and everyone who comes from that town must get a certifliate from the proper officer that be cannot afford to pay, and if he cannot pay then the town becomes responaible. To-day everyone is sent slong because it is the rule, but if the lecal community had to pay for every case that went
to the hospital they would be extremely careful whom they aent along Bosides it would engender a proper spirit of British pride. The family prite would make people look after thelr relatives. Yoh have an open house. Everyone comes-and why not? If everyone comea why should anyone pay if no one else ts paying. You cannot draw the line as to who shall or who shall not pay, If you moke the incorporation liable the nelghbours would onguire into every case It would be a proper fillip to local pilide and the hospltal would be relleved of the cost. What is trus of the hospital is true of the poor aeylum and the lunatic asylum. If you ineorporate local committees there would be many cases now not recelving rellef that would be attended to and many eases that ought not to be attended to, but which now nre, would not be under our koverament institutions because of local trnowledge.

Wheraver we look we see the sa.ne thing. The eure for it is local ingorperation all round the country. There is not an fnel of it that is not capabie of governing itself if it is given the opportunity. That opportunity can be given by one general measure which wil provide for every contingeacy. That mensure will have to be drawn up by statesmon and lawyers with the advice of prnetical men. It can not be drawn up by this House or a select committee or anything in that way. It must be a commission sittlon out of sesalon taking time to do it fand dolng it right. You have from now until next session in which :o perfect it. Give this country all over a certain measure of control. Give control to them that will pay for it. Reprepentation and taxation go to gether, but when you tax and spend it as you do, It in no wonder that to. cal affairs are gofing to the dogs.

MR. CURRIE-Thls matter has come before the Committec that there might be a foll discursion on it before being sent to a Sclect Committee, and as it primarily interests the Outports it is well that representatives of Outport constituencies should have something to eay on it. I hive nlready volced my opinion regarding elective boarlis, and while I agree with the principal that the people should have a voice in the selection of those who are to superintend the upkeep of thetr roads, etc., I am not prepared to admit that the Elective Boards are going to be the panacea for all our ills. Crittelam will not be stopped, grumbling will not end and there will not be complete satisfaction everywhere, for my experience of the past year is that the elective board comes in for aa much criticism as the appointed one. There are people who are never satlsfled and these are the ones who are always creating the trouble. Now,sir, In the distrlet of Burin we have several elective boards, at St , Lawrence, Lawn, Grand Bank, and generally spealing they are giving satisfaction. In these places it was easy to apply the elective system, as the people are compact, living within a small area. There are other places where we will find it very dificatt to work out the contemplated Act. Burin is one of those. Hon, members might not be aware that the seetion of the country known as Burln comprises thiriy-two small settlements, only five of which, according to the census, have a population of over 200 in hahitants. At the present time this section is governed by two Counclis and a Board and while there may be grievances against individual members there is no fault found with the system, which I belteve was inangurated by my predecessor, Mr. Gear, To apply the elective system to Burin would mean that entirely new
areas would have to be defined and that where thare are now three Boards we should have possibly ten, finereasing the work of afviston and also lessening the amounts, that would go to the roads, for there would be ten chairmen drawing commiasions, of five per cent. 1 think probably that betore the bill finally passes we shall have to ask for exemption of these Councils from the bill untll there is time to defina proper areas for the boards. There is one matter that will require attention in the new bill and that is a provision for re-election. The act now on the statute book provides for an election every two years, but there is no machinery governing th. The Act does not gay whether the Board are to reslgn at that date for a new election, or whether the Magistrate has the power to call the election or whether it must be done at the request of the people by petition, or whether it is a matter for the Goversor-in-Counell. In other words there is nothing to say who is to take the fnitiative. We have boards in our district that have been elected for four or five years and it is really a question as to whether or no their acte now are legal. There ls one thing that recommends the new idea and that is it should remove a good deal of the responsiblity regarding matters from the shoulders of the representatives, and I am gure there is not an hon. member in this House but would be glad to be relleved of that.
1 haye listened with a good deal of Interest to the remarks of the hon. member for Bonavista, Mr, Morine. He has been dealing with ideals. One would view with some satisfaction the establishment of Incorporated communities all over the Colony, wherein the people would control ontirely their own local affairn. There fs one great obstacle to such a condittion of affairs, it would mean that
the people woutd have to tas thensnelves difectty and largely to cover all thetr meeds, and I fear our people would not appreclate that. The value of direct tamition is one it would take them aome time to learn. There can be no dowit thint the more the propie renlize their rasponalbility the better will be the community in which they tives and the bent way to drive home remponaltility In thronich faxation, I taink here is to be found one of the troublen with 8t. John's, one of the reasons why conditions munielpally are not beiter than they are. For nobody can say we are taxed here. vertataly not to that we feel ft . The coltector comies around ance or wwice a year and we pay our one, two or three dollark, as the caso mlyht be. and then we forget all about it. If ear texce wure heavter we might be more treitned to take more interont in what becomes of them; see that we eel proper retaris for them. The hon. mewher for Bonarieta han surgestel that the bill be held over for anothe: year, so the greater consldetatios mfaht be given tt anit min that proVision coult be mude for larger pow ert for fncorpornted commontifes Personally I ehould like to aee that done, though I have ao doubt that the matter will recutva हvery considers thon trom the Select Conimilies, ! note, Mr, Chalrman, that the Dietrict of St. John'te is to be exampt trom the openttons of the bith, sud I muat confers I do not see mily that ahonled Be. Why should not the people of the eutport exctions of St Joha: dfatricte come wiltits the privileg st of the MII, 1 know that at grement the work ta belag done by trapectors and vell done but that if no reasoa for the thictiction. T when we las In spectors for every listrict-it wowa be a a aod livestment for the Colomy.
That thls is a matter affecting the outport conutitueneles is my only
riasul. Mr. Chatrinan. tor delaytur the Committee wits theme few observatiots

MR. MORINE-ME. Speaker: I proult juat like in add ane rumark,
 I Ald nof mems that if these sacker fishe matle lo ame. vere adopted tod fach chatuith appolnted that they would hare to ratise the money mices lary for thoir werine; they would have. thetr statre of the monles approgriated for such purposes, mad if they telt that they nooded more, they could mit tt by baing thelr own poople

MR. CURARE-That foractly the ponillios an if unierritood it.

HON. GOLONIAL SECRETARYMr. Chalrmans I tuink that the posithas as rurertis thtis mothas has boocs focentmated to the may to which the mombera hare hamilled it taat joar the hom, rambern of that alde of the Hoube aspreased ass thetr optalion that thene matterm could be rectudied, and the evils orersome ly autable I minifation a Ervat ©eat of discanalon took plare upon that question, and the Govermment undertook, if it was fousd at aft ponmible to hold Auring the intervil betwean bils and last tertalon, an expuly, and to introduce woune mamure an was aiked for on thit occasion Accortiagly thin De firthutit of Tutille Workis wan niked to make the siecouary enquiries dur ine the pant rammer, ant to mollet suil thifurimetiil an the their opinion Wount bir thanffectat tor the purpone. MR. KENT-I got no Buch circular.
HON. COLONIAL SECRETARY-1 wat merely reforring to the report an the Socretary ting elven it.

MR. KENT- 1 received no such elrcular.

HON. COLONIAL SECRETARYThen they must have been ernt to the outport members: but one out of the thirty repiliod. In roference to the allocation of monies to theee, 1 think It hat boen polutett out that If would be alisolutely imposatible in certain sections for auch to be done, and certain things would have to be done in thit respoct. It Cruncs there countills also have to allocate the Educutlonal monles.

MR. MORINeE-These counclls have nothlng to do with Educntional attocations; they would unly have to look nfter monles for their own warka.

HON. COLONIAL SECRETARYThis coutitry ta entirely diferent from Canada. There they have nothtag to do witt marthe grants. Hero the local counctie woutd want control of the marine grants. Then again the varl ous districts are different, and would want difforent erints preportioniately from the rot. This dietinction is great fad would have to be reekoned with very cautiously. My only reason for rloling waia to call attontion to thtir oif during thes stage 1 can apenk for fihe Govermaent whet I say that they are most defroun of correcting the ideas af some people and assuring them that it is their desire to Iraprore this system as much as possibte, for the alstribution of district montes fir the greatnit curbe there. We would soon remedy it if we could I hope that the words of my hon friond, Mr. Mortne, will be Yemembered strit netef npon, becamse I agrod with lifm in Als romarkit abott the Hospital We all look not ouly with laterent, bet with pirfde, at the

Geseral Hospital which we hato today. Great and critical work is dally belsig done there. There was a time when people wanted to avold the hospital, and would not go there; but today all this is changed, and everyone. zteh and poor altke, are dealrous of getting in there and await thotr turn. As get there bne bean no dlecriminsthon, and everyone can so and come sin he wishes. I hope that thle condithon of things will be remedied ere tong. The etalf there is of the highest sider, yet the Government are called tipon to pay for those who are well sible to pay for thair own treatment. I do not thlok that it is in any way because of the moral standard of the people, but just that no charges have been mutte. So popmine has the Hospital become that Mr. Whiteway, a very capable official and a better one conld be found nowhere, Is always at lin wits' end to know where to place the many eases that come in from the outports by every traln. Although doctore are told not to send thelr patients along nevertheless they come in, and fill up every place that Mr. Whiteway has at hils diaposal for them. That things are in aueh at state an thin is simply depilorable. It seems that there can be no moral tone to bur people at all. That they are willfog to be pauporized to such an extent is certainly pltiful fn the extreme.

With regard to the other inntitutions the same conditions exint. This is sotably to in the Lanatle Asylum. Here there are many canes whtch gught to be kept by their relatives. There are many there who are well worth keeping, but they are not kept Tecmuse they can be kept at the Asyfum free

I would Hise to add, Mr. Chairman, that as thls in an tmportant matter, the Goverament wonld be willing to dave it roturrud to a Select Committec and no left till bext year, for they
realize that in matters like these it is of the utmost importance that the wishes of the people should be carried into effect.

MR. MORINE-Mr. Chalrman: 1 would just like to make one or two remarks to correet some of the atatements made by the Colonlal Secretary, The method of dealing with Educationni monles in Canada is this: The school boards meet and make extim. ates as to the amount of money they will need to carry on thetr work. They then notity the counclis of the amount of money required. The government is then askod to and does vote the required amount That is the councll's share of the elucational work.

The great beneflt of these local counclls is that they can do what they like with thelr own money. They recelve their portion from the Government and spend it as they think best. For example: If a councll were appointed for King's Cove, and a wharf had just been built there, it would be the duty of that board to take over and look after that whart and keep it in good condition. They can do this much better when they have the power to do so without petitioning the Government first.

The poor grant ehould also be handed over to these counclls. Although there fo a very capable and excellent cfficer at St. John's, yet a poor officer should know every district under his grant. These manies ought to be handed over to these counclis, each council getting a certaln amount per capita of the population. Having their own money in their own hands for dis. -Tbution the counclls would be very likely to expend as little as they could help, and would probably do what they could to Bave it rrom unnecessary ex. penditure.
I will Just read for the benefit of the mombers a few of the headings from this volume, the control of which
are vested in those local councils. They are these: "Dogs at large and taxes on dogs"-a pettion dealing with this question was presented to this House this afternoon from TwilInlgate. With this system thls question would be handled by the Twillingate local councll. "Children running loosely around the streeta"; "Cruelty to Animals," regulations zbout erecting houses, fences, etc., wooden structures, snow sences, protectlon of trees, ete. There are many things which are now handled by the Leglslature which ought to be handled by those councils. These people, living at the places whero the trouble is, know how to remedy it best, and they could do it with less than half the trouble that is taken to set right such trivial matters as sre sometimes settied in St. John's. These are Just a few of the things that would fall upon the shoulders of such counclis when these counclls belong to the smaller districts. For larger districts, such as Hr. Grace and Placentia, many extra powers would be given. In such districts provision would be possible for rallway work, electric light and other such like things not needed so much in the smaller places. Only this afternoon Mr. Coaker asked queations as to the possibility of installing electric lishting plants at Botwood and other placos. This would then be a matter for the local counclis to deal with, acting under a general bill which would have been passed. Another thing these councfis would have control of is the care of cemeteries. In many cases these are under the management of the various churches; such would be also under the direction of the local council. Some time ago, while at Channel, I noticed an old cemetery there. There was a monument ersected to some person, and that was situated in the midst of a reglected cometery. There were no fences eround the place and old graves were
expoeed to view. This deplorable condition of a finirs would be soon remedted if a tocal comndil had the mecensary authorlis to act at will. Aftor 10 yeara of such town government I thlnk the change would be vers manifest. and would reeult in great benelt to the whole country.

MR. COAKER-Mr. Chalriman: I tany bay that I am very much Interested in thif matter. The plin as engreated by Mr. Morine is in my oplnion a very sood one, and I am fure woald eliminate many of the difficulties which contront the Govornment to-day. If we could only got thls system working satisfactorlly, and then adopt some other such system to look after the fishery out in our outporta, I think, Slr, that the country would aoon be in a proaperous condltion. What wet want, Sir, ts to grasp the possibillties of this system, and to talce fold of thle subject with all oir might and secure the benefla whlch we bave been told are pomalble

Now, I do not think that any man will ndvocnte the prefent system of Road Boards This question was thoroughly tlisctared last year. I don't agree Fith the Hon. Colonial Secretary that the memhers of thla Houne are Indifferont about thls euesthom Very four got these soquiries from the Board of Worle Department, anit there are membara who could not हixtt the information asked for. For myself, I fet thit matter stand over for the Catalina Convention, and fally intended to bave them lociced into, but when this came off, there was so much work of the highest importance to be done that they were overlooked and crowded out But there la a grent intertat belng taken in theye matters in the outportin. In the northern districts 1 belleve that sevenefglitha of the people are atrongly fa fsvour of a chans ${ }^{\circ} \%$ Now. I woutd be quile satleftod that thle mattor should go to a sub-committee of the

House sitting out of session for conslderation and the elaberation of soma platis on the lines-suggested here thla afternoon, if bomidthing wore done in the meantime to enable those places who wishod to spend their money undor En elective Rota Board to have the right to do so. Last year resolutons were passed through the House, and we were led to belfeve that we were to have elective Road Boards wherever the people deafred to have them; but I am sorry to nay that it has been very dificult to get those boardi elected because of the regulstlonn lald down by the Government durias the past year. Many placea have been most anxious to have elective boards, but have found it limposaible; and the reasons, many of them, are political. Political supporters of the party on the other side of the House who have been running the nffalra of the diatricta that the Union now represent, felt that their friends ought to have some say with regard to what was going on; and the friends themselves were very interested, mo doubt, and uned their fnfluence an much ine potaible to try and keep the old syatem in force so $s=$ to enable them to hares asay with regard to how monoy should be expended. Now, we know of a lot of instninces of that, but we thought the matter too trivial to bother the Governmen about. We do not want to be continunlly chating the Government in connection with mattera of thla sort, and we permitted thom to pasa in the bope that at thls sepsion romothing would be done to adjuat the whole matter and and the trouble. Now, if the Goverament will take our recommendations in relation to our own districts, 1 see no harm in lettigg thinge so on for another Fear, and let the sub-committee see If they carinot elabornte some machineiry that will be acceptable to the whole people, But certainly something mifht be done so that those places
who wish to spend their monoys under elective road boards might have that right.

Now, there is a great deal to bo gatd in finvour of elective road boarde. Money has been tootishly expended in the past throurh commissloners and through the road boards as appolnted by the Glovernment from time to time. We had an tentance last year of the case at a little place near Lamatline. Lamaline Council of the E.P.U. thought that somothing was wrong with regard to some graat; returns were auked for, the matter was investigated, and it was found that there was something wrong-that the Chatrman of the Board did do wrong. He was brought before the Court and was punished. He was fined $\$ 20$, and was given three months in which to pay it. Subsequently the fine was rufunded. Now, that is not tair, and it is not any encouragement to go on and try to make thinga right. I don't want to sees a min put in prison for afx monthis for a wroag that does not deserve that pundahment, but at the eame time I think that when perions do wrong they should be punistied, and some chicourugement sliould be given to those who are trying to correct thinge that are wrong of course, what happened was that the thing was maide a political matter. The Government sustained the man and took the matter up against him. Now, thices thifngir shoutd not be, and it ts thme to put an end to them. If the hoin member for Burin thinik that elocive road boards are not antiafletory, If he thinks that the oid system suits his district best, why let him have tho old syatem; let overy member, under the present circumstances, have the syatem which he thintes win best sult his own district; but in our diatricte, north, we certainiy do want road boarde elected by the people The hom. member for Burin, Mr. Carrie, atated that he thought that eleo-
tive road boards in bla district did not give any great satisfaction. Well, In Bonavfieta Bay 1 don't think there are half a dozen boards that are not elected by the people. This eystem was inaugurated three or four years ago by our prodecessors, Mr. Blandford and Mr. Morison, who were alwaye citrong edvecates of elective road bosids. The people were given full power, and the result is that things are running ns emoothly down there as in any part of the country, and there is no trouble. The Boards were elected in a very simple way. A meetIng was called, presided over by the Chalrman of the old Board or some other man of repute, and four or ftve men were elacted; thetr names were sent on here and gazetted, and the whole matter was at an end. Every bum of money that is being expended is known to the pubife and there does not seem nny chance whatever of coverlag ud any wrongdoing.

I don't agree with Mr, Currlo when he says that elective rond boards do not produce the beet talent. The efective boards that we have fo the north, I am very giad to say, lave secured the very best men available in the diferent places, and the vary best men have been ghat to come forward and do the work.

Now, in relation to the augrestion of Mr. Morthe with regard to the powers that mifgit sio glven these boarde, 1 notice in some of our larger settlements that there is a growing desire for outjort tonspitals. This, of course, is a matter which is sarroundod with a great many dimicultiea. The people of Twilliugate at the present time demire to have it hompitat, ind they don't know how to so to work to get it Thoy Coa't want a hospltal put there by goverament money, and they don't want one put there by charity. They linve bean dlscussing thin matter for a number of years, but they don't seem at the present time
to know juit how to move or what to do. If we had a hoard with power to rogufato such things as outport hospltals, it wculd be a great advantage to some of those targer towns. Some poreons do not wish to send their rriende, oz their wives or their children here for trentment. A person needing treatment at Twillingate, for instance, has to be shipped on the steamer to Lewleporte, and from there on to St. John's, and thon put In en ambulance and taken to thie hospital. And evan then, to pressing cases, pato obtaln almiftarice into the hospital, and thoy liave to bo attended to by local doetors. Thare fo a great need of central hospitais in places llke Twillingate The people realize it but they don't know how to go to work out ways and means to meet an expenditure of perhaps four or five thousand dollars a year. But the question stionld be faced. It has got to be faced in the future. The peoare not ening to put up with the conditions as they have exlated in the past. They want to have control of matters of this sort. Then again take regulations dealing with the qucstion of doga and matters of that sort. We had a petition the other day signod by nearly 600 peraons, asking for al. terations in the dog law. Well, that is too trivolous a matter to bring betore tho Legielatura; it merely meang a loss of valuable time; but there vuight to be aome local board which vould buve power to deal with such 1 thing as that.
Now, if you are goling to appolnt a sub-committee of the Jower Hoise to draft a olll that may be presented here at another sesson, let that commitiee be fepresientative of all partheo in the House Don't mike it a portizan mattor; con't mix up polition with te: we are Just as desirons of liavigg this matter aljusted as the Libornle: the Liberals are Just as de
strous us you are; and you are probably just as desirous as we are; so lot ui get down to business and see whether all the talent in the house co-operating cannot produce something that will give satisfretion.

Now, the matter of the Hospltal Commission has been brought up. I am not going to say very much about that, but I will say this, That commfssion has been sitting for twelve months, and it ought be able to give information about hospital aftatrs. Up to the present time I have not seen any report. it seems to be taking a yory long time to get together a report on such a small thing as the domestle affairs of the Hospital. If the Government had taken the suggestion whlch I made hare last yoar whon the matter came up, the trouble woald have ended in 24 hours. All that is necessary is to say to the Superintendent: You are boss of thls concern, and all the others are subordinates and must obey you; and you end the whole matter. The trouble is caused by the fact that there are three or four bosses to run one institutlon and there is constant friction. What you want is one man In charge. So far as the report of the Commisfoners is concerned. I do not suppose that the publication of it will do any harm to the institution. That ta the institution will not suffer, but publle conflidence in the institution will be staken. When people find out the litthe foollsh things that are going on down there, lots of them will think that it is hardly the place to send people for serious treatment. As 1 safd before, the remedy is to put one man in charge and let the others understand that they havo got to oboy him, and then you will have no fur: ther trouble at the hospltal,

Now, coming back to the matter of Local Affairs, if the Premler could see
his way to secording to our request that something be done now to meet the wishea of any community whe may desire to have an oloctivo road board, then we are satisfled that this whole matter should go to a sub-committee, and some Bill be drafted and brought In here next session.

MR. CURRIE.-Mr. Chnirman, the hon. gentteman who has just sat down apparentiy misunderstood the remarks made by me. Ho states that I sald that elective Road Boards were not doing my good. I dta not bay that. I sald that they were not any improvement, in my opinion, on the old boards. He also said that I atated that elective Road Beards do not secure the best talent. 1 said that they did not always secure the best peoples 1 qualiffed both statements. He must have misunderstood me.

MR. JENNINGB.-Mr. Chalrman, I am interested in the diacussion now before the House, and I propose to say a word or two. When we werd discussing this matter here last year I pointed out some of the Erlevances cornected with the ofd byatem, at any rate in the district of Twilingate 1 belleve a conscientious effort was made on the part of the Governmeat to try and remedy thoa concitions, seelng that early last summer I re celved a circular from the Department of Publle Works, with some torms enctosed which I was anked to fill in. This meant dividing up the district luto sections, and a number of other things which I cannot remember Just now. However, I replied to the Department saying that it was impossible for me, with the knowledge which 1 had of the district, to do this without a copy of the censas and a chart, It may be about two monthe or so afterwardis that I recefveff from the Department a copy of the census and I procured a chart, and during the winter I set to work to try as for as lay in my power to meet
the wishes of the Department. They eent me 19 forms. I used up the 19 really I wanted 50. I don't know Whether my work satiafied the Department or not. I sent it on through the mall, but I recelved no intimation at all as to whether they got it or not. However, I think I conscientlously tried to meet their wishes in that reapect.

The diflenity in the distriet of TwilIngate is that there are so many if . the settlements, and lots of those are divtded by water making it imposatble to group them, because they would tind it impoasible to send a representative either to take part in an election in some centre or to net under any board that might be elected; but there are a number of large settlements that it would be quite possible, I think, to bring under the meseures that were set out in those forms.

Now, I think the two princtpal grievances brought before the House last year respecting road management eere: First, that road boarda should be mate elective, and in that way ronpionitble to the people who elected them: the second, and perhaps the chiof griovance was that those boards shouth lave the expenditure of all publle moneys which were sent to the locailly afer whilch they had furfadiotion. The ovils whleh had arlsen and which came under my notice, came particularly from those special grants whide were sent to private individuals, who mansgod them just as they pleased, and semerally to the dissatisfac tion of the locality to which they were sebt. This is, in fact, the great grievance, and I thin) that any measura which would meet those conditions and rememdy that evil should zecelve eur support. 1 don't auppose wo ate going to get perfection at the start: there vill probably be mlstakes, but I have read somewlicre that thase who nevos thate mistukes neyor midhe
anything Now, 1 hope, as Mr. Coaker matid a little while ago, that some efrort will be made to deal with thrs mintter pinding the consideration of the more elaborate Aot to meet thime of har condtifous wituth the boon, mem ber for Butiariatn, Mr. Morine, has referred to. In Twillingate, whitch is one of the targeot rectlons of the country -TwIIfingate Ialend, north and south-the peopte have niways man. aged thelr roed atfatre under oas Boerd. I dou'l Fementier exactly the popuntion of Twitingete taland, but it wonta be between three end four thountind, I think. They liave 14 members on their board, and the monoy that comes under thetr control is manuged alright Now, 1 liave हrown up in the dlstriet. I have had practionl experfence both in moking rouls und in acting on rond beards, and I beheve t thow is mueh about the corditions in that respoet in Twillingate district as a commisaion coutd find out in ton yoarm-1 đon't aed why I shomld not bncause 1 have tived there for fifty yeurs-and thone litte mettera that I have just mentioned are the grant grlevances it the present t'me. I thitnk that something siould bo done towards dealing with those now and satistying the people in that respect, and the more elaborate men. suree referred to might be dealt with later on.

MA. GRIMES.Mr. Chatrman, I Wish to socord my support to the principle of the bill that has boen introduced this afternoon. I might atate, Bir, that In Hatening to the re marke which have heen thrown out by all the hon. mambers who have apoken on thia matter I have acquitred If groat deal of finformation that 1 thfule in very vuluuble and well worth connideration I llatemed with intereat to what the Hon. the Colonial Secretiliry hian to say with regara to denlorlas the low tone of our prople as regards their respousibilities. Now.

I thinlt ono of the enuses of that fe the fact that we have upon our shouldura thoir responsibilitiee; they know that, and theg liave no interest whatever in thking a more hentliby vlew of their affalrs than they are doing at the preaent time.

Fefarenca has heen made to the how. pital as an Thustratlon to show how our ctizens look upon the Government and its warle. We have men who come here from the outports, and man lliving in the town Itael, who look upon the hoapital merely as a place for recuperating their health, and when they leave the institution they expect - eren men of moans-that the Gavernment will pay their carriage thre home, or, In the canes of outport men, to the train and their traln fare to the place where they realde. This Ls simply because we have allowed this condition of things to prevail, and until we mike the people shoutder thelr own responsibitities we cannot expect ony Impravement in that direction.

Laet year the Government agreed to permit the vartous districts to elect their own Road Boards. The diatrict of port de Crave has avalled of that pifvitege very turgely, in fact out of 12 bourds that are in operation there nt prosent ten have boan elected. The finterest that has been taken by the peopile in that motter has been very marked. In most of the settlements $n$ majority of the garlified electors took part in the eleotion; in fact in some of the places fully aevent-five per cent of thie voters went to the meat. irues in order to take part in the choice of miembers for thelr boards, and sa thigh aut 25 candidetes were noinmated nit some of these meetings. This shows the great Interest that the people ars taking in thle matter at the presunt time. These elective boards hisve been found to be a marked fmprovement on the old syatem, because the members understand thit they lisve heen electerl by the people, that
they have to do falthfol work, that they have to properly expend the moneys that come under thelr control, and that they are respousible to the people that have electod tham. The consequence has been that for mearly every cent of money that has been sent out to that district returas have been sent la.? There are only one or two cases in which returns for allocstlons have not been sent fn , and thint. was due to the faet that because of the mature of the worts It could not be done in the ehort time that the people had at thetr disposal. Now, Slr, I merely want to polnt thls out in order to show that if the people are given an opportunity to take an intereat in their affaife the grenter part of them will avall of it.

Mr. Morlne in discussing this ques. tion this afternoon referreal to our present method of tarntion. He stated that we cannot go along na we ara dolng now. We are constanity plling uip the debt of the country and increastar taxatlon. By putting locat boards, fuch as those to which reference halk been made, in clange of dis trict affalrs, you will allow the people of the varlous localltles to ralse the money themactves for any firnprovements which they may desire. That Is, if they want fmprovements which will cost more then the rmount which will be sent them from the seneral revenue of the country, they will have to ralee the oxtra amount thomselves, If they want to enrry on the worle. That will relieve the revenue and it will aloo cut down somewhat the pre sent systom of collecting tamntion. As hies been polnted out, the presont sy\% tem deals-mont unfuirly in the divtribution of the threas. What 1 mean by that, Eir, fir this: That our present system of collecting the fisess of the country bears more heavily upon the poor man than upon the rich man. If a manis foettlig in thicome of $\$ 10,000$ a year and in only spending $\$ 7,000 \mathrm{he}$
is not paying as much into the re venun fa proportion as the man who Is recelving $\$ 600$ a year and is spendIng the wiste of it. In othor warde, If the rum whtel gocs into the revenuo rupresents 30 per cent, of thes smount expended, the man why is carntis stroo a yenr prys $30 \%$ of his entfre theome, while the man who is carntig $\$ 10,000$ a year and fis onty تpendics $\$ 7,000$, only pays $30 \%$ of 37,000 ; and on that basis the weathler man is not contributing the same propartion towards the upleeep of the gtate as the poor man.

While, Sir, I den't pretend to have the knowledge which is necousary in orter to five a complete thea of what could be done towards great improvement in the conduct of the atralrs of the varlous diatricts by these boards, yet from the experience and know. ledgo which I have gatned from what Las been done by these elective road boardn during the past year, I belleve that if you give the people the responEltility of managing their own local affalrs that they will take a healthier view of things than they are doing at the preacht time It is well knowa to members of this House that in the general electlons in this country, local atrairs have more to do with declding in election In the various districts than the general isauca of the country have, and I think thla could be remedied if a pollicy such as that under dincussion were adopted sud the peoplo were siven charke of their own attairu.

MR. COAKER-I ank that this bill be aleforred and that it be put before a ectect commitfee.
MR. JENNINGS.- 1 euggoat that this thil te teforred unttl Monday zere.

Mr. Spealker reaumed the chair.
The Chiriman from the Committee reported that they had considered the ruatter to them referred and recom.
mented that the Bill se rufirred to a Belect Cummittes, and that the Commintee lave leave to sht skiti.

On mothon thif fleport win recetred and adopind, and it was oriteret that the tollowing Seleet Catumities be ap poleted:- Tit Han. the Prime Stinls ter, Mr. Kent, Mr. Miecoth, Mr. Le Newvis, Mr. Carric Mr. Casker, Mr. Jenntage, Mr, Steme, Mr; Grimase.

## LOGGING BLLS.

On motion a Belect Commititeo ₹us appolated to consider the nit entiliod "An Act to remulater this emptopment of mea engaged in Locribe," in fol-Jowni-Mir. Conker, Mr, Motiwe Mr Jonninges, Mr. Llogit, Mr. Plocoth, Mr. Hicimin, \#tr. Muatein.

## PETITION OF RUAIS BIL.

Purnaant to netlet and Jenre grant e4, ane on motion of Mr. Krat, the
 etediape apainst the Cresn by Joti tion of Right was tutrotuend and read a first times, and ondered to ber reat in fecout timis in temortow.

## PENTIENTLART ENQURYZ.

Mr, Couker gave notice that oe tomorrow he swuld move the tollowing Benctutton:-

Reselved,-That a Epecint Committee of tive members of thit Honaw be eppotnted to enquitr tnta tint connliter the condiston and mannemont of the Penitentiary with mpecial meterence to recent complathis mude th the House, hat report thereons withils tum dayn to this Homese.
it was moved aud necomind that when the Howne rlees it adjourn unth Monday neat, April ifth, nt lirve of the ciock in the aftirmonh.

The Hause thea adfournet mocort tacly.

MONDAY, April 10th, 1915.
The House mot at three of the clock in the aftertioon purnazat to adjeurament.

## PETHTIONS.

MR. TAMGETT-Mr. Speaker, I bec to presput a pettition from the tohabitants of Whatertan in the District of Trinlit, atking for the appolatment if a lical cosstahle and a sub cot Inctor at that place. They are gatte a diutasee frum a meb Collecter and 1 do wiot thitit they are troitnd fitrly. The perttion potute out flat ther Save to travel tecrlve milles to got to the conatuble or Magintrate There are about a thaurand inhatitants ta Wiatortion and I truat that the GovArmmear with acoote to tho reguant of 1has potition. I ank that it be reter: fell to the proper Department.

MR. HKLFYARD.-3tr. Spenker, I
 tultants of liland Cove in the Dtrtrici ef TVom ankiag that Inland Cove

 inteamen puss lat halting firtaioe of Ivisad Cern, and atill the imhalitants It they wint to to any Dialnese wth Chan cutalile vurli have to traved slate teller to Fors. It is a great hartalitp fly have to anturno by nith having a Nitanif to citt To =how diat it eat is cose, in the fall of 1913, preceling the General Bection, the 8.8. Clyule rallod at Inland Harhor. It goes fo prove thint it she cortd make coniscillmin thon without any tmonnventfinen it should be continued. These pooplith have no. Doctor and In case of faritient thicy hara to go to Fogo. The wlet porsum may Bo fin much a condifoo that his or ber Hite may be loat ty not bartag a mfenmer alltge there at that tifle Thm the the thit of the your wait in the sprias a ereat many ivople in that place hare to go elet*ilare to swite amptoyment, and tacy ture to tife their lugenge and travel is Poen. I trait that the Government will wenerte to this petition and that thin rabuantiloties of the requent =ill be aveis and that they will have the Clyite or Fogrota cell at this place.

MR. MORINE-Mr. Speaker, I beg leave to present a petitlon from the Inhabitante of Badgera Quay and Sate Hr , asking that the S.S. Dundee cmII ht the publie whart at Vatteytield. I understand that the Fogots calls at thls wharl and it would be a groat conventence to the people, if the Feld boat did the same.

MR. WINSOR.- 1 beg to uupport the prager of the petition and to endorse the remarks made by my colleague, Mr. Moring

MINISTER MARINE AND FISHERIES. -1 also beg to support the prayer of the petition. I am well soquainted wita the place in question and can apprectate the diffcuttos under which the poople labour, owing to the Duadee not going alongolde of the whart. Bvery rock in the vicinIty la buoyed and there to a light th position whilh romoves any difficulties for navigation. I see no reason why the Dundee should not call at the whart as well as the Fogota.

MR. PARSON8.-Mr, Speaker, I beg leave to present a petition from the tolhabflants of Riverhead, Harbor Grace, anking for the sum of one hunIred dollars to be expended upon a road at that place. I beg to more that the petition be raterred to the Department of Public Works and I trust that Inter on, when the moneys are belag allocated, the Depertment whil tavourably consider the prayer of this petition.

MINISTER MARINE AND FISH-ERIES.-I bes to suppurt the prayer of this petition.

MR. STONE-I beg lesve to present a pettion from the trhabitanta of Trinity and Port Rextom, asking that the settlement of Crouche on the French shore be made a port of call for the coastal boat. This petition is Inrgely and fufluentinily rigned and sete out the fact that a largo number of fishermen from Conception Bay, Trinity Bay and Notre Dame Bay, vls-
it that place during the apring and oummer scasons. Even if the coastal boat only ealled at that place once a month, the people woutd to greatly beaefitted. I trust the Government will give this matter their earoust consideration.

MR. CLAPP:- 1 beg to support the prayer of the petition.

MR. JENNINGS.- 1 have much pleasure is supporting the prayer of the petition. I kuow that a large Iumber of fiblieruicn go to thist har bour to fish and sulfer great liconronience oring to the steamer not calling there.

MINISTER OF MARINE AND FISHERIES.-A number of fiehermen around Conception Bay flah In that Jocality and they would be greatly convenfenced if this bettlement was made a port of call as asked for in thls petition. These people are very often obliged to remain there until Inte in the autumn and sometimes exparience great diftcalty fo conveylag themsolves and their belonginge to a port of call of the coastal boat. If the wimbes of the petitloners were acceded to those difficulties would be removed. The fishermen roforred to would the greatly bencfitted if the ateamer only called at Crourhe altarnately, efther goling of returning.
MON. COLONIAL SECRETARYMr . Speaker, I beg to present a pettran from the Inhibitants of Petty fir. and the Gouldas on the subject of the prolitbition of the sottiog of trawla on that part of the coasat between Long Point and Heart'n Point 1 will now read the petition which explatns ftelf. (Here tion. memher rends petition). The petitioners understand that a potition sligned by the Inhabitants of Bay Bults has been forwarded aukins that the setting of trawls be allowed aloug that bection of the coast. The pettuoners belong to Petty Harbor and the Goulds, are hook and line
mea and they protest against trawls being used between the two polnte I have named on the ground that they will be serioualy interfered with in the pursult of thelr fishery avocations. 1 sagesest that this petilion bo rcfer red to the Department or Marine and Fisheries.

RT. HON. PRIME MINISTER-I beg to support the prayer of this petltlon.

## REPORTS TABLED,

HON. MINISTER FINANCE AND CUSTOMS tabled Report of the AudItor General on the Revenne and Appropriation Accounts for the fiscal year ending June the 30th, 1314 -alno Repart of Auditor Generat under Soction 33 (b) of the Audit Act, 1899, for the period eading February 28 th, 1915.

HON. COLONIAL SECRETARY tabled the following Reports and Returns of the Department of Agricuk ture and Mines for the year 1913-14. vis:

1. Report of the Department of Agrlculture and Mines.
2. Report of First Suveyor.
3. Report of Seconid Surveyor
4. Report of Chler Woods Rangar.
5. Report of Timber Inspector.
E. Return of Crown Land Granta lesued.
6. Return of Timber Hecenses tasuad.
7. Retarn of Mining Llcenses tsouach.
8. Retarn of 90year Mining LicenEir firmed.
9. Return of Fee Simple Mining Grants lasued.
10. Return of Water Power Leases theuec.
11. Return of Lenses of Quarrles lasued.

QUESTIONS.
MR. JENNINGS gave aotice of question.

MR. STONE gave notice of cuestion.
MR. HALFYARD gave notice of question.

MR. WINSOR Eate notice of questop.

MF. COAKER guve notice of questons.
MR. MORINE gave notice of quention.

MR HALFYARD asked the Mintster of Pablic Works to lay on the table of the House coplea of the returns of all local grants and spectal grants, spout in Victoria Vmage, Carlionoar, durtag the years 1913 and 1914.

MINISTEA PUBLIC WORKS.-This in in course of preparation.

MR. MALFYARD asked the Ministir of Publlic Works to lay on the table of the House a copy of the returns of all local road grants for Bay Roberts for 1814; also a copy of the returna of the main line grants for Marbor Crace Distrlet for 1914.

MINISTER PUBLIC WORKS.-ThIE Is in counne of preparation.
MR. HALFYARD asked the Hon. the Promiter to state whether one Charlte NeCarthy, of Carbonear, is now, recelvints a salary from the Government; if so, for what services is he beins poidd, what amount is he puld, and how long has he been recelving a sulury.

HON. MINISTER FINANCE AND customs.-When Mr. McCarthy was appoltated to thie porition in 1909 he recelved a sulary of $\$ 20.00$ which has since fincreased to $\$ 30.00$. He fs a Hdewaltor.

MR. TARGETT anked the Mininter of Murlme and Fisherles to lay upon the table of the House il detatted atatement of the cost of the public wharf at Cape Broyie.

MINISTER MARINE AND FISH. ERIES.-Thila is in course of prepan ation.

MR. WINSOR asked the Hon. Coloufat Secretary to lay upon the table of the Hotue (a) coples of nill corres pondence asklag for changes of mall courleps in Bonnvista District. 1914;
(b) how many appliontions were recetved. (c) names of applicants: (d) how many new appolntments were made: (e) who recommended the appointinente; (I) and names of places where changes were minfe.

HON. COLONIAL SECRETARY.The answer is in course of preparation.

MR. MORINE-Mr. Speaker, before we proceed may I ask when the MInister Intends to commence Supply?
HON. MINISTER OF FINANGE AND CUSTOMS-To-morrow.

MR. MORINE-In reference to that Mr. Speaker, I should like to suggeat that in view of the extraordinary financial condttions and other circumntancos this year, we should mnke a slight departure from the usual course of proceedinge, and that before we go inte supply the Minister should glve, if not his Budget Speech, at least such a general financial statement of the affatre of the Colony na he is in a position to give without anticipating hifs Budget, so that before we proceed with the Fistimates we may havesome tdea as to what the finanelal outlook is and to what deficit is in prospect. I do not think it right that we should now proceed to vote large amounts of money until we have hed an oppor tunity of copsidoring wherd we are and where the money is to come from. I make the suggestion in view of the extraordinary circumstances which exist at the present time.

HON. MINISTER FINANCE AND CUSTOMS-Mr. Speaker, it reply to the hon. momber for Bonavisto, I may sey that I think he will sind the Euttmates which we shall bring down, will be entirely satisfactory, and I do not think there fo any reason to depart from the usual practice in thle matter.

## SEAL FISHERY BUL.

Pursuant to order and on motion of Rt. Hots, the Prime Minister the House resolved itselt Into a Com-
mittee of the Whole to consider the Bill "An Act Respecting the Seal Fiahery:"

Mr. Speaicer left the chatr.
Mr. Parmons toolk the Chate of Comsmiltee

MR. COAKER-Mr. Chafrmnn: with regard to the sealing Bill now beforo the Houne, there are some changes in some of the ciauses which we would Hee to make. The first section, whtch provides that the men be sent only a certaln diatance from the ship, we tonstider utterly impractieable, for it Is Impoestble for anyone to fix the distance which men may travel from the ship on the fce. We would therefore nink that this clause be orased from thin will when it goes into Committee.

The second clause, which provides thas the risht of property in panned senls aanll cease after twonty-four hours, that for each ten seals there shall be a flag, and that upon each pole shall be marked the date and hour of lilling, it will be absolutely Imposible to carry out at tho seal fishory, It fs useleas to expect men to mark upon the pole the day and bour of the killing of the seals. The Catalina Conrention declded to ask the Goverament to paes a Mill dealthg with the right of property in panred seals and their wish is that the richt of property should cease after 6 otclock on the morning following the tany of killing. If such a proviaion as this were mado we belleve that seveneights of the tromble incurred through mon benig exposed on the lee would be done away with. If this bill ls submitted to a Select Committce, as has teen proposod, I trust we shall be able to Indune this Committee to insert a proviston to this effect.

As to the men not leaving the ship before an hour before aunrise and urriving on benrd the shly within an hour after sunset, we belleve that this
is a step in the right direction, and we hope it will be possible to carry out such a proviaion. The only thing to do is to test the possibilities, and if the regulation meets a need, it can be continued. I do not think the men themselves could have any objection to such a provision fn the BIII.

We must object to any restrictions beling placed on the taking on board of panned seals at any hour during the night. If we were to debar the ships from ioading sealg from the tee after staset, ft would spell rulnatton to the voyage. We must permit the ships to take on board all the seals they poasibly can during the night.

To the elause providing salls for the wooden ships we have no objection. The salls can do no good, nelther can they do any harm. They should not be depended on to accomplish much, for, as a rule, satls are so seldom used that they are not to bereHed upon in case the engine does glve out.

One clause of the Bill provldes that the Mate or Csptain sball be a certifleated man. This section we consider rather severe, as many of the bent sealing captains have been almost 11 . literate and have known nothing whatever about the rules of navigation. I quite agree with the suggesfion that there should be a certified man on board, holding either a Mas. ter's or Mate's certificate but it should not be compulsory that such a man be Mester or Mate on board of the sealing eteamer.
The F. P, U. at Catalina Convention declded to ask for a Board of Examiners to examine all offers in charge of sealing steamers, the Board to consist of three experienced Sealing Captnins, so that before a sealer could be appointed to the positfon of Second Hand or Master Watch. it would be necessary for hm
to हecure a certificate of competency from this Examining Board. This we conslder essential, in flew of the excuses made in connection with the Newfoundland Disaster last year, as It has been thought that some of the omcerg in charge of the men at that thme were not as competent as they might have been. I do not think the Committee could object to this proposal as its only object is to place competent officers in charge of the men while they are on the lee, and the onty means of Judging their competence is by examination.

With regard to the clause resulting from the Scaling Commission's Report, providing a thousand dollars compensation for the loss of life from exposura or through injurles sustained by exposure on the fce. I would say that this clause fully covers the recommendations mide at the Catalins Convention of the F. P. U., and wo give it our hearty eupport. By the enactment of this clause, you will find that in the future Captalns will be much more carefal of their men, and will value their lives more than they have done fa the past, When the Captains realise that for each man who dles on the lcefloe, or who Is triured through exposure, the owner of the ship will have to pay a thousand dollars, they will think twice before they send the men on journeys entalling a lsrge amount of risk, if the right of property in seals is done away with, as has already been sus geated, it will mean that the men will not be sent so far away from thele phipe to pan seals. Consequently the incldental rishs of storme and blizzarda overtakting the men will be avolded, and the danger to Ifte diminished.

Reapecting the food on board the sealing sttamers, it has been found that ons pound of bread three trmes a week is not sufficient. It is desir
able that the law be amended to provide one pound per day. Thare are some ships which now provide thet amomit, nind on the larger stips it is quite posmeble to supply thas quantity. There should be no reason why the men should not be aupplled with suiflient soft bresd for thelr use. With regard to freah beef, we hoped to have the law amended to tosure the serving of fresh meat on Sumdays. The law at present states thas It shall be served once a week. From the expariences of this Spring, we find that thls law was not carrled out in every case, and that in some eagen, aven canned meat was not gerved once a week. This treatment Is not good cnough and unless a remedy is applied by the owners and an effort is made to live up to the law, some striagent regulations will have to bo ingerted in the Sealing Act.

The ciause put out of last rear's Sealing Bill by the Upper House, which provided that the wooden ships conld return to port and hand a portion of thele crew by the 10th of April, will have to be inserted in the now BIII this year as preeent conditions cannot be permitted to contlaue. Under the clause to whleh I refer the Captains would have the right to take the crow in two parte, one portion for the long voyage and one portion for the short voyage, and the men would sign aecordingly. Then If the young seals were missed, the Capts.'s would be able to make for a port and Wisctarge the short voyage men, while those shipped for the long voyage would continue. The long royage men would then know that they had shifped for the tong voyage, and if any trouble ensued, they could be puniahed for refusing duty, It wontd be advientle for the younger men to ahlp for the longer voyage as they would be able to rematn out,
while the family men, if they missed the seatir in March, would require to get home as soon as possible to prepare for the season's cod fishery. Had thls clause not been out out by the Upper House last year, some of the trouble which hase existed on boand of the wooden ships during the past two Sprlnge would have been avoided. Unless some arrangement of thill fort is made, the same trouble will occur from year to year until, eventwally, there will be a riot and probthly logs of life on board of theno shlps. My chlet deaire in this matter fs to prevent strikes and unpleasantnicse on board of the ships which miss the young fat, and the intention of the clapse out out of last year's Bill by the Upper House was solely to that end I very much regret the action of that Body in interfering in a matter which it was neither quallfled nor compotont to underatand. We had given much consideration to this clause, rand had diferssed it at neveral of our Annual Conventions, and the outcome of our dellberatons was formulated in that seetlon which prow vidod that steamera be allowed to come to port to land a portion of the crew on April 10th.
1 trust, therefore, that when this mil is consldered by a Select Com. miltioc, the ounted olause of last year's fili will be again inserted, and tha: the Upper Hotise will this time be able to see eye to eye with this Chamber In this consection.

We object to the Government's procedure in arresting the alx seaters of the Torra Nova's crew on the charge of refusing to perform duty, We cots sider that these men have been bsely trented. There is no reason why alx men should suffer for the doings of one hundred. The Government ought to have seen that these men were trled here in St. John's, and have offered them an opportunity to be de-
fended by Counsel. The Government should not have permitted the Capt ain or the owners of the shid to proceed against those men at Channel. They were sentenced to two week's fmprisonment, a punishment which they have to endure on behalf of all the strikers in the wooden ships this spring, the object in punfahing them being to have an effect in the futare upon all strikers in wooden ships. We only want them to get fair play and that they are entitled to, and it is the Government's place to see that they recelve it. We do not Intend to excuse or defend any sealers who do wrong, but we believe that they were justified in refusing to prosecute the seal fishery in pursuit of old seals under the circumstances which prevalled this Spring, and under the condtions which exlated on board the Terra Nove. They were only sentenced for two weeks, and it was fortunate for the Government that the term was not longer, for had it been longer, huge petitions would have been presented to thifs House aaking for their release.

With regari to the disasters of last year, it is a sad reflection upon Justice to say that 78 lives can be lost without anyone being held responsitle. As well as the 78 lives lost, there were 21 or 28 malmed for life, and yet, so far an the Government is concerned, there is no one to blame. It has beed shown that these men were taken on board after travelling five or six hours on the fee to the "Stephano." They were then put on the icefloe in the face of a brewing atorm, and no further eflort was made to ascertain whether they had rached the shlp or not. They were misled by the information given them by the Captain of the "Stephano," when they were leaving that ship, with regard to the course which they had come from their own shfp. The course
which he adrised they travelled, and it took them a mille and a half or two miles out of the proper course, and that much farther away from thetr sitp. It is a strange thing how Cap tain Kean, afler he had put the men on the ice on that occasion to be followed by a tremendous blizzard, could satiafy limselt that they were ont of harm's way, and had reached thelr shlp in the face of such a storm. He does not seem to havo worried very much about thom during that night. How a man in his position or under those circumstances could have contented himself that night by bellevfing that the men had reached their ahip, is what I cannot understand. With his vast experience as a sealing captein, it is still harder to understand how be could justlity himselt in the belief that these men had reached their shlp, I am satisfied to believe that on the evening of the blizzard Captain Kasn must have been Insane, for had he possessed his ordinary faculties, he could not have srrived at the conclucton that these men were absolutely sate on board their ship. He did not even heed the murmurings and complatits among his own crew.

The F. P. U, had been more than fustried in keeping up thls agitation in connection with this Disastor for the lest twelve monthg. The demand made for the punishment of Captain Kean has been enđorsed by a large proportion of our population. The 10 , 000 who gigned the patition asking for Capt, Kean's arrest knew full well what they wore doing. They knew that they would be marked men in so far an bacuring sealing borths in the future was concerned. They knew that thelr names would appear in the paper. They knew that the buskness men with whom they had deal. Inga would not agroe with their action, snd they knew that the business Interest wanted Kean to go to the
ice. Yet, with all these facts staring them in the face, they voluntarily camo forward and signed tho petitiona demanding that the Government should arrest Kean, charge him wlth the crime of man-slaughter, and prevent him from any longer sailing to the fee an-a sealing captain. This petition aakiug for Captaln Kear's arrest was the spontancous feeling of the Spanlard'g Biy Convention, and was not a premeditated action. That Convention belleved that Capt. Kean deserved to be punished, although they knew that the Government had made up their minds to permit him to escape that puniehment. We believed that the only way to draw the public attention to the Government's intention to defy justice in Kean's ches wes to sign petitione and send them to the Governor, thereby dofing all that legally remained for the people to do in the matter, I often wonder how it was that the men did not commit some overt act. That peace was secure and unbroken is a matter for which the Government can take to itself no credit. They did nothing whatever to preserve the peace and they did nothing to carry out or comply with the wishes of the people. on the contrary, they did all in their power to defy the people's wishes. They disregarded entirely the actlons of the friends of the men who had lost thetr lives and of those who had been malned for life. I hope we shall never experience a similar oo currence in thif country.

As far as I am concerned, 1 have no personal enmity against Captain Kcan, My oppolitton to fimis le based solely upon the fact that he was chfee ty to blame for the loss of these men. and that belng ao, that he should be punished in order to impress upon all sealing masters the necessity of takIng every safeguard and dolng all in their power, under similar circum-
stances, to protect the lives of the men tisder thelr care. Tha Govern ment and Captain Kean defled the people's wlahes this Spring, and Kean went to the ice in spite of the protest of 10,000 electore. It now looks as if be afd the very beet thing atter all to recure his own reputation as a seallug captain. Had he boen leept eshore, his frlends would have said that the fallure of the seal Hishery was occasloned by that action, and that if Kean had been permitted to zail as master of the "Florizel" he would have led the shlps into the seals. This beng so, the people would have claimed that the action of the I. P. U. in keeplig Kean ashore resalted in a tallure of the seal ftshery. He went, and sot as near to the land as he pegribly could, and there he spent his Spring. His shtp, being the leading one, was followed by the others, and they were all caught like mice in a trap. Tho result was that they necured in all 20,000 seals. Capt. Kean's golng to the Icetielda as Captain of the 'Florizel' was the very beat thing that could have happen ed for the F. P. U., for he himeelf has accomplished thila Spring what could not have been accompllahed in twenty years by on F. P. U. agits. Hon, as far ta khowing what knowfedge he posserses as a sealing cadtalia is concernod. To the ordinary man it would appear that what the F. P, U, does not succeed in accompllshing is accomplished for us by Providence. To me personally; it would not make any difference whether Kean went to the lee for fifty years as a sealing master, or whether he never went. I have a duty to per form and whether it is pleastag or displeasing to Capt. Kean or anyone elae, it has to be performed.

The kill before us provides for a Board of Examiners consfsting of three bealing captalins, I presume the

Goverament will appoint Capt. Kean as one of those examiners. I bellove him fully capablo of pertorming such a duty, and I trast that two other equally capable men will be selected with him to form the Board,

The repert of one of the Commlas ioners whe investigated the Sealing Disaster claimed that Captaln Kean was innocent of any wrone-doing, and that the loss of 78 men , and the maimIng of 21 others was an act of God. That Commfastoner had made up hif mind to defend Kean's conduct from the very firnt, and so he regarded very Hightly the loss of the 78 men and the manner in which they were sent to thetr death on the evenlng of the 31st of March. 1914. That same Judgo last year eent up to this House a Bul to be passed whtch would punfish niyone who lli-treated a cat or a dog. That Bill became law, and to day if I were to be found etriking a dog or a cat with a stick, I would be open to a fine or imprisonment for three monthe, Yet, thls same Judge knew that thooe men had been enticod on board the "Stephano," had been recetred as guests, and then were placed on the fcefloe in a blizzard to dfe, there belag no poselibility of thetr ever reaching tholr own ohlp. In view of those facte, it woutd appear that thlg Judge has is great deal more conelderation for a cat or a dos than he had for the lives of those bundred men who were eo treated by the Captaln of the "Stephano," That Judge did not certainly do Justlee to hla fcelinge or to his conacience when he decided that kest was blameless. Whan he is dylng, he may confess by what method be arrived at the conclusion that Abraham Kenn was guilty of no wiong in connection with the Newtoundland tlisaster. It he exthets to get to Heavea he will ceratnly have to make a full confession or there will be no hope for him.

We therefore expect some day to hear how Judge Johnson arrived at the conclusion that tho loss of lifo in connection with the 'Newfoundland' Disaster was atmply and solely an Aet of Ged.

Whon this BII comes before a Speetal Committee, we shall endeavour to plice before that Committee our wishes with regard to any amendments thereto, in order to make sure that the men who prosecute the sealmehory are safoguarded in every way ant it is possfble for the leglslatore of this Colony to safe guard them.

MR. HIGGINS.-The hon, member ought to sdmit that his bill of last year wns discussed very filly and exhaus. tfvely and passed by this Chamlier, and now that tho Government have teotided that sueh a bill tis necessivy. and lavo brought it in, Is certalaty enght to have the unprejudiced support of that gentiomin.

I do not know or for a moment attuite that shyene of our enptaing in the past ras so grossly negtrent of bur dutles ue now to be any more carcful of bis men becalise of this fine of $\$ 1,000$; but he ahould admit that if this disaster were the divine work of Providence, no legistation we could pass bere would stop it from happenfrig. I am tempted to say thls because, like the great war-lord of Enroys, our friend on the Opposition seems to have some understanding between himself as President of the Union and Providence by which the Union is to accomplish the work.
I think frankly that the hon. member on the other alde of thla Houso will teimit, that whatever happened to hits lult after it passed rrom this Chamber, while here it recelved the attention sach a measure demanded, pud thile Chamber did its part.

I to not think that it is right that the country or the people should be fold through the modium of the press
or ly any hon. member of this House that a conspiracy had been entered trito by the Government and the Commissloners. Notling ean Justify his sayligg that Acctidents have happened in the past under other captatis than Capt. Kean, and are always pos. sible. It is because they are always likely to happen that I in common with all other Newfoundlanders am alweys prepared to vote for nnything that can in rany way lessen the dragers of this industry. But another asp pect of the question fer that in making these lawa, by somie error of Judgment, by doing misch in the way of tying up this industry, greater Injury may acerue than will be averted. The cure may be worse than the disease.

Now with regard to shipping men on for two different seasons, I woutd Just like to suggest that you camnot compel a captain to ship on men for a ifmited season only. The captain may want and usually does want his full three out, and may not take kindly to coming bo lk to land part of his crev. In ray opinlon the captaing would immedtately object, and not without some resson. There is a lot to be suid in regard to the wisdom of haveing these sections in the bill, but we must remember that they are the result of an extraordinary occurrence, and whatever sections are adopted must be suitable for diealing with oriliasty conditions as they will be in the future, not as they have happened to be in a particular caus of the past.

References have been made to the food, and the manner in whiteh it is served. There will be found here Theas raspecting this; for myselt, I may say I destre that every improve ment poxsible should be made and carrited into effect; and I readily abquiesen in any such movement and wift slve it my hearty support.

There is just one other thing I would
like to point out, and that is found in Section 5. This section was placed in this bill through the suggestion of the Commissioners who investigated the sealing disasters, and was recommanded by them. The hon. member said that these would be good only under ordinery weather conditions; well, Mr. Chairman, while personally I cannot say whether, the suggeations are valuable or not, yet sir, if these are good in normal times, these are the times they are wanted for. Preparations cannot be made for abnormal times, unless speciftc knowledge is find of such; and these cannot generally be forescen.
I would say finally, that in my opinion this bill ought to command discusston without undue reterence to that sad happening of tast year, for when we come to think about it we find that such cases of error of judgment or whatever they may be have rothing to do with this House but are matters fier the Courts. No legislation can deal with them; they are purcly mattere of lew. As far as thope patitions iga.nat Capt. Kean go, the hon, number knows that with his tromendctis influcrice he can easily get 10,000 Efgriatoriea to a petition on anythics. Why as far as a petition is concurned he could have us all arrested to morrow; be can eaally get the nocosary number of names. But I do think, that now, while honestly considering thls Bill, he ought to confine himself to it, without consldering where the recommendations came from; us long sa they are for the beneft of the fishermen, and the rood of the country. I say these few worde bocause last year the hon. niember advocated such a bill as this, without knowing as much as he does now of the circumstances. Last year I lnow nearly as much as he did about tho senl fishery, but fifnce then he fins had the benefit of a spring's experfence at that flshery, and I think
he might use thle knowledge judiciously for the baneft of this bill.

MR. JENNINGS-Mr. Chafrman, I would like to take exception to one of the remarks made by the last spealrer, Mr. Higgins. The remark was made fin reference to the manner In whlch the members of the Unfon slened the Kean petitione. As far as the district of Twilliugate is concerned, and nes far ta It was connected with the petitions mentionea, I may say that betore stgning any petition, these men want to be convinced in their own minds that thero are reasons to Juatify their demanda. The hon. member is very far astray If he means what he has said in reformeo to these petitions. I may say, Sir, that the people ind made up their minds long before these petitions were planned, as to rlehts and wrongs of this disaster, and that they signed the petitions only after having read over carefully the report of the evidence as given at the firat enquiry and having made up their minds, metther the prealdent of the F.P.I. nor any other person could make them change thet convictione.
MR. HALFYARD-Mr. Chairman, 1 would Juat like to make a remark os two in reply to what the hon. member for St. John'e East has baid, I did not think that this dubate would take the tura it has, tut of course the Sealing Disaster has been of such Importarice that it has occupied the minith of the people of this Colony from the Blst of March last to the present time. In regard to what has tooin done to lieep the Captain of the "Stophama" fram golog to the tee this apulag. I tay suy, that like my frlend Mr. Jenntiges, I have no in. tention of expressing my opfinlons. It was not flome at the request of one tman, lrut of many man. We know that diensters have fispponed in the past fad we know that losses have occurred, but an error of judgment on the
part of any man alwaye leads that man into trouble. Whether the captatr in reaponalble for an accident or not, the general result, is that that m in loses his commission.

You look into Europe today, and what it you see? If it is the mistortune of any offleer there to lose a resiment there by an error of Juds: ment, what is the result. Does he getll command men? No Sir. You find that that officer lis suspended and loaes bils stripes. This is what the men wanted who signed these petitlons against the Captain of the "Stephano." They thought that a man who bad had the misfortune to lose sueli a body of men es were loat last year should be surpended, I 40 not even say that it was hils fault; It was certainly hia misfortune In either case be certainly ought to have been kept ashore,and this is what the flehermen of the country asked for and signed petitions for.

Now, with regard to this bill. We hold that if the clazse to which Mr . Coaker raterred, and which this House had passed and sent up to the Upper Houss, had been sccepted. I do not belteve that there would be the trouble that we have today at Channel on board of the "Trerra Nova." That clause was fnsertid by those who had a knowledge of the facts as the result of yeare of practical experience in dealing with men who prosecuto the voyage. We thinls, Slr, that if men won't sign for a full voyage that there should be nothing to compel a captalin to gign them on, If a mon won't go for the full voyage, let him stay home, and let hils placo be taken by those who will stay out.

If they had stgued this agreement It would have been no good for them to atrike,but witb the conditions which they sign under now the matter is left entirely tn the hands of the men. and the only way they ean carry out
thatr Chbles is to strilie. There must ter sums anck ctruse thaerthid betoce idere can be in sittaniction vettlothent.
1 would fort the to may n mord abeat what Mer. Higesinc sald abeut the Y, P. IV. petitians.

MR, COAKER.-Mr Chatrman

WVIL megard to the amiendment surs gosted by the hon. member to charge of the bill for extending the time to ene monith. I dan't thinit thero would be any harm in that Lat year the price of foh was flxed here in town at n2.in. If the price had not theen flixed watll the lat September, It certilaly would bave bora +4.00 . As locte at thn Board ts acting in the interests of all concerned, 1 see no objection to their postpouits their deciaion wntil the fat October, if that conrae is thoaght necenary. They ehocid not So compelled to fix be price on the Iat Auscont if ther lave reason to thlak this thers is a moot chanoe of things Arichtining ap a litile later; and the thlurnmes weold fol satisfied, when Se price was Hias, that if whe sot at Neveliar the marcaintro price but the Telan of the nath, and they would pot Insitate to ship thelr fisk for the price Iat was fixhl. There are objections to Jxing the price toe earty, as vell is to fixing it too late. Suppoatng wo tait down the rele lere that the price Wia to bie fixed withien tev minothos after the lat July, and we wase to gat ip agolyyt lie aane conditions map plind linet ger, ve wenld find that we Wern minking a mitale The men tirn $=$ the abore wralit geg: We are poling to sell our fint at the curriat prion; and ther would arree with the \#crchasts to sell at that figure The thrriat grice as fixed io Aucust might be fiad, and by and by, to the month of Beptember or October, they would fand that the price would have gone \#p to $\$ 130$ or $\$ 440$, because is the minantime things wuatd bare brightened up in the marketa So that I doa't see any harm in extenitis the tman withite which the Boart has to \#nke in decinion. 1 quite agree with thin Minletar of Mariue and Fluherien that the men ought to lmow the prico when their flab in ready, but if you thll them: Now, boyn, we are not going to tix the price now becange later on
the markots may be looking better, and the conditions, which are now gloomy, may brighten ap later on, and you may get 20 c . or 40 c more a quintal for your fish, I don't think they will object.

MINISTER MARINE AND FISH. ERIES.-1 would not object to three or four months, but I think the history of the Labrador fishery is (and if you aak the merchants of Water Street to give you the information, they will tell you, I think, that what I am stating is correct) that seven times out of ten the first cargo of fish that goes from the Labrador gets the best price; and I think that if the time were based on the first cargo, and the price dectled by that, the flshermen would get a
tter figure than they have been getting and they would be quite satisfied. I am quite satisfied with whatever the hon. member who is introducing this bill sugrests; but at the same time, as a representative of the Harbour Grace fishermen, I could not let the mitter pass without makting these suggestions. These men go to the Labrador: they are put ashore down there; if the fish come where they are, they get their share; if it doesn't come, they have to remaln there, and get home as beat they can with very little; and these are the men-the Conception Bay fishermen -who are really going to benetit most by a price settled at the right trme. The men who fish in their schooners, who can go from Blane Sablon right down to Cape Chidley in thetr search for fish, it is their luck if they don't set It: but the poor men who are taken down in the spring, who bring down their wives and frmilies and gear down there, and then after workfing and tolling all summer come home with nothing those are the men you have got to look after and see that when they get the figh they get av good price for it as it is possible for them to get. That is the reason why

1 suggest that as soon as tho first ressel leaves the Labrador, this Board shauld meet and make thefr dectston on the basls of the price that is paid for that cargo. If you wait untll all the fish is ahipped on board vessels, snd some of it on Its way across the water, 1 um afraid that the price is not as likely to be satisfactory to the fishermen.

MR. CURRIE,-Mr. Chalrman: it occurs to me that probably the BIII is not goling to reach the end whleh it has in view. It seems to me that if the Board fs going to be of any use at sil, it will have to sit every weekthat is, if it is going to take care of the Interests of toth the merchants and the fiehermen. Prices cannot be ftxed at one pariod, to govern the whole season. Prices fluctuate with supply and demnna.
MR. MORINE-The hon. member for Burfin misunderstands the object of the Bill. It is not intended to fix the price which has to apply betweon rendors tand purchasers at all. It does not nffect contracts. It is merely intended to meet the practice which has prevafled, I understand, for many yeara on the Labrador of fish boing bought and sold upon a recelpt which ex. presses that it is to be pald for at "the current price" when there is in fact no current price, and the real mesning is that it shitl be pald for at the price which shall later on be aettled by the merchants themselves. That is the position. Nine-tenths of the men who sell fish on the Labrador nind have it shipped away have not the slightest idea of what they ars golng to हet for it untll late in the fall. when the buyers meot and announce what they are goling to pay. The object of tho bill, as I explafned the other day, ls not to prevent buyers and sellers from fixing a price which they atate thombelves, but is merely to provide for those cases where the parties fall to fix the price themselves,
and whore the price was uitfmately fixed by the buyers themselver without the allere bofing in any way represented. Under this bill the price Is fixed by representatives of both partles. If, shonld thle bill pass, mea want to deal in flah on the Labrudor cosat, and the buyer says: I will give you so much for ft, and names the exact tigure, as in done in other parta of the world, and the seller agrien to that figure, then that is alright. We don't dealre to intertere in the making of contracts, at least not in any experimental bill. We merely want to meet the cases of buying in the dark, which takes place at present. That is as far as we dealre to go thls year. When we meet again, at nuother senslon of the House, it may be found necensury to change the bill somewhat.

With regard to the Minlster's atatements, $I$ would polnt out that with this amendment the bill will not work out very differently from what he desires. If the Eourd if appolnted on the 1st of July, it will take a few days to give notice, and they then have two montha within which to tix the price. I premumo thing witt be onty too gtad to do that, as nearly as possible, and so get the matter ofit their handes but if they flind, for good and sufficlont reazons, as, for fmutince, tho concitions of the markets, that it in desiratile to postpone thoir decision, then they can do so for a certnin number of dass, but not In rny ense Inter than the ist October. Then, it they don't perform their duty, an application can be made to the Supreme Court, and tho Supreme Court mast, within thirty dayo, malte is ruling. That, however, fir orly a. precaution, as in all probability we will never have a Board that will refuse to act in this matter, I am satinfiod that the little amendment that hns been proposed by the momber of the Legishative Councll will facilltate the
passago of the Bill, practically without furthor amendment, through the Upper House, and I think that is very important.
Mr. Spealrer resumed the Chatr.
The Chairman from the Committee reportad that they had consldered the mantter to them referred and had pasied the BII with some amendments.
On motfon, this report was recetvand adopted, and it was ordered that the Bill be read a third time on tomorrow.

## BAWMILLS BILL.

Pursuant to order and on motion of Mr. Jennings the House resolved itselt lato Committee of the Whole to consider the Bill "An Aet to Amend 4 George V., Capt. 17, entitled 'An Act Respecting the operation of Saw Milla,' "
Mr. Speaker left the Chair.
Mr. Pursons took the Chair of Committee.

Me. Speaker reammed the Chafr.
The Chisirman from the Committee reported that they had considered the matter to them referred and lad passed the Bill without amendment.

On motion this report was recelved and adopted, and it was ordered that the Bill bo read a thild time on tomorrow.

PETITION OF RIGHT BILL
Purnument to order and on motlon of 3tr. Kent, the Bill "An Act Respecting Proccedinge mgalnst the Crown by Fetition of Right," was read a sccond times, and It was ordered to be reterred to a Commiltse of the Whole House on to-morrow.

ESTATE DUTIES BILL.
Purnuant to notice, and leave granted, and on motion of Hon. Minlster of Finance and Castoms, the House renolved iteelf into Committee of the Whole to consider certain remolutions is reference to the fraposition of dutien on the estates of deceased per. sons.

## Mr. Speaker Ieft the Chatr. <br> Mr. Parsues topk the Chualr of Com: mittee.

HON. MIN. FINANCE-MIr. Cmirs man, in moving thene resolutions 1 beg to make some explanations, Japt yesr, whea this Batate Duties Bill wir betore the Fimuse, it सril boies through hurrledty, and ther were aome proviainum that were not made ta a enttsfactory form. Now ther obfoct of thir ftrit motttan hir to tictude in the evitate of decesased persona, all property owned during thelr tute time An property tilaposet of an attir at the time of teeth of the periots. Thls means that if the property In dlapose4 of withite two geart hefore the pen mor't feath er condition that thir rhall not opernte matll after a peraon's deaib datios vill be calIecled thernon: anil aay Interent on thir froperty mav ter tmetutite the that any persos residfar antulle of this colong, and wio is Boteter shares in a compesy in Newfoundiand,
 nhares.

MR. MORINE- 1 thlok that thin Aet waz copled from Canatian Lecltittom.
fT. MON PhIME MINISTER-NO, it was niet.

MR. MORINI-ls was not drawn ap Eurie It tis cifilent that this section is fintended to apply enty to a company lin the colopy. We are not gotng to make companion in Atatralin roaposethle for eandernter with the itrrr tor this colony. Then andils is retors to the egrat ef a eclopy Would you makn an wiont down on Water Street remponftho for Hom-tomptimes with our law by a company in Canaint it yon are sealing with eampasies it the colony, or if aliares are held in the eotorty, thint you try titht with them. Hut if both the company shd the deceased were domictied outside the colony, it would doprive you of
any rifht to deel slib it. A company fir thile coloay may be under our Jurisdfetion. hut we cannot say thit a cotrpasy in Outarlo shatt atio lie under our furisitiction. It seems to me thist It puts the aronts in Newfounifinnt of Compenien autalide the colony, in a very lad position.

RT. HON, PRIME MINISTER-Mr. Chalrman, it dealee to make a few obFirvatiome on the lart potat which has Evera ungur constiferstion, This weo tims in a vertiatim copy of that of Thie Dath Dittes Act framet in the Traturnat wulch is convilered a modnif ploce of Inelshation and apectally rucommeniled to thls eoleny. There
 evtatile this colingy shouilid not pay duty. 1 waut mar learned friend to bare that polat maie clesr to him.
wr, wonive-Surty the Premtur dops not mesn to way that a \#an would terve to por tutr in Niceforint tead, who had mroperty outalde of the दuantry int atio $=$ so thred outrite of the coustry? Tou are lmpoites drtiny woen eampacian that are not with ti our furfaftetlone How car we en. troen ils
AT. HON, PAIME MINISTERThis wet wher propared by the sollet ther of the Hotisk wtio lise fotfownat Firbatim the provislecis of the Trans fant AcL This act was pasred in zov lind was assented to on the 73 (t Jayr ta that yoar.

MR. LLOYD-The pehtht is thlathat If the teternit in within the colony, fhert thit futy thruld be pote.

MR. MORINE-If you put in an trtirprotation clause you make sense of if The Tranrvanl Aet sayn "ComHawy thatt mans "A Company Incerporated in thle Country*" If you put th as taterpretailion clense like that In the gitt it wuulif mako senme: at present thare fo mo menae in it.

MR. LLOVD-i would sugrent that
the Committee rise so that we can give this Bill further consideration.
Mr . Speaker resumed the Chatr.
The Chairman from the Commattee reported that they had constidered the matter to them referrel, liad made some progress and aiked leave to stt again on to-morrow.

On motion this report was recelved and adopted and tho Committee have leave to ift again on to-morrow.

PENITENTLARY ENQUIRY:
Pursuant to order, Mr, Catker moved the followlus resolutions:

RESOLVED-"That a spectat committee of five members of this House be appointed to enquire into, and consider the condition and management of the Penttentlary, with spectal reference to recent complatats made in this House, and report thereon withIn ten days to this House."

MR. COAKER-Mr. Speaker, It view of the communication that has been read here from a prisoner it seems to us on this side of the House that matters in the Penftentlary ought to be inveatignted. If you bold an faventigation in the way that investigations have been held during the past year it seems to take a matter of twelve moathis before jou can flind out what's wrong. If thlngs are gofig wrong as polnted out in these Ietterd steps anould be taken to set them right and it it is not no ropresented it is an easy matter for a Committee of this House to come together and see what these conditions are if they are wrong they should be made right, and the cariest wey to Inventfgate them is for some committee of this House to call some of the anthorIties, some of the prisoners and the Superfntendent and find out what the condtitions are. I do not think there Is any neceasity for an elaborate commission lite we had in connection with the Horpitel. A couple of days consideration by a few business men,
the ankfig of some questions and findlag ont exnetly what the prisonpre liave to say and what the Superin tendent has to may and we can find out whether these complalnts are right or wrong without further delay. I think ten days ought to be ample time to work the examination, because. If thlnge are belug done wrong down there the longer the investigation takea the longer will these conditions prevalf, and if condittons prevall as polnted out by LeDrew who la Juat out of prlaon they ought to be set fight at once.

MR. GRIMES-Mr. Speaker, 1 beg to iecond the resolution.

The Resolutton was agreed to.
SELAECT COMMITTEE
It was ordered that the following be the Coinmittee-Mr. Kent, Mr. Liloyd, Hon. Colonlal Secretary, Mr. Emerson, Mr. Devereaux,

Mr. Morine gave notice of question.
MR. KENT-There are some queations I asked the Colonial Secretary and Minister of Public Works with reference to the Bell Island Council which have nat yet been answered. I asked for returns from the Council of monoys spent slince thelr appointment; aloo for correspondence etc. I would like to ask whether these returns have set been secured.

MINISTER OF PUBLIC WORKSOur elerks are getting them ready.

MR. KENT-I think the Minister fuformed me that these returns had bot been sent in except a general statemont. The Minister has already proralsed, me that he would procure them immediately.

MINIATER OF PUBLIC WORKSI will get them right away.

HON. COLONIAL SECRETARY.We have not got the returns, but we have written for them. The other information will bo tabled to-morrow.

MR. COAKER-Mr. Spenker. I alkad the Pramier to furnituh me with the Inspector General's reply to Constable Cramm's report in December. I presume there is a reply to the report sent by the Constable.
RT HON. PREMIER-I do not thithit there was any reply. 1 seat you the answer to your question.
MR. COAKER-That had retorence to the cillingham case. I also asked for the Inepector General's reply to Constable's Cramm's Report
rt. hon. Prime minister.-1 will make enquiries. My tmpression is that they were waiting for some event to tale further proceedingar. There may be a reply that it may not be in the pubillo finterest to pube lish at present. 1 ahall howerer make encuirles and if there is a reply that can bo furniehed I will obtain it.
The othar ardors of the diny were iteterred.
It was moved that when the House rises it adfourn until halt past three of the clock on to-morrow. Tuesday, afternoon.
The House then adjourned accordingly.

## TUESDAY, April 20th. 1915

Tha House met at halt past tiree of the clock in the anternoon puriuant to adjournment .

Hon. Minister of Finance and Cus. toms tabled the Publien Accounts for year endins June 30th, 1914.

## PETHTIONS.

MR. MORINE,-Mr. Speaker, 1 beg to present in petition from the inhabit ants of Flat Island, Bonavista Bas. asking that the maile be delivered there twice a week in winter as they hive it in the summer ttme. Thin mall. 1 bellove goes a fow milles distant and the experane of sending it in the winter would not be great; I beg leave to ank that the pettion be re-
cefved and nent to the Colonial Secretury's Department.

MR. JENNINGS.- 1 beg leave to pruaent a petition from tha inhabltanith of Comfort Cove, ashing that this place be made a port of call for the clyde. I think if it le not an unnecensary expunse that the Clyde raight call there in the aummer months. They are cut off from any comeetion with the railway. I truat the matter will be given the fulleat connideration.

MA. COAKER.-Mr. Speaker, 1 wiah to aupport my hon. frienil Mr. Jenning that Comfort Cove be male a port of call for the Clyde. The town thas a population of 250 , and it to an important centra. It ts about 10 or 18 miles from this cove that the steamer calls. The Clyde has not zot a great deal of work to do now that twn ntammare havn heon put on Green Bay. If thil matter be taken up a achedule could be casily arranged sat isfuctory to the Company; very itule is required to make it Buecess ful.

MA. CLIFT.-1 wish to support the potition that Comfort Cove be mado a port of call; it to a very important contre, and 1 think necessary arraugemanta could be eadily brought about.

IT. HON. PAIME MINISTER-The Honi. mamber auggestad that a sehodule could be eastly arranged in conHectlon with thls service; well it is the coutrictor who attends to the people's wiahes in that connection, and if any arrangements can be arired at I should be only too slad to do it.
MR. HALFYARD.-Mr. Speaker, I bog leave to preacht a petition from Inlimbitanis of Fox Head Cove, Change Imulds, anking for two welle. Thifs petition is signed by upwaria of 44 zoen incluring some of the mout prorilnent in the place, The putition as net forth is an appeal to the Govern-
ment. The public heplth is in danger. They have to use river water because there is no well in the place. I sup. pose they have not had the good fortune of getting in favour with the Governmont and getting a grant for a well. In certain distriets they woutd not have to do this for a well, but tt would be done by the Goverament boforchand.

I trust that the Government will take this malter into considerstion because the health ot the public fa at stake. I ask that this be referred to the Department of PubHe Worke.
Also another petition from Fox Fiead Cove asking for the same thing As in Change Islands, the realdents there lave no good drinting vater, what they have being contamitated because of drainage. This petition is slened by upwards of 30 resldents of the plece. I have much pleaanure in presonting these petitions, and hope that they will have the earneat conatderatlon of the Government.

MR. STONE.-Mr. Speaker, I beg to present petitions from Hatchet Cove and 8t.Jones Withln, aeking for $\$ 100$ to repair the main line roads, between these tiro places, \$90 to repatr it between Lockburn and SL. Jones Within, and $\$ 150$ to repair it betwoen Hatchet Cove and Hillilew. These romits tre mow fri a rocky oud bitty condition, and belag main roads are much used. The people have pettthoned becauso they have not enough money from thefr grant to pay tho necessary cont. I hope that the Gov. ernmeat will give this petition its hearty consideration. I ask that this be referred to tho Departimetat of PubHic Worke.

MR. TARGETT. -1 lave great ples. surd It supporting the petition presented by my colleague, Mr. Stome.

MR. WINSOR-I beg leave to present a petition from the frihabitants of Scuitd Tickle, with regard to tatiophote extenafon. I ask that this pets.
tion bo recelved and referred to the Departmest to which it relates

MR. ABBOTT- 1 have great pleaswure in supporting the setition just forsinted by my friend and colleague. IHr. Winsor:

AR. abBOTT,-I beg leave to prebent a petition from the inhabitanta of Brosd Cove, B.B., asking for the fum of $\$ 100$ to repalr tho bridgo thore with. It is signed by 75 electora. The bridge at prosent is in an impassable condfiton, and I hope the Government will sec what can be done in this matter.

## QUESTIONS

HON. MINISTER FINANCE AND qUSTOMS.-I ber to table answer to question of hon. member for Port do Grave, and aloo an answer to mamber for District of Twillingate-Mr. Jenzinge

HON. COLONIAL SECRETARY:1 beg to table information asked for by Mr. Kent. It is the correspondence between tha Bell Island Local Comacll and the Government.

MINIGTER MARINE AND FISHERIES. -1 beg leave Mr. Spenker, to tible uniwars to the following questions Mr. Targutt's of April 19th, and Ifr. Coaker's of April 14th, and Mr. Jetaninith of Aprit 20th.

MR, JENNINGS asked the MInlater of Marine and Fistierles for the folfowing information: What amount vas paid Mr. George Clark, of Springtate, Hatl's Bay, for investigatton and verimate of cost to build a bridge connectiog Bawl taland (site of Lighthouse) whth the shore, and what wan the entimated coat as given by Mr . Clark.
MINISTER MARINE AND FISH. eriss.-Thls has been tabled.

MR. JENNINCS asked the Minfater of Marine and Fisheries for copy of returns of expendtture of an allocation of $\$ 200$, made in 1918 to Edward Wooltricy, for the construction of a pubilic whart at Black lisiand in the District of Twillingate.

MINISTER MARINE AND FISH-ERIES.-This is beling prepared.

MR. STONE asked the Hon. the Colonial secretary to lay upon the table of the House a statement showing the number of new engimes built by the Reid Newfoundland Co., under the Fallway Contract of 1909, and to speelfy separately the cost pala to or asked by the Company for each ongine; also a statement as to whether the Company has installed aniy, and, If so, what tmproved appartenamces. and, if so, what these appurtenances consist of and the cost of each.

HON. COLONIAL SECRETARY.This is being prepared.
MR. STONE asked the Hon, Colontal Secretary, in relation to Ramea and Burgeo Cable:-(1) Is the Bur-geo-Ramea cable in operation now, if not working, how long since it falled, now long has it been working satlsfactorily since it was laid; (2) are there any other cables of the Postal Teiegraph out of worling order, if so, how long have they been out of order, and what has been done or is now belng đone to put such cabtes in worlcfag order, and by whom is such work being done; (3) what disposition was made of the seventy miles of wire betwean Grand Lake and Southwest Arm of Green Bay when this line was abandoned; (4) bow many miles of cable have the Covernment put in ube for the Ramea-Burgeo cable to date to cover a distance of $12 \mathrm{goo-}$ graphleal milles from landing to landfug; (5) whit is the total cost of cable used for the Ramea-Burgeo conpection to date.

HON. COLONIAL SECRETARY.This is also betng prepared.

MR. HALFYARD asked the Hon. Colonial Secretary to state if it is the Intention of the Government to extend the telegraph wires from Cambo via Fredericton, Carmanille, and Laille Cove to Musgrave Harlor, if the telegraph wire for making these
eomnections was sent to Carmanville in the summer of 1913, preceding the reneral electlon; if so, where is that wire now, and what reason has the Corernment for not earrying out their fatentions to give the people of these Iocalities the ordinury facilities to do thetr businnas and keet in touch with tweatieth century civilization.

HON. COLONIAL SECRETARY.This bine been tabled.

MR. WINSOR asked the Minfeter of Marlae and Eisheries to lay on the trble of the House coples o! returns for all moneys allocated from his department to Japhet Wlensor for the pubtio whart at Wertoyvilte

MINISTER MARINE AND FISHER-IES.-This fis heling prepared.

MR. COAKER nsked the Hon. MinLater of Finance and Customs to lay upon the table of the House a statemen showing what Customs recelpts were pald at Glenwood from January Ist 1012, to March 31st, 1915; and, If any, give dates when the same were recelved at St. John's.
hon. MINISTER FINANCE AND customs.-The answer is belag prepared.

MR. COAKER asked the Hon. Colonial Secrutary to lay upaa the table of the House a ditation statomets. showing (a) the amount paid out for rellef from Oct. 1st, M14, to March 31at last in each elecioral district; (b) the moount pall out by each reHeving officer furing the above per fod: (c) the amount pusd by each officer as casual rellef; (d) the amount pald as permanent rellef; (e) the nmountn pafd from the Public Charlttes vote by Relleving Offiearn in each electorat diatrict furing the fiscal year 1908-9 to 1918-14 and the per capita cost for these years for each dlatrict.

HON. COLONIAL SECRETARY.This is a large answer and will take timo to prepare. I have instructed the Department to get it ready.

MR. COAKER asked the Hon. Min.
ister of Flanace to lay upon the table of the House a detailed atatement with requisitiona and vouchers, showing what monies were patd the Governor for travelling expenses from July 1st, 1914 to March 31st, 1915, out of the vote of $\$ 4,000$ granted by thie Honse nt list winter's session.

HON. MINISTER OF FINANGE AND CUSTOMS.-I beg to table thle statement.

MR. MORINE asked the Rt. Hon. the Fremler to lay on the table of the House a copy of all correspondence in relation to the crew of the S.S. Terre Nova, recendy landed in port at Port aux Basques, and for a statement of
$y$ instructions, verbal or otherwise, given by or on behalf of the Minister of Justice to the Police in relation to the arrest of members of the crew.

RT. HON. PRIME MINISTER.-II relation to that I may say that the only correspoudence that took place was from the Department of Juatice. I have to-day written for it, however, and hope to lave it for the next sifting.

## TAABRADOR FIBH BILL.

Fursunnt to order and on motion of Mr. Morine the Bill "An Act Relating to the Sale of Codtiph on the Labrader Coast" was read a third time and passed, and it was ordered that it be engressed, being entltled an above, and that it be sent to the Legialative Counsel with a message requestting the concurrence of that body in its provistone.

## SUPPLY.

Purauent to order and on motion of Hon. Minister of Finance and Custums the House resolved itself Into Committee of the Whole on Supply.

Mr. Spoaker left tho chair.
Mr. Parsons took the chair of Committee.

HON. MINISTER FINANCE AND CUSTOMS - Mr. Chairman, every member will find on hif desk

A copy of the complete Etimates which, as will be esen by the table on pago 3, represent a total of 33 , $963,530,37$, to be voted by thils House. for the flacal year 1915-10 as agalnist $33,930,622.85$ voted by thfo House last year. There are incranses of $\$ 57,756$ in Interest on Public Debt; 32,751 in pensions; 224,110 in Fubllc Charities; a totul of, my, 884,800 ; white thero are docresses of $\$ 21,115$ in Civil Govermment; $\$ 2,015$ in AdmLulatration of Justice: $\$ 17,000$ in Agriculture and Mifnea; 82.000 in Marine and Fheherfes: and $\$ 11,253$ in Roads and Bridges, is total decrease ot 853,400 .

I propone to go through the Eatimatea and explain the changes, where such hinve bean made; and to supply such fuformation as seems to me eirefitial to your securing a fair fidea of why these alterations have occurred, and it any turther particulars are desifed, 1 shall be very glid to furnish them clther now or at the next sittling,

On pago 4 will be found a atotement of the Publie Debt and the interast thereon. The literest and charges we vili require to vote at this sesnlon will pmount to $\$ 1,261,719.53$. We have to pirovide In referenice to the incrensed fatereat, pymentr on the Public Debt for a sum of, roundly, $\$ 10,000$ to ralse the rute of interent on the two-milliondollor lom passed last year, from three and a halt to four per cent. On the 8250,000 of local loan for extenfion of telephone syitem and for lighthouse extensions, etc., which was estimated at four per cent., we have to pay $5 \frac{1}{2}$ per cent., thla making on incrense of $\$ 3,750$. Then we ralsed a toan of $\$ 360,000$ for extenslon of telesraphs and for the builditng of lighthouncs and tog alarms, and the construction and improvement of pubife bulldings This was rigured at 4 per cent., but $41 / 2$ had to be pald, maklag an increase of $\$ 1,800$ more. We have also milsed a loan of a million dollars in Engelond for the war, and got a
quarter of this from the Banlt of Montreal, temporarily, at $51 / 2$ per cent. On the whole, we astimate that we will have to pay $\$ 40,000$, so that, us stated, we will require $\$ 1,261,719,53$ in all. for the next fiecal year.

Turning now to the General Eatimates, the first change will be found on page 7-an licrease of $\$ 100$ to the Asaistant Taspector of Lefhthouses, Mr. Cornick, who lis raised from $\$ 900$ to $\$ 1,000$; and $\$ 100$ to the stenographer In the same Department, who is advanced from $\$ 300$ to $\$ 400$.

On page 8 we cut out $s$ vote of $\$ 1,000$ for Museum requirements, and $\$ 500$ for mapa and advertising abroad. Further down, on the same page, we reduce the vote for traveling expensea and rasistance under the Department of Public Werks from 32,000 to $\$ 1,000$.

On page 9, the vote for fuel and light for publle buildings is increased from $\$ 18,900$ to $\$ 21,750$, making a total of $\$ 2,860$.

On page 9 also it will be seen that there la provlaton for caretaker for the dopartmental building at Harbour Grace st $\$ 150$; a firemas at $\$ 135$; requinites \$40, and clock attendance \$50: total 337 T. There is also provis ion for the departmental building at Grand Falls, a keoper at $\$ 360$, and requisites at \$40; similarly at Bay Roberts, a keeper at $\$ 400$, and requisties 840. In the Musenm Duiflias the salnry of the firemnn, Mr. Woods, for fmcrensed from $\$ 420$ to $\$ 540$, malcing a total frerease under this head of 31,325.

On paise 2, aftath, wee reduce the vote for repatrs to public buildinge from $\$ 33.000$ to $\$ 10,000$, thus eatting out $\$ 23,000$.

On page 10 there will be found a statement of the existing penajon Het. The decreases are Terence MacNamara, one-tlme keeper at the Lanatle Asyium, 8350; Willism Reeves, light.

Keeper, Garnish, 3100; A. J. Crocker, sub-colloctor, Catalina, $\$ 300$; Biwward Walsh, SL Lawrence, $\$ 87$; E Dicks, Hehtheeper, Boar Istand, \$240; Mark Rowsell, Ifrhtkeeper, Cape John, $\$ 240$; Mooney, 810 , These deaths repreaent a totnl decrease of $\$ 1,327$, but there is un turrense of $\$ 4,058$ for new penalons. New penslonurs begin with Kate Rotan, attendant Departmental Buflatig, sso; John Barnes, warden, Lumatle Asylum, $\$ 350$; James Dealet, Lamatle Asylum, $\$ 400$; Pat Houllhan, Lsthtkeeper, St. Mary's, \$400; Thos. Ryan and Tim. Brien, of Agricultural Farm, $\$ 500$ and $\$ 100 ;$ George A. Moulton, pointmaster, Carbonear, $\$ 500$; George Lilly, Magistrate, Trinity, g700; J. Elliott, Hghtseeper, Chunge Pilande, $\$ 200 ;$ and Patrick Ciristopher, late tuate S.S. Fiona, $\$ 520$. The total penslons for next year will, therefore, bo $\$ 22,017.31$, agatnat $\$ 13$, ge6.31 last year, an incrense of, say, $\$ 2,351$.

Under the heading of Admintstra. fion of Juatice, on page 13, we reduce the travelling and other expensea of Circult Court by $\$ 1,500$; the cleaning of offices, etc., and the cost of other attendants, coa1, etc., by $\$ 1,000$, maktimg a reduction of $\$ 2.500$.

On page 15, Constabulary, we decreane the total vote hy $\$ 1200.18$. The yote for salaries is decreased $\$ 70$ owing to rearrangementa. As hon. tuembers doubtteas know, the conatables are paid on a sliding scale. their wases fincreasing with their years of eervice. Some of the older tuen drop out and younger onea take thetr pluces. In annmities there is a reduction of, say, $\$ 1,150$. The Head Comptables on the Active list are re duced to five by the rotirameat of Mr . Pattem, of Twillingate, and he gets a pension at \$450, but five peasioners liove dled during the sear-officers Corbott, at $\$ 375$; Grant, at $\$ 342$; Furrell, at $\$ 352$; March, at $\$ 300$; and

Winslow, at 3280 , reducing the total for annuities by $\$ 1,189.38$.

On page 17 , Fire Department, there If an Increase in the vote for stremen's salaries of, sny, $\$ 1,050.00$. Last year, it may bo recalled, the Muntelpal Councll offered an extra $\$ 1,000$ a year to ebable the salarles of the firemen to be increased somewhat, and the ollaing acate oporative regarding the constables slso applies to these men. For unfforms and accoutrementa we add $\$ 481.00$ to provile them with now rubher coats and uvercoata, the last aupply having been given them five yeara ago. These are the only changes and the effect is to tnerease the total rote by, say, roundly. $\$ 1,500.00$.

On pago 30, Lanatto Asylum, $\$ 350$ is provided for an extra male attendant which is fonnd vary necnsary: $\$ 2,000$ more is added to the vote for cuppties and rations; $\$ 400$ to the vote for clothing: 3800 for ineidentala and medicine, while for fuel and light there is $\$ 1,000$, making a total increase for the Lanatic Asylum of $\$ 4,050$.

For the General Forpital, same page, $\$ 1,200$ is provided for a house physician; $\$ 180$ ar agatnat $\$ 150$ for a kittchen helper, formerly a boy, but now a man; $\$ 480$ tor a laundry foreman, previouely paid out of maintenance; and $\$ 180$ more for firemen. The vote for rations has to be fnereased $\$ 8000$, from $\$ 25,600$ to $\$ 33,500$; that for medicines, wines, spirits, ete., is increased 3200; that for clothing and berding, etce, \$100, tund sundries \$150; and the fuel and light vote also has locreased 38,000 , making in total increane of $\$ 18,840$ for that Institation. 1 might asy that the very larise Increase fn the size of the Hospitel and the new bulddings that have been add. ed and the improved equipment have nill involved as steadily growing increase in the cost of this Institution; and this has been speclally voteworthy In regard to the leating and Hishtings.

Tho amount now provided for this purpone te only what has actually been spent for the past year or two, the roto being $\$ 5.009$, and the antulal outlisy nome 712,000 , and the amount cannot be reduced, empecially fin view of tho facreased cost of coal of late years.

On page 31 we peat turn to the Poor Asylum, whare $\$ 110$ ts provided to increase the pay of the male attendants, one belug ralsod from $\$ 350$ to $\$ 300$, and the other from $\$ 270$ to 5330. The maintenance also calls for an addition of $\$ 850$ to the roto for rationa; $\$ 80$ for clothing and beddlag; sud $\$ 100$ for nunctrles, etc., whlle fuel and Hisht calls for $\$ 300$ more, making a total increase of 81,440 for that institation.

The laxaretto at St. John's enlls for $\$ 150$ more for canlatenance and nup plies; $\$ 50.00$ for melicincen and disinfectants; and $\$ 50$ for clothing, a total trerease of 3850, arlalag from the increased cont of requialtee of late years.
We next turn to Agrieniture and 3 itnes, page 42 , where we reduce the Eupplies for aurveyors from $\$ 8,000$ to $\$ 6,000$, and atrike out entirely the vote of $\$ 15,000$ for exploration of conl areas, thus reducing the total vote by $717,000$.

On page 43, Marine and Fisherles, we reduce the vote for dredging from $\$ 15,000$ to $\$ 13,000$, having found that onis the latter amount whe epent lagt year.
Under Roads and Brldgas, page 47. wo reduce the vote for main roade, bridges, engtneerthg amit inrpartion by $\$ 10,000$, and that for winter coastal poads and campa from $\$ 9,000$ to $\$ 1$. 600, making a total reduction there of $\$ 11,500$, bit there is in facrease tn ferries of 3247 , which matress the net reductions $\$ 11,255$, the increase being due to alterationg in forries und now ferrles being provided. I will not go into detalle of the ferry votes, but if
any hon. member desires such informstion, I shall be glad to furnish bim with it

On page 52 we deal with Poatal and Telegrapha, Under Ceneral Poat Ofrice and Money Order Office, there is no increase in the cotal. Junior hands are replacing older men and $\$ 160$ deducted from the new clerk, now a boy, is distributed between the assistant secretary and the stenographer. In St. John's Fost effice dístribution branch, there 18 no change in the total, but owing to the death of Mr . Collins, three stalaries are rearranged.

On the next page will be found the voten for travelling post offices. Thiere are now two additional junior clerks in the crosarountry service; that is, there are now seven whers there were only five, mating two mall clerks on each train. All the juafors receive only $\$ 400$ enci. In the case of Bona. vista, too, one is a sentor, and one a funtor. On the Trepassey and Heart's Content branches, Junlors only are provided for. AB to trip allowances, twelve olerks receive $\$ 3.25$ per week each. Under Outport Postmasters, pago 54, it will be seen that Bay Roberts is ralsed from $\$ 240$ to $\$ 600$. The town is now a cable centre, a new pubilic bullding has boen provided, the post office has been installed there, and an offichal appointed whose sole duty it is to deal with postal matters, At Bell Irtand, thio asatstant at the mine, a girl has been Increased from $\$ 100$ to $\$ 144$. In aome cases it will be seen, as membera go through the following pagee, that offices are increased by $\$ 12.00$. This occurs where the poatmaster has also to attend to a tolephone.

Carbinear has a redistributhon of salaries by which part of the former Poatmaster's saiary is divided among three officfals. Ferryland gets an assistant at $\$ 40.00$, thif being mocessitatod by the fact that Ferryland is now the erossing point for the Southern

Shore trains. Rose Blanche is increased from $\$ 70$ to $\$ 140$, owing to thereased business an a reantt of its being a centre for the batulk fishing vessels.
On Labracor, page 5f, Emily Harbour and Smokey Tlekle show an inercase of $\$ 2,00$ each, due to an error in the part. Makovili is a new part of cath, and fed Bay is used in summer and winter both. Hence the increase from $\$ 10$ to $\$ 20$.
The votes for courler routes contain alterations in some 30 or 40 of these, melking a total increase, as can be seen ou page 74, of about $\$ 2,000$. whitith is a very smatl amotint tir velew of the number of clanges that have had to be made. Theee have been fanderod nacessary by the siterations fin the steamer and train routes and fncreased services I am not dealing with them in detall, but will be gind to supply nay member with full particulars regarding any routo he may wiah to be informed upon.
Under the heading of Steam Subsidies on page 75 , we strike uut altogether the rote of $\$ 800$ for a stesmer on Hamilton Inlet, and we reduce the vete for Labrailor steamers from $\$ 55$, 000 to $\$ 45,000$, making a total reduction In the Stenmi Substily Yote of $\$ 18,800$.
On page TE begins the vote for the Telegraph Dopartment, and in the oentral staff at St. John's there are some re-arrangements, older officers belng replaced by Juntors, and there fs one new official at \$180, while the typlet recelvee an extra $\$ 50$ and this office tenders $\$ 200$ extra. As to operators outalde St. John's, I will deal with the more important, Aguathuma, ur the lime quarry at Port au Port, has an operator at 8240 , this being an importsat station, as the D.L.S. Co. does \& lot of business there. Bay Roberts is rearranged under two votes. Brigus gets $\$ 60$ for an assistant. Eroolttield office is cloaed, and the
vote formerly paid two anslatants at Clareaville, \$120, is transferred to Hilview, The Grand Talli poteu are now nrrangelt for four ofticfnta inetead of three. In Hiliview the apparent lincrease of \$129 is really only ttunstarred from Clarenvilla assistant. Thin office at Jersuy Side. Macontia. now only carrioe $\ddagger 440$ instead of $\$ 300$, the ditrerence golng to the operator on the Placentia townside, both of whom are now pald ailike, King's Foint is now reduced $\$ 40$, as a lady operator ls employed. At Lamaline an aselistant the provifed. At Norrlis Dolnt there is an apparent tacrease of $\$ 130$, inut for years this has been paid as a board allowance. Placentil ir covered by the romarks as to Jergey stide. Point Leamington is deereased from $\$ \overline{6} 60$ to $\$ 180$, as the operator is now a soung sitr lustead of a man Prowneton fa now a repeattrig offlce. Ramea is now a repenting ofice, and the vota is $\$ 426$. Spath turde Bay la increased $\$ 150$, being inf importint offce, At Springdate the operator is now in man instead of a siri.

Turaing now to page 31 wo flind the Cuitomis vote, which to the same as lust yanr. There are, however, some re-artangementis, entirely in the proviston for outport collectors and in the vote for gunger, thewaiters, nind boat men. Bay L'Argent becomes a selw Cuatoms part, having been Gap etted in Juaury 27th pust, but no matry exrept ftre per cent. on duttes Is allowed. Chanes Islends was also enade a port of eatry on the 15 th of funumiry with in natary of $\$ 260$, thia beins: hovever, traniterned from the vote for thewniltera to sub-collectorse A) Greenspond the limit is ralsed from $\$ 2060$ to $\$ 800$, while Codroy to reduced to the effefnat foc of 9270 agntnst 7360 poled lant yoar. Harhour Bullett is now included an it Customs port, thugh peevfoualy not mentionad, although ah entry port eince 1897, Lite

He Bay inland is now substituted for Plley'ia Lsland. The limit at Ataryi: town if tucreaseil from $\$ 050$ to $\$ 800$. Millertowa is tranaferred from the sauger clasa to sub-colloctor clasa. Presque is includad, though heretofire not mientlosed. Rase Btanche Imit to mined from $\$ 500$ to 3600 , and 8t. Gnorge's from $\$ 600$ to $\$ 700 ;$ whlle Spanfurd's Bay. Guretted on Recond of June last gote at salary of $\$ 420$ The total vote for aub-collectora is thus Incressed by $\$ 3,050$.

The sulh-pote for gaugars, etc, stiana Boanalista with two men at $\$ 240$ instead of one man, thas placing the two on the pay list, one being prevfously pald out of supernumerary vote. Ghange Lilande to $\$ 360$ ts tramnfarred to sub-colleatofy als atnted alrandy Fogo, one man is placed on the pay roll, transferred from superrumerrilen At Lamaline two men, ono nit $\$ 390$ and another at $3 \Delta 40$, both befar 3ajo, are now plnces on the pay foll, the tranater bethg made from mupernumermrles. Millertown, as atready stated, is transferred from subcollectors. The zub-vote for saugers. tudewatteris and botitmen is decreased by \$030, and that for outport eupernumerazies la reduced from $\$ 2,000$ to 31.580. There are changes in the percantage on dutlen, the vote beling reflueed from $\$ 17,000$ to $\$ 16,580$, in view of posulble decrenses in fmporis of sittalite antleles, and this aquares the roté for this Department,
1 do not propoue to aek hon. memborit to further cousilfer these estimetes this affernoon. 1 have arranged for 1 Iy explanation to be published in the netwopapara to-morrow and thus tive the Hotise an opportuntly to conBiler them more Intelligently than *outd otherwiee ho poesible, and I therafore move that the Houne rine and report progresa mind ask leave to fit ngala on Thursday afternoon, if that date will sult my hon. friends oppasite

MR. COAKER.-Last year the Gorermment promised that there should be a rearrangement in connection with Postmasters' salaries and a commission or an inspector was appofnted to go into the matter. Is there any report to table in that connection?

HON, COLONIAL SECRETARYIn answer to the hon. member I might say that in compliance with the promise given last year, the Goverament appolnted Mr. Mercer to classify the different post offices all over the Islend, and he has been engaged in that work since, I think, July last. The work has been materially delayed owing to the fallure of certain outport post offlicea to send in information asked for, but on enquiry from Mr. LeMesaurior the other day as to what positton the matter was in, he told me that Mr. Mercer was now about completling his work; that he had all the returns in except very few, and hoped within a wook or two to have the whole thing finished. When the report is ready I will have very much pleasure in laying it on the table of the Honse. As to the nature of the recommendations which will be made 1 cannot speals at the present time, but we realize that to deal with this matter thoroughly will probably mean constderable research, even after we get the report, and also a considerable expenditure. I feel sure that the report will show that it won't be a cuee tion of reduction; on the other hand. we will prohably be asked to increase salaries in a great many cases. 1 nm not in a posilion to say whether the Government will be in a position to deal with this matter during this sesslon or not, but it is being attendC1 to, and as soan as Mr. Mercer's report is finlslied it will be tabled.
MR. COAKER.-I am very glad to accept the explanation of the Colonial Secretary, but 1 would like to have some sort of repart before us by the time we get down to the Postal Es:
timate6. I don't wish to euggest that any fincreases or alterations should be made this year. I would merely like to have the report. Now, when are we to have the report of the Hospital Commission?

HON. COLONIAL SECRETARY.I may bay, Mr. Chairman, that the report of the Hospital Commission is in the hands of the Government. It is being printed, and I hope to-morrow to be in a position to lay a copy on the table of the House, for each member. It is a very important report, and the Goverament desire that the utmost publleity be given it, and for that reason it was thought best to lieve it printed so that each member have a copy.

Mr. Speaker reaumed the chair.
The Chatman from the Committee reported that they had considered the matter to them referred, had made some progress and asked lenve to slt again on Friday.

On motion this report was received and adopted and it was ordered that the Committee have leave to sit agaln on Friday.

CUSTOMS BILL.
Pursuant to order and on motion of Hon. Minister of Finance and Customis the House resolved fteelf into Committee of the whole to consider the Bill, "An Act to Amend the Cus toms Act, 1898."

Mr. Speaker teft the chair.
Mr. Parsona tools the Chalr of Committee,

HON. MINISTER FINANCE AND customs.-Mr. Chairman, at the becond realing of this Bill a few days ago I explafied its object. We were aslced to make the amendment by the Board of Trade. It was found, particutarly by the importers of goods, that grods were brought in from time to time, put in sufferance warehouses, and allowed to remain there for weeks, and in some cascs months. What is aeked in this Bill is to give the Cus-
tome power to remove the goode after a certain number of days. What happoris if thitr: A stonmer amtivas and tands goods, whlch are put in a sufferance warehouse. After five days, If the goods have not been taken posression of by the owner, the Curtomis can go down, take charge of the goods and have them removed to a bond store. The cost of removing the goods witt be chargot to the owater. Then If they are not remoyed withtn a certain time aiter haviag been piaced in the bond atore, the Customs are empoward to sell them, dedact from the proceeds the charges, cost of remoral, storing, \&e., and pay the balance over to the owner.

At the present time the goods are aflowed to remain in the sufferance warchouse ten days. The result of thit to that a itcomer arrivea wat lunds certain goods. The goods are allowed to remain in the warahouse for ten days. In the meantime, say after eight daya, another ateamer arrives, and her cargo is piled on top of the other. Then when the owner of soods which arrived by steamer Na, 1 comes down to tolke dellivery of them he flinds that the eargo of stearmer No, 2 has been plled on top of them, and he cannot set them: and this fins meant a lot of fisconventence and troubte:. This amendrient was particularly recommended by the Board of Traite, and It seems to me to be retisonable.

MR. LLOYD. -1 wrould like a little more information, to this change likely to alfect a large quantity of goods? is It posisthte that tha Government mift be called upon to atore in warchonives zarge quantitiog of goode?

HON, MINISTER FINANCE ANID CUSTOMS.-Well, cacal ? they are-
MR. LLOYD. -1 was: in know if it is Hikely?

HON. MINISTER FINANCE AND CUSTOMS.-It may be

MR. LLOYD.-Have you warehouse epace to do that?

HON. MINISTER FINANCE AND customs.-We have.

MR. LLOYD.-WII there be any expenie to the way of providing warethouses or in any other way?
HON. MINISTER FINANCE AND CUSTOMs.-No. The expenses of all goods that may be removed will be charged to the owner,

MA. COAKER.-Mr. Chalrman, the coemin to me to give the Farncers Withy peoplo and Harvog \& Co. and the others the cliance to fleece Water Street. These men find that they cannot make enough money ofl the trade now, and they aimply esy, we will reduce the time within whlch goode mast bo taken from ten days to five, and after tive days, if goods are not taken, we will put them in a warehouse and charge hire on them; and then wo can sell after thirty daye, if they aro not taken within that time. Suppose I had at thousand barrels of flowe arriving. That woald coat a lot of money, and I mistt have to make arrangements with the banke to got that flour from the whart. A thoupand barrels of flour cost a lot of money, and it must be pald for before I ean get it from the whart. I tave a bill bere from Harvey de Co. for 100 barrels of bees! Imported for curselves. Wo had a bill from them for no less than $\$ 6$ for removing the stulf and 82 for storage. The total Fhartage that Harvey and Co, gets amountis to about $\$ 30,000$. Why do theso poopto charge for storage when they lanvo abundant room? The amall er man cannot draw on the bank to Eet delivery of lise goods as soon as the men with blgger means, it should not be toterated. The Board of Trade ir composed of euch people as Harroy E Co You bave not consulted the buninees men of Water Street in this mattor fut the men of the Board of Trade, who do it all.

HON MINISTER OF FINANCE A CUSTOMS-Mr. Chatirman, there may be a littlo In what the hom thembor for Twillingute han sald fut I do nith the it Harvey \& Ca, have meked us to see what we can do, so thant paople will not lroep their frelght in thel promides. When one eargo is dutmped out on trip of another eargo wileh has trevfounly arrived, it is very hard to get the cargo which ap rived flrit. Seven daga ta whint we allow.

MR, COAKER-I say it is not a aenallite propedtion. It ought to be elglit.

MR, HICKMAN-Mr. Chalrman, I do not. whith to criticlse thits bill, but 1 migree with in great deal that the mecuber of Twillingate has said. When a steamer comen in with a lond of goots she nluo hat a eargo to teke on boura, init there fa as tit of trouthe If the cargoen are not so arranged that there may be no trouble. Some of thene people who represent iteamatifi coupanfer haile thefr own goode, and crowd out the soode of other people So I think that the time ahould be extended to meet the requifementa of the trafo.

RT HON. PRIME MINISTEFMrn Chatrman, the hoil member is hiot correct when led atater that thete Ditt In mennt to accomoitate two or threes man. Wo have been asked for the last two or three years thy the Hoard of Trade to bring in this bill. whit It la only after notie years that amel a lifl whe brousht in The mat tor lint nothing to do with any requent on thie piart of Harvey of Co., or Stien a Co. The trouthte te this, that tien a carmp of A steamee in landed at shat \& Co.'s poople who leive thetr Enodn thera tlock the why, and other resjofe vecimith thim way ti olietruct. ed saaniot get theles in turn. This has boen representid to the Government rghin and aguin by the Board of

Trade whilch represents the whole country, and the trouble affects erery clisit ot importer and exportor in Newfoundland. What interent has the atinister of Pinance in Introducing thls bll? We liave ao Interest in serving tho Board of Trade, Under thits bill a ruan le giveni five daya to take bis goodr awhy. But 1 think that it woint bo rlght thist it he could not get his goods out within that time he might have twenty dayf. But whon his goode are thare for months and bie will not take them out, and obstructe the mati who is trying to get his goods; that is another matter. This bill was recommended by Mr . LeMessurior the Asslstant Collector of Customs, who liss no interest in lurting any man sich or poor. We have to look at the other alde where the whole trade miny be held up by The man on the outilde; now is not thle a stmple way out of it? His goods are conveyed away and he fa charged a moderate rate for storage.

MR. COAKER-Mr. Chnirman, the Premier gays that mome remedy must Be found, but he does not know anything about it. You are Elving tho monopoly to these few men. It seoms that we, on thils slde of the House, don't know anything but you kaow it all. What do sou know about it? You are not an importer.

RT, HON. PRIME MINISTERI thithts that I know as much about the fuster air my hon. friend.

MA. COAKER-You EO down thero glong the streot and get fifty men find any thit to them, and I will withcraw what 1 heve mald. Harvey \& Co, are all rikht but they must not have complete charge of it nill. Make it sight fays or don't malte it anything.

MR MORINE—Mr Chatrman, I think that 1 lonow an much ahout this hill ais any tann here, although I am tipt an imparter, for 1 do not think that it if nenesuary to be in importer

In order to know anythlige aboot the matter. In a recent meeting of a ank: cotmmittee of the Board of Trade, composed of Measra. Charlea Ayze, Monroe, Mokny and Gosling, who why the only repiresentative of Ham vey \& Co, a requeat of Mr. Goallag. relating to this bill whe refused. Ho thought that it goods rematned in thetr atore more than tive days, Harvey \& Co ohruta be enttitst to charge etorage. But the Beard of Trade thought that that would tend to Induce Harvey's to keep the stufl in the warchouve. That will krow hat Harray \& Ca had no undue intluenes in the matter. The subcommittee eent that report up to the general committee of the Board of Trade, and it was cousidered up there. When goods wero plled is these sufferanee warehousen, people did not trouble to take thele stuff eway from it, not because they had not the money, but because thoy were too lazy or did not want the goode tmmediately, and the reunlt was that another steamer came in and pited ita eargo on top of what was alrendy there, Conseguently much trontle onsued from the piling up of these goods, one on top of the other, and the owners of, the earlier cargo conld not get thelr goods. It wail pofnted out that it was the duty of the importer to take thetr goods ont of tho Wurehouses withtn a rear sonable trme it was not an unfalr thine on the part of the steamer owira ers. Wial refercuce to the statements thet have boen made here about Fhart age, nat which to tiot come foto this bIII. I do pot think that whartige ig 1 logal charge. By what right cea thoy chacre wharfage when the law does not permitt them to make ware botne charges? When goofe are plac ed in suffernnce warehouses it is as If they wore at's on bourt the shlp: you are onl; as it were treasterring goods from one hold of one vessel to
another. It is a imere condut if is fald that the Furnens Withy peopland the Harvey people have other itares upon therr promises fin which they can put their goods, It there is sufficient room for the carko, then why is there any need of pliling one cargo on top of another? And if the Furness Withy Co. provided a store, why whould they not be pald. I think that this polnt ought to be made clean.
The warehonse ought to be always large eacush for it least one cargo. II may bo true that goode flow through nil the time, but nevertholess there should be nufficlent room for the soode.
The troublo in lut caused by the sman men, but by the big men, and I belleve that it ts these blgger men who block it up rather than the smalter men; thas hloderlig the whole trade, 1 wish it to be remembered that when I speak, I do so from the ktandpoint of a man who has no pervonal interest in thla matter at all.
HON, COLONIAL SECRETARYMr. Chairman, I do not proteas to lanow very much about the matter before the Chair, but I have a certaln fnturest in the bill. I occasionally fmfort in a small way.
It appears to we thint in the past the great difflulty has been not Fith the mas that remored lis goode fin five or savan or ten days, but with the man that left them there for three or four months and cansed a great deal more trouble than at! the rest put tognther. It is a well known fact Is tois country, I think, that certain people tmport articles such as flour fnd tes nnd uugar, and have no means of storing them whaterer, and they take advantage of these steamehip Warehousse and let those goods remafli there until they can dlapose of them theroby hindering the proper cfreulation of trade when it comes in.

Now, I think, that whilst thie Bill will obriate a great deal of untairness and unfair advantago that these people may have had over ordinary traders by providing facilities whereby some authortty can come in and move these soods at the expense of the owner, I think we may be inelined to err on the other side, I have knowledge of people here who may get goods, and these goods may arrive on Saturday or Monday, and they may not get thelr invoices for three or four days, as they are not in a posfition to puss for the soods without thelr finvoices and I understand the Government are not favorable to gtving them bight entry for goods that arrive here. They may get their involces by mall and the malls may be delayed by a block on the line or some other cause. For this reason, I think consideration might be given to a suggestion that the time be extended beyond five days. I agree with the principle of the BIII, and I think trat the whole trade will be relieved of a great fnconventance. I know myself the fnconvenlence that many of these parties have been causing. You have to go down there and bundle over atuff to get goofs belonging to you and some of the stuff that you are turning over has been there for a month or sis weeks or two monthe. I think this Bill will affect the remedy. I would suggest an extenslon of the time tor a longer petiod than five days. I think you might make it seven or etght, bocause partios may bo greatly inconventenced owing to the nonarrival of Involees or other reasons.

MR. KENT-1 thlok there should be some provision for the publication in the Royal Gazetto of the Rules and Regulations referred to hero.

MR. MORINE-A matter has fust been drawn to my attention that 1 would like to speak of. It has been
noggented that in the past by an arrangeraent between owners of aufferance warehounes and importars of goode, goods could could remain there by paying storage. When you make your regulattons you ousht to have A distinct prolifition in it that there shall be no storago charge for any goods remaining in these warehouses. The Premler 1 am zure will see the reason for that. You cannot have these warehouses blocked up by the owners and importera of goods makIng these arrangements. I know that there was an attompt made to get permission for thls in the Bill, but the Committee was atrongly opposed to it . That ought to be in the regula: tions.

Mr. Speaker resumed the Chalr.
Mr. Cbairman from the Committee roported that they had considered the matter to them referred, and had passed the Bill with some amendment.

On motlon this report was recelved and adopted and it was ordered that the Bill be read a third time on tomorrow.

## ESTATE DUTIES BILL.

Pursiant to order and on motion of Hon. Miniater of Finance and Custome the House resolved itselt intp Committee of the Whole to conntder certala resolutions in reference to the Impoaltion of dutles on the estates of deceneod parsons.

Mr. Speaker left the Chatr.
Mr. Parsons took the Chair of Committee.

MR. MORINE-What is the Rt. Hon Premier golige to do about that defiDition clause?

RT, HON, PRIME MINIGTER,-Let it po as it is.

MR. MORINE.-Well I want to point out the absuritity of dolos that. The Promier has told us that this is practically a copy of the Transvaal Aet which was highly rocommended. Now under that Act the word Compnny
would not only mean a company incorporated is that Colony but any cormpany dotng business in that Colony. By leaving out the deflititon clause you make this Act inapplicable to a Company doing businees in the Colony that hrppens to the freorporated somewhere else, and the first ef. fect of that would be to drive every Company to get incorporated somu whore else fristead of here and paymg their fncorporation fees somewhere else instead of in this Colony becaune ai 1 have said before you make a eompany Heble if it is incorporated ite this Colony but a company doing bustneas here but not Incorporated here in not liable. That is absurd. Now if you put in mo interpretation clense the same aa whas done in the Transwaal Act it would be all right. Of course the trouble with this Act is that part of ft war triken from tho Tramgval Act, an lmportant part of that Ac: loft out and worde which refer to that lett in. Now there is no renson why thle deftaltion clavise shoutd not go th. The Premier, last night mrgued that thls Aet applied to every kfod of Company dolng Dusinces in the Colony.

## RT, HON. PRIME MINISTER-1 nadd "ehares,"

MR. MORINE,-1 ani talking about shares of a Company whether it $4 \pi$ incorporated tnside the Colony or not. By lookias at the Transvand Act yon will seo that it applles to the shares of Companies no matter where fncor: porated if they are dotng busficen there It turned out last night that this was left out of thle hct withoust the futention of the Government at all. Now 1 am drawing the Prenter's at. tention to kanother sirloas omisolon and it is not falr to this Howsen bos cause the solleltor did not put in this definition clause the Government should fnstat on the Bill golng through
as it stande, when it is a manifest alosurdity.

RT, MON. PRIME MINISTER-I want to aswure the hon. gentleman that that in not tho intention at all. The difference exista simply because the law officirn of the Crown are satfafled that the Bill is all right as ft athinds.

MR. MORINE.-Who are they ?
RT. HON. PRIME MINISTER.The Atcornes Generil, the solicitor of the House and those who are reaponafble for the measure; and so far an 1 vam capoble ot judging I should say it is ntl rizht. However, thare is na desire of forcing through this proposal and I do not think that the suggestion of my hon frient would impatr the thenvure, and consequently 1 have no oljection to putilig to the clause suggented. We want the Bill to be as perfoct as possible; but that clause was deliberately and intentionally left cut.

MR. MORINE.-It was loft out for this reason. The solicitor of the House told mo he left it out because he did not thiak it fair that a company not frocorporathd here should be made table
RT. HON PRIME MINISTERI-I oalif detiberately left out.

MR. MORINE.- Yes, By the aoticlor of the House. But arter all thia is fiot a mere question of putting in worde. We are the resjonsible partIns and not tho law officern of the Crown and the polloy behind leaving this clause out is that it leaves every Company dolas business, In the Colony ind not incorporated in thla Colony putside the limite of the Bill. Now I submit that was not the intention of the Government at all.

RT. HON. PAIME MINISTER.-I have stated that it was deliberately toft out.

MR. MORINE-Yes, but not by yourself. Now th order to make this

Act a copy of the Transval Act it only requires that this defination clause be put in.

MR. KENT.-It appears to me it to merely a matter of intention as to whether the Goverument is to Include these companies or not. If it is the Intention to include thse companiesand I thlnk from what the Prime Minfater hes said that it is -then in order to earry out his own intention thil definltion clause is necessary.

MR. LLOYD- 1 don't know whether it is the intention of the Government to put in this definition cinuse or not.

RT, HON, PAIME MINISTER.Yes.

MR. LLOYD. -That belng so the whole matter is practically setted. I take it the principle of the Bill is that in the ease of any one intereated in a company, although that person dees not reside here, If the actual property is here then the something should be paid to the Tronsury. If that is so the question of where the Company ts incerporated is absolutely irreievant.
Mr. Speaker reaumed the chair.
The Chalrman from the Conniltees reported that they had considered the matter to them referred, had passed the Resotutions with an ameadment and recommended thint the pill be introduced to give effect to the same-

On motion thie report was recelved and adopted ant the But entitlod "An Act to Amend Act 5, George V., Seasion 1. Cap. XI., entifled! "An Ael to increase the Revenue by the Impouition of "Certain Butses on the Fis tates of Deceased Persons," was read a first time and ordered to be real a socond time on to-morrow.

## NOTICE OF MOTION.

Re. Hon, the Prime Miaister gave notice that he wroutd on Tuuraday move the House trto Committee of the Whole to constder certatn rasolutione in relatton to an ngreement entersed inte by the Government of this Col-
ony with the Newfoundland Products Corporation, Limited.
It was moved and seconded that When the House rises it adjourns until three of the clock on to-morrow. Wedneeday, afternoon.
The House then adjourned accordtingly.

## WEDNESDAY, Apri1 21, 1915.

The House met at three of the clock In the afternoon pursuant to adjournment.

## REIPORTS TABLED.

Hon, Minfater of Finance tabled the following statements:-

Fubllc Works Trust Fund 1913-14 Ronds-Local, Main and Special.

Ratlway Arbitration Awards, 1914.
Old Age Pensions Expenditure year ending June 30th, 1914.

Hon. Colonial Secretary tabled:-
Report of the Postmaster Genera! for year eniling June 30th, 1914

Report of Commisstoners on General Hoopital.

Report of Registrar General of Births, Deaths and Marrlages for year ending December 31st, 1914.

## QUESTIONS.

MINISTER MARINE AND FISH. ERIES.-I beg to lay on the table of the House answer to a question of Mr. Jennings.

HON. COLONIAL SECRETARY.I beg to lay on the table of the House answer to question of Mr. Stone of the 14 th $A$ pril. It is a long question but this in an answer to Subeection "F. 1"
MR. GRIMES gave notice of ques tion.

HON, MINISTER FINANCE AND CUSTOMS. -1 beg to table, answer to a quisetion of Dr. Lloyd.

MR. COAKER.-I wish to nsk Whother it is the intention to table the eviftence in the Hospital Commlesion?

HON. COLONIAL SECRETARY. Not at preaent. We shall conslder that matter later. There is no objecHon to your ronding it it is doze entiraly in the interest of the tinatter. tien.

MR. LLOYD.-I may say that there Is no objection whatever to Mr , Canto ar seeing ft , but at the preseat thine it is undeairable to publish it.

MR. STONE,-I would like to call the attention of the Covernment to the fict that my question of Aprit $18 t h$ han ant yet been answered.

RT. HON. PRIME MINISTER.-I think I have Gat information here. I bog to table tt, Mr. Speaker.
MR. HALFYARD gave notice of queetion.

MR. ABBOTT gave notice of ques tion.

MR. JENNINGS gave notico of question.

## CUSTOMS BILL.

Parsuant to order and on motion of Hon. Minleter of Finance and Customs, the Bill entitled "An Aet to amend the Customs Act, 1898," was rend a third tlme and passed, and it was ordered that it be engrossed, being entitied pas nbove, and that it be sent to the Legislative Council with a message requeating the concurrence of that body in the proviaione

## TEMPERANCE RESOLUTIONS.

Pursuant to notice and leave granted, and on motion of Mr. Hickansh, the House resolved itselt into Committec of the Whole to constder the following resolutiones -
(BE $1 T$ RESOLVED.-
(1) That the Importation and Sale of Spirituous Liquors and Wines be prohflited.
(2) That the Manufacture is the Cciony of Epirituous Lileurars nne Wines bo protithitel.
Mr . Speaker left the chair.
Mr. Parsona took chair of Committee.

MR. HICKMAN-In introdueing that Resolution, Mr. Chairman, I do wo with the object of stamping out the liguor tramie, whleh has been so diehatrous to thts country. 1 am not a teototaler myself, but 1 adrocate the adoption of that mearure for tho benefit of those who cannot help themzelves. When I first gave notice of thlis motion, I had planned to make it a totsi prohibutlou mensure, but ater hearling others discussing it, 1 thought ft would not be advisable to introduce It as sach, so we declied to take out one clatuse, that which affected the sale of light ales and beurs. This disis done not becanse I an not in tivour of total prohibition, bot be: catike itu preseot was rot conaldarad a miltuble opportunity to press suvih dramtic tesistitton

The object of this Resolution (for this If a Resolation and not a Bill,and the Bill can, if the Fotise pleases, be made a Total Prohlbition measure.) wan to have introduced into this House in bill whieb would go further nloas the same fines as the fegisfation anked for last year.
We find that Eussfa, which is not gis far advanced in efvlization as we, fies emneted legfatation to stop the zele of Voilna; that France has adoptof a temperance measure to suppress the sile of Hguors; that Total ProhtBition mensure is now nufvented in Sweden to cut out the use of alcoholic liguors $A^{\prime}$ great many people will say that to grant Total Prohibition tow woutd be tnterferfing with the
 where we stand in connection with this- matter. If a scourge of emanlpous, Alththerla or Scatfet fever cime to thife country or any settlement of it, the Government would immediately talke steps to quarantine the infected bliness and take stringent measures to put an end to the scourge, regardless of illerierence with anybody's rights: and where is there a greater scourge
thun Hguor? A few will sulfer indeed from loss of employment, and a few will lose the ineorue which they derive from this buainess bat they are but few fadeed and what will the Jotse of these fes be compared with the suffering of the wives and familles of druniten tusbunde. The stuff is no good; it ts fnfurfous even to the moderate drinker. You look nt a man of 70 who has boun temperate all his Iffe, and compare him with one of 60 who tiss been perliaps only a moderite drinker. You see in one the clear mye and upright figuro, white the habitual driuker presents the appearance of a thece of humanity miany years oller than hfa age. What can you expect from posterity? What can you expect from our elflitren if this drinking soes on as it is now? Who fill our public inetitutions, our Poor Asylum, our Lumatio Asylum, our Pobitentiary, bat those who are there ald a reatit of drink? Lifutor is the source of our economic troublef. A groat number of our laborers are addicted to the tratIng habit, with resulta on our economio condition that neither you nor I can estimiate. You cannot and I cannot calculate this, but it is in fact that nine out of tea of our vessele are ile layed in sailing from two to live duys by their crewn who juat as the vab sel ts ready to go, desert her and it is necenaary to call the police to hinit them up. These delays ctured by these drunken seamen are orten sersous and great expense comes to the ownere and captnins as a result. The delay often has the reault too of the vessels gettitug a poor markat for their fish.

I know from personal experience that there are, roaming about $3 t$, John's all the year round, tradesmon who are earning nothlige and who but for their intomperance would be earning trom $\$ 10$ to $\$ 50$ per week.

The one strong argument that will be raised by the Goverament is that
the revenue cannot stand the loss which it would suffer through losing theae duties. Woll, if this country ennot live without exneting revenues from the fmportation of liquars at the expanse at poverty, derradation and disease, it is not worth while being in the country, I doubt very mach if there would be a falling off in the revenue, and on the contrary belleve that it we had proltibition the revenue would be meraarei.

Thie tevenue from Hiquors annually amounts to about $\$ 347,000 ;:$ as $\$ 200$. 000 of this la maile up ia ozelse duties, the rivenue from the imported amounts to about $\$ 145,000$. The first cost of this Hquor fa about $\$ 250,000$ to $\$ 300,000$, but the men who drink thie fituif pay in the viennity of $\$ 1,000,000$ - $\$ 1,250.000$ for it Now, if this 81 , 250,060 was apent in groceries, provistoss nul clothing by a sober poople, the licome to the revenue would be, not $\$ 345,000$ but nearer $\$ 500,000$. or Approximutely $\$ 150,090$ more. Besides, what is the good of the revenue if we have the liuman wrechage it causes to put up with and support? The revenue afrorded by thia item of our tmports is not suffictent to keep up the inatitutiond made necessary by its importation and use; so in this conriection the use of Hequora is a distinct Ioses.

If the cont of the rumaing expenses of these public inatitutions for the past twanty yemre was totalled up it would be fonnd that the cost of these has burdly bean pald for by the moneys obtained from thill trailic. Last year for example, the vote for the Lunatic Abylam wat 848.000 , that for the Poor House 818.500 ; that for the Penitentiary $\$ 19,600$, making is grant total of $\$ 38,000$ spent. In addition to this there wis the sum of $\$ 40,000$ voted to the holp of thooe auffering from tubercuiosis, for mediciner, disinfectants and manh necessitten, No one will deny that this disease fo in thls Colony
und that it is a dimease of poverty and ill nourishment. A great many of the trinting muth und thetr famittes ard very pootly and improperly fed, clothed and cared for and their coants tutions are therefore not in a suitable coniftion to ward off the dilicase. Other people, the childrou of a drunken tather, are born weak, and are in no condition to face the dreadful dis(inte with tho Tomit thint they becoume victiman in their youth.
The Goverament will perhapa say that they have not a mandate from the peopto to tate uifs stop. But thay have it in the petitions which were presemied to this House last session, and I have since I save notice of this resolution recelved one petition itgred by 316 poople and another stgued by a large number of members of the Independent Order of Cood Templara, both fo support of this movement.

1 bellove that when this measure shall have been brought into this House and paasod into the statutes of ithe Colony, that a new era witl be opened up for the country, and that the people of the gencrations to come will, as a rerult be botter fed, clothod and efucated. I want to sisy before I finish that this is not a party messure, and that I have not had any party moeting in respect to thom, and to not know if the members of this nide of the Hiouse are going to support it or not. 1 have canvassed noboty, anid hirvs teft the resolution ontirely to the moral feeling of the membera of this House. I have great pleasure, Mr. Chalrman in introduethg thit recolution.

MR. MORINE-Mr. Chairman, 1 eecond the resolution.

HON, MR, EMERSON,-Mr. Chair mim, I hive tistonod with a great deal of interest to the remarks of the hon. rucmber for May de Verde in fatiocucture this rebolution, and I wrould Wike to make a few remarice concern$\tan$ the subject the has touched upon.

The hon. member seems to have athticipated the reply of those who would tut be able to see aye to eya with him ria thls momentous questlon which is tine having very far reaching consesuences especially at the present poriod of the history of the country. The newspapers which support this Tesolution have time and agaln roftorated the atatement that a great tesponsinfllty would rest upon those hon. members who would not support it in Its entirety, but I for one am guite propared to take full responsibility for the manner in which I ahall cast my vote concerning this Resolution.

The hon, momber has statod that we received the mandate from the peoplo lust year in the form of several petitions, and that these authorized this House to adopt auch a propesal as prohibition thle year. Now I take lasue with him and say that we have no enels mandate from the people, and that to cut off by one stroke of the pen the finportation of liquors would bo a bigh handed proceeding on our part.

If I remember correctly the petitione last year were upon a matter very different from the subject whtch we save under consideration at the prosent time. The petitions asked that Hiquor be prevented from passing tntu focal optlon distriets, and that the necessary machinery be provided for a plebiscite when tho people asked for it. Now that is not to miy opinion, a mandate from the people, and 1 am tiot liere to yote for this without havtog the majority of the voters of the country fivour such a course; for the conatitutlon of this country and the constitutfonir of every British country fisclare that our actions shan be gulded lay the majority rule. To vote in this House lhent llquor shall not be timported into thls country without the electore being firat consulted is in my opluition wroug and is one of the beat

Feasotas for not aupporiter the resolation. I do not admit that we tian the rarnitatio of the people of thiti coaltry to'puet this tirv, 1 wount ©i) further and asy that there has been so agitatton for the patat two years from anybody for total prohibtwim, int thit protihition tind not inebs ppoien watil notice of the resoldthon what Elvens iftnce the tart conerat ulection, and that it wan not then en the platform of any phits, Wus the queation of prohitifition a vital one at the last election, nud was it a plank In the platform of elther of the poltife it partiont fir thist ohit they potiment me foes?
1 do not asy that 1 am not In tavor of prohlbition, hut I believe in lettias the poonle have in voleo in the matter. The thatoally rule appiles in every hantliution In this country and in erery othen Britulh dependeney, and I Hotht trato it to thr peopte to dectio what thany want. This is one of my rcatonas; we have mo mandate from the people and our vote would not be the tirfocitty votis, whifith Ifi atceortiance with Dritinh custom io nocessary to pum lousialation. I phould be ouly too pleuned at the next remalon to cast Itr mote too in farour of the mensurn If in the fimentime the majority of the electors decide in its favour.

It if perfectly thue that the reverue of thin Catony woutt sulfer considerahly if this meanure somes into force bat if we lat the mandate of the peo pie I would not fear thly because I bellere that soant the purchisting pow at af the people would be sa improred an in a shurt thme th oweroomed the Iamediate Iowa. Hut, during thir war, now when we atreaty lave a large de fleit to races uad whee larke contrileitionn are brint turnet from busiyean channels Into fundn wuch an tha Patrintie and other fimfls ant the militarg expendtures, I Alink it would be decidedly riaky ith auels a time to
tur off frome the revenee rally a large ituicant as wn recelive frum the impIftarion of wince and limuork.

I nay then that the that le not op fortues, eves if "e ald have the mansdnter of the people to eeti=ny of the xermone away, I belicere as the hou. plamber tor Bay de Verde has sald, thut in time the decronse would be zunde up. but thin te not the year to twite the experimeat 8 Bo . Mr. Chatr. Thin, for the reanon thet the time for tol opportume from tho rovenun point of riew, and for the reason that we tive not the mandate of tho people, t. would net faror thls resolution on this oerandon. But 1 am prepared to vole for probithition in all its forms, W/thout asy exicettores shutsonver. frovided the people signity that anch fil thelr winh and destre.
I aptreclate evergthtig that Mr. Hickman luan haid with recard to atcolnt and tho efrocts 1 ngroed with flim whea hu may that but for it the lunatic anytum and crwole would not be filled, nar would dinesae be ao rife; Fad =e have seen of late years that the medical protesslon has held that Irom an medicinal point of view liguor fre bot of viry mach ratue, and is not fronoribed to the same extant has formerly - I underatand that in hospitain ite gie is rofuced almost to a minimum. There Ir no necesaity for mie to 80 fin . to thut question. I Foald vote for prohlhitint provided it mas brought to \#नNy uider the eircumatancea which I have murcentat, Before sittiog Alowa I may any that I sppreciate all fiat has boen mid by the fion, mumber for Bay de Verde in relation to this kuttor and ams sarry that 1 canoot *ee thy way clear to muport theser re solations at the prisent time.
MR. JENNINGE,-2It, Spenker, I Luve no hesitution vhatever in sup fertitur the reantutions wheh lave Been brought before the Hotise today. I do not do this becnume 1 ean
see farther than any other person th tint direction or because I clatm to Hinow any more about the situation. I rupport the resolutions on principle, 1 telleve the whole husiness is wrong: and contrary to the law of God, and an injury to mankind, and I am prepared to support any mearure which will tend to bring this evil to an end. I know it is quite casy to get up here and declaim againat the evils which liquor has brought about, and I don't intend to use any of the time of the House for thist purpose. I merely wifh to state my poastion in this matter. I believe in a higher power than even this Leflstature in matters of thife sort, and I am prepared to support minthing which I belleve to be plensing to God, who rules this Unt verse. The difficulties that now seem to be so great would, I belleve, amount to nothitig if we pursued the right course, and for that reason I am propared to support any measure of this kitu on principle. The last speaker has sald that we lave no mandnte from the people for a measure of this kind I think, apeaking for the outport districts, I slanll linve to disagree with the hon, momber. Almost every outport in the country has doclared in favor of Local Option, belfeving, hop$\operatorname{ing}$, that that measure would mean total prohibltion; and we have their mundate in thls respect, at any rate, with no uncertaln sound. Now, as ote of the representatives of a prohlbition district. I stand here to-day with the certainty of a mandate from that district in favor of prohibition. I havenow in my possession resolutions from the Temperance Society at Twillin. wate, which thoy took the trouble to send along by special courier to Lew ieporto so as to reach thls city in time to show their sympathy with this measure, and I cannot afford to treat those Ightly. Twillingate is the largest town in the district of Twillingate. It in the capital town, and any
meanure which the majority of the people there aspport should certainly we takes into conalderation; and 1 am very nure that this measure would be gladly welcomed by them. The sale of liquor in St. John's has to a great extent counteracted the good effecte of tocal option in the outports. In fact, It has almost made it null and vold, because of the faclity with which Hquor can be obtainad by the people of the outports; and there is apparently no way of curing that except by cutting it out altogether.

Already refarence has been made to the effect of thls measure upon the revenue. The mover of those resolutions has stated that they would affect the revenue to a very great extent. Frobably there would be a deflelt if this fource of revenue were cut off, but I would suggest to the temperance supporters- to the poople In favor of prohifittion in this clty and also in the outports, that they should come forward is a practical manner athd offer to bear the burden in sotue other way. I am prepared to-day-and I want fifty cente ai badly as any min in this House, and perhapi worse-to pay fifty cents a barrel more on every barrel of flour that I use, in arder to maike up the lois which the revenue will meet as a result of this measure. I think, Mr, Chatrman, if we want mensures of thls sort that we should be prepared to take the consequences.
Just one word with regard to the effects of the drink traffic in other countries and apon other peoples. I read somewhere a littlo while ago mame figures dealing with this evil in Creat Britain. The first alx monthe of this terrible war reaulted in a lutte over a hundred thouanad castalties of the British army of which 20.000 were letled. We can all realte what terrible consequences this moant, not only to those who actually sufferad but to thair homen. During that
six montha 25,000 people in Great Brltafn went to their graves as 5 rerult of the wae of atrone Effrity Now, it weumis to mie thint that lo worth con-atderation-the realization that a greater number of people mot their devathe In Creal Mrilain in sta taontho as the reatite of drink thin an a rerrath of the great war in whteh the Bmpire Is engaged. I havi never heard of ainy nttempt hiving bemm minte to anscertaln Juet what proportion of our denth rate was due to intoximatine Heuors, but 1 have no foubt that it woutd ojen bur oy means of fintling it out. To my mind If in dive yeara enily forty or fility tritelliseat reputibite ctilsus weat to
 strong drink, it would funtify total prohibition:
MR. HIOOING-Mr. Spealier, the attentaince it the Homae to-day, and the very general tritereat that has been shown in this subject pince it fint bscamic inown that theme posoluttons wirere to be brought forward by the hon. member for Bay de Verde, are evidence of the fact thut the
 this kind, le centronted with one of the most sartuan problems that can be offered to tha mambera it is a problems when has commot the ittention of this House In yearn gune by, and which han been engaging the aliention of the Lepiaistures of the Wortit it farkot for very minioy yours and I think it will eapme our atten. thon unth we arrive it the solution whieh has been gurgested hero todive, and thit tir, finve thin mimittar thi. poned of by a stralicht vote, and take out the evil, us has beon said, root, branch and troe. Hat the grout feature of thr proment remotuttom that 1 wealid Hlee to draw the attention of members of this House to ts that we are not by the reututions put in the porftion mutsemted by my fori, trent the mearber for Bay de Verde, when

Til nuys that they will give members an oppottunity of showing their moral colurakn: becanse I want to eny to hifm -and 1 thatt dithy the House is titTiU as pountite is dolng so-that if 1 kmin ggulnat the resolutions it is not because 1 may mot be as great an arirocate of prolitbition as he to-not tecauve I may aot be an grvat un advocate - w 'he ie of even \& grester zuessure of prolffitues than hile resofatlons cull for-but I would respectfuliy mibmit, Mr. Chalrman that those tf un who are rotitg mgafngt these fondlutionas is the form in which they are put betore un to-ding, are dotng to tor remous othur than antstemperLnise No motrlier of this Houso rould serfourly get up and attempt to defend the mhuse of liquor; no zemfive, whether bio votes for these rosolintions or not, fr Eolng to serlounty questliad the whetoin of any leginla. tian thit =III lensen the terrible evil thint the hom. gantlominn hiss riferred fo: no member ls goling to be found ta any legtatature in the clvilized world, Who has any respect for himself, who *ill get up and champion the abuse of llpear. Becanse it is with the zhinse of Hequor that umfortunntely we kave to deal. Liquor fin all lits forma, thetber it be beer or any other Intoxdcating drlak, when tation to excess trings all the attendant evils thut the bonl. goatioman has reforred to. There tin be no ponstile deaht, therefore, Quat a great responinthlity rests upon cuch of ua to see that when the epportunlty olfure we do not lose a chantes to rtamp out in trit thet in Bolng so much harm. Eint, Mrr, Chairtain, whille that is perfectly true, whille the anfortenate poifition is that Whist mitkes tipuor mech an evil is the abuwe of it by people who can least atrond it (end eomseguently the hard3hip that follows fills amongst the Chaneca who can leant bear it) we thurt he carefut that we do not in attemptien to cure that eril, create a
greater one. Now right here 1 wish it to be clearly understood that so far as I am concerned 1 am prepared to go beyond the doctrine that has been advocated here namely, that we are bound by our districta. I asy that, हenerally speaking, in a representative Ieglalature of this kind, ordinarlty and usually we are bound by the volce of the people; but I go further, and I say that no member of thls House should shirk the positton,-If bis conscience told him and if the circumatances around him told hlm that conditions were so bad that the general welfare of the people đemanded It-that it would be his duty to come to this House and stamp out the evil. That is what happened in the countries that have been referred to by the hon. member for Bay de Verde in Rubsia, France and Great Britain. But, Mr. Chalrman, we have got to remembor the fact that all three of these countries are engaged in a great war. We hive particularly to remember the fact that that great Russian army, from whom we ourselves, as members of the British Empire, hope so much in the future, was beIng demorallzed by Hquor; and it was to prevent that demorallzation that the authorities very properly stepped in. The same condition existed in France. But what bas happened it Great Britaln? I may say that I au very glad that the hon. member has referred to condtions in Great Brtsain, because it gives me an opportunity of relerring to an article whlch I recently read dealing with this subject. which wo all know haa been receivIng very serious attention from tha Impertal authorities because of the terrible effect which it has andoubtedly had upon findustrial operations In Great Britain. This article deals with the reply made by the Chancellor of the Dxehequer, Mr. Lloyd George, to the deputation which called on bim in connection with this
matter, when he made use of the words that have been quoted so otten recently, namely, that "we are fight. the three foes-Germany, Austria and Drial, and the greatest of these is Driak:" But the Chancellor weat on to say "The fact that the Governmeat have not up to the precent time taken even more drastic action than that which they have taken is due to one or two causes. The first, and perhaps the most important, is that before you take ateps of this kind you must feel conflient that yon are not going in zdrance of sentiment, otherwhe more harm will be done than sood. You must feel that you have behind you every class th the community when you are taklng action Which interferes and must faterfere very sensibly with the individual liberties of men of all sections". In other words, that right in tho Homeland, where the evil $\mathrm{I}_{8}$ greatestright in the beart of the Empire, at a time when the very existence of the Empire may be suid to be threatened by the evlls of drink-the Imperial Government do not feel justifled in endeavoring to force any measure of probibition upon the people. And, Sir, lot us be uure that the people of this country, whose social and ecenomic conditions are going to be so affected by such legislation, have the opportunity of passing upon this mattor at the polle It the loon. mem. her's resolutions aaked, as did last year's petitions, that a plebiscite be taken on this question, I would have the greatest pleasure in supporting them. Last year we had petitions presented here, largely through the influence of an organizntion that has done much good in this community, The Women's Chriatlan Temperance thion. These petitions asked for a reasomable course-one that no LesIslature except it were decidedly antltemperate, could object to: That an Act be put on the Statute Book to al.
low the country an opportunity of expressing at the Pollin their doclulan in to whether they deatre prolithftion or otherwlae. In that regaest 1 toticur. And I would Jest any to the hon. member here now that 1 think that when the time comes for the peopte of the counitry to express that dechalon, they will ether nat tor prohibltion out and out or they witt not have it at all. Thure witl not the any protithition is tho form which theae resolutions asggest; becaune the remolutions in their prownt form practically permit a min to conttiue to be a treaut thiroili drinidtug beer, on which he can get just as drunk as he can ou any other form of ttyutor, and that mest not be pernitted. The rinolutions lave been put the their preanent form apparently to meet the aurgention ot some partier that beer mifstt bo permilted and the strouger Hiquor shat out Now, I do hope that if prohibs thot is submitted to the people of this comntry that ft witt ' fo protithttom to all that the word ought to conves-prohibition frum every kind of tiquoir that can liring man down to the level of thio benit. 1 woultit atio ray lis con: nection with the ponition that confruale ta that 1 am probabiy in the fortamate positton that were 1 to eon. btteir the tinterestn of my dintrict atones 1 might Immediately ahiswer and give at my own reason for voting againut there resoletiens the fact thist the tant time tocal option was mutmittod to the people of st. Jotin's it wan defeated. I say that I might otter that as my sole reation for voting agrainst these renolutions. But that is not my reanon, and I do not think it is a reason which I should atvance, because I thinlt that the Local Option election meant nothing with regard to tho present issue, In the firat place. there ara men in St John's who would have voted for prohibition, but wenld not vote for local option; and
there are also, 1 bave no douts, many zien raslditig outaide the city who voted for local optlon thut may not the intopitifot to vole for prolithition. So that the voto for local option is not an Itides of what would happen in a probitition election and the beat proof of that, Mr. Speatior, is the nuet that the ocrnaumption of liquor ti this country has remained practically the famg, although during all these years we have had this marked therease in local opttin suntiment; and whllst that conmumptlon has remained jracticalty the same throughaut the colgoy, conditfons have fimproved in St. Ldin's; so that the obly conclueton that one can come to is that the local eption districts lasve been consuming. 1 don't say as large a quantity of Bpitituons lipuory as before, but certilnly a very large quantity; and the fact that that is true is shown by the getilions which have been frequently Ircictited to this House startng that bacal option Gestrictr have found that the abuee of the traffic sas atill golag on, anil aaking that atops be takin to itamp it out Wim regard to condtione in SL. John's-and 1 think that: I certainiy would be somewhat eferellet in the futy incumbent upon a ;eprementalive fur the city if I flid not say it to an assemhlage of thls Bind, 1 want to say that they are not the conditlothe which extated 25 or 30 years agu: they are not the conditions whick existed within my own Inowlodge, fittean yenrs ago. CondlClopir in SL John'e have improved for the reason that to-day a man, for ble owo nill-respect, lase got to be nober. There was is time, some few years ago, when all walks In lifec protesnional anid otherwise, were accustomed to mieet at the bar: when the leading men, the brichteat fitellects of the tas, so history telle us, met at the sublle house, but to day that practice caunot be followed. A man may not
be a teetotaller, but he certainly cannot afford to be an habitual drinker. He catinct afford it, because he reslises that it means wasting a great part of hise ife, and that realization is doing its work. Them there fs fanther reason, and that is, that the work that lias been done by the bolles sueh as those who approached this Lesislature last year is bearing frult. Year in and year out thece organizstions luwe been carrying on their work, watch, after all, is the great temperance work of the world; because the best results are obtafned, not through Acts of Parliament, but through the example which those who are atriving for temperance give to the people around them; and the fine worit that thene bodies are doing will in time have its effect, because we must all respoct the mas who by the recHtude of his own life influences others, and we must likewise reapeot the man who aol alome influences othern, Dut influonces them along the Hinos which I have suggested without the ridd of legislation. But I do quite agree with the proposition that it the people of thus commery, upan reffection, are aatisfled, that desplte that good work, despito the changed condtlons to whleh I have reterred, that the nbuse ittil goes on, then it will be up to every man who has any tnterest in the comutry to vote for prohl. bition when the time comes.

I have carefully, as the hon. member for Bey de Vorde will have observed avotded giving him as a reason why I do net support hise resolutions the cinanciat aspect. I do not conslder that that would be a good enough reason to give him. $I$ think that the Independence and self-respect of the members of this House are of such a character that I would not advance ne my only renson for opposing these resolutions, the present financial condition of the country: because if
thls country has got to depend for its exdstence upon the revenue which it obtains from the liquor trallie, and if that ilquer traftic is harmful, then in the name of all that is good, let us get out of te. But while that, of itbelt, would not bo a reason wheh should be advanced agatnst these resolutions still, at the present juncture it is an element to be consldered; because say what you will, Mr. Chairman, if w6 pasio these resolutions at the present thme there is going to be a certain amount of loss; and I think it is only tatp if there is to be this temporary loss and if this loss has to be met elther by Increased taxation or other wise, then the people of this country. Who will have to bear that increase in whatover form it comes, ought to bo glven the opportunity of passing upon it.

MR. MORINE-Mr. Chairman, it malred no difference whether the bill parses as it now stands, or, fncludes beer; I will vote for it I will vote for a plebfacte: that is if the bill provides that it shail bo followed up by a law enforclug prohifition as soon as it is approved by the plebliscite. I wish to roply now to some of the pointe made this afternoon by hon. rombers on the other side. There is first the cuestlon whether we have a mandate from the people or not. Have we never before passed blls In this House without a mandate from tho people? We are here to represent the people. It is altogether wrong to think that we have to go back with a. referendum to the people at the polls on every little matter that comes before as. That is an American doctrine, entlrely forelgn to British conxttuffonal precedent. We are elected by the peoplo for a term of tour years to yote with their authority on all miesaurea. So far ag I nm concerned, I want no mandate from the people upon any measure that comes into
this House; and the only way in which those I represent can prevent my voting according to my oplnlons in this Houne is by terminating my sitting here. We met here a few months ago and dealt with mattere of the gravest importance in connection with the Empire; did we ask for a mandate then? The war is cur mandate. You !mpose taxation which a few months ago you wero taking off; and without a mandate. It you could, up to the present, act in the most im. portant matters without a mandate from the people, surely to-day you can act without a mandate in this matter? The hon. member for St, John's East sald that he thought that we ought not to take a step without consulting the people, but I am sure that he is too logical to think that himself. It is not even as if we were proposing to take ony money out of the peopto's pockets. The country will lose $\$ 350,000$ per annum that is now collected on liquor but we can got it bnek into the Trensury to-morrow by re-adjusting the tariff so as to put bick the same revenue on other goods. Looking at it from a revenue point of view; imposing that same 8350,000 on other goods, will not alter the pesition one fota. It will not take one extra dollar out of the pockets of the people. Why secure a mandate from the people? Our position here in an eperlasting mandate from the people to do whatever we think right and desirable.

Then there is another potnt which has been debated here; that the time fis not an opportune one in which to wipe the ltquor revenue away, I do not see why it should not be as opportume tis uny other time 1 think that the time ts extremely op,or one It in true that we are facing a large defficle this year, and we will have to borrow the money in any case to make
up the goneral deficit; why not borrow a lutte more? We shall undoubtedly have to make extensive changes in the tariff, and while making them, why not make this further change and meet the need by placing larger duthes on other goods than liquor. It will not very much alter our financlal position. I think that this is an extremely opportune time. As we have got to change the tariff we can do this at the same time. I sm not one of those whe agree that the $\$ 350,000$ will bo lost even temporarily. It would be easy to replace what was leat on the liquor dutles, and the cost of liquor whel to the consumer nmounts to $\$ 1,250,000$ when spent to other directions would easily make up the difference to the revenue. That million and a quarter dollars will be spent for other things The greater part of it comes from poople who are not depositors in banks, and who, accustomed to spending their money nccording as they earn it, will immediately spend it upon other goods. I ehould be prefpared at this moment to take the ortice of my hon. friend Mr. Cashin and undertake to put every cent of the money lost, back into the Treasury at once. But when I offer to take that position I do not mean in the present Government I do not envy them. White I was listening to the hon. meraber for St John's East, Mr Higgins, I thought that he Intended to vote ' n favaur of this resoluthon. He held the same views as I hold, regarding the mandate. The only difficulty $v$ as to discover the reas. on that he had for not voting for the resolution. He argues that conditions In this country as regards liguor are and have been bad enough, but that they are steadily growing better. Well. that improvement is the result of the efforts of those who are called tempernnce cranke. It if by their actions and theirs alone, that society in be-
ginning to recognise this evil. And I think that these are the people to whom the Legienature ought to look for guidance Mr . Higging began by aaying that the abuse of ilquor was what we had to deal with. No human law can be insde which can strike at the abuse without interfering with the use of liquor. It all helps a little, but if we are to deal with the matter effectively, it is necessary to sot down to the root of the evil. We ought not to allow the clatms of any person to prevent us from maldtug a sacriffee to stop the liquor trattic that is endangering the proaperity of this country. We onght to demand a sherifice from the poople. We bave been told that the fact that the consumption of diquor in outport dietricte hins not decreased under local optton is evidence that the people do not desire prohibition. In every local option district there are some people that driak; but that Is not on erldence that a district will not vote for local option; and If they cannot get toeal option they will voto for prohlbition. Driniaing is stlll going on in outport districts although thay lave local optfon, and the lnw is being violated - I sey, we can regard every locel optlon vote in thils country, nis a mandate for prohibition. We know that the majority of people in New. foundland are in favour of thile resolutions and we ought to give them this law. We have had prohbitton voted upoa fin this house before, when It was only defented by the easting vote of the Speaker. Now the sama thing fa introduced again, and we are told the Government is in favour of a plebfecite. Why are you in fivour of a plebiecite when you already know the wish of the people? It hes bieen unquestlombly expressed.

RT. HON PRIME MINISTER Mr . Chatrman, I have listened with a
freat deal of interest and plessure to the epeechee mado horo thite ever ing, in regurd to thig very important question i think that we may con gratulate ourselves that we have fought the questlons out frym the standpoint of statesmen. Wr neel not discuss the evils that emp from the abase of atrong drink, ne: ne.u wo delay the House by a discungion of that queution. That evil follows from the sbuse of liquor la admitted on wr. ery side, and we can all admit tha: it Is an evil in this community. But on us rests the reaponslbility as to the cure of that exil, recosnlaing that there are people of all oplnfons in the communtty who must be corsilered,

Now there seems to be some confuston here in relation to the ques. tlon of Tocat eptlon mid the good worls that it has dome, and there hias evidently been a misunderstanding by tuy tearned friend who hes Jost aat down of the hon. member for St . John's Enst, in relation to the conoumption of liquor in local option districta. There to an entlre misunder atanding and misconcoption. It đoes not follow at all that if liquor 18 consumed in toeal option districts today to a very laige exent that in any way represents a fellure of local optlon. Not at all There never was any mandato from the local option distriata to prevent ontirely the consumption of liquor. Loesl option nevor interafered with the consumption of tipuor, it deatt with the question of publle sale and not of consumption, and there le no reason to confuse the trane. Local option exists nearly all over the country todny. St. John'a is the only district where there is no local pitton, and it is not falr to say that the local option districts are going bacis on the principles that for years actuated them in their splend-

Id efforts to increase temperance.
Away back in the $70^{\prime}$ 's 1 think the first local option law was brought in and the people all over Newfoundland were given the right to say whether liquor should be sold in their districts, and year after year the various districts and eettiements put that into force. Under the first Bill introduced any district or settlement reguired a two-thirds vote to do away with the sale of liquor. Then the Logislature enacted a law by which a bare majority could decide whether liquor should be sold. What happened? Why Is It that the consumption of lifuor Is higher all over the country today than it was forty years ago in apite of the temperance retorms that have been taking place all over the Tstand. The reason is that local option ouly affecta the man that goes into the public bouse. It never affected the man in the outport that kept Hquor In his own house, and consumed it moderately and properly. That is why the conoumption has hept on and has not docrcased. There is no question of the fallure of loeal option in the outports. But today we are not talktng about local optfon, but about total prohibition of liquor. Local option has boen brought in here merely as a side fssue. The question we have to constioer is in relation to prohibltion. Now my learned friend has talked a great dees about there befng no necesalty for a mandate; he says practicully that an Assembly does not need a mandate even for anything in any portion of the Brib Ish Emplre. Now 1 do not asree with hifm. Why the very question that we are now discusaing only a few yeara ago was submitted to the whole Domintion of Canada. It was not merely a provincial affalr, but it was submitted to the whole Dominion by the Laur fer Government and the people of the whole Dominion voted. That was I
think only in r38. If that is not an Iflustration of sceking a mandate 1 do not know what is. It is cquite true as he has sald that we have had this question of prohibition up here be tore; but if he will go back I think he will agree with me that he only told one-haif of what happened in relation to that time. The first time it was brought in here it was defeated as he says by the casting vote of the Speaker, but the next time it came up there wai a very large number on the other sfde who voted agninst it. I think there was a majority of seven or elght, and slace then the queation of prohlbition has not been brought before this House or the country in any fhape or form. We have to hesitate somewhat betore passing fnto law any matter of so radical a nature as prohibition. We are not as a whole a people who drink to excess. There is hardly any other country in the world-I do not think there is any British possesslon-where the consumption is so small as fo Newfoundland. I heard the fligures given out by my learned friend, Mr. Morine. He sald that our drink bill today whs something Uke one and a quarter milHon dollars. I do not agree with thoso figures. I think it would bo nearer three quarters of a milion, or seved hundred sand fifty thousand dollars. In the first place this year I think it will be found-and I lave no figures by me now, and I am merely quoting from memory-that the duties on spirits and beera will not be more thats $\$ 300.000$. It may be a little more or less: but talding $\$ 300,000$ as an syerage of the dutics collected and add to that the price of the liquor which will not be more than $\$ 150,000$-and even If you put it at $\$ 200,003$-that is only $\$ 500,000$ when the lifuor reaches the public hruse; and now if you add the profit of the publican after it if watered or drugged or whataver may
be done wilh it which you cannot put down at a much larger amount than 3250.600 it Eivee you a driak wift of ttronot, or Dime dotlinh for every man, woman and child in the country. Now how dopes this cumpare with Great Britain. Why last year thell bill was $\$ 17$ tor every mant, wo than and elrid in the country, and in Canada today it is 512 , and in the Trittea stites totay it is 856 ! isat yet with an it te only ix 'Now flat I think, if furures mesn anything will stow that we are tict a Anaikes peophe anit with wif cohinunion certath atmount anit perhape mors than we ought, we arn very mach shader the percestaike of othin countrivs

perance, but in relation to every other matter of grave importanceand you will find that Important subjects like this are settled at tho polls either following on manifestoes or in other ways.

Now as I have satd Mr. Chairman, last year we had these pettitions before us, and since they were presented here the Government have had them before them on geveral occastons and we have been making enquiries in all directions-the most careful enquirles to ascertain whather even we would be Justified in bringing down a bill in relation to a plebiscito. We have never come to the point, and it has never been ralsed untll the motion of my hon. friend, Mr. Hickman, of forelng upon the country this measure, and we have been only eonsidering, like the temperanco people, as to whether the people should not be given the right to pronounce upon the question. That fs the questinn asked us a year ago, and I have today a Resolution passed at a large temperance moeting in this city the other day in which the very same request fa made in relation to thls prohibition, and I am glad to be in a position to be able to asy to the House to-night that the Covernmant have rosolved to bring down a bill this session and pass it into law to enable the people of this country to say whether we should have prohifition all over the country.

But in any case, even if the Government had not resolved on that, there would be no Justification for voting for the present legislation that is submitted in these Resolutions because it wou'd be monstrously unfair to say to one half of the country you can drink all the beer you like and to say to the other half, you will not be allowed to have a glass of wine That is wrong in principle and it is worse than that, because it raises dis-
crimination all over the country and draws a distinction between a man who takes a glass of gin and a man who takes a glass of beer. We have been told here that the reason the Resolution was submitted in this form is that it would be less objectionable. Now, I don't think there is anything in that reason whatever. I think that If we are to have Prohibition here it should be strict Prohibition, and that the people should be allowed to eay whether liquor should be excluded from the Colony and whether legislation should be passed to do away with it. It is a very important matter and a very serious matter, and one that ought not to be taken up hurfledly or dealt with 1ightly. A whole year has gone by slace these petitions were before the House, I myself had an opportunity of discussing the whole question with an Influential deputation from the Methodist Conference when it was sitting here last year, and I then told them what I have sald here, that the whole thing was under the consideration of the Government, and it was only a few weeks ago that the form in which this legisiation was to come in here was discussed by the Government with the Attorney-General. And as I have sald we have now resolved to give the people of this country an opportunity of saying yes or no to the guestion of Prohibition. and when that Bill passes, if it passes In the affirmative, we can deal with the whole question all over the country.

For these reasons, Mr. Chairmian, I am unable to support the Resolution, because it is only a Resolution re presenting class legislation and dealting with a great question piecemeal, and instead of doing good, it only has the effect of creating great confusion, and would be of no permanent advantage to thls country. Now, I agree to a certain extent to what has been sald by the hon. member on the other side
ae regardes to the loss of revenue, Our rovenue will be made up and the three hitintred thousting fiat we ket from Hegur can be obtatied by placing duty on other goods. No doubt a great denl of it will oome back from the very men whio are now spenaling their mothey on spirituous liguor: bit be that as it may, that would not be a conctusive argument agatal prohiblHon, although it might have some weicht und some fairness in relation to the Act when the question has to bo tuken up. I hope now that in view of thits announcement the learned introducer of the measure will see that ail that can be expecteit in repson by riny of hifn triendir outside in met by the undertaking wilch i have just ntated.

MA. MORINE-Would the Prime Minister explain whether that legislation when it if brought down will merely provide for the taktig et a vote of whether it will provide for the Prohibition of Hquor to go into effect as the result of the vote without aulhequent legislation in this House.
RT. HON, PRIME MINISTER-I miny any in reply to the hon, member thint the Governmout lise not yet eome io that joint. The Bill that we had hat betoro un ts the Bill submitted to the Canadian Parliament, a precedent which my learned frlend will be raady to sumit is not alwnye a had one The Bill that we have beeea considerIng is tho Bill whiloh was Introduced in the Canadfon Partlatnent in 1898 , the Bill unifer whifh the whole DominIon roted that year. Now, beyond that the Govornment has not gone.

MR. MORINE- 1 am sorry that I cannot heree vilth thint precedent. Thier Erime Minister knows what was the Pasult of that Bill.

RT. HON, PRIME MINISTER-PROhibltlon was voited down.

MR. MORINE-I will tell you how It was voted down. They voted in
fovor of it in every Province of Cansida except in Quebec, where as a reanlt of wholesale frauds, they got enough votes to sive them a majority in the whole Dominion of Canada, and the law never went into force,

RT, HON, PRIME MINISTER-That is not a fact. The reason that Sir Wilfred Laurier did not carry it out was that of the whole vote only about 23 per cent, went to the polls.

MA. MORINE-I do not think the Bill will have any value if you are going to follow the Canadian procedent.
RT. HON. PRIME MINISTER-I did not aly we were, I sald that we had not got to that stage yet.

MR. MORINE-You said you were introducing legislation along the Canadinu model which you asked me to admit was a good precedent. I sald thint it was a bad one, but I am now completely satisfied ar to one point, and that is that as far as the Government is concerned they do not intend to do anything that will promise that Prohibition will result from the vote of the people at an election which may cost the country between $\$ 40,000$ and $\$ 50,000$.
RT. HON. PRIME MINISTER-No. 310,000 .

MR. MORINE-Well, oven $\$ 10,000$. The result will simply be that subseguent legislation will have to be intraduced. Now, you are asking the member for Bay de Verde to defer his Reaplution in view of your promise to bring in this Bill. I would advise hilm to do nothing of the kind.
RT, HON, PRIME MINISTER-I did not aslt him. I only hoped that he would connider my announcement sufficient.

MR. MORINE - You did not order him, but you expreased the hope. Now, I would advise the member for Bay de Verde not to be taken in by in expression of hope backed up by
an explanation which show that the Goverment have arrived at nothing.
MR. COAKER-Mr. Chairman, I cantiot ing that f can comptimatre the Premter on the stand that he has taken ln counection with this matter. He has edmittod in hle address that the Hunor question is an kvil Now: If her recomnizes that thim is an evil. why dons has tuike all the trouble of artitig the people whethor thay ure grine to vote for it or agniast it. If liguor is an eril ao great as he makea out. why foes he hestiate to do away with it. For my part 1 hat reacty to vote here and now for total prohibltien, excluaing everything in the shinpie of lifuor-mtes, wines and utt the roat of it-and from what we have hoard from the other side of the House the mein-objection is to the presernt form of the Thesoluttons. Now
we do not intend to let them ret out of it in that way. We represent dis tricts which 1 consider have given mandates in favor of Prohifttion, even though Loeal Option may have no connection with Prohibition, but I mo mo fre as to say, Bir, that all the North-
atil fristictin when they cut out llquor
16 in thatr own seetion are quite proparet the excluile it from the whole country, bet linowing that they had no opportimity to fo that, the onty thlag thay emald co was to eut it out of their own tlietrict, atad thay have done so. Hit if the Government have resolved to vote dewn thint fremolution, they ean Ita so. We cannot force them. As fir 4 a 1 am concarned, I regret that The Pramior fild not long ago malke this ennounimoment on the Tempernmea (1) question. Wourteen months ago thls nurler wai brought hefore lime and up till to-day wh have not heard a word whout it, ant it is mit optrition

- that we would never have heard of it

Remin If this Resolution had not come
hi before the House to-day. Persoanally
I am opposed to Hiquor. I beltere thit
4. the man who does not take liquor at
all Ie the beat off. I do not think that the man who takes liquor in moderatlon la any worse than 1 am , but I thinlt he woult be better off without it. Thave alway's been convinced that dipuor la an evil, and all my lifo 1 Lave boen in tomperance man, and I fave always favoured the temperance follis because I have seen many a poor chap so to the bad through lifuor. Now, I do not know what will be the effect of the Governmeat's measure, and in order to have this Prohilbition anetter coppor tantened I am going to move on amendment to the Resoletionss I have made these assertions botanse I do not want the lemues of the present session to tura out fruitlesa. I must, however, say that I cannot altogether agree with the hon. tuember for Bonavista, Mr, Morine, as regards the vlew be has just lata down in reference to consulting the perple. I do believe the people ought to be consuitual in great issues, such as we are now at present facing, and 1 thoroughly agree with the viewn misintatian by metubers of the oppoalie side who are in lienord with me fit thla respect. For in a diriiculty suith the the present I think the peopte edeght to have the last word.

MR. CURRIE-I have no intention of entering tuto any argument on thin matter now before the chalr. It is one of thoso questions which might bea diacussed itll doomsday without reaching any conclusion. My sole purjose in entering the debate is to explain briefly my position, as I intanit to vota Higutnst the remotutions what hive been introduced this afternoon. it will be remembered that when the petitions from the Temperance people were presented to the House last session 1 very strongly endorsed them and claimed that the least that might be done was to give the people an opportunlty of voting on the question and settling it once and
for all. Since then I have interested myself somewhat in the petitions and 1 am in a position to state that they have recelved the careful connldera. thon of the government and the decislon been reached to grant the plebisclte requested. To this legisla. tion I have already pledged my support as it is thoroughly in accord with my views. 1 know something of the bill, even though as yet it is only in skeleton form and it is one thst should recelve the support of every honest temperance worker both inside and outside this House. Much has been said here to-day on the necesaity of sending this matter to the people. Now whilo I very largely agree with the hon, member for Bonavista, Mr. Morine, that this is a queetion with which thé Legislature should not hesitate to deal, I see one very strong reason why it should be left to the people to decide, and it is this. If a prohibition measure were passed by the government, there is alwaye the danger that strong infiuences might subsequently be brought to bear by the liquor Interests which might result in the act belng annulled. Such could not occur if the matter were decided by the people for no governmont would dare to $g 0$ contrary to the volce of the people. And I think the Temperance people woutd rather have the question submitted to the electorate. Indeed only to-day 1 had the pleasure of discusslag the situation with a prominent Temperance enthusinst, a eity clergyman, who thought the only offective manner of settling it, was by letting the people deelde it is for this reason, Mr. Chairman, I am in favour of the plebiselte, and for this reason I shall support the government measure when it comes betore the House later on.

MR. DOWNEY-Mr. Chairman, I

Gesire to express my fideas on this resolution now before the Ohair. Whenever the occasion has offered itqelf in this Cnamber, I have always given my most hearty support to temperance Leglslation, and 1 zm prepar ed moreover, on every occaston that I can conscientiously do so , to sup. pert any comprehensive measure of prolilbition that will amellorate prea ent conditione, provided it firet be submitted fo" the decision of the people: I am not prepared to proffer any argument as to the effect such resoIutions would have on the revenue. 1 agree with the member on the oppo site side of the House who sald that guch coneideration should not deter us; but 1 am fully prepared and dis posed to favour in any form the decisfon to put the question before the people and to await their answer. If we are to have a prohblition measore, 1 desire a clean, comprehensive and an anielforative one. I do not think that in a matter of sach momentous tssues the Gavernment should act withont the certain-authority of the people.

MR. CLIFT-Mr. Chairman, 1 would like to make a few observations on the matters now before the Chair, that is to say, the motion introduced by the hon member of Bay de Verde, Mr . Hickman. I do not propose to discuss the effeets of Intemperance, because that has already been dealt with and laid down by previons speakers. There cannot possibly be two questions as to the evils that accrue from the overindulgence of intoxieating liquors. At the same time I personally proter to regard the matter from a more temperate standpoint because it must be borne in mind that these resolutions are promoted by a strictly temperance class, and while these people deserve every praise and consideration, yet, we must remember that there is another large class of people who
have rights as well as the othars, and I cannot absclutely concur with the Temperance Workers who deaire to dietate to that clase of people which ill perhapa a little less temperate, what must and ought to be. The proportion of people who over-Indalge, and the proportion of suffering thereby entailed is not perbaps quite as great as one might suppose and I think on account of this fact, and on account of the very nature of this Resolution we ought to be most temperate in any resolution wo may pase. Indeed I ath more inclined to wait untll this promfsed legisiation comes down to this House. It seems to me that a question of this land should most certainly be sumitted to the people. I think we ought most decidedly to ascertain the feellings of the publie in this matter. If 1 felt that 1 represented Twillingate alone in this House, I should havo no doubt as to Low I ahould vote, but I recognize the fret that I do not sit in this House as a Representative of that District only. I am here as one of the representatives of the whole country, and 1 do not feel that 1 am jastified in castlag my vote in favour of a motion of so far-reaching an importance as prohibition without having an opportunity of teating the foeling of the people of this country. With regard to the ameadment just introduced by the Hon. member, I may say that 1 think that this could bo dealt with in the Bill which the Government proposes to introduce when the Bill reaches the Committeo stage: but most certainly must the feeling and sympathy of the people prompt tay aetion we may take.
MR. LLOYD-Mr. Chalrman, if I were asked to say whether I would or would not vote in favor of prohlibition I may state that I cannot at this juneture say whether I would, or would not. It is a point on which I have not yet made up my mind. But thero to
one point, I may say, upon which I have made up my mind, and it is a sentiment to which $I$ have giver expresslon a year ago. I feel a great deal of sympathy with the viewn reterred to by this Bill, which has been so ably advocated by my hon, friead, Mr. Mor: Ine, but I must state 1 am not prepared to be a delegate for any constituency. If any district In the island wishes to find a delegate, then 1 am afrald it will have to find some one else other than myself. It is tuy strongest conviction, and no new notion, that Members of this Honse aro not here as Delegates of thelr electorate. Whether we are dealing with Temperance or anything else, the Member coming here is supposed to exprcine thia own judgment in the beat Interest of the people of the country, for 1 contend that a member elected to this House does not sit there as representing only the district which elected him, I am a representative of Newtoundland here, and not merely of Trinity. This is no new doctrine. It was given volice to by one of the grentest anthorities on this subject, Eamund Burke, who, when he stood for Bristol, stated boldly to his constituents that vicw, that he was not the delegate sient by the people of Brtatol, but that he represented all England, all Great Britain. That is the position that 1 now take, even if it soade me to sure defeat the next elee. ton. A man who acts otherwise is not fit to be in this House. This will esplain my attitude towards the Resolution brought forward by Mr. Helk-man-a Resolution I may say that I am in great symathy with. He might have gone further and aeked for the total prohibition of the limportation, manufncture and sale of spirite and malt liquors, but as the Resolution now stands I am afrald that I cannot akree with it. It does not seem to go quite far enough, 1 amm not propared to vote for prohbition under thin Re-
solution or any similar resolution. In fact 1 am prepared to vote against it, because in my bellef it is unsatistactory, and if it were satisfactory 1 should be prepared to vote for it it I consclentiously thought it desirable I am prepared, however, to express my approbation of the amendment, but in this case I see no cause of dispute between the Resolution Itself and the amendment thereto. I am thoroughly in accord with those hon members who deslre to place this question before the people, for in this matter, where the law is experimental, drastic and far reaching, I consicer it but right and proper to refer the question to the whole country, the country at large, betore bringing in such an enactment into force Furthermore, 1 may say that a measure such as thls fs very capable of embarrassing the Minister of Finance at this season, a time too critical to permit any dublous ateps in a new direction belng taken. But I would give my heartiest vote to any measure supporting Prohibition Legislation, if it contained a suspending clause, arranging for a plebiscite, say next Fall, and providing for the resulting enactment coming into force some time Ifle July 1st, 1916, whereby the finances of the current year, and that of July 1st, 1915, to July 1st, 1916, would not be embarrassed. This meas. ure would permit ample time to the Government to consider and make changes in the Tariff, which changes are inevitable more or less under present circumstances.

RT. HON, PRIME MINISTER.I may say, Mr. Speaker, that the intention of the Government is to bring in a Bill providing that a plebiscite shall be taken in November of this year,

MR. M. J. KENNEDY-Mr. Speaker 1 have listened caretully to the remarks of the honourable speakers and slince I have had the pleagure of hold-

Ing a seat in this House I always gave my support to any meaeure in favour of temperance. I have been a temperance man all my life and am a member of an organization in this city with a membership of something like one thousand; no matter when the opportunity may come I shall be one of the first to support a measure for the total prohibition of intoxicating liquors. I was very glad to hear the hon. member Mr. Hickman fntroduce the measure, but since I have heard the remarks of the Premier, he has made it easier for us to know that there is goling to be a measure to support in which the whole population has a volce. I am not going to deal with the measure as it is in its present atage, but when it is brought up. I will be able to give all the support I can. We will be able to put this very important question before the people, and while I have the pleasure of a seat in thls House, I never will be a party to anything that the people have not their aay in.
F. J. MORRIS.-Mr. Chairman, the aubject matter of the resolutions now before the Committee is one of considerable importance, and a decision of this House in favour of total prohlbition must necessarily have a whe. syread effect on the rights and liberties of the citixens of Newfoundland. The Temperance question has come to be recognized in this Legislature as a bardy annual, for, during the past twenty-six years since I have had the nonour of a seat in this Houso, scareely a year has gone by without temperance resolutions of some kind havlag been introduced. I must congratulate the hon, member who intro duced the resolutions here thls evening, on the temperate language used by bim in his portrayal of the many evils that follow from the over-indulgence of intoxicating liquers. I do not think there is any person who reads
and thinks, and who has the sight of his eyes to observe the happening of things, but must come to the conclusion that the abuse of spirituous Hquorm has a very bad effect, not only on the individual, who is unfortunate enough to be adflictod to over-finduls: ence, but to his home, his friends and the community generally. So much therefore on the aspect of the question from the ntruse and hot the use of atcohol.

There are very few subjects that can be introduced into the Legislature where there will be absolute unanimity of opinion upon, and matters generally receive from the varlous members a certafia amount of adverse criflctim ts well as favourable comment. An important matter of this kind requires a good deat of consideration, as it nffects the rights and tibertles of a conatiderable portion of the people of Newfoundlard, and I submit, Mr. Chairmun, if we vote here to-day for those resolutions the majority of the members of this House will be doing so without having consulted their constituents and ascertaining from them. as undonbtedly they should, their slews upon the matter, I doubt not but the resolutions have a considerable number of sympithizers, not only amongat the members of the House. but thoie outside, as inatianced by the large attendance of citizens inside the Bar of the Fouse this evening. I woutd ask. Mr. Ghalrman, are those resolntions the outcome of the different temperanee organizations all over the countryl Or do they merely vepresent the opinions of one section of the community only. I would ask, Sir, what have we here this evenfig in. support of these resolutions from the great temperance bedles of the Chureh of Eogland, who we know have done and are doing, such good work all over the country for the cause of temperance. Are thebe resolationg bucked up here to-day by the Totat

Abstinence Soclety of St. John's and by othor large and influential temperance bodies that exist all over the country who are members of the foman Cathollic Charch, I am always loath, Mr. Chairman, to introduce a question of creed or sect in relation to mattere that come before this House, but I am constrained to do so on the present occasion after hearing the hon member for Burin's atatement a whille ago, that the Temperance petitions premented last year to thia House, were the outcome of one denomilnation only of the conntry, and that these prohibition resolutions are the outcome of these petitions. How is it then I ask, that other denominatons hive not been heard from in this matter? Would not a reasonable inference be that for the present at least, they see no reason for so radlcal and aweeping a change in the present law of tho Innd. I merely introduce thls aspect of the subject beeause we must yiew this matter not from a seo. tional or personal standpoint and before we pass upin it we should fortify ourvelves with the opinions of all those outside the House whose interests and rights may be affected.

The distriet that I have the honour to represent. Placentia and St. Mary's, was one of the first in Newfomndland to came under the operations of the Local Optlon taw. The foluabitants of that District number some sixteen thousand, with over five thousand voters, and up to the present moment I have not had a line or a word from any resilient either for or against prohifition. Would I then, Mr. Chuirman, be fustified in casting my vote liere this evening for a measure, the passing of whith would curtall their tighis and ithertles without consultfing them, or representing their opin. lons, In any way upon the matter I đo not want to be, nor would I accept the position of a delegate in this Fouse when dealing with publle mat-
ters, still 1 do not feel myself Justified in voting for a measure that will serlounly curtall the rights of those 1 represant, without first consulting and ascertaining their views, enpectally as this measure is merely the outcome of a gection of our temperance workeris. Now I do not whish by this, Mr. Chairman, to underrate in any way the good work which the ladies and genttemen who are fitentified with this probibition movement hare done, on the contrary, whilst not seelng eye to eye with them on this matter, I extend a respectfal sympathy to them in thelr work, and if, after conisultation with my constituente and finding thers favourable to prohibition, whea the bill as has beet outlined by the Premier, th brought before the House, I shinl umreservedy give it my nupport.

I wast to make mynelf clearly understood as to the position 1 take upon thls matter when I say that we ats representanves of the people have no Fight to exarcise our mere Individusi opitions in this Honse when voting In favour of a mearure which if passe4. will interfere with the individual righta and litbertien of is very large portion of the people whose rapresenistives we aro. For thelle reasons Mr. Chairmin, I intend to vote against the resolution.

MA. KENT:-Mr. Spealier. the debate to ftir appeara to have devoleped at vary mmall and compret queso tion. The main question as to whotisor one should adopt for this country pratilition or not, is not at Istae in the debate. The nubject of the debate has been whether thif House Ehould pass a Ball prohibiting the gale of intoxicating Ifquors or whether it should take a plebiscite. That fo the Eubject. The main question of prohibltion has been referred to by some Epeakers here this evening. It will be remembered when thin question was before the House last year there was
somu expression of opinion on the question of a plablatte. My opinion on that is that we are here with a general mandate to purform all aeta of Lesislation which become necessary and desirable for the interust of the catintry.

Now, Sir, in the quention before the chair twe liave eritielzed it and from the tenor of the delate that is surely what the members are talking ubout and I do not think anyone could regard this question of Total Prohthition as a minter of oruinary legistation: Take the question of changes in the Tarif and other Legisiative matters of Kfndrad nature; here we are dealing with the ordinary duties which devolve upon ith, In this caser we are not doaling with normal rights, and I think it should be borne in mind when dealing with rights of this Kini, unlems you have is pubila opinion backing you then your efforts are goling to be in vain. We look around our country, what aro the evils We are leglelnting upon? We are not guitering at all as other countries-are: we arm, as a country, a sober one: 1 do not deny thet the abuse of intoxicating liquars in this country las brought evils and srave ones, but take St. John's-as the only part of the country that the Legisiature is at now: You will find that the liguor traffic is conducted in St. John's, in such a mantier as to ourprise poople coming from other countries. That is the tuct that most people will admit, the trade ie conductad in auch an ordorly man. ner, My opinion is, Mr. Chalrman, that the use of intoxicating liquor fo not in itself a wrong. The uae and thile of intoxicating ilquors is not a Wrons 1 do belfeve thist intoxloating liguors were placed by Nature's God on this earth for mome purpose. I belleva the man who atuses these gitts of Providence is committing an ofFonce against himmolf and God and his country. Bint, Sir, I do not think we
should net in this matter untll we are satisfied that public opinion is behind us and they demand it. I do not believe, Mr, Chairman, in letting the matter drag on: I believe in having a de: cisive nettlement of the matter. I don't helteve in biving the matter brought up year after year. If we are going to aak the people to express their opinion on it we ought to do it itt $a$ proper manner and have done with it. As Dr, Lloyd pointed out a ptehtselte should be taken on this question and let us take a certain ttme ind if the pronouncement is in favour of prolifibition, then let Prohibition come into force at the date named. Then every person will have the opportunity of expressing bls or her opinton on the matter and then the Government can deal with it in a bualness like way.

Mr. Speaker lest the chair from 6.30 to 8 pm .
The Chalrman resumed the chafr at 3 o'clork.
MR. GRIMES,-Mr Chairman, the matter 1 was going to speak about just before the House adfourned was the question as to whether the representathees of this chamber had the power to make suric an elteratlon as this without rirst sppealing to the people, and I would differ from those who say that Fia have that right. I take it sir, that we are not the supreme authorlly In all legisiative matters; that rests, Sir, ia wy opinion solely in the people. Laws live been made, Sif, in whith the people have had no say: in Gact they have nict been recognized, and I think that in large issues as the paroult the poopite ithouta bo comefared and consuited. It has been satd here thly afte,noon that If we had to resort to the peos, for every fmportant bit of lerisiation that we would always be reforring to them. That, Sir, in my opinion is what ought to be done. The laws are for the people and they etioutd dectde us to what slatl be
these laws. There has been leglalation passed in this House which has been passed despite the entire disepproval of the people. The remedy is the question of the "referondum." Before any important legislation at all is passed, the wisties of the peopte should be considered, and they should give the declding vote, which is re cognized to be the deciding vote not ouly in this but also in every other grent measure

There are varlous reasons why I belleve that this should be done. In the ffrat place I beffeve that much of the graft that prevails to-day in the United States of Ameriea and Canada would be at an end if the representatives wure under the control of the people as they should be; If at any time a member could be recalled to exptain hils actions at certain times. This is the status of the represealia tives in the parllament of Swltzerland, so now exery law made there is virtually what the poople want. The fact that they can be recalled at will by the people mokes the politicians there wary and they consequently make mure of their districts" desires before adoptjig any legislation, and to-ilay thero is no need tor the enforcement at first nenessary bechuse the legislatora have learnt the lesson and are practieing it. That sir, is the reason 1 support the referendum. There lias been quite a time since the notice of this resolution and if the people wanted it they had lots of time to petition the Government to that effect. Not only do I know the wishes of my eansiluents in this matter but I believe 1 know the wishes of the whole country by tho fact that most are Local Option districts, and further by the fact that at the tast sesston of this lerislature petitions were received asking that the sending of liguors to the outports be prohibited. When it becomes necessary to petition for such things as these it is very plainly
shown that the people are very strongty opposed to the use of wines, ales and spirituons llquors. That betng so, I do not see how the Government can do mything else than act on the sug gestion of the movers of this amendment and sutmit the question to the people not later than November next; for in doing so they will be but carry ing out the wishes of the people.

There has been a lot of discusslon as to how to get the prohibitive law in this country. The suggestion has been maile that each dietrict ghould be left to itself as to what it will have. 1 think, sir, that the whole country should decide once and for all its wishes in thas connectlon, and that the Government, after the vote has been taken, should brins in a bill embodytig all the tegtstation needed to carry out the willies of the people so declared.
In regard to the matter of revenue, I do not think as the hon. member for St. Jolin's Fast has expressed himnelf that the people consider the questlon in this form. There would be no objections as the hon, member for Twillingate, Mr. Jennings, said to the Government putting on 50 c . per barrel more for flour if they knew that by doing it they were conferring a great favour upon the people of St. John's and the outports.

I think the hon. member for SL. John's East, if the question were put to him squarely whether he would consider the question of revenue before that of the happlness nad comfort of homes, would say, by all means let us have happy homes fustead of the broken ones which we have to-dayInitead of the ragsed children which we see going around our streets or working on our wharves when they ought to be at school, beeause their fathers don't bring home the necessary money to provide for their edueation. 1 to not think, Sir, that hon, members on the other side of the House, it they
considered this matter fairly and squarely, would say that revenue is a question to be considered in this connection at all. To my mind, the only guestion is as to whether it is proper for this Leghalature to dectde here to night that we shall have prohibittom or not. I submit that in view of the fact that we have to-day all the outport districts supportling Local Option. and in riew of the large number of petitiona rakich were presented to thia Legielature last year, the people of the outports have expressed, in no uncertan way, that as far as they are concerned, they want this measure put through the House as qutckly as possible I trust that the Government will give the amendment which was proposed here this afternoon the consideration which it deserve日, and allow it to pass.

MR. CURRIE.-Mr. Chairman, with regard to the amendment which has been proposed by the hon. gentleman on the other side, it is my intention to vote agafnis it. I conslder that the amendment questions the bona fides of the Government. The Premier haa stated that it is the intention of the Government to bring down a bill along the lines of the petitions presented last year to this House, and if I vote for the amendment it is tantamount to saying that I have no confidence in the Premier's statement that this Bill will be brouglit down. When that BIII comes before the House, it will then bo time enough to discuss its detalls. I have every confidence that the Government will bring down the measure which they have promited, und I am prepared to support it.

MR. MORINE.-Mr. Clatrman, before recess I understood the hon. member for Burin to say that he had seen the Government's proposals and was katlstled with them.

MR. CURRIE.-I Raw part of the skeleton bill, but not the completed bill.

MR. MORINE.-You sald that you had seen the Government's proposals and that you were satistled with them. Now, those proposals do not contain is propoaltion to the effect that If the people vote in favor of prohibition the law shall go into force at once

MR. "CURRIE.- It I might be allowed to Interrupt, as far as I understand them, they do.

MR. MORINE.-We had from the Fremfer thls aiffernon the statement that he was following the Canadtin precedent.

RT. HON. PRIME MINISTER.-I flit not say zaythlog of the kied. 1 safd that the Goverament had considered that Hiil. I did not say that fie Government was tollowing it in our own BIII.

MR. MORINE.-You referred to it as an example. Now, if I underatand anything, on exnmple for something that you are goling to follow. I don't know any other meaning. Certainly, We had not the silghtest saggestion from the Premier that ho had any thought whitever of going beyond the Canadian bill He has not made a surgestiou up to the present moment that the Government entertained the idea of golng beyond the Canadian bill. I make bold to say across the floors of the Hlouse that up to the preHent moment the Government have not oven considered going beyond that Bili; and 1 go further, and challenge crithetam now, und say that the Gorernment litve not up to the present entertained the idea of introducing into thls House a Bill which would come info force upon a favorable vote of the people, without uubsequent legls: lation. Thera has beels no suggestion here this afternoon that the Government had had any such measure under conisideration, or hat thousht of it. Now, if they had not thought of this, how coult the hon, member for Burin be satfified with the proposals, In New of hif present statements? Be
cause let us see what that means, in Canada, the Government, as I have been reminded this afternoon by the Fremfer, felt that there should tie a vote of the people on the matter of prohibition. When the vote was taken, a great many people refrained from votting altogether. The Dominion is tremendously large and tremendously scattered. There wiss nothing excopt the eathusiam of a tew temperance people throughout the country behind the movement, there was no organzation to send ipoakers around the country to discuss it: I suppose thousands of people tiardly knew that a rote was beins taken at all; and the reatit was that the number who roted at all was so small that, as the Pretnier has nath, although a small ma. Jority of those who did vote were favorable, the Lautier Governmont declined to not upon it. - The effect of that was thit ull those who were deat, sll wha were absent, all who were sick, and ull who were indifferent, werc practicully turned into opponents of the Bill. If you follow that example here and requitre a certain proportion of the people to vote for the measure the same thing would result here. Everyone who was indifferent, or absent, or dead, or for any other roason cild not vore, woutd be countert as agafnst the Bill. Furthermore, I think I am right (the Promiter lane looked at the Canadian BIII recently and can corcect me if 1 and wrong) th saying thet the Conadian, Bill contains no provision thit prohifition should go into force on II favourable vote, but simply provides for a Bill it contains no pledge at all, other than the pledge of the tiovernment to the offect that if they were satiafied with the vote al Bill milght be introduced. That would bean that in this case, after the vote was taken, the Government might come in and say that they were not satisfied with the rote, there was not majority enough, or something of that
sort; and then the whole thing would have to be gone over again in the Leg: islature; or a change of govornment might take place in the meantime, or something else that would interfere with the Bill; and all the money and effort which had been put into the matter would be simply wasted. If the Goverament follow along those linas at the prasent time there would thot be the sllghtest assurance on the Statute book, not even the verbal promise of anyhody, that anything would result, becatse a thousand and one things might happen which would prevent the plebiscite vote from resulting in anything whatever
Now, the next excuse we hear from the hon. member for Burin is that he will vote against thls amendment becanse it questions the bana flides of the Government How does it do this, Sir? The Government have not sald that they will do these things, so that We can be said not to be truating them. If the Government had satd that they would introduce a bill of that kind. the position would have been different. In fact $i$ will make this offer now-and I am sure that it will be acceptable to everybody: We will not press this ameniment. and we will withdraw this resolution, if the Government will got up now and any that they will introduce a bill thia geesion containing what is in this ro. sotution. We are willing to do that If the Government will say that furthy this session they will introduce a bill provtilng for prohlbition in this country, to go into force on the 1st Jaly, 1916, provided the resalt of the plebiscife vote is that a majority of the electorate is in Lavor of such a measure going into force, without the necessity of any further legisiation in this House, we on this side are propared now to withdraw the original resulution and the mmendment, and accept the statement of the Government to that effect Now, does that look
like lack of confidence? it is not lack of confidence to instruct a government da to what you want them to do when they lave not declared any contrary policy, or when they have made no declaration as to their polley. And what is the declaration which has been made by the Premler? The Premier has merely sald here, in effect, that they have been considering the matter, and that the consideration has been nlong the lines of providing for on plebiscite. H. has not sard as ts what is to follow the plebiscite. He has not told us whether the Bill will go into force as a result of the plebiscite or whether we will have to come back to another session of the House and pass a bill-to have it lirowir out, perhaps, in the Legislative Councll, If not here, or some one of a thousand and one other things that can happen to interfere with the result of the vote.

The hon member for Burin says that this is questioning the bona fides of the Government, and says that it will be time enongh to discuss this matter when the Government bring in their bill. Now, Mr. Chairman, let me denl with that guestion. The hon. member is a member oi a party, and while in that party be is bound by the majority, and the majority of that party if the Government. The Govormment will consider this bill and decife on some course and come down here and support it; and he must elthar vote for it or else get out of the party. Then we will have the hon member getting up and saying: 1 have faith in the Government: I believe in the general pollicy of the Government and am not going to rote ngainst them; and he will support the bill, not perhape because ho likes it but because he bas got to eupport the Government. Now is the time for the Government member who is in earnest about this question to express his convietions in a concrete form, so that
the Government may know what he means and what he will stand by; it will be too late by and by when the Covernment nafl thetr colors to the mast. The sly old fox who leads the Government on the other side would like to have an unpledged membership behind him, I can understand, so that whatever he resolves to do will recelve the entire support of his Party.

Thie debate this atternoon has been a very remarkabte one in several re spects. In the first place it has been marked by brief and excellent speeches, dtrectly to the point; and in the next place it has marked a high-water-mark in debates on prohifition, in that it hits been sulmitted by prnctucully everybody in the Mouse that prohibitlon would be a good thing, if a majority of the people were In fivor of it. That is the best that I have ever lieard in this House in a debute on this subject. The question is, however, not prohibition, not the ntbuse of ilquors, not individunt liberty. The question is: Are a majority of the peopter in favor of prohibition or not? Now, I wonld ailvise all those who are in thyor of the oristinat proposition, and 1 am one of those, to vote for the amendment, which will come tirst, biscase that brings the debate here this stternoon to a concrete action. If the amendment is lost, and any other amendments that may be proposet, we come back to the orisinal resolution. But we who are in favour of the original resolntion ought sil be in favor of the amendment, becaute white it witl not reath in dreet prohibition, it will send the matter to the pieople, and direct prohibition will result if the vote is favorable. As Mr. Kent, the Leader of the Oppositton, put it, the question which we lave to consider at the present moment is not should we have prohibition, but should We hive an plobifecte; and whit thatl result from the plebiscite? Shall it be merely a declaration, to be followed
or not followed, as the case may be, or shall it be something definite? Now, the proposition before the Chair in the amendment adopts the princlple of learing the question to the people, but it goes further, and says that the people's volce zhall be decisiro; it shall not be an empty expression of opinion, but, if favorabie, it shall ho final and effective, and inexpensive because it will be worth ft. What is the use of beating about the question? If the only question is whether wo shall leave the matter to the people, then let us introduce a well-considered prohibition measure into this House daring this seacion and have it put on the Statute Book, and provide that It shall not come into force untll a plebiselte vote of the people has been taken, and, If a majority of the people are favorable to It, then, by a mere proclamation to that effect, by the Governor in Councl, it shall become the law of the land, to go into force on the 1st July, 1915; then the people of the country wil have some return for the effort which they may make. If you adopt the other course, what will happen? Why, the temperance peopte, who will have to to the work. who will have to bear the expense, cven if they succeod in securing a maJority vote, will still be at the mercy of the Government of the day-elther this or some other Government-as to whether a bill will be introduced or pot. Let us liave a measure providing for prohibition, if the people decide in favor of It , and then there wilt be no chance of interterence from the Government, or another House, or any pf the things which might otherwise render vold the declsion of the people. As I have sald, the temperance people will have to do all the work; everyboidy else will stand on one stde. Well, then, these people have the right to a guaranteo in adranco that if thoir work in successtul the resuit will be prolitbition and not a mere promise.
it appeara to be that that is a doetrine that ought to appenl to every honest, square man in thle House, no matter on which side he may be; and therefore, this amendment is one which the Government could accept. It ts not a vole of want of confldence. Nobody has mentioned that idea.
The Premier said this afternoon that he thought $\$ 10,000$ would pay the expenses of the election. Ithink I am right in aaying that a seneral election costs something in the neighbourhood of $\$ 50,000$, and while it is true that some volanteer labour will be given it thie instance, yet I think it will be found extremely difficult to get the oxpences dowti to that figure. But whatever the cost is, we can ill-afford at the present time to spend it without getting some good result.

Tho hon member for Twitlingate, Mr. Olift, said this afternoon, I think without sumfielent consideration, that Insteal of pressing this matter here now to is dectston, we ought perhaps wait until the Gavernment come down with their proposuls, so that we might bee what they are. Now. nolbody thbould know better than he that then It will be too late to do anything, if the proposals are not satintactory to its. If the Goveriment come down with a propasition, they will put it throush the House; and theretore to walt until thon is practically to leave the matter in the hands of the Goverainent 1 don't think that is a wise nuggeation. But 1 finve been authoriz ed by those who sit on this slde of the Hotise to say that if the Government will undertake to introdace a Bill during this session, with a proviso that it wIIt to thto effect upon the vote of the people biling favorable, we will withdraw this resolution here now; and leave the whole matter to the honor of the Govermment.
MR. HIGGINS-Mr. Chairman, I have already apoken, and I do not intond to occupy much of the time of
the House now; but I think that certain of the remarks of the hon. member for Bonavista must have conveyed to the House the fact that it is a good think that we have as leader of tho House the "sly old fox."

MR. MORINE.-A good thing for you.

MR. HIGGINS.-A good thing for wis all, because 1 think we must all admit that is will renulre some sly ofld fox to keep track of the argumenta of the hoin. member. What his actually happened is that he has assumed the posttion of Master of Ceremonless of this affair, and he tins Aung at those of ua who are daring to vote againat his amendment the tount that we are taking refuge under the party wing. Nos, I would ike hilm to know that when I vote against the amendment, as I shat do, 1 shall vote agatnst it because, unThe him. I have confffence fo that sly old fox, and, urlike him. I am not unminaful of the fact that the Leader of the Goverament, from this place at this Honse, lus informed the House, and through the House, the country; that the proposes to accede to the wishes of those who petitioned this Legistature in connection with this matter, and that during thit seasion be will bring down a mensure putting on the statute book the plebiscite that they have asked for, and 1 have sufficlent fuith in him to say now that I believe be will carry out that promise. It is not a party measure is not the poeition thila, that the history of this Government has been that the requesta of temperance peopte have lind from It a more frlenilly ear than from any Covernment in recent hiatory? The temperance people come to put a straight-question to this Government, and the Government tannounces that they are going to grant the reguest. 1 woutd not be unkind enoagh to mise gest that this is being viewed from the intandpoint of a elever politician. When we fight against the amendment

Tve to not fight against prohibition The hon. members opposite heard the statements of the Government. What I understand is that the Government had under cousideration the petitions that were presented last year to this House. The Government proposes to put the law on the statute Book and take a plebiscite. The Government that woutd not grant what the people want woald not live 48 hours afterward. No Government would dare take upon itself the responsibility of refusing to the majority of the electorate of this Istand what they want. If a plebiscite was not granted when the majority wanted it, I certatnly would not remain with such a Government. A lot of conslderation has been given to the fact that an etection was held in Canade on this same question, which was turned down because only 23 per cent. went to the polls. This cannot be satid to represent the people. A bare majorIty of those who vote must not kovern a question like this. I trust that the Government Aet will be to that effect, A majority of the people of this Istand have to decide the question. Because there are some people who are strong on temperance in a community, is that a pronouncement upon which the Government should work? That is a provision that I should expect such a bill to contain. It was suggested here that there was a burking of this question. But that is not so; it is the Government's intention to bring into this Legislature this session a resolution for a plebiscite of tho people, who will then get the benefit of the bill, I wish to say this, that I think that the hon. member will find that there will not be any attempt to make a party measure of it. I am voting against the amendment because I think that it is safer to limit the Government on a matter like this. I have no reason to vote for the amendment, because I know that the measure will aatisty the members of the Opposition.

MR. MORINE-Mr. Chairman, the hon. member for St. John's East, Mr. Higgins, who has just sat down, tells us that the government that would not introduce a bill after a plebiscite in favour of It, would not live fortyelght hours But governments in othor places lave done the same thing. and they are atill living; If however the people of this country have the good sense to put us in power, we will put the measure into force.

There is another point that I want to make; no government has power to bind the Legislative Couneil; nor has It power to force the Upper House into line. The hon, member cannot see how a bill could go into force without the majority of the electorate behind it. Fet the opposition on this side of the Honse bas had a majorlty vote behind it for the last two bessiona. I do not know the exact vote, but 1 do not thifnk that the hon. member represents a majority of the vates in his own district. The member for St . John's East said that with him it was a matter of principle. If the bill must have a majority of the whole country behind it, the indifferent and the stok and the dead who are on the voters lists will be voting against it. The prinelple of the resolution is to have prohibition if the people wish. The date which the hon. member fixed is far enouzh away to be conventent for flnanclal reasons. In all great measures, practically every measure is introduced by a resolution expressing the principle there is in 1t; and then the bill is introduced.

MR. COAKER-Mr. Cliairman, I ask the member for Burin what he means when he states that any plebiecito must be carried by the majority of the electorate and if he atill intends to take the same position.

MA. CURRIE-The member for Twillingate is mistaken. I said nothing regarding malorities; he must be
quoting some other speaker. As the cuiestion has been ralsed, however, I desiro to say that in my opinion a frilr percentage of the total vote should be obtained to carry prohibition. I do not think, fir instance that If say ouly twenty thousand persons went to the polls a bare majorlty of that figure should bing the measure lato effect. It would be too small a vote.
MR. MORINE-What vote would you constider necessary?

MR. CURRIE-III tell you that in ter,

MR. COAKER-You go outside and preach temperance and then come in hiere and sily that you will not vote for 'it. The hon. member for St . John's East said that the history of the present हovernment his been that thoy acceded to the people's wishes. What action was takea upon the mattar last year when those petitions came in. The temperance bill atd not go in and will not get In. Why, doen the wovernment come here and state that they were golng to introduce a biti and sive tho people on opportunity of voting on the matter. We have found out the facts. We believed the goveroment last year, but what did we find: thelr promises were not fulfilled. Why do you make a party measure of ti? Come out and end this: debanchury. Are you goling to make a party measure of it? Thore are 6 or 7 men on this side of the House who did not ever taste ilquor and who woutd glve thetr livee for the bill to come through. The temperance people might eg well go away for they are not going to get what they want. I did not chango my viows to suit Mr. Morine and do not Intend to. But I am willing to listen to the acvice of my seniors. This goverument would not live forty elght hours it they did not accele to the wishes of the people. Who is golis to tarn them out? If it was aa casy to pass a prohibition
bill as it is to turn them out, then we will soon get protiftition. There are 20,000 more voters on this side of the House, than on that. What have you done with your minority rote? Why did we last year trust to the word of the Premier and of the gorernment? The defeated candidates of last election were sent up to the UD per House.
These two brillime men, these two most popular men went down to thelr districts after so many years of ser vice and were hicked out by the eleetors it you can put up with these men you can put up with anything.

Last year when we brought up in this House as very serlous matter in comnection with the Minister of Fr. pance and Customs we were told that it was going to be Investigated in the Supreme Court. Well what has been cone and where is the investigation now? Are we going to have a result like that In connection with theme promisea for Probibition? We want you to put in black and white what you are going to do in thle matter coming up year after year but we want you to bring in a bill to hold an election and if the people vote in favour of Prchibition then let us have Ht once and for all. You have a chance to plass total Prohibition right here and now. There are some men on your side of the House of pronounced temferance prineiples and we will all vote for it. What is the need for all this row that has been started over thle measure We do not want it. Things have been golng very smoothIy for the two weeks that we have been sitting. There has not been a divintion of the House and there has never been a session when the gorernment and opposition have worked so well together. But it you want some thing else in place of that and if you want trouble I for my part am quite prepared to give it to you. Now I
wonder if I can nelk the Premier to tell me exnetly what he is going to do In this mattar anil if his explanation is satisfactory we may be able to droy the whole matter and withdraw thin amendment to the Repolution. Ais 5 matter of faet I know that quite a number of members on that slide of the House will vote against the Resolur tions and agnirist the smendment be cause they think we are encteavorling to make political capital out of this question. Well, now, I promise you that if you will meet us hall way we for our part will attempt to mnke no political capital out of it. We are only to do our best in the interesta of this question. We sare all dotermined that we ghall have Probibition and I believe that if we pass- It you will be doing the best thing that you have evar done for the country 1 believe that sinceraty and truly and I will work for it and do all in my power. Now a sood many members of the House believe the same and where will you find the man who will go out of this Fouse sind say that he voted agalnst Prohibition being put into force in this country. Well then If we agree on thut why can't the Premier get up and say that he will bring in a blll providing for those condition lafd down in the Amendment If he will do that we are rattrised. We are not divided on the matter and we all say that we would Ilie to nee these tornpertuce reforma. Why then not. get to worle and sette the matter once and for all It is too serlous a matter to be Highting about and we have been talling about it for the past two years.
(1)MR. DEVEREAUX-Mr. Chalrman, It is with somewhat mixed feelings 1 rise for the purpose of discusiling the quantion before the Chair. Thero have been many differences of opintion exBressed in regrard to this great questlon and I feel assured that we ousht
to sive the equetion itarif our utmost regrart becruse it if gifter all it maryl question and one that inembuten itbelf into evury was'a lovart and it ought to he con\#\#fared by every one and espeninily by as reprenchiativen of other men tis the question in of the utmost impartanee, Nexertheless I irgret to- bay that there have been vte rf two trentments of the question fild evening that are not altogether in lime with the mubject to be considered. There is in the firat place tho questlon of reveria. Those who are in favour of Prohibition maile Hight of the financial arpect. that If In sor far as they have touched upon it and onIy referred to the $\$ 350,000$ wh sh if derived from the duty on Higuor But, Sir, that is only is small part of what nuat be consldered in relation the the corrying out of this question of Pro bithitian. Supposs to-morrew thlis Houke by il majorlty vote carrier Pra hibition and we lasue our pronlamittlon it weak. honce, where fa the provialon for carrying out the act Where is the small Item of $\$ 350,000$ t? be considered in relation to the Immens? axpense that will be entailed on the country in properly carrying out the aet, because no man kurely prop-wer to curry a measure through the House without belng perfectly satisfied that the country in capable of carrying out the law in every particutar. Just think for yourmelf, Sir, we have in the vieinity of the Colany millions of fal. lonin of Higuor, within a tuw miles of the const and we liave to-day a rev. oate boat or sametimen two and it is sald in the public Press of the country that theue are incapable aven at present of protectling certaln sectlous of thes const of thin country. Think What wil happen if you passed thia Prohlbltion. I ath propared to eny that if I believe that to-day it was posithta to carry out the menare in its entirety and to the satigfaction or
the people of thls country I wauld be one of the firat to vote for it but becanse I belleve that it is impossible under the present cireumstances to carry it out, I believe we weuid be otily ittultifytag curselven, ant 1 be Heve if Jou purs in tiw and are unatie to earry it out you rus the daniger of hringtag that iner and every other fan in the country trito contempt. If yon caanot carry out the law you create a vast number of stmukglers, men that will be night and day contravening the law and every sutisldary taw in connection therewtith.

A great doal was said because the Government was not immediately prepared to norufesce frin the propasttons before the chair. Well look at tho Mother of Parlimmenta. Look at Gladstonn, Bisraeli and various parilamentarians that we read of in recent history, Look at the legislation In cannection with the Corn Laws and the Ballot Aet and other great measuros passed through the Commons and toots at the number of yare and brilliant spueches and the number of sessions before thnee became law. Now we sit there and when any meature comen up it must se given careful conatideration because the Government has not only to think for liself but for the whotn people. Not only for these that believe in their palicy but also for thoes whe oppoes it and it is enly naturnal to think that we chould take thme in ronsiderfing what we are totng:

Now refereace has been made to Ietaperance legisiation in the United States and in Cauada but is there sny: one th thifi Hfome who can stabd up and say that anyone of thepe acts to these varioun states or provinces are betng carriod out in any tegree the whit wan expected by the temperanco people. You have to-day in these places Jrus fiends, oplum eatern and the inke of that. Are we going to intreduen that here ? 1 may we are unlems we are prepared and the country is
able to carry out the Act that weiare about to place on the Stutnte Book. (our latand is large, in coant line im: turnat and the people acattertal afl कver the feland an the frimee of the tra. How are you gotige to provent with our preatent machinery or even with treble that machinery, amucgling to this Colony. Trke care that you do not create a greater evil than you hart a' the proaent triaw It is nother for ins fipuontisan or any par? of tien to practleally make the assertion that thin country la not practically pober becasue it in . Rivery towa outside of the cits of St. John's is under the Thernaluike Act. The people carv Fled tocat Option themselves and you have no right at all to stand op hery and make the statement that these men are aaythine other than sobor. Surely a mana fo not a druntard or fintemperate becauso he takes if glana of spirith and it surely is not contended that such a man is going ta brutallse himanif and fall lato at drais because other people nbuse liquor. There ousht to be a tlintlaction betwern the man that taken hla shaw of wite ant the zans who brutallese himsielf through alcohol. All meatienl men atree that tifpuor ta becessuir Io cepfith cases and we know to-day we Lave in thls Colany the snbereat pesthe on thin side of the Atlantic anit we abould take care that we do pot do anything whirlt will ofen the door to crusting creater evils than at pre font rxiat. Do we intend to bring eurnelves into contampt because of a fev iodiriduals lis the communtiy who aro accurtomed to mmiking bruter of themaelves by the mbuse of Iliquor Surely .Sir, this is a quention wherein morat suaston comen in to a large degree and we have men with un this eveaing those leaders in temperance who are prepared to sacrifice their time no matter where thoy may te and who by the example of thelr Iives are prepared to show the value

MR. KENT-Mr. Chnirman, I have elvaity apotern on the Re=alations befors the elmir, and 1 do nat intest for dutay the Tfoumen now. I To not for one mument witit to deabt the bons
nifes of the Fremier and the Government. I beliere when the Prime Min: ister moves.it is his intentien to bring tii Tusfisitfon for the remener we have Beell discusaing it believe he intende io thave the meanure carry out the fatentions ot the men who have ofgronched the House
I state here freely now, what is the position we are in at the pronent time. The Recolutions that are now before the chair and the amendments submitted by the hon tmember for the dtstrict of Twitlingate, would be in accordance with the winh of the Gorernment. There to acarcely any tit terence between as. 1 dou't think this roatter rhould be mate a party question. I simply speak here my own opinlons, and 1 bave always expressed that 1 thisk of the matter. I do act thint thet the sule -ur mennfuctare of intexicating liguors is in itself an evil. It is the abuse of that commodity that tringe about all the trouble I think when we come to consider legiatation for this country; wh hive to conitider what exists in the country; we are not to compare this country wilh ofher countries, because we hute not the rame evile arfitng from drink here, an in other conntriea. Mont people who have nena other countrie kaow yome of the evilin that this eountry knowe nothing about. Now, why then tio we eupport resoluttons aaking for the decision of the people? I have sal! thefore that 1 to not want peoplo to think that it is right for thin House to submil any questions of legialation to the peopie for their deciaiont. Here is the place to decita th. What the ro sult of a pleblecite will be I ksew sot. I have my own opinion on the quention of Prohitition. There are many ciffr cantected with the conrmmption of intoxicating liquorz.

MR. LLOVD -1 tine the second tims to express the hope that this matter will not be regarited as a party quet-

Fioth 1 caanot agred with the Col. dinial secretary's position rivarditis the amenitment.

If we are golng to pane ati act let fis embody it in the Resolutions. Thum the reritt of this terithetion wilt ke final and every cone will have to ant eept the conditions as ther are wheth: er the people decide for adoption of Prohibittont or continumern of then whle of Ilquorm as exists at prement in tha country, I was natounded when I heard him.

The Hon. Colonital Secrotary han giv: en us an fatimation that the Goveriment have made up their minds to waike thla vote a party rote There can be no other conclumien. You arn determined at all cost to make If a party meanure. We are not dotng that. $f$ hirte licen strtiog bete mandarine Fhat all the talk \%as about, for the fife of me I do not hanow yet; because tw the main what members on both Hides of the Houre have mald has been futtrety tir merort. Bat the Hom. Cotonial Secretary saye he will have po dictationt Something on this stae of the House shall not cross to that side of the Houne. I always understood that these measuran have nlwayt been treated as tien-party meapures, and I thousht until I heard the Colonial Secretary nay that this vote wan to be a mon-party vote tat me polnt out to the Goverament that the Gavernior in fais Spench from the Thronn maile no feforence to this as a party meanure We leard nothing about if until we were well on the course of the dlecis: tion. Sotne of trr on this ntte who aave nupported the mranure have lintimated that they intended to vote akainnt the Remolutions of the hon. tumbier for thay the Virtof, Mr. Hick man. One rasoon is that we don'? want to embarrases the Goverument: that we do net want to embarass the Finance Minlster; that we do not want In passing these resolutionis to takn
from the Dinance Minister any power of ralsing money for the next year and the balance of this year. There will be ne embarrassment for this year. We will not take a vote now on Prohibition, hut a vote should be taken about the 18t of November. There will then be no embarrassment for this year. It the people are willing on the lst of November then it will not be brought about till about July lat 1916 therefore protecting the Government from financial dimculties for 15 months trom to-day. We are not treating the measure as a party measure. I wish to remind the Prime Minister that by coing this we will follow his own example of a few days ago. It will be remembered that the Premier introduced into this House a mearure with rogard to focal government and referred the Bill to a select committee. Betore doing that he said: "Let us have the fall benefit of the suggentions of the whole House." We are trying to give him the benefit of our tdeas. Why are they rejected? Meroly because they come from thit side of the House. If we wanted to embarrass the Government we would Lave voted for Mr. Hickman's measure, but we did not. We showed the Government the way out Am 1 dictating to the Government when I rise and, make suggestions? Is that the dictation?

HON. COLONIAL SECRETARY.1 do not refer to this at all. I refered to the umendment you were try. ing to force.

MR. LLOVD.- Why should as metnber of this House be nccused of trying to 'dictate', merely because he proposes an amondment to a bill. After ati, I speak in a strong way, but at the same time the main point remains, what is all the pother about?

HON. COLONIAL SECRETARY,I am prevared to support the motion for a plebriscite on Prohiblition. I said I would support anything that
would be brought to bear and bring about a plebiscite on Prohibition.

MR. LLoYD,-What I said was I understood Mr. Bennett was prepared to support a motion for a plebiscite on Prohibition.

HON, COLONIAL SECRETARY.It is incorrect.

MR. LLOVD.-The Colonial Secretary is prepared to support the Premier's Intimation that he fintends to liring in a Bill to provide a pletiscito.

HON. COLONIAL SECRETARY.Yes.

MR. LLOVD.- Hut at this stage he is not urepared to support a motion for It. He will do whatever his bons aske him. That is what you mean! Is that why so much twisting and turnIng about ta being done. What is it all sabout any way? Who asked for this resolution? We haveno difference in principle in the matter of whether we need the plebiscite or not. Every apeech bere to-day has been in favor with thla resolution and yet because It comes from this side of the House and has the sanction of this side of the House the Government will unite and vote it down. I have heard from the other side of the House another argument One of the hon. gentlefaen was not golng to support the blll becauee rome other ansembly might nulify it in a succeeding year. What nonsense. Does not thie member know that whatever is done here to-day can be reversed by the Goverument of tomorrow? If he is golng to take thut attitude it is an indication that he is going to do nothing whatever, because a subsequent Parliament eun reverse anything be does. Then when a member of the Oppoaltion polnts out some amendment or suggestion the taunt is thrown out that the reanari was proffered with some sinister mo. tive. This fs fitnted at. The hint was thrown out that the members on thils aide of the House had entered Into a combination to attuck the Covern-
ment; that they had made a confederation among themselves to embarrass them financlally. I mas point out to the Colontal Secretary that there is no need for those sinister hints agninst this ide of the House. We are doing our test to help the Governmpht out if this hole and to protect them. Is it true that the Government has in this bill lacy aro going to bring into this folse authorlation for is plelitacte? If so we want to know where ther ase going to get the lost revence from: we bave no means of finding this out, arit becauige we are tad Opposition and on this side of the House, all our opininne are unheard ald condemned.

MR. HICKRIAN.-Berore thr alscus: kion advances further I want to mike a few remarks. 1 would like to make clear fo thits House that this rogoluthon was not put into this House with the futention of embarassing the Goverament. This is not a party resolution: not an Opposition resolution; and I have nelther solicited suppori from any member or brought any pressure to bear on any one in its favor, if to vote againet the Goverament means that those who do so are questioning the bona fides of the Government, I for one wiil not lay myself open to such accusation.
MR. MORINE.-Mr. Chairman the hon. member for Trinity Dr Lloyd, wants to know what all the troubte is about. He can see no substantial difference betwren what the Oppoaltion ask for and what the Govermment promises. I would tike to make it clear to him that what we want is a measure that will cover the full requirements of the case. Our resolution requires a law providing for the enforcement of the law automatically upon the result of the plebiscite. This the Government has not signified its intention to sive and without it as plebiscite would be useless.

Then again I think the member for Trinlcy tukes the Colonial Secretary
too seriously. He tried to disubuse firm from thinking that we on this side of the House were stage acting and trying to dictate to the Government We must excuse that. We know that it is but an indication of the party whip. We know the Colonial Secretary and no one lmows better than be that we could not if we would. dictate to his Government, as any mesaure wo proposed would be sure to be defoated by a party vote. I think that the discussion that has ensued here to-day has been not in the form of dictation, but merely the une of the prerogative granted to the members of this House. It is the endeav. our of every Government to set the support of the whole House on their measures, and no anne man would aeeuse the oppositton of trying to itietate to the other side. I do not think the Minister at all serlous in his remarks.
Now that crafty old schemer the Prime Minister, the sly fox, has resorted to the same old excuse which has served himm more or less durling his minintry, the excuse of the revenue. If this country cannot be kept up except by the ald of drunken citizens, It is time to get out of it. Such a sugcestion is not worthy of the difIilty of a debate in this Legislature.
The Colonial Secretary told us that The Government contemplated putting into practice the measure the Premier told us about. What te that measure? That is what we want to know. What dire the princliples he promised to put firto practice? We are not doubting the Premfer's atatement but tire meroly esking tim to give us some definite information. We will accept his eliergue if he will mark of it the date and conditions. They are contemplating nothing; they have promised nothing; and therefore we are to conclude that their refusal amounts to the fact that they have yet to constder the gensure we were told was to be intro-
dured. The Colosial Secretary has tald us that this resolution doen not completely exclude intoxieating liquare. Would it then -have hla support If It were made more exhaustlive in Ita application? I woald invite them to conifider as an amendment the insertion of words to make up the defich uncy complained of by the Colonial Socratary, We will accept their dicfation and put in theme words if they will हive the amended resolution their rupport, We will allow them to dletate to uk. What we want, Mr. Chalrmant, Is a vote the result of which will fix once and for alwaye without further legiatation the dastination of this tratil. We ask the Government to lirlug in a bill which will give this country total prohibition automatleally upon the result of the pletidecite it that pleblaclte be faveurable. They have not manured us that such will be the make up of the bill they are considering. They have assured us of nothing; thair promisen are vagus; they trilt not anoure us that the bill they will bring ta will need a majority of voten cant or of votes registared. The trimperance people want this to settle this matter and do not want the country to be appealed to on a ballot whith hus not its own machinery to complete the woris it starta. To pans a bili without ineluaing in it this highly nemssarary point would be to try to delude the public, and the whole vote would be a delurion and a enare. We ought to beneft from the experience of other countries anit know exactly what booefit wilt aecrae theretrom before spending the money necessary to carry out such a plebiseite ns askad for.

MR. COAKER.-MHy I \#tik if the Premier has any other further announcement to make?
RT, HON. PRIME MINISTER.-II I had I would have mide it before this.

MR. COAKER.-Well are we going on or what?

RT. HON. PRIME MINISTER.That is for you to deelde.

MR. COAKER.-You are the lender. You have to express your opinion.

RT. HON. PRIME MINISTER.-We will continue if you whith.

MR. COAKER. I would juat like to say a word or two in reply to some Insinuations that have been made here thie evening. It has been sald that this bitt was brought in with as strils. fer motive I want to say Mr. Chairman, that Mr . Hickman nover asked us to support his resolution, nor had we a meeting in connection with this matter. Nelther the Liberal Party nor anybody else wan asked to support this measure. As far an Mr. Morine was concerned he knew little or nothiag about it until he was asked by Mr. Hickman if he would second the resolution. Mr. Hickman did not know whether be would do this or not before he asked him, and so the Insinantion of the Government mensbars in liable to convey in wrong inpression. This resolution was prompted by no ulterior motive, and was the spontaneous suggestion of Mr. Hiek man and Mr. Hickman only.

Mr . Speaker reaumed the chair.
The Chairman from the Committee reported that they had consldered the zatter to them referred and that the Rellolution had been negatived.

On motion this report was recelved. On the motion to adopt the report Mr. Morine moved and Mr. Coaker theronded the following amendmant:

That in the oplnfon of the Houne the Government should introduce:-
(a) A Bill prohibiting the importatlon, mannfacture, and sale of alow, wines, beers and similiar beverugen and all apirituons liquors withta this Colony and its dependencies.
() Containing provisionis for taking a plebiscite vote of the election on the queztion duriag 1915.
(a) Containing aleo a provition that the Bill ahall come into torce on the

Lst. day of July, 1915, if a majoriz vute in forsur of the ath.

Mr. Parnonis tools the Chalr of Committere

HON, MINIBTEA OF FINANCE \& CUBTQMS-Mr. Chatrman, I do not think there In mueh for me bo add ta the explususton I gave when introducIng the Estimates on. Miniay lest. If thore ta any information necesury an we pewn the rotes I whall be glind to sfro it to the Commalttee.

MR. MOFINE-Mr. Chalrmanh, When the motlon for aupply Fan made two or three days mign, it drew the attenthan of the Minleter to what I thought would be a very proper praction that in sfer of the financial aitnation he bould Aepart from the usual practice of makite hls Rudget Sprech when zoing teto Whys asit Meats and make it whem golus Into Supply. He conid of course defor any explanation as to how he proponed ralitas the money untll he went fnto Wayir and Means. If is common lanowfedre that the fitiancial situation of the Colony to ex tremely arave. The deflett last year aporoached tyoe, 00e and a very larise fefilit may De expected thlis year ac that thet total of the twe Juar will probably approach recy cloeely to in million dotire in alditios to vileb there fe a large war expenditurn that wili probably so tuto anpther mil Hen th the courne at the twelve thontha Of course we zniferstand that this is marely a loan from the Britinh goverrment anil we zre onily Hasuming the intwrest upon it. Thern are th addition larce outstandlng obll eatlons amounting to a kood many milHone of dollart and upen whileh the tomporary loan made momil time sigit bas to be prurided for Now under thene eireumatances it is clear that the fixancial sifantion is extrunctinury and a departure from the practice for murrly ndupied ought tu be made. The turual way is first to go fito Supply and then later futo Wuys and Means
lut thin pronoviare is ngron the ansumption that cendicions of affaify are non mal aild that lisdinary provition onls hure to be madel, that the changes in Hupply are onily for adrnisiatrative Furpopes and Che chanfs in Fevente Sleoty to be small and consequetally there is uetrer tunch trouble In golag into the guegtion of Supply, before you have any peseral statamket. Tut It ap pears to the that we have geot ista the condifios whin we hare to conslder pome surlh action an was taken in the winter of ZBis whem a cut lad to hn tusde is mery biranch of the eervion. If masy be wis the other lantid that thel fovermmint wil De whia to suhmit finaricial proposals that can meet the eftualtus, hut we ought to have sume outine bufore we are uskind to pase theae Derimaton So far as we have them befnev us they emlirnce larce cums spent last year and to be spent thin ywar and we hrwe nist biet given ally information is to how thers sire to bee provided for It 等e clear that thiey must bo provilied for by ahmormal ter lutation BY ikratr increnses of taxsflon and by lirge borrowioke looking forvand to at Improvement ti our ar fairs Hefore we vote thasee supplier we laivt the richt to know whether We Bhall approach the solution of the probilem by a lircad cat of eapeaditurn. for Aatitional taxatiots, of by tryite to borrow momer. Now for theme Teal Jun I resperffully thrme out the sur cention and 1 hoper it will be sceepe. fol by the Government. thiat tantent of procuediau with Supply we should Eidjourn it until the Minister of FI. hapen is able to make a lisoad rieancial stutement of thas expernifiture us to the und at the kewr, and how be propones proceediag the coming year Then we will be able to conslder thene voteo an they cothe lenfurs un Ma far he. I dian whe tha Eatimaten are frande up on the olf model. There; mems to have beut no rleclderl cut, in
lhet, some of them seem to be made $u D$ of over-cxpendituro in a way that ta growa too common and a bill of inderonity lif nov sought for them 1 hope he wili take the suggestion in good part and not refase tt simply becnuse it comes from this alde of the House.

HON MINISTER OF FINANCE \& CUSTOM8-Mr. Chairman, I regret that I cannot see eye to eyo whth the hon. rentleman. The course that we have pureued is the usual ono. All financial statoments necebsary have been lablod before the Estimates wera brought down and any information asked for by hon. members has been given to them. In his remarks he beemen to foreshindow that certaln unusual thingh are goligg to happen and he aakeg that we tell the Houee what these are, I do not know that any. thing unusual is going to happen, 1 to not know why wo ahould come down with a Elanacial stitement be fore coming down with the Fstimaten and until we come down with the Budget Speech There is no reason for it whatever.

I remember that in 1898 when the member was Finance Minister, he did not lay on the table of this House the financial statement before Supply had been considered by the Committec. The finanelal statementa asked for will be tabled in tue course and at tho proper time, and I see no royson why the uaual custom should be departed from during this particular nearion.

MR. MORINE-I ask for those doeuments almply bocause the coadltloms this year are eatirely different to any pravious perlod. We are faced with a large defiett and th all prohablity the coming year for whice we are now providing will bee a muck larger one: 1 did not make any such statement as attributed to me by the
hon member at the time I brought down the railway contract in 1898 to the House, giving as a reasos that it was necessary to pass it $a_{g}$ the Colony was on the verge of bankruptcy This charge has repeatedly been made agalnst me, but 1 made po such statement at that thme. Then, ai now, the Colony was passing hrough a critical period haviog to face a large defict and the outlook was anything but oright and encouraging. I think I have a pretty fair fdea of the finanetat condition of the country and the necessity for the Finance Minister to make provislon for the deficit and for the civil aervice by way of adopting drastic measures or meeting a shortage by means of a loan. Owing to the abnormal and unusual conditions existing this House should be in possession of the financlal statemients asked for before votfag for the estimates of the entire Clyll Service.

MR. KENT-Mr. Chairman. I do not wish for a postponement of those Estimates, but as a great deat of my time has been taken up on such work as select committees I have not had an opportunity of looking into them. 1 would therefore aak that their conslderation be deferred.
1 think that before we consider supply we should be given some intimation as to the financlal condition of the Colony and I am of the opintion that the request made by the hon member, Mr. Morine is only a reasonable and fair one, and one calculated to expedite the business of the Howae.

MR. COAKER-Mr. Chalrman. I wish to impress upon the Government the deslrability of eetting through with the busfness of this House aE aron as possible. The busy scason is at hand and hon mombers on this alde of the Hoase, partleutarly those sitt-

Ing for the back row, must return to thair homes an early in circumatim: cea pernilf. Mr botleakue Mr. Jernisek, clinitot remiln much tonger ats the engagen in the herring burtmene, and tha stow thing appliee to other froth, momberte Thily air wett lan my. welf attend hern at thls time of yair at a groat loes, consequently it is necoer shry that we ahould finish the buitm-

HON. MINIGTER OF FINANCE 4. CUSTOMS-1 linve no objection to tofor the comitteration of thife matter tuth Manday next I see however, no reisson for departing troas the unaal course I must say wn are in a ioiftrati to atriver miy reaschatio guestions concernits anything the hon ractaker may desire information on.

MR. LLOYD-Mir. Cheirman. The consent of the hon mininter to in postpozernent ta mont acceptable, and we very much uppfeeiate lile acoeptance of cate fequeat. As rogardis the infarmition lie referis to, I wiuh to inspresis upon bim the fact that we do uot destre to enthurrasa th any way the govermmunt by our requests tor informotion. But if there is anythtur that coald oith coavmatence be kiven His, ser waulh he tanit lappy to reeaive it is there sothing we may be totd about linw the Goverumintit if kohng to miont the doricis. whether there fa any meana proflided for thes by loana or otherwise: Any Informisthon trom thit Hiat would help is to praparin for them statomente will I thinh he lie framil it prastith it fuelih. tite matters la the ead.

MA, CLIFT-Mr. Chairman. The rergust of the hon- mimber for Bohavists, Mtr Morine seems to man a fust pnit proper ona when wir vonatter the oxtrionitinary cfrcumstances af fecting the prencont seresion I think =rd ought to have givan wis a deblt and erefit itnemment of pubtie irfatre al

They now stand in order to facilitute our prosent discuastons. From the Information wo have, we can zather fo tancilite finowiclage to enlighten us in this dtraction. Thern asemir to bo ao nubutantial reduction in any jart of the pubtic nervices. At a time perch nit the preaent we outhe to hovin eomethinisvery subutantin! in the way of riduction. Certain ealarles an far Aa one can fudge are capable of retuction lund until the minlator can fhote tis exnetly what he if zoiter to do to maintata the requisite rerenue क) funtify the malntenance of thase publle survices wo are suabile to offer dip ertitctrm.
MR COAKER-Mr. Chatrman. Thiere pre varlous Itoms aych as the Agricul furzt Grant and othere whith we ith tand to oppose the government upon, uniti they are able to prove to un in what way they are going to meet all these expenditures. If they can prove these things to our matiafaction, we ghall be pleaned to accord our hearteat aupport. But these will have to
 bevo no defire to embartumes the kovcrument, but 1 think we euktat to be In poenctaion of the various facta पhate are nenchital to our facilithtfan the buetness of public atfatra.
MR. LLOYD-3IF, Chairiasn, It thinh YC rustat to be in posroartion of theen frete I thimk we stombit tave phesent hefore uis statements of the firimelal emifition of the Colony, and if poestble a very egnoral atatement as to the eaurse the Government proposoa to adoni. It ban been stated that the empee procoeded upen by the Minister of Finanee and Custome ts the unual ane 1 grout lutm that, absolutely, But in viric of the provilitige conditione 1 think thast the proceerfure of tils Houme ta it utufticlently elartic ons tif anable the courgan Euggented by Mr. Marine to the adopted with advantage $I$ ask the Premes to conistder thiur ro-
quevt. 1 tinay asy thit I have some liden of the financial affules of this Colotic, and is lis ouly to ald the Govmithutit int the Trimb Mrtititer that If maike this reguest. I have ne destre to hive this Howse helit up, and I auk aralin that our request that this course
 tian st the hanis of the Qovernment:
MR. STONE-Mr. Chatrman: I thithk 1 ami in a ponition to bear ont whit the tion memites, Di. LJoyd, has mald. We de not want to emburruse the Covernment til any way. We mernty ask that all should know the coudition of the country hetore theal. int with the entimates.

MR MORINE-I winh, Mtr. Chatrman, to Juntify mysolf alno agrainst diat asperaion. 1 to not mean to inlalite las enptlous eppouttion etther. but I am not prepured to gtve my as arnt to the ntateminat of the Flanice Mintster: Up to 1897 the practice of the Honee was to wote moner for the currett pear, and to lerthg down s finaneint utntrment at the mumb thme जlth the Firtimaten. It was I who insatiutiad the praseat practice fa 1897. The Minfeter of Finmece, Mr. Cashtn, is in epror, whetr tie sititen then Hracthen dated back further than that. Thas fifsi finatistal intatement that I bromght int wnin in 189\%. Thint wae for the pormone of cutting out mbitary orpenditure and they ahould be cut out Hienethef bow. The Eolony caunot affort tt; purt of the expenditure of the promet fay, waifil as it may be, you sill have to cut out We wast to Jomy what the Government is poing to do in than matter, I truit is hatio meat will be bromptit tofrr thits lion shan.

Afr. Ap eaker remumnd the claytr.
The Chatrman from the Committen reportes thast they had connidnred the matter to thum peferred, hat made nombe progrnas anit asited thave to att mpuin on Montay.

On motime this report wab reselved suad mdogted und it wras ardered that the frmmitter ture twave to it meilis in Minday:

 trouble, The my mind thin Aet of lant your antl that of thly yoar might be
consolidated anil introduced in one Bill.

MA. CLIFT.-What does the Miniatar moan by a receipt?

HON. MINIBTER FINANCE AND CUSTOMS -An acknowledgment of mionoy patd-not it recetpr for goodr.

AAR. JENNINGS.-1 would like, ME Chairman, to ask exactly what is meint by the tertil recelpt as used in this resolution. As the Houee is probatbly aware, it is the custom in the outports to get recelpts from those who take your fish, and payment is made on the production of these. I wan wondering if the regutations there tatd Town woult apply to these.

MR. HIGGIN8.-In reply to the hon. momber 1 may say that I do not think that the word recelpt as used bere wonld apply to any but cash recelpta At the present time while a revanue is. Isifid by those who pay their sundry inils by cheque, the man who pays with caikh paya nothing. I think that the object of this is to malte the applleation of this tax more general and applicable to every case in which moncy changea hands.

MR. KENT.-I might remind the hon. mernher thint it fs generally tho poor man who pays monoy and who would be liable under thite to pay a large share of the revenue so obtained.

MR. MORINE-But it thls goes through there will be no receipts giv. on: peopile will take the risk rather than pay the necessary tax.

MR. HIGGINS-That is one of thel poinis yot ta be conslitered. You take the everylay cuatom. If you go into a nhop and buy a pair of boote, you fing momey over the connter and you fort back $n$ recelpt. In the old country there fs a system by which recelpts munt be stamped if over a certain amount. That amount tiere is ftxed at \$2.00. The fion. memter will see that the principle is a safe one.

MR. MORINE.-But this would rot upply here in the majority of cases boots troupht here are paid for in tant and to rotice taken of any rocoipt.

Wh. HIGGINS.-1 do not agree with the hon. member.

MR. MORINE.-I repent that for penty purchares cash payments are minte and a $\overline{0}$ recelpt for then.

MR. HIGGINS,-1 think that a reWelut is required. This being sranted 7 think that there can be no ditor stice of opinion. We ought not tove stgit of the fact that at the presint. fime a tax tir fmposed upon hifm who payn by cheque, while cash puyments exaet no rovenue at all. The purchas er would under thit syatem pay the tumo an If he pald hy cheque for the amount. I have last year'a Act in front of me and it secms to me that there is eortainly nothing untatr in thit As I take it, the suggestion that It ls the poor man who makes the cash payment and that it will be be who will have to pay the tax is a wroag one I would think that the person who has to pay it wonld be the person who recelver the paymeat. 1 would merely euggest that the prin ctpte fir not in the least a hardship when eonsidered in this light.

MA. LLOYD.-While I sgreo with the han member for St. Jotin'a Enst. on what he has frat sald, it wontd point out to him that the law is dif. ferent on this side from what it is in England, and that there is no tax on smail traneactions which art made in the ordinary course of Hfe: no recilpt is texed under £2. Now slr, there is fome dirrercice betwoen $\$ 2$ and $\$ 10.00$. Bealifon this wo must romember that the folks in Engtand do not make farge transactlons as the people do there. In Ensland people do not purchnse thetr flour hy the harrel or potatoes by the burrel, and consequently theifr spenifings do not amount
to ar much as e8, and thin they pay no tax.

## PETITIONS

MR HIQGINS-Mr. Speaker, I lies Jeven to prosent $=$ petution frum the inhabitapie ot Porsagal Cove anil Ihelt fland in cosmection with a sublect alrosdy liryusht betore fils Ilouse tint jear, stel remard to the whart at. ivrremil Cores A fow yours beo thlo thath wat camien awny sat of tranbirary arranenment prorided for the tonveraintuce of the people thatn This petitime which is sumberomaty stignect. for the temettar peentif forearnt in Evalurss and trafle there, aaks that on allucathot let made ew the mumeso flans formerty cflured for-ther Jemilit. tios of thia memares aleo that it be
extended to Anchor rock. The adoption of this ides would mean the utilization of this whirf as a breatwater, which would incldentally provide a harbour for the people of that digtrict It would however, require consflerable expenditure of mozey. But I would point out that this petition is one which does not affect the distrlet of SL. Jolun's East otily. It largety concerna the people of Bell Iatand and other places connected with Portagal Cove it may be nald that Pon tugat Cove is the centre of bushreas in that particular part of the Island. and therefore I ask that this petition recelve the earnest consideration of the Government, and bek that it be referrod to the department to whtrh it relates.

MR. KENT-ME. Spcaker, 1 biog ts mupport the prayer of this petition. I would beg aiso to point ont that then if the third time that this wharf has crime under the notice of this Housc. The whart is I may sax, totrilly unfit for trafte or public use, and in a evste of incomploteness that renders it of Tittle value to the Inhatitan ts of thit place. Portugal Cove strects all the aurrounding places to a large exeqt and the attention asked for Liv th. is bettion would prove zreay; bear ollicial to the whole country. At this wharf the pubilic steamers call with a targe amount of traffe and 1 do fof think the whitr fe in a safe con tinton at all for the reception of this traflic. I mysetf had vecaston to go several times to Bell fsland tast year. and I romember that on two occaalons the ateamer was unable to come into the whart because the water was tho shattow: A fow years sgo tho stesmer could atways eall at this whart. The extension to Anchor Rock should be acceded to. I thlnk that if a whart were well bult there it would not be in any way liable to damage from the ordinary btorms that oecur
there. I think that a sum of money apent in this direction before this foumer would be a great atvantage to the people I beg leave to support the prayer of this petition and would fimpress upon Mr. HIggina the desirability of using all his influence to have at appropriation granted to the people for thls matter.

MR. DWYER-Mr. Speaker, I beg to support the prayer of this petition.

MR. HALFYARD-Mr. Speaker, I beg to present a petition from D. G. Whitewny and a large number of planters of Musgrave Farbor and Doting Cove in Fogo District, ashing that the uae of traps be prohibited at certain plices situate around these places. namoly: Tom Cod Rock, Eillott's Rook, S.S. West Rock. George Abbott's and John $A$ bbott's Rock, and be reserved solely for the uiee of hook and line men. The petition, which is largely henned by the most influentlal and Important persons there, explafis Itsett in a tery clear manter. I beg leave to read thie petition. (Hon, member reuds petition.) 1 nm very much in accord with the setuments of thls petition, and beg that it be referred to the department to which it relates

MR. CLIFT-Mr. Speaker, I beg leave to present a petition from Rer. A.B. Stirling and seven hundred others, residents of the town of Twillingate, relating to the subject of total prohfbltion of the innnufacture, fuporfation and sate of Intoxicating liquors for beverage purposes. It is a matter that needs very little comment from mo, as it has already receired the attention of this House, which exprofsed theif in no uncertain mannar. I beg leave to support thls petltion, and beg that it be referred to the department to which it relates.

MR. JENNINGS-Mr. Speaker, 1 wupport the prayer of thls petition. As 1 baft tiefore the reople of Twillingate are in favour of temperance. I
bope the measure introdued by the Ocvernmant will meet the conilitions revalred by all temperance nupport: in th thls epulitery.

MR COAKER-Mr. Sponker, 1 nup fort tis prayet of thin pertion. 1 sm pluamed the know that there are 100 shenarures to she pettion. That means the sienature of all the electors in T-etlintmett reoper. The House was sivnn a com: plete atatement of the financlat con Thiom on that 4yy Now zor mimatr that tmmporary loan of $31,000, \mathrm{moc}$ what drangement was made as to repay. Enenit Whati is the loon upt

AT. HON. PRIME MINIBTER Sn siputation wxy made.
MR MORINE-Has there Voct say tornivondence?

RT, HON THE PRIME MINISTEA Hi may nay, Mr Chutrman, that there has been no correspandence whatever fobee the loan was ferued
OR, LLOYD-Well, when dow it rim aut?

RT, HON. THE PRIME MINIBTER
-Thero is so slefintte time fixed 1 suppose is about 11 tmonthis
th MOHINE-Thait is thin Cenupon ax loat?

HT HON. THE PHIME MUNISTER -I will undertalie to pet the loan Huntuct.

MR. MORINE-Misht $I$ ank the ItL. Iton the Iremier as to what is hie amasument fir taikectith this Joan it a thme whea both the tearkot and rate are wanettled. I nuree with Dr. taipgit the cuember for Trituty mist is wauthe br imponitite now to rafen in tean it jur fir to. Thie stilitster of Finahee and the Dovernamut ought to have calouiated ede this and tmeloul of 'ytir mocesfiry incroase of Intereut. fithur the toan of the fateremil vill have to be increused.

HT, HON. THE PRIME MINISTEH -Theren was mever aty quentiou as to raining it at $34 / 4$, At this moment I would be prepared to float a 45 one.

MR. MORINE-What lie menas to say fo that he can ralme a $4 \%$ Joant at 34) or 80 er nome suel tizure, but nut at par. That dons thot antwer the polint whieli wre were objuctias to. The minhiter put in hle serimatro "On thance of Rtallwey loan umder Aet 4th. Gea. 84 h. Cap. 21-\$373,273 81. " Now the mifnister has Bhis truiriod down it $4 \%$ Thure is no atecretit fio yous at leant In the tact that yon can't gut the loen at shat rate, but it If an impereibitity. What explanailon wifi the minister kivel How are 304 golig to provide for this sitwe tion:

HON, MINISTER OF FINANCEWhat situation*

MR. MORINE-I AII Worry the Min inter will nest intmit thil.

Df. LLOVD-Tho Mhinter eluute his eyes to It.

HON. MINISTER OF FINANCE,That lis a matter of opluion

MR. MORINE-This mintter fis not sine of epistath. There can only be phe optaian ta this matter. There in fio jurnomal onndoctios in this case in ficw of metising minattiane, it is mo fanter of opinlosi that Newfoumilend frawnet at the present tlme get this janl nt par.

HON. MINISTER OF FINANCEWe mont $\$ 1.56 \mathrm{k} 09 \mathrm{~s}$ from the Eiritish Goverameat and we are not auked for finy paymeat at all.

MR. MORINE-Well, can yati mut the falluruy latan the Enme way?

HON MINIBTER DF FINANCEWhere if no auced for you to warry at pill We're ilnuen yua beffore.

MA. MORINE-Now Mr. Chalitian. f muil tak for sotne protectics from remerics ateh as thene Thits is be comitir tive pernomal altogether. I am veriainly intitied io proper reapoet In this Hotsen, and to have uy ques Hobs atifirerol. I would ifke to ank If the loan referved to here under the Act Lat Georfte 5th. Cap. Iy, if this has beren rateoc.

HON. MINISTER OF FINANCENo it was attempteff tol ralae this foan locally, lut if was not all talen UR

Mr. MORIME-The Premileris profatse way then that Ahis will be takeit up at 456.

HON. MINIBTER OF FINANCEHltulur the Ant we are allowed to do Thls Now we arti gotns tes put it ou the miarket.

MR, MORINE Blat whet is mulng to Lie done durines the coming 12 monthi. in thete ary proapert of getions this at 1 का I anve a right to mak the hinn minherer for life opinion

MON MINISTEF OF FINANDEThure may or may not be,

MR, MORINE wit the Misinter tall me what in his optation for the pounfilitity,

HON. MINISTER DF FINANCE.Weil wn are charging the fateruat on
answay, and in if it is not ratend the finterest will become a dropped balance and no harm will be done. There is no ibed at litt for the methier to become so exdtand.

IAR. MORINE-Mr. Chairman I want to lanow if I ean kot en lightes. thent on this multer. I have a flght to ash for this Inforination, and mane liave it:

HON. MINISTER OF FINANCE.Yoil have startod that gomo before.

MR. MORINE-It wall he only teit If tuke it for vranted that the Mir inter inderstamiti,

HON, MINISTER OF FINANCE-To propose to ralse the ioun. If we toe't rabee if the intercst provited for will cume back us a dropped bal. sher:

MA MORINE,-1 am entirled to ful (ra) folitirs, und 1 want to lowow ? ©5. putific is going to be informed om not I Eleo propose Ath Chatrman to ath at what jrfoe the Govarnmeat Debenturne were sold last yeaf, that is locally; whethor the 4 管 is at par I wall ask for thly information and wh givn notice of quation.
M. COAKER-I bope. Mr. Chair man, that the Miniater of Fibance wit eonsider that the members of thit aldo of the Houso hiwe ocrtain right. to sill the information that the Gov. erumant can give. We are not golns ithe a int of sheop to vole away fomp milthon foltarn without lenowtme whint it if voted for. We are leept in the dark abut it altogether. Of courso I de not fnow much nbout these fi. biaiotat mattarl, and om proptreat th support any bomuride ones the Gov. ernment may brime in. if they did thot try to htde it क⿴ wruld gass it widt tifill it for mimite it thit therk will nothing to hilie. The Fodget will show us what state the affuirs of the conntry are in. What is their reas(in) for not दiving us the informatton.

We want it and will wait hetre till We get it. What has been done here Voday? Nothing Just berause the Goverament wil not give us the th formition aiked for. If the buitames of the House thas to be prolouged unif the uifddte of June, it will make bo alffervece. We are poling to stay there and whit until the Hoase clasen to get this from the Government.

We arv now vating to the Fald New. foundiand Co. the sum of $\$ 2 \$ 0,000$ to fubsidizn them for running steamer Inif funt korvice throukt the ctanty. Now the least I think we oupht to diave for that in efficient aervice, Sereral contracts are awarded out of this' Houme, ind it for at feast our duity tu Bere that the parties who get them live up to them. I am morry to lave to rufer th this, but I hive funt rocolvett in tetter from inome pusiengeria on the is 8. Bruce. The letter in datpat Anent z2nal, and is an important fond is if refers to the accifent of the ather day in view of its tmpor. tance It will read it to the House.

On board S.S. Bruce, April. 22, 1915.
Now what's the Government going to do about that?

RT HON. THE PRIME MINISTER I will see that thfs matter is immediately investigated, and will report immediately to the House.

MR COAKER-This is a very serlous state of affairs and one which the Goverament should take a day or two to have investigated very care fulty. There is no need to be too hur ried in the investigation.

I was myself a little time ago oblig: ed to so some distance along the rallway traci and 1 found the tracke there in a rotten condition. Fully one third of the sleepers I found were rotten. Now the average life of a Elceper is supposed to be 8 years, and after thit time ought to be replaced. but when one-third are found rotten it does not seem as if the tracks were looked atter very curefully

Now sir there is another very serions matter to be considered, and that fa the spendirig of publite monies on Ereoutive authorlty. The Auditor General is vary serious ubout it He
says, 'I called attention to this matter in 1911, 1912. 1913 and 1914.
Now Mr. Chalrman. Are we going to come here year after year and have the Auditor General sending in reports like this. If the Government intends to live up to the privileges of this House why do they resort to the roting of monfes Hike this on Executive responslbility. If the Government had to expend $\$ 4,000$ or $\$ 14,000$ why did they not vote that money last year. What is the good of the House if the Executive can on its own authority take charge of the finances and spend it as it llkes without the consideration of this House.

Now, the members on that side of the House should not forget that they do not represent all the people. There is a strong opposition and these represent a large factor of the people. We are here to represent them and see that monies are properly spenl. Why then in the face of that do you do what you can do againat, the law of the land

The Auditor General is in that ofdice as a safeguard, and it is his duty to watch the expending of the monies yet you get him to accopt things that are not correct, on Executive author fty, He was not fustified moreover in authorizing this payment.

I suppose some of my hon, friends opposite regard me as always findfigg fault. Well. I don't like to have to find fault, but this long list of overdralts as given in the Auditor Gicncral's report does not look any tow sood.

The voting of this money to the Sealing Disaster is alright, and is justified by Sec: 33 B, of the Audit Act. Sec 33. B., however, does not authorfre the spending of monies off next year's vote to pay this year's expenses. In any case, whatever is done, a detailed statement should te furnished.

There was $\$ 100$ to each of all the applicants of the relatives of those who lost their lives at the sealfinhery and then appropriations had to be mage to look after the survivors who came on the Hellaventure. All this is in the Atiditor General's report and totals there, 1 think, about $\$ 19,500$. The overopending of $\$ 6,32500$ by the Ag. ricultural Socleties is serious, and is due to the fact that a bad bargain had been made in connection with the importation of hay

RT. HON. PRIME MINISTER.-Mr. Chairman: With regard to this matter, it is well known that during the autumn of 1913 the whole country was threatened with a hay famine, and the Boards throughout the country were deluged with petitions from people whose cattle were starving. The Seoretary of the Society in St. John's on. torod into negothations for the importaition of a large quantity of hay to save the cattie Jrom starving, and the loss quoted by the hon. member resutted. The order for the purchase of the thay was made in such a way that the aellera natumally regardel the Colony as the purchaser There is a bare possibility that if the matter lind gone into Court the Colony might have been heid not to be liable in which case the sellers would be abliged to go without their moncy. Such a courue sould have given the Colony a black eye. There is no question that the hany was fmported by the Board, and uned by our people.
-MR. DWYER.-Mr. Chairman: I wish to make a few remarks about the matter now undor diecusalon. It happened to come under my notice that some of this hay was taken away without the knowiedge of the officials in charge, and in many cases the people who took it did not pay for it. They regarded it as Government hay, and in consoquence they were Justly entitled to use it and save thelr cattle from starvation.

RT. HON. PRIME MINISTER.-I do not think the hon member is perfeetly correct in his nssertion that people took hay and did not pay for it. I am bringing in a report to-morrow of the Auditor-General on thls matter for the faformation of the House.

MR. LLOVD.-The position of the Government in connection with the bay is the same as their position with the eatimates. They did not give the House a statement as to the manner in whitch they were golng to ralse the money to meet the supply bill. A fow days ago we brought to the attention of the Government the desirabillty of furnishing financial satements before proceeding to vote four million collars as asked for under thase estimates The answer that was given at that time was that it was not customary to ahow beforehand how the money was to be ralsent. I have before me statements furnished by the Minister of Finance showing the expenditure and the bank balances up to the end of March. This statement is prepared by the Bank of Montreal, which doen the fimancial work of the Colony, and must. not be regarded as the report of the Finance Minister himself. The Colony has to provide about $\$ 520,000$ at the end of every-six months as faterent for the bond-holders, or a little orer one quarter of a million dollars every three months. The statement which I hold in my hand shows that at the end of last June the Exchequer Account was overdrawn to the amount of over three thundred thousand dollars. That was the burden with which we started the year on the 1st day of July last, or in other words the balance standing against the Colony on Current Account on that date. That dobit balauce was wiped off by taking $\$ 301.000 .00$ from the reserve of one halt million dollars which was lying in the Bank and known as, I think, the "neat egg." This I gather from
the Sperch of Hin Excellency the Gov ernar. Atier collecting the revesue for fifter muthis, that is from the lst flay of Juty last to the lant day of Marche we had that the Etrechequer Scrount tif overdrawt by the sum of flet imen, whurtus it shintit hirve tium in eredit by at least a quarter of a milition dotlank Thure are also a munber of spinifting teparimente =hich
 ments ob hiur lh list exiry spendinis tiepmertiment had overdrawn its aeterat. Thie overtiafter if the spenttrin difliriments amiount to about difination so that ver are coventrawn on Treberface ascount up to the aint of Markh ever Kiopoog, If the Clavern\#imit rpent at the alme Fite until she Ieni tiny ef Juan thry will be ovar tegu,hde fre titht an thit year'l Fuming becoment-WHth stacts a ithowtrit min this If vurcly behurum nas to curisider what we aro doine to merntinize every statemimt of a flamitat clianiclor beform Thttir firt theiro iommation We wrould Bite in lnow how the Fisanee Minlater ryine to to knt ent of this ditticuity
 ets to meet a iteflett whlech will prolably exceet $\$ s n e, 00 t$. There are only threm way toy whirin the Finance atte
 fir bo cuiliag down expenses sso0,000. You lure refushd to to thls su shown ly your eatimaten, The mecond te to
 jour entimater are ouL because you hare not prowitided for the pagment of interest we that linan, sud the third
 furthir taration. I do not know whethep this latter eourse is worthy of neriman consideraton, when we comगiftr thic remiti of then pant two yeari oxpertence. A fortulight ago I asked. sifi, deetale faformation from the Minlietur of Pitianee, a part of which 1 rebelved an fow days ago, the balance I beeelved thile uffernoous 1 may amy
thit I agree with the hon. uember When be says that 1 recetved them protuptly under the circumetances. This fuformatton shows exactly what thay be expected from new taxation fad new tariffes. it will be rememberfof that tas Mtarch of last year tho Minpitio of Finance introduced a. iset of bew tirims, in sddition to wlich be firpored the 10 per Eent, inturtax, statIf at the mame time that hie belteved the surtax would be dropped furing the ywar, as he would have satficient foreatue from the other siew tarill. Cotwithutanding this extra taxation, finit the Imponition of the 10 per cent. thit Fluance Mimister has been unable to get sumberat rovinues to meet his fixpenditures The Misiater of FZn dace calcuinted that the new tariff and the surtax woat: liring litu in thont 9720,006 ar year, anit nbout onefinird of that sum, or $\$ 240,000$, up to dive eut of June last. These Cigures
lating to the revenue had buthing to To with the war, becuase no one in the Houre had the slighlest eoncep flun that we ware gotng to be engaged in war. Tha depresiton in tride of whimh we fave theard wo much from the Minister thls sessaton, was not exfutcah, "as the exports athow clearly. frut ther cxtra tamation did not produce tho revenun up to June 30th, the Mlnfinter anticipated. Instead of recelving 1240,000 , he received only $\$ 114,000$; focrithre onty 977,000 froms itcotiot. fnistad of the urnat $\$ 110,000$. In abort. flin remult on last year's revense of futting on bew taxation rrom March litil to tume 30ni, was iuetaatly to docrease the agkregate rovemue The exjerlence shows how carefal a Minfinter mast be in dealing with tarifis. (iven thi good timee.

HON. MINISTER FINANCE ANL CUSTOMS-Gise me time and I wili deve yan the inturtmian zov ank far

Mif LLoYD-Mr. Chairnuth. ziy frimad the Atinleter of Finaacni intan
rupts me Well Sir, I rellsh interruptfons, because they afferd an opportunlty of pressing a point. He guestions that and so 1 will prove it. The Minister is an old parliamentary hand and has been a long time in this House, and knows how to defend himself, and he knows when to make any objection to what is betng satd, iteeognize the Mintster's action in trying to interrupt me. Now, this is what follows the extract 1 fust read, and what the Finance Minister did not want me to read:
"All these payments are contrary to the provisions of the Audit Act."

That is the point 1 was coming to and the atatement I was going to read when the Minister interrupted me That is why the Minister Interrupted me, but I have had a little experience In much tactics, and take ndvantage of them to press a polnt home, and that point ta that the Minister is makIng expenditures contrary to the Audit Act, and the Auditor General says so. The Auditor General continues: "aad I have declined to pass them. All of them have been made from the Letter of Credit Account of the several Departments indicated below, and as 1 have refused repayment from the Fxehequer Account for them, they stand as an indebtedness of the sald Departments to the Bank of Montreal, unless and untll covered by Supplementary Supply,"

That explains the Minister's interruption. The Anditor General refuses to give the necessary credt, and if he did it would only show the action in a worse light, Now I would Invite the hon. member to repeat what he was going to obnerve at that inopportune time. I would invite him to repeat hla question.

[^1]I was prepared to inform him on that point.

MR. LLOYD-Becaase In my understanding he sald that I did not know his business.

HON. MINISTER FINANCE AND cUSTOMS-I would not try your attention.

MR. LLOYD-The hon, member satd the amount refused credit was only $\$ 1,200$ Well, I can account for a firger amount than that.

Take the Colonital Secretary's De partment I find these fincreases amountins to more than that. Under that department we find $\$ 20$ to Edward Collins, $\$ 100$ to E. Lodge, $\$ 100$ to S, Q Thompson. This makes $\$ 220$ for that department alone. If the Min. futer wants it ifiven in further I can do if This brings up the fact as to what the Audit Act in for. What is the good of the Estimates being passed every year if other sums are oxpended without passing through in theae Estimates? These Estimates popreeent actual expenditure and yet the aecounts are alwaye overdrawn, and every yenr the Auditor General refuser to pass certain items, If I have understood the Minister of Finance arlght, he told us that thero were some increases in the Education vote. The Miniater nods, and therefore I aceapt it that the statement is correct.

HON. MINISTER FINANCE AND CUSTOMS-Not over last year.

MR. LLOYD-I have the Estimates of last year as they were tabled.

HON. MINISTER FINANCE AND CUSTOMS-By some error these votea did not appear in the Estimates as tabled. There was $\$ 100$ to each of the Assistant Superintendents of Education.

MR. LLOYD-The Minister of Finance shys that the vote was not lncluded In the Eatimates by a printer's error. By a printer's error $\$ 200$ whicb
was to have been veted was not anth. orized.

HON MINISTER FINANCE AND CUSTOMS-Yes, and you made the same speech about it then as you are making now.

MR. LLOYD-1 enfoy interruptions, Mr. Chairman. As I sald before, I try to uee them to make my point clear afterwards. If this vote was left out last year by a printer's error, why is it left out thls year?

As the Minister has not answered I will repeat my question. The Minfistor has pointed out that the extri $\$ 100$ was miseed out last year by a printer's error. We knew about it tast year, and further, according to the Minister, 1 made the same speech on that occasion. How is it that he made the samb mistake in these Eatimater Which are now botore ue? Why has it not been added? How is it that atter it was missed out last year, and after I made a speech on it then. the same speech the Minister says as I am making now, the same mistake has been made thts year. I have dwelt upon this point somewhat, but this only leads up to the main point I want to call attention to. The Minister said we could not find $\$ 800$ pald out improperly. Well, in this one depart. ment alone we find $\$ 220$. Now I notice in his own department that some salaries are increased. G. G. Hann has got an increase of $\$ 150$. And this is over and sbove the $\$ 220$ I spoke of before, so it is clear that the Finance Mintster does not know wha: the Increases amount to. There is a namekake of my friend whose salary is also increased. This official has Rot an inerease of $\$ 90$. There is another Inerease of from $\$ 300$ to $\$ 390$ in hile Department. So that in his own Department, outside of the Colonial Secretary's Department, my friens has increases of $\$ 150$ and $\$ 290$.

HON MINISTER FINANCE AND customs-What is that for?

MR, LLOYD-I am not in a positios tolsay what it is for, I fon't pretenc to be able to read the mind of my kon. friend and tell him why he mad. these increases. I am dealing with the facts, and showing that he does not knov, when he is talking about incninaes what he is talking about does not even know his own Department.

HON MINISTER FINANGE AND CUSTOMS-It is too paltry to talk abont a few hundred dollare. Talk millione while you are at it

MR. LLOYD-When T talk millons the Minister is net satisfied 1 am now talking the hundreds that he introduced himself and he is not satigfled. But 1 would point out to himi that in the way of pensions, increasen in salaries and new salaries, there is ne need to talk to hundreds; we can talk in the ten thousands: for we find that the Minister and his friends have authorized the expenditur of $\$ 25,000$, contrary to the Audit Act, and protested against by the Auditor General, and in spite of the fact that the proper place to deal with these matters is not the Executive Council, but this House. The Minister and his frionds are arrogating to themselves powers that don't belong to them, and that liave been reserved for thls House; and so far as I can I will resent that arrogance on the part of the Finance Minister and his friends in making expenditures that the Logislature and the law of the land do not contemplate. But that is not all, Sir. Not only do they make these expenditures in connection with increases of salaries and ponsions without any authority, but they take money and use money against the expressed provisions of this House and the Audit Act The Auditor General says: "I have to report the following expend-
tures in excess of the votes indicated. all on services for which no vote has lieen taken", and then he goes on to speak of them. He says in reforence to them: "I have disallowed all these: charges and they constitute a debit balance agninst the respective Departments." Now, Sir, this statement of the Auditor General and similar statements whifh liave been laid on the table of the House from year to year, show the inadequacy of the Act Thoush we pase votes to the amount of $\$ 3,500,000$, that sum will in the ordinary course, be exceoded nest year in the same way as the votes whith have been passed here In provious yeare have always been asceeded. And that bringe us up to the question. What are you going to to to meet these expenditures What are you going to do to meot the \$4:000,000 that you have asked us to vote" It is clear enough that extra tarifis will not respond to make good the deflelency; there is no "neat-egr" now to cover any deficits; it is clear from your estimates that you are not cutting down in any way commensurate with your income. And therefore what are you going to do? There are only three ways of meoting the dificulty. Ion muat do one of three things. You may economise -whtch you retuse to do: you may put on extra tariff, but you cannot make the revenne come in-you cannot compel people to Import goods; and there is only one other way: You have to borrow, if you can. I belfeve you can, but you do not say how you are going to do it. That is my point in connectlom with these Estimates: that they do not take into account the loans that the Government wilt have to seek immediately thits Houne closer. You are making no provialon whatever for them in the Estimates. I asy, Sir, that you are treating us light-
ly, and that you are treating the stt: fation lifhtly. The position that you are putting up in refusing to dectare the course you Intend to pursue, is wuworthy of you and of those who sit in this House. I have been told already this sesslon that I am the Cas sandra of the House - the Prophet of Evil. That is the angwer which the Prime Miaiater deigned to make-
RT, HON, PRIME MINISTERI don't think I went as far he thast I say that you appeared to be playing that role.

MR. LLOYD.-Well, my rt, hon frend t an adept-at splitting hairs, I will amend my statement and say that I have been told that I am play. ing the role of Cassandra. Well, if nlaylng that role is repeating in this House plain statemente of fact furnizhed by members of the Government then 1 am content to play that roleIf that is the faterpretation put upon It by the Leader of the Govarnmont. But it is no answer to a deficit of 8300,000 to say that the man whio points it out is playing the role of a Cassandru. If 1 am a Cassandra for quating thint, then the Minister of Finince Is it Cussandra for furnishtng it 50 me, and the Bank of Montrcal ie a Cassendra for furnishing it to him. Now, these statements are furnished to be dealt with intelligently, to be considered, and weighed. The whole trouble with the Government in collnection with lis finances duriag the past six years has been that they will not face the facts. They rush blinily fical, whether in eornection with nulway finaneing or any other kinit of financing, and will not face the situation: they won'L make catcutations a and see what in before them: they persist In eoing blindly finto everything Now. Sir. I repeat that I am prepared to emphasize these statements which have been furakhed by the financis! agents of the Colony and by the Fin-
ance Winlater, Exris thinash ith lith phaslaing then 1 min taviniol winh plagieg the role of Casundis.

MR, LLOYD-Do yot ank me that?

HOH. MHNTSTER OF FINANCEYon. I th.

MR. LLOVD-Well, I will answer you.

HON. MINISTER OF FINANCEYou sill have lote of time to anaver 11. We certaloly will bave to impoet F certain amount of dry goosts withls the sext three mentlie that ve wert fitort of lait Pall, Prom Auguat. In Aacuit, nobody that I know of this
 tuppent. A certaln number of men went around denounctor the banlas hind wo miste Water St atrald. Thoy
made statements that induced people who had money in certain savings: banks in Newfoundland to come hore and draw it out, and very little business was done. Of course, 1 know that the hon. gentloman was talicing from in Opposition standpoitht and niot from an Intelligent. serlons stand point; beeause all you have to do ill to take it as a business proposition. Take a $\$ 4,000,900$ business. If it If short at the end of the fineal year $\$ 200,000$, it is a very easy matter for the mainagement to curtail its expenses, put the business into -shape, nad make up that quartor of a milition thollars within tweive months. Is that solng it blind: The hom. gentternan aaks what proviston have we made for the loan, if we need in loan, whick will have to be made on the soth June? Well, my answer to that is that when we come to that bridge we will crosib it What rense would there be in our figuring on $\$ 800,600$, or half that amount, while it will be guite an easy matter, when the 30 th June arrives, for the Government to arrange to paythe intareat on whatever amount may be needed to square the account on that day:

Now. I woutd tike the thon gentle mell on the other side to bo reason able and fair. Certain of them have got up here ani gatd that they wanted this financial statement, that we are hidian amethingr.Now, I wat- to tell them ngain that 1 am hlding nothtrig. I liave told them the atory as It in 1 have told them that our defietl was $\$ 301.000$ at the end of the year. and that up to the present moment it is betwoen four and five humdred thousand dollars. That will not tnereash within the next three monthes. If our reverue docis not thcrease whin that time by one or two hundred thousatid dollara, that will mean that wo will probably have a de ficit of between two hundred and fifty
asil three Fundred thousand dollare at. the end of the ftheal year; but we are hot at aft rulued, we are ont at all bankrupt or in a hole such as the hon. rentiemen have atated wo are in:
MR. MORINE,-Mr. Chairman: This discuasion has, to some extent, elicited the information for whteh we have heen asking. Wo know now for the frost tinie what the Minister of Pistrice to depeniding on. We have, for the first time, in clent outitie of thes calculations. One part of his 4 pooch deals with the finaticial condition of the colony and the way in which to meet it. Becranse of the feasona diven here to-ilay, he anticlpator or rovivat in the rovenue it to \% question whether that hope is fus iffed by unything that he xisys I sald eaclier in the scesion that we should not tritk too ratich about tho bad candition of the colony; but the member for Trinity has raised the eucetion, because he was forced to he could not got the information otherwise. it the not lack of ruspect for or falth in Newfoundland that makess at aak, how are we golng to ralae enough money to pay off the deticter it if respect for Nowfoundland. Nor is it lack of fatth in the future of Newfoundland that tends one to say thint he eloutd take in some sall. The man who appeals to that sort of sentiment shows his fack of respect for the intelligence of the people of Newfoundtand, to thint that he ean stampede them in that wey. The minlster tries to say that we are on our feet in the colony. Let uF see if any sane man should entselpate anything of the kind that is koing to put us in a sound financial condition. There are merchants who Fill inform you to the contrary. One of our biggeat merchants to the Upfier House geve hits optaton that fieh farices cannot be expected to continue as hithe its at present. I refer to tho

Hon: 3t Harvey. We must provide for a aturiny day. I presume that Ifr Plartus whir meatifice the optrition of inerchante an a whotes and that thimeturn he was chosen by the Gor ernment to make that Speeck. of Thie thite have keen speechen in the Councell of the Lalrador Fikh prieen保 whltin t had the pleasure of in: trusurtire. The opinion expresent in
 for Lalmidor was wety poor. Asd fiviry dentelngat waid that the outfit wruif the amotlor this year than evor tuftiri. A certals merchicit hat re fiased muppiline to seventy crewn whom he had supptted last year. The hou. Phiaice Minlster sald that be ratioe there are 2000 tons of goods va their way here from the Old Country, we aro noing to have an facreane it rivemiti it ti trie that wo have tiot been importing very much during the fast rew momtha, but there is now pe large atuek of dry goods in this ouuniry, which has been on the nhelven fos monthas. One would thinis to Ite ten to the Minlater of Finance, that the people had been wearing out all chifr ctuthes and never in dirv bend of troorh, there being name ftaported. Thit allow mie to may that while the temportation hat seetr emall, the con whiluptint hair lieet smatter. The nhope requirnt to smport raly a trtie gooits th latiur to leep item well stocked bey that there in not the winatleat reas ont ton think that there, is going to ber nay fucrease fir reveane durtise the -if Thirre in tith prospect ihat ब\% tis after the war there is going to be any sorival of trade. Milliens of men wIII lie Hifown out of employment
 result of the enormous numbers of diation and the destruetion of property all over Europe every man will In trying ta rebalif lif country akalit; sll these mililions of men who
vomen lack to dvill life will have to have employment. This colony depeitads for the sale of its cod-fish. on the poorvat people of Europe. Should fou iro on voting just an much money have asi is timee of peace? That kind of talk which we have heard does not ptrike the right kug. There if andoflint thfige whies it have beard tuenStowed here, that is also false. The Minliter of Pinarice niskes reference to the Bank Crasì of 1834, when the trade sent on as usual. But he for sets this, that we are not now in the vestilion that we were in theni. We had an expesidture then that was not more than ohe lalf of what our ex penditure is now. und the Interest on our public debt was not one half of what it th now. The proment Govariamait carre ints prowar with abounding promperity and revenues Hut it was not leng luefora they had abent it all. Thefr Estimaten ex fceeded ty a millfon what it liad been when thes came ft . The expendlture was advancing faster than the revenue. A ereat deal of the expenditiure iif ancoutrollable. If you take the Es Ctrinten of this year how few thinge thite are in which you could make a, cul. Thure are many thinga how: firen fromil whitch not a cent can be rnfured. Thinre te the edueation tsrant whleth amionints to 3366.000: that mary ben sala to be uneoutrollable. Thieni it the bottection of cuntomn which amounte to $\$ 260,600$.

The result ts that =teen depression formes sou have to cat down thene momotis There is only about 11 . pan,0in) that we can control and upon which we could cut down if we watit eif to, It is with reeard to thle that -re ank thas serious thoukht be kir-- 4 to the guestion whether we ought to srapple with a reduction instead of. vatiak more money thats over. The Mialitos wanted to know how my
learned friend made up the deficit which he calculated. I think that what has been satd by the member for Trinity, has been very nearly correct. The shortage of revenue amounts to $\$ 355,000$, an average of $\$ 51,000$ \& month to the end of March. But thore was no falling off in the months of July and Auguint last. The defiett was an average of $\$ 51,000$ per month. If that conilmies for six-monthes more. we must ndd $\$ 300,000$ more to the deficit 1 notlee that the Mintster shakee his head at that. Business and trade may change it is true. But that is the only answer he can make. Will there be a continuance of the enormous expenditure whfch has been going on during the past mouths? We have provided you with interest on \$1,000,060, which may earry ue to the end of June. You will have to provide interest on the increased amount Just as on the other amounta. You have borrowed one mitilion and hive authority to borrow two mil Hon. That fa nnother $\$ 180,000$ added to the burden during the coming year. You hate only got to took around in cartan to soe in lot of acerufte obligatomis. And it is apparent that the oondition of this is very sarious, and oue whith caunet be met by erapty hopes. What is the condition of affatre on looking at the public debt? A sum of $\$ 250,000$ was borrowed from the Bank of Montreal at $51 / 2 \%$.

MINISTER OF FINANCE. $\$ 100$. no0 is the amount.

MR MORINE - YoE can mot get it at less than $5 \% / 2 \%$ and 1 do not think thitt you can ret it it that: This is the highest rate that has ever heen puid to the Bank of Montreal for a tomporary loan. The bank used to tharge you $41 / 2 \%$ ind ralsed it to $54 \% \%$. It is not a market of very great statiftity ith thits colony. In the face of that, how are you golng to earry on nffatrs durlng the next few monthis:

If the Bank of Montreal sald to-morrow, "We cumnot lend you money," you wroud be loet. I ank you if you will tell me where gon will rater it. To say that it can be ralaed, is no answer. Why pay 642 c if another bank will giva it to you for less? It the bank said that it would not let you tiave infy mote imoriey. whit Fould you dn't You woild luve to appeal to the Britiah government to fielp you That is the anmwer that you soould kive us now You ought to try and ileat with it in a minly and
 fin thise expemitures.

HON. MINISTER OF RINANCEMr. Chairmant Barly lis ther hon.
 that our poaftion in 18940 gt was much better than to-day. Colony to be worse than it $\mathrm{is}, 1 \mathrm{am}$ sure that no one here destres to make any statement that will have a bad effect on the Colony outside. We should remember that a debate here not alone affects the Colony at home and abroad, but may have a marked effect on the supplying for the fishery. A most important question tonight is where are we golig to get supplies tor the people this year. It is not. a question, of catching the fish or exporting it and finding a market so much as a question of getting the importers to take the risk in supplying. My frlend, Hon. Mr. Harvey, made a statement the other day In relation to the price of fish. I do not agree with him. I do not think the price of fish is soing down. I believe, on the contrary, that the price will be higher next year than over, and everything points to that fact. And if we have a good fiehory and a good price, we can confidently expect a return of good times.

There was a great deal sald tonight in relation to the Audt Act, and to hear the remarike one would imagtie thit something had been done that was never done before. 1 think my hon friend Mr. Morine will bear mo out when I nay that nevor a year passes that the Auditor General does not draw attention to the very same matters that were dlecuased this exening. Cases arise which have to bo dealt with by the Government and if you take up the Auditor General's Reports for 15 yeare you will find no one report in which the same points have not been reported as are reported here tonight. It is not a questhon of the responslbitty of the Gov. ernment; it is a question of necesstty. Of course, there are cases when it is a question of the expenditure of a large sum of money, when it is necessary to come into this House. That is not diapnted. But there are
casos that ariso where it is necess ary that they should be deait with at once. They ire not serfous vlola. tions of the Act although they might be held to be a violation of ita apirit. There are some of these in relation to pensions. 1 do not remenber when there was ever a pensfon granted in this House in the firet instarice. The Minister has come down for the pust twenty years and tota us that penslons had been granted during the year, and asks the House to endorse the action of the Government, and very properly so, because after all the Executive Government is a Com: mittee of this House. Once they fall to carry out the work for whlch they are appolated, then they cen lait no langer. The Government is a Commit. tue of the House. They grant perigroris and make emergency paymients only, because thoy feel that they wers carrying out the wlehes of those of Whom they are a Committee.

I make bold to say that there has been no goverument, or sesslon afice that Act was introduced and placed on the Statuto Hook of the Colony, but that charges were made that thls Aet had been vlolated. But I have never yet once heard of a serfous resoluthon to the offect that thin practice be discontinued. It has its disadvantages, but thiey are over reached by the good that it is able to accompliah.

Now Mr. Chatrman I think the polit suggested by my hon. friend, the aember for Twillingate, Mr Clift, was very well taken, and that the pasfing of the Eetimatee will be grently helped an a result. There are plenty of offices in the country which are now underpald. Hardly a day passes now but that the Government is nakod to thorease hundreds of salaries not in St. John's, but fo the outports. There are crlas of how the clvil service light house keepers and police are anderpaid. Then we look at ebme of
the other branches of the efvil sesvice, 1 doubt if by going threugh these salarles tomorrow we could find a way to save one đoltar, It has been tried, but was tound not to work.

Then there are the publite inatitu tiona, Take the Hospital for instance. There ure clothes, medicines and oth. er thitugs that cannot be properly estimisted. Theugh we vote asemingly a large sum yet we atwaya find at the end of the yoar the vote tir overexpetaried. This is no favit of the Gove ernment.

We have in thi Hoaplat down there buildiegs which are always holding two are three hundred patients. The itaff there tothits neariy 100. Thare are four bufldings, and in these steam must be kept up all the year round.

Then there is the peat office; seven or efght thounand dollara to annually voted to the upkeep of this institution. There are the contracts for coal etc., and the salarles of the post and telegraph clerk. Then there are the educational grants. Nothing can bo saved in thit Department, and so tin tardly any department of the Government ean any matertat savtig be effected. So I agree with the hon. member for Twillingate, Mr. Clift. that little can be aecomplished in the way of reduclag the estomites, and with Dr. Lloyd when he dealt with the matter as to the fmpossibility to do anytbing in the way of ineroasthis thation. I do niot thate after alt that the Mintater of Finance refused to iet this house have a staternent of what the deficit was goling to be. Eather I think that if would be very diffealt to have this done, as the stanting can only be determined after all returas have been recorded.

Now If think Str, that with this froformation which has been furninhed this evening. we might pana the Eetimates as bafore ne.

MR. LLovD-Mr. Chnirman, I shall

Be very pleasod to aceept whet the feader of the Government has stated. if the Government could have tot un have the Information before, a lot of tlme mient have been saved. We know, and the Government aulmith, that there is going to be a deficit os June zoth. What we wanted to know Is What the Government was golng to do. The Premier has told us, and hio anzwer is perfectly satiofactory. But the matter bas been ratsed as to who was out In lis statement of this afternoon. Was it the Minlster or Finance or the member for Trinfty?

MR. MORINE-Mr. Chairman, I took down the figures as read this afternoon, and if there are no objections, 1 will read them to see if I teok then down correctly; und sio see if it is the member for Trinity or the Ministor that the Auditor General naye ta right. The Prime Minteter say b that the Minsiter is right, and bases his atatement on the figuress of the Auditor General. Now 1 take lssue with him and desire to point out somethine to him, The deficit of June H0th last year was $\$ 301,000$, the deficit at December was $\$ 800,000$. Now from that it is not unreasonable to suppose that there wilt be a tarke deflicit. According to the entimates there will be an expenditure of 81 . g00,000 is the zext ais montis up to Juna soth. This wit leave a defloft of $\$ 224.009$.

He Justified what he saya by the Aulttor Gencral's returns. Now 1 thall bo very Boory if the Auctior General ever signed any siatement wach as what the Premler has quoted

Now Sir, if we had to pay the six mionths' Interest due on June 20th, this will amount to $\$ 520,000$. That will pay the tintarest for the six monthis, and merely thist, without ex penditures by any departments dur lige the months of April. May and

Tunce There is therefore the throe thonths' expenditure and the finterest to be met, and yet in splte of this we luve the spending departments of the Government receiving Incrensed eatimates:

Check the expenditures of April, May unid Juie of last year and we get the total expenditures of 31,400 900 , and out of this $\$ 1400,000$ which Whr heatied fiat year for these thirect months, $\$ 1,200,000 \mathrm{fr}$ this year already Epent. By woriding up these ngures it will be found that thare will be a staurtage of $\$ 660,000$ at the end of June. The Prometer is entirely and abnolutely lont in this financing, in silte of the vary atmple tacti. 1 would Just make a remark or two more. Wis. Chairman, when-I intend to ark for an aljournment The Prlme Mintister trled to defend the cuistom of voting money undor Executtye remponsitbility by referring to the jour: bals of this House it have hore the Journal for 1900, and I can find no smount voted here by Executive re vonsibitity. The only thing that passed under Bection 35 (b) of the Aud. It Aet wan an amorganey caas, and this was accompanied by a cert freate. The praction has krowz now of passtige urters throush tikis sectuon and it is atout time to have it atoppoil. It Is tho late aose to continue to dis chese this matter, go I would euggert thit tho Comimittee pass the vote, and rise and mak to ait agaln on tomerrow
Mr. Bpeaker reammed the Chalr.
The Chalrian Proth the Committie reported that they hind considered tan taatter to them referred, liad passen a Reaotution and asked leave to sit sgain.
On motion this Report was recelved and sidopted; and it was orderel that the Committee have leave to alt sgain.

The rematuing Orders of the Day were deterred.
NOTICE OF ADDHESS TO GOVERNOR.
Mr. Morlne gave notice that be woutd on to-morrow mave the fol fowligg Resolution:
"RESOLVED: That an Address of this House be presented to $\mathrm{Hi} / \mathrm{Fx}$. celtenicy the Goveraor respectfutty proteatiog againat the practice of expending public money on the esFumed and illegal authority of the Governor-inicounctl, in violation of the expreas provisions of the Audit SAct. 1898, and in deromation of the ancient, exclusive and undoubted tights of this Assembly"

Mr. Morlhe gave niotice of quostion.
It was moved and seconded that when the House rises It adjourn unt11 temarrow, Wednesday, April 28 th at tiree of the clock in the afterncon.

The House then adfourned accord. angly.

WEDNESDAY, Apri zo,
The House met at three of the flock in the atternoon, pursuant to tidjournment.

PETITIONS.
MR. MORINE - 1 beg leave, Mr. Spenkor, to prazunt is petition from Rev. A. F.. Tulk, the Rector at Sal. vases and other tnhahitants of Saltrage and locallity, tasking that a sum Q4 $\$ 50$ bo allocated for repatring the food there. I would aak that the pet:fion be reterred to the Department of frublic Warks for its attention.
Miso, Mr. Spmaker, one from Mosers Tuilt and others of BL Chad's, asking for an elvetive Hosed Bloard. I wouth ask that this be-refarreal to the De partment of the Cotomit Secretary for attention.

## QUESTIONS.

MR. TARGETT- 1 bes to call the attention of the Government to the Fact that my question of April 13 th
has not yet been answered.
RT. HON. PRIME MINISTER.This answor li in cocurais of proparathon. I may alse say that the answer hunded to Mr. Conker yesterday, when appeared incorrect, has been looked into, and it has been found that an error had crept in. The amount paid the Judges was $\$ 1,000$ and not $\$ 2,500$ as was stated. Also, I would like to hand Dr. Lloyd the flgurea askiced for by him yeaterilay.

MR. ABBOTT:-I would like to call the attentlon of the Government to the fact that two of my questions have not yet been answered.

## MINISTER MARINE \& FISHERIES

 -These answers are being prepared. I hope to bave them before the House closes:MR. MORINE, -1 asked the Fremier the day before yeaterday for some information nbout the debate for today.

RT. HON. PRIME MINISTER.Thls is being prepared.

HON. MIN. OF FINANCE,-The answer to the question of Mr . Abbott is being prepared.

RT, HON. PRIME MINISTER.-I beg to table answer of question of April 24th, for information sbout the Explolts Valtey.

HON. MINISTER OF FINANCEI beg to table answer to question of Mr Coaker.

MR. COAKEA. I would like to remind the Premier that he promised us the evidence of the Hogpital Commission for perusat. We have not yet racelved thls.

RT. HON. PRIME MINISTER.- 1 will see that the evidence is passed to the hon. mombers for thair perusnl.

HON MINISTER OF FINANCE,I beg to table answer to question of Mir Haltyard.

HON, COLONIAL SECRETARY,1 bog leave to table evidence of the enguiry into the affairs at the Lunatic Asylum as asked for by Mr . Coaker.

MR. ABBOTT asked the Minister of Eublic Works to lay upen the table of the Houss a copy of returns of all moneys, allocated by his department, to Thomas Devine, King's Cove, Iurlag 1912.

MINISTER PUBLIC WORKS.These returns are beling prepared.

MR. HALFYARD asked the Hon. Minister of Finance and Castome to lay upon the table of the House a decalted statement of the amount of $\$ 75.000$ for bufldings anid machluery, and $\$ 78,000$ for material, shown in the statement recently tabled of the Rold Newfourdland Company'E claime for extras, under the Branch Rallway Contract.

HON. MINISTER FINANCE.-That statement is being prepared.

MR. HALFYARD asked the Minister of Fublic Works to lay upon the table of the Hotise a copy of the contract for the erection of the recently erected Public Bulding at Harbour Grace.

MINISTER PUBLIC WORKS.That statement is belig prepared.
MR. CLIfT askent the Mintster of Marine and Fisheries to tay on the table of the House a detailed statement of all expenditure made on the Government whart in Bay Roberts, duritg the years 1912, 1913, and 1914, together with coples of vouchers for all purchases made on account of the same.

MINISTER MARINE \& FISHERIES - I would like to aak the hon. member What whart he refers to?

MR, CLIFT-The pubite whart.
MINISTER MARINE \& FISHERIES There are a number at publle wharves. What particular one do you refer to?
MR. OLIFT-The one recently repatred.

MINISTER MARINE \& FISHERIES -There have been no repaire to any of them for the last two Jears.

MR. CLIFT-The one on which Expenditures were made in 1912-13 and 1014.

MINISTEA MARINE A FIBHERIES
-The three wharven had repain made to them in 1812 abd 1913

MA. CLIFT--1 lase to aak for par Meubiate of all

MINISTER MARINE A FIBNERIES -1 will have them tomarrave.

Nowfoundland Products Corporation or their representatives in relatfon to the securling of a franchise of fifteen thousand horse power or any other amount out of the said water power on the Hamilton Ifiver, or any ar rangement whatsoever. No communtcatten has taken place with the Government or any Department of the Government, eithor in writing or orally. Neither Hon, J, Nlexander Robtheon, nor any person on his account have had any correspondence with the Government at any time in relation to timber rights or water powers either in Newtousdland or in Labrador.

MR. MORINE asked the RL Hon. the Premier to lay on the tahle of this House all correspondence, memoranda and letters, that have passed between the Hon. W. O. Job or the company of Joh Bros, and Ca, and the Governthent or any Demartment thereof, in reference to the grant proposed to be made by the Government or Legislature, of Muskrat Falls or other water power on the Hamiliton River, and to inform this House it it be true that an urrangement has been effected between the said Jolas and the New. toundland Products Company, or their representatives, by which the said Job lasis been secured in a franchise of fiftem thousand horse power or any other amount out of the sald water power on the Hamilton River, and If awci an arrangement is in writing, to lay a cony of the same on the table of thfa House.

RT. HON. PRIME MINISTERThe same thing applies to this ques tron.
MR. MORINE.-WII the Premter undertake to find out from the Prodiucts Corporation whether any arrungements have been made concerning there water powers?
RT, HON. PRIME MINISTER.Vertainty.

PRODUCTS CORPORATION RESOLUTIONS.
Pursuant to Order and on motion of RL. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to conelder certain Resolutions, in relation to an agreement entered into by the Government of the Colony with the Newfoundland Producta Corporation, Limited.
Mr. Speaker left the Chair.
Mr. Dersons took the Chair of Com--mittee.

MR. KENT-Mr. Chairman: These resolutions, as the members of the Committee are aware, contain matters of very great importance, matters which deserve at the hands of this Committee the very greatest consideration that they can possibly give to them. They ought to remember in dealing with these resolutions and the agreement which is annexed to them that they are here as the trusteea of the people of Newfoundland; that the interests of the people of Newtrondland have been entruated to them to guard, protect and look after. It is our first duty here to remember that we are the people of Newfoundiand ascembled in deliberation so ar to best conserve the interest of Nevfoundland. Now, looking at these resolutions'from that point of view, I would ask the members of the Committee to try to forget in conslderlag them any Party divisions that may exfst. The matter is too important it is too fraught with consequences to the future of this Colony, to be trammelled by any artiflclal bonds such as the Party system would involve. I would ask the members of the other sfde in particular who mas regard it as their duty as members of the Party supporting the Government of the day, that in bringing thel minds to bear upon these resolutione they lay aside for once any obllpations which they may con-
sider tis devolve upon them because of thene party alliancos. We are hero an crustees of the people who live in Newfounfland today and for ever hireafter, and we are dealiog with rlisute thit will extend finto cen-turfes-lite a time when Nowfoundlathd, we hepe, will be a great counmy, will tie one of the greatest countries in the world, and we should endeavour to find ont what the consequencer if theme rosolutions will be Is remete pmions such as that-whother they will leve the effect of retarding is forwarding the progreas wbith ve hope Newfoundland will make. in approaehtus thesp remoluHons, we moutd firit of all conslder who this Corporatton Ls, what they are aectiting, what they atready pos ness in this colony, and what powers: they hurc. These are matteri that deverve considnration at the kinda of the Committee 1 am rary apry, think the Committae to nat more fully informed on the mattera covered by thase resolutlons. Practically, wher far an the rmbtutions are concerned and the tinttins contained therain, we are whinout siny infermation, except in statement of an analysia of the contriot itacif which was made by the Premter herg the other day. In a matter of this leind, every effort oaght to be made to supply the House with the fulleat detafled information regarding the areas, the rights, the powers, ant the possifitities of the propertfen that arn feale with tin thie contrict. I anked the other day whother biny indeprendent murvey hat hioen ohtained by the Government in relation to the properties contalned in this contract, and I whs informed that there was no indepentent vurvay, excent that when the Government hat obtainad titrough the on dizary Dephertmental Information. That metina, to my mind, thit there has beer no chock, no special effort
made, tar aicertain what thane resoludions mean, what their effects are what is the exfent of the powers that ftrey may pive A matter of this tmprovanive, tivolvilig a farge amoeut of monoy ind dealing with righte that द्वाak hilkit is great in influence over fia furrete derolopment of this counfry, aungivelt binfore committlag the Colony to any aereement of any kind In relathon to if, that the Government flionld axw beati is pozecsation of all Tha iffurziation that it whe poscible to olita'n. lindepandent altogether of thome who ar finterested in promotigg the intirninte of the corporation. There are quite a number of buslnesses which the Company may carry on under its constitution as at present contained in the Memorandum of Assoclation, but it must be remembered that the activities of the Company, if it ever geta down to businens, may be multiplied indetinitely, provided it can get the manction of the Court to ruy extension it may desire and the Court will approve any proposala along these lines whteh will be advantageous to the Company, The Legislature prnetically abandons all right to limit its operations. It can only do so by Speclal Act to be passed here. after and as thls Agreement, if its
terms are enacted into law, becomes a logislative contract, it can only do so on condition that the Company is compansated if its interests are thereby affected or curtafled. I have referred to the objects for which the Company has been formed in order to show the scope and meaning of the words business and operations of the Company' which occur so frequently in this Agreement, and that an you read the Agreement you may have in your mind the wide extent which you shoutd give that phrase, as It affects the rights, privileges and concessions made to the Company. Broadly speaking. the Agreement deals with the principal water powera in the Colony and on Labrador with the extenaive rights, powers and privileges and exemptions attached to them and the Company's business. The areas affectef by these concessions and selected by the Compnny or ita promotors ahow that white tho Government neglected to make the inquirieg and investigathons it should have mude. and the surveys they shouta have undertakem or to gather the information it shovll have obtained, the Company and ta promoters were very vigilant in this direction and knew exactly what they were doing, the exact areas they wished to obtain rights over and the exant limits they should place to these areas in order to secure to themselves the full advantage of the concessions they were looking for. The rights and privileges proposed to be conferred upon thls Company relate In the firvt place to the water powers in and upon the Humber River and in and upon Junction Brook. A lease of 99 yearg repewnblo in perpetuify is granted of these water powers. It is further provided that within the drainage area of these rivers-that is over that immense territory or stretch of country through or over which water flows, directly or indirectly. Into these riv-ers-the Company will have the right

Labrador, held for the Company. They ure bound to bugin a survey withln two yoare from the date hereot, They are bound to begin a survey, but they need not fintah that survey for the years after thes begin it, or they have betven jears in afl to complete it. Then within ten years from the date of the agreement, they will have to apend not toes than $\$ 5,000,000$ on the extenaion of its busineas in New. foundland or its depedencles. I ahonld like to point out to the Comsralttee beres, that this expenditure maty have nothieg at all to do with the powers on Labrador, but it may be spent in a manner whieh I proproec to deal with later on. The expenditure of this $\$ 5,000,000$ withis ten years, und upor the expenditure of whieh the aequisition of the complete titte to these water powerg on Mamils. tou River depends, need not be made upoan the development or at all on the powers that are the subject of the comeresatons. It may be made in con-no-ffon with tha buslness and operations of the Company in Newfoundlund. After ten years, provilied the Comilany lias fil the meantime made is survsy and apent $\$ 5,000,000$ on ita business and oporations, either in Newfoundiand or on the Labrador, acituirel a tith to the property. It is then that the granta will issue to it. Atter the grants have been lgsued thare in at obllgatton placed upun it after to tias acquired the property, to siond $\$ 10,000,009$ to develop the proberty itielt. nubject to forfeiture, in conmetlon with these powars, It witt be soted that the Governmeat undertatcea not to grant for a poriod of five years. to any person any water pow. 4. of witter poikens on the Hamftton River or the Nortiwest River with the dralnage ares mentioned. In pther words, no power will be grantof an elthin river for 17 years from the date of this agreoment. Wien
the Company makes the selection of the river it desires to retaln, whethr: it be the Northwest River or Hamilfon River, no power cin be grantel to any othor person upon that river for a further period of five year: from that date. In other worl l , as regards the river that is uttimatoly selected to develop no person can aequire any rights in that for 2? years after the date of this agreement. That is what it means, atthoukh it does not say so in stralghtfarward language. The Company doed not forfelt its right witess it fails to make the required expenditure within five years of the is sue of the title to it After it an cufres and is entitiod to retain the areas, it gotn a ree simple indofens ible title thereto, and afterwaris of course, no person can sequire any might. or interest, or property in it oxeept by purchase on such terms as the Company mny demand beyond the Limited concession that is in section 3 of the agreament in relation to the supplying of a certala quantity of horse power; that is a provision under which the Company agrees to fur nish at any of tis power houses on Labrador to any company engaged in tiny industry or emplogment,not concerned with the manufncture of phosphate of ammonia and other articles Inentfoned thereln, and the byo products, and within one hundred miles of the power housen to the extent of $\$ 0,000$ horse power, upon terms and conditions to be settled by agreement if possible, and if not by arbitration. What that means, noue can say, ex---ipl in exjert wio has studted ft . These sre matters that the Government whould have taken means to obtain expert opinion upon, and to have supptied all thils information to the Coramiltee beforc proceeding with the consideration of the Resolutions, This information should cover all
inatiors relating to development on these fivers, and an to what is really meant by a concossian of fifty thousand horae power to the perionas described in the aection. The Goverament also granter to the Company a minine grant of an ares of land of rougtily five square umies, witch is practiest1y gurratinded by land of the Rela Nfle Company, and whith ts on the Humler just ahove Humbermauth. and which the Premier stated the whet day; contains tnarble,
RT, HON PRIME MINISTER:Limentone.

MR. KENT-This area consiata of the block of land intervening between the Reld Nfla. Co,'s bloeke on the narti side of the rallway at Humbermoath, end 1 presume the Company will acquire the rights of tho Relid Nflid. Co over the auloining whas. Thern-l tho retam whintever to the Colony for the srant of this valuatile area of land. The next parigratih provides that all the land, waters, water powers. buildings, aroctian and all property whateoever of the Company, shall be exompt fram muntelpal taxation The next provides that the stock, divjdende and other sucurltioe of the Company shall also be exempt from taxation: and the next that all conifruction wateriel and machinery for the Company's mills, tactories and works, and for the purpose monthoned in clatue 1 hereof, both for the ortismit instithatrois tind nirthor ax. temaicu of the arme, tut not in substitution for old, shall be admitted duty tree Now these rights are untimited as regords time. They sive the Company exemption from municlpuit taxntion for all time, for ail ite property of whatsoever kind. Suppose the Compaily ware to own pect periy in St, Jolinls. The taxer that cilizeus hare to pay for the upkeep of the city, will never the payable by
the Company Now let us suppoate that It town or cify were to develop at Humbermouth. The Company's properts there would the Iric trom sh mualcipal tixation ind the eltirens protably the laboring men and the working tuen employed by the Courpany would have to pay for the funtriterinice ant upleep of the ctvio funtifutions and the streets and other work of much is town The liect propositton is that then stooks and debenturea of the Company are fres from tazation forerer. We passed tiere the other day ati Act whifh im. peses a tax upon the debentures of: levery company doling bualnees in the Colony We compelled them to pay doulh dutios on thefr debentures ind shares and eftocks, but thle company oan so fito nay business it miay wish fand it mimy alter from thrie to thme in the mather I have deserlbed, and tmy carry an that business, and whille other individuate or compuntee may bo competing with it in buiness, the debentures and stocko and nhares will tiways be Iree from taxational. though a heary burden of taxation Juay hive to be borne by othera dolny business along dimallar lines. For instance, auppoaine for a moment that this company in the next 10 or 20 or 50 years decided to go into the ordinary benaral builnese of the country and compete with such firmu as Bowtinge, Jobn, and Harveyr and other firme of that kithd, Bowrings, Jobs, llarveys and the others coutd be tarit upoin thiff diflientures and stack and shares, whereas this company foulf earty on the nime businems and faot be taxed in thls direction at all. Compettion unuer these circumatances ts not fair eompetition.

Amother unfair advantage over its bueiness rizals this Company will trave is thit if it were doing businems It Et Johin's or elsewhere whare the munfipal taxation may be collected

siming of my remarks that the new Company is subaidiary to the ReldNfte. Company. By this escetion the Company is to become a teeder for the norvicen of the Reld-Nnd. Company as arilnst its compettors encaged in the busintas of carriers. For example, take Bowring Brothers' coastal arvice. They do not enter on a fair competition on the carriage of any output trom these works, because section 14 provides that "The Company hereby undertakes that it will at all times ildt it the Company's works at the wholoeale exprort price and deliver at all raitway stations in Newfoundlind and will aiso deliver at all ports of call of the Reld.Nfld. Company's steamers" The intention is to make ibla Corporation a subsidiary and Peveling corporation for the ReidNfld. Ca 1 object to the next section in relation to the rights of private individuals and the manner of assessing tamuse done to the property of priv. ate individuals. I think that if the Company does damage to any individund in the exercise of ite immense powers, that such person, whether great or small, should not be com. pelted to eatabliah a special triturnat to have hile rights arbitrated upon. The right of action tor damage done to a man's property ought to be safeguarded, and he naght net be campelted arifers te is witling. to sutumt to ar bitration. 1 shall now briefly refer to Section 18. This clause provides that The Company undertakes to begin cetual construction work upon its undortaking within two years from the date of these presents and to expend the sum of $\$ 5,000,000$ wlthin the Istand of Newfoundland in and about the busincon and operations of the Company withtn tive yearn from the date of theso presents and if the Company faffe to begtil auch work or expend eteh monoy within the timea mentioned, this agruement shall be vold." The
first condition is that the Company funst bezln actual construction work upon its undertaking within two years. That may mean anything and it many mean nothing. "Begtnt" What is meant by beginning setual constructfon, and what is meant by beginting actual work, and what happens it they begth retaal constraction work and do not continue, does the agroement thea cease? Who is to be the judge of how far the work is to proceed in order to avold a forfelture of the agreement? Then the Company is rotulk of to spend five million dollars within the Island of Newfoundland in and hibont its business and operations. What does that mean? We know the Company is acquiring properties and rishte and certain intercsts of the Reld-Nfid. Co., and others on the Humber River, Junction Erook, and Grand Lake regions. For instance, it is acequiring the land borvering these water powers and the forest areas of the Reld Nfld. Co, at Grand Lake. It will have to purchase these and have to pay the price asked for them. Is the expenditure so made to be included in the money spent for the purpose of acvuirlig property for the purpose of carrylag on lts business and operationint Is moncy spent in and nbout ite business and operations juit as fruch as money spent on construction work or acquiriug machinery? "In and shout its basiness and operations. What does that mean? Does not that thean thit acquirling property for the purposes of carrying on lts buslaces is money apent within the $\$ 5,000,000$. If they are to aequire the pulp areas and forest areas of the promoters around Grand Lake and the fee slmple mining propertles in the neighbourbionit of the Humber, and if they are to got control of other interesta that are there, how much of this five milllion dollars will be left? it will probably be entirely exhauated and the
agreettint means that by a allehe manipulation thet ralue of conceselons mate ly this akreement areatheched ta properties alienify held by the prometers, I wond like to agala polnt out Thiti Die Cotony lis getting ao returne whaterer for this, wo rent, bo tax, po Bonus, nothlug. Thice the last elause reterred to. Suppose the Company fallis to miake this outlay, or suppose this $\$ 5.000 .000$ is ineluded in the ac quisittos of propertion from these par tion, and there in no actual cash sjent in conntruction and dovelopment work. The water pownre would be theiri, and they could retuln them even though privilegos of thls agreetment whould cease to attach. This is noticeable particularly in the monds uned in re Teference to Labradur and the wonlt uned in reference to Nexfoundtand. In the words uned ta the caan of Lar Arader, it they full to male the ex pesiditure thers withtm ftwe yasis sfter Lhey lawe acpuired the tithe to the water powers, ther then forfett the powet themselves. The grante are vold. Bat it is ditterunt in the case of Newfoumelinnd. The eranty are not vold. They ntill retain the properties. Newfeumilntid zuti lio rvturn. The question of Inbour has been referred to by the Prime Mintater: There Is fo provisfon in reference to labour in thill agreetnont. In former contracts It way uenal to have a provinion recardlag labour But there is no pro qielen it this or courne the Compiny in golng to ent its inhoer as cheap as it cas pot it anit eotng to get what labour it can in the cbeapest morket it cent get it, mticuher it be Chtnese laboar or other labour of that bind. There is mo pruviaioa da to the rate of warte or as to the amount to he pati, anit ruppostare if coaptracta its works and geta in outulide lahoar, the money that is spent on the labour will not tiecesmarity benefit Newfoundland. These laborers will come in here and
while they are workise they will mad theit money to their famulies is forfirn cuutitim and silierwands retsm home and belp to spent it, and the Newfundlant labear misrket will be tenaifected it labour is provided at much a rate as noe to pay a Newforast Iander te leave the flaheries and no to work In cumpetition with forelgn lahour fur the corporation, and then Newfoundland setis no benefit from the work There la another feature which oumbt to be borne in mind by the Committee in cannection with thase repulufiona. MA. MOAINE-1ir, Climirman. Thin matter now before lis la one fraught wfth such tremendous powsblities that one appreachep the discusston of It with a feelling of despair as to one'e abitity =acequetely to nit It tictore thio Howee We bave to deaf with reoolu-
thons comfirming in agremment nlresdy maide and it ts not porsitble for this iomumittee to atter the agreement withoul the conseat of the Cormpasy to that alteration. It is not powilite for you to crows a "t" or dot an "1" within the acherdule of these resolution. flut you can end 1 trust you will hare B way vith refirenee to the alteratlon of the rosolutions themaelves beforn you flialty conftrm the segrue. Eaent it is unfortunate, and 1 think the tulsfortune will appear to hion. Eembers of this House that the agrees ment and resolutions have been framed by the counsel for the Company and bare not been adequately critioteed by an equally competeut man for the Government. The counsel for the Company is a director of the Relid Newfoundland Company, and nomleaily oni of the ehareholders of the Newfoundand Producta Company L.ta. It has been admitted here that theme resolutions which are now be: fore us were drafted by him, and I have no houltation ts naying that Thore is no man on the Government sude able to ertililze his work; and I fenture to nity. 1 atm as certath as 1 cas be, that if the Corernmest had a counsel to look tato this case with the ability, the acumen and the infereste of the sentlerian who framed this bill, we should not bave nuch resolutions before us at this presant time I am so eertaln of the that I venture to declare that the Goverument will may that this is not the urreement that they intended to uapport, ind conseguently the reepluttons will not in my opinion receive the supfort of thits Houne, that these resolafloan mean something more. sornething that would be terrible for the future of this Colony, womething that no dovernment in Its sane senses would bring down for lestslation. I Fill ventare to eay that the Government does not realize what construc-
tion can be put up on them. If these go through, it will be in a very dff. ferent form from that is which they now stand.

The Premlor adopted an unlustifiable tone when introducing this agreemient. He exaggerated the good rosults which mikht follow fts adoptlon; he kept out of sight all possible evil offocts. He adopted and gave elrculation to the figures aupplied by the promoters, and had made no insuiry as to their correctuess. It was the company promoter we heard through the Premler's mouth, not a responifle stateamen. In the agree ment, it ts said, for instance that those persons who now have rights on the Humber have assigned them to thie Company, and it is on thls basis thin committee is aaked to confirm the agreement, but the Premier has told us, when questloned closely,that no such assignments have been seen by the Government, and I am now In a position to say that the statement fa false. No assignment has been uade by anybody or agraed to be made unlens it be the Reld Nnd. Ca Then, agnin. I have this fault to find with the Premier's speech that you many eearch it from end to end and flid no adequate warning to the peopie of this country as to what they are called upon to surrender. The Premier bever teld them that they ware eatted upon to surrender the right of taxing capitnl, debentures and mortgagee of this Company, as the debentures and capital of every other Company dotng buitnces in this Cotony are taxed. I think you will look In valn to find any statement whatever in his upeech that they were free from muntefpat texatton. There wae no attempt whatever to point out that thle was a freedom from municipal taratioa not only with regard to the matn obfect of the resolutfons and the agreoment affecting the Humber pro-
party, but that this freedom of municipal taxation and taxation upon capltat, debentures and stock applied to every one of the operatiotis of the Company which they carried on In thls country or on Labrador an contemplated th this agreement or which can possibly be carried on by this Company, whether referred to in this agreement or not. As Mr. Kent has very well polnted out that thls is on agreement with a Company whose charter in not the sublect of an Aet of Parliament defining what it may do, but that we are conferring these powera upon a company incorporated under the General Companies Act. which may have the widest possible objects and may carry on any form of bustness whatever, and, if it is not atready covered by Memorandum and Articles of Association, it can get them changed in the ordinary way, and that the Company may, under the Genaral Companies Act, carry on any kind of a bushess, from the making of a pair of shoes to engaking in the tiaherles of the Colony.

Proporly construed, these two sectlons relating to taxation mean this, that the Newfoundland Products Corporation may carry on any bastnesy of any kind in Newfoundland free forever from all forms of tayation which if Imposed upan everybody else in thls country carrying on similar buninesa. That if handing over the sountry and its business men and ite future intereste, bound hand and foot to the Newfoundland Products Corperation.

That is ono reason why I say that If the Government had put thin matter before competent connself, those resolutlons wuld have been qualiffed - If, Indeed the Goverument wishes them to be qualified - by words reutricting these privileges to some definite property, either on the Humbor.
or on Labrador or wherever it inight be, and to some definite time, say ten or twenty years.
As Mr. Kent has pointed out, if you had a charter before you, and if you had the powers of the Company ontared on that charter, so that they could not be altered-If you had something definite in that respect-then you would have these resolutions of ireedom from municipal taxation and from taxation in all forms upon the property applying to a definite class of work; but as it is at the present time, it applies to all kinds of work for ever, and practically hands over a very large section of the country to one corporation free from all the obligations which other people have, and forces upon this country this position, that the country will develop its public service around the property of the company, as years go on, while the property of the company contributes nothing to the taxation which pisys for the development.

Take, as my learned friend has said. dhe case of works at the Humbermouth. They will involve large expenditures by the country in the making of roads and all the other munielpal zervices. If a city grows up down there, composed of the operators in these works, and the many other lines that will grow up in consequence the people who are there will have to keep up that eity; they will have to pay muntelpal taxation; whille thls Company is to be entirely free from that form of taxation for ever.

Now, them, am I right or wrong In supposing that the Government do not want this and that the supporters of the Govermment will not assent to it, and that before the resolutions go through they will be so altered as to apecifically polnt out the particular worise of this Company which are to be free from taxation and limit the
time within which that freedom shall last?

Now, by way of showing that the Premer does not understand this agreement (and if be does not, it follows that his Government does not understand it) I mean to read some extracts from his speech in reference to the money which is to be spent. I assume that this misleading statement was not deliberately misleading. 1 do the Premier the fustice to suppose that he would not in this House attempt to mislead, and theretore that he stated what he construed to be the true meaning of the words. The Pre miter says:-"The Company undertakes, In addition to an expenditure of $\$ 5,000,000$ at Bay of Islands, to expend an additional sum of $\$ 5,000,000$ in Newfoundland within ten years,and the further sum of $\$ 10,000,000$ within five years in developing its Labrador plant." That is all wrong and misleading. The Company doea not undertake to expend a dollar at Bay of Islands speetfically. As to the amount the Premier refers to in this way, the Company merely undertakes to expend it within the Island of Newfoundland, (See, 18). It is not even confined to the lind of work which it is sald Bay of Islands is to have, but is to be spent "In and about the busIness and operations of the Company" In the Island. As to the addltional sum of $\$ 5,000,000$, its expenditure is not confined to the Island, bus may be made in Labrador. (Sec. 2).
The Premier says: "In the event of fallure to zo spend, (referring to the whole twenty millions, the grant of water power on the Labrador shall be vold."

Wrong again. The provision is "the Company shall spend the further sum of ten millions, and if the Company do not expend the sald sum, the grant ahall bo vold."

Now, sitr, I say that I Newme frome ataremmits of that sort that the Promeler has not read the costruct carefully! has mot connidered if with the atd of uble counsel to potht wet to am what is may mens; but ha fuas taking it upan its face, casually an it were wut has rettist tom mukh उpent other pespie. thing of that kind before them, or at least it has not been put before us in Committee.

Thif agreement gives to thls paper corporatlon the control of all the valaable water powers in the Colony: and when I say all the valuable water poweri of the Country, I admit that there are other rivers, hut their powera certainly do not come in the same category as the Gander, the Explolts and the Humber.

We have perhaps in the Northwest and Hamilton Rivers one of the kroatest water powers in British North Amerlica, and pertiaps the only free water power at present on the continent; and you are proposing to hand that over without a dollar compensation, without a single attempt to amsess its value; without advertistag it through the world and asking for blde upon ft , without attempting to turn this groat asset into money for the discharge of the public debt of the Colony.
At the prasent time water powers are growing immensely more valuable tay by day. We nee th the Province of Ontarlo that the Government are refusing to grant a slagle water powar, and they are acquiring back powars which were granted before, because it is telt that these pawera pught to be free or ought to be under government control, and made as: free as possible; and yet we are hare lizhtly handing over the one great water power controlled by Newfoundland without the slightest enguiry being maite by our authortties an to whit can be done with it, as to what la its ratue, an to what disposal can bo made of it.

We propose to hand over in fee simple, an a clear gift, for nothing at. all, an neact that In the course of the naxt five years, or ten yeara, or twenty yeara at the rate at whteh the value of water powers are fncreasing
today, might be worth a aum which would pay off the public debt of the Colony.

I say here now that in the course of the next ten years, in view of the adrances that are taking place in electricity, In view of the new diecover. lea that are being made, that water power might bie sold for a sumclent num to pay off the publice debt of this Colony.
The gentiemen opposite who laugh ut a prediction of this kind win at least admit that the Qovernment of today have taken no atepe whatover to find out from sclentific men, from men of adequate knowledge, ns to what the possibilities are withtn the next few years. The possibility is there, and if it is, then you have no right whatever to take thls great asset away from this Country, and throw it to a paper corperation like a bone to is hungry dog.
And we are pasalig over something more. We are giving powers with reference to the Bast Coast section whleh extend from Hall's Bay upon the one side to the East slde of Gander on the other, and right up to the head waters of the Gander and Explolta.

We are passing over a section of the country that, 1 am told, has the greatent mineral possibilitiea of any part of the cosntry. We aro passing nver the area which contatns the copper and the phosphate-a sectlon of the country that must have great pos diblitias. We are, 1 have been told. granting no land thera,

But I wish to point out this (and 1 shall go finto it mare fulty in a moment): That we aro Etring the Company powers which they may exarclse in connection with any water power they take over which will prastleally malre them lords and masters of that whole nection.
I belfeve then that is a matter
which the Government and the supporters of the Government have not adequately grasped, because we have beon very eastly told that that was not the case $-s 0$ mixed-up is this agreement, ,o cleverly or so stuplaty (whichever it may be) has the true meaning of this agreement been hidden in the words which are used.

Anybody who will take this agreement and carefully look through itthe resolutions are a mere reflection of the agreement-will conclude that it is either the most atupldly-worded. mixed-up document that was oyer brought before a Leglalature or that it is the most elever and deceptive one that was aver formulated; because there are thlogs there that, If meant, show tremendous cleverness, and if not meant, show tremendous stupidits; and I am bound to sssume, from what I know of that document, that It is cleverness, and not stupldity. which is at the bottom of it. But either are equally dangerous. Whether it is great claverness or great stupidity, they must be followed by slimflar consequences in any document passing through thls House. Now, let me, for a moment, draw attention to this document, and let me begin by polnting out that it deals with three main subjects. It is three contracts rolled inte one, and not three separate contracta. Now, I agree with Mr. Kent that for the sake of clearness, for the aake of tetting the public know what we are giving, the greatest care should have been taken, and therofore 1 say that this contraet ought not to cover in one agreement, three subjects having no necessary relation to each other. Why did not the Government come down here with a contract dealing with what may be called the Humber question, so that we could have seea the condttons that apptted to that, so that we could hare criticised those conditions and put proper re-
strictions upon them Another contract, If they wanted to, with respect to the Hamilton River? And a third one with reference to that most dif. ficult and intercasting subject, the Fights of this Company tn the Gander tuit Exploits regton? Why did we not have three contracts before us, each of them carefully expressing what Were the righte of thie Compeny with fererence to each other? As 1 hinve sald Sir it could not have been looser, and it must have been deliberate intention to so mix up this matter that ordinary men, and some exiraordinary men, could not quite determine what It moant. If what 1 have sugrested had been done, we woutd know what whs meant th the way of expenditure. for Instance. When the Premfer told us fo his address here that the Company were to spend $85,000,000$ at Bay of Islande, 1 presume he reforred fo section is Trider section is I find that the Company milertakes to begin ectual construction work upon its uncortaking within two yeare, and to expend the sum of $\$ 5,000,000$ in the istand of Newfoundland to and about the business and operations of the Company writhin five yeara, and if the Company rails to begin such work or expend such money withtn the times mentioned, this agreement shail be rold. Now, if that were in a contract dealing with Humbermouth and with the Humber River, then we would have some idea of what was to be spenh in that reglon, but it does not apply to that worik any more than to any other work, because it says that it ahall be spent in and atout the bualness and operations of the Conupany in the Ealand of Newfoundland. If it were intended that this amount should be spent at Buy or Istands, why is it not so expressed, and why does it not sny "In and about the construction ot fte works at Humbnrmouth and in the dralnage area of the Alumber?" And
then 1 turn to section 1 and what de Ifind? I find this: That it is agreed that if at any time durfig the currency of this agreement and within a period of twenty-one years from the date hereof the Company shall valldly acquire or become legally and propertv entitled to any water power or warpowern in this Colony or tts Dependeneles within a distance of forty miles of the Company's factorles or power houses at the mouth of the Number Riven, or within the dralnage area on the East Coast of Newfoundland comprised within certain limits such water power or water powers shall be taken to be held under this agres ment (except clause 10 hereaf) in re spect of the rights and privileges granted to the Company, shall apply to all works and business, and the materials for the construction and oderation of the same, which may be constructed and carried on in conneetion with such last named water powers for the purpose of the manufacture of phosphate of ammonin, nitrate of ammonia and other fertilizers, carbile of calclum, cement and their byproducta, Now, that means all the operations of the Company on the East Coast And then section 18 says that they shall spend $\$ 5,000,000$ on their works and operations within the Taland of Newfoundland. That does not bind them to the expenditure of that money at the Humbermouth. Now, there is another thing which may not have been Intended, but which, 1 submit, is clearly meant by the agreement. And this shows the difficulty that arises from thia attempt to cover two or three great main subjects in one document. I will just read seetion is "The Government hereby demises for a term of ninety-nine years from tho date of this agreement to the Company ( 80 far as the Government can consistently with any grants, leases or licenace heretofore made and actually
subsisling demise the same) the water power or powers in and upon the Humber River and in and upon Junetion Brook and for the purpose of its works and operations the Company shall have the right to divert, stop or dam up any stream, lake or water course. within the drainage area of the Hum. bor Aiver, and to make, construct of malntain any dam, water course, culverts, drains and reservoirs in said nerea for any of its said worlte or opcrations." Now that is clear-positive it applies to the Humber River. But the shme scetton goes on to say: "And it is agreed that if at any timo during the currency of this agreement and within a period of 21 years from the dite hereot the Company shall validiy acquire or become legally and properly entitied to any water power or water prowers in this Colony or its Dependercies within a distance of 10 miles of the Company's factories or power houses at the mouth of the Humber River or within the Arainage aren on the East Coast of Newfoundland; such water power or water powcra shall be taken to be held under this ngreement, and the proviatons of this agreement (except clause 10 hereef) in respeet of the rights and privfleges granted to the Company, shall apply to all works and business, and the miterials for the construction and operatton of the same, which may be constructed and carried on in connection with such last named water powers." Now, is that power which is expressly given to "divert, stop or finm up any stream, lake, ote., in the Fumber area," intended to be given alen in relation to the Enst Coast area? 1 think it is impliedly given Is it intended to cover the two, or only one? Is it intended to cover-1 take it that it is-the forty mile section in grants of other people, which they find around the Humber Fiver? Why are not these matters made plain? We shall
prolontily, whol this mattort is in Com tiitteo hy and lyev, harve intmbers upun oun ride or the other disputing as to the exact meaning of thise chatee, one seging thit it mentie this and anothar Negloy that it tarmes thet and thme (iteputes will be sumident fantificution for the argament which I tim making nay Then, again, sir, when we come to Na. 2. which teals entiruly with the Damilina fiver, we lind that instoad of igntitis if lessen the Company If gatting a frant prid beooming the owbert of it in fee bimple tirovited they de what fie stated at ilio enil of thlin deame, and then, after that, thoy यात to hisis, dipparellity, during the term of this merturnent sud while it is not forfalied. rery many of the eighte anil privilegat witich are Eiven in thle surrement In ilie sirit phace, this cires them the ri-ht to the wher powers of llamiton River; it gives thom the risht to take a wator power on the Nartliwest River, If thoy blet to ofo mo; and thuin the Govermment undortakes that durine a berted of flvat yoary it will not kratit rey water pow. er oil either of these river to ary persin whatmorver, They find themtolvas with an abnolute risht to thries rivers, in exchange tor which they don't give it ten ceist piace Now, tile that alone Why should you hand over tio aly corporation a kreat water powar such os there til down there, and tle up the dexelopmonis of thenes rivarit finf at lanet five Fitare? Whs ahould you do this withui ocmatileration of any luind, not eveat the pideu of a puatige athript Yoa finc at provistort thiat the Company atill eapunil to the devalothment of the bold whter power the further irum of bet million Jollare, and if they dos not spenil that within five ycarm, then the grant of the sald watar power of the tabrador shall he vord-shat monay in aot Hecesamily to be Fipent in conntriction of any works. If mity be spent in tho rumking of a water poper there, Noue of the moncy
"אpetmed comes to the Colony Itwelf is compenmation. None of the exfrenditure any eror come to angbody is Nawfoundland. Thare are not many of our people living there, or ivho dunles to live there. If they put vartes there out of thff_ten million |inllare, a eviry larse propartion of this uicury will be fipent of these workil ind on the muchinery, stil not one dollar of the anpount which is spent may viver come to auyboity in Newfoundlinid सwen for linhour, becruse they are ninch inore likely ta get forelen labour ind bring it flown there, and no adshintivel cunt come to us except from tie amount of the Cuatome duties whtch may be colfected from time to (ime on the erticles which may be broumht in by the people down there. All then goodif thiut go to Labradar are to bu triew from diaty, and all the construction material and mathinery of The Clampiny are sinco to be entirely free from duty, and therefora the Colony itnelf will be gefting nothing Whacovor baclt in the form of Cuntome fraties on the immall amomist thit the tabruters expend. And you are pasis (Its ovis) it such comaideration, one for Ahe fRatsit water powern, as 1 have fointed wut, on the continent, and the fribitest lhat Newfoumdlumi has any sontrol nver whatever. Yea are tying 14 for is poriod of five yeurs before fou can siny tint the Company have dofmitient.

I have before me a returu showing tha amonst of timber lands held on The dmamaer ares of the Fast Coant, Renorvition 1 find that 2837,920 furribs of land are coverrel hy timber righai bo bursohs and eotmpanies othor then the Retd Newfoundland Companty on that siren.

Now, then, look at Eection 1 and notion there agnin thut within that brea all the righte and privifeges of nati agreement shall apply except noction 10 , which is the nection Whati duats with expropilating private
property. If this Company obtains any wator powers within that section -if they shall vallaly acquire or thecome legally and properly entitled to any water power or water powerz within the soction of the East Const named in the agreemont-then what may thoy dot Then such water power or powers shall be taken to be held under this agreement, and the provtalons of this agreement shall spply to all the work and businese of the Companv. Now, what are some of the irovisions that would apply. Here is one of them. It they gltain any water power on the Gander or Exploits, thoy may in the course of their work and operations divert, stop or dam up any strcam; take or water course withtn the drainage area, and make, construct or maintain any dam, water course, culverts, drains and reservoira In the sald area for any of the satd works or operations.

Sow, that Ls one of the terms or provistons of thls agreement. Is it that the agreement does not clearly axpress what it means? Will anybody on the other side say that that does not apply? Certainly, if they do say It does not apply, care should be taken in the resolutions by anil by to seed that it is clearly stated that it does not apply. If there fa no doubt about it and if it does apply, what is going to happen, what must finevit ably happen to the owners of three tullition acres of timber lands? Why, it means that this soulless corporation can destroy and dive out all the other operators and all the other owners of water powers or timber lands withln that whole great section because it can so infure them, make it so difflcult for them, that they will be glad to sell for any price, or for no price it will be a case of scuttle mit with what you can get, because yCur Iord and master, the Products

Corporation, has got this power over soa.

What are wa cold in section 20: Notwlthstanding the grant of the water powers herein all persons shall have the right to the temporary ube of the said waters for the purpose of passing to and fro in small boats, and for the purpose of floating logs and lumber hielonging to such persons to their mills, provided that such use shall not interfero with or profudice the busineas or operations of the Company".

That is to say, the owners of three million acres of timber lands upon thint area hold as subordinates to this Company the minute they obtaln one single water power in this whole area. I may be told that this is not the intention. My reply to that is that I am seriously putting that construction upon It; and 1 am not making that construction; I have consulted various lidependent lawyors outside thie House, who are not in polltice, and they put exactly the same construction upon thia as 1 do. And if there is a chance of aifferences of opinion, then betore these resoluttons go through it shouta be provided that everybody shall not be placed within the devouring maw of this monster which you are creating. A company without a share, a company without a dollar, a company getting valuable concesstons for nothing, a company to which you are siving away the greatcst water power that this Colony has, a company with powers which vere pever given over such a wide area to any other company in man's Ifetime.

1 find that in the Humber area there are $1.413,060$ acres of land beld by other people or companies. It cannot be denfed by anybody whatever that this agreement confers upon this paper company the right over that area to dam and divert and stop and
exemster wil tho powers over evtiry part of the Humbine krea. Now, if then haliepis of ttin land wers hisfe 10 ay that they manninted to that, that it hat lewe acrech iponthet there waula lef motnn Jurtifiation, hut whilli a mats who hotds a ifnein serti of land oret therenchutts what rient fin+n joy to takn asay from hlim all lin great nakeral, cornthot peovert whish he has orer the itroums and inken? what right have pou to hand them all over to thin company asid was Equaste the IIt out of titn and intian bilin cive tp lis righte whether be viativer to or not. I finit with reprent to the Hamiltua Htver and Inlet there sre nearls T.0.0., eee acres of land helid dewh thort by differest partiek, itome of these then, of courne, rasy have agreed to sefl (hinir Interests, some of them may not have agreed. and viry proliably hase not. Sinw, what right hes this Hasce to proceed vith thls apreement rogaritige the Anmilite fiver oat atep further that we have cof at the preseat time untll we have efrem overy one of theide owners the right to may whit be thinks aloout this infrippement of hile righta.
flecatere I want it bolith this eut. that while in anctlin 2 jou moummer to pire these people unly a power on What in colled The Munkrat Falie on the Hamilton River, you are at the firme time girinte to, them riathls to \&am the Mriamas and soblenred the enurafes foo saoruly in the stetnity bot its ether tiarta, of nuctic a eeneril elimecer that in then eaurcitir of thent they eas the zp the Crand Halle or aty othur pooser on thase rlvers, and tuakn evory other power an thobit subtalary to themnelves And In thla connuetion 1 finay fray attention to in quortion which 1 anked tr this House, and to whinh I have got a paring anilwis, for currmpoudence show ian whether Hom. We tantpt slways agree with mes Whilher on matters suech as threse We finve doee evecrialug we cuald for the betterment of our flatermen. As I have atated before, the secident laat Trat put erersboty thtrlifug. This aco Fillent wpesent the egan of the Governfaret, and-atise of the Opposition. It lues truaght them together mow at this swrfort of the Eecfitature ant has cansed thetm to cive of their best taltht is framing this bill now vaiter corinlileration. The Commiantion thit for appofnted by the Goverminut to faresticite Inte the lonn of thase poor fellows at the sual fishery, atter (akien the evidenee of so mung sealurs, han fint the thalr recormmenfationes to the gevernmenc
1.-It shall be unlewfut to kill axy wals of to retanim upote the tee in charret of my sent pett ereopt to twen the hoors trom daylight to tarkt and ao persuan befag a membur of is enve of any ateamer enmaged at the met nikery जhatl, without fowfil ficuses, toe or ramain upon the lie or awar trom ate nblp after ons hour after dark or before daylight Any person evmmittitg a breach of thits
section shall be liable to a penslty of \$100. to be recovered in a skmmary manner by any person who shall sue for the same. This section thall not apply to the strapping and hoisting on board of seals, and in any prosecuthon under this sectlon there shall bo no conviction unless it is proven that a complaint was made to the Master. and the facts entered in the $\log$ of the steamer within slx hours after the offence was committed.

As to Section 1, I may say that the judges recommended "from sunrise to sunset"; but in the spring the ovenings are long and consequently that wording was altered. The second balf of this section has been altered considerably to what it was in the first place,
2.-The right of property in seal pelts arlsing from the killing of seals and taking the pelts thereof into poesession, shall cease if the pelts be not taken on board the steamer by those by whom the seals were lilled wlthin 24 hours of the killing of sald seale, Thereafter the pelts ahall belong to the owners of the sealing steamers on which the suld pelts are placed, or whose erew or some member thereof have actual possession of the peits.

Now the argument may be rafsed againgt the words, " 24 hours." What is falr for one crew or captaln is falr for the other. The law is the law for everyone.
3.-No steamer carrylng more than 150 men shall be cleared for the seal fishery unless the Collector of Customs is satisfied that she carries with such crew a competent medical practitioner.

We conslder that where there are 150 mon it le necessary to have some person with a knowiedge of the allmeats of mankind, to look after them
4.-No steamer shall be cleared for the seal fishery unless there is on
board a duly certificated Master or Mate in some capacity.
We do not say that no man can go to the sealfithery without in theket of competency. But where there are so many men on board a shifp it is necessary to have at least one man with a ticket of competency.
8.-Every steamer engaged in the seal ftshery, whenever any of her crow is or are absent after dark or in fog, mist or falling or drifting snow, shall make with lier steam whistle or other steam sound signal, at interrals of not more than tive minutes, a prolonged blast, under penalty of $\$ 400$, to be recovered in a summary manner by any person who shall sue for the same. Each steamer shall bo provided with fire rockets of a class to be approved by the Mintster of Marlne and Fisherles, and they shall be fired when any of her crew are abeent from the ship after dark, ofther in fog, mist, or ralling anow, under a penalty of $\$ 400$, to be recoverod th a summary manner by any person who shall suo for the same.
It may be remembered in the exanufnation of last year, that the whlsthe of a steamship is not always kept blowing We know that it wae not done infentionally. But the consequence was that the men had to remaln on the ice. Therefore we thought it wise to add this to this section. and also to fix a penalty.

10 .-If at the end of the voyase the work of the cooking has been satisfactory, the ohief cook shall be paid a bonus of $\$ 20$, and the assistant cooks a bonus of $\$ 15$ each by the ow. ners of the shlp.
It may be sald that these cooks, if they are good ones, will save a lot of provisians for the owners, and are capable of cooking the proviaions in in manner that is tasty and the men will be able to eat with a relish. But a poor cook does not get on with the
men. While these men have to work tilght and day to provide the food for the orew, it is right that thoy should be encouraged in their work.
11.-It shall be unlawful to kil! any Hooda between March 10th, 1916, and Aprif 13th, 1919, or bring into any port of the Colony any seals so killtul under a penuity of $\$ 5,000$ to be recovered from the owner of such steamer by any person who shall sue for the same.

12 -No zenie ahall be Jilled by the srews of any ateol shlpe prosecuttrg Tho meal fishery in miy yenr nfter ADril 15 th.
13.-No wooden ships prosecuting the seal fishery shall have on board more than fifteen rifles.

I may say that last year thlg Honse abpointer a Commission to make f Fegammendation to the Assembly in reterence to the fatarador fiehery. luft fishery, seal fishery, and whate fishery, It is one of their own recommendations and we thought that it might be added to this Bill. These three sections were recommended by the Commissioners.
14.-The Governor-in-Counell shall appoint a Board of Examinera con niating of three peraona having not toss. than ten years experience as Musters of sealing steamers. The said Boanl shall make Rules and Re, sulations in relation to the exeminaLion of all perions intending to pros acute the roal fishery in iteamera ne Masters. Second Handif or Master Watch and shall examine such per sans and grant certificates. No por non shall go to tho seal fishery as Manter Secobd Hund or Master Whitoh without a certifleate of com petency, from, the Board of Examiners inder a perinity of $\$ 5,000$, to be recovered it it summary manner from the owner of the steamer in which any such person shall sall by ans perman who shall mue for the

Baite, The Qovertior-in-Counctl shall make Rules and Regulations na to foos to be puif suoh Board of Examiners, and as to fees to be paid by Masters Second Hands or Master Watches In relation to such examina tions. Providod that this shall not apply to any Master, Seeond Hand or Master Watoh who has heen at the sealfishery for two consecutive years previous to 1916, in any of the satd respective capacities. And the said Bonrd shall furnlah froe of coet certificates of competency to all such parties upon satieflactory proof of such persons having been at the seallishers as aforesaid.

Now the Committec gave thly matter their consideration, and I have no doubt but that by a sreat many this sectlun will be very mnch critfcised. We must remember that the master of the ship is the culer of the erew. But we find that there is an uncle's son or a sister's son who slgns on and is given a master watch, and lor the time befing is leader of the mon, no matter how tncompetent he mny be, But as, when he has exhnusted the captain's orders he is thrown on his own resources, it Is necessary that he should be a leader of men, and competent to deal with the aitustion, I do not for a moment say that he may not be a good man, but a man of experience is needed in such a case. He often has to get advice from one of the, gring who has had fifteen, twanity or twenty tive yearr' experlenco at the seal fishery. If be had been acrutinised by threo old sealing enptaina, I belleve that thoy would put aboard of our ships, men who are capable. Therefore your Commit. tee thought it wise that an examination should take place. Take the fireman who are in thone ships, Thene men cannot so nhoard of our steamera without gotng to the examiners and passing an examination. The
firemen are ontruated with the stole hold, and have the lives of all on board in their hands. Some years ago the S, 8 , "Tigrees' was blown up at the seat tishery, and gulte a number of our men lost their lives by that ship boing blown up. Portunately there has beon no ropetition of this chastar, becanse we have a better cןass of men as fremen. These fallows are playing their part below as well ns those on deck, and I think the time han come when the sealers ahoutd be tooked after in it proper matiner. They shoula so through an examination to qualify them. And by so doling they would have a sense of reaponsibility on them which they have never had before. Then it is easy for the law to diannalify them if necensary. This may srem hard, but if we want to took after and keep our men, we havo to make zome auch law.
15.-No member of the crew of any sealing steamer shall be placed on her artictes excent with the approvat of the sealing Captatin aalling and commaniling the ald हhip.

1 constder that this is a very good atidition to thls Bill. There are mea today who are out to the tee and the Captain does not know anything about them, I go down to Mr. Job and 1 ask fifm to give me four or five tickets. Rut he thas men workluk on hls premises and gives them a ticket or twe. They aign on with one of then captains and get outstde, and the master wateh goes down and snys: "all hands out," but these men refuse to move from their bunke, saylng that the captatn of the steamer did not give them thetr tickets. The same thing goes on year atter year. A captain should be parttonfar what sort of a erew be hins with him, There ta Capl. Willam Bartlott- a man who known as much about the Gulf Mishery as any other man. He tert with it lot of fine men, as far as he
knew. But he dtd not get the seale. The men asked to be put ashore, but there were men among that orew who wanted to atay imttl the end of Hie voyage, till the end of May. Many davs were lost in fringlig these men to port, and the other men lost a sood trip of seals

T5.- If it be shown to the sattifaefton of the Customs Omoer of any port that a wooden shin han landed more that onehalf of her criw betause the season has become so far acvaneed that a full crew is no longe or necessary, and it the sald mhlp shall not tand any portion of lier canso of senls, or reffit she shall agnin be cleared for the Seal Fiahery by the enid Customs Oftcer, and shall not bu deemed to go on a second trip provifled the teaves port before the 10th of Aprit in any year. No ahlp shall be allownof to land more than onice to onv reason under the provistons of this Sectionarovided that, in no case. thalt a Custome Officer clenr any shlp under thle Section until the ow Hers of the sald shib shall have satistoid hifm that if necessary provtstons thive been made to conves the por tion of the crew me fanded to their raupective homes

Now thif 旧 the Bill which, 1 think, - have done my best to explatn, and t hope the House will afve it thetr wner best consideratton.

MR. COAKER-Mr. Chairman, I am tery pleased to be able to congratuInte the Govermment upon this Bill. The Clovernment conmented to put the zatter to a Select Commltteo. and consider it. Beforo the Bill if passed thare may be some amendments to some of the Eectionit This bill if the outcome of the terrible disaater that wrertook our men last year. If it comes throukh, we may miy that the lolid That vear was not in vain. The first section of the bill deals with a wrotig actlon which is punfishable by a larce
tine. This section was sent down by .he Commissioners, though not in the form that is before us now. Permisaton is siven to take seals on board at any time, but they cannot semain on the lee to protect their seaif, after dark. That section dces 3ot iniclude any penalty for the captain, but only for the crews, It should cover the ceptaths as well as tac Trewn. The second clanse ts an important one which has been discussed for many years in the Colonv. Tha :irut argument against this is that theth is golng to be no end of rows. But 1 do not think that that is going to heppen. When the ateamer to asting they usually take a course by thomaeives. It may be that oecastorsallv they croes one another, but they will not do it purposely. I do not think that there is gotng to be a big amount of trouble. It will do away with the great evil of sending men a long dis. tance from their ships. The captain will hesitate before he gives that or der. That was the cause of the dieaster last year. A steamer often lande men lhere and thore on the lee and goes off to pick up some more seals, and is ten milles away from the men. Hit that will be remedied now. That is where the exil comes in, in panning patches of seals a long distance from one another. I think that a great deat of good will come out of this bill. Another benefit that will come out of that clanse, will be that it wIII sive the smaller ships a chance. 1 think that the whole Committee will agree on this point. There may be some opposition, but give it a trial for a year. If there are sufficient reamons to alter the law, we can do it, and make any necessary amendments. The third sectlon: Everyone will agree to that. The fourth section: That is the usual thing in most of the ships. Section fives: If the law is broken there, the offenders have to pay a
compensation of $\$ 1,000$, and I believe that it will be one of the grentest safeguards in the bill. They say that they-have to run the riak. There has been a lot of riak. I truat that when they come to realise that $\$ 1,000$ must he pald, they will be more careful. Section eight: Ir the fog comes in or there is falling snow the ship is supposed to blow its whistle every five minutes, a prolonged blast, under a fine of $\$ 400$. That was the trouble last year, no whistle was heard. But that sort of thing will never happen asain. The trouble under section ten is that the assletant cooles are not aubject to the chief cook. The assletunt cook gets up 3 o'clock in the morning rind works till midulght, white the rest of the crew are having a fine time. We want to give the chlef cook control over these men, and show them what to do, so that they will not rebel. They should be pent out tis cooks instead of as senlers, and if they are pald as cooks they will be bound to attend to their duty. I am sorry to say that thla year the cooking has not bean very aatiafnetory. Who is to blame I cannot say, but there has been a lot of dissatisfaction: There was some trouble on board the Erik on account of that. I ahould tike to read the following atatement in relation to that:
Bilt of Fare on the S. S. 'Erlk' for
Sealing Voyage, 1915, from March 8th to April 27 th.
Fresh beef was served in soup three times during the whole voyage, nameIy the firat three Mondays out.

Potatoes and Turnips served only twice with duffs during the whote royaze.

Brewse served once for the Spring.
Beans twice a weak for breakfant untll the 15th of April. None for breakfast from that time to the end of the voyage.

Bill of Fare on the 8.8 . Erik for

Sevalfing voyage, 1915 , from March Sth to April 27th:-
(1) Presh beef was served in soup three times during the whole vogage, nameIy theiffrst throe Mondays out.
Potatoes und Turnips serveal only twice with duffs during the whele voyface.

Brewas twiee a week for breakfast until the 15 th of April. None for hraakfast from that time to the ond of the voyage.

For-eight days on the trip from St Joln't to Fort aux Basques, 1 Ib . Joaf of brened armed to a bunk's orow of three men. The first week the baker was on boaril we get no soft bread. The following week on Saturday, Mar, 27th, we got bread, but it was so sour that, we could not eat it. We got aoft hread once a week after that.

Turnips were served in soup only three ttmes daring the voyage.

On Grod Friday, April 2nd, the stoward refused to give us salmon for dinner. It was the first time we asked for satmon.

On Fanter Bunday, April 4th. we had pork Zor dinner, but no pork was aeryad till Sunday, the 25th.

We did not see uny canned meat for the ppring.

On April 19th five men went to the captain int fisked that food be suphhed the crew according to the Seal. lag laws of 1914. The Captain satd that the food was not on the shlp.
On April 12 th the last meal of potatoes wns served.
We leveley certify that the foregoing statcment is true ind correct in every particular.
Arthur Gons, Fred Dodd, Henry Goss,
Josuph Q. Murphy, Richard Thorne, Thomas Hynes, william Butler,
Hen, Legrow, Alex lacey.
I am sorry that I have to avail myBelf of this opportuaity to read this matoment. Pat it if my duty to attend to the wants of the people I trust that these matters will be remedled,
which I helieve they will, and that the pubficity that this affair has had will prevent any further repettions of the fame practise.
Sers 11 provides the clogn memwan for threes years for the killing of hoods under a penalty of five hundred dollara. This clause did not appear in last year's bill, while aection 12 prowides that no seals shall be killed after the 13th of April by the crows of the ateol nlips. If I had my way, I would fix April jeth as the date. Section 13 allows wooden shiph to have on bourd tirteen rifles, which was unanimously agreed to by the Select Commitien
Far the purpose of more fully explainias Soction 14, 1 beg to read it to the House.
14.-The Governor in Councll shall appoint a Foard of Examiners consist. ing of three pertons, having not less than ten yeara' expericnce as Masters of soatines stonmers. The anld Board shall make Itules and Itegulations in relation to the examination of all perfons fitending to prosecute the seat fishery in steamera as Muster, Second Hand or Master Wateh. No person Ehatl go to the seat fishery at Mastor, Second Hand or Master Witch without 4. certificite of competency from the Board of Exnminers, under a pennity of $\$ 5,000$, to be rocorered in a eum: mary minter from the owner of the treamer in which any such person shall sail by any jerson who shall sue for the same. The Coyernor in Counan shall make Rulear and fersulations as to fees to lie patid meth Board of Eximiners, and as to feen to be paid Ly Manters. Beconil Hands or Master Watehes in rolition'to such examina. thone itrovicied that thite whall not apply to any Master, Seoond Hand or Master Wateh who has been at the senl Iishery for two consecutlve years previous to 1910, is any of the satil tapacities. And the eaid Board rhail furtibh tree of cost certificates of compatency to all such pariees upon satis-
factory proof of such persons having been at the sealfishery as aforesaid.

This Soction is founded upon the experience of last year. It provides that a Board of Evamluers constisting of three persons having not less than tra years' experience as Masters of scelling steameri shall be appointed by the Governor in Gouncl. No Mas ter, Second Hand or Master Wateh can go to the fistiery until ho has recelved from the Board of Bxaminers a certificate of competency, I have my own fleas and opinions with retation to our experfence of last year. No doubt they did what they thought beat, but 1-think this measure provente the pouwibility of the re-curratice of ruch a contingency. I am fulty aware that a Master Watchman has often recelved bis appointment became he happens to be dio eon of, or some relation to the Captain. It fa however, very ditfficult to keep a young man, who is in svery way competent, back under the former condtions, No one can have any ohjection to the law an Jatd down here, and it will completely eliminate furthen difficulties to this direoHon. Certainly the last person to objeet to this would be Captain Kean, bocanse he will be one of the first omen whom the Government shall appolat as Dxaminer. Had this law been patsed last September, and he recelved this appofntment, 1 am fally conrfaced it would have been a tactfut way for the Goverament to have prevented that atate of disastiviaction frath the people which prevalled at the cotmmencement of the present seal fishery season.

Section 16 is a most important de parture from the existing law. It is giving the captati the privilege of selecting hls own men, a measure which I consider most fatr and Just: it ta , however, a radical step, but I bettove we are justiffed in dotigg it This will abolish the existence of that elass of sealer, haown as the "sea law.
ser, " and other people who prefer loat. ing to working. The captain has the privilege under thise section of not takthig anig man whin ts useless from the polut of view of work This is exemplined by the case of Capt Barbour, tho gets fifteen thousand, where other mes get ten thousand. I have no use, as for as 1 am concerned, for the man who shirks work at the sealfinhery: I tum a worker, and I think all men who go to the seal fishery eught to work too.

I thluk the men ought to have the Fight-to uay whether they will go for a long vayage or a-short one. A man - ought to be given hils cholce of a lang or athort voyage for young men can afford to stay out while the old men cannot devote the time that long voyage demands: They grow naxlous about the state of things at home, and often become, so worried that They are of very little use. Other men will want to go for a longer voyage. These things ought to be taken into conilderation because unless the present conditions are remedied much discitisfaction will remain. The law ought to be most declded on these prolats. Three or four strikes last year were the reanlt of these condUlons and thene things deserve the ut most consideration at the hands of the Government. I muay say that I arn thoroughty in accord with thls Bill an it now stands. There is moch fo be done in the fatare lut we have secomplished much In this Bill. It is only fair and reasomable that we should be satistied with this. If it ahall be found necessary to make thmidinetit and adtlitoris, it think it con be done. 1 am afrald that 1 cannot altogether congratulate the Govartiment es regarde this Commission I am very morry that in spite of my ppportiton that year the Goverament inslated in appotnting the three Judges of the Suprome Court. I felt Borry at
the time that the Government did not see the far reanhing consequences of thili, I do not belleve the Govertment really conisldered what they were dolne I. myself have been up befara the Court in conmaction with two or throe Hhel retfons. Now I ask you Mr. Chalrman, could I expect falr or impartial treatment with these Ifbel actions. Indeed in one cnse one Judge left the Bench and landed it to the Chlef Justion. This was Juige Johnson, and the petition asking for Kenn'a urrest has been rlimregaried. although I firmiy belfeve Kean's an rest will be fustified, Anyway the position was a very false one to place the Bench in No doubt the Judgea are very norry now. Trouble was created by that which will not be undone for the next five years. The Minficter of Marine and Figheriea recommended it Commission to the Govermment but the Goverument simply refused to accede to his requesh. The reasons they gave have nover bean explainod, In one ease before the Court, the fury, were told by the Chlef Iustice "Ir I ware In your place I would give muhatantial damages." It is clearly anen that with such $n$ case it is no use to appeal. We ean nover got fair play. The jurfees are prejudiced against me, and I will alwnya lose my casc, and the Government if to blame. The fishermen all over the Ialand sympathize with me, an they know that I do not get tair play in St. John's. They say "The Juderes are not ziving youl fa'r plny; you might as well appeal to thSouthalde Hills" Conmequently the finhermen are loaing their confldonce In the Supreme Court, and who is to hlame for thia? Persomally 1 have nothing apainst, Kean. He bas done n? thing to me, he has nover hurt me to any way, But I felt I had a duty to pertorm. It is a matter whioh I do not think you will ever eradicate
from the minds of the people, but tat jasuer of these things in thls Bill. Theti things alone can be responsible for Lhis iatrodiantion. I consider it one of the ereateat pisces of legialation Hat hiss over bom broukht up in this Homse, and + trinle it will be so resardel by everybody whom It cancerns throushont the country:

MINIBTER OF PUBLIC WORKS.Mr. Chalrman, I would llke to awail myenlf of this opportumity to ospress my Biprobluntlan af the mentret ath before ins. I regard it as rxcellent in fvery respoet 1 woald llire to point out that there is one thing for which I caumot quite account that has been ommitted inadvertently no doult, ftom the Monu card Tald down by this Act. Need I say that the glaring omitfion 1 rofer to is that of porle ane cabbige. Wa have been gailty of lack of patriatiam by ornititig what may be termed a antional diah. I am ano priaed that the Hon momber for St. John's Euit, Mr. Dwyer, has nut called the attention of the House to :his. I sirangly atvocate this udation to the Menze Annther matter to which I would life to refer ls that I Bee from a letter that Mr, Coaker prefented to the qew of the "Nriscopte' a Eramaphone, whleh affordad them considerable amnsemunt Might 1 ask to he informed whether Mr. Coukor eontemplates presenting all the ofher shipe with grimuphones. Somehow tre fhink lie ought Porhape he witi caplain hls inteations. Anyway wat carnot doubt but that the Hon. mernter tr dolng a mreat dieal for the poople in the way of providing them with amisement and is doling it in a way that must afford everybody the sreatest eatisfaction.

HON. COLONIAL SECRETARY:Mr. Chairman, I kegret that I fm not in a pusition to offer a criticism and assistance to the Bill now before the Chair. but I would I弪e to bay the
commisulon that the House appolnted to cousider this matter la compos ed of those who are no doult best qualfied to conrtder subfectr of this kind in all thelr several points. Fersonally I never had the opportanity of golus to the seal fishery and therefore 1 must present my romarlis only as those from the standpolnt of an outsider, bet while the Minister was deating with the severnt sections of the mitl, 1 was struck with the idea that nection 2 of this Bill which providen certain restrictions on the ournerithlp of petts, is one which is entirely more advantageous to the larger ateamern. Gupposing circumstanevif were auch owing to tog ar almilar conditions a small steamer nome considernble diatance from its pelts lans aot the same opportunity of taling there pelfa tnto posseantoni as a fan ger steamer has. The seals might very easily be takon by other larger mhites who will have no diffienity in obtaining them. I do not think thls case came under the consideration of the Commanalon and 1 merely offer it an an mmeliorative sugrestion, and then uir resards sectlon 4 which reInten to the necessity of a duly certbfied Master or Mate in some capaclty on board before the steamer alall tor elrared for the seat Mishery, to ome which I consider might be fmproved by the adoption of a fow ldeas wilch 1 might sugeent. Owing to this remponnthitity 1 thitr noma provtrion oukht to be made that he ahall have an offielal position, and an acknow. ledged one in that capactty. This moald elfminate metrernl diffeutton from the path of hfs avocation. A certificated Mastor should so out as a Cortified Oftien of the erew. Thin if a minnure whtch ase the sympatty of evary member of the House, and It think my suazeation ought to be put into prartice, an regarde compeanathan. We have the important Work
tmen's Compenkation Aet which provides that a workman zutfering from zecident or dikablement during the performance of his ordinary wark thatl recelve certatn compemmation trom the owser who io tiable for this compensation. Ithink this Act is one of the best Acts we can have on our Statute Books and it has boen avalled of hy pernons entitled to the privi fiege of that Act to a large extent at though in general practice the em ployer protects hitmself by insurance.
We all know that there are local insurance Companies which Inalare amploymer aminnst denth nr noctuent to their employeea in the city and outatde. Thene Companies to a profitable tusinusk, and have derlared an high as 50 per cent. on the busineas in a uningle year. It in a mutual corporation wherein the proflte are returned to those who Insure. That, of courne, la a great advantage over what If doan by outaide eorporations. These outaide corporations get a premfum for every employee, and no matter whethor there is no claim agrainat the Company for ten years, still they axuet the futl premlum. In the local oorporation, the premium exacted in very Hittie higher than that eharged by outstde corpurationk My reanon for menfliming this matter fir thint if the soakInf owners wiah they may incure the entire crows of the sealing steamers, and that without any kreat ontlay a tertain amount of protection centa be placed round all those who go on that toyage. It woulit, 1 think, cost somet where in the nelghhourhood of $\$ 5.00$ or \$c.00 per 81.009 . If that ty sen, the fien who go to the fishury can he in;ured akainst accident or death. I hope the owners of the steamers will tratl thementres of some menyure of this kind to urotinct themselves against the liability that is placed upon them. An acctident at the seaifishery might tueath a large liability or it might mean a very mall one for many yoarn. You
mikht an on payting insurance ywar af: ter year for twenty yoars, and then a your might come when you would have an accttent that, wene if It were nor as ereat as last Fear'\%, mikht deprive the shareholters of one of their ships Take the case of the Newfoundiand tait year. It that aftp went out aniter the flability imposed by this Act, the liahility for dieaths alone wrold have been $\$ 78,000$. In addition to that, the ciatms for tigurfen wouta hive tiroupht the total up to probably $\$ 100,000$. In that case the Company would not have bean able to meet the llabllity and theretore the Aet woald have been unworkable If yon want the Aet to be perfect and to be a total necurity for paymunt in the case of death to is kroit number, thint you munt tolk the owners or aotmeone else insure the thea in mome corporation. Is ary opiatot hat if the why to do it , anit it in the offy' aate way to protect thie men. For twenty years the ownurn of any whip may be able to meet their tiabitIty ind then' a claik mitgth ociur which. Hike last year'a, canuot be mat. I drav this inutance to the atteution of the Committee hecause the ifea of thls tifil iif to protect the tiven and titurembs of the seaters.

Another matier referred to by air Coaker was that of tanding crews We have fiad an tisitance tataty, wherein it was the painful duty of sotae membere of the Glowernment to take stepa againat men landed from the Terri Nova at Chanoet, Wben the stity came to there the Captatn hau wirud me that the mes wers on strike and he wanted the protection of the firw on the mutter befrir tovertmitel it was found that it wan not a marter for the Gievernenent at ail The ehip had come in and one hundred mies had ifft her. It war enttrity tis thit tiatici of the owners. Ooe or two daye elapsnd and then shitp was still at fort aus Batmane and the men were on shure The Corerument coutd not thte liny
steps. The men were under the contrat of the Captain. Thent the Captain fanite in tepocition thit the weas more itrikers and voruld not prowscite thin rogare Thine the lave afepped fir and 4. me of the mis wete pumfahot Thio formerment will thas put to the noeinalty of tringesk the reminthuer of thase \#fen to their liomise, wherias it was Fwally the duty of the awnent to liava the men thoted after. Hut the Captatia got hilthit the law: The Covertitheat had to act and bring home the fanel it thin kind at thitig goes on you witt hived thatt the wethic thet finded et dirferent polsits in the Irlanid, and the Governmimt enmpellect to took at--tor thim. If a captaln can come in tind by makteg a flepowifion, thiruw thid feots ant the banis of the Coverument. -thon it ir time the favi was chaniged.

HON NINISTER FIMANCE AND CUSTOMS -1 =711 gent jou the taforpation.

MR. KENT - is connection with ine Marine and Viaherles Bepartment frits tir if queittor shitil tur comm fery prominently before the public ately throueh an actlan taken th the fagrume Court, if ruter to the alosence of att controt over the waters of the harbor of 3 SL . Jobn's. The memh ra are no doubt amare of the case bet vern Hemme. Marey wad Co. and thr earn ens of the Etefth Harlas The powers of contiol orer the hartior of St . Letan't are is a most uncertafa confillina; and 1 thints it would be wetl If the Covernment of the Martiee and Whilieries iepartment were to have The harbor of St. John'e regulated in tome wiy i) Btatute at fie ever, port
if the stizo of St. Jolin's in tho world I think the need for that was brought out very clearly in the argument that occurred la that caise. I do not know what the result of the cate is getog to bu; and I was not personalt interested in one slde of the other; hut I heard some of the argument, and it appears to be the oplaion of all concerned that beyond a very limited control there is none. I wonld same gest that the matter be taken into conalderution by the Government. If ts not porsitte thts sesston; but nivi seusion somethiag can be done.

HON MINISTER FINANCE A14D CUSTOMS-Some arrangement hill been made to hive both stemmers taken awas. Mr Saunders is tringing in some tuge to remove euch.

MR. LLOVD-May I ask if the Cov. ernment has etven any consdierition to the queation of incorporating some board to controf the harbour with the tisual powers,

RT. HON PRIME MINISTER I think the sugecstion of the bon. the Leader of the Opposition, and alse of Dr Lhayd is oas that commenifs thail to every one of caurse the queation has become very scute of Lato by the sinicing of the 'Stolla Mar-is'-the question an to who is Hable. I have not been able to follow the matter clomely mynett, not having been in atteudanice at the Court, but there will no doubt be considerable fiformation ta any. Judiment wa mat get from the court as to the relative righte of the public in these taat ters, and as to the rigtils of the par Hes finter se.

1 agroe with whit my learned trlend ould thiit it is cery denirable that in regurd to the watera of the harbour the publie rights as well as individual rights should be more clogely detinet: and further, that there shoutd bo some proper Bonfi, as there is in eltlea like Montreal and other cities -

Harbaur Boarily-that would have control In tha past; of course, we have had very litite trouble, and thinge went alone falrly well. fint now we discover how lumperfoet our mechinery ts when such cases occur, I had maken a note of it, and 1 shall take the matter ud immodlately after the peasian closes; and if 1 am hery next year, I shall be glad to bring tu any necessary legtalation.

MR. MORINE-1 đo not flilnk tliere Wrould be mach objection in polat of law, and it certainly would be very desirable if you were to create a frarbour Eoard, without attempthig to define the extent of tis Jurladiction riny more than over the hartiour of St. Johus, If you wait till you get is sufficient deflintion of the legal tighte of the public against private parties on the formahore you will never intion duoe this Bill. You will aever get thas ixxcopt in individual engen from the to time it will the quite sutfictent to treate a Board in which mhull be vested the rifhts of the public with nut attempting to dofine these in thaEit that some such general provistan as to the removal of vessels which Lave sumk in the harkor, If a Board wero constituted on the line of the Montreal Harbion Board it would be fible to control these matters and protect the intereat of the public,

HT HON, PRIME MINISTER I think my hen. friend misunderatood the 1 did aot mean to convey the foha fhat it was neceseary to awalt the fudgment as to the piatice or private Inetite before appolntiog the Eharrd. I merely meant that the rights betwenn fndiviausts as regards olastructloin woutd protiably be more clearly defined. The law is to the toremhore in yaty clearly deflined by geveral fuds. monta to bo found to the Suprame Court Fecords, and as to obrtracting: hee waterif of the larbor, 1 do not think thera is any question an to that
comine unster the Harhor Manturs Act and mmendurculs. I think the tiar tinur triuter woult thave futt power th. remove thene otetructuon asd then theth io the party liakie for compermer bom. Biat even then it may the mievs: iarr tia thave Tisctiation to ctestir a Hhant mait weat thirl rifiti of the melaik in that timard it tman tie ae geaury to give it prater powers as fogentr obitituctumer That exir conntidernd.
 In that case wocid coithe abder that Thant.

RT. HON. PRIME MINISTERYes

 troppeted in say $\mathbf{2 y}$, as for at 1 की tue alithocke the walue of it in entionthed at in from 920 a0e to $350.090,1$ ftume thit the fint there have toven mapeoted by the merchats who pausht them, but by no pubilo oificial. The fropector of Fiaheries recelves 1700 Now what is thile mande dutr? What does he dot Hins he anything
to ahow for the salary he han been recuiving 1 think ho might be ditr pensed with. Then agaln the Depauty Minlster of Sthpping. Everyone knows that life dutien are not what might be called arduour. In the coarse of the yuar there might be some one or two vessels that he surveys I thimik that nome other offlctal might take thie job, and have his travelttis expensen pald by the Gov. ernment. Besldem you have tit the Custom houne an inspector ot whips and a Surveyor. Can not a more inexpetelve distribution of officen be made that will be equally katisfuctory? Is the Govornment really sertoun in thit ittemipt to foconomitiot 1 nead not enumerate these offices. This woutd ensure a lerge saving in this respect alone It you do not do theme tifing bow can you grove to the people that you serlounty Intend to save thelr money. These positions liave been Justifiable tn the days when the country wis ithe to iffort them, but now we cannot afford to maintain superflupus positions. it will eertainily reflect diseredt on the Govarmment if thay do not avilt thomselves of this chance to eut down these salaries which are not necessary. I well remember that masy a the whiti I wili waitta down north some Public ofticial dolng nothing ta particular, would come around Can you concelve anything more annoylos to pesple who have to work fourteen hourn daily to knep thlngs going having the motery they puid th tixes mafilitiatug propto this this mianner. When theso people have nothIng to do thoy go nhout and nucened In nothtng except causlog troubte. Whiffe wo inafntafn thonie offletais we merely advertlise to the people our wastefal efforts of spending money. This in the case of the sub-collectors at Lawlaporte, it hir the wame nt Martton's Harbour, a man abiolutely un-
hocessary 1 can met any day a man that will do lils worl for twenty dolfirs. Thie nub-Cottector at Morelon's Hr lias nothing whatever to do, but to tormant the fishormen, und create disturbances around the comminEity. If a mikn hais tiothing to do, be Fenerally amuree himsulf at other poople're expense, I admire the Minister of Marthe and Wishering. 1 think he fas done uplendid work the past rotJears, mit there is much to testify this. I belleve we should dispense with the Reputy Surveyor of Shlpping, ta will as the Inspector of PIckied Fluh. The Department of the Govornment Engineer is next on the lint. Who is the Inepoetor of Rallroads now instend of Mre Petrie? I hope when thle position le tried the Gavernment witl not plek up is aneless Tan who happens to be in aecord with them polltfoally. These are the tort of thiniss that are difficult to rectify afferswarde I may say when Fe get to that side of the Houre why Sinh that we conslder does not fuzfil hin duty in his official capacity we thall dispense with without beelta tion. I conatider ail these poeftions hre not needed and I would be glad if the Gowernmpnt would dtecrimisute bietween the necessary and unne cessary oftletals at the present time.

MIN. MARINE A FISHERIES.fir Chairman, I would like to say a few words here in relation to the mat fors buw before the House I may fay that $t$ am thoroughty in accord with the bon member for Twilis: gato, str. Coaker wth regard to the suntimunts the exprenses when the bayn that he llkes to ses a mun worle. Nuw it has bein atrealdy stated in thle House that the conditions of thie Jear are exceptional owing to the atate of affairn resulting from the war. 1 muat stay from my awn poranal exdeppertance that I have found the Dopaty Mlatatar of Marine e Fisherien,

Mr. Alan Goodridge, since he came to this office, a man most efficient and desirable to work with in evers way. I may gay that I belleve every wix 7 m my department worke well and havi and thoroughly agree with Mr. Coaker when he says that he belleves in hard work. I believe in hard work nussolf, and I consiter Mr. Goofriuge has whrked stresuously since the ans cume under my Department. Ite has treated the publle who had sought for information in that Department in the moat gentlemanly fashion, and given them all Information porisible in evers way. When the war broke outt this yeer, the Governor's Becretary had to so to the front. Newfoundlan 1 for the first time. In the courne of its history, was called upon to recrul: men for the front. The GoverniWrote to me asking if I could spare Mr. Gpotriake for a few houra in the nfternoon or morning as he had a lot of work, cpde-worl efc. to be deelphred, and when I recelved th's letter I was quite eatisfied to take my ahate of the work in hls departmein addition to my own in order to altow him to spend his afternoons at Government Howse I consider he was helping the Colony and the Emplre. I do not believe in talking, I believe in doing thinge. A $g$ intleman friend of mine once remarked to me in Chicago that an ounce of help was better than a. ton of prayor. I do not think time ought to be wasted th futile discussion when there is work to be done. Anyway Mr. Goodridge is therz today working in the morning or e reis Ing with the Governor, His remunes ation is a matter bwiween the Governor and himself. I do not know if the recenves aby money. The "Herald" stated that Mr. Goodridge recelved twenty elght hundred dollars out of the Goyernment chest: that was klurown broadcast to the country but
the Herald does not state what he himself receives. He is discreetly silent and perhaps judiciously so on this point. After the first Contingent went over, the Naval Reserve had to be sent. Mr. Goodridge was asked by the Naval Commander of the Catypso when they were embarking if he would accompany them, but he an swered that he would be unable to go owing to his varlous duties here. Capt. MnoDermott even wrote the Governor aaking if Goodridge might be permitted to take charge of the R.N.R. men. He asked me if 1 was satisfied that the should go. Under the circumstances, considering he was the one asked by the Commander of the Cafypso, there would have been very little Britiph blood flowing through my veins had I not immediately acquiesced. When he returned, and learned of the attack that had been made upon him in his absence, he determined that he would refuse to go forward agatn if he were so asked, and he did mefuse when he was asked. I polnted out to him at the time that it afforded him considerable advertisement to tie attacked in this manner by the newipapers and would do very little flarm, and that if he wero asked to for mgain hils duty lay in acceptance The time arrived when he was again requested to take charge of the reterviata. He immediately refused. At tength af may ardent solfcitation, as well as the persuasion of Capt. MacDermoth, he went on board the Mongollan, having firnt asked me If I was satiafied that he should go. I was fuite satiafied, and the officials in tiy department were satisfled also that Mr, Goodrldge should assume these dutiea. Mriny people addicted to talking of patriotiem would be tifraid to do this when you consider the riak he rau of German mines and torpedoes. We roust conalder too that
he is a maurriod masi with io tamily at tome, and that a trip on boasd thie old Allan Lias, in far from planment that thme of Jear: What lappened on board the Monnolian if known to \#F. eryone heve, and Mr. Atan doodridise acted an a mian among men, and 1 am proud of Ms. Alan Coodrider wha with the men under him, was the ferais of earlite the shtp and lirtire ing precleun tives aste book to Hath tax. East year 1 had the pleasure of meating 200 Newfoundtanders in Britteh Columbla, mon who had fished on the banke. I asked one of them bow the government sent them home"Forget 1 t "-lie says. "The government don't do things like that out here. If you are away from home here you have to get home yourself, Whan 1 was in Newfoumclanil 1 thought we had the worst government in the world, but since I have been out here for 10 years, I find that Newfoundland to the best country in the world today."
I bope I have not delayed the Committee too long. but I could not allow theme matterg to be discussed without siving some explanation and if I have been too long 1 thope you will excule me.

MRR. JENNINGS-ME Chzirman, I woutd like to ask the Hon. Minister If he could tell us the number of vesself of over 50 tons built in the country the lapt two gears.

MIN. OF MARINE \& FISHERIES.I would not say off hand, but it will be found in the Report.

MR. JENNINGE-The reason I ask Io that in Twillingate, which uned to be one of the foremost ptaces in building that hind of vessel, this Industry seems a thing of the past. The peoDle seam to be buying these vessels abiread in place of having them built in their own notghbourhood. I was speaking to a master bullder a fow

Atays ago, a man who has built some of the best vessels in the tay. Last year be bought a vessel up along. Ho told me that the reason be did It was firat because of the searcity of timber and seconaly because of the price of labour.

MIN. MARINE © FISHERIES.Mr. Chairman, I might say that in the Novn Sootio vessels there la not the material nor the workmansbip that you find in our own. in many canes you flid that you buy a very pretay tooking vessel and when you got her dowa here for a short time the is in for repnirs. That is the experlence with nearly all the vessels going oist of St John's that tiave been bougnt in Nora Scotla. If you ask the Grand Bank people they will tell you that the vestelo they get from Nova Scotia have not got the materiats in them nor the workman: thip elther. We have the knowledge tiere and much better materials when they can be got. Our vecsels are much better. They last longer, There is not the anme amount of repalra on them and they sall just as well. The ruice of vessels is going up in Shelbourne every year. Last year Mr. Bartlett hat a schooner brilt there that cont 36790 . The price was $\$ 65$ a ton and he showed me a letter from the builiders this year saying that that was the last vessel they could build for 995 a ton. The price from now on would be 375 . That is a blg loss to the country. Not only do we lose the cost of the vessel. but there is the toss fr the saltmaking and tacklo all of which goes up there and doee not come back. Then there in a great deal of money always teft fir thicse place by the cruw, not a cent of which ever comes back tnto the colony. Our bonus initead of \$s ought to be $\$ 10$ or $\$ 12$. We have the timbar fiern gand 1 nim sure the men to thit country can build an good a ves-
sol an anywhere etae in the world.
MR. JENNINGS-Mr. CHalrman. I quith agree with the hoti. stinfiter. It is a fact that these veameln are beitif bought more and more from the Nova Gcotian market hecainet they can ent the veshita cheaper. The lant resset finated down here wan the "Renown" It in one of the bext veanels ever huitit It ie a pilty that tho bunfnese in dyy thes out

MR. LLOVD-Mr. Chairman, we do not often baye the pleasure of listoring to the Mininter of Marine and Finherles as we lave this afternoon. I cas masure him that there was no neevasity for him to expreis that modeat deprecation of bimself, which be di4 when the apolosized for having oeenpled the atteution of the Committee tob long. I do not think any toember wrould thitnk that be had eeconptent our attention at all longe For mysett, I was particularly struck with the speech and I think that it would ter well for the country if the Minlater spoke more oftes than he las đone ta the pist. 1 was partieularly struck with his sigorvus detence of the offocals of hite tepartment. It nhewed a very good tralt in the Mininter's charf acter that he ahould put forward anch a vigorous defence. It nhowed that there wat at very excellent esprit do corps In tho department and that he wan the man to roice it. But, str. In Hetening to hle remarks, 1 could not hide from myself the fuet that wille the minister made is vigorous detence, he let nis ferlines so and thase teek inges led him a tittle farther than lin futenifet, becaulie le tet out that the relationis were not altognther harmontous between lifmantf and the Goversment of shitich he is a distingutiohed trember.

MIN. OF MARINE AFISHEAIESfib, I Am ar bappy as a clam at high water:
MR. LLOYD-1 am very glad
ta
hear it Rut whtte-1 have no douts that the Minluter is happy, still hile foeling carried him so far that he as much an told $u_{s}$ that his retatioms with the guvernment ftself were mot un happy as thoy might be.

MIN. OF MARINE \& FISHERIESAll rikht. Go ahead and use it.

MR. LLOYD-OL Yein, 1 am going to take Advantage of it. It would appear frots what he kays that there are thliga that coutd be done if only the eovernment would make up ftr mind and there appeans to have been nome discuanion with the Goverament about them becaume the says that if my friend from Twillingate got eharge of the Government be known that nome thing would be cone it is therefort spparest that he bas not been able to got samething out of the goverament. The epeects made ty the Mintster this efternmon shows there is something is this mived about cuttiog clear.

MIN. OF MARINE A FISHERIEBNot the nllghtest thought.
MR. LLOYD-And that broakht to tiy mind the words used by hls leader it coanection Fith the Harbor Mritior a few daye igo, He matd mat anomething would be done next year If be was here. Then you will ronomber that 1 anked lifm what that meant, whether lie had any doubte ahout thin baing here, Now that is an aftulaton and lookn vary much os if the government was not koing to he here.
The Minister told us that he was in fall socord whth the matter of reduethon of expenditure and woult ben kind ir hin itepartment could be redveed, but he did not see where any rolucflon could take place. I was very pleared as I say to bear the remarks of the hem. Mislater in defence of hle departmental officers, and I do net wish to attempt to assail the detence no mate. 1 am not kotns to atimin! that. I sm going to content myeelf

With dealing with the soittions pert forwand by blm. He azy, that gise vas paid Mis. Goodridge for servies an the Fhatertes lowit xid that the otber $\mathbf{t z 0 0}$ was a drop lalanese Now Sir, that ahues that 6 N0e has sot leen weed. It is aot wanted. The 3rlitater
 my in any ease where it can be effocted without in anyway alfecting the eftriclency of thes department. I will scoopt bis word anit mawe that the vote of $\$ 406$ be redured-to $\$ 200$, , removing the unnecensmy anount of $\$$ \$net.

MIN, OF MARINE \& FISMERIESI did aot say it was thecensary. I nuld that 5200 was pald for paot reerveres and that the other finm weat Inte a trop ziatance.

is my epilhien the Mininter of Mat fon and ruanrlas veruma be dotag o
sood turn for the people of thils country if he would have this matter thoughtfolly considered by the Government. I bellove great good can, and should arrive from steps taken in thts direction.

MINISTEA MARINE AND FISH-ERIES-Mr. Chalrman, I may say, that this matter hiss been considered liy the Covernment, In my own dis triet I went around trying to got cap(tu) to start bullding with the Government's promise of 5 per cent for 15 years. When the delegation some three yeara ago called upon the Premier, they wero asaured that the Gaverument would do every thtng in its power to lielp on the Induatry, and would tax fmported alifpes to give to cal ones an advantage.
MR. COAKER-I wonld suggest thas: instead of 5 per cent for 15 years the Gevormment make that 7 per cent, for 20 years, to encourage the people to take up this industry Ty ery year between $\$ 75.000$ and $\$ 100$, 000 of our money to spent in Nova Scotia For what? For vessels which could have been built down here in Newfoundland. The people here ought to be offered 7 per cent., and if the Government would increase their 5 per cent. to 7 per cent. 1 think that there would not be much trouble in getting people to invest In it. Five per eent is not good enough. tt is not. Appetising onouph. The people can get a per cett, for their money gasIly und will nent inveat for 5 per cont Malea is 7 per cont, or ezen 8 per cont has lonis as you encournge the indus try. Thien you can advertise. Adver tise abroad the great mhipning facil. thos you are prepared to offor, and thus promote this Industry to the materfal benefit of the whole country.

MR. MOULTON-Mr. Chnirman, I hwe had a little experience in atir building and ship buying, and the
reason I take it that ships mee no. fuilt in this country is that without proper erganisution the induatry can not be carriad on with uny profit. The atisence of proper ship yards renders it necessary to import certain parts, and I myeelf had to import fumber fultable for the jurpose.

What we want here in this couniry is proper ahip yards bult, where in the summer months the wood would be sawed up rendy for uge Then an other ohjection to having vessels buift in Nowfoundland is this. A man makes a good voyage and while in goot cif cumstarces deeldes to get a new banfeer for next year's trip. He has not time to have one bullt here. What foes he do? He moes to Canada and there buys one already made, and af as result in ready to prosecute the fish. eary at the beginning of the next season.

Then again there is ropairing. All these things considered, I would ntronsly recommend that this subaldy of 5 par cent. be facreased to 7 per cent, or even 10 per cent., and I think that this matter is worthy of the conalderatlon of the Government.
. MR COAKER-Are we to eome buck thls evening?

RT. HON. PRIME MINISTERWe are prepared to come back. We have no desire to rush this through the Eonse. but it is Important that we get it out of the way an ruickly as poraititn, it enn be portponed howey. er, If the tion gentlamen whish it.

Mr. Spenker ronumed the Chair.
The Chairmin from the Committeen of the Fholo reported that they had comstupred the matter to them pe ferred had passed a Resolation, and fasked leave to ait again.

On motion this report was recelved and adupted; lind it wis ordered that the Committee have leave to uit again.

## LOgGIN BIL

Ifurneast to ariler and wat moclion of Mr, Coaker, the Huuse resolined it. selt into Commiltee of the Whole os the puil sutitied "An Ant to ticeviate the Friployment of Hen enraciod in Lokzing"
fir Spenker imf thy Cheir.
Mfr. Marsone took the Chalr of Commill mb

Ti月. COAKER-Mr. Chalrmina, this bili has beon reforred to as Sclect Cotumitee and 1 woulit firy lircient to the Houne the rewult of iti tal. ars. Some oblectfoni wars nitivet to the bill by the euptoyere, and thena taine beture the sitict Cumatite which heard their ablectionia, and whore ther ans fir alturnd the bill to settie the points dieputnd nown, I hope

On section 2 of Logeting bill betng read:

MR. GURRIE-AI Chairmat it seomas to me that un unintentionat infiny diuy be dnue to sorme simall logghas men by this ascition. As I underotand the loaking business, somy yman contruct to aupply loms and hire thelr giva men. Now they may be tup its the woods and a wtorn may come on, and make it fmpossitile tor them to get down, and so would he unable to combly with this seetion by paylus canti at the osual place of payment. of courbe it won't affect the large romponies at ath, but it might affect the amall men. Would an order on a company the equal to cash?

MR COAKER-Of course, crequal would be accepted, payable at the urual place of payment.

MA. CURRIE Then an order on a firm wordd, meet the poition. A slmfiar objection pogure to me in connoction with ansthing being wrong wilh shacks. A company bas ten duys within whten to make rapatri, Well. taese sineks might be forty miles or more from headguarters, and thorma might make it imnoselble for mein to gat there to make nocessary repairs within the time ilmited.

MR. KENT-That would be the act of God, and a malter over whtel the compary would heve no control. The words used are "in defant", That imntter frome failt on the part of the Dernan: It foan not refer to the not of Cod.

MR, CURRIE - The words uned ture: If coimplaints are not remedted with. In ten dnys." It seernis to me that is

Would not spoil the intention of the Art if a couple or more days were ind ded.

MR. HIGGIN8-If the act is not coothptied with becanse of something nvor which the employer could have fio fontrol, that would in all cases. under Common Law, constitute a complete nuswer to auch cases as thite. If al complaint were not remodfod within ten days, and the employer could show that it was physically imbonatbie to do It. that would be a enmblete answer.

MA. KENT-I think it would.
On fiection 12 belng read:
MR. HIGQINS-Might, I aak the fantlempn in charge of the bill what is the filea of that section? I may nitate that 1 have no objection, but whit is the ldee? I take it that the notion would be, so that the men tright have a direet representative to look nfter their rights, but would thits ngont be al logger, who woutd be a regular agent, and woutd vfatt the crums from time to time?

MR. COAKER-HIn would be al min who has been a logker.

MR. HIGGINS-The Iden would be to emptor such e man and pay him ivages.

MR COAKER-YER.
MR HIGGINs-And the man would be one who would ga to direrent campa?

MR COAKER-He would be golng around from place to place all the time. That would be his only work.

MR. HIGGINS-Would he be apmotrema by the ment

MR. COAKER-Yes, Ha would be in the same position as a delegate

MR. KENT-1 would aak to refer back to nection 6 for a moment. The section etatea that the Government Inppeetor phall in each year prescribe the manuer in which sleeping berths shant be fitted, as requifed by sec. flon 5, and shall notily the employer
thermot not later than the lat day of Sieptrmber is eerl year. 1 think we wesht to make come prurision thory mos to the maner is which motien is
 tiration thereot is ther foyat Gazette whall te coactrisive vildence of suet tiutice".
Mr. COAKER-There can be ho ubjecition to that,
DR. LLOYD-lt bat been sumbit of to me, in connertion with that, thut the losesers themintres should have some opportunity of mevelus what fo priscrited ifith reterupee to sleeplok berthes, and that pulifieation in the Royal Gasette" whlle tt might Le regariled an comeleatre evitenici an far as the enurth are concerned. would not be amtticlent, I thint there ithentel in a pulilicatiun to which the legrers themarives sodid tave ao tere

Mh. पOAKER-That objection vell fie ont over very eaatly in view of the firt that the focerin witt lave a ne presentative whose duty ti sitt le to (ve that all the proviatems of the Aet ure anforeel. ## strpply

Purviunt to order, and on motton of Hos Mistiter of Finuice and Curtomas. Une Houm resotred ftaclr linto Cumssittise of the Whote an Supply.

Mr. Spenker Jedt the Chalr.
Mr. I'arnons tool the Chair of Com: suitive.
MA. CLIFT, Mr Chairman: Whe + to lie appolnted Clerk of the frence?

RT, HON. PRIME MINISTER.-MI
M. A. Devine hins been appointed.

MR. COAKER.-Mr. Chalrman: The Premier has Just announced that Mr. Dovine hat been appolnted Clork of the District Court. I understand that that position hus always been held by a lawyer. I would like to ask what the Government would do in case of some very important matter coming before that Court, in the sbsence of a Judge I am aware that Judge Knight fa not a man of etrong constifution. If at any time he becomes III, his poaitton will have to be silled by a laytran. Well. what condition will you find yourselvee in? In a case slmflar to that happened a short time ago, where the lawyers on elther slde tore the law to pieces, could a layman be expocted to appreciate the legal pointe of law fnvolved? It means he will simply have to refer to the Mintster of Juatice for his oplafoa before acting, I conelder it a great miatake putting a liyman th this position. I must record my Aisupproval of thes action, as I consider the fiovernment should have put a lawyer there. Could not Mr. Devine be put in Mr. Me Carthy's position in the Money Oriler Department of the Post Office, and Mr . McCarthy be given the position of Clark of the Reace of the Maghintrate's Court? If is had enough having lay. men administering law in the Outporth, but bere it is too oerions. As far as 1 am concerned, speaking on behatf of the men on this row of the House, I objeet to the appointment of Mr. Devite.

RT. MON. PRIME MINISTER.-MI. Chiairioun: Regarding this matter from the view of seneral princlples I dare say the hon. member, who has just sat down, may be in a large measure correct, but I to not think his statementa can prove the fact that a tuyman cannot zill this office. It to the expertence of many men that the beat Judge we ever had in that Court was a layman a man remarlable for
his accuracy of judgment Major Renour was one of the best Judges I ever remember in the country, A similar example was Judge Bennett of Harbour Grace. There wan never a case successtully appealed agalnst him. As a seneral principle, Mr. Coaker's ideas are no doubt very applicable, but a layman can often acquit himself very well it is only as laas been polnted out, in the case of the Magistrate befig absent, that the Clerk of the Peace in called upon to act.

MR. MORINE,-Mr. Chalrman: I agree with Mr. Coaker in taking exception to this appoiniment. It anything can fuatify the appolntment of a layman to this position it is the selection made by the Government. But the appointment of a layman is a very rieky matter. Perhapa after some experience the dutles of Clerk would be effectively carried out by a layman. but the adminiatration of inw is anothor mattor. Ae to the case of Judge Bennett, quoted by the Pramier, I remember him well. But I do not think it is culte fair to take that en a precedont. This particular Court is a very important Court It deals with a great deal of bualness, and now that fte Juriadiction has been increased, it deals with claims in large nmounts nui intricate points that necesiltate i liwyer holding that position. I say this without any wish to reflect upon the individual who has been appointed, because as I say, if a layman can fill that office, then Mr, Devine will Rill it as well as anyone can. But ab I say a lawyer should have been put there

MR. CLAPP -Mr . Chairman: I asked a quastion last session as to when the Government intended to appoint is Maylstrate at Bonne Bay and whom they intended to appofint. I ahould tike to ask the Premler what the intention of the Government is.

RT. HON. PRIME MINISTER.-Mr. Chairmans up to the present time no
appointrurm hat boce made. It was Fert strobely mprovestet to the Got-
 alpulite te cet a doeler at Dheme liay. and it was heplet to comaliue the work of affire and maphatrase. There is ac tioctor thime minir.

MR TARGETT-MI Chatrmat

 comtinime the atats of attalin of the Solh sbite of Trinity bay ar in the point. For the past two of thrse years the mapiatrato fias beers stutiomed at firoad Come That is very farmarnuletut, for the peopte an the Soath stife of the Har Grfatualty the Megietmie Wnn vitiphat at fit Purlices but at coupte पt ying iro hir vis pextinme sut = fan appotated shan lives at ilimed Cove Hn in a very good mank and a proanal trilosid of mince lint I de not flatht if it fult to wpoint 3 man in miles away trun oig rerthcan, ant diere am a àren sumber of pepple alo think an 1 do. There nte tlarve mak: Intratos who cambe orer from ConEfption Bay to the sonth side of Trialty liay to atminister juntoes whect ie not falr, and shomen that tho

Government has not much rempect for the people of the Bouth Bide of TritsIty Bay, What I want to know is why do yon want a man to go from Carbonear to Heartir Content and another to go from Broud Cove to that Hiurboir A man on the South Blde of Trialty thay would do both placess. 1 do wht want il new aspentetment. The mist at flroad Cove ought to mo to the South side of Trinlty Bay. I do not Bêe why if minititrate isicutit mo from Cenception Bay to the Sourth Stidn of Trinity lay is Winterten there are a thotasaind people who have to traved twatve mftar tor veviry littir enste Ther South Site of Trinity May is not trest. ed rtght in this matter. The questuot shoutt be tooked tato by the Govers. ment. aut a mass bit on the South slide of Trinity Bay.
MR, STONE-Mr. Chuirman, I quite endorne =hat has been sald by my salleagui Mr. Tarkett 1 think his request tin a reg reasumble one 1 do not yme why the mashatrate whould be atattannd at flrmat Cores it to not In conveatent place to have a magis trate There ought to to so maglatrate for the Enouth side of Trinty Hay sta. thand at Itcartir Conteat or Whinter: ton.

MR. COAKER-Mr. Chalrman, an I understand it the magiatrationturioned at Brout Ceve lins no Jurtuitettina there. The mazintrate at Carbinnear has farlutietion arer Brond Cove. The man who was appointed had hle home at tront Covk ind tie decifot to reside there after his appoistment. What ought to have buen done wan that he should have been asked to reaide at ofd Pirtficin. Thit lif oity fifr to ther people of the Soath Slde of Trinity Hay. Stiee I have been traveilitug round that eourt I have heard numeroun comptafrite thout thfir maghitracy These conditions should not be allowed to exiat, and I think now that it

Han been called to the attention of the Premer lhe eught to remedy il.

MR. HALFYAMD-Mr Clairman, I wish to call the sttentton of the Comp frittoe to tho salary of the man at FoFin. There is ouly one man for the whole pistrict and he geta a salary of tspo. If that is enourh for that mas: istrute at Fopto other maghitrates are Fetitig over paso, whille it men who firn getting $\$ 1.000$ are nut over pald, then the mascistrate of Fage is waderpald. it to very anfair to the District. Ther magistinte at Pogo should ent tont initelid or $\$ 600$. All the eames from the whole Distriet go to htm. Asd he should be propery pala for the wrork.
1 quite agree =ith the remarks of fon, memhers in regard to the magbetracy at Botwood and Grand Falls. The miglatrate ent Grand Falls spenite tourefitite of tils thme in St. Johine. If he speat four-fifthes of hitir thme at Iotwood Innteal of at 8t. John's it Frould be mueh better.
MR. MORINE Mir. Chairman, Juat 4 word in rupart to the situation at Gruad Tatts Thotwood and Lewliporte. I had a came the other day in which a pronecution wat atarted at Rotwood when all the parties were reaidents of tewtiporte whas there ta a Juatlee of the Pence. It was one of thowe for canest There was considerable ex perne cant upon thme people griag to Botwood Botwood la a port of entry, and there is nometimes quite an amennt of buminess dince there There cuakt te bie a good man thern, and it arritess mee that Mr. Fitzotralit could be appolateet to unilertake that worle with Juriadietion at Lemwisporte. You will then liave an futelligent man not nthbect to local influence, and ond whio Fill हive publle matiafaction. Thin quention of the jurisiliction of the BotFood man and the Lawisporte min ta atill unsottleit The question has born. raised by partlea as to whether the
man at Botwood had any right to smmmon anyone from Lewisporte when a complanit is made before the Lewls: porte man. He onght not to have any Jurladietion.
The question of the furisdiction of maglatratos is a very vexed queatlon. We have no Statute law th the coun. try on the point. That is a subject that ought to be taken up by ftecif. But with regard to the present matter I think Grand Falla, Botwood and Lewteporte are certalnly places that ghould come under one magistrate.

MR. COAKER-I think Mr. Ghnir. man that here the Goverument mizht haven combined the positiens of Subr Collecfor and Martatrate ant thus by allowing the prisent Magistrate a onuplo of hundred dollars extra for the ndditional labors might have saved nbout $\%$ the and at the usmat time given to the Magiatrate enough to live deicently upon. $\$ 600$ might have heen anved in thin way. This matier ought fiow be ennstered ty the Covern thent. 1 am in no way interented pornonatly in thin matter, but think that it would have heen very deslrabin to the finterest of the government to have these positions combined.

RT HON PRIME MINISTERMr. Chatrman: Juat s word or two te reply to the hon. metnber. There ham been no deatre in this case to averlook Magtatrate Conk. But it has been the settled polter of all recent flow ectumente, nut to combino the ofteen of aub-collector and magistrate, as thts would make it fmpossitble for the Magiatrate to hear any case ariaing from slofittor of "the Customs net.

DR. LLOYD.-Mr, Chairman: In connontlon with the vote for the Poltee Department, 1 think after the expruation of thie Minister of Martue and Fisheries, that we are entitled to a little information. wn would like to know what the Minimter was referring
to when the made the statement. I was wondering if there whs a change contemplated or a coming vacancy in the office of Immectordeneral; and if that remancy wore to ber muppteie in the person of the present Deputy MisLeter of Marine and Fisheriep. I think thit the Hewne is entitied to lnow what the Covernment intenits to do, becnuse this ls the time to diseuas the appeintment and to vote any pensions. and not immediately the House closen. I am not maktog tuy epertal actusathon, but the objection han been rained ao often that if wuch it tuteniled it is outy firt that thfs House mould know montuething about it मow. 1 would call the attention of the Primu Miniater enpecially to the statement of the Minlater of Marine and Malierifes in hia official capacity when be stated that some change was pentiog in hif department. We are tuiturally curious to know what the Minister eridentIy thought we did, nad I think we are entulled to have our curinaity mutimfini.

RT. HON. PRIME MINISTER.-MF. Chatruan in reply to the hom, memfersa auch anpofalment has beeti cotrtemplated. Thats raatior hase nevor came betorn the Goveramont in any nhape or form.

DR. LLOYD,-sto that if the trformation the Prime Minister has to kive thiti thounil welt, I icathier that this matter has been under considemtion for a very long time by all permank cuncerred.

RT. HON. PRIME MINISTER.-By whom?

DR. LLOYD-For inglance, I rememher when 1 nat of the other side of thin Houni the inattor whai froutuentty finted at in momie quartors, anid 1 waild expeot that it has heen kept up ever since the Prime Minieter nbtain: eft the peaition he now holis. This being lan, it in barily mafe for the Prine Minister to tell us that absolutely nothing is going on,

RT. HON. PRIME MINISTER.-The hon. mernber must have misunderstood me. What 1 said wha that the matter had not cone before the Government in any shape or form.

DR. LLOYD-The Prime Afiniater cannot say that he kuows nothling about what thave asked hilm, becnuse he heard this Minister of Marine tell him about if yesterday. He has assfured us, however, that nothing is contemplated in the direction of my remarke, and thanefore I presume that no vacnncy will be-made in that department durlige the coming year. I nim risht in my statement, am I not?

RT. HON PAIME MINISTERPerfectly.

MR. COAKER.-Mr Chairman: White the question of the Constabulary is up, 1 would the to make is remark or two concerning a fox case up before the Court recently. The case of Rushell and Pilley of Lewisporte. These mon were hummoned here, and the cheses against them were dismissed liecause it was argued that the foxes wore kilted in opee seaspon. Now, 1 have good and sound reasons for thinking that that case was not examinent futo as it should have been; and if the Grown wants evidence to show that these foxes were killed as war contradicted, I can produce It. The witneasen were akked no queations, Now. our courts ought not be made a farce of fu that way, the result will Do that the peonte will have no rekard for it if these things contioue.

MR. KENT.-Mr, Chairman: 1 would again refer to the vote for the police, which I hive troukht us year after year before this House. Mr. Morison promised when the wee Attorney General to have tho matter considerod. Iant year atso chungeg wero promised in connection with the pay of these mel- Now, at the present time condttons have mltered, and I think that the polfce as it body deserve that their pay
should be sufflelent to support them, and that tharefore we shouta give them is living wage. This I am exure at the proaent time they do not recoive. We do not appreclate these tuen as we sught. We accept the seo urity their presence affords. but do not bay them a wase which thelr actions dencrve. I would aak the Goverament If they have given this matter any consfderaton nifice the tiast session of this House. Now, it will be ndmitted that this to an time when curtailment, rather than incroate, is in order, but 1 do not think that this course ahould be followed in the case of our potten and firemen. in these cases, in my ppinton, it living wago ought to be givon. It think before thila vote ta pasevil we ought to reconsiter the queation ni to whether we should not provide a Hiviag wate for these men under the prosent conditionse This deaire for increased wages is not an much an outport question ais it is a city one, and 1 think it woutd be only fair for the Government to have it attended to at nence.
RT. HON. PRIME MINISTER.-Mr. Chuirman: In reply to my hon. friend I mity sury that since this House last met, this and other matters pointed cot have been under the consideration of the Government, and that this vote and atmo tho vote for outport poat offices and post masters would have been recommended for Increasen but for the ahort revenue and defict which buas made it necenasry not to do anything this year. I agree with the Hok. Leader of the Opposition that it is in the publle faterest to tiave our polfce vote sufficient to give them a living wago and to koop a good class of men in the trorce it is only a few years aiso that the desire was expressed to Improve the whiges of these men over what it was 10 years ago. At that time they got an increase of from 30 to 40 per cant, on their salary, a not
half had increnes．Brat eren fair ie mot sufficient This inpartuast is buew pald deconting to length of service， and this to found a mark becter syatime than the ohl．This matiet however． will roolve the fail comalderation of the toircrimitut，init $t$ thip thit int is mosut our pollec and aremens win git eanugh incruape to shee there that thetr anrvices life aporietitat of the

## 是 PENFTENYIART,

MR, COAKER-I wruld sugenst that That wate remaln erer sutil $=$ ve hear Whint this Select Committee hus to nay Tith resamt to that Department.

## RE LEGISL.ATION.

MR. KENT-Mfr. Chairman. An confiction with Leselslation, 1 would like fo call thes attentinn of the Promier to the mannor in which the publication of the dabiates of this Houne ts hundiod. In the first pluce. I think that the debates should be pubtiaheid day by day. If they are to be of why value at all, they ought be pubtished when they can be of nome serficn turing the time when the Howse If in teation. The dehates of tast foar wero not complately published
intil some time In the month of AWgust, or September. Pablished it that way, they are of absolutely no value to the membera of the House; and 1 don't think that the general public takes much intoreat in them after the House kat adjourned. When the people hirve got down to the summer's work, they do not take the stightest interest in the debiates as pablisined in the daily papera The "Hansard" is all right; and the putlieation of the debates in the dality press is also all right, but it must be done in euch a way as to be of value to the membiers of the House sud to the public, because as it is done at the present time, and as it always has been tone (what I an saylas now does not refer particularly to what has been happening during the admialatration of the present Government any more thin whist has been happening during the admlalistration of any government in the past) it is a waste of money, and $I$ thintr it is time to change the syatern. It the debates are to be of any value, they must be published promptly

Another thlng. Mr. Chairman. 1 think the debstes as published are not very necurate. At least, some of the reports of the detintes have been very accurate, amoet word for wort others bave not For Instance, take the opening day of the session. What I sald on that day wan reportod in a way that I would not recogntza. I certatnity did not say whit wns reported. and what I did sny and was reportend was not reported in the way fil which I sald it The reporters have 1 know. to work very bard durfne the seeston, and there are some of them who are very good. For Instance, you have got Mr. Matcaly, Mr. MeGrith and Mr. Emernon. These are experienced reporteris, who have heen hore for a number of years. But a reporter
ought to be always an experiencea man and able to take verbation $r e$ forts hefore he ts appointed to the position of a reporter in this House
1 thirk Sir, this the matter of the pubilication of the debates ought to sceetre the serlous consideration of the Internal Etconomy Committee. If the debatos are to the published in the dally preas, it ought to be done promptly so that it $w^{\prime} 11$ be of some zalue to the House and to the public. The cort of publfehing them at the present time is practically money birowi away.

MR. HIGGINS.- Mr. Fhatrman Just a word on thls sabjuct it merthularIy taterests me, having diene service in the box for in number of years. it think tave real cause of the trouble to that the reperters are not mumficently patid. In this, has in every other line, if you what expert work you lave got vo pay for th. Thy umount that is pald a reportor here is aot vutticiently attractive to warrant a man gettit g down to work and maklag Mtriself proffctent. Thie result ts, as the Leader of the Opposition has sald. that while the present reportorial fitair thelutos sorne axcellent men, yet the work is not as good as it mighr be I think as one who has been fibero, that if the pention wore made more attractive you might have here. what you hiven nat had so far to this eolony, and that is a larre niutuben of verhatim reporters. to this country 月o 1ar, the exception is to tind a yorbinim roporter Tharo aro not many of them here Sthorthand is taught in our melools, and the puplls Are turned out "ith the ldea that L : fause they are sble to take dictation at the rite of fift) or staty or a humfred words in minute, they aro there fore sufficteatis qualified to be r3 porters; they appear to have no fidea of how expert a man has to be in or
der ta be a reflatim wian of treir a mood man tur his wrikl, because ment whe have sint done it hurve no trita of what an amount of labor mporting invalvee stamer et the mex ae tho pres ent statf are very wapert rwporters protably mone Befter in Nersfouns? tanid, but a inaff han's thive from pome of the pentluman the the opper aite side gifes them st leant three bicais cabytog: find whob the sumator: io buing, omil the mportern finio to get in the hox two on thrve timan in the nourne of the day, it is perfently its pousthe for itum to temp itmit worb up to fate. Howorer, as I liave eath 1 think the remedy to this cane is in

MRL MORINE-Mr. Chairtill it apperine to min that therw are twe thiner to mhtets opdection te talien Thit, if cembectoin with thil wart a Dhe reporinelal salat, and eecina, in conpertion with the puthration of the dnlates. With recand to the wrek of thir Toportats I woutd mokeroint thit if you had a coaple of typewriters-by that I mean operatore an wnit as me phinns-whe would oecuby a roora

 hio priteriples shich Justify my tak thir that attitade I would like also to mille it elear that T am not traating "tion matter as a party question. of plisiniz any obinection to somuthing hethe done to furiber development of Sevefoundland.

1. would tike to draw attention to
the fact that for the past quarter of a century, both parties in this Honse have been tuaking concesstons, giving away witer, timber. fue siraple rights inland, in the hope of promoting developments in Newfoundlund, affording work to all clasees of labour socking to foster in fincrense of population, and revertue. We do not object to large expendlures in the proper direction snch as siducation 1 should 11ke to see a large increase there if wo could afford it, but we cannot afford it We find thit we have heen gaing thesd faster than our reventes etabled ns to do. But that is all the more reason why every man in this House should do what in him lies to gee that we get an adequate return for what we give. Further I sing that though I have bean one of these who have drawn attention to the promoters of this company, It is not because they are the Reld Nfld. Co. or any other. 1 do not stiy that because the Refd Brothers are the promoters of this that It shonld be condemmed. Thay already control large Interests in this Colony, riotably the railway ayatem. They hold millions of acres of land in fee afmple. Both parties in thie House have cos. tributed towarite giving them these interests. But there are facts relating to the bill itself that must be taken into conelderation. The experience of the past 25 zears in mach na shoutd make um halt to conalder carefaily, bofore golng further

The Reld Nfld. Co. have ext caordinary interestis in this Colony. I possed the earlier part of my Hfe in Bouth Lanomshire where a very la go amount of cotton is manufnetured. The ctimate In stieh that it contributes largely. to the success of the cotton manufacture. It reste on a coal finld: indeed the cotton industry ig based on the fact that there Is coal there It is the same elkewhern. The success of any
large minufanture fa bnsed on the fact that sometbing Is easy to get there. In thls case our great resource is our water power. And therefore we ought to take care what we are bolng, and be reasonable in looking after ourselvè, and at the aame time wo ought to five this proposition fair considerstiot.

That is the spirlt in which I approach this question. What are we nslied to do? I am golng to deal with this matter from the atandpoint laid down by the member for Bonnvista.

In $\mathrm{Ba}+$ of Ishands they ask for rights over the drainafe area of the Humber. That is very large. If you looks at tho map, you will see that it includes a very larke drainnge ares, running in the direction of white Hay tun South beyond Grand Lake. Much that is outside of that area they plso want. This matter needs great considecation. If we give those grants We muat see that wo get fitr returne. Outaide of that area there is a reguest for water power that would include prantically the whole centre of the Island. If we turn to the first sectlon of the agreement we find that the company la suleing not only for water powers, bnt the powar to eontrol the Whole of the western Arafasge area. tneluding Grand Lakie, and to do what is neccasury for thetr purposes in conneetlon with every stream thereln. There 有 a complete sibsence of information in counectlon with these water pownors. We hive no report dealIng with the point. We onght to have the whole of the Information before uf: It will be nortoed that the whole thing smounts to the psking for the nower to handte the whole drainase area of the Humben Oni turnitag to the mop which the Premier has lald before us, it will lie observed that a large stection is tiocked off

1 would like to draw the attention

Now Alr that natrarally Seaile to thon facertats hom ary the infureate of the Givadier cocnserneat ta this cuntraet* Nom If wauld likn to drate the attenfron of the Cammitfien fo the necone rhavis of voule IIke to dilioct the at. Diratise of the Cersfilter to slause
 Patmad an parke at of this Groen Doole. fide woll dwwn in that mertion these [Vorde chas ie fousal Phey bare re fromartith thurtogment qork en the fatmoter -The Cempian shall withIn then pearn trim the fate herout Fxbead is the fevelopmoknt of mate filif pow rase abli the consitractiom atul irparntion of ita plant in Labraitor
the further sum of ten million dollars." Now the words to which 1 wiah to direct attention are the mipecific undertaking that a large sum of moncy shall be expended in the development of the sald water powore, and the consurbetion and operation of the plant. Thint fe that there ir to be a plaat and the actual development of water power, and the actual experialture on the plant and undertaling. and that that money eball be spent in retervnce to Latrador, or if not spent then the fee simple grant ahall be void. Now that is specifically latd down, and it naturally turne our attention to the clause which deale with the undertaking of the Company in regard to the whole contract, and particularly with regard to its holdings in Newfoundiand. Bearige in mind the undertaking to spend money in the devetopment of water powers, and the congtruction of a plant on Labrador, I will now ank you to look at claume 18. Thint is practically the undertak tos clame of the Cormpany. I shatl read it "The Company undertakes to begin actual conatruction work upon fts undertaking withit two years from the dute of these presents." First I would like to draw your attention to this fact, there to no deffnttipn of what the Company's undertaking is. It may mean anything if the Company's undertaking is to bo the actual development of the water powerg and the plant at Ray of lalands, if it it to be the actaal conatruction of the el cotric furnace or coke furaaces. If it nacand the processes by which the iftrogen is extracted from the atr to make the nitrogen compounds whteh is the partfcular feature of the proporition before ua, and then afterwarde develop the ammonia salts-If by the undertaking is meant these manufactures and processen, then it should be apectfled elearly. At present there is
absolutely no deftuition of what it means. There las ulready been some comment on the point of begiming aco tual construction. There is no undertaking to ko on with the construction even if it has only apent tive dollark. The next point is more important ... The apend a sum of five milion dol. tire withlo the Talrid of Newfound hand in and about the business operations of the Company withit five years from the date of theao presente. end if the Company teils to begin such work or expend sueb money within the timea mentioned this agreement shall be vold." Now I wheh to dwell upon thls feature, that in clause 2 to which 1 htve directed your attention, there is an undertaking to spend ten million dallars on the Labrador on the Company's water powers plant and works. There ts no such undertaking fit this claure. It can bo apont in connestion with the business of tho Company, in connection with the oper. atlons of the Company. Now there is nothing in the elause that layn down that the busfress of the Company shall be carblae works or ammonla plants. it tus ulready been pointed ont that it zany be anything within the limits of the Memorandum and Articles of Assoclation, and may not contain one ningle factory connected with the fertilizer scheme. That is the dangeroas clause I am not attributing to the Reld Brothers or any of the prometcrs that it to their Intentiou to collar the resources without apeading money on the construction of a plant; but the promoters of thie Company tmay fall absoletely to ralse the ofghteen million dollaris talked of by the Promier, or even the five million mentioned in thly contract, and they tany fall absolutely within the next year. They may full to get the money and may fall to put up any fertlilizer
plant at Bay of Islands, and if they do fall to do development work at Bay of Islands is connection with tho for: tilizer plant or the development of the water powers the ngreement will necessarily be vold and all the concess. lons nufl. Now 1 wleh to potnt out that here there le a means by which the promoters ean conserve all those Interests and retain all the benefits of the Contract wlthout spending one cent upon conatruction work should thoy fall to obtain thls money through no fault of their own, or through fault of thelr own. should they fall to obtatn thls money and do miy development work there is a means of retaining all the concesslons under the Contract so far as Newfoundland is concerned withont apending one cent at Bay of Isiande on the water poweris or on the fertilizer plant. I would like to polnt out how it can be done. and how it ts likely to be cone if it is uesessary to do it All that is necess. ary is for the Producta Company to puy five milllon dollars In bonds for the holdings of the Feld Newfoundland Company for thelr lands or water powars or anything elee they have, and it they spend five million dollars in aeguiring these propertins and rights from the Reld Newfoundland Company they Eattery this section, fand retaln all the righte glven in regari to Nowfoundland. What does that mean? It probably means that to far as they are concorned all they have to do is to take flepe million dollare out of one pocket and put it into another. Take five million dollars worth of bonds from the Froducte Company and put it Into the Refld Nfld. Company and thoy have oatiofied the contract without the expenditure of one cent Now, Sir, this is not good enough. 1 am not nceuatng them of an intention to do thle; but I am pointing out that it can be done, and it it is done it
satiafies the contract, and they retain all the concessiona given. That io why I say if there is a opecific undortaking by the Company to spend five million dollare in Newfoundland on the development of water powers, and on the construction of these factorles. and electric furnaces, carblde plants, chemteal plants, and sll such undertakings: if there is a sound undertakIng, and it is the intention that the Agreement shall fafl if these undertalifigs are not carried out, then we ought to be careful as to this proposal. If there is no undertaking then the consideration given for the Contract Is Illusory and useless, and we are grasping at a shadow; giving up substantial interests and getting nothing in retura. Now Sir, may I point out another reason why we put temptaHon in the way of the Reid Newfoundland Company to transfer fts Ianded interests to the Products Company. Under the Rallway Contract the land of the Reld Newfoundland Company becomes taxable, a subject to taxation immedlately it is improved and worked upon; whereas if the Reid Nfld. Co tranaforred ita landed inteats to the new company they escape all taxation in regara to improved innd: and not only do they escape all taxition in regard to fmproved land. but they ket the benefit of getting all the concesslong elven in this Contract In regare to Nowfoundland without apending ono cent in construction work Now, Sir, as I have already polnted out you ought to treat this proposition as a business proposition -that a sultatile return should be given to us, and that that sultable re turn should take the form of an under taking that the whole contract shall fall, unless this money is setually oxpended in regard to these factorles and water powers at Bay of Islands.

With regard to the other concese-

Ion, the conceenion throughout the rest of the tuterlor of Ngwfoundland, as they are unconaected with any clear business propoaltion for the carrying on of any work then they ought to be rejected, and rejected absolutely, because if has nothing to do with tiny defintte proposition of development. I have already fllustrated that the greit industries of Eiggland rest on the coal flelds, and should any one corporation control the coal fields they would cantrol every manufacturing finduatry in Enginnd. The water powers in Newfoundland tn regard to our development atand in the same relation and unless in connection with same specific undertaklag no water power should be given: and this throwing in of water powers ovor the whole interior of Nowtoundland for no purpose whatever except to enatle the Reld Newfoundland Company to control the Interior to a greater extent in order to make better bargains in any future promoting acheme is totally without fustifica tion.
I have aiready drawi attention to the fact that there is a great temptation for the Retd Newfoundtand Company to place all ite lands under the new Company In order to escape taxation when thene lands are developed. Now I regard the proposals in regard to taxacton as altogether unreasonable Reasosiable concessions mighit be asked for ant given. There might be an exemption from municipal taxation for a period of years. For my part' I weuld be quite content to glve a twenty yent exemptlon. I would be prapared to give them exemption in regard to construction material ant some limited exomption in regard to raw matertal; and aleo to give an un. dertaking that these raw materinls ahould only be taxable to a very llm ited oxtent; but I am not prepared to
assent to the propiosition that shares and particularly their dividends-no matter whas dividends may be declarod, shall be forever free from taxation. In fact I cannot concelve for what purposi-except to see how much it was possible to get out of the legisiature-any body of reason. abte men should approach a legislature and ask that no matter cwhat profits ther may make forever they ehould never be eubject to any taxation, except it might be on coal. It is nin absolutely unreasonable and im. proper concesston to ask tor. I hope the Government will take fnto consideratton the varlous objections and crit. Iclsme made from this slde of the House. I would commend to their sertoue attention the remarles which have come from this alde. They have not been made from any party standpolnt. 1 am prepared to vote for reagonable concessions in connection with a. business proposition where there is on undrrtaking that the money shall bo spent in actuni development of water powers and actual conetruction work; provided the conceselons in regard to taxation be more reasonable and be limited in time; and that, with regard to dividends, within five or six years arter they have heen paying divldends some releonable contribution should be made towards the upkeep of the country; but I am not prepared to support this proposal. I am not prepared to support the giving away of all our valuable water powers all over the Island, not noly for nothing, but for no object-absolutely no oblect, except it may bh to put them in the control of a bedy of men who already are in control of very much. We do not object to the Rald Brothers getting concesslons because they are the Reld Brothere; and we do not object to thom getting wator poweriz if it ts for reasonable development purposes; but

Wo ask, and falr'y ask, that a proper bargain be mado with them, and if we give up water powers to the Reld Newfoundiand Compeny and the Reld Brothers, they shoutd give something in retural I do not think if we give them a very valuable water power on the Labrador and aek them in return to hand back some of the fee simple lands of the country, or that they undertake to develop theme lands which they have so far been able to develod that we would be asking too much. If we eive them these valuable coneessions they should glve us aomething in return. if they are prepared to come to us with any ldind of a fatr deal 1 ami prepared to eupport it; but if this is the probosition 1 atm not prepared to aupport it, and I shall endeavour to prevent it golng through, oven if I have to rematn here all the axmmer.

Mr. Speaker resumed the Chair.
The Chatrman from the Committee reposted that they had considered the matter to them referred had made some progresaand aeked loave to plt agsin.

On motlon this report was recelved and adopted, and it was ordered that the Corminitee have lesve to wit again.
II. Wat moved and beconded that when the House riees it adjourn until Monday next, May 3 nl , at three of the clock in the afterneon.

The House then adifurned secordingly,

MONDAY, May 3rd, 1915.
The House met at three of the clock in the afternoon, purzuant to adjcurnmatit.

PETITIONS,
Mif. MORINE.-Mr. Spealicr: I bug Wave to present a pertion from the Central Foreats Co. Litd, reluting to gertain resolutione before the House in connection with the Nowforndiand

Products Corporation. This Company is Identified with the A. E. Reed Co., and bege to lay certain matters be fore the House when it goas into Commiltiee on this subject.

MR. MOULTON-Mr. Speaker: I beg leave to present a petition from the inhabitants of Channel on the subject of prohlbition. I can assure the -petitioners on behalf of the Gorernment that thie case will recelve their careful attention, and do when the time comes what will be necessary. I beg leave to aak that this petition be referred to that Department to which it relates.

## QUESTLONS.

MR. STONE aaked the Ministor of Publie Works to lay upou the table of the House a copy of the returns for sll monies aent to Captaln John ColHins, Sr., of Catalina, for the years 1912-1918; (2) Elso, copy of the refurns for all monies seat Captain Albert Haynelf, of Catalina, for same yents.

MINISTER PUBLIG WORKS- 1 hope to be able to table the answer of this queetion to-morrow.

MR. HALFYARD asked the Minister of Publle Works to lay on the table of the House a statement of all expenditures of the tmpin line grant from Renews to Trepassey for the years 1912, 1918 and 1914, snd all returas connected with the same.
MINISTER PUBLIC WORKS-The answer ls betag prepared.

MR. MORINE asked the Rt. Hon. the Premlor to lay on the table of the House in statement of the names of holders of timber and water power righte, with the areas of such rights, within forty miles of Humbermouth.
RT. HON. PRIME MINISTER-I BEK leave to table the answer.

MR. MORINE asked the Minlater of Pubile Works to lay on the table of the House a detailed statement, show. ting how much money bas been pold
out in spectal and local grante for roade and bridges, during tho past two yeari, to each of the Rond Boards at Highlande, Crabbe's and Roblinson's Head.

MINISTER PUBLIC WORKS -THe answer \& betng prepared.

MR. MORINE asked the ML. Hon. the Promier to lay on the table of the House a copy of the grant of water power on Junctlon Brook to the Pean Newfoundind Company.

RT. HON. PRIME MINISTER-THIS will be furnished.

## SUPPLY RESOLUTION.

The Chairman from the Committee of the whole on Supply reported a Resolution, which was read a firat time, as followe:

Legistation. . . . . . $833,780.00$
The aild Resolntion belng read a necond time, it was moved that the House concur with the Committee thereln, and the sald Resolation was agreed to.

## PRODUCTS CORPORATION RE: SOLUTIONS.

Pursuint to Order and on motion of RE Hon. the Prime Minister, the Houive resolved fteelf into Committee of the Whole to consider certain Resolutions, in relation to an agrement eatored into by the Government of the Colony with the Newfoundingd Products Corporntion, Limited.

Mr. Speaker left the Chatr.
Mr. Parions took the Chair of Com: mittee.

MA. LLOYD-Mr. Chairman: You will remember that I endeavoured to lay down the proposition that we ought to promote as far as lay in our power any industry we convenfently could, granting what concessions mifght be necessary for its promotion, provided we were confldent that the project was a clear and definite undertaking that would ensure the spending of money in the development of our waterpowers and the constructrig of worker in connection therewith. I
also polinted out that the fact that the Reld Brothers were the promoters of this achetre should in no why affect our criticisin. I consider that the granting of privileges conneeted with the eastern area is absolutely outaide of any works contemplated at Bay of Iolanda. Now, Bir, in reference to that matter, ab the Contract now etande, whatever the intention of the Government may be, and 1 have no doubt ntter hiving heard the Promier'a apeech fiat that intention is, I have no doubt thit the fremier and the Goveriment had fo mind thet thifs expenditare in Newfoundiand should be an expenditare at Bay of Iatands on water powers and such like cobstruetion worka; although that is perfect1y clear from the tone of the Premler's speerh. it should be remembered that if a question arines subsequently and the isnue had to bo dectded by the Court the Intention ot the Government sio far the sit forth in the Premfer's speech would net bo in evidence A Court would be governed not by what the Premier had sald, but by the actuth worde of the Contract, and therefore in considering this matter we hive to follow exictly what the contrict says. And I pointed out that so far tar the worde are concerned there if nhe underfiking at all that thill $\$ 5$; 000,000 should be spent at Bay of Islande or thould be apent in Newfoundifind on the development of water powers of other works. It would be guite sifllcient for the Company to spenid 55.000 .000 In the course of the buslnessi of acquiring property and Highte from the Refid-Nrid Co. Fhave learned that the Government has declided that there shall be no doubt abiout thet matter. They tave doctaed to make it clear before this contract passees the Honse that the 35 ,900,000 shall be epent at Bay of Istaids, and spent in the development of water powers and in construction works. But, Sir, even if that is done,
there fo still latuother polst to be conifdered in connection with the name clasies If. This is the clause appe
fifch the matertal consideration of the Contract resta. I would like, Sir, to draw gour affeatlod to that ctases: The Comapasy undertakes to beein actasal constraction work wpon its unfertaking withte twe yeare from the ditio of cheme picaints ant to expond a kum ef.five mallion dollary withle the Istand of Newfoundlimel in and abeat the bumlates and aperations of the Company witita tive yean troan fire date of thene promenta, and it the Company tails to begin apel work, of uspend auch matiey =ithin the tumes Hintioned thtr minvement Thell ber vold:

Eluppoes, Alir, that thin Is altered to ment the polats atready ralaed. sup-
 thatt be erpout at Elay of lamarta, and in and airout the developmemt of whier powers and comatruction work. THppotit that ath thili te put tir iof that there will be nia miatale on that poltut, still thers is a vary mericus matter to be coualdered, and that matter de senetr trom the cmatractiot of the latter part of the clases. "And it the E-mpasy fall to lestil much worit and to expend nach maney ne these work? nt wiry of fitintis, sithtr thr पौ: mentionen, this acreement shall be rold- 1 -oukd ask rou to fook at the luat four vurts, anit t am hasuming that the contruct tirr bevin atteros io. that thure if mo doubt about the expebiliturn ef the mener at thay of to traifs. 1 wiak to point oet that the empormest frovides that it ithatt bo robl on a violation of the agroement, oth a fallume io do momeshine it the Tetere, but ant betortic. Up to that these the wimmement is rathit, and 1 vorlet point out that when it soes be ecmat weid it does not may in expromen termet that tho सहrerment ithilt be Yelt ab fritin. It toes not may that it will be vold as trom the date of the

Contract. The saly meaning that can be put upon that is that the agree ment whall be suid an from that date. as trom flve ynirs yance. Niw, sir. what is the effect if that1 it menume that ofi the fallare of the agrevimont *hat the Oovarnment undertaiker to do
 thall not be btriling on thrm, and what the countructor unfertaker to do mo tons ar the merrement is in torco shintl to loneir be binding oo him. That is clear There to no doubt about that. Pat what of the poatt Went nbout alt that hat huppeant duripg the five Jaars? Deleas avoidance of the Conthet tr mate to tur halt io the tabe of its makine evcrythlne ithit to done onder the eumtmat in valla. The mont taportant point of that in that an inoon as the Contract for coulirmed it leases sertain water powers on the Humber: That ant in complete in theilt it le fintehed with is is ralld and binding: find they ran avold all the Contract Hve yeant hences and yet pot avotd that lease.

If it is the Inteation of the goterament andl 1 prearuaie that they de intenst that the leave of the water jowners shall Be volid, the proper place to makn it rovert back to the Ginernmeat is in the clause crasting the dumise. Ans I ank the Qovers: ment that when thay take up thin matter to reconstruck, as I undierstand tiser Intiad to recomitrart thar clanue. Hat thoy will insert sarwething to the efleet that ir this 85, Beowiwe is not speat at Bay of Lahands is conanection with the development of water powern and in eonnection with the eckutrub. tion of their works that the lease ro frrmet to shatl revart to the Crown That $t$ take it is the reat tetention of the Gorernment. My potnt at pregent in that it is not as yet stated is the Conitract. It is riot a fate infer. *ence from the worits of the Contrivet to asame that that is the fatantion
of the partices; but if it to the intention of the parties it shonld be apeHeally stated in the clause, Just as in section 2 when you have a grant of the water powers on Labradior, you refor to the expenditure of $\$ 10,000,000$ within a certain time and if they fall to do this the grant of the water powers is to be vold those words are clear, they express the clear mean. lag in connection with the tabiador water powers. If that is stated in clanee 2 why not have it stated clearty in clause it in connection with the demtse of the water powars of the Humber, I would point out in connection with that lease that there Is no condition attactied to it. It is an absolute lease. The only thing that in asild to be roidnale is, not the lease, but anything that the goverament would be callod upon to do after five years.
Now I pass on to another point. I have already exprossed the opinion that in regard to the leasing or grant. lag of private water powers, the gov. ernmeat should obtain a falr quid pro quo in consideration for what they give. Now, sir, these grants or leases aro made without any consideration in the form of rental in monky. When yon constider the rigurce hald before us by the incorporators there appears no reason whatever why the Com pany should not pay a falr cental for what it gets. I was struck with the elaberate detall with which certoln parts of the undertaling liave beon mapped out and the vory considerable amount of information that was giv. en In some respents as to the Com pany's plans. We have had lald be foro us, from, I underatand, the ongineere report to the promotern, the cost of each of the ten dams and ererything connected with the development of water powers. It is estimat-
ed that an expendiltare of 96.140 .300 Will be required on capital account for the development of 119,500 torse power. Thut works out at $\$ 53.85$ per horke power. These are the figures from the Enkineer's report. They come roushly to 254 der horse power. Now that capital expenditure is comparatively low when we consider the value of thems powans when developod. I linve liern not in connection with this matter, but in connection with other mistters, a paper slving some Idea of the value of horwe powers in varions parta of Canada. In the case of the Iftte town of Prince At bert, for an expenditure of $\$ 53$ to $\$ 54$ per horae power, they get an fncome of from $\$ 90$ to $\$ 35$. That is a pretty bfs return on $\$ 54$. Well over $60 \%$, $80 \%$ income on capltal expenditure. Now, Str, to show that that is by no mionns extracidfnary I would like to point out another statement an to the value of electrical power at Regina. And this power is obtalned not from a water power but from conl. "AI though conl brought from some dis tance has to be need in prodncing the electricity the corporation is able to supply currunt at 859.40 por horse bower, so that if it were at Regina it would bring in every year in return far more than the capital exponditure, more than one hundred per cent*

Now, Sir. 1 nm not putting up these figures as necessary figures for this Company, I am willimg to concedte for the rake of argument that they thay be calculating getting only $\%$ or $\$ 5$ per horita power per annum, that would the tan per cant profit on thelr expenditure per horme power. The pulnt arrived at la this that avan If you only place $\$ 5$ or 86 per annum as the value per horse power of this whter power this Company could well afford to pay a rental on the horse power developed.

Thls gropoultion is by no meats out of the way for I find that that in grecitely what is Goae In Optario. I Sare before me some information obtalned from a publlestles lisused by the Couservation Comenlashas of Casnita I Ind that sume Cempanies are fupplying to large concernh power at very moch leas raten that those alrentp quotent, bint I to not find mnythitre tower than $\$ 10$ per horse pow: en. At that rate the horno power dovelopet at iliay of islands is worth $\$ 1,20 t, 00 t$, per annium, oveñ at the low rate of ten dollars per horne powar. 1) have already potnted out that as far as we are concersed the water powvini of thls coumtry itand to ur is the aarme relation us the ooil nelde of Englatal stand to the Initastries of Riveland. We vaght theretares to conwerve thein, and Int themin out 10 as to get aome return for them, and not thres them away with prodigality.

I: riad in thle patilication cortain recelatiens that have been adopted in Ontario in resant to the dealing with and letting out of mater powens. Bome of them are intereating, as they afford conatfernble Itiumtnatton in readiag the Contract now before us, I would like to read a few, Upon eomplying with the reculationa a lease of wator pertittives thay te tiarued to the applicsut upon much termis ne may be appreved by the Minister: There is a Fentht reservet tis each lawe. To leam shall be rranted for a lopgor term thas iveraty yesratiet the lenspe shatt have the richt of rentumat of macts thase for 106 firther succeasive terme of ten years wpon such terms ond cenditions an mhals be sereed up on ty the strititer." Thiere Joti the that the furthermost terms for the grantine of a lenae is Oatario in fare ty ymark That ought to be ruflietent Ia ainy case, and it in the example of a Province that has aad extenitve es
perlence in biese matters and we Quatit then ty have a Cormmianien to " Eventigate the ralur and entrnt of the ontor powere at the ceat of this torty avar limith. But even under atl the circumataniess of the case the very fartiest extent of this Inate oupht not io be =hore thas 25 yeark A. ind thit flome ocgat mont to grant a perputual rumewal of that lease; be canse if we grabs them a lease for 95 years wn are krasting them' a poriod two anil a half times an lonet an is Hrasted in Ontarla Now, Bir, 1 would tike to drse your aftention to the next aection. "The right of timber ow tery to strive tuge of umber cown gny itreams or वver any bocty of wwter an now by law extablished whall not be interfered with. lesmened of re strietnd by any Erant of any surh Trane abal sio dam or othor efructure shall he bulti fis connection witt the development of these privileges with the ohdiv: or effeet of damming the water or fritarterms with tre now, entess proper provision shall be mate for the driving of loges over the aamn." My oblect in referring to that is to traw aftenition to the first part of the slauni where it says that the lease shall bot interfere with the riahts of othArk. I would draw your attention to the extrantdinary elause in the Contract before yow, whtech has already Been commentind on by the hon mems her for llomarlata. Section 2b reader: FNetmithatanditio the erant of the تnter powery herein all pernoox shall gow then richit to the temporary une -t then maly waters for the surpoee of fexalur to and tro is small boats, and per this purpose of fleating loge and fumber betongtine to worls perisene to their millie provited that much une ahall ant interfore vith or zrefurtice the Mratisas or operations of the Cen" The whole matter is topur tarvy: If Contario the orua ta upon the Lensee.
not to faterfere with private rights. Here you place the Company's righta above those of individunls. Now, Sir, I think the beat thing that can be done is to adopt the Ontario precedent, and say that the Lessce shall not have all the right or interfere: with the rights of others.

There is another matter about which I would like to eny a word or twe and that is the searelty of intormation, and I think that this committee should have this before it is called upon to discusg this cliuse. I refer, sir, to clause 4 of this agreement whith exempts from taxation all the stock, dividerids, debenturos. đebenture stock, mortgages and other so curitiea of this company

I notice in the prenmble the follow. ing:
"AND WHEREAS the Company has acquired by assignment the rights of the patenteos in the Colony and its Depandencles in and to the following patents, namely: No. 184, dated April 21at, 1914, for manufacturling Phosphorle Acld and Phosphates, and No. 189 dated May 16th, 1914, for a mothod of making nitrogen compounds, and No. 190 dated May 18th, 1914, for Phosphorte Acid Products, and No. 193 dated July 25 th, 1914, for method of producing Nitrogen and Compounds and No 196 dated Aug 22nd, 1914, for riethod of minufucturing ammoniated double super-phosphate, and which patents have been granted to Jesac Crita King and by him arsigned; ANB WHKREAS the Company has also sequired by assignment all the rights of the sald Jesse Crits King in and to an fnvention of fmprovements in the method of manufacturing nitric acid and for which a patent hae been applied."
That in itself throws no light upon the enacting clause. It is merely a statement to the effect that a certain
tian has appulled for a patent and that the rights of thfs patent have been assigned to this company. It is extraordinary because it does not give any information as to what is meant by its insertion in this Bill. No informetion is given and we are just feft to grope and find out why thls clanse is put here without any information to atart on. I presume the object of this clause ie to give the company confirmation of these patents. otherwise there is no necessity for it.
We are asked to do something extraordinary in the way of changing the Patent law, for the Producte Company. Now this needs some explanation and it will rieed some ade quater cause hefore the patent law shall be over ridden. Now, Sir, it is clear that there was something in vjew when this cause was included in the bill: With the patent law as it is now, the govermment has the power to grant patents for a period of 21 years. They may grant it for fourteen years at the date of applleation end at the end of thet time it is re. newablo for seven more, or in all 21 yeara sotice in looking at the clatea of these patents that they are fill except one, 1914 ones and that one is a 1915 one. Now str, why is it ne cessary to have this clause included hers Thiere must be some reason or we would not be asked to pass it. If this is a safe venture and I mresume it is, why is it neceasary to have thin elause inserted. The company has 21 yearg to use their patents and at the end of that time if the coms. pany is as safe as it has been suggested here it is, why should they need nit enactment to safeguard their patents? By that time they should bes 80 situated as to make opposition an Im possibility. There must be some roason which is not known to this House,

Now I would ask that we be told what this reason is.

The absence of explanation leaves as to conjocture what that reason may be; but thig is a thing that this House ghould not have to do. If these parents were patents registered in some other country there might be some possible reason for the necessity of this claume but we are giren no Informatfon. We are not told but perhaps these patents bad already expired and were registered akaln, and we may Lie passing somethlas Illegat; I do nol nay this is the case but no information given thls House makes this an an impossibitity. We ought to be told whether the patent we are asked to confirm is valid or invalid. This is the time for any livalidity to be pointed out and not after the measure has been paesed. In thene dnys of adventurers it-is of the utmest importance that great care be practiced. I do not say that the promoter of this company is one of these adventurers, but beling left to conjecture we must inelude this in our conjecture. I repat Mr Chairman, thet there should he an extraordinary reason for this House to orernule the Patent Law in thia manner. There may be some cause some Juat necussity for having this clause fineerted, but if this ts the cane why not let the House know of it. We should not be aaked to give a 'curte blanche' for anything they may dealre without first aasuring ourselves of tta necesalty. Aa 1 have sald we may be granting something which is not ours to prant and may be granting pateati in casea where patents are illogal. I have expressed myself several times hero to-ltay th the form of onjocture. 1 did thits becise this was the only way left us.

One other thing sir, should be attended to before this bill is passed and that la, the water powers ceded
thls company should be more 11 mlt od. There are water powere over which this Goyernment has no control and the bill should be so arrang. ed that these are oxempted from the provision of this bill. I would suggest that the Government study more carefally the water powers granted pnd no know what they are granting.
RT. HON. PRIME MINISTER.-Mr. Chairman: When I brought this matter before the Honse some daya ago, it went into it very fully, with the vlew that the Contract in all its detalls might be before the House. I think at that time I gave hon. membiers as much information as it was possible to give Since then 1 have Ifstened with a great deal of interest to the speeches that have been made on the other eide of the House by the ton. momber for St. John's Enst, tho loader of the Opposition, the hon. nomber for Bonavista, Mr. Morine. and the hon. member for Trinity, Dr. l. Joyd, who has Jast closed. With very fow exceptions, I have nothing whativer to find Zault with as regards the tone of these speeches; but as regards the deductiona that have boen drawn from the agroemeat and the interpretallons that have heen put upon it, I shall have a good deal to say; but, his I have eald, with the exception of a fow pointa, whicia I shall deal with as I go along, I have to find no fault Fith the spirit which has run through the deloate.

Mr. Kent, the Leader of the OD phoftion, oponed by maling a atrong appesl to us from a patriotic standpoint, end he was followed by Mr. Morine and Dr. Lloyd to nome extent in the same strain All things condildered, the spoeches, viewed from the standpoint of an opposition, were fair: though I cannot at all sdmit that any if the constructions, or very, very few of them, from an interpretation standpoint, can fuirly be sustalned.

First, 1 wonld like to draw the attention of Mr. Morine to the fact that it is not correct, as stated by tifm in his opening remarks, that the agreement and the resolutions were drawa and prepared by the counsel for the/ Company, the Soltcitor of this House, Mr. Furlong. Soveral days before he made that riatement I told the fiouse, in his presence, that that was not so. They were not drawn by the Solteltor of the Company. I think it way in reply to a quention from Dr. Wloyd that I made the statement. If he will look at the Telegram for April 24th ho will find that the statement 1 made was this: "The Fremiter, Sir Edwant Morris replted thint the A tloriey General and himself had acterl for the Government, and that the matter had atso been looked atter by the other logat mentiers of the Execative Counci). "That was the statement which 1 made. Now, as regards the Resolutions confirming the agreement: "In reply to Dr. Lifoyd, the Promior mente that the resolutions confirming the Contract were dratted at his request by the Solicitor of the House and aubmitted to the Attorney General and himselt. "
Now, thit is the statement that 1 made In other words, the agreement wns not drawn by Mr. Furtong but by tho Attorney Geacmai, and the other legal members of the Council. It is quite true that the original propocal came from Mr. Furting, sa the Sotictor of the Company, but there is nothIng of that original in the agreement which we have before us today. It tas been drafted and redrafted tigult and apaln and agatin, and oot a seef tion or a line as origianally proposed now remains. As regards the resolutionn, when thor came to be drafted I drew the Aitarney Generat's attention to the fact that it whe proper that we nhould have them before ns with a view of seelng that they contained
nothing except what was absolutely necessary to confirm the agreement. When thoy were drafted, and before the final printing, I had a meeting with the Attarney General; the Colonial Secretary and Mr. Furlong were prescint; and we wront over the Resolutions word for word.
Now, the next point I should like to call attention to to the statement marde by Mr. Morine. He says: "We were told here in the House by the Fremier in words to the effect that pentons having inferests in lands upon the Humber and in the watershed of the Humber, had asaigned their right4 although thero is nothing they can show, no agrement, no assigument in support of such statement."

1 made no such statement. What I did say was that we conferred nin ifthtis, merely by a rectul in tha ugreement, as regards assigaments. Thure is a recital there in relation to sssignments, but if the assignmenta have not been made, the reeltal does tiot make them.

MR. MORINE.- 1 am misreported there. 1 did not say you sald it.

RT. HON. PRIME MINISTERWelf, 1 am glad of that. The same is true ata regaris patents. We knew an a matter of fact that patents had boen grunted by the Governor in Councll. we were not interested in sceing the assignments, because that would have been of no interest to us. They had been nssigned, and as to the conaldsration for which they wore narlgned was a matter in which the Government had no interest. The question fiscussed here by my friend, Dr. Lloyd this evening, on this point, is one that we will be better able to deal with when we come to it later on.
My learned frlend, the hon. member for Bonavista, then dwelt to some extent on the interests in the water shed of the Rumber. The only rights that We know of here are a number of mining claims, a list of which 1 have
here, and which I shall be glad to table for the information of the House 1 also have a memo, as regards the grants of land in the Humber watorshod for agricutoural and tímber purposes, the land claimed at Humber: mouth and not granted, the applications for land at Humber River, and \& list of timber Heenses and leases of water powers on the Humber River, Junction Brook, and the Humber River drainage area. Now, all the holders of water powerg are adequately protected, becanse the demise in the first section spectally states that nothing passes where there are any rights under grants, leases or Heensca. Every right, whether it be conveged by grant, license or lease, 15 spectally exempted from the demise. If there are any Imagfasy rights, or speculative rights, or any other rizhts that may be called into existence in order to block the development of this country, then we cannot deal with these. We are only concerned here in protecting in this demise bona fide rights of those who have krants, licenses or leases; and everyone that has a grant or a license or a lenas of a water powor in that country te protected.

Now, the next point that I wish to deal with is a statement by my learned friend from Bonavista, again in relation to myself. He says: "Then, again, I have this fault to find with the Promier's speech, that you may search it from end to end and find no warning, no adequate warning, to the peopte of thie country as to what they are culled upon to amerender. The Promiter never told us that we are calted upon to surrender the right of taxing the capital, dividends and mortgages of this Company as the capital, dividends and mortgages of every other Company doing business in the Colony are taxed. I think you will look in vain to find any statement whatever in hts speech that they are
free from municipal taxation." Now, I would be glad to know if that is a correct report? Because if it is, he could not have read my speech.

MR. MORINE.-No, 1 did not read it. I heard you.

RT. HON. PRIME MINISTER.-BUT you had a copy of my speech before you mate yours.

MR. MORINE.-Yes.
RT. HON. PRIME MINISTER.Now, nothing could be plainer or ctearer than the official report of my spereh, which containg a summary of the Contract. Section 6 of page 2 says: "The Company's property shall be freo from municipal taxation. The stocks of the Company are also free from taxation. Construction material and machinery will be admitted duty free." It is barely possible that I may not have used those exact words when apeaking here, because there wore intorruptions on that occasion which to some extent disarranged my notes. And then Mr. Morine went on to say: "But there is no attempt whatever to point out that this was a freedom from munlcipal taxation, and not only with regard to the main objects of the resolutions and the agreement, or the thain objects covered by the resolution. . . . ." As a matter of fact, this Company is only on all fours with other Companiea. My learned friend in his speech drew attention to the exemption of the Harmsworth Company: but he forgot to say that all their lands and all their mills and buildings are exempt from munielpal faxation for ever. The twenty-year clause which he unfairly quoted mereiy applies to the importation of construction material it was never claimed by me, in litroducing these resolutions, that we would support and uphold some of the clauses which are in this eoritract and to whifh objection has been takent; if we were dealing with these matters in the State of New

York, or in Loadon, or even in Ontario, which has been raferred to: but we have to give special considaration and spectal advantages to compantes to bring them here in order to develop our resources. I remember in 1905 , when the hon member on the other side was in Opposition, and when Sir Robert Bond brought down the Harmsworth contract, he proposed 22 umendments to that Contract, and my triend Mr . Kent, and Dr. Lloyd and Mr. Clift and Mr. Clapp and others who are now on the other side had to vote againgt them.

DR. LLOYD-I beg your pardon I ubtained some amendments myself.

RT. HON. PRIME MINISTER.Where?

DR. LLOYD. - In connection with the Harmeworth Bill.

RT. HON. PRIME MINISTER.-LI the Upper House.

DR. LLOYD.-No, in thts House.
RT. HON. PRIME MINISTER.There were no amendments made in this House.
MR. KENT:- beg your pardon. Amendments were made atter the B1II was introduced.
RT. HON. PRIME MINISTERHowever, anyone who will liok af the Journal of the Howe for that year will find that my hon. rriend, Mr. Morthe, Introduced twenty-two amendments, which were voted against by our party to a man, Now, I don't want to say that these amendments were not alright, if we could have land thom, but the parties with whom we were contracting at the time would not accept them. Their answer was: It. will be impossible for us to get a tollar out for the propaeition in Lon: don if these amendments are accepted. I say here now that there wres hardly one of the amendments whitch wore proposed on that occasion that would not have been an improvement to the Harmsworth Contract (they
were unosuly in relation to publin efighte): but the Harmaworths took the position that umless we were prepared to grant them an extraordinary hind unusual measure of control over their lande they would not come here: arill we had to grant them what they abledi. No one woult think for a moimoat that Sir Robert Bond and tho thirty men who were behind him on that occaston-because there wero only four, or at most tive, who voted for Mr. Morine's amendments-would have voted na in solld body againat thone amondments if they could have preti plated in the Contruct As a matter of fact, when the Bill weat to the Upper House a great many of thom were pat in, and thoy wore on fm provement and after a Ereat deal of difficulty Sir Robert Bond got the contractor's represontative, Mr. Beeton, who was here at the time, to agree to them. As far as the Contract now bofore the Houso is concerned, some people may think it was merely a rantter of the promoters coming and sakling for the proposed concessions; fint it bus taken rearly a year to regotiate this ConitrneL The Bxecu tive Governmant have had not one tuenting. bit tweity in relation to it. and have gone over every paragraph ind overy tine of it.

MR. COAKER.-ft may tale twenty thore.

RT. HON, PRIME MINISTER.-It taky, and it might be time very well spent.

My learned friend, the han. mem. ber for Bonavista. deslenated this as "the moat lufamous concract that was over brought before the House; and while he was apeaking I was wondering where I had last heard that phrases and then I remembered that it was the plrise used by the present Chirel Juative in relation to the contract that be fithered himeelf and
that I supported namely-the ' 28 Contract. If you will look at the debates of that seaston and read Mr. Morine's very intereating speech in its defence, you will find that he sald that it was not nin "infamous contract." In tiry opinlon it was a good contract; to-day, after elikhteen or twenty yeara experience, I think it was the beat contruet that ever passed thils. House; but it contatas all the objectionable foatures that my friend is: argulag against so strongly to-day. It providod freedom for ever from taxation for the dock, right here in the city of St John's. The doek was not an industry which had to be developed. It was something which was there. It might have been fair then to say to Mr. Reld: Well, pay the Municipality Bomething: you ure going to have fire 1Fotection for your dock; you are going to have water and sowerage for your doek. Give them a few dollara Who overy other firm in SL. John's. This is not like an industry out in the woods, something that has got to be developed; hore you have got an actual bustness that has cost the colony $\$ 650,000$. But no. that dock is exempt from Munictpal taxation for over. Why? Because Mr. Reld to whom we sold it would not take it ntsder any other conditions. If you don't put that in there, be sald, some disy we may be taxed out of existence: we will be in the hands of any 3runsofpality who may like to put on any spectar rate they ilice. That is the reason. It is not the five or ten or the hundred dollars a year that they would have to pay, but under the law today, of tuiter a law which might be passed, thes conld be taxed out of oxfstence. For that reason my fricnd on the other sfle sald: The dock will be free from taxation for ever. And I agree with him. Under the circumstances no man would buy the doek

If he lener that he would be in the hands of the Municyality. But that was not the only thing In the '98 Contract which was free from taxaton. We sold Reid the rallway-not enly leased it to him for fifty years but sold the reversion to him. And fluit raflway, and everything on it find in connection with it, is free from taxition for ever. All hls rolling stock and lis truldings, and his stations, and everything in connection with thie rallway is free from taxation for ever. And thls is the very thing that by learned friend pleaded so ntrongly agminst the other day in relation to these people who are zolng out into the wild woods to try and establish an industry. Then we aold Reld the telegraphs.

MR. MORINE-We only leased hlm those.

RT, HON. PRIME MINISTERAre you qulte sure?
MR. MORINE-Yes, for thirty
yearb.

RT. HON. PRIME MINISTER.Well. look and sce, 1 think we sold them.

MR. MORINE-Without looking ot It lat me tell you. We gave thom bermiesion to buy afterwarde if they Whined, and they never exercleed it.

AT. HON. PRIME MINISTER. That is putting it another way. They malaht have exercised it. and would have exercised it but they were taken hack from them during the period the option exlated. That is one of those fubtle diatinctions that won't go down My point is this:. That wo sold the Moid Company aur telegraph these and the bulldinga and everything in connection with the teleeraphs, free for ever from munleipal taxation.

And then we exempted thetr Ifmis untll they were improved. They tre exempt for ever untll improved.

Once they are improved then they are taxable. So that under the Retd Cottract of 1898, of "which I may way my frlend was a great part, although he did not draw it up we gave treedom from taxation, and I say that there tever was a better contract passed it Newfoundland, not on aecount of the small alde-fasues, but for the mere fact that we got ctear of the operatton of the rallroad, and we got clear of $\$ 500$. 000 a year, that would have been our loss as a Government on that operatlon. It wail becaune of that that I say it was a good contract, as well as for the other matters thereln contatned. But it was a contract that very tew agreed with, and there are people todvy who do not agree with it. And I think my friend will be glad to know that during his temporary absence from the Colony, I stood here almost ulone in dofence of it. But that was not aft that was done in relation to the Contract ot 1898 , for when Str Robert Fhond in 1901 undertook to amend it, he nuver made any attempt to remove the provision granting freedom from axation, but weat one step further and fncorporated the Reld-Nnid, Company and gave them the right to asstgn thelr contract, and passed a section freolag from taxation forever ail the atocks, bonder and debentures of the Company. And to hear my friend the other evening one would fancy that this that novar been cone betore, and thist there never wis a contract in the warid or fo miny Britten Colony In which there was such a clause Let me be understood on thls matter, 1 to not menn to bay that any one of these concenstons in the contract of 1898 could have been lett out. I know suoush of negotiations to know that most of them must have been very objectionable to the men who, on be hall of the Colony, negotlated the contract, but it was the beat they could do. It was the same with the A.N.D.

Company contract. If the House to intereeted in the amendments proposed tiy my learned frlend, Mr. Morine, on that occoslon. they will find on readtug them that every one of the 28 proposed by him were in the intereats of the Colony and they were voted down, bectuee the men of the Government elde led by Sir Robert Bond knew that no better contract could be made. It was $n 0$ endorament of these prfsciples which in themiselves were obfectionable, but they had to be measurcd not by their objectionable char acter, but by their eurroundings, What would be wrong in New York would bo alright In Greentani, a Hetlo better In Labrador, and still better in Newfoundtand. The great trouble has boen this, that we have beob assceeing our natural resources too high and driving everyone awny, and unfortunately up to the present, with the excoption of the Hirmsworth enterprise shd the Bell Teland Mines, we have very fittle induatrial operation in the country. It was clalmed by my learned friend, the leader of the OpposiHoft, and by Mr. Morino, that that freedom from taxation applied not alone to the mills and dams and property of this Company at Bsy of Talands and on Labrador in relation to the partice lar worls of the Corporation, but that Wherever thing ctirried on any buslness. no matter of what description, in any part of the country, they would te exempted from taxation. Well, now, nll I can say in this, that any reasonnole construction and perusal of the eft will convince any lawyer that that axemption is limited to the Industry mentioned in the act. My hon rriend, Mr. Kent, will urree with me that there never was an act yet that could tot be criticlaed. A grent leelstator hala nald that he could drive a coach nad four through any Aet of Parlin. ment that was passed It ta only a question of opinion. You could get

RT. HON. THE PAIME MINISTER -Yen and contracte without vilh-
 polst out the dastinction between the perminting of eonstruetion materiat to tury true what the thime tir retirtive to tranation. My frimed Mr. Morfiee referred in his retuarla to the tact that the Harmeworthe were tiar thed th twaty frart in remirtar the sidniteston of material for cobitructhin duty tree That is nut tmportant at all heramse toitay if anyone. antiud ili bo ptace of thin suanife Dook a purnaunent taw saying that

Ivery barrel of evencot amil overy Bith at macbloery for cobstruction pargoe 6n shoold come is daty free is there fay mombor of this House who is gotas to vote acainst it! Does bot ftery barrel of cemest meas laboar! Does sot every hilt of new machinery mean labour. What livw could you hare better than a menernal law say: lise that every mata who spetili a dotlar in concreto abeuld be allowed to bave ble thaterial in duty free. There whis no watalerful concosalon to Harmirworth to allow hifi miaterlat for conatruction duty free. What are we detus limet We are memely allowias penatruction meterina to come fo duis true. It is not to repers any old trallalises or machinery, but merely for sew huldisim. Dees the Hount treas to oblect to that? We are not bemimins entatrumtion material for the purpose of replacing old or wors pat machinery or belliliges, but mere Iy for the berw hultilings for orlgtal frntalment. Is thery any objection to thatt if sou reorat that as an wninspartant conceselan why net grant it? if in limportiont to them in friting fineir money. it if unimiportant to wis. 1 wouhb sliow in all machinury for Ftely a thurpoed duty free for aver and for evor. it may be objected that In a hundred yoars we may ber makitus melinery hure 飾y natawer to that II that when these days come, it they ere mhis to get the mackisury in the country they will nat he fmporting it Thare it mo riak whatever. No man f. golisy to import machtsery of coment if be coold got it in the coantry And virery bit of cement and frey hit of machlecry that comens lop*. the Cology mmans as merli labour.

The freedoss trom munlelpal taxation we kave to feld and wo gave to jiarmsworth. We care it to Harmstorth willits the whole area and we can nevar tar thom one dollar. And
my learned friend in his remarks made it appear that we had only granted thils to the Harmeworths for twenty years. 1 do not say that he did it futentionally, but nome the less he sald it. And yet these contracts can be summed up in one or two words. They wore the best contracts that could have been made. The Contract of 1898 was the very besit that could hive been made and so was the Harmsworth contract.

The contract made by Sir Robert Bond was the best that could have been got. and what has been the reault? I think that those who lave any knowledge of the operations of the Harmsworths and the Albert Reed Co, know what they have got to contend with, the expenses they are under in tryiag to set paper out of that country between December and June, know the losies thoy have sustained, and what they are up against in connection with other mills all over the world; and I don't think that any falr mind, under the eircumstances. will say that the concessions which we gave them were excesaive. Now, here you have an industry about to be started at Bay ot Islands. Well, we who live in this country know that that port is practically closed between January and May, and It will mens a very large expenditure to get their produce taken out by rall; and then we know the condtlons which spply down on the Labredor.

Then my rilend Mr. Morline went on to say: "By way of showtng that the Premfer does not understand this agreement fand if he does not, it follows that his government does not untherstand (t), 1 mean to read some oxtracts from his speech"; and then he went on in refereace to the mancy to be spent "I assume that thls misteading statement was not detlierately mblaleading. I do the Premior
the justice to suppose that he would not in thils House attempt to mislead." And then be referred to the five millHion dollars to be apent at Bay of Is-lands-the sdditional five millions which it is optional with the Company to spend elther in Latirador or Bay of Islands. Now, as a matter of fact the words giving the Company the option to spend that five millions on the Labrador wore put into tho contract at our request in order to make it alisolutely certain that before a grant would tssue there woutd be an expenditure of five million dellars down there: and to show the bona fidea of it. the company are prepared to strike out the words "Or itg Depenfiencies," and let the whole ten miltons be spent at Bay of Tslands, fo addition to the ten milifons on Labrador. When they first came to us they propiozed to spend-ten millione over at Bay of Inlands, but we sug. gested that five millions be spent at Bay of tstands and five milltons at Labrador, and then afterwards tea millifors at Labrador. My friend referrod to my atatement as a "most glartag insceuracy." Now, whet I grated was this: "That that additional five million would be spent in Newfoundland. It was optlonal with them to espend it elther at Bay of Telands or Labrador, and it was in that sense in which I used it, it was not my Inteation to mislead, nor was it a claring error.
Then my friend went on to say: WWe are, granting a large number of frinchises that will be tremendonsly troublesome to the Colony by and by.

There is nothing to prevent the tharpholters of the Corporation sellling out at any time, nor the corporadion iteelf selling out." That is true of aurry company: if le true of the firmawortha and the Relds and every company in this country or in any
other country. You are not golng tohere because with the exeeption of get any corporation to agree to any-the limestone and the wator power thing different.

Then my friend went on to say, speaking of the water powers: "We have probably on the Northwest and Hamiliton Rtvers one of the greatest water powers in British North Ameri$\mathrm{ca}_{\text {- }}$ and perhaps the only free water powor at present on the continent, and you propose to band that over without a dollar compensation." Now. is that a correct report? "You propose to hand that over," he Bays, "without a collar compensation, without a single attempt to assess lis value, without advertising it through the world and asling for bide upon it, without attempting to turr this great asset finto money for the discharge of the public debt of the Colony."

I say we are not handing it over without a doller compensation. Before they will have any interest in it they have got to spend $\$ 10,000,000$ in Labrador and an rddittonat $\$ 5,000,000$ in Newfoundland. When they have spent that they can hand it to anyone they ifke. It is ridicuious, and absurd and ronsensteal to ask any intelligent body of men to belleve that a company is going down on Hamilton River to spend ten million dollars, and then scouttle out of the country and never do anything else. If they go down there and spend that ton milliton dollara, 1 think we can be perfectly sate In belloving that they will contline the induetry. We have been tallding about the Hamitton Fiver and the Northwest River and the Humber River and all the other rivers, and with the excoption of the Exploits, which has been harnassed and utilized by a great cantain of industry in the person of Lord Northelifte, nothing has ever come from these great water powera. It may be salli. If you will only walt: If you will only advertise. But the industry under cosadderation is one which has practically boon brought there is nothing else here. The phoaphate rock has to be brought from Flurila, the pyrites from Spaln, the coal from Sydney; and all those artheles might be assembled somewhere flae with equal advantage to those who have money to put into such an fadustry Here we have got a chance. We are not givigg away the whole of the water powers down on the Hamllton Intet or the Hamilton Piver or on the Northweat River, but only one power. That is all we are doing Up to the present time not a stick of wood is beling cut down there. Now, here is an opportunity, if you inke, to advertise the country as it has never been advertised before, If this la a success, well, then, be as conservative as, you like with what remainswith the millions of horse power that tany be developed in connectlon with the Grind Falls of the Hamilton. This is not an attempt to give nway the Grand Falls or the waters-either above it or below it-it merely is the water powor of the Muskrat Falle; and even that is not given, becnuse the Compuny has an option on another river there I have beard people bay what a wonderful thing it would have heen for Newfoundland if we had never given the mines on Bell Island away; we would have been able to go to the London Market and sell them for twenty or thirty millions and pay off the public debt. Well, Bell Ioland is practically closed dowa to-day, but that is on aecount of exceptional elrcumstances. But even before the war commenced the men were practically pald off and the mines practically shut down The same was sald about Tilt Dove and Beti's Cove and LaMancl: and every other mine, and where aro they to-dny? You have got to encour age and asslst people who are golng fito a venture surrounding which there fo a great deal of uncertainty, It fa
not the mere panalige of this Act; it to not the mere granting of theso conecsatonit it to whion thece fieopte gd to New York and London or wherever they are geing to look for the money that the real dimeulty will be encountered. Before those who tave the moner will put a dollar into this they will want to make certain that the induatry is il permaneit one, and ens: not be affocted by anything that ming happen in the world. Thls contract means the development of a water Dowerat Bay of latande costing seven million dollars, und then in addition to that soven or eight milions more witt have to be apent in concrento and tuttangin and machtrery and wharves and piers. Por what? To manutacture a tertilizer. The men with that patent cmin go to thero peopte anil say: Now here ts is good thing; we lase the water power: here is what the product from this industry will cost to produce: and bere is the market, Aad that looks very attractive. But the man who is being aeked to put blas money into it maly say: Woll, but it may toot be wrell entablisthed betore some other fertlizer discovery will be batie whieh will knock that whole ftrdustry ifty Hive we not seen it over and over agath. Wly, one of the Cears to-lay of those who put thetr thotiny into the manufacture of paper from putpuocit is that some tiay the millions of tonil of straw that now have to be barnt an the prairies may be cotrverted fato papen Those peopte Thll go ovor thitr thing, over every word of it. They will examine it secthon for mection, they will examine the possibilties of the enterprise, and the fuctintioni mid aceftents which may affect it; and it is for this reason that se haye sut to gife them-concessions whith gre exceptional and extraordis: ary and unusual to make it attractive. We bave done it in evary cage, and we will have to contiane to do it. Er-
esy country bas to do it. I mentioned here some time ngo what was done In relation to tho Anglo Amurican Tolegraph Co. Some person may say: Oh, that was fifty yars ago: conditfons bave altered since the days of the Anglo. Well, we gave them a monopoly for fifty years and a franchlse for ever, with freedom of taxation on flutiable goods coming in for their worki for ever. Bight up through the yeans we liave had to give fimilar concesalons to people coming in hers. What did Sir Ambroes shea. the late A. W, Harvey, Mr. Peter Tes*ler, the lite Sir Joseph Little, Mr. E. G. Kent and others kive the proruoters of the Blackuan Company in 1882. Look at thetr charter and see what was given them, and you will find, Mr. Chairman, that they were given concessions ns regards freedom from taxntion. If ever there was a
in who abhorrod monopolies it wan Sir Robert Hond, and he found it frecessary to give the same concesfrons to the Refl Newfoundland Co. when he lncorporated them in 1901. And we have got to keop that vefore da. You cat go on talling about our freat naturat resourcos, but nothing *ill ever come of them, except to form the subject of an article for a Thrlstuas Number You have got to utilize them if they are to be of any value to the country, and in order to get them started you lave got to five some concessions
-Now a great Jeal was said in relation to the East Coast, and one of the objections made by all the speakers was that as regards the Bast Coast we wero giving too mach, and were tikely to interfere with the established Industries there. WeIl it will probably be news to the Commitice when I say that the promoters did not ask for that griginally. It found a place in the Mill tecraume it was considered that it. would be a great adractage to every
person who hidd a land interest in that country, developed or undeveloped, Under the contract nothing whatover is given away-not a drop of water nor a stick of wood, and the whole nolse that has been made about it is trarely is storm in a teapot, nothing more. It te a vory good argument, of eourse from an Opposition stamipoint? but 1 say here, now, that that section Was but theo the contract tin order that those who may be interested in that country might some day be ahle to avail of the advantazes of this contract. In other wordse, when this industry had got strirted at Bay of Is lamis, and the people there were recelvins the blessimes and advantares of the contract, that othera might be able to participate in it in other parts of the country. Nothing is taken from anyone. There is no application here for a grant of a water power or a tease or a Heense of a water power in that aren. The Contract merely bays that it the Company at any time withiti twenty-one years valldly acquiree a water power, then the provistons of the contract as regarde exempthon from duty, free importation of materiat for milts, etc. and the other sdrantages, will apply. We have had potitions and letters road here, in relaton to people who may or may not be affected by such an agreement If find no fanlt with anyone whe may have property situated in that aelghbourhinot comitng here to thets House or tahing any other logltimate means to protect their interesta: but before ever there whe a petition presobted here, or therore ever there was a word sald in this House in relation to this
reement, I conveyed to those who were intorested the assurance that there was no destre whatever to interfero with anyone who had interests in that comntry; and to show our bona fides in that respoct, I will propose to the Committee to withdraw that whole
arta from the contract. IL was, I re peat, not in the orieinal proposal, and पas forced on these contractors. They yover aslimed for it untll it was sugkested to them that that part of the country mighit sotae day be able to Buvall of the advantoges of the contrict.
Now, the unfortunate thilng about Fiewfondland today is this: That our fridustres nome of them-are not jinying, and instead of being an advertisement to the combtry they berve as a hlack wye and keep capital out. What we want to do, if we can, io to put our great puip and paper indurcrles on a paying basts, help them in wery way so that they will serve an in aitvertsoment to the country and thot kcoup capital out. it would serve in purpose tiere today for me to deal with the results of these sreat operathons for the laat five years; anyone flat wants to can find the resulta for himberte from the pubtistied reports; liut I may here today with all salnegs and regret that a great deal has to tiappen yet in Nowfoundland in relation to these industries before you will find other people coming in and eatabHiohing on the same basis. It was stat ed, when Sir Robert Bond brought Fwh the Harmaworth agreement, that we were giving away the whole country nad that aobody would afterwards be able to live in it
We have been hugging our natural resourcen to our breast ton tong, and have never uthlized thein. We have ulvays placed too hish a value upon them. That was the trouble with Jok eph Chamberlatn, and that was why he wan Iod into the mistake in his opinion of the 98 centract. Ho was thinktug of landon. He was thiniring of Hyde Park and St. James' Park, where he walked etery day on hits way to the office, whon he placed an eatimzite on our lands. But if he had fourneyed from Fort aux Basques to St. John's ho woutd hare formed a difterent opiniou an to the value of the
tande along that road. This sopblistry and notamame is all very well for Chambers whern people are not atfect at by traven, thet what we went here are facta and walld areament, and it we cannot bring is any ceathat, then do not let us drive it out. We have lands and water powers, but net any hedtur than ather countries it repent that under the pravialions ot that actee mocat to day there is mat a aolltary itstercet an for as Lart Northelifen and his brothers are coneerned, that will te affocted have emt a eopy of the acrocmuat to Dren, whe whed them to suhmite it to thetr Solictlar in Lendias. and I have no doubt whatever as to what that upinien will be My leamed friend wes trylug winh that eliversens for which he is rimurtalle suvectuly when be to trging to conviace the min on the ather sitio af the Howis and koep streas the falth of these that are with him, Ae was tring to hy atras on an argument made by the Leater If the Opmaition that there ought to be threes cuntraits finatend of une And ve wern told that it wan wo maned up that aether zols, askels sor man coutd understand it. What about the 38 emetract flow many contracts gucht there to have been there' If ther contruct ealle for three thes I thank the 35 contract ahosld have called for 22. Dutt the *hole differnace to this: Anythine propoend on thite wife of the Honse is triatind on the prinelple that nothing gond can come ust of Stas areth. In thn 3 enntruct there wan the contract for the nperation of the railway for nifty years and all sections fneldeatal to that. Then we hat a costract to connection with the wele of the meverilon. Than there was the contrart in relation to the handing ever of the coal arens and the workthis of theso areas, and all the minuthen necesuary to mith a contract. Then we haid a contract in connection with the etectric trimiwny. Thien there wis
a contract in relatloan to the doek Then theer was a costract in relation to the priblie hande a contract in relartoin tow the ahlueraph lines and a contract to relatiot to Anselk. Then there If a grant of water powens at Petty Harbour that were ant given soder the लirimal costract. Thim there was the taviat of Weier St and a Latan Act. All these vern millel tato obe But Lur we have a oostract hetory ins in Whicil there am tra pocincipal mectiens, the flimt twa. The limpritunt poleta of ther matract ure contlinim to these tre wections. Thr other mections ars numly futalls, important, If goo llike. tome of them. lat this nTgumest in made merely for the parpone at max isix a potur soinat this silde of the Hoase and is bot surtioatly put forEari. Thike the costract is it stands Tho finst nection in a smant of a satior Piver and the riebt to mequite farther satar powern. That ir all. Thers is sothing elie in that enetice. Therv fo as anast of a water power at hay of tolande and in the Hamultion fales, and A rikht for twints ine yers to acculre grher water powers in the arm luld down. It would be tripomitble to have a cumtract nimples. Thes we po on to the escond metion. Thast is exmptr emneseted vith the expenflum of maser in relartion to the dievelopment of thene powers. That is tho whole enatract in relation to Bay, of Batends Itamiltin Inlet and the Eant Cosast. Twen nections The thitrd wection refers to ste mupply af electrical pown to ethint bruperity aspers on Labradar. The fourth to the aunkenaches of patembe.

some very interaiting information in ribline to the muter powers of Cmagits perinelpolly Ontario. But the val the of a witur powner not the coost of Aevilopment, sme the price at which 1 can be trawed or sold le a parely olistive matier. it depends upen ithe
 thiliy of tothes tetilien, And in ens-
 ti contrure, ke meat bear in mind tuin thine watar poesen are tar awsy Bue costres of popitation, 1 am pre pernd to aterit that etectricity is bot thie ofber saniural resorirese, in that Hi may be vitiliod ais a rewnue eans. Ine power and a latour prodaring meGum, ores whes far nemored from folimethon and propzitlon, but an a Tile, 1 thitak, the princelple can be latid Quns that the value of seveloped eloctricity, its seliting value, depends ypmon ith nearnoss to large centres of popiatation 1 qualify that by maying that in Norsay or en Labrador and it vertiotas of the world where there We: net laten ceratris of popalation, गु: mas be able to catallink an is. 4-atry and indice limbourens to 80 dyy there and lure Tos may be alle to tempt tbe labourer to me feto a mem mentrobiten coumtries but you tave act the mane ndrantages as goo have when bear larke centres of popWintion. Ilike in the State of New Yerk of It the Prorimess of Canide You thian the devalopment af Hawilion to. inc. Ther finst problem that sow are 7) apetrat to the srollens of labour. Yew are aot zning to spaced s.000.00n - Hamilion Iolet without your firnt - oline that you ean derelop an to 4uatry that will ecrploy 4,060 or 8,000 men. You do not meed any report from an ensiteeer on that polat. 1 Bink ve can swoume that if they oxFhit the num of mionocone in the dewituptuont if that water powar on the Homilton sad til the conatruction
works, they will need a very large buminess to make it pay and it will necessitate the employment of thaus aude of men. You know very woll that you eannot get thousiands of people to go and live at Hamition Inlet, as easity as you can get them to so to work on worls in the Province of Ontarlo. My friend, Dr. Wloyd, rend from the Report of the Commtation on Connervation of the patural pesources of Canada, and gave us considerable data in relation to Ontarke, but it is aasy to get men to go into these warko because the conditions of life are easy. The labourer of today wanter to bie cared woll for and looked after. But when he goee down to Labrador and geee that he will be cut off practi-ally from November to May, you linve to hole out to hifm eront indutements. That is the labour element. Then there is the elomat of shipping from there. I would not go so far as to say that you could not shilp from there if you diad the proper shlps. Perhapis if you take one your with unother yoik will be able to ahip all the year round, with perhaps in occantonal holed up for a mouth or so. But to all pricHeal purposes the Lathrador is siosed

MR. LLOYD-ATe they going to make it a shlppine port?

RT, HON. THE PRIME MINISTER -Well I could not say detinitely. It may be that the electrical pawer is golng to be brought down from thare. I am only pointing ont the difficulties. 1 am not haying it down ns a fuet but If they do shlp from there, it will tor particularly expenslve. Even if they transmit the electricity there will bo conatiderable expenie. EWatyons lenows the great yoss there is in transmission of electrieity. I am cnly potnting out the difficulties. I want to show the drawbacks in doing anything in the way of development it a place the Hamiton inlet 1 do not
care whether it fe fertilizer or pulp or minernles, It is all the same. There ure great difficulties and you have to bicit out |freat taducaments. And if thla indualry materlallies it will afve Hi kreit impectus to the development of talirulor even if it deea not come in our time.

My learned friend, the other day, made in glowing peroration in rela. tlon to the dangers of takfug sway our people fromis the fisberies, and an 1 ifatened to his burning words 1 was thiriling of the very opposite arkt ment that he put up in 1898, when he teld we that the only hope for the fishermen of this coumtry was the laboy foresiadawed by the tis contract, but he was not on the opposltion slde then. And now we are comthittime a crlme becruse we are cre: nutng an fndustry that is going to take away the people from the fisheries. Well, I have several answers to that. In the first place, if the fisheries are more lucrative, if the people can earn more monoy at thom thon they will rit work for this concern, they will nint leave the fishorles. They will talay whree they are. But do you know thint the average family in Nowfoundland to-day is not earning $\$ 400$ a year, and the average earntngs of a Eamily in the wery next Province to us-Nova Scotin is ahont $\$ 1000$,ant fo you not think that it ts time we did something to create some industrtes is adaition to the fisherios, in ordar to give our peopile an opportansis to tive, and provide themselvea and their familles with some of the comforts land decencies of life. $\$ 400 . a$ rear la only a atarvation wage, par ticularly when wa remember that ono. third of thit gous into the revenue to keep up the rmblic services of the country. Our peoplo won't leave the Hehery, unleas thiey are better pald. In the days of the Harmeworth contraet

It was pointed out that the mills would be run by Chinese labor, as my friend Mr. Kent quoted the other day in reletion to this contract But he forgot the head-tax - he forgot that every Chinaman that comes in has to pay 3300 , which in itaelf would be a very consfacrable revenue. If they did come here. But he need have no fear. If these industries do go on there are thousands of our own people that are at present working unfer ground in the m'ees of Nova Scotia that are longling and plning to come back to their uwn country. Why, there are more Newfoundlanders to-day in the State of Massachusetts than there are in St. John's. Go to Forryland, go to Fortune Bay, go to Placentis and St. Mary's, and ask them why the pop. ulation of these and other districts are at at stand still and have not increased. The people have been driv en from the country so that they might earn enough to support their ramiliea. Take the losaes out of Glow conter. Is there ever a vessel comes in with her flag half-mast that does not tell the story or the dieath of some Newfoundlander. These the people that have been driven out of the country, are those whom we want buck to work in the mines of Bay of Islands and in the mille there and down on the Labrador. There are four thous: and peopte to-day tring down on Labrator, Aritish subjects, under the farfsitction of Newfoundiand, that have to leave their homes every winter and trek into the woods in order to get fuel to burs; they live in a hut or a tilt that no one in thls House or within sound of my volce would live in; they have got to ltve In the woods for elght months of the year, without any of the civilising influences of the easy and pleasant conditlons of life. Does anyone know whit that meang? Every man on the

Lubrador has to take his wife and children and make an annunl trek into where he can get a blt of fuel free for the winter, and return, Hke the swallows, in the spring to the home he thas abandoned on the coast. You can get a thousand men to-day living down there for these works. I have been on the Latirador. 1 am not ns well nequainted with it as some of the members of this Honse who have been there, but I know the conditions down there. They have wintar from December to May; they have none of the comforts of life; there is nowhere for thern to $\mathrm{g}_{\mathrm{o}}$ elther in the right or in the day. Now, these nre nome of the people that we hope to give employment to th the Hamilton industries; we hope to take them out of the huts in which they now exist, and put them in good homes, clean homes, and happy homes. There are $n$ thousand mon. members of one thousand familice, who are onty waiting for the call-men who don't nveruge $\$ 200$ a year. I know what 1 am upeaking about. There is nat a year that we have not to send down thoutands of dollars worth of poor rellef to the Laibrador ith order to keep the people from starving, because of the falture of the fisheries down there in fpots, no matter how industrions the pooplo are. So that we call get all the labor we want from the men liv. ipg down on tho Latirador, from our own peotote in Newfoundland who are fale hilf the year round and from New. foumdanders abroan who will retirn. Instead of carning three hundred dolHars a your thoy will be earning eeven or atght hundred or a thousand; and then you will begin to appreciste the Fatue of a great developtag industrial interprian like we are contemplating
To want to keep our people home that hre now being driven out of the counHy; we want to do something for thome who live it remote parts of the
-ountry and who cannot got labor, My flond, Mr Kent, pointed out that there was aothing in this bill as regards .0. wagea to bo paid. My answer to that is that there is no nexd, because the price of labor to-day both at Bell Island, Grand Falle and here in St. John's has made it Impossible for any company or any concert to go back to the daye whon men were paid starvation wages. If these worles go on. they will have to pay a good dally wage for their labor. Another argament that was made was that we were doing wrong in giving this company n option for five years to examine the water powers In the Labrador: Well, you can get no industrial concern to do business with you unleas you cive them an option-unless you say: We will withhold grants whlle you are making your survey. It may be that hundreds of thousands of dollars may have to be spent to survey the Hamilton River before derliling on the water power to be selected. It is not llke the Waterford Bridge River or Rennte's River. I am informed by the promoters of the present company that up to date they have spent $\$ 100$. 900 in relation to surveys. in relation to working out this industrial concern in ordar to put it before capitalists. We have got to try and realize that fien they go to New York with this undertaking they will have to pass the gauntlet of a dozen experts, min. lag experts, engineering experts, fertilizer experts, financtal experts, and all the ether kinds of experts. You don't get Eifteen or twenty million by meroly golng and asking for it. You have got to convince theae people beyond the possibility of a doubt, and if the contract dild not give them an option for flve years, as soon as they went to New York this would be pointed out.

Now. Mr. Chairman, one or two words in relation to the people with
timber aress in the Humbor area. Mr. Morine pofnted out: "If the owners or these lands were hera to say that they assented to that, that it had been agreed upon, then there would be some justification; but while a man who holds a aingle acre of land over there objects, what right have you to take away from him all the great natural common powers which he has over the streams and lakes-what right have you to hand them all over to the Com pany and say: Squeeze the life out of him" Well, if that doctrine were once admitted, you could never develop a water power in Newfoundland. If you have cot to wait untll every man with an acre of land agrees, you would never in this world or the next devolop a wnter power or an industry.
We carnat go beyond what is stated fin the contract, and which $f$ submit inclutes and embraces and protectis every possible right, every lease, incense and grant. There may be people in that area who have land; they have been trying year after year, some of them, to do something, but they have never been able to do anything. and indfldually they never will he able to do anything. It is very guestionable if any one of them to-morrow, even If there wero a water power developed there, would be able to use it.

And then my learned friend went on to point out that a further reason for not passing the contract was that the company was going to make millions. In other worde, that the expenditure in the country was going to be so large that the return would he milHons. "We were told some time ago," the said, "that a similar corporation in the United States had watered its atock over and over again and on that watered stock were paying a 10 per cent. dividend, and this concern is expected to be more valuable than anything olther in Canada or the United States',
1 don't know whether my frlend has
any faside information, hat it in hast be statee is correct thun. I say mat that in the wisy stronzeat argumerat that bas

At 100 p.m. the Chairman left the chair antil 8 a'elock.

The Chairman reanmed the chair at \% p .in.

RT, HON, THE PRIME MINISTEA. - Mtr. Chalrman, betore recess I dealt ath meveral ohfoctions ralsed by the zemburs on the other side in regard t. this centract ant I hopen mate clear to the Commiltee that they were \&ll shatown Athmas out of an over gaxthty on thair part to protect the gablie riehta That is a mont com:foritalite rpirit eas the part of a legte I rime whither the spewern be is the 1 pporition or ten the Government side I look of il an my learued trivad, the a aiter of the Opposition colked at is f. hls eponing rumarke, when he mald *iat wn wure makins a large sontract. simums laras conceazlons, and wn dhowid look int mech a matter as tras tess for then putille. That in in very troper rpirit maid that is tho aptrit in which I hope and feel that every one
will appronels the dhecusiston of thris contruch. We are here to guard the intereass of the whote pubtic, to suard the interesta of the people of the whale country, Theme intereste aro very wide and vory extensive tut we must not forget ulso that we are not here to guird the fnterests of a few lnnd grabbers, that we are here to gunard the titeresta of the whole puble. We must separate these two. We must guart the taterests of the public in such a way an to gecure every member of the communtty whether he be the poor man who never hat a grant, whe never had an application for a timber lease or Heenife for water powers or for utiyttifng else. or whether ho the the individual that lives on speculation, whose lands are never off the publte lands and water powers, preventing overyone from developfing them. In this communitv to-day, and not alone here but everywhere, that individual is prominemt and you never attamp' ta develop any pubtic work but the lant grabher and speculator bobs up amrasely and you always find him in the way when you are coing to do anything. He tha nothing He never hat mything und ho lives by following In the train of those who are doing something Protect the publla by atl mearie and you will be quite certaln that men on both sliden of this House will vie with each other in making thint protection as offective as possible and murround these concesstons with overy possible safegmarl, I sidd before recess that ini resard to the sevcral pointa raleed by my friends on the other aftete 1 was prepared to place eyen $y$ one of them beyond all possible toult anth athough I tio not ardmit that the Contraut was capable of the cons ntructhon placed upon it fy theim, 1 was prepared bofore the Committee reported ta propose awch ameadments as We comeltered necessary, There are three chames in the bff to refation to the exemption from taxation. Finst in
relation to the stocks and debontures. 1 pointed out that that concerston, atthough they considered it important we had fiven to other compantes. find it shas a concesaton shifch was Tory important to them in raising their money. The next exemption was An relation to the impertation of their ronstrucilon material. There is no che in Newfoundland to-night who vishes to see rapid development in Newfoundlund, who would object to futting a lirw on the Stutute Boole for fill now machtanery to ocme in duty free and all conatruction muterial, esfincially such as we have not in the bountry, and exeept for woont I do not lnow of anything elso if that way that we have in the case of the Farmbworths there was n limitation of twenty years. Now the limit was put in that contract because it was astumed that the bulldings put up by them or which they intended to vut up would be put up betoris that twenty years was passed. Their limits can onls supply a certain amount of timber, and can only supply the materia: for 17 entaln number of mille, and hat trig put up these mille und lustalled the toachinery it in falt to asinume that fir the paxt century they with harity re gulre to make any addtionif to the pilla, This ie entimely a different in. duatry. Thin ta an inilustry that it it is suecesatul will manufacture year after Yoar more and mory and will nocessititi additionn to the machinery and lulldiags. Auit they rierely ask that when thry wlah to put up addilional tuldinge and additionat marlifuery. sou will allow the conatraction materfat nud marlifnes in duts froes That is an reanomble request and th tho intornetis of the Colony.
Thu other cancession is freedom from srenterpal tixation. That is an importeut muttor with them in ralsing thels Howoy. They want to have their issue of atoeks absoltitely an fres as poahthle und as I pointed out tnid oven-
m. that while some of thea cones: slant may not appear very attractive to us, still in order to get these people fo come here you have to lir id out forme inducements, but we propose to limit that freedom to the particular fortifier industry and partlentar works on the Labrador and at By y of Islands My learned friend, Mr. Marines minted on f In this connection this? win were siviug away the principle water powof in the country, I would like to reIf in e the House that with the exceplan of Exploits there is no other river in Newfoundland developed. There is not a river in Newfoundland or Labrador upon which any attempt las been made to develop. In all the rivers all round the country there is not a particle of development and on the Hamilton Inlet there has not been a solitary attempt to utilise the waters in any way. Complaints were made on the other site that we were not fully informed and that we lind no surveys or other detailed information. My answer to that is that it would take thousands and thousands of dollars, you would have to import special men from abroad to examine and survery the lands sind rivers and report on the pussability of their developmeat. We have given this Committee all the information obtainable from ell departments. I think that under the amendments that will be proposed we can report a good bill and although we are giving concessions to this Compang we will find that we are safeguarding all the public rights and that If this Company does not establish itself here and spend the sum of money specified all the rishte will come buck to the Colony

I hape the day will never come when we will see the contract that we are constdorlng here tonight fall like hearty all the others that have been placed on the Statute Boole If they go on tad entubitish in the Labrador and in this country and spend the
\$30,000,000 in the country it will mean at the tenet $\$ 1,000,000$ in year to the Revenue Cnlenlate it how you may, If they spent $\$ 20,600,000$ in . Newfoundland that will mean on industry that will be Worth to Newfounding in revenue alone $\$ 1,000,000$, not to spent of the benefits that will accrue by the stimulus it will give all aver the countiv.

They propose at Bay of Islands alone an industry that will represent something like ten million dollars worth in exports. Now, thant wIt give you some Iaea of the size of this enterprise. It is only a few years ago stare our total exports simsunted to $\$ 10,000,000$; and last year, our total exports. Incluiling pier tad all our fishery products, only amounted to $\$ 10,000,000$. This Company proposes to go into a bussness at Bay of Islands alone that will represent an export of somewhere in the neighborhood of ten or twelve milHoms. The amount of labor that that will represent fa a very cary calculicion to work out. We hire sot to take some rials to get that here, we have got to take a good deal of risk, we have got to give some concessions. We were told by gentlemen on the other side of the House that in this contract we were giving everything and getting nothing back. Well, whist we toe getting back fa il permanent findastry, if they come here- If the money can be raised. On the other fond, If they dan't como here, if the coney if not raised and it never besores un accomplished fact, well, them all the rights come back to the Colony.

I to not think, Mr, Chairman, that it If tixcesury at this stage that 1 should Wither delay the Committee. Nearly fiery point that has been raised by The neither siding has. I think, been cor cred. As we go on in committee, disTusinige the Bill section by section and "eisolutioni by revolution, 1 shalt be glad to propose these various amend-
ments that I have alrealy suggested. and I think in that way we will be able to get a meosure that, whilst it will be an inducoment to those from whom we hope to get the money, will at the same time properly and effectively safeguard the public interest.

MR. KENT-Mr. Ehairmat, from the remarks of the Premier I take it that it is his intention on belalf of the Government to introduce some amendments which wiil make some of tho clauses of the proposed contract more moderate. I think that we ought to have thefo amendments as soon as possible on papper is it is impossible to firscuss any portion of this contract without having the whole in tis preeent state beforc the committee. Broadly speaking 1 think the propesed amendments were: firstly to secure the apending of the $\$ 5.000,000$ referred to in section 18 for actual construction work; that is the fint as I understeod it The saloptlon of this would have In very material effect on the bill from one end to the other. Then another
mendment as I underatand it, is to cut out from Section 1 that part dealIng with areas to the East Coast I understood that this clause is to come out entirely. I do not know if you intend to propose any changes in the clause referting to the "Labrador areas" I would propose that Section 2 he amended with the object of limiting the period during whith this Compary shall be exempt from taxatou to 20 years. As regaris Clause is of the contract I uuderstand the Intention is to limit the provisions somewhat 7 Then another amendment, I understand, is in case of faliure to keen the conditions of this contract. Faflure to do this means that not only do the agreement and privileges cease but all the grante horein contained become vold.

RT, HON. PRIME MINISTER.-YeB. Every aection will beome vold. What

1 wes augeoving was this, that aftor Section 18, add this: "And in mueh event it is agreed that all the provis. tons of thils indenture shall be void if any section is not carrled into effect"

MR. KENT-I would also recom mend to the Goverament that it draw more distinction, as regards this agreement between leases and grants, in case of fallure to perform the conditions of this agreement.

RT. HON. PRIME MINISTER.-Every section would be rold in this case. This is as ats ordinary findenture. If the indenture is vold then the provisfons under every seetfon become vote.

MR. KENT.-The tistinction is fmi portant as there is a difereace between the altering of a leaso and a grant; you get bath here in this agree ment. I think words oueht to te used to express the interpretation the Fremiser has put upon ft. We will diseuss thie guestion later.

Now Sir, I do not Intend to disenso this matter this evenine except one or two phasea which 1 will conslder on their own morits. I think there wery more merits in the ' 98 eontrict than In this. On that contract 1 hava ofied expreserd my opinion which is that it wes not in the beat interests of the Colony; that it was a poor buslinesg proposition. If we are to get our th. dustries only under agreements such nas thls it is no good having them. We sint fadustries started here bite was want thim to make some return to die revenue of the country

I think, alr, we ought to get some difect return to our revenue from thile Company. Some rental, bonus, or bhare; romething to justify the concessions granted it sinice we are to get nothine. Then, slr, If it is the intention of the Government to have these assets of the country doveloped 1 do not think ft right and proper that one company should be giveri complete control of ouch all important drainage area as

 Frater mower from their tand.

There is another matter which in my opinion ousht to be considlered moro fully and that is the question of patents which has been referred to thle House by the learned member for Trfalty, Dr. Lloyd, thls afternoon. This fs an important matter and ought to be more fully invertigated. We are nsked to make a law and place it ot the Statutes of this country; but are idiven no information regarding the merits or otherwlie of the appiteation. Nothing but that this man named Jesse Crlte King kins a patont Suppose some man were to say thrt fre and not the satd King firvantod thit paimal By this law one would be justilying its appropriation under thin or any other circumatance. This in a metter whtch should he eet at rest before we pase this seotion.

I do not propose, Mr Chatrman, to diecusis thls contract any farther until I nee and examine the proposed amendments made this afternoon. Some affect the contract as a whole and others certaln sections, and so I think this debate ought to bo deferred until these have lrem printed and placed in the tande of the memberi, when we might consfder the contract ftesif.

MR. CL.IFT-Mr. Cluirmaia: I want to eay, Sir, That in approacliing the condderitfon of this mitter 1 to 80 with a perfectly opon mind 1 bad the privilese of Hatening to Mr. Willson. the promoter of thie Cempany, and of huring frum tilm rome detalle of the proposed undertaking. He went into the matter very fally, and left no doulb whatever upon my mind as to the destratiftty of titi conithact Befing undertakea by the Government. From all that Mr. Willson proposed to do in roturn for the faw conccarions aeked for, I mide up my mint that so tar as I could, I would be prepared to support any reasonable concessions for the parpose of bringiak about this industry in Nourfourdlimd, and I am atill
prepared to hold to that declaton. I nm gled to hear from the Prime Minfater, that he than considerably modif: ed this contract, and I think thene changes have made it very much cas fer for me to give my support to most of the sections of the resolutions now before the chair. I desire, however, to obtain some further information in re: ference to the relations between the parties. Now, in the first place, mention wan made of an agreement being parte. I would like to know where ts that agreement. I want it hecause I am not quite clear in my mind as to what water powers are sranted to thls Company, I am aware that the RetdNthd. Co sro holders of certain bloeks of tand throughout this country, and that some of theas blocks of land were under riverk, or in other words they late beed the grantees of land covered by water 1 arn not quite clear about this particularly in riow of the provietions of the Transportation of Timber Act, 1904, I will read the provision 1 refer to:-
"There shall be reserved for public 3no a right of way twenty five feet Fide around and adjofning triter fund ponds, and on both banks of all rivers ou the lands of the Company:"

It aceme to me that-under that peofurdon a right of way for public use is reserved along the banks of these rivers, and I would like to see the conveyancea from the Reld-Nid. Co. to this Company, The Nfld, Products Co., for the parpose of ascertalning exactly the Intention of the agreement. I vould Ihe to have this before beins ruked to vote upon thie contrack Another thing I would like to know, ane It is one of some importance it is, What in the extent of the drainage area of the Humber? We epeak of the dratrage aren of the Humber without roally consldering what it may mean. IF I underifand aright, the dralnage nrea of than Humber extenda away up

Now, ifr. Cinlrmas, a ereat deal han been sald about this eontract;
and a great deal more would have been sald had it not been altered; but havIng been altered and the great objections being removed and if safegtards are provided with rogard to the Hamil ton Inlet buniness so as to pretect the richt of Newfoundland so that these water powers may not be utilized to bulld up aff Industry in Canadian Itmits instead of Newfoundland limits you mitght depend the country will appreclate your action in providing those sateguards. The country was alarmed, 1 might say, sfr, over thls business and 1 have not the slightest doubt that the greatest agitation you ever had ta this country would have resulted if this measure lind passed in its orfginal form after Mr. Morine and Mr. Kent and others pointed out the mistokes and if the Premier had not been so anxious to respond. I made up my mind there ind thim that be had not been cuught nappling and that he was ready to do something in connection with mialting concessions. I do not beHeve thint the members on that side of the House had a great deal to do with thint I belleve they were unaware of the objectionable features and I congratulate them on the cor: rectione which they have made; but if they want to secure the support of this site of the House and espectally the back row, they witl have to pat In the safeguanda we have auggested.

RT, HON. PRIME MINISTER:-Mr. Chatrman. just a word in repiy to the hon. gentleman. First I would Itke to say I think he haa been very reasonable and fair in his criticism of the case. I ahould tike to correct an error which he made and which I alro saw in the press the other night-that this debate was adfourned because I wat not rendy to go on at the time. I did not ask for any postponement. The request came from the other adde of the House Mr. Morine asked in opon House for a postponement of the fur ther debate because Dr. Lloyd was not
riady: He sald Dr. Lloyd desired to speak and if was not convenient for hlm to do no then and 1 consented to the postponemint. The postponement wan not for me. I alall be very giad to constier the many points which my how. friend has suggested and if there in anylhing that can be done it will be done.

MR. LL.OYD.-Mtr Chairman, I hesttated to rise but for the remarks made by the Premicr that it was owing to my request the debate was postponed.

RT. HON. PRIME MINISTER.-No.
MR. LLOYD,-1 Eball make the sfatement to suit him-owing to my reguest through the mouth of Mr. Morine that the delate was poatponed. I do not know how Mr. Mcrine came to make much a request because it was utterly unauthorized. I had no intertion of poing on becanse we had from thif Hide of the House two fmportant spevehen dealling with the matter-one by the Leader of the Opposition Mr. Keat, the other by Mr. Morine and it wai about time we heard from the Government what they intended to to In the premises and therefore it was hardly reasonable to expect anythling further from this ade of the House. lill we had heard some pronouncemant from the Promier. That propouncement was delayed and was delayed until to-day. We heard some inaling on Friday as to another reason for delay: we heard something of the ktoking that my friend the member for Twillingate tells us of and we know that there was a postpomement of the debate on Friday at the request of the Leader of the Governmeat in order that there should be a party meeting on thls very polnt. Now, then, if it was in orier for the Leader of the Government to bring un this maittor of the poitpoaement of the debate for norue purpose alloged from this side it is equally in order to exphafn how the pestponement took place on Friday.

RT. HON. PAIME MINIBTER-I have no objection whatever.

MR. LLOVD- -1 have no objection to ntating it and I am glad the Leader of the Governmimit cohments, beesuas after all there is aome polnt in refer ring ta that: becsuise the renult of that party meeting wall that the Pre mier came tnta the thoune thits atras: मoun til icharteak atate of mbit. abd In a chastenve stite of minst he has made a propoeftion whtch was exceel lanty oljuectionatie and undestrable frito is Timionitito flualtaus propers thom. I consratutise thin Gaverament on the way this mintivi hus been dhall with on thin nifte of the Houm, 1
 moet the governmeal in a reasonable spirit. We did not treat this messure: although oppenias it rery strongly, In
 that should be malde. We auked for comisiferation of theae objectionn Thure were moti who telt equaily etrour on merethl of theme poftit ofit the other aide of the Houke, who while diet makias thene objectionn in open Houne aevertheleas made them in the गrtmer of the caticult int wo neo the reunit.

I Hould like to point out what fa doae is connec. tion with Nlagara. Thes Nlaurara Company prys to the doverument moder Its Hicume ithe following rentals for the firt ifse thrmanal of iers eloctrical horen powsr, a yoarly mental paywlife lutt गearty of Th5:009. For vach ad. ditional electricni barke pesor "Evnfrateal and aerd anil sold or disponed of the antinil rental for Fuith fiornt power Alall be:-Frowil 10,000 horse porver to 20.000 s \$1.00 per H.P.; from 20,009 H.P. to 30,000 HP Seventy
 and over, Pifty cints per H. P" Thus for famiple forty thoumand bothe pow Et coukd betng in an annual rutal of trakif at that ruto the wator pow En that is comeeded oft the Humber
would be worth about $\$ 75,000$ a year at the Niagara rate, If you follow the Ontario rate the Government would charge $\$ 60,000$ a year for that concession.

Now, sir, with regard to this new Industry; I have every faith in it. The man who has come bere nas a scientifie promoter of that industry and as the selentist and manufneturer behind it is a well known man. Immediately I heard of the proposition I wanted to know who Mr. Willson was. It may be of some interest to tell you how I found out. I had not heard of him previous to this proposition but I happened to have in the office of the Telegram a book published in 1898seventeen years ago-called "Cimatlan Men" and 1 turned up the name "Willron" to see it I could fina him and I dta flud him. I found a column of the book devoted to a bfography of thite man and it spoke of him then in 1898 as a man of cminence in the chemical manufacturing world. That was geventeen yoars aga. It apoke of hfm and of this connection with the Are Light and of hits invention and of what he had done fa connection with the development of carblde and it referred to him as being president of some carbide company. That showed sufficlently that he was a practical man who was a success in connection with this light some seventeen years ago NOw I underntand that the scheme at Bay of Tsinds ts the foltowing out of his development of the carbide industry. He proposes that this Company would maike catcium carbide at Bay of falanite by troporting soat and cooking it in electric ovens and with the coal burning the coke with lime atone in anather electrical oven and matifig catelum carblde and thits casbide with the nitrogen and pyrites produces cyanamid of ammonium. Now in connection with eyanamid, that is a compound of calcium carbide and
nftrogen. That Indusiry although a cotuparatively new industry is a succobsful Industry at present at Niagara Falle and hae works in connection with the power I was talling of which pays the rental I spoke of. Now that cyanamald ie manufactured with a horae power of some thirty thousand. The output is about one-half the proposed output of Bay of tslamels. That factgry turning out onehalt the output expeeted of Bay of Islands, employs 750 men. Now at Bay of Islands with it double output and the very latest taeans of lahour saving thane will not be more thin 1500 men employed so for an this cyanamld is concerned. Having made cyanamid. Mr. Willson, 1 understand, goes further, and by passing ateam at a very great tomperature through the cyanamid turns out ammonfa gant: which goed through another process in connection with phosphorie actd, and is converted into phosphate of ammonla, which te the fertilizer.
I think it can be assumed that as far na this fndustry in connection with armmonlum phosphate in concerned it will employ about two thousand men. 1 hive not gone finto the yuestion of mubsidfary industries. I have not gone finto the matter of the sulphite fudus ery; but at all erents these flgures make clear to my mind that the in duatry will be a very large one, and therafore should meet with every encouragoment from this Logialature; tut at the rame time we should try to set what is possible- 1 am putting it us to the Government- 1 should ince them to try, if they have not already tried, and aoe it they cannot get a rental, as lo done in Ontario, for this water power, even say fifty cents per forse power. Supposing they only got half, it would be romething and would be a precedent for the future,

Now, sir, with regard to the Labrafor propoaltion, 1 am not convinced
that the promoters have acted wheely in comnection with this matter. I think it is very doubtual, even from their own standpoint. becsuse they are introductine very doubtful features into a very attractive proposition. It is clear gnough, knowing what we know as to the poittion of affitrs on Latirador in connection with thin Labrador boundary that no ono ta going to put up money on any tue given by thla House and Government until the matter of the Lalmador Bounfary ts settled; and this makes it clear that the grant or the confirmation of the grant from this House has no trvesting value, and to get an investing value it will have to be put through the Quebec Lezislature, so that there may be no doubt nbout the title. To-day it would be no good goling to any market, bocause you are onls asking poople to finvest in a law sult-wothing elve.

Therefore there fin a good deal of doubt in my mind as to the wiedom if incluiling this Latbrutor proposition. Now in apeakins abont the fnduatry at Hamilton Inlet the Premier cald this afternoon that about four thousind men would ba criployed at wages of about seven hundred dollars a year

RT. HON. PRIME MINISTER,-I never made any such statement.

MR. LLOYD-You wore excled then.

RT. HON. PRIME MINISTERWhat I salid was this: I sald the poputatoon of that place was about four thousund. Out of which about one thousand, roughly speaking could be counted upon to avall themselvea of this opportanity. These men would recetve from soven hundred dollars to one thousanid dollara a year.

MR. LLOYD, -1 must have misun derstood the atatement of the Premier but I do not think that ordinary workmen there would receise much a targe num as that. I regret that the

Propler makee thif in all scriouaneta, bsenuse it casta a doubt upou what woald otherwise appear getuine Nis our 1 fear, would betfeve that this Company or any other will pay fro-n feven hundred to one thousand a year to workmen. 1 do not believe that Hamition Intet can produce the numbor of men ntated by the Premler. Again, thia may give riae to eericus trouble as to the question of the Labrador boundary. We must be able to give a tite that will admit of no doubt.

I will clese what I have to eay in congratalating the Government on ths reasonablensss in this matter and aleo the promoters for the oblliging manner In which they assented to the modifications of the contract I thinic in its present state you ought to bo able to make the contract satisfactory all round. You bave a practical man in Mr . Wilson, who haa already made a big suecess in a number of projecta of a somewhat smakler nature. We fiave the nssuranee that firat the money will be raised, and mecondly the Water Power being here, the Aimestone at Bay of Islands, the proximity of the coal areas, and all facildifies requisite thereto easily procurable, you have the certain knowlevige that ere many years an industry shall prine at Bay of Islands as great ax that which we now have at firand Talle.

HON. COLONIAL SECRETARYMr. Chairman, it ts not my intention at this lite hour to oceapy the time of the Committee very long but 1 would like to say that in my opinion The discusalon wo have heard on this Bill will go down in the listory of this country as one of the most interesting and Instructive deliates that has ever ariaen in this Chamber: No question orer came before the Commitzee or before this House since the dayn of the Harmewortil deal that has oreated such

## PETitions.

MR, KENT,-Mr. Speaker I ber leqve to-present a petition from Mr. P Contigan. This man was a Covernment ofticial, and while at flose Efunche met vith min accident, and hat teris incapecitated ever stnce. He afila some rapport froms the Covers. ment I think, Mr, Sipeaker, that the Erryer of this petition is very reasonahle, and thas it ought to have the fuil coosideration of the dovernment, und I feel sure that when the facts of the came are conaidered, Costigan will B. Efven a penalon. He recolved is Bhtiry of गtro wa titimalier, and ank tie numal poabiot He fay been tald yo nour for twilvi or thirten monthe, ast thouch he fius averal times been
 erne. I widad att the Covvernment: etmelterratter of thle mattor, and that it le referrent tio the Cestoms Deport. ment.

MR. DWYER-1 Expport this petsthon.
 thlif rase to the Miniater of Martne and Mihiertes whas it comes before the Govermment.

MR. JENNINGS.-Mr. Speaker: 1 beg leave to present a number of petitlons on the subject of temperance. umong them one from the Rev. Mr. Harris and others of Moreton'e Hir. I would ask the constideration of the Government to these.

MR. CLAPP.-1 beg leave, Mr. Speaker, to present a petition \{rom Mr. Andrews and others of Duggan's Cove, asking that that place be made a port of call for the northern steamer. Thls would be very mach apprectated by the people of that place, and I hope the Government will be able to aecede to the request. 1 ask that this be referred to the Colonial Secretary's Department.

MR. KENT.-Mr. Speaker: There was a Committee appointed some time ago to enquire tnto the complaints about the Pealtentiary. I have been appointed on that Committee, and the Committee desires to report that it cannot eomplete its work in the 10 days allotted to It. 1 would ask that the time be extended a further perfod of tea days.

On motion, it was ordered accordingly.

## QUESTIONS.

MR. STONE called attention to the fact that his question on order paper of April 13th was unanswered.

MIN. MARINE \& FISHERIES-ThIS answer was tabled, but seems to have been mishid. I will have a copy furnished to-morrow.

MR. KENT antrod the Mintster of Pablic Works it he had received roturns from Bell Island Local Counct1.

MIN. PUBLIC WORKS-These returns would be sent to the AnditorGeneral.

MR. ABBOTT- 1 wish to call the attention of the Minister of Public Works to three questions, one asked by me on the 26 th, one on the 27 th. and one on the $28 t$ th April, not yet answered.

MR. TARGETT- 1 wish to call the attention of the Minister of Public Works to a question which I aaked on April 13th, which has not been antwered.
MINISTER PUBLIC WORKS.-I gave instructiona to have these statements prepared. 1 will table them ue soon as I possibly can.

MR. KENT asked the Minleter of Marine and Fisheries to lay on the tuble of the House a statement, in detail. of all moneys spent on the wharves at Kitchuees East and Bacon Cove. Hartiour Matn Distriet, from January 1st, 1903, to date.

MIN. MARINE \& FISHERIES.That atatement is belng prepared.

MR. HALFYARD asked the Mininter of Pubile Works to lay upon the table of the House a statement of all spectal moncys sent to St. Jacques, in the Distriet of Fortune, for the year 1914: also, a copy of the returns of same, If the money has been spent, and the returns sent to the Department.
MIN, PUBLIC WORKS-That is it courae of proparation.
MR. GRIMES zalked the Hon. Minfator of Finavee and Customs whether tenders were pat out for a steamer te do the work uevaily done in the aummer by the "Fionn" on Balt Protectlon Service and Customs Preventive Scrvice; and, If so, who tendered, and on what torms; and to whem the contract Fas awarded, and what steamer has been engaged, nad on what terme.

HON. MINIGTER FINANCE-That information is not in my Department. it it in the Departwent of Marine and Firhertes.

MR. MORINE asked the Rt. Hon. the Promier to lay on the table coples of the essiguments by Jesse Crltz King of certaln patent rialits to the Nowfoundland Products Company, Lid,

RT. HON. PRIME MINISTER-I will make enquiries in relation to that matter, and if 1 can fled anything I

## wili zable it.

MR. QAIMES-in regard to tho greation whith I sulked the Has. Mis inter of 7hasnce and Cuatomis, abd which sbould have been arked the Mintitior of Morfue fat Thalirfes, 1 would be glat if I could ert the ithfermation.

## Lavithovigis mic.

Mค. COAKER. In flomarista atos bibling wartid ve as extre likbt keepdr, tor whime there to nos seet. One zus ran attend in the two joles. These eve the thlurs that make the fliser: Fern hat is at them trou io bitur trated fir sataine. The keeper at Smaum Come Itr eete a salary of fane, and thire to not a mure compectur mins tit the filamit. I think you
will agree with me that the $\$ 700$ spent at Bobavista is not needed.

MIN. MARINE \& FISHERIES.-Mr. Chairmun: I Juet wisbs to try to pot my rriend, Mr. Coaker, right. He says there are two men at Bonavista; one tuan Eetting 3700 for the fog itarm. When it was proposed to put that fog atarm there-ani a fog alarm cannot be put anywhere at all; It must be fir II proper plice the ensincerr wont down to Bonaviata with the object of trying to get the fog atarm as near as possible to the Hght-house. But it Whi found that it coutd not be done. The land intervened, thus preventing the sound from going where it was required to, And then there was anuther obstacle In the was, which prevented it from being put somewhere elses It is very often no easy matter to select a site for a log alarm. A.B they are consequently such a distance apart, it in impossibia for the man Who runs the lighthouse to run the fog alarm also. The man in chargo of the fog utarm tir put under a great responalblity. We got him there for the very purpose that when an accldent eccurs at sea-which is rare-the man will be in the place, inid will be abie to render ussiatunce if necessary. I underatand that he pays the assistant \$30e, and so is responiffic for tho ansistant.

MR. GRIMES.- 1 would the to ask the Minister of Marine and Fishories why no profliston is nilde for the lighthouse at Cuplds this year.
MIN MARINE \& FIGHERIES.-It will the in tho Aaditional Eetimiatea.
M. COAKER. - Why does the keeper at Green Island get \$800.00?
MIN. MARINE \& FISHERIES.-lt Is a place ahut oft from every means of communication. It is hard to get a man to go to mesch a place That silary was the same before I had anything to do with the Department. He is it firatechass man, and insterd of
$\$ 500$, he should he gotting $\$ 1,200$.
MR. COAKER-There ts another matter to which 1 wish to draw attention. The keeper of the light at Certals Cove Head gets $\$ 535$, white flve othor light keepens in Exploits Bay Hot from $\$ 200$ to $\$ 250$. Why is thls?

MR. PICCOTT-He hae to provide his own nesditant, and has to look after one of the mont important lights po the coast.

MR. COAKER.-Now. I hope that the Minieter when bringing in these eirtimites gatin will try and fmprove mutters and even up the salaries. Some men are ketting very poor pay and othars very fair pay; and in some Dlacos you tuve at man getting $\$ 200$ Hind nnother getting $\$ 300$ for the same cless of work.

MIN. MARINE \&ISHERIES,-I agree with you.

MR. COAKER.-When are we goIng to lisive the second reading of the Horpltal Bill?
RT. HON. PAIME MINISTER.-DO you intend to discusa it? The usual practice would be for tho second rending to take place and then have the discuaslon in Committec.

MR. KENT.-The practice we have beem followlag is to talite the Bill before the second readine

MR. COAKER.-What is this 37,000 for construction of and repaire to Tosist?

RT. HON, PRIME MINISTER-That is a speclal srant

## FERRIES.

MR. HALFYARD. - I would like to know whe in th claige of the Ferry ut Cluange Ialande: whether it is a boy or a efrl or a man or a woman.

MINISTER PUBLIC WORKS.-The zon. member had better give a notice of queution.

MR. COAKER-You might say if there is on appointment. It is genernilly rum by a sirt or a boy or a womatin The man goes flahtig.

MINISTER PUBLIC WORKS.-If there is a man and he is not dolng his duly, it ought to be reported to its Departuent.

MR. HALFYARD-That is what I am doing at the present time. It was quite recently breught to my notice that a woman has charge of the ferry. Stis has two chiltren, and somethmes this ferryboat is given in charge of the children. The chameel is not very wide, but atill there is a lot of traffie; and motor boats come up frequently and alao the coastal boat, and it in very dangerous not to have nome rat aponaible person in charge of that ferry. They say that the $\$ 110$ granted fo so mall that a mah cannot be got for the work, but ft fe very dangerous to lave things in their present conditton with childiren in charge of the ferry. If an accident happens and two or three persons ture drowned, the newapapers will speak strongly of the neglect, and somebody will bave to assume the responelbility, but that will not bring lack those who may lowe their liven. it is in all seriouaness that I bring this before the Committee, en that the Minister may take the matter up and put some reasponsible pernon in charge of thie ferry. You will not get a proper service in theme places unlem you pay the men properly. This ferry is dofag service be tween a samler of friands and tickies It in very important that somo person should set the fob and do bti duty without any excuse tor leaving the work lalf done. It is not like a great matiy placet whore you have terites and it does not matter whether the ferry-man ts there or not. It le a very important service, and theretore the aslery ehould commensurate with the work.

MA. COAKER-in regard to the ferry at Change Islands, it is a matter of very great Importance. The wator is very shallow in plaoes and in oth-
ers- It is very deep. The ferry does all the tratfic from Fogo to Herring Neck and places in between. All the people from tho vartous places around go through that Tickle. There are nothing but motor boats continuousiy yasslng through and it is getting dankerous to leave the ferry to charge of a man who is not always there. The sum of $\$ 120.00$ is not enough to pay him Give him $\$ 250$ a year. You havo a Sub-Collector at Change Island earning $\$ 350$ to $\$ 360$ a year. A ferryman working from 5 o'elock in the morning and ruming contfuous$1 y$ all day is worth more than $\$ 120$. It is not a ferry which runs for ten or fifteen minutes and then stops for a long while: it is running continuously. This matter is gettling serlous and I would ask the Government to give it their consideration. I must taike this opportunity to congratulate my frlend Mr. F. J. Morris upon the very important position which he has assiumed in connection with the Court. Last year I was telling him that he ought to be appolnted and I was sor ry to find that he did not wish it I was very pleased to find that ho $v$ as sitting on the Bench this moralng and carrying out the duties of that offlen 1 mm sure that he will carry them out very well.

## POST OFFICE

MR. KENT-Mr. Chairman, I noHice in the Auditor General's report in connection with the Past Orfice tha there are a number of salaries put down as new malaries. These are not provided for in the Estimatex
HON, MINISTER OF FINANCE \& CUSTOMS-They will be provided for We hatw already arranged for some of them. What he refers to there are Ralaries pald under a re-arrangement In the Poist Office, It was referred to by the Colonfal Secretary; be can explain it better.

MR. KENT-1 am referring to the St. John's Post Office. The Auditor General in his report shows that i number of changes have taken place In salarles, but I see no corresponding changes in the Eatimates is it intended to arrange for them in the additional Eatimates Take the case of John Mercer.

HON, COLONIAL SECRETARY.His is a temporary appolntment.

MR. KENT-Has he any speclel work?

HON, COLONIAL SECRETARY,He ts reporting on the outport work and salaries. That is the work under taken by him. That report will be tabled within a few days.

MR. KENT-Then there is the Asslstant Secretary, he has got an Inerease in salary. That is not in the Estmates. It was referred to in the Auditor General's report last year. It is reported again this year. If this is a pormanent increase it ought to be put in the Estimates. It should be put in the additional estimater whon they come down.

MR. COAKER-Some time asc we were talking about some trouble in the Realstration Otfice. Is it intended to make any investigation?

HON, COLONIAL SECRETARY I havo recelved no report as yet. I will enquire agnin to-morrow.

MR. COAKER-I would like again to refer to thls question of construc. tion of Telegraph IInes. Last year I laid before the House the pay list and asked the Colontal Secretary a number of questions that I wished answor ed, and he sald then that he would make some investigation into the different matters. I have heard nothing since but I underatood that some trouble has taken place. Now 1 can tell the Colonial Secretary that something rery serfous $i_{s}$ happening in regard to thit. A tot more sertous than
he has tiny fdea of. There is a great deat of trouble in regard to the purchase of poles. If he only had the faets in connection with it he would know that some thousands of dollars are paid for which no value is given at all. Last year 1 notlee that Patrick Brennan got $\$ 2983$; John Davis $\$ 309$ : H. Burt $\$ 130 ;$ I. MeDonald $\$ 1110$ and so on to a large number of items. If 1 were to ask for particulars of all those items there would be no such thing as getting them at all. There Is quite a lot of work in connection with this that needs enquiring frito. Trike the question of suppiles; not one-third of the supplies which are obtained are used. You really ought to find out what is going on in this direction. I made a statement last year that these men on some of the Jobs were spending is great deal of thme consuming intoxicating liquors and having quarrels. I do not want to give the Government too much trouble ove: these matters but somothing more ought to be done. Here we have an account for 1914 charged against the Floma for seventy-one meals for Mr. Stott; sixty-nine meals tor John Dyers. Was that amount oredited Daek to the Fiona's aecount again.

HON. MINISTER OF FINANCE \& CUSTOMS-YES,
MR. COAKER-In laylug the cables in 1012-1914 both Mr. Stott and Mr . Voltch were engaged and hed thelr expenseg pald as well as extra aalarles. alr. Stott got $\$ 100$ for laying one cable and the amount of his expense was \$141, that is $\$ 2.35$ a day. Mr. Velteh got $\$ 150$ for expenses besfides an extra amount for salary. We have an account here of Mr. Josoph Manuel for food supplied, and yet we find the men on this bustness were pald as dally wage, and they ought to find themaelves; and the men in charge were getting $\$ 2$ a day for their
wages in addition to haring all thene goods supplied. Now there wero no less than five or ats colls of rope used fo connection with the cabies. These thinge ought to be in these accounts. Also five coils of rope and two colls of rope: what became of all that ropet
hon. minister of finance a CUSTOMS-That rope was used.

MR. COAKER-I am Just polnting out how some of the Departments are run. These things ought to be brought back and sold, golng in to the credt of the Departiment. Then there is the use of motor boats. Every man who had a motor boat had a chance to line it . Here there is a bill for $\$ 28$ for motor boat bire.
HON. MINISTER OF FINANCE AND CUSTOMS.-In regard to that guestion of the rope. you will lind that that has all been brought beck and is now in tho basement of the Posi offec.
MA. COAKER.-Another thing to the Telegraph Service as a telegraph service. It is not giving any geacral satiefaction. I notice there were many breaks in the lines that took two to three deys to repair. You are spendling a tremendous amount of money in repalre. You ought to find out whore the line was isterrupted and for what reason. I know something about the line in Green Bay that could thave been repatred right away and yet took two or three days to repalr. When there is only twenty or thirty milles of line to ought to be repaired in twen-ty-four houral 1 have a statement here which if the country knew of it and knew of the amount of delays and thterruptions and the length of time over which they extend I do not know what they would think of it. it coste a tine sum of money and ought, 1 thins to be tabled I do not say that a service puch as thla can be rua without some complatints, but thle thing
has gone too far. We will have to got a man to run the Telesraph Department if we want to get satisfaction. The man who ts there at present is incompetent to run the servico. This won't do. We want a man, a good active man, with a thorough knowledge of the business to see that the officials do their work, and if we have interruptions to see that the re pairers get it repatred within a reasonable time There are ten or fifteen items here for Interruptions on the He goling to Green Bay that I took nottce of last year, and which ought to be changed when you have the facte before you as you have. 1 do not expect the Minister to know about it but 1 havo drawn this matter to his stention and I know that he will never get down to the bottom of the trouble because he does not know where to look for the leaknge: but I hope that my remarks upon thls sutJect will make them more careful in the future. We will never have satisfastion in this service until we get nnothep man in charge of the Depart ment.

HON. COLONIAL SECRETARY Mr. Chairman, the Honourable member has referred to some dierrepaseles in the Department of Tele sraphs If there is anything that can o done 1 can assure the member that ever effort will be made to have it remedied. 1 camnot clalm to bo in a poeition to give an oplinn as to how the Tolegraphe Departrient should be run, but 1 have a knowledge of the work of that Departmont and I certainly agrie With hlm that the Departmen: has grown to such an extent at the present time that it requires the undividxd at. tention of some man who is thocoughif competent. As far as I know Mr. Stott is a very competent and rellabie omelal He visite me nearly every day fin connection with the matters to tis department. 1 am continually
in tonch with him and find that any Inutructions that 1 give are ea.ried out in a satisfactory manner of course, the in efery other public ser vice th:re may be same people who are sot glving that attention to their duttes that they whould but that unfortunaitely la a matter very difficult to remedy. I guite agree with his rummeke thitt the poistal Tilisriepti Service and the Port Office are important services. As to any chatuges, that in r comprehemaive question that would require the adifee of som - person qualifled to the work, but I can asaure the Honourable member and the Committee that it there are any dtscrepanctes and I can lay my band on them and have them proven I we:!
take the proper stepn to have thy remedy applied. I am very glad that the mattar has been brought up bocause, it is a public vervieo that fo of very sreat importance. is regard to finterruptions that in a very difl. eult matter. In many cases there in a large stretch of country where travaliug in often very difficult and repairing is tmpossible in bolsterous weathor, It very often happens that It in through snow atorms that the repatrory have to so to repair the line. I would be very glad to see any improvement that enn bo made and shall be happy to recelve any informatlos from the hon member or any rellable member.

MR, KENT-Mr, Chalrman, I would just like to alay a few words about thin point whtch has Just arisen. I think the those has come when we abould take thle matter up thoroughIf and have the whole Departmant put on a bualaeas life banis and rua properly: It soems to me that things are net qutte an they ousht to be, for fudging from what I lave neen and heard thls department seome to lack
proper control and appears to have been neylected by these renvanalble for it in this House. The Postal Tolegraph vote for this year amounts to nearly three quarters of a millioe, which is spect in its maintenance. Thurs are bestites large expenititures Which have been paid out of toans, and I thilntr the time bas arrived for the proper entablishment of this Department on at thoroughly buelnesaHike basis, if the deseriptions of the Colonial Secrvtary and that of Mr . Coaker are correet then it in perfectIy cloar that thin Degartment requires fmmediate attention. I miny mention tere that rumour has it that the Govdrament intend to retire the preaent Fowtmanter Generaland I would like to know whether thlif is correct or under comalideration or not. if it is so tome provislon will have to be made fa the Peaston Bill, and discumaion will have to take place as to his sucdessor Mr. Woods thes been a valuable nervant durinic his tenure of offee. und the netrction if fils succenaior will foguire particular cousileration. if possible we want a man who han experfence In that ever Increasing Degartment. The position will have to be flled by a man af experience, for It would take a new man several yeara * thornushly to acouatit hfmself with the fatricheles of this fmmense serviee I merely wish to make pubilt that I have heard the Goverument in. tended retiring Mr. Woods, whone bealth is net what it tused to bes, and Wrere now cenwiderint the vuestlon of Bis muccensor.

RT, HON, PRIME MINISTERThine is no Intention whatever on the part of the Government so retire Mr. Wondr. I nimideretood that him in bers was of a temporary character. 1 hepe thet his truith witl soon be quite reatored, and thint he will be shte to refirme his dutien tor whicle he If so well fitted.

MR. COAKER-MIT CAnirmas, I an sorty to bear this. I rearet that the mater has mot artame before ite consideration of the Governameal, for 3tr. Wuode is a man whe is aver aeventy yeary of age, aad I do not consider that he is mow fit to nhouldert the imunenan respoanthillies ot his D-partment. I hope the Government vill conalder that, and consider who the nent mann to take charge of that Deperttiont will be. It is a pondton involriag immense labour, to perforn whiler s min wculd huve to work of th ninet in the morning until uitue at afght. for terelve montha. Mr. Woofs is nes in very poor bealth. He han aot mate a sarcess of bls hexiness by asy means, that may not nltoputher fie Atir filitt. We want a introng mas alse and eatrpetent rell experlenced is that particuls departukent, to silpptant him. I soallif aurgent the Hon. I. A. fokhmme. I ane nure that a strukeer et aisure ellicient man cannot be founit. The atate of iminum eribting at prement cannot constimbe. 1 belteve the Goveramient =iII comaider this and act with : reasoanable prowipititite While I do not wish to dictate to the Cororntifint 1 woitit thin to numest Mr. Robtnson as nest man for that Depariment.

MR. LLOYD-1 preaume from the Treinler'n lant statement that the matter has net been brourlit otticialty betore the Rrecutiva

RT. HON. PRIME KINISTEAWhat 1 meant to may wair Mis, that the matter has not come noter my datice in amy was at nil mor has it romp before the Fueculive at asy timn. of courne, $t$ eakinet anverer for the furure. I was merely replotes In Mr Nientle queathin an te whetber the Girerament ware eontemptarting ft

MR, LLOYD-1 do not want to eantradiet the Fremier In any way, but I
woold like to remark that the matter in belog konerally difacuased arumat tows a. an unilerstood thloz, as a setuled polley of the Government. TBis evpareatty If serws to the Fremler. I soold sid bowever that it to cerrent. मy bellered in town that the saceess

## of to Mr. Weodn will the the Hon. P I. McGrath.

MR. HALFYARD-Mr. Chatrman. 1 would the to bring one matter for the consideration of the Goverament In relatian fo Fogo Dietriet. In the Fall of 1813 Goverament wiros were ent down there, and everybody ex peried that within a fer montlis tele graph offices would be erested. hat tothine has berk done. The serrios could be nxtwnited to Gancer Bay and Irmacrat Harbour, and I to mot think It would prove viry expenalre ma the gecesnary pole are avallable at that gluck. It war rumored that the Gor imment sought to eltelt rotes by s tach promise of communteatloe with the outalde world. The people ary taont dealroua of ascertainlng the jire clue fintention of the Government is sendiag these wires thers. These wirme are an inconvenience to the people, and the man who has had the custody of the wirns nince that time intende, f betlove datuitise rent These are the sert of thleger that persuade per ple that only Government membery tan hitp them, int a Corernment beLarime thie this atte contrary to It. dictates of Justime nnit tenifs to fas ter the crovtly of a partian sptrit Thict rifi mact moat unptiawarly me the Country th the matter of mal. arles Fors Distriet pot only 1est, wbrn accordiar to poprabition it mbeuth met 11.158 sectopliog to salaries pail in fortmasters in the eutports. I hope the Govamament will talke thoe, inat ters Into its fmmediate conalderni'en.

MR. COAKER-MI Chairman, I
wish to draw the attention of the Government to the matter Just referred to by the member for Fogo. The extension of telegraph wares referred to by the hon. member would oniy be nocessary for a distance of ten or tweive miles. The wlres were taken there in 1913, and the entire estabtishment of this convenieace would not cost more than fire or six bundred dollars, and would not cont more than forty or fifty dollars when once construeted. 1 hope the Colontal seeretary will take notice of these thinge as the necessity for thle slight extension has been a long felt want in Fogo.

MR. GRIMES-Mr. Chatrman, you have down bere for the Port de Grave mall courler the sum of $\$ 200$. Now I want to say, Sir. that this 18 a very small salary for a man who finds it necesaary to keep a horse and carringe, and whose whole time is taken up with this matter. It needs considerable attention to keep this route open all the winter, and only one cogntsant with all the circumstances knows the great difficulty in making this the wornt of our courler's journeyn. Work at that time is constant, and takes every hour of the day, and to expect a man to live with a large family on that wase is impossible. Other courferes sot $\$ 180$ to $\$ 200$ for places which do not require half the time neceasary here, and I think that something ought to be done to allow this man sufficient to live upon. I trike it that the Mfr'ster will make Inquirles Into thls matter if any other information Is needed, and make allowance for this expenditure when supplementary amountn are votod. I fust want to draw' the Governments attention to thle and ask for their consideration.

MR. JENNINGS- 1 hold in $m y$ hands, Mr. Chairman, a letter from a man of \& W. Arm, Green Bay, He bayk
he had the aummer mafl but that fince that time it has been takon from bim and given to a man Thistle, which man gels $\$ 7$ per week, or $\$ 1$ more than be ever got Thls man now offers to do it again for $\$ 6$ and so give the Government a chance to save $\$ 1$ and get work done Just the same.
AT, HON. PRIME MINISTER-
I will have thls mattor looked finto.
MR. COAKER-That was Just be-
tore the last election.
MR. JENNINGS-Mr. Chalrman, while these votes are atill being passed I would like to call the attention of the Goverament to the Labrador ateath service. I have in my hand a letter from a fisherman of Twilingate district. Thili was written not on hits own initiative but on behalf of the uen with him. They complain agalnat this service and say it is unsatiafactory. They were a long time cut off from all communteation with thetr homes, I cannot I think do better than read it to the House (Read Letter.)

Now that will kive you some ldea of the circumstances to be faced not only by mea of Twillingate, but by men of everywhere. I would like the Government to see that everything possibin is done to insure guod senvice to these men. The last captain sent down there was the very worat they have had there. Captains G. BarDour and Hann gave good satisfactfon and $I$ think the Government and the Minister of Marine and Fisheries will look after the interesta of these our flahermen.

## MINISTER MARINE AND FISH.

 ERIES-1 would eadorse Mr. Chalrman, thi remarka made by Mr. Jeanings. Last jear through some misunderstanding. my recommendations were not carrled out. Whether it wss my tanit or the Government's 1 do not know, but I assure you I was en.Aescuritig to do the beat posallble to make thls a good service.

The first year I was honoted with the poitton $I$ libit bow, $T$ weat dowz to Kabradot on the Fions, and weat up and dewn the yhare Years before
hint bere dawe that ithars stit seen the lilicuritty of meffir poith ot satt, and I brought then attrntion of Eir ESd ward to it. He acooled and the "FI whin ${ }^{-}$was ithapatatoct to Cibpe Mructori.

At this place the men bring upThis neeme to be their eventral atnthom. slisee this time the Government
 to ke dowa dhore. This year it propose to recommend that a boat leave here not liter this June int to isform thin peopto on the Treaty coust of atteratione made in viur of petitions:

Ahout the last of Jaly of the firgt of Aurbat mas from Green Tay go egurs there met I hetfove thrt 4 our of to of them get good lonis of finh.

1 may say that my Intention in to ghre the libhermen down there the Sant poanible saritete, wind if they do not get it ft will not be my fault, bat the fault of the Qovirnmeat. Thare wre two bosta gotng down thit jear, an earty uprtas noit oae maft boat. feraunatiy I think what is aeeded is a small boat whleh would be able to keep to toech with all blaces down there, Laat your,t will be romembered, the "Hatelat" wat evert diown is charge of a Groeti thay mas. He was onderets to do whisever the coutd to help the men divel there. That was wlit that we could da we could sot follown htrm downe I thiter that this yoint ant in fature whenverer poumte the master of thes boat stould take all thin into connidencation and got as muct marim sis posait te from flim Marconl stations down there and npread it among the people. It the Promier wiil promisn that and wilt get the tefneraph poopte ta tom thir theis, the
people woald get good sarvice. 1 will dive Mr, Chalrman =y word of honet that aothing will be left undune if the Fotat lowstir with thet tme op tr thin esstise. I apprecliste the seconaity of E. I thimk that the beas should eall, De thare mall of po mall thare 1 bave heard sin complaint agnlunt Capt. Wm. Whinsor. He ceve information as fast We he could. The reason wae that he Lelng a flaborman, knew the neeeselty fote lo, and I beitione the Geveroment will do all in their power to thelltate this work,

MR. COAKER-Mr. Chatrman, what to the snawer to Mr. Jemalnget What Ar the Gcrernment going to dot What progrumime are they putting down? I roderstund they are goter to kot a tur They dary intriod to hire the Thatetai" do isert There ie mo ascommadation uboerd ber. Iat the Boat first have scoommodation. and domt liet it be a Jolie. Toe want in amurt, gooh seqworthy boat which will be well looted after.

I agres with 3tr jesuings A boat ts nio good if ahe mirses certaln ports. This is what the poople complate ot Cet the moat aultable steamer in the eountry, and if rou do your best to bave her property looked after no one wilt complain.

## MINISTER MARINE AND FIBH.

 ERIES-II lir fumponible to direct a paptuith from St. Jobr's. What lo want tit is a man who wili wee hir opmison seches whit follew around visg fiscretton wis to where to pu. These Were De inatractions afrim to Capt. Parmons last rear Captals Winaor in the only muse that erer carried out that anrvice to pood astivtaction, but tr Incurred the Jealotry of the Doms Flata Bay poople lucarise be townd a Conceptton Biy schpoiner in once.MR. -ENNINCS-1 mould Hise to eall attention to the Rele boats it the Clydot would go obece a week it
would sult the poople very well. I hope the Government will arrange for a good sorrice thls year, and finclude places like Point Leamington in tha schedule.

MINISTER OF MARINE AND FISH-ERIES-Mr. Chairman, I have heard of no application from these places. I do not think I am far astray when 1 say that I do not know of any Government getting a boat to call there. This place has become a lot more impertant alnce Mr. Crowe took charge there, and I think spplication was made to my frlend Mr . Coaker. I think it is only fust and right however that these should have the services of the boat.

The Chatrman left the Chalr at 6.30 until $80^{\circ}$ clock.
The Chalrman resumed the Chair at $8 \mathrm{p} . \mathrm{m}$.

MR. JENNINGS.-Mr. Chairman: Before the vote passes, I would like to say a word in support of the atatement that the Minister of Marine and Fintherles made here before the Hoase adjourned. Polnt Leamington not only has a large popuiation of itself, but there are many other settlements near by which would beneflt almost as well. It is. I think, about ten or twelve milles from the nearest port of call of the Clyce, and about twelve miles by road from Botwood. There was a man down there last Fall that wanted to get some fresh meat over to Botwood. He slmply had to drag it across, because there was no other why by which he could get it there. There are a number of others, too, in that pert of New Bay, to whom it would be a great advantage if a stosmer were to call and give them a chance to send their goods in that way.

MR. COAKER.-I was hoping that the Colonial Secretary would have some reply to the observations of Mr . Jennings, because this matter is very Important.

AT. HON. PRIME MINISTER.-I was going to may that juat hefore recess the Colonial Secretary and 1 conferred in relation to the matter. I hope to have a conference with Mr . Jeanings and others to soe if the destred end cannot be brought about.

MR. GRIMES. -Mr . Chafrmain: With respect to this vote for Brigus of $\$ 320$ for the operators in the telegraph office there, I notice that there is an increase there of $\$ 120$. Now, I nust utrongly protest against this vote, becanse 1 consider that the Government bas eatablished a princlple whereby they are aponding monog unnecessarily, for no usetul purposo whatever, and merely, as far as 1 am fnformed, to meet the requirements of certain supporters of the Government. Now, Mr. Kent raisod a principte here this afternoon, namely, the filling of vacancles in the elvil service by promotion. If a vacancy occurs, the person filling the position immediately below that should be promoted, if he is found to be qualiffed for sucls promotion. In the telegraph office at Brigus there was a vaciancy some time ago, and the anslstant, instead of belng promoted to the office, had to give way to a person who had no experfence whatever in telegraphy. The consequence was that there was zreat dieestisfaction amongst the people there. Now, 1 do not understand, Sir, how the Government can think that appolntments of this sort In any wey help them or tend to Increase thefr popularity. I venture to assert that in thin particular instance, that appolntment has done the Government is great deal of harm-much more than will offaet any good that they can posalbly derive trom it.

I have to object to this Increase of \$120, when there lias been no fncrease in the recelpts of the offico (the recelpts of that office have avernged for the last four years in the neighbourhood of \$338), anil when
there is no increase in the work to be done. I consider, Sir, that this is one of the cases in which the Government is using the public moneys in an extravagant manmer. There is an oftice at Clarke's Beach the operator of which gets $\$ 120$ and the aselstant $\$ 36$ That office has to do an equal amount of work, if not more, than the office at Brigus, and yot wo find thils difference of over $\$ 100$ between the two offices. The only answer that can be made, so far as 1 have been able to learn, is that the Government has had to satisfy the demands of certain supporters who have beeen looking after theso poaitions.

This is the system that has been followed on for years. The point that was raised by Mr. Kent here this afternoon should be followed out by the Government. These positions should not be filled by persons who are not qualified for it: simply because they supported the Government in the last election. We have heard here of the demoralization that has occurred in various departments, Assistants in these offices find that despite thelr loag yeara of aervice, they are set astide for those who have no qualification whatever. There should be something done to remedy thls condition of thinge. I should like to ank the Mintster here to-night, to put in other effices the $\$ 120$ voled for Brigus, whinh doee not need it. The Ministers beHeve that thore should be a ro-adJustment of the expenses in connection with aome of the offices. I have found out that in these two offices alone the Government can meet the need und satisty the peoplo much better, and also the assistanta, showing them that fate play will be ghten them in the future 1 should like to say that this vote of $\$ 180$ increase should be divided up between Clarke's Bench and Port de Grave. more eapecially Clarke's Beach. Tho

Colonlal Secretary is well acqualnted * th the recelpts that como in from that office, which are juet as great as those coming in from the Brigus orice.

HON. COLQNIAL SECRETARYMr. Chairmna: I may asy in reference to the remarits matle by Mr . Grimes, that the member referred to the appointment of an asslatant for the Brigus offico. The azsigtant in that office fo considered by the Postmaster General to be too young. Sho is only siftem yeare of age, and too young to have that responsibility She was rephaced by an older person, with the hope that before loag ahe would be capable of reauming her duties in that offce. But there has been no destro to treat her unfairly.
MR. COAKER.-Mr. Chairman: I think that it is 'n very serlous matter when a member complains that ton much money is sipent on his own distrlct. The Government ought to give if due consideration. That is a very poor anower to tho member's question that the girl is too goung. It is very rane that you will find that members get up and protest againat so much expenditure in their own district.

MR. WINSOR. Mr. Chairman: I may say that this sort of thing has theen golng on year after year I do not see why the Government wants te drop this grant this year. The Gorernment is cotimuing this extrava. gance, and I do not agree with it. 1 think that the peopie ought to be given P Cair show The office was only put there for the use of Dr. Smith. Brookfield ts one of the fishing stations as well ate any other place, It does not tequire ereat expense on the part of the Govorament to pat somahody there. The Government should carry on thits grant. I hope that this will recelve due conalderation.

HON. COLONIAL SECRETARY.Mr. Chalrman: I wish to say that this
office was originally opened when Dn Smith was at Brookffeld. Afterwards Dr. Kean succeeded Dr. Smith, but he was not an operator. I have no doubt, however, that the Government will provide for it. I can assure the hon. member that if it is found practical to open that office, it shall be opened. The only reanon why it was eloned, wha because of the want of accomodation.

MR. GRIMES. -Mr . Chairman: The people of Cupids again ask for a telegraph office. They want the telegraph office. They want the telegraph line to extend from Brigus station to that place, which fa a distance of about a mife. A man woutd be only too ready to take charge of it. It is not convenient for them to go two or three miles in order to send a measage which may bo very important. For the emall outhy I think that the Gov. ernment would do well to consider this reguest.

HON. COLONIAL SECRETARY.The hon. member has already written me in reapect to ft . I wrote to Mr . Saunders on the matter. He sald that since the office was put there it aId not warrant that expense, because the business there is too small. That phase of the question has never been represented to me, 1 will take a note of it and see to it
MR. GRIMES,-Mr. Chalrman: In reference to what Mr. Saunders said. the man who controls the offico there Is a business man, and the people there do not want their amairs known to this man. I think that if the Colonial Secretary would constder the matter, he would natisfy the public senerally.
MR. STONE, -Mr . Chatrman: We have already presented a petition from the inhabitants of Trinity Fast for a telegraph office. I think it would be only fatr for thom to have one. 1 notice that $\$ 120$ is dropped this year
in connection with Clarenvile. 1 think that if that $\$ 120$ was given for an operator in Trinity East, It would be a good thfing.

MR. TARGETT,-Mr. Chairman: The people of that place are not at all satisfled with the condition of thinga there. I got several letters about the matter. I would like the Colonial Sectetary to have a change made so as to give satisfaction.

HON. COLONIAL SECRETARYMr. Chairman: I have not had any notiffention about dissatisfaction with the state of aftalrs down there At least not within my memory. If the hon member has had letters I will see what can be đone.
MR. TARGETT.-Mr. Chairman: The fault down there is not with the operator but with the fact that the office is in a buriness place. There are soveral people speaking about it.
MR. STONE.-Mr. Chairman; I have also had letters from the same place about the same thing. Two petitions have been sent to the PostmasterGeneral, but I don't know what has been done in the matter.
MR. LLOYD. -Mr . Chairman: The objection is that the office is in the chlef buslness place of that settlement. The people object to having the business and telegraph office in the same place.

MR. COAKER.-Mr. Chairman: I know something about thle matter. The trouble in that place is that you have got to pass through Batton's ntore in order to get to the telegraph office. What is transacted in the office is known outside in the shop. The office ought to be put somewhere else. If you do what our men ask, you may be taking some of our votes from us, for that is the sort of thfng that gent us here.

MR. COAKER-What is the explanation of the increase of vote at Springdale from $\$ 120$ to $\$ 360$ ?

HON. COLONIAL SECRETARY I am not in a porition to atiover that question Just now. I will take a note of it and let you know to-nuorrew.

MR. HALFYARD.-Mr. Chalrman: 1 notice a number of places where an altruance is made fur incpuoneors, In Pegro Dintrict there is not a messes. Ene in any of the Telesraph offices. Appilicatlonn than beon maden for is mers songer at Fogo, and I woeld nugerest that when supplementary Supply in brought dowa thai the Misisiet will
 of maney tor a meneaniger at Pogo proper it has been trought to the * notice of the fovernmernt amt I ame H0 ratorn miy thine itiontt ant he a messinger in Fogo Office as well an in some athers.

MR. COAKER.- 2 tr . Chnlrman: This afternoon I meferred to thie matter of the repairing of telegraph Hines after Interruption. I have here now is atatement that I van glve to the House to becie up what I statent. The bramet line conneeting Twillingate and Foge on Feb 11, 1914 was interrupted and it was not repaitrol anth the nest day it three otelnck. Pote 16ch, the theterrupted at Chanse islande for two days. Aprli 15th, between Clarmaville and Brooklyn, Hae interrupted, tooik two Anse to repart: Apft 1ters, titimupHon at. Weatorn Cover took until the dugs to ropair: April 16 jh , interrap at Chanarn Islands, topk three days to ropsin. Prom Meavertion to Chruge tis innds shogld not take longer than sis hours to zet over. Why that iaterrupthon took no loag to rupair we curght to fled eat. What we want to hrow is are these offieflele at thetr posta" Jime 16th (th the aumain) an fater ruption at Mangrave Harbour which took two deyn to ropaif: Junn 20th, Interruption at Moreton'i Harbour which took a day to repair; Juty 6 th. amother Interruption at Miusgrave Harbour toole one day to repair: atill an-

Qthet interrupition at-Harbour Breton fook anothar day: anpther interruption Nt Narthem Mittit tpolk a dar; Oct, *rd fatiertuptind at Herring Neck, to is not in wry lane diatance there and yet it trolk two or thiree tays. October 4th. fnterruption को Macgrave Harbeur setmin toolk two daye to repair; October 17th, Interrapriati at Fit Cove took one tlay: Dctoler 1sib, interruption if Mremmont Cour took twe tayn to rypalr: 190, thrarruption at Parmon' Fond tov daza. Ascaher intercuption at Old Merflam tonk two days 10 rethir Thist tis a verfous matter. There are two ripairmers and it took them three dayn On Nov, 25th Port SaunAern intarrupted, torik two daya, 26th Thay de Yente took four daya to rofait. At Bamen Bay it took one day 1 i mpair. These are serious matters land if it eriflent that the repmifrers tre ant dotis thelr work. That is not as very ereatiabie showing for the Depariment, and the head of the Departgent is mot dotert his duty, when he Nrmitse this to zo in. I know enough ibout repatriag lines and the cause If feterruption to show you that these men ate not dolag thenir daty. We tiave a largn nambor of repairers: they cove un $\$ 12,000$ a yoar, and we ought to fut better matisfaction from them. We fasht to have mi emuluiry foth bis Fatter and find out where the trouble le

## सीTR-ut.motnrs

Mh. GRIMES.-3tr, Chairtagn: 1 zoulif like to art Dhe Mitnister whether the malarn on the Iahrader represents ent or two coll-tarst

HON, MINISTER FINANCE AND CUSTOMS.- I think that rote covers thin two.

MA. JENNINGS-Mr. Chalrman: I Fould like to ask the Government to tekn me tritn thetr confitefice on the quaition of sub-collectors I belleva there arn a lot of aub-collectora that eould be done without. There are two
that I know of. one at Exploits and Moreton's Harbour. The man at Herring Neck gets $\$ 1150$. Herrink Neck ta certainly an important as etther of those two places and gets fust all truch work. If the collector at Herriag Neck gets $\$ 159$, then ther can đo the work for the same newre at Moreton's Harbour and Fxploits. These men have other worlt to to and yef they are paid these salaries and they allow their work to interfere with thelr duties of collecting. Thoy have nothing to do fut to so around talling for the Government or somethfig elee I think we will save vuite a conalder able sum if thits collector syutem was done without

MR. COAKER-There is quite a lot of that talking for the Government by thesa sub-collectore, or somethtug wonse. Thore is cortainly a considarable amount of money expended the this work that could the saved. Thie man at Moreton's Harbour is unnocessary, I am sure that I could get a man who would do the work for $\$ 50$ Whfle the Covernmout to now payitig sse0, and f am sure the man wou'd feel himeelf well pail at $\$ 50$. The same applies to Explotis where ho gets \$to0. Yon coutd casily हet a min there for $\$ 50$ There is vory little wort to do as aub-oliector. These matters are too herious to be passed over Hght: If and 781 have stated many timm already it is by collection mioney and votes as theae you lose your votes at the election, It fa by wastages, su-h as thesh that we got our votes is the last electlon.

RT. HON. PRIME MINISTER I have been wonilering all alorig how you over got tof Dow $T$ linow.

MR. COAKER-Woll now you have the mystery soired and 1 hope $y \mathrm{~m}$, will take my advice.

[^3]words in reply in regard to lowis. porte. There is a great deal of work to be done there. It is a dlatributing polnt for two steamers. The amount of dutfer collected there list jear was ti000, and the salary pald war $\$ 5 \mathrm{bve}$ fo rekard to Moreton's Harbor, that is a change asked for by the people. The sohooners bolng to Labrador cloar from there. The duttes collected, shown bere were $\$ 1000$. Ins at ary of $\$ 350$ to pald to that officer more as a preventive officer than anything eleo.

MR. COAKER-ME Chatrman: I tany say there is no need ror a preventre officer at Exploits or at Lew. fopport; but oven if there is any prepontive work to do you could eaelly get a man to do it just as effectively for 950; I see one man here is getting f15 and he is dolng Just as much work an the man ofther at Explolts or Moreton's Harbour. He is giving aatisfaction. That man ought to have his ihotograph put in the House here. The duties of the man at Lewlsporte 1 well know I worked at Lewlsporte as an eporator for twelve moaths and 1 know what he has to do. It is not a Zuay port aow although it is a port of diatriburtion. We could get a man to do the work for 450 , If you will pay the man 1 will appoint one who will take $\$ 50$. It le now costing 2900.
MINISTER OF FINANCE AND Customs.-He is limited to $\$ 700$.

MR. COAKER-LASt year he got \$900. He is a good man, I have nothtyg ayamst him. He is fit for somo reeponelitle place like Grand Falts whem he would bo required; but it is unt necessary to pay hitm that much bt Lewlsporte.

MR. MALFYARD-There in a new appotitment at Fogo. Do you know who that offictal ts?
MON, MINISTER OF FINANCE AND CUSTOMS-T think the appolnt-
ment bhe been made, but 1 do not know the man's name. His nalary was in the Estimates last year. 1 do not think it te a new appointment.

MR. COAKER-What is the amount of the conttogoncles expended last year by the Customs?

HON. MINISTER OF FINANCE AND cUSTOMS-I cannot say offhand Bomethtig over the amount roted.

MR. COAKER-It I had a statement of how much contingencles were expended we would know how much you were overdrawn.

HON. MINISTER OF FINANCE AND CUSTOMS-1 have given repltes to that question to severat membera.
MR. KENT.-Not as to Depart. mental contingencles.

HON. MINISTER OF FINANCE AND CUSTOMS-The Customs was not overdrawn.

MR. COAKER-I see here Mr. P. T. MeGrath recelved $\$ 600$. Might 1 ask what that fil for
hon, MINISTER OF FINANCE AND CUSTOMS-1 think that you will find that ts in connection with the Commisaton here this Bummer

## MR. COAKER-ADd Dr. Grenfell

 $\$ 200$.RT. MON. PRIME MINISTER.That wais for nervices in connection with wome diphtheria cases which broke out in St. Bartie district. At least that is what I fancy it is for. He whs ordered to go there by the Gowernment as Doctor.

MR, COAKER- 1 see here Mr. Warren reecived a certain sum of money,

RT. HON. PRIME MINISTER. That wap when he was sent home to England as Spumker for the Colony.

MR. COAKER.-Mr. Chalriman: I
consider the Minister of Finance and Cuatoms has indeed earned his conduct money, and 1 congratulate him on the manner in which he has controlled his temper. He lost his temper rather on the firat evening, but apparentiy he has repented, and it lie keepa on as be has been going we shall have no fault to find with hill 1 presume we thall refer to these mattera again, as I have several matters in connection with which $t$ would ifke to mnike a fow remarks:

Mr. Speaker resumed the Chalr.
The Chairman from the Commlttee roported that they had consldered the matter to them referred, had passed certaln Resolutions, and anked leave to slt again.
On motion, this report was recelved and adopted, and it was ordered that the Committee have leave to sit agaln.

## LOCAL AFFAIRS BILL.

Pursuant to Order and on motion of IRL. How. the Prime Mintstor the Honse resolved itestf into Committen of the Whole on the Bill entitled "An Act Hespecting the Admisistration of Local Affairs."
Mr. Speaker lefi the Chair.
Mr. Pursons took the Chair of Commiltee.
MR. HALFYARD-Mr. Chalrman: I beg to make a few observations relative to this bill. This bill seoms elaborately provided with many secthons to meet I suppose every consideration possible. A great many aluses have arisen during the course of the history of tocal affairs. I would tike to rend to the Committee the follow-fing:-"During the winter of 1916 a petition signed at least by Mr. Halfyard'i strongest supporters, and forwarded,we presume, to that gentleman had failed to elicit favorable results. Therefore it was inferred that it was"
useless to approanh the member for Fogo disurict with our grieyances" Now before I make any comment on this extract, I would Hhe to know eractly what funds are at the disposal of these Boarde.

RT. HON. THE PRIME MINISTER -I think the Hon. member will find that the money allocated in this respect is given to any Board on the reconmendation of the sitting member.
MR. HALFYARD-That brings me to the polnt 1 wish to get before the Commiltee. This grant of twenty thousand dollars has caused more trouble and abuses than any other grant we have in the public serike. Monoys solieited nominally for public benefit are very often diverted to private uses by unscrugulous men to advance their own Intercets. The district of Fogo rocelven $\$ 691$ which I understand from the remarks of the Premler is its share, but I know many examples of the aguse to which this benefit has been put. I am aware that at Tuting an allocation has been iont to Mr . P. T. Bries in this manner. I made enquiries from the Minlster Martne and Fisherles who informed me that the Deputy Minlster Mr. Goodrlige had given authority that this be sent out. Later I learned that thle authority emanated from the Executive Councll. Mr. Goodridge at the time was away with the First Contingent, 1 intended making enquirles on his return but learned through the papers that Mr. Croable was the authority for the allocation. With permiasion of the House 1 will read thls. "The public whart here had fallen into disrepair, and the Road therefore to the Poatal Telegraph Offlce, had been Ieft in an untinished atate. Through the kindnees of the Hon. J. C. Orooble a grant was secured and both wharf and road
have been put in excellent condition. Wluy this should have been left to the member for Bay de Verde to look to, is difficult to explain but it caused many to regret that we had not secured such a representative for the diatrict as Mr. Crosble."
1 do not suppose Mr. Croeble did this for the sake of udvertisement. I regret that ho is absent from this chamber now, Later 1 learned something fusther in that connection. With the permisston of the House I will read this "During the winter of 1914 a petion signed at least by Mr. Halfyard's strongest supporters and forwarded we prosume to that gentleman, had falled to elicit favorable results. Therefore, it was inferred that it was useless to approach the member for Fogo district with our grievancea.*

This brings me to the point I wlah to make in connection with the alloeation of these small grants. Why shonld one member interfere with matters in connection with the distriet of another. It is mean, small and contemptible. I cannot understand it. Perhaps the bon, member will explain.

Now I do not blame the Prime Minfeter. In fact, I take this opportunity to say that I belleve his intentions are quite good in regard to the rights of sitting membera. 1 belfeve his intentions aro to carry out the state mients that he made last yesr. In regard to thls particular matter the Executive Government evidently ald not know anythink about it, because when 1 drew the matter to their attention 1 recelved a very courteous reply. It Is unifalr to the Prime Minister for any member of his party to go beyond what he sald and do such a thing. In doing that they show they have no respect for their leader or bis statemente; by thelr actions they cositradice his statements. Now Str, I
do not intend to let thie matter go wthout some remarts because if any member of the Excoutive can send $\$ 50$ to Fogo district he can do the same thing for the whole elghteen districts In the Island. I would uke to know how, say the member for Placentia, would like to have some other member allocate money for his district. I ask any member of the House to take It to hilmselt and ask himselt how he would like it. We have a very amall grant and we are trying to do the best we can with it and nobody else has any rieht to come in and sand down allocations, 1 hope that by draw. fing thie to the attention of the Gorerument such a thing will never hap er agaln. It is the same old thing. If yon are not in the Covernment yoz cannot get anything. We sre now brinking in an Act for the administration of Local Affairs. It is a very important thing to have these boards elected and to give them the power of spending all the money to the very best advantage. I think there is a great deal in what has been sald by the member for Ronavista, Mr. Morine, when he stated that each tocallty should be siven control of the Public Heaith, the Road money, Marine Works and other local matters Whe that. They should be made to depend upou themselvea and they ahould nssume the whole reaponalbillty and it chould not be the business of the Government to be dabbling in every petty matter of local interest. I hope this bill will be the means of siving the people a moro independent spirit in that connection, but it will be of no use while we are giving some districts a certain sum of money for bullding a roed and then giving to an other district a especial grant nt the expense of the other districts. Wo must make it equal in every locality. Every distriet should share in the
grants as they share in the making of the revenue, and when they know that no one else is beling treatod any better at their expense they will use their money to the best advantage and tax themselves for their own improvementa. Without wishing to occupy the attention of the House on this matter any longer I truat that by next year this bill will be put in operation and that we will have no further cause for complaint.
HON. MR. CROSBIE-MT. Chairman, in regard to the matter referred to by the member for Fogo-the expenditure of the $\$ 50$ in his District -1 mny say that when that was done tiere was no fintention whatever of in. terfering with his rights, at lenst so far as 1 am concerned. As far as I remember the facts. I recelved a letter from a man in that district who fs a frienc of mino. As far as allocatIng the money is concerned I had nothing whatever to do with it. I stmply sent that letter to the Board of Works. Whatever happened aftor that was none of my business I had nothing whatever to do with the atlocation of the money and had no wish in any way to interfere in Fogo district. I hope that explanation is quite clear.
MR. HALFYARD-Then it was done by the oflicial in the Depatment.

HON. MR. CROSBIE.-I do not know. If a letter comes to mo from any other alistrict, I simply send it to the Department. I then feel that I have carrien out my obligation. I never troubled about it. I do not wiah to bear anything allout what I did. Someone wrote in the paper praising me in connection with it. I would be much happier if he had held his tongue.
MR. HALFYARD.-Then 1 underytand that you sent this letter to the Department without any ropresentation whatever.

HON, MR. CROSBIE- Yes that is it. MR. TARGETT.-Mr. Chairman: I would like to ask the Prime Miniater if this Bill is as good as the one which le promised last year. Did he not promise that every member should have the allocating of his own money. The money that is allocated to the Diatrict of Trinity is $\$ 1800.90$, and out of that sum there was $\$ 850.00$ sent to different places without our knowledge. I suppose that will not happen agatn.

RT. HON, PRIME MINISTER.-I do not know anything about that at all, but I will make enquiries.

MR. TARGETT.-But after thls bill Is pasoed 1 want to know whether the sitting members will have the expenditure of all the maney or will the snme thing fiappen agaln?

RT. HON. PRIME MINISTER.-NO, nobody will have anything to do with it except the sitting members.

MINISTER OF PUBLIC WORKSMr. Chairman: In rogord to the matter reterred to by the tearned member for Trlaits. Mr Targett, 1 explained that a couple of days ago. His colleague, Dr. Lloyd, was satisfied with the explanation: He asked me for an explanation of these allocations anid I pointed out what had occurred, and Dr. Lloyd complimented me on the mattor. He dld not hold me responsible tn sny way. 1 know how it was dona I would not have done if if 1 had not thaught it was for the benelit of the diotrict. I could not get into commundention with any of tho sitting members on the guestlons. The allocetions were made for uselal public works, and the works were performent, but lad I known that I was not doling somathing for the benefit of the dis triet I would not have attempted to interfere at all. Certatnily after this messure passes no one will bo able to interfere, I had no intention but the most homourable one at the time: I trought I was đolng right, and I

Would to the sime to-morrove if I thought it was for this benerit of the ilstriet. That ls the only explanation I can pive. Dr, Lloyd stated that he thought 1 was dolng my duty. I um quite misfied as long as the other ruembers are watisfled.

AR. TARGETT:-We may bo sathflell for what hins happetied in the tast, whlle wo may not be watisfied if unything similar is done in the fature

MINISTER OF PUBLIC WORKS.I will not interfore with Trinity again, ringway!

MR. STONE-3Tr. Chatrman: It may tio that my colleague, Dr. Bloyi, may not have known the number of alloca-
ous made by the Minister, of cournc wo to not blamin the Mintiter altofrether: We think thint someone else was in this matfer with him. There was a sum of $\$ 620.00$ allocated to Heart's Content. There was $\$ 50,00$ to Chance Cove, and $\$ 100.00$ to another place. Those allocatione caused coneltcerable trouble; the total was $\$ 805$. We had requikitions filted out and gent them to the Department, that we had promised the varions localities out of these grants, but we aeyor lind the money to do it. We went up to the Department and foutd that $\$ 805.00 \mathrm{had}$ been mpent whthout our knowledge. 1 bope that in the future we will have no further bother with the Departmath. With regard to the Department of Marine and Fisheries, we are gulte satisfled. I bellove that the Misfeter is very conscientions and is going to do what is risht hy the members of the Dtatriets. 1 congratulate him on the stand whinh he thas taken. If other Mindsters took a stmither stand ye would have no complainta at all. We have never lad may complaint to crake with him on that polnt. I beHeve that the Minister of Marime and Fialieries la doing what he can for tho benett of the people.

MR. HICKMAN:-Mr. Chairman:

White on this subject I would like to sisic the Minister of Fuble Works to let me lnto the secret of how the money is allocated in Trinity and in Bay de Verde. In 1914 I received repeatadly letters from the distriet, asking if there was any money and if it was golng to be allocated. I sent letters to the Minister of Public Works, ten altogether, and I nover received any reply as to whether or not the money had been sent to the District. Finally these people wrote me charg. fing me with not siving any attention to their questions. One man said I was not giving the information that he wanted and that he had written to Mr. Morine to see if he could get it. I have no tidea as to what has been done in the district. I was surprised when the member for Foro stated that my colleagae, Mr. Croabie, had nent $\$ 60.00$ down to Fogo. The public wharf at Freshwater has sallen down, and there has never been any money alfocated to repatr it. The Minlster of Marine and Fisherles says that no money has been altocated. I would like to know how matters in these districts are being attended to.

HON. MR. EMERSON.-Mr. Chairman: Before this Bill goes through, I would like to say that I am m full sympathy with it. I regret thet during the past few years this statute was not on the book, and in working order. When I took hold of the district of Fortune in 1908 I found that the whole area of country from Garnish to Pushthrough had about six or seven boards. The result was that only the large places in the District received any public moneys. The smatter ones were entirely neglected, and some of them, under the old syatem, were recelving no money at all. I hardly seo how the District of Fortune is going to take advantage of this Act. It will be difficult in that district to find sections with elghty qualified electora residing within certain areas. In fact

1 know of only two places where that will take place. I find myself that the best results that cim be obtained are obtained in theso amall places by giving these places separate boards. In fact some places have only a half dozen people, but even in that crise it had its board. That board milght only have one representative, but the money went directly from the Department to that man. and did not go throush difforent channels. I find in the District of Fortune Bay, under the system that I have inaugurated, that there are only a few places that would be able to avail of this Act: St. Jacrues, Har bour Breton, Garnish, Pushthrough Ship Cove. These places will have elective boards, but my only regret is that theac are the only places that will come under the Act.

MR. KENT,-The present existing boards will remain, no matter what the number of voters 18.

HON. MR. EMERSON.-In the District of Fortune Bay there are forty boards that recelve their money direct from the Department, and everything works very well, but I am sorry that they eannot all come under this Act, because these representatives of the people will have some experlence of these mattera, and I couslder it a very good thing that sitting members should have nothing to do with the expenditure of public moneys. it would relleve him of at lot of responsibility: dolng away with a considerable amount of correspondence concerning road boards; attending to petty chaimu which only make him most unpopular, there is no doubt ahout that. No matter how much you work in a district; no matter what you may do to get a lighthouse or other public work erected, when it comes to an election the greatest trouble you have is over the man you have appolnted to look after it. It is the same way with the Road Boards. The member for a district should not have anything to
do wlik mocrumending the bounds at ail. There shocult to nome otber aye
 it Teप lurge entent remalion thene truaties leccause the distiliution abd eapeafliture of the monnge is in the tuantr of tocit boarte, she these boanth aro renpuinithter for thir cupethltyirs and it threy do not do an wrilh an might be, as for an expenditare if conemed. the pochple cus no loway filame the membere to Tortmo thry they will "till have the samer ofd mytom to a eortaln extent, berauie thiew canset tate sitvintage of thtr Art a tope that thlir Aet wit be tound so wark well, because it is a matter which it is rery destrable to corry oat. it is infented thar thit peotsit itutht tirncentrol of the meserge for their Iocalsthes and the expentmarm and th ne there the members of the thetrict ef = great deal of thle tepuantitty.

MR. CURRIE-MIr. Chatrman, fat a vord fir combection with this matter 1 ain ugreed thit ineter the act As it mow atunde, we sennot have an election this tall. The aresas and thetr begndartin have to be detune by thirty roters, and the people wbo are away firhing will not be home uil aften the election. It will be im. ponatble to deftie any areas undor thosn conditians. I think it would be a grod thing if the nlection was peatvoiki, anit befl next year turital of thins then when the mes ceme bomen they cas arrase the elections and dutime the areas for tBemselves. I Fôtil move as stiventment is soction Ne. 12 proviatig thest Burte shomith be ercested for this yeur, Az soes as them tr ant opbartiutly, and ekectlon will be telle 1 think it would be mell it the esection took phace in Jumusry of Felurvary lnstrail of in November,

MR. LefEUVAE-Mr. Chairman: 1 fully andorse the remarks of my col teague, Mr. Currie. It in imponalble

Glat thie peoplin of Baris can laver helt olectoue when on maty of the tive nre iveny fram heme.
HON.PRIME MINISTER-The monl. thas is Turin, is, Mr. Caalrmati, wo thr is I-merritand, that meven or eleht binttrmenats uppoint as man ench and fome theas min meet and tranmet The trumens I thould sugrent that 4t wruld be better to exctute thers that is. the aettlamente of Burta prop in. The dimeuty is gnt ovar by, excluding furin for the time belnge,with the rikht to come in later I see ao cejrictions in militng this amendruent If with sut aftent fhem adrantives of Ite bill for the whole island.

Mn. Curtit-Thert arb atily five prople tepmerative all these places. A ilici cias ifpotat s roat tourt tern Helif ast me sume mins vili apply to the wher plaese. Bome of the plaren are wo manll that there ure obIf tour or flre woterg thers. Let the peophe tate it ap anemontres math der cile for thmumelres and flime they cas Gave fleir electivn. The most that wa fen do is to make a recommendations i) Par Mintiter of Publle Worlas who In In control. of these mattern, not then miemberi, they only rapronent the dillquicth. in my diatriet nevoral amounts vere alloested by Coptaln Bunla; and I nm gled, if it was nefeenury to have It dunn, that Captain Honie ftid make xhimen allocertions it seems to mee that a certals amount of responallillity zust le left on the Minlster.

MR.HALFYARD-Mr, Chalrman, is It riaht that the Mislstir of Puble Werks Ahoull take upos Mlmalf the frit to make any allocations to any fintrict. When it comes to the buileane et a whart that will cost 9 ano er I 000 , then it Ls sill right for the Mis fiter to errant it; bat in the case of comall mima it is tifferntl. The place eruit be lonpt in repiair, and moder the exintias conditlons the ropresntutafle
of the distriet should lnow as much about it as anybody else.

MR. hICKMAN-Mr. Chatrman, I should like to ask on what authority, a sum or meney was sent to Bay de Verde in 1914.
HON. MR. CROSBIE-If the hon. mermber comen to my office we can thilk the matter over, 1 will bo oxly teo will'ng to agree with the hod. member.

MINISTER OF PUBLIC WORKS.Mr. Chairman, the hon. member will find me at my office at any time, if he wishes to see me, when I will try to fix the matter up.

MR. DOWNEY-Mr. Chairman, there fo no doubt that fhere will be some ciffleutty in carrying out some of these provistone How will you conduet repairs in regard to the main line. Between one point and unother there are at present four or flve boards. At the present time it is under the directions of a commisaton. There are other places to which the same may be apptled. I think the Covernment might grant that without further consideration. I agree with the eloction of boards generally, but I Just wanted to point out how difficult it will be for the Road Boards to conduct affirins fin eannection with the main road.
RT, HON. PRIME MINISTERJust a word or two, Mr. Chalrman, in reply to the hon member. 1 think that there is a misurdorstanding in connection with these Road Boards. Wherever there is a Road Board, the election is to take phace in Novembor next. No nttempt has been mate to alter the present area under those Boards where min lines go through four or cive districts, 'Faike the main Hine from St. John's to Carhotcar. The first seotion is in St John's. That seetion runs as far as Donovan's. The naxt seetion is in Harbor Main; the
next is in Brigus; the next in in Hr. Grace, and the noxt in Carboncar. Where any portion of that main lino is contrciled at present by a Road Board, that will continue to look atter it. In other words, the dutlen of a Commisstoner under the regular Raad Act are not intendod to be in any way affected, So that I think it will be found that this Act, afthough it seems a bit cumbersome, will work out very simply. The main princtple fa simply that boards will be elected and not appolatec. The jurisdiction, as regards area, will be the same as It is to-night; but if Boarde wish to break up-If, lastead of having one Board in Placentia they would like to have thiee; or instead of having one Board in Fortune they would life to have two; and so on, then a certain number of electors can petition the Governor in Councll and that will be done As resards the case of Burin, a section might be added to meet that dirrieulty. This might be added to section 2: "Provided that thila section should not apply to the Councils in the distriet of Burin until euch time as the bouvdaries under the jurlsaletion of these Comncts shal! lisve been detined, in order to oomo under the provislons of thli Act. Upon the said boundarles betng derined, an election shall be forthwith held, as provided for in this Act" I think that this rould meet the difficulty.

MR. COAKER-Mr. Chairman: I don't alfogether agree with the Premifer as regards main line grients, I fhink that all moneys should be unfer the Juriadietion of the road hoards sind should be spent by the boarda and int by commisatoners.

AT. HON. PRIME MINISTER.-1 was going to say that at present near ty all moneys are spent by theoe boards, and will contlmue to be. But there are portlons of the country
whern it ere art an hoarts, Tathe for luatance the secties fram Phacesth to Cape Be Mary'e-over chirty milet -shere thare is no boand at all, as4 whith for not vithin the furfefletion of asy boari. Comminstomers lave to lie apsolnted in cases sech as that.

MR. COAKER-la ptice Where theres are no beards of exasmimencys vill hare to De spent by Counmiarioners: but in caans where there ane tourtis the सufuify mhotett not be upent by Commasmiatien. In the northers districte we woald prefer that our mothers should be spent by nar boards.

TRT, HON PPHETE MNISTERIt will work itheit aut. Of bosures, it Iv nut posalble to deal with every case liere now; but as they arise wn wift bie atte to deal witi them br amendmente.

MR. COAKER-IB that mection 8 (6) Jtit what are to be the gatilifer. thant

RT, HON, PRIME MINISTERThio hore member wil remermber that the Cominfttee consldered it deelrable that where the jurinduetion of a tloard is to be lirsken up, it must on at this frichieit of is larsil ssimiter c t votern. Suppoalins halt a dosen people are timatiofled with a Bloart is a set. themant; the very first thing thev wint to a mow Holort. Thise jaitay it fown that the Jurlatistition of a boart reanuot be, alternd exenpt at the se quest ef a harge number et stretors.

Mir. CoakEr.-Make it 3i per erest.

RT. HON. PRIME MEINISTER-I dent see any objection to thint Elichty per cent. vercit be enoragh to change any boned.

MR. CRIMES-Mr. Chalrnain! I doert understund the sucgevtios made by Mr. Ouaker ahout 8 Be pur emt. In thitt Tr por cont hit thir eitecton in the areat
HT. HON. PRIME MINISTER-YER.

RT. HON. PRIME MUINID, ERL-:t thove that the worts "per ceat" be कusertis after the wort "etenty" in Tabanction (b) ot neection 2, se that Sie sevtion will read: FFirphty por enest of the cosalifiet ruters renlatur withfn then sald fimuts." Then ap foreard to anction 4, prem 2, wab-anetion - (c), thind bat liae That will read: "Bighty per kont of ausilfed electors" fnsteat of "etghty." Then strike out "extating" In the lust line of that section and put in "dewcribed." There is an amandteat alno in section 3s, after the word "smailes" put in "Gor shatl not bereafter avall"

Mr. Spenker rearmed the Chair.
The Chalrman of the Cormmitten ot the White reportat that the Commelties bad conitdrred the hill to them reter Tht mit hint phomed the campe with rowe ameeitments.
on motion the report was reeslved ond adopted, and the Bill wan ordered to herrad a thint time on to morrow. GENBHAL HOSTHTAL BIL.
fiecond reading of 位 dealing with the manamment of the Oenernl Hos: pital.

HON. COLONIAL SECRETARYMr. Bpeaker: I beg to move the secound readiser of thle Bill. 1 don't intend at this hour to mo into the Buil at any I ingels. I wauld ask that it bon read a *eout timn A-T okwervatlons that I mary have to make ite combectinn wib the matter I will tike the opportuntty ef makins later eth.

Pirmant to onter and of matloas of Hien, Colonial Secretary, the Eill entillet -An Act tespectlog the Genoral Ilorptiut" was reail a necond time and E was ondered that it be referred to a Committee of the whole House on toпurrow.
The romaintige Oriters of the Day Were deterred.

Mr . Grimes gave notice of question. Mr. Kent give notiee of question.
Mr . Hilfyard gave notice of question.

Mr. Stome gave notlee of question.
Mr. Conker guve notice of eucetion.
It was moved and seconded that When the House rlises it adjourn untit to-morrow. Wednonday. May 5th, At three of the clock in the afternoon.

The House then adjourned necordlagly.

## WEDNESDAY, Mry 5th.

The House met at three of the 'clock in the afternoon, pursuant to adjournment.

Hon. Minister of Finance and Cuitoms tatited Report of Auditor General on Munieipal Councll Accounts.

## PETITIONS.

RT. HON. PRIME MINISTERMr , Speaker, I beg leave to present a petition from Willinm J. Morehen, Brizadier of the Salvation Army, askIng that the Salvation Army may bo fincorporated. I will give it to the clerk to read to the House.
(Petition la rea/ by Cleric.)
1 beg that this petition be reterrec to a Select Committee:

On motion the petition was referred to a Select Corimittee as follows: ft . Hon, the Prime Minfeter; Mr. Plecott; Mr. Kent; Mr. Clitt; Mr. Lloyd: Mtr. Morine; Mr. Jennings.

MR. MOULTON-Mr. Speaker, I beg leave to present a petition from Harvey and Co and others, asking that a sum of money be granted for
" the erecton of a Government whart and store at Rose Blanche, so that steamers calling there will not pile their goods on their premises, for Harres' $\%$ want the use of thefr premises themselven. In the winter it is very diffeult to get the stuff ashore from thr steamer by the use of boats,
and Rose Blanche is a very important nettlement; quite a lot of business is done there. Fifty thousand ptls. of thail were lauded there last year. I am aware that it will take considerable money, We have eight or nine wharves to keap ud ou $\$ 490$ a year. It is Imposaible to buitd a whart out of that money. I hope that the Gorernfant will grant $\$ 3,000$ for this purpose I ask that this petition be referred to the department to which it relates.

MR. HICKMAN-Mr. Speaker, I Leg leave to presient a petition from the inhabitants of Black Head, Bay de Verde. They ask that a ratlway station be built at that place. When the rallway was first put there or rather near there, it was intemied to put a station half a mille between that Dlace and Adam's Cove. Since then somathing happened whereby it was deeded to put the station at Adam's Cove. The people of Black Head have to travel to Adam's Cove, a diatance of $11 / 2$ miles in order to reach the station. I hope that the hon. Colonial Secretary will give this his attention.

MR. HICKMAN-Mr. Speaker. 1 heg to present a pettion from Wm. Woodford and others of Northern Bay for a small sum of money to build a road: alao a patition from the residenter of Red Head Cove in refkrence to the placing of cod traps. I lueg to refer these pefitions to the Department of Marfae and Fisherles.

MR. CLAPP-Mr. Speaker. I beg to present a petition from the Revd. J. T. Richarils and others asking that a ferry be placed between-Port Saumders and King's Cove 1 shall read the petition, (The honourable member read the petition), I submit that this matter is rather important to the filhermen of that plice and I trust the Department will put the ferry there.

It would not cost much and would be of great benctit to the fishermen.

## QUESTIONS.

MR. STONE—Mr. Speakes. I wishl to call attention to a question which I asked in relation to some moneys went out in 1912 -13 in relation to Catsilia.

MINISTER OF PUBLIC WORKSThat information is being prepared.

MR. STONE-1 do not think thint is any answer. There is no preparaton: as far as 1 can learn no returns have come in. I have had several letbers in relation to this same amount. It was the Relleving Officer who had the money and it seems that the people were not in very good circumstances down there and the least he could heve done was to spend the tmoney and give etuploymeat.

MINISTER OF PUBLIC WORKS.There was $\$ 20$ returned and $\$ 5$ spent. There are no ruturns of that.

MINISTER OF MARINE AND FISHERIES-I beg to lay upon the talile answer to questions asked by Mr. Kent, Mr, Haliyard and Mr. Grimes.

MR. KENT-Mry I tisk the Minister of Puhlic Works it he has got a reply to the question re Bell Island?

MINISTEA OF PU日LIC WORKS -
I am having it copled now.
MR. KENT asked tho Minister of Public Works to lay on the table of the House a copy of the agreement made between the late J. O. Fraser, - Chairman of Public Works, in or about the year 1856, and Mr. Clement Hudaon, of Pouch Core, in the Dlistriet of St. Jolin's Hast, in relation to the right to land suppiles, etc. for the L.lght House at Cape St Francis, und to state why the said rgreement has not been carried into efrect dur lng the bast few years.

MINISTER OF PUBLIC WORKSThere is no contract or document in our department. I think the honour-
able gentleman ealled at the office and was given the came angwer.

MR. KENT-1 think there was a document in evidence at one time. I think it was there after the fire of ' 92 and you will find it if you search. Mr. Hudson has no copy of it. He always depeaded on the copy in the Board of Works Department.

MINISTER OF PUBLIC WORKSThe Secretary bas searched and informs me it is not there. He never saw it and knows nothlig about it.

MR. KENT-It was thore aftor the fire. I saw it myself.
, MR. KENT asiced the Minister of Fublic Works to lay on the table of the House a statement showing how the sum of 81,600 voted for the two Road Inspectors in St John's East and West, was paid in the years 1912-13 and 1913-14, stating proportion paid to each Inspector, together with a copy of the vouchers therefor.

HON. MINISTER PUBLIC WORKS -I beg to table that.

MR. KENT asked the Hon. Minister of Finance and Castoms to lay on the table of the House a statement showing. in detail, all payments mnde trom July 1st, 1914, to date, under the following licads: (1) Pablic Works Contingencles; (2), Justice Department Contingencles; (3) Customs Contingencles; (4). Agriculture and Mines Contingencies; (5) Colonial Secretary's Contingencies; (6) Prime Minlater's Contingencles.

HON. MINISTER OF FINANGEThe unswer is being prepared it will take some time.

MR. KENT asiced the Hon. Colonalal Secretary to lay on the table of the House a statement, in detail. showing all moneys paid out of the vote for Tuberculosis campaign, \$24,000 from July 1, 1914, to date.

HON. COLONIAL SECRETARYThe answer will be up in shout half an hour.

MR. GRIMES anked the Minlater of Publie Works what Is the present al locatlos for the roai from Avondale to Gaskfors, Distriet of Harbor Main: what the ampunt was for 1914, and a cong of the retarns of the expenditure of sull amount, and by whom

HON, MIN. OF PUBLIC WORKS.I will haze that aniswer this evening or early to-morrov,

MP. COAKER anked tho Hon. CoIonial Secretary to fable a statement Bhowing to what district the vote for telograph conetruction wae alloonted the isst riscal sear, anil the amount expended in each district.

HON. COLONIAL SECRETARYThis fuformation is being prepared.

MR. HALFYARD-To asls the MIntster of Mirine and Fisherios to Jny on the table of the House a copy of the ropresontation under which an allochtion of sisi whe made to P. J. Bryan, of Tilting. Fogo Distriot, on September 25th, 1914.

MINISTER MARINE AND FISH. ERIES-That has: already bees arlswered. to-day.

MR. STONE-To ask the Fon, Colonfal Becretary to lay upon the table of the Houso a statement showing (1) Natimes of firus from whom purchased and prices paid per lenot for cable faid in the following places-Mxplofts, Woods Ivland, Bontie Bay, Parsons Pond and Fiswle Bay, Flet Igland, Placentla Bay, Ganltuis, Pacentia Bay, Notre Dame Bay, Grent Burio, \#a mea; हiving the netual purchase prlce per lunot for cable wipplied each plice, and the total atreasth of eable fald In each plitee; (2) How many lmota of cable bave been bought for iocal cable construction up to the end of 1014; (3) How many kmots have been put in use, and kow miny lmets now on hand, and where is cable on hand now lylug; (4) What was the total lenicth of the three cabies and the welght of amme for which C. F.

Lester wias pald $\$ 500$ for loading from the Empire wharf on beatd of the S.S. Baloine: (5) Was this contraet or days work, snd liew tong was he at the job, and what was the verirht of the cable landed; (7) In connection with S.8. Heloine charter, Captatn George Mercer, \$175, claim for loss of contract. The Baleine belng under charter to the Goverament at $\$ 100$ por day, which covered all expenses, Bherritu was the-Gevernment liable to the Captain for loos of contract, and what contract did be base hle claim on 7 ( 8 ) $\$ 52$ for board of Government employees. Who were the Governmeat employees for which the smount wan paid and to whom wan if puid? (9) $\$ 39$ for boand and lodg$\operatorname{lng}$; to whom was the umour! palt! and for whom whs it paid?

HON, COLONIAL SECRETARY. This duestion la rather comprehensive and will take some time to prepare As I get the information I will table it.

## SUPPLY RESOLUTIONS.

The Chalrinan from the Committee of the Whole on Sepply reported cer tain Resolutions which were read a first time as followg-Educatien, \$5. 300: Lifluthounes, Blockhouses, ete.. 109,175: Roais, Brilges, und Ferries, 8175,t28: Cuntomis, \$2c0.715.

The kald Resolutiona being read a escond lime, it was moved that the House concur with the Committee thereln, and tho sald Resolutions wero agreed to.

## LOCAL AFFAIIS BILL.

Pursmant to order, and on motton of Rt. Hon. the Prime Minister, the Bill cntitled "An Act Respenting the Administration of Locs! Affaira, " was Fend a third time and passed, and it was ordered that it he engrogsed, beItig catitied as above, and that it be kont to the Legielative Council with a massago regruesting the concirfrence of that Body in itis provisions.

## SUPPLX.

Puranint to order and on motion of Hon. Mftulter of Finance and Cebtoms, the House resolved itself into Committee of the Whole en Supply.

Mr. Spenker left the Chair.
Mr. Persones took the Chair of Comimittee.

MR. HALFYARD-Mr, Chalrman, as the lobster fishery is practically uII, I think this yote for it should $b s$ dropped:

MINISTER MARINE AND FISHFIR-IES-Mr. Chairman, the fixhery is still beins carried on oven though some dlatricts are not taking it up the in the past. We have issued shout beven Turudrad Hennsen.

MR. COAKER-MI_. Chairmin, I ask that the Report of the Flabertes Comnission be tabled belore wo thke this vate. Are we never going to have that report. It geems monatrous that the House has boen in mession tour weeke and that repori has not boen tabled. I woutd tike to have this Report tabled before we go through these Fittmates.
I would also llke to know what has been done with regard to carrying out the Pure Food Act. We know nothing of course save that Mr. Davtes ban beep appointed analyat.

HON COLONIAL SECRETARY I may say that Inspector O'Brien has been apmotnted Inspector under this Act, and he and Mr. Davies, under Dr. Brehm, are in controf. Onty last weels arrangemente ware completed and in a few days the Bill will be in operation. Last night's Gazette contained these mppofntments
MR. COAKER-is it enly recently that this Act has been put in force?

HON. COLONIAL SECRETARYOnly recently. Owing to the outbreak of the war tuid other thtnge it was shelved for a time. 1 may kay that it bies never been lost sirht of and the

Premier and mysolf have had the matter in hand.

Af regards the Fisherles Report it was only this morning that it reached my offce. It has to ko to the Governor and copies will be typewritten and placed on thin tible of the House:

MR. COAKER-Mr. Chnirman, it Heemn too bad to be finding so much fault I know the Government luas a lot of worlt to do; but it seems motstrous to expect us to go throngh the Fisherles Vote withont having that Report The Houze has been in session ever since the frrat week itt April. It ousht to bave boen called tir February, Now we are expected to rush matters through. We cannot discuss the flisherfea untll we get that report and see what is in It.

Now with resard to the Pure Foods Act. That Act wits pissed lest year and not put into force until recentily. Hut Mr. Dayieg has been drawing a salary dince lart May or June, He has been recelving a targe salury of $\$ 2.100$. Last year I noticed a lot of boys golng along the street offering beef for sale at 34 a liarrel. Beef was also advertised for sale by a Water St , firm at pricee which showed it could not be fit for human food. I sent a copy of the advertisement to the Premier but I do not know if anything was done th the matter. This fleef had been lying aromad thetr store for a long time, and was belus sold to outport men. Now there are a lot of thing to be dond in comnection with carrying out this Pure Food Act, and if you are going to give a salary of $\$ 2,100$ to Mr. Davfes, make him go to work and earn It.

Now there it ninother mattor to which i wish to refer. This is the matter of the travelting expenses of the Governor. 1 notleed from a atatement the other day that $\$ 2.500$ was voted for truveliag expenses and en-

Bertainm st. We huard apothing about etukrtuinment कोtas we prosent the Fote. Whes oe inerwased his alary wx were told thet thils therease waa peconsary becausn for ope thing lee hail to so a lot of entintaliningt pare Aleulariy last yeaf, as be hail to enter tain thi Dotninipty Trade Comimiat tuturs. Now the vote for travelitng expenseu lald down in the Eatimates Was for travalitng expenned and sut eatertalument. Now his nalary was Hot enouph for hlm, and you go to Whall sut allocate that vote for travAlifit expenses to him mouthly Eff. then hlim, F208.32 a month. Now last Intumur our men came here and ofInred unr services to the Colany and wiucrifieat their thine, mad 'thd not ank For wiythlag fer the semfan; and His Mucrilehoy Inatent of econuminlnes and kerplag towa then, vanthacs roes atid puts inle \$30s a month frotn the Cer. sirumint. There has beesi no more monatrous tranaction by the Oovertrmeat sinie I hiare beres a member of the Howere than that one. When His Everelleacy the Goreranr, the hlghent is flan lasi will ytaop no low as this what cait you expect from smatler mus whe work for the Governmint In nall jarts of the Colony, I Jegret thinh Ltifi thing han oocurred, and if Ils Noxpullency land any rewjuct for fils puaition or the Government far Ilieiri it could not have bappened. I Am uierry that owing to thit actons 4) Hin threetlescy no member of the Y. P. U, has beam shie to acoept an Invitation to Gorarmawit Foase, mor will we whila His Excellesey fa therre. Lant Fhar the Fuherntem'e Uplosi grnnared a petition neikine for Els rroalk, lutat re tha net send it beealise we all mat slaly to emharrase the ilfotse fevernment. We stily have the fverition, howewer, shd we certainty de ant Intend tie remaite eulet if Hifi Ducelleniry attempts to keep
an talultur that \$129s from the sute.
it sloes not belung to him and nhould not hare leen patd pithent be tas roorhern is ahow the amouat actualiy expended.

We are ugain maked to rote 124,000 por Tuberculeas. What good has that Tote donet I hastice that some sre get. tieg a los of plekings from that vote. The imost notatile care th that of the Buctor. whes ertu-83,700, it would murpriee atyone io go through the accounts in coanection with that votel. and heen the amounta pald out. for
 of then doctary what sood has been knap by dils vote and they aala sobe, it was no ase at all Yoa are fatidic the Tinhertaen of the Colony to fuy an uddilinaal thatt a million dot. larn fn lases and Jous ro and throw

I don lellere that west thla campalkn was atarted firnt with a youns man enang srowhd the country leetaring thut the anower whas metl spent; thut now it is simptr manoy thrown away, if jou were to in Ints the ex ponditare sud wae the amounts praid for drums, erxh, milk amil other thlogen I am nime gou would think that there were strange things हolng on it conmection with thits expenifiture.

Now as to thif vote for agricutture. The firyt thine that strikee my notice of is perusal of theses firures is fle extraorilinary way that out of the minety wan sorfeties this year, we ooly avt forty six rejorts, and any jose whe ruals ibme reborts will see at ebee that mo atartivy amellerkfilas Ras resulted, Inteed it is for saert of what we were led to expeet for the Premicr: Fore imatanem the sald that we would ref tyenty larrels af potatioes tor every une we siev get. Unfortumately the guatations I have Juit riant coavluced ine thint thir people had no noe for the
potatn aned distribieted by the Gorerampet.

of besefit to the flahermen, and Gier ratme applles to any other metmfer whethur he lie on ints stide of the Hipase or mot 1 ami a Newtoundlandkir asid thileve that thla te thin beit Trasitry ubiter Coly Heavea, hut 1 helieve that Ke do bot try to do ef uourh for the berturfit of the flalhtrmeth sail in the tuterest of the induntry which is the life of the cona-
try. We are talking about granting $\$ 20,000$ to the Tuberculosis Commisaion. That is very good. It is money very well spont. If it saves two peopte from death through that disrase It will he money well spent, hut if we brought forward a bm to exDend $\$ 150,000$ for the beneflt of the tishery there would be more discusnion and more fighting over it than is necessary. We have no informantion about the price of fish; about the markets, the places to which the citel goes; or anythlog about the fish Itself, and there shonld be a vote in that department not of $\$ 100$. nep, but of $\$ 500,000$, and then you would eet a cortain amount of satlsfaction and it would be money well apent in the Interesta of the Industry. It would not then be necessary tor fluherman to go to Gloucester for work. If we only carried out what 1 believe is in the best fnterests of the country there woald be no men Holng out of the country now; and When you would go to the country for an election you would be elected because they would know your worth, nut becanse you had given them homething themselves, but because you tiad done something for the beneflt of the country. They would cast their votes for the men who did the best work. Now has regards our lobeter fishery. The price at present is very low and there are only about 600 Hicenses glven out wheroas there are usually lubout 1200 . This vote is for the purpose of sending men around the Coast to see that the tolister beds that we have around are not destroy. ed. We should have a vote to got men to fwateh the lobster and find out thelr movements so that we might know what we are talling about when it comes to a dobate like this. I visited a lot of Lobster hatch. erice before ever I thought of becom-

Ing a member of Parliament. In the United States and Canada thero are men whe know quite a lot about these fish. and they have the means to carry out improvements. We have not got the means to carry thiligs out on a large scale such as they do Our lobster fishery is one that we should take an interest it and I believe we will because after the war the price of lobster is goIng up The eatoh is small this year and it was small last year. Thero are conditions in the catching of Jobsters that we know nothing about. There are temperature conditions which keep the lobaters in deep wator: there are weather conditions which carry them around to different placea. We have given conalderable thorght to conditions which aftect our agricultural profuce. Wo know one year and another why our turnips or potatoes do not grow, but we have never gtren a thought to what Is happening in the Ocean. We do not know anything about the movements of the lobster or salmon; and wre have not got the men to find out these things for us, or to keep in touch with the knowledge that is galned by other countries, such as the States and Norway. I am sure that if the Government would take this matter up the Opposition will work with the Government in the Interest of this people so that something definite may be done next year that will give employment to our young men and keep them in the country. It fs not my fautt that the report of the Fishery Cotnmission is not yet tabled. It ts 110 one's fault: It is one of the things that move slowly; but 1 beHiere that you will see recommendations there that will please everyone, and that we will all be anxions to carry out, but 1 think it Would bie botter for me not to say anything about it untll we get the
report. There is one think certain that the Commlasion has taken an futerent in the wroris in connection with the Fistery and their Findings are the findings of men who have thken a lot of evidence and given it consifterabto thought, and 1 belteve chat their recommendations will meet with the approval of the House.

MR. COAKER-Mr. Chalrmanduat one or two words in reply to the Honcurnble Minister of Fisheries, I do not object to the vote of $\$ 5000$ being pasted it they are golng to spend it in it eenafthle wiy, If you aro kning to spend it in the way yon have been inpending it, then 1 way do not spend it anymore. By all means go around and colteot the Totisters and place them in certath seetions but to not permit any man to mark down the number of lobstera he catches and allow hifm to throw them away when he catches them. That only crentos fraud. You spent. $\$ 9200$ last year, that in $\$ 4200$ more than the grant, and out of that vote $\$ \$ 500$ was spent in motor boats. That is not epenting $\$ 3000$ on the work of fobsters. I rumee that the polfcy if properly carried ont will Increase the lobater; take the spawny lobster and save it and place it in a reservathan and you will fmprove the ftetery. The next point that 1 wish to mention tie the reference made by the Minister to the fact that he wistied he had a vote of $\$ 100,009$. If we could have a vote like that and trat a man Irom Norway to supervise and inamgurate some satisfactory work In connection with the Finhery there sould bo no objection from thls sifle of the House it is a retlection on this country that we have had Goveraments th the past who did nothing to carry out a polfcy such as that wheh is carrtad out in Norway. I belleve that a great deal of support would be given to such a movement,
und we abould have no heaitation in bneking you up. In regard to the price of tobsters, today it is trae,that it the present price they will hurdly pay the fishormen, and if only you would have a clase seabon it woutd do an amount of good. The Iolistern purchased last year are atill in stores In St. John's. 1 bave 400 easen from tast year's eatch. There is no one to buy them, and with the tobstern that will come is again in September I do not know how we are going to get even $\$ 10$ a case 1 mention thls so that the Premier may be able to take the matter up with people abroad. Why not get the Govermment of Great Britain to take the matter up. They might take them in France. They do not take them at present because they are not atamped. They have to be marked with a stamp or print before they go isto France. Cannot something be done
to linve this remedied daring the war, in order to emplay the fishermen ane get rid of our lobater:? I suppose there are 5000 caces that might be sold In France if the Premiler would take action it would be 4. kreat thing to get clear of thone lobstars of last year. The Mininter of Fisheries was quite right when te rald that we would hack hitm up in saytbing that wes for the benefit of the Flaheriea.

MR. MORINE-Mr. Chalrman, there are Just two or three words that I would like to give expression to on this matter. One fs that I quite understand the probicm of the Minlster of Marine and Fisherfes. He will sire voice to an appeal and a sentimeat that is very popular, No one will dis. pute the proprlety of spendtug all the money you can get for anything that goes to advance the Ftahery, by the propagation of lobsters or any selethtiflo investigations nlong the lines followed in other countries; but for
this Busineas of propagution of lobsters. 1 believe in what bas been satd by the member for Twillingate. I quite agree with the hotourabie Minister that this is a very tine country, one of the best in the sorld, but 1 suppose that the Minfitet fo well aware that you will find didhonent people in this country Just an well as you will tind them th othor cecurtries. Thint to the polnt. If you are goling to give ten centa a pieco for lobstonn and have no elecek on the men then you will have to pay a larse sum of money, and you will have men who wfll take advant age of you and charge for lobstera they havo not thrown overboard, and that wais all that was sald by the member for Twillingate which brousht forth that appeal of the Minfater to popular mefudico some provision uhould be made to carry out thla neheme better to keep some cheek on the number of lobsters caught and thrown overbaird. Having sueh a sys tem as the one described is only putting temptation in their way. I wish now to refer to the vote for tubercaloals. Not on the polnt as to whether you should apend $\$ 25,000$ for that, but an to whether you are apenciing that $\$ 25,000$ in the best way, Are you getthig good results for the money which you are spendifig' I am one of those who believe in the expenditure of monoy in the direction takea by the Commilteo of which Hon. John Harvey was the leader. You will get better reeults for the country nt tarro than you will get by the expenditure under Dr. Rendell. We all agree with the Minister of Fisheries that in the cause of charity the expenditure of monoy for the saving of life abould be uttle Lumited: but the point in that you are openting the $\$ 24.009$ to nave the lives of people suffering from this difiease and the question ts whether
you would not sive more lives througbout the country by going to work along the lines lald down by that Corrmiltee. I believe that you can do mure good to the healith of the people and save a kreat many more lives by another system than you can save by the syitem that he follown, Another abjection to that system is that you ste taking this sum of money from tux-payers of the Cclony and spendiog It in one place among a certain number of people, when the prople of the Colony ousht to have some share and ousht to get an opportunity of the improvementa and benefite which that expenditure ought to bring about. It tuas been tound in other countries that as fur as the treatment of coasumptiven is concerned the period of the Iliness being so long that what they want more than anything else in proper nursing and open atr and good clean foot, and that Instead of sendthg them to a hospital, thoy should ne far as dosable be placed near a place whiere their relatives and friends ate. They should be surrounded by their triends or easily reached by them. They will not bo so tiomesick: they will be lielped by tholr Irienda tho will bring thingns to them. A number of small sanitariums arounal the country near the towns would be trost beneflctal and masy of the people will go to this place and recelve treatmont, and the cost of keepfag such an institution would bo very much less by the contributions of trienits by the luringling of foods and other thlags by these friends: where as if you take them from their homes you will have them in a place where money is neoded and where they have no triende. If you are gotng to make this expenditure you ought to put these small aanitariume around the country and 1 harilly think it fair that you should spend all this money for these
indinidial consmiptive at the cost of so tourh when pou mikht be dotrg mach better and more ettwetive work In another dirsection if you eaneot tulld thene sailiariume then wend around to the variobs sutports and distribute all these bearfits through out the tuland and ta the lows run you will save a krat many mare Here that by talites chondic comump tires and treating them an you are now dotig. At prearnt you are treatligg only the hopeleas canes. What sou ourght to do is to ret sfeer therer cases which are in the farty thetes You are trenting these lapplems cases. you are only heiptag to prolecer life. and white that if vers denirable in the latirenat of clinrity we ean harthy
 ie falline sub.00 for that purgous to save perlape one lite or peoleter one life. whes you sutght have soved twesiy if suu had bem apenifine it Is the right zay. Nom 1 appriach out subjert not from any pretiman view. fot from any mecrestios of potithes. I say bast this watem which is for lowed out now is not the bent wey to deal with Min mbitert. whe hars to approach thin mubject with a broed mind, and wo truast realline that the only effective way to deat with it is by a contem somathing ou the lines of the work which was carried out by that Ansoriation of whieh Mr. Harver was the inder. There le no oie here niore interested in this work than Mr. Harveg, and I think that ho Alsapprares of the worl as it is now carried out, The work outaide has lies dropped, and the work nevems to be lirouicht down to sendiar people to a hospital it 8 . Jotn'ti people who ary bad casen. 1 mas surprimed the other day when I took wp the vital athtuthen to compare them wite thove of other countries, and find the tromendoun propertion of connumption in thila
avintry; all dirourthoat the caantry, Thut is the point ve hare to grapgle vilth. It is all orer the oountry. We tove to teach the people the causes ef camumption in ortar to save the tumumbls and tnik of thouminds that fre arowing up in tanger of this dis neve. This is the day of Commiselons. This is a matter that strould be grap pled whith by competent medical men than all over the country. Why not tave a Comurusalon of these mini and hare them aive the Cofony momethins for the maney they are expending. Act tbun their revort and do not allow thin mothry to so one being whited as If is with, no very tiute bring done. 1 know that the Minieter who spoke t few moments aso will serter that thir monery cruM be spent no as to Eve the best resitiss and the best Wey to got this in by appolnting a Commintions at protestional and hay gre to deelde "lett to the beat cerarit 8f follos, 1 will give avy uupport to alo voce. 1 tock up this matter some 3 yars amo in this Homse. 1 will thereAre stre miy empport to thire vote of E4Anes bat 1 do sppeal to the Govfrnment to stop and consider long enoush to take up this matter serkcuily, and I bope that when we next tehate the sabject it vill be upon the retiort of a atrons comatilasion of profeational and tay meni,

## RT. HON. PRIME MINISTER -

 Mr. Chatrmum: Joast a ward or two ter the cuestron of Tabicculorlis. I nery polnt oat to the Sonerable mem: bern that we had a eomminalon here for this matter for quite a namb of Jeark The lafthal work was ear tift oa by a Sociely preshled over to the Iton, Jotis Hirring, and as has beres peinted oest food work whe done. It erumern were weat all over the lo land, and by ench fenural methods the attentien of the public was arreat. ed, and very perceptibly $s 0$, to thilcreat scourge. Very few people could be got to realise what this disease was. Had it been smallpox, diphtheria or any other well known illness which was spreadine throughout the country at this tremendons rate, they would have been frightozod and have called the police to protect them and placard the fnfected houses, but tuberculosta keing a silent and inslaunting disease, slow and gradual in its work, they gnt down and gave it no attention.

For many yeare, Mr. Hervey and bis aswoclates did arent sorvice, entirely voluntarity and with no contributions from the Government. It was not till 1909, when we came in, that a commisslon was appointed conststing of Hon J. Harvey with as assoclates Drs. Rendell and Keegan, and that they obtained a srant of $\$ 5,000$ per yenr from the Government and workad assiduously for three or four years. Layt year this commission reported in favor of a department being creatod For this work. On their own recommendation Dr. Rendell was appointed to do this work.

There is gemething in what my learned frienu, Mr. Morine has ssid, when be anald that a great deal of attention has been given to this mattor In Si. John's. and none in the outports. Thern are several explansflons for this. The Refl Newfoundland Co. offered sonitarlums for each distriet, and last year, when the Duke of Connaught was here the first cor ner stone was loid. I have seen the plans and am told the erection will crist from slxty to seventy thousand dollars. It is proposed also to have small ones stationed all over the country, which would be less expensive to keep up. 1 think if I wished to get the records I could show to this Houseand the whole conntry that a great many outport patients had the services of Dr. Rendell at his dis.
pensary, and this is supposed to be one of the best and most effective ways of treating this plague, Not all who are affected with this disease renaire hospltal treatment Some have not reached that slage when they are serfously III. Those who are can bo effectively treated by the doctors in their own homes, and many are trentod in that way. There are certainly A. Ereat many sufferers in St. John's. The total amount voted inst year for thte work was $\$ 24,000$, but of this, onIy $\$ 13,000$ or $\$ 14,000$ was spent, and out of that $\$ 3.000$ was for the sanitarium site at Waterford Erldege of course it is distinctly understood that this is not a party matter, and I am sure both sifes of this House are united on thie great question. The eatablishmert of sanatoria will place every doctor in a better position as regards sueh patfents.

As for a doctor to take charge of this work, there is none better than Dr. Rendell. He went abrond at the expense of the country to London, Edinburgh and studfed there. Then he has spent a great many years at the hospital under Dr. Shea, and having had ahout twenty yeara' experlence, has had an excellent opportunity of studying this: nnd if he does not. now know what is neccessary it will be difficult to find one who does.

The manner In which Dr. Rendell is now doing the work is that recommended by Sir Wm, McGregor, who is a doctor of medicine, and who fnew somewhat of the conditions here. So I am hoping that with the pres. ent outlook this plague will be fully krapplet with, and feal sure that when we have a sanatorlum in every district the spread of tuberculosis will be checked.

Another mattor mentioned by Mr . Coaker was the increase in the Goyernor's travelling expenses. This vote
in mocestary on mecomint of thin many tripe made by hifm to outport places

RT. HON. PRIME MINISTER1 Uimit the maln argument that I suate mas that the Govermorks selary Ind mever bern malued after it waw Tus in isst

MR. MORINE-That was the maln eremment for ant increwe in salary ?

BT HON, PRIME MINISTERCen. The other may have been an addutional argament.

MR. MORINE-It I hal been here I hoult have mppported the vote upon. tie grounder which fiuke bean etrin. I fifmit that there lo a sruat deal of dypane is Govermuent House that is fil the tinturvits of the colany, surk TH the entortainment of the Cumb tifindinere and all that sort of thine Ind that wort of expenqe is inseparthle frum the onlinary expenses of the fovemor is entertainimg lis own trionde. You mainot make any demar. fatiat betwers them. If it is neceseary Thut hie stioulil hare this additional *mumat, them gank the vote in such of *at, if you like that bee will ben able to सrwe it vithout ans voucter, At then prowent time the Bepartment of F . nunce lur thot Justified in paping any part of thils sum except upod as propwhy made woucher, as polated out by the Andit Act. Yut the thing in sach 3 why that ine quentioss cain be nulsed It connmction with it, and at the same timt itotect tile repatation of any asa Wha may ossely the position of foremar of thit colong.

Mn. COAKER-Mr. Chatraat, with forant to this matter of the Govers\#fy tatart, lent var we permitted the Tute 10 ks itroush at it atood. We Falsed po oblection, as we thourtit that the forernor was entified to whet he anked wo far as his sulary Fas comentwed: and when he anked to have his traveling expenent rall-
$\sigma$ romt $\$ 1,000$ to $\$ 2.500$, we consented to that alao; but 1 want to state here now that if you alter the vote - If you want to give him an additionat Increana-we will not iupport it. We don't intend to rote for anything other than that whiflh was pusaed lust sear. That ${ }^{2} 2560$ was voted for travelling osperises, and if you alter it in any way we will rote pgalast it. 1ast year, overywhere we went in the North. we were cold that alt we had to do wis to vote frereases to the Guvernor. 1 atm willing to allow that amount to go tarough for travelliag expenses, but we will not support any alteration.

MR. KENT-Mr. Chairman: I would like to zay one or two words about the matter now suder diseussion in relation to the Governor's enlary. My recollection of the reasons for chang ling the vote last year is that the sal ary of the Governor was frereased because, firat, his ealary had been re duced some yoarn proviously and it was the intention to replace it, and necond, that the expenaes at Government House by renson of entertainment and such like neceasitated the Governor't anicing for the incrense Then there was a separnte vote-that no: inder discunstion of $\$ 2500$, wileh, t think, was an lncrease of $\$ 1500$ on the amount previously voted, for travelling expenser. That was expreas1y whit It was voted for, I don't think there was any ruggestion from any quarter of the House that this vote wal fitcodted to cover any think the than trayelling exponses; and on that underatuading and with that impresuftan every member of thie House votbd. t cuffe algree witi whit thas been said by the Hon, members for Trinity and Bonavista with regard to thle vote havins been illegally tibed durtug the phat year. I Hee a Jumtifition of the way in which the vote has been dealt with in the practice thit
liis prevalled liove for a number of yeara. Probably the payment of the amount in monthly instalments, at the bame time is the sutary, is due to the fact that the question of the legulity of these payments has never been rifised befors. Now, Sir, that, the Ilfegality of the proceeding has been pointed out to the House, while we tre suill in Coumitteo considering the Fatimates, 1 think that the Government ought, If they intend to carry out that prseties and pay that amount In monthly instalmentis, make it what they Intend it to be; or else leave it as it is and make it payable in the munier in which ill othor travetting Expensea provided for th the Eatimates are paid In every other finstance throughout the Estimates where money is provited for travell. ing expenves, it is paid upon vouchers furbifited by the perkons spending the moneg. I remember, Sir. that when I wais In the Justice Department. ull maneys nlich were spent in connection with travelling expenses in tiant dopartment, and which were votad by thls House for thit purpose, were pald on veuchers, properly furgished and certified. Now, if this vote is to remain atil travelling expensen, 1 Hon't bink either the Governor or the Govermment ought to be put in the position of continuing this illegal practice, As to whether this vote should be paid irreepective of travelling expeness or not, it a queation which the House cannot discuss at the prosent time, because it has not got the necessary information before it. If it far mecessary to change the vote and make it an addition to the Governor's sulary, then I thtak that some justification for that change ought be हiren. You have men throughout the whole civil service today, gooc, compatent offictate, who are unable to stupport their positions upos the ealirles that are paid, and bvery argument that applles to Gor-
ernment House applies also to them. I referred the other day to several departments of the eivil service Iti which the earnings were limited, and every jusification that applies to the Goveracr applles fliroughout the white iefrice The gucstion of in. creasiug salaries is a Fery big undertiking, 1 know, and tata is certainly nat the time when it can be properly undertaken. But, Sir, whatever the intention is in this connection, I think the vote ahould be so dealt with that thero will be no muggeation of ittegailty in the payment of it.

There is another matter which I wieh to speak about. There are two road inspectore in SL. Jolin's getting \$1,600 between them. Now the Inspector in St. John's East is getting $\$ 7700$, while the Inspector in St. John's West is getting $\$ 960$. That is not fatr, because the Inspector for St. John's East has a very large ares, under his care. Why khould he not get the same salary ne Mr. Marphyt He is a very competent man who gives satisfaction to members ou both sldes of the House, but is not at all partisan. He is an honent ond rellabte man, and there is no reason why he हlould not get the same uaiary as the inspector for SL. John's West. 1 think it is very unfair.

MR. HIGGINS-Just a word, Mr. Chairman, in refermece to the matter conceraing the Inspector for St . John's East. It would be an infustice to a good offlicial if I did not take this opportunity of giving my opinlon on thls mintter. Mr. Kent has not exagrerated the tremendous amount of work that lies under the Jurisdiction of the Inspector. St. John's East is a net work of roads. I thlnk if would be ungracious of me if I did not suy that all that the Leader of the Oppoattion sald, was quite true and that he (the Inrpector) ts one of those good offictals who do their wark without any
partiean spirit, I am sure ho will hold that position irrespective of any change of Government. I hope that this matter will be taken into conslecration. The territory of the East Ead road Inspector is a vist one Since Mr. Kent referred to this I thought it my duty to say a word in regard to the matter.

MR. DWYER-Mr. Chalrman: i wish to endorse what these members bave sald. To make a road In St. John'a East is not the same as making one ft St. Jotin's Went and there aro many more roads is St. John's East.

MINISTER OF PUBLIC WORKSMr . Chairman, the Inspector for St . John's Bast is a very efficient man. There is no doubt about that. We thall do what we can in the matter and try to please everybody.

RT, HON. PRIME MINISTER. Mr. Chairman, I think that it will be found that when the increase was made, there whe a junior road inspeator, which made the work easler. Mr. Murphy, on the other hand, has bean holding that office since 1890 , and was entitied to an increase. But neverthe teas the Government will be klad to consider the case of Mr. Parsons. I think that I can endorse what has been sald about him by the other speakers.

MR. KENT-I am glad that the Premier will give consideration to the matter, because it ts only an act of fustice. The road inspector for St. John's Eist, is an exceptional man In hil work, and I hope that the Gorernment will tncrease his salary.

Mr, Speaker resumed the Chair.
The Chalrusi from the Coumittee reported that they had considered the matter to them referred, had passed certain resolutions, and asked leave to sit again.

On motion this report was recelved and adopted, and it was ordered that the Committee have leave to sit again.

Thum- Celoalal Becetary tatited the fieport on thet Tuberncleals Sarvice from Juse 1, 1914, th 3tay 21, 1915, with itatimints of expmatiturt:

RT, HON. PRIME MINISTER Thurs has bern no arrangement.

MR. animes asked the 3riniator if Tublte Works what gramts were sent Gat to Chaperis Cove (DHetrict of Hr 3iale) for lecal, malin lines and other purfoces far 1915; to whom sent an'? - tepry of the miturnes

## MINIBTER PUBLIC WORKS- 1

 shall have thily prepared doring th.week.
MR. CLAPP asked the Rt. Hon. the Prfme Minister, in the absence of the Minfater of Agriculture and Mines; the amount of seed potatoes, number of pigg, sheep and bulls which have been sent to the District of St. Barbe in 1914-15 and the names of persons to whom sent, and if seed potatoes are being doled out for the present season.

RT. HON. PRIME MINISTERThis has been prepared. I expect it here any minute.

Mr. KENT asked the Rt. Hon, the Prime Mintater to obtain from the Department of Agriculture and Mines, and lay on the table of the House, a statement. in detall, of all amounts pald out of the vote for Encouragement of Agricultare, $\$ 20,000$, from July 18t, 1914, to date,

RT. HON. PRIME MINISTER1 expect thls here also at any minute.

MR. ABBOTT asked, the Hon. Minleter of Finance and Customs to lay on the table of the House (1) A statement showing the names and ages of all persons in Bonavista District who have received the Old Ago Pension slace March, 1914, to date; (2) A statement show. ing the numes and ages of those in satd District who have made application for the Old Age Pension, but are not recelving it.

HON. MINISTER FINANCE AND CUSTOMS This is in course of preparation.

MR. WINSOR asked the Miniater of Marine and Fisheries to lay on the table of the House coples of re turns for the propagation of Lobsters in Bonavista (a) showing number of. traps; (b) Date of each trip; (c) Names of placea called at in each trip; (d) And returns showing what was done on each trip.

MINIETER MARINE AND FISH-IERIES,- I beg leave to table required information.

## SUPPLY RESOLUTIONS

The Chairman from the Committee of the whole on Supply reported certain Resolutions which were read a first time as followa:
Civil Government . . .. .... $\$ 815,443: 33$
Administration of Justice 179,372,34
Public Charities ......... $424,384.00$
Agriculture and Mines .... $19,200,00$
Marine and Fisheries ... .. 111,040.00
Postal and Telegraph Dept, $703,729.20$
Contingencles
$10,000.00$
The sald Resolutions being read a second time it was moved that the House concur with the Committee therein, and the sald Resolutions were agreed to.

On motion that the Order of the Day be deferred, Mr. Morine moved in amendment, and Mr. Eent Heconded, the following Address to His Fxcellency the Governor.
"May it Please Your Excellency:
"The House of Assembly destre to draw to your attention the practice of expending large sums of public money upon what is called Exerutive Responalblity, for purposes not provided for by the Legislature and not coming within the provision t of Sec 33 of the Audit Act.
"The House respectfully proteats that theee expenditures ars is vloiation of the spirit and letter of the Statute Law of he Colony, auc sufiver. sive of the constitutional rizht of this House to institute ail shds aad supplies to Your Excellency, and that it leade to wantefulness in pubilc expenditure, wherefore Your Excelloncy is reapectally but urem ly requested to withhold your assent hereafter to all expenditure not authorized by the Legisiature, except such as fairly and Properly fall within Sec, 33 of the Audit Act."

MR. MORINE-Mr. Speaker, I beg to move this resolntion which I intended moving the other day in Committee of Supply, in reference to moseys spent on Executive TResponsibtity and unauthorized by this Legislature. This matter has already been discussed in Supply and 1 do not intend further dwelting upon it this atternoon, tut merely desire that our sentiments may be formally expressed and a vote taken. The Audit Act contemplates that all moneys pald into the Revenve ga towurds making up Consolidated Revenue Fund, out of which money can only be taken in the following cuses, that is to say-firstly, by vote of the Legistature and secondly under section 33 of the Audit Act which preseribes certafn formaliftes and which limits fts privileges to certain canल, through which money can be taken for what are known ts emergencles. Any expenditure not foreseen by the Legialature, but which is urgently and immediately required, would come under this Act, if the spending were neccusary for the pubtle good. Section 33 provides that when any sum of money has been kranted by the Legislature, the Governor miy under his sign, manuan, countersigned by members of the Trensury Board authorize expenditurea of that money. The Governor bere If distinct from the Governorin-Councll, because it is the Intention of the Act to place all possible guards on this privilege. 1 remember that when this Act was being discussed even Sec .33 was reacnted and strongly fought against by that watch- dog of the Treasury Governor Murray, who asald that there ought to be no way by which moneys would be spent except upon objocts for which they wero voted by the Legislature. But it was argued that in new countrles, such as our own, unforeseen contingencles
might arise that would require inmediate attention, ruch os would not arise in older centres of civilization, and Soc, 32 was copled from the Canadian Audit Aet, wheh provided a way by while money could be obtained in cases where the Leglslature did not provide for the expenditure. Now I hiave the returns brought down, which show astonishing figures. In the first place it shows that since the Andit Act was paseod there has been spent the sum of $\$ 1.513 .000 .00$ ander section 33 , and upon winat is cathed Frecutive Responsitility, for services not previously provided for by the Leglsfature or an average ependfig of one lundred and forty thousand dollars a year. This has afterwards been indemiffied by Parhament under the principle that it is useless to lnck the stahle door after the horse has been taken out. or that large sum $\$ 391,000$ has been epent under Sec. 33 of the Audit Act, following out the provisfons thereln, and so far as my remarks this afternoon are concerned largely coming under the meanlog of that Aet. 1 am sure that these items were put under this hending because the Government did not hnow where else to put them. But even assumisg that the $\$ 391.000$ were urgently and immediately required for the publlo good, 1 still find that since $1898 \$ 726,000$ has boon spont upen mattons whte w were netther urgosity nor immedlately needed. For if they bad been thus urgently and immedsfitely required the Government would have had these put under Sec, 33 . This moncy which smotuts to nearIy thseequarters of a million has been spent without lawful authority under covar of thls section of the Act. It It an expenditure for which the government can personally be held lable, from the Goveraor down to the emallest official who prid ont
the money. The Governor and Ministers were violating the spirit and letter of the Act, likewise any official who was in any way involved in the payment of that sum. In addition to the above the sum of $\$ 366,000$ was spent out of money borrowed for which there was no authority under any Act. but which was afterwards covered by a toan tet. The grand total whitch I have already guoted bas been spent illogally and in violation of the privileges of this House, and of the rules and constitutions wbich were the very galvation of our economic system. The statement whith I hold in my hand ahows that the greatcit expendituren which took place under Sec at and upon Executive Iteanonaibility were made during election years. In $199 \$ \$ 46,000$ were opent under Section 38 and $\$ 95,009$ under 80 calted Fxecutive Responsibility,white only $\$ 37.000$ were spent the previons year: fir $1908 \$ 25,000$ wera speat inrer Sectian 33, but $\$ \$ 6.000$ were expeaded under Fxecutive Responsiblity. The exponilfures were aefther urtent nor necessary and did not oome under the Act. In $1913 \$ 54.000$ were spent under Section 88 of the Aet and $\$ 127,000$ under Executive Reaponsibility. These fucts prove that during nlection years larger amounts were spent than during any other year, and the system has been so abused that each election year showed us a 18 r ger expenditure than the preceding election year. One has only to look at the Audtor Genernl's report to see the manner in which those large sums of money have been illegalty expented without warrant or authority since 1898 whan the Act was passed. Withnut goligg into detalls I have po hesitation in maising the assertion that all these expenditures were unjustifiable. politically corrupt and inproper-not corrupt in the sense of its spending, but expended from the etandpoint of political expediency. The Governor
acted unon the advice of his Minisers in sanctioning the payments but no Governor was justifled in allowing his Ministers to defy the spirit and letter of the law of the colony and if the Miniateril advised the Governor iliecally he shoutd dlamiss his Advlsars. The Council simply proceed is this monner. Thoy prosent minutes to His exeellency which state that such and ruch an expentiture is required and that no permfetion has been granted by any Act of Parliament, and that it does not come under Sece 33 of the Audit Acl. This mode of procedure was clearly a violation of the Statute. rad the Governar had no right to fix his sign minual to a document alftharizing the payment. If he does so he is persomally responsible. As far tin this addrese is concerned, it docs not make the sifgitest difrerence if it fiits to puiss- It belng sufficient for this đebate and address to be brought under His Execllency's notice, in order that an end may be put to this llegal and pernlefons pructice of paying out money of the Brecutive Counरता without any authority, 1 beg to propose the Address.
MR. KENT-Mr. Speaker: I wish to make a few remarks on the matter just referred to by Mr, Morine, He Fins brought to the notice of this House in state of affalrs which I do not think ought to continue I think we ought to observe that Act which oxpreesly provides that unlees money Is authorized to be gpent by Parliament the Executive Govermment or any other authority lins no rizht to spend publle moneg. We have the fights by speclal provisions in case of emergency under section 33 of that Aet, a provision which in ita original conception was most necessary in the case of it contingency arlafag when the House was not in session. I will quote this Aet in order to emplasize the points upon which I de sire to remark. (Hon member quates

Aet). Thic, as will be observed, in ther only Aet inveating tho Government eith any aurhority to spend putHic manex wlthisut dirnct authority trum the tescintatiare it is the privilise of thlo Honne to Atncsan publle vependtures In a practical manner add to keop a elose check on every सntre tre spond, sut the viatation of this Aut is fundumentally opposed to then principle of our conkitution. The contr exerptiuns to this case are the
 sases auch as the nealing disaster,pubHe trecimattien rogntrint tmmethrten ittention are the sole nocantons where minees cap thus be apent usanthorisel by iegiaintion. This mpend tile (ii) Eancultio respoiantittily is in oppoition to the splrit of the whote Act.

It it Jow lwrought liefore the Hionan the tire tarm of a apecial renolarion. Kvery thember of the Howen knows toxactly bow the matter atanits If the Aveit Art toes not autt the require-
 end the Set; lint no payments should be made outalde the law. All these puyments mate by the Governor-thCombell uithor Krecuive romponaitility are illesal payments. There in no authority for them, and whea they are aro mule they are dependent upon the muction of the Monilie Til revular session. The evil to my mitad in crowlag tram yoar to 5ear. Every year ve. heve die seditor fienerai sieniling with thif misther, ime cómptatation la hila repiort to the Houne that the Act in huing vlolated in this way. The Auditor Gemernat the of courne was atticer of the tegtitature. Hin is not a serthant of the Government. Re is a ser. nant of the Degistature, and it lo his diuty to repert to this Heuse on all untrors retartize in thin finauces of the Gioiony, and in the diacharme of his duty he han brought this matter betore us year by year
for a number of yeurs baek, 1 think practically stuce the Audit fet wan first passed. Most are fam. Itiar with the mevthodis by which the Govertument meakures sre dealt with, the procsedings by whlets the monuy is voted in this House and pitimately reaches the sorviee for, shleb it to Enteaded. All moneys are roted to the Governor, as represeating His Majer 4. and they irre umiter his control and sabject to hls order moder the Audit Act an I have pointed out. It his Kr velleary the Governor had adrice on this point wad land the wording of the Andit Act druwn to hils attention he nould immediatity sse that inoneys क) expended are not authorlaed, and flat there is an Jostification whatever for theme. In dealing with this autfeet 1 wieh to say that mes pontien is Fint the mattir tirkig tiles browion So the attention of thly Hower an to the Itiegatity of the paymerats, and if ese methots of handting expesalt. ares havins hers potnted nut it is the daty of this House of Aseemhly to condemas thein by the adoption of the Proolution as askied or to smund *et Audit Aet In such a way that if Fili meet the regulrements of the publin service, Pursonally 1 think that the Autlt Act should be allowed to thand as it is. It Is a very complete eode of law covering the phyment of public momers, and every proper proFivion is trade in the Eeftmates, and thine is no poed of suy sueh expentture as that which we are polntiar teit to the Horus this atharnowa. These expendtiures, wuch as tocrease of eal. trims, and allowances of that kind aloulat be pruvided for in the reguIer Eatimates, and not dealt with by fien Governaris-Coumeil; that is taking tray from thls Hous ane of the apeefal prorogatives tha control which If ought to lave over puhlle moneys. The Governorin-Councll talres upon
himself to grant isumes of money and Whon he does no he takes away the control of pullic moneys out of our aunds. By dolng thes he is phacing this House in it poattlon it ought not to be in. I have, therefore, very much pteazure If secondlins the motion made by the member for Bonavista.

RT, HON. PRIME MINISTERMr. Speaker, juat onc or two words In raply, In the firat plnce I do not think it at all necessary that this motion should pass-for the reason that it fir atn unnecessary reflection upon those who are here, and upon those who have been liere in this Honsel The hon, fitroducer of this menaure haf practically made an indfetment againgt the genflerpen with whom he is associnted, because he hiss charget them this afternoon with combiving at thean expencitures. In 1808.5, without the authority of this House, a sum of $\$ 18,000$ uniter one hesd and $\$ 85,000$ uniler another was made by the Government of which the Leader of the Opposition was Mhatster of Juarice. He hais charged my friend who became a member of this House fn 1504 and who was a party with Sir Robert Bonic and atiers to the expenditure of $\$ 30,000$ under one head and $\$ 46,000$ under an. other, with a violation of the Act. He lith charged every member of that party with illegal practices, and that is the same charge that he made thils evening in retiation to thase made in 1918.14. An a matter of frot with *ery few exeeptions every dollar that was apent in these three years must have been certifled under sectlon 13, becanse anyone who reais the eection WIII see that he ean get a certificate from the Auditor Genaral for all these expendftures, and before thila House closes I tintend to produce evitience of the character of all payments cortiffed in the past under sec.
tion sa to sthow that if you regulre to avail of it there would be no difficulty it getting a certificate for every payment that has been made th the public rervice. We have only to loak at the neettion and we will flad that all the paymetita made by Bir Robert Flond, Mr. Kent and Mr. Clift in 1904. when they adviaed the Governor of that day to make theae paymenta, could all have been certified under Soction 33. Does the honorabie mem: Dèr meen that the money that was epent in the election year 1808 when Mr. Kent was Attorney General, and Mr. Cuift, Minfater of Mines and. Agt. culture when they aivised the Governor to spend $\$ 08,000$, wan that ? corrapt viohation of the Andit Act? A corrupt and gross vialation ' I say that all these expenditures of Mesara. Cuift, Bonl and Kent were not carrupt but were necessary. Let un get the ltomis of expenditure, It is a very ensy matter to bring down theso ftems, and that will be proot to the House is to whether the late Altorney Ganeral, Mr. Kent, when he ad iffeg the Governor to make thene paymentis was or was not conniving at a corrupt violation of the Act. Thet na get the feems and let thls House and the pubtle outatde pass upon these expendituree, and they will siee the money wo expendod. There are a thousand and one matters happening evary day; there is hardly a day out of the three hundred and sixty five. even Including Sundays that some tinforeseen expenditure does not become nocessary, and the mere fact that the oertifiente of the Auditor Genfral is not availed of is in all cases merely a matter of form. Thase expentitures are not a volation of the Audit Act, neither In letter nor in arfrit, and 1 am surprised that my learned friond on the other side of the House would be at party to attaching

Thate who ame not here to defend themantres, anit whis if ther were hiers sould deteed thest expenditures If thit ame wiy hir whtel I am. , sid nut thitik that there were men tis this Chamber who wnild give sach is eef ITficate of charneter to thelr late leader, I never expected that I woild have to stand up here and be counsel tor Bir Thobert Bood, a mas whose lighest bomat was that no elarge of corrup toin, to talnt of eerruption, wan attarhed to hte mame. I was with him Tor Jears in the Council and out of it, and T Dilnt I linow as much about him an any one it the Hoase, And I thew that chere is no expenatisare is they yert in whet ho सmit tiater that lie was unable to Juetify here under the Audit. Aet or without the Antir. del. I lare mat in this Hoann ywar ifter yoiit kind simiton ifter sesston and passed votes of milpunity for oxpenditure of thle kind both with str Hebert Rusd and thone who precelted hitm, whtet to $\begin{aligned} & \text { iIV Hilitit to the best }\end{aligned}$ ptoof of the reading that ought to be siven to the Asdit Aet. 1 ane prepan ed to adnitt that the Audit Act did not contetiplath increase of salaries to a very large extent, but that is a matter that can be covered under weetimm 33. Hat meariy every other pay. mont whither unitar Eecton 38 or Bx ecutive responsibility is for a regefremunt that doen not need elther see thon ta or any othar provindan; and it The intly shem honerable members bave had the experinnee of trying to earry eut the public marvien of the Colony that ther sitt find ther nevessary it tr to mato their expestriture.

MR. CLIFT-Mr. Spealer, betore the resulutius paxses. 1 what to may ihat 1 ate very foriumate is being here to atfer my hearty support to the resolution an proponed by the member for Benirista, and secouded by thie teater of the Oppoation. I thitht
it a wery fulr and proper one at this time and should find a place in the fecords of the Houre Because erpendl ?ares have bene mafe in the past cuatrary to the gmorisions of the Aud. it Aet is no reanos why they abruald contimue to be made. The Premier las sald that the Lerader of the Oppost thon when the Mtinister of Justices, and that 1. when member of the Fond ad taialatration were parties to those ex. penditures contrary to the provisions of the Act.

RT, HON. PRIME MINISTERI dila not say eontrary to the provisfotia of the Act, 1 war detending you

MR. CLIFT-1 did not want anyone to detend mes. 1 do not want aupone to detend anythine that was done dus Ing the Administration of sir Rabert flonif, or the admintatraton of hils ;inedecesaors. If mosiey was spent that thould not have bean apent under the Audit Act of it the Audit Aet wns vloIuted it is no fustilleation for the custimuance of this practice

RT, HON PRIME MINISTERDo you almilt that the money they apent, that tht,00p was a cormipt vfotition of the Act?

MR, MORINE-I did not use those words.

MR, CLIFT-Thire was nothing in the languare of the propeser of this resolution that in any way refliected upon any provious adminlatratiate.

MR. MORINE-What I nald, and I gald it very diatinctly. was that is corruption in thin ernee that to toereaze a inlary of anyone employed by the dovernment duriag a thene noch as ase election jear in looling for soters and is vary litiety to lafloence sotes:

RT MON. PRIME MINISTER1 have mo dexirn to miarepresent the Lon, member, the mordis as I took them down were corrupt expenditure"

MR. CLIFT-1 itid not underntand
the honourable member to mean it in that way. It is a practice golng on to much an extent that we ought to deal with it in some way, Every Year, for the past six years at all eventif and for a few years before that, the Aufitor General has complained of expenditures made in violatlon of the Audit Act-expenditures for publle Bervices that do not come ntrietly within the provisions of seetion 38. Firpenditures in the way of salaries In Lew office, fincrease in sataries and such lite expenditures; expenditures thint could have been foreseen whin the Legislature was in kesslon and should have been taken in the vote for supply; and for that reason and for that retson only, I am going to Eupport the motion made now If we have an Audit Act on the Statute Book 1 think we should live up to it nad not be continually violating It by ipending monoy wheh bus not been voten by thls House. Section 33 provites for specini emorgencles. If thinga that could not have been forebeen occar daring the year the Governor is perfectly funtified under that gection in signing a Minute of Counell for the expenditure of emergency tmoney. Moneys for salaries or inercases of salarles are not emergen. oy moneya, and nhould not be maile by the Exeputive Goverament. I support the metion to-day for the simple reaoon that I think the time haa come. whon the representatives of the people of this country should be more particular an to the expenditure of public moneys We should economied more and we should keep the expenditure more in accordance with our rovintis. When the Minister of Eysiamee came down the other day with the Retimatas he was raked for certain information from our side of the Honser as to whore he was going to get the money to meet the proposed expenditure He was asiked for some

Information tis to the present finnnclal condition of the country, as to its Habllities, that information has not been given and I submit that we whould not be a party to the passinf of testimntes until we know whero the revetue is coming from. We were asked to spend semething in the nelghbourhnod of $\$ 1,000,000$ to provide for the pablic service, when we frnew that during the past year our knew that duritr 'be past year our lucame was not as great as that for the year before. Our income tor 191516 Is lisble to be less, and the Minister should not ank us to vote an ox. ponditure until we know whit our income fs going to be, and if we have pot voted enough there will be further expendtures on Executive rebpousibility, Under the Autit Act there fs some ainthority for expendr. turen by the Govertior which if lived up to would cauee po complaint. We ourht to Itve up to that Act more closely. It is nio defence to say that It has mpt been Hzed up to In the pest. If ander the Bond administration, mosiey was expenifed under the Audit Aet wheli should not have bees expended I suy that that is no renson why tho practice should be continued. 1 am quite prepared to Juatify any expenditure made by that Adminlatration I belfeve they were propar expenditures, but I think the Audit Act as it is, is very complete, and It is for that reason I am prepared to support the resolution now before the Fiouse-

MR. LLOYD-Mr. Speaker: I would filke to add a fe wwords. I have already expresead my opinion in sutother dehate sis to expenditures made fiftel ure reported upon by the At ditor Qeneral from year to year is joontrary to the Audit Act, and if we come in here year after year and have reports like this to the Legialature of Illegal expenditures I am propared to do what I can to repudiate them, and

It does not matter to me one way or nnother under what administration it was done. It was claver of the leader of the Goyernment, and he is very clever in all lils Parliamentary tactics, to atand up as a champion of Sir Robert Bond I should Fre to know what Sir Robert Bond thinks of the clampionship of Sir Eifward Morris

## RT, HON. THE PRIME MINISTER.

-He would be charmed to see what oplendid charapions he has on the other side of the House.

MR. LLOYD-He will be very pleassi to see hecmuse: what I am-golng to say will agrea with his vlews. He would also feel very proud at having his dolagt champloned by the meraberi on that gicie of the House. I hive been an supporter of Sir Robert Bond, a political friend of Sir Robert Bond, and fam no less an admirer of him to-day than I was before. Even If It woro not that the practice has recetved the stamp of Sir Robort Bend's disapproval, I would stm stand up and zupport any motion ngainst illegal expenditure. The Premier has already told us that that expenditure whes juntiried under Section 38 B of the Audit Act. although his remark about that Act is that that sub-section would justify anything. If this is so, even if thls expenditure is juatified ty rection 23 C of the Audit Aet, that does not make the practice proper. If they have used it wrongfully and If expenditures have been allowed to go under section 33 C of the Act, which ought not to have been, this section does not Justify it or their continuling it. There is no doubt about the practice. Now a repart is given is by the Autitor Ceneral for the past year and he would not make He came remarks from year to year If ft were not so; aril as far as I am concerned, I don't care who started it. it ought to be put an end to.

The only fault is addressing the Governor. There is littio use in addressing the Governor on a matter lite this, Fe esn only refer it to the Cabinet. I think that the Governor ought to be in the posttion of the King of England, ought to be constitutional, but unfortunately under our Aet he bas personal duties. He is actunlly bigger thinn the Fing of Einginna, and becanse of this we have to place ourfelves in the unfortunate position of having to approach and ask him to take this conrse even without the ndvice of the Ministers. I would like him to make enquirles ns to the practice, 1 notice the-Act providies that if the Auditor General refuses to issue olieque the Attorney General in called upon to offer his opinion. That is by Section 38 , and his opinion heving boen offered the Auditor General proceeda to carry out instructions. That this las not beon strictly carried out may be seen by reference to his report where he not only calls attention to these expenditures which he calls Illogal but asks this House for the opinton of the Attornoy General. I would like to know if such is the case 1 hite never come seross it before. Mr . Kent as Attorney General misht have recelved such reports, but I have no recollection of them. I would rask the Govermment if there is a practice of talkins the opinion of tha Attorney cteneral.

RT, HON THE PRIME MINISTER -I think so. As is rale these are pansed at Counch meetings and no record feept. There they would be pasfied by him.

MR. LLOYD-He is called upon by Section 43 to give not only oral but Fritten decisions. 1 would like to know if this rule ie enforced? If durIng this administration thie has been done? I would ask the Ministor of Finance if he has got there.

RT. HON PRIME MINISTER-I will let you know.

MA. LLOYD-1 understand it was sald that section 33 (b) offored extraordinary intitude in making expendltures, and this is what has reierence oo when the Attorney Geaeral is nasked. "If upon any appliention for a cheque, the Auditor Generil has re ported that there is no Lesislative authority for issuing it, then upon the written opinion of the Attornoy General of the colony that there is such authority citing it, the Minister of FInance and Customs may authorize Tho Doputy Mininter of Finance to prepare the cheque, irrespective of the Auditor General's report"
There is not much scope in that. (e) If, when the Legislature is not in sesslon any acclitent happens to any public work or public building which reculres nil immediate outlay for the repate thereot, or any other occaslon arlses when any expenditure not foreseen and provided for by the Legislature is wrgently and immodiately required for the public good, then upon the repert of the Minister of Fiaance atud Cuntims, that there is no legisIntive provieton, and of the Ministar haviag elarget of the service in question that the necessilty is urgent, the Governor-In Councll, may order a wpeclal warrent to be prepared ete."

The one point is that this section is belug improperly interpreted. It is merely a statement to the effect that under this section of this Act irnproper expenditures have been made. Expenditures have been mado under this section which have not been fustified by this section, and for the last few yours the Auditor General has report. ed that extraordinary and llegal exponditures were belng male under section 38 (c). This was especially so nhout, the time of the last election; last year in the Houso we pronounced upon it and the fnereasee granted pr!-
or to the day of election. No attemnt has been made at Juatification of theee incroises. No justiflation et all, but they are divectly contrary to the Audit Act it is sgainat this that we are proteithes. Now, Sir, I hevel fisid whot I whathed to say, I am-mereiy sayling what it liave dald laut year. I have merely sald ao I have oftan sula that these expantitures are time daw fol, and should have been voted by this House It would not be so serfous had it started from this House, but 1 resent, we resent Sir, its Hilleting from the Epper Fouse, and boing paseed by the GovernerinCounfil, and I strongly aupport any mens. ure to put an end to the practice which for growing of this fllegal espenditure of pablio manege

MR. MORINE-Mr. Speaker: If every one who wishes has apoken, I propose to close the cebate with a few words-

HON. MIN. OF FINANOE Just a word or two. Mr. Spenker, in reply to the hon. gantlemnn who has fust fat down. If one would thlak that everything sald here thle aftornoon wos aatd in earnest he conld not but think that affalss were in a very sertous conilition, Siante 3.15 p.m. wo fiave been trying to get this matter tettled up. Thfa is not the first time the Audit Act has been disputerl. When I heard all the members spenkIng I could not help thinking of how fivoured thls House was to get sll this advice fres. How much such legal advico woukd coat if wo had to pay for it, but we get it here this atterngan for mothtng. it ran through my mind as 1 heard the members spoalcing that this was nothing more or less than an attempt to block buslness. Thera could certatmly he ro ofter motive There is absolutely no. thing to the charges which are being mada.

The very man who brought in that *
act, was the firat one to break it, and that was the gentleman who introduced this resolution thio evening.

Now it has been the practice since the Audit Act enme Into existence, to make from time to time certatn expenditures. For Instance, last year a vote for the Marine Disaster Fund something like 825,000 was made. Over 250 men biad lost their Hivea withIn in month, and the Audit Act allowed the Government to draw about $\$ 25$, 000. That is what the Audit Aet is for, cuses of emergency like this.

Every expenditure cannot be toresoen at the besinning of the year and to meet emergenetes goveruemnts find it is a mecessalty that some seetion aflows paymunts to larne. This Is an acknowledged fact and I am aurprised to find the time of the House being taken up with auch nonsense. Even the President of the F. P. U, looked disgustedly at the bringthg in of this motion. The first year of the Andit Aet's betng in force, the Amulitor General brought in this report of expenditurens not authorized by It: the year after the Andlt Act wes introduced, under the very government that introduced it. Ever sfince the Anilit Act has been introduced thls practes has been continued, and probably Dr. Lloyd has made the same speech ase he has tothy, and will mako it until it will be his plesaure to defend it from this side of the House. The hon. member Mr. Clift, made the remark that the Minferer of pimntee did not come down with information sattsfactorly because 1 did not have the Budget prepared to hand down before the Extrimntes 1 do not think I need rofer at any length to any of the remarlks made here 1 agree with Mr. Coaker that this matter is not belng properly talsen up.

MR. COAKER-MAF. Speaiker, Just a word at two. The Minister of F1-
nance thought 1 was disgusted. Well. so I wus, I was disgusted with the defence he was putting up. I think the adoption of the resolu thon would do is lot of good. It would certainly stop the expendluare of nearly $\$ 50,000$ without satisfactory explanations. The Minleter said I was a very clanftabio fellow, Woll, 1 think 1 am, at least $I$ try to be.
I know thise nfternoon if he had stood up and satd: We have erred, we have strayad in our ways ilke lost theep, we lave done wrong, but we will amend and try to do better in future, I would certainly have boen sind to let it pass and give him any assistance I could. But at the same time I cannot say that I did not enfoy his apeech. I do enfory a kood warm debate. I felt refreahed na 1 heard him doliver hig defence of what had been done in the past. I dan't cuite understand why he tried ta bring in what Sir Robert Bond had tlone I agree with Dr. Lloyd that Sir Robert Bond would not thank anycne on the other slde for introduclag lis name. Be that as it may, howover, 1 hopd that we shall have many a warm debate bofore the fom years thut we bave to spend here together are up and I shall uever feal ag. gricved with the Promler'e apeoches if he doesn't get any warmor than be fifit this afternoon.
With regard to the matter before the Honse at the present time, I may nay that 1 certalnly do give it my fall support; and not only that, but I want to state lere from my place in thif Rouse that if I am ever supporting any gavernment that attempts to infringe upon the Audit Aet, such no has been done fo the nast and such the thas been referred to here this afternoon, 1 will no longer support thint government. 1 will sieo that they live up to the law with regard to the Audit Act. We members of
the Fiahermen'a Union in this House have had our eyes opened during the last two sesstonis in regard to this matter. The expenditure under this houd last year were very conaiderable. We protested and expressed the lope that it would not happen any more I an very sorry that this vear we have had to show up weaknuss in that way again, but it is not halt nor quarter as bad as last year; and 1 venture to hope that next year, In viow of this diecussion this afterunon, will show a much greater improvement. The resolution now before the House will certainly tend to deprecate anything of thet nature.

HON. COLONIAL SECRETARY:Mr. Spesker, I would like to expross my congraulations to the hon. membors on the other side of the House on having become so suddenly righteous, now thoy are occupying seats on the other side, I think it is quite true, as was pointed out by the Pre mifer, that the hon. fintroducer of this resolution went out of his way to be particularly harsh in his expressions is regards the moneys that have been spent by the Government on Executive responsibility. I am sur pyfsed, sir, at the accusations that he mide in charging this and previous fovernmente with improper conduct. Since $t$ liava boen a member of the Execatlve Government under Sir Edward Morris expenditures have been made oocnsioned by circumstances that could not poastbly linve been foreseen, whifh arose tind had to be proviled for at the time it may not be proper in the eyes of some people, but it was entiraly maroidable in the great majority of cases; and I repudlate the charge of any Improper or corrupt conduct aince I have beon $\pi$ member of thit Excentive Governmont. Ho pofnted out that in 1913, the year of the election, a large sum of muney was spent, and insinuated
that it was done for corrupt purposes, The same thing was done in 1904, In the election of that year I hind the honor to be a follower of Sir Robert Bond; and I botieve if Str Itobert Hond ware sitting in the House this evening be would repudtate any such Insinuations as we have just heard. It is extraordinary that at this time all kfints of resolutlons and motions are belng brought in. If there liave been ains in the past, If improper conduct has existed in the past, I can fairly clefm that nothing of the kind exists to-day, and that everything that bas been done, every dollar that has been spent, will be foutd to he fuatifisble. I, therctors, Mr. Speaker, trish to place myaeli on record that I have still sumfictent conflitence in the bonesty and integrity of my colleagues to belleve that they will not smetion any indust expenditure white thoy are in control of the affaifs of thin Colony; and I see no reason why any such memorlat or resolution as thas been proposed should be forwardcd to His Excellency the Governor.
MR. JENNINGS.-Mtr. Speaker, I wish to say hatr a doace words off my own bat and in my own way to connection with this matter, and I wont occupy the time of the House very lang. Of course, where lawyers and doctors differ it is hard for laymen to come to a deciston, but thinklag it out in my own simple way it appeare to mo that there in an Audit het passed for the purpose of preventing any improper exponditures. Tho wording of that Act, however, appears to be mech that the efrect of the Act is about equal to locktrig a door and leaving the koy in the lockIt is poestble to opea the door without probably breaking the letter but certainly breaklag the ssifrit of the Act. Now, I have noticed that the ereatest expenditures under that fot have been in election years. It looks terribly suspictous to an outsider like
taynetf-boesuro 1 eomalder myself an cuistder, of courne, anything that may be litaproparly tome lit thin respect sot onty affocts the Government but the country, I bettern that no man liven to himaell or dies to himsult. If I am unity of an tmproper artion, liomebody elee probably foltorive wivemmple. This tecting fo the filatritik en for at I kuon anything nbout it fand I figure I know a littio) Is this:-it you want to Hot a minat hat for it in elec thom year. Thit may have been brought about by the improper actions of kuvernmonti ta the gais, but 1 Uitnk that if the Apaft Aet dinet not proride autticlesidy analuat fimpenper expenciture it nioul4 te ammided, so that

+ toor may be property loctred, the koy talren out, and everything made fait thed aruare.

Whereupon the Fiouse divided, and there apposared for the amendment: Mr. Morlue, Mr. Kent. Mr. Cuth. Mr. Liogh, Mit Oeaher, Mir. Italigart, Wfr. Stoths, Mr Jennipgi, Mtr. ## STAMP DUTIES RESOLUTIONS.

Purnuant to crder and on motion of Hon. Mintster of Finatice and funtoms, the Honse resolved ltielt Into Committee of the whole on certuln Resolutions on the subject of Stamp Dutles.

## Mrr. Speaker teft the Chalr.

Mr. Parmolis took the Chalr of Com=1tee.

MON. MINISTER OF FINANCE 8 CUSTOMS-Mr. Chairman: In bring the in this reaplution the Governzatht has enderavoured to impose ins lifut taxim is posaltite The resotution in that 1 No cheque upon a bankif tamed by the authority of a departzamit of the Government, or farned by any parion or body who is permitted by Order of His Ercollency the Covernorite-Councll to Isnue unatamp14 cheques, and no Poat Office Mosuy Order or Poatal Order shall be thmped, and uny rach cheque upos a buyker, Pont Oftice Money Order, or postal oriler not stamped, raay be \#ladnd and siren in eridmee, and thail be admitted ta be good, useful सad avnithhie in trw and in equity," It means that all Goveramunt cheques are good unstamped. At the preseat time it is a warto of money and time fo put stampu on the cheques. it fas formerly the fintention to tax Floit Ortice Ordere. But, on account of the Informstion received from the committee it wan decided to cancel that. It was spectifed in the resolytlon what receipt meant. What we futund to do can be done under the
rales and regalations, by the Govern-or-in-Councll

MR. MORINE-Mr. Chairman, take the cese of the recelpt for a Lufe Inaurance premium. That would be a recelpt for monay, but according to the rutes and regutittons, it woutd not apply.
HON. COLONIAL SECRETARYLocording to the definitions, Life Insurance premiums are exempt.

MR. HIGGINS-Mr. Chairman, 1 think thet the point was that the bill in this amended form, meets the oblection that Dr. Hloyd rafsod. That objection is now disposed of.

MR. KENT-Mr. Chairman, it is well known to tho members that the Act was passed last yenr in a hurry. I think that if you are golins in for this policy, you ought to have a muek more elaborate Act. There is a lot of machinery necessary in connection with this that is not incorporated You bave very ofton a mase of logal freonefataneles. In the case of $a$ athipping receipt the stamp is to be affix. cd by the uhippor, I think that the Governor-In-Counell has no right to sey whether it is for the drawer or drawoe to do this, It has no right to define the legal rights of these two purtios The percon who given the recelpt under the Art is the person who should stamp it. Now in shipping recefpts, the shipper does not kive a recelpt. It is the carrier who fames the recefpt. If it la necessary to give a recolpt, the giver should put the stamp on t. These distinctions ought to be made The present rules are very confusing and ure ithely to catise a large amount of trouble, I think that It is a mistake to extend this policy so far as a receipt stamp fe concerned. It is a poltcy that is gofing to lead to a lot of confuation and trouble. The people generally will not take kiady to putting a atamp on recetpts. In my opfofion I thifnt that
you have gone far enough in this dir ection; there ure other documents that might be taxed. I think that when this rocelpt businees gets working. you will fiad that it will cause a lot of irritation.

DR. LLovD-A Hitle while ago, Mr. Chairman, we were discusping expenditures of money on cxecutive reeponsibility. We are debating now, not expenditure on executive responsibilIty, but taxation on executive authority. What is the differonce? My obfection is that the oxecutive council hbould have any say at all in the matter. It is the function of this House not of the oxecutive council to decide such matters, If there are to be changes made, let them be made bere.

MR. MORINE-Mr. Ohnirman, I don't see the advantage of this bill. I ask the Government to drop thia two sent bustecss. This will liring in no or very linde revenue as far as I eau see, and will confuse and worry evcyone The tnerease to revenue will not fastify the trouble that will renult. E I were to buy anythins at any of the large gtores, I should not ask them to put a stamp oa a recelpt that I get there. Most of the people will not know about this new law. Take our fishormen for instanen, what will they know thout these stamps? Then by and by they may tind out that tholr receipts must ie stamped. It was the experience of fanada some years ago that this sort of thing was not desirable and did not worls at all; and so they abandoned It. I urge upan the Government very strongly to abandon this Idea

MR. HICKMAN-Mr. Chairman, In the case of a Bill of Lading whece a veseel is chartered, the peraco who chartered the ressel had to put the stamp on the Bill, but the men who owns the vessel should do that. The thing ought to be clearly deffned; oth-
ermise there is going to be a lat act comfestion as there was lant year. If a hubernann whe wells, his fiah has got tis ghve a revelph, it shuriti the spect fled whether he sis to pat is two eabt stamp oin lhut tecelpt or mit.
 whatit tilio to nuy a few worde in conbeetion with thin matter. This stamy dutp lana alriady caused groat confurifun. Tho ftrist thrie it went tato force, there wis a lot of itfference of optestens ias to wan nhoust put the stamp os the eheque. The practice of thite ilev ruter tie aure fo enit la a lot of mathation. This sticre is roeta tor a ernat deal of traut, because the हiv: er, faowisg that lie can cancel it him-
 in. Tie Guvirnmunt woeld aave a lot of trouble if they made th that the perion, wie recofved it should pat then stimp onit it.
MR. HALFYARD-str. Chalrman, thie bill is gotug to create a lot of teoturlon and be a nuisance grtieralfy. if roe Tute to topent on this fir A. raveuen you woeld tind gournelt is h- vary hat tumblition. The Goremp mant tephit to get thefr revraign in
 as lat of time and labear. We are foc hugy te have io put e two cent stamp en evert nicelpt that is hevined.

MR WINSOR-3Fr. Mintrans, thich Is somethine that 1 wish to under. strant aboint this lifli. Who has to put the tan ent fiamp on the receipt? If a moelpt is sot given, What sheut It then 7 - oppone the menestre for this rearen. A lot of tronhle is aoing to tullow frome this.
MA. LLOYD-4yr. Clatrmat, there th reso othier pothit; an ortimary bill ta not or recetre tmeler it tir muttit pitit Ie if not porible that a pernes evald fig for his gnodn withoet taking hin nervipet

MR. COAMER-Mtr. Chulrmat. the Aorernmint have ankod ser to rote the of als amonuts of cweaty or
twesty five thowanged dollars fur porposes that mayoue witi commos suase kookr your das \$0 tithoit, mat mow tivy arv patier a tur co recelptar ah gver the cowatry. Nerth awd South, Eait and West, you aril golne to
 to end of truable And tor what? What In it molys to amomet to?

HON. MINISTER FINANCE AND CUSTOMS-About $\$ 35,000$.

MR. COANER-Then Jou must have a wondorful Ifea of bow many reculpte there will be if you can catstinte if that way. You will do well if 3ne evt is, oge

RT. HON. PAIME MINIBTERIf we not valy theme it cannot caune trumb ineonventence.

Min. COAKEn-Erea then it will caune, inconsvalunce. Put is tas on fomethinc sles that will nat canse 50 mach troutile, and if you want 385 feig you wilh rot it. You have told us flat this fie a war tax; but oven if it til 1 tatmit mo vote agninat it 1 do mot fotersd to po to the Northern Dtatricts, or any autport amd try to Juntity votfor fir buttlor a tre ceut tix tuped pecilpts 1 roted for every sthint oor of your war tazes, but I ans not rotuis to vote for thle
Mrh. CLIFT-Mir Chatrman, 1 thele the last tlimen thil mateme was op it Fas deferind by the Mintater hecanse if mail too indetinite The meaning of then wand Toceity't wiis hot siroperly dettoed, and it does not nowis aty hare ctearly teflaed to the prosent 4int

HON MINIDTER FINANCE AND fustoms-lt mys: "necolpt for any fum ot moner excoidlne tra dellars:-

MR. CLIFT-It neomes the to to be tneiffrifin sud it toes sot nay who thall por the tace If meers too Indeffittie sia wotr whon in lis present form.

HON. MHIBTER FHNANCE AND CUUTOMS-The man who siven the
recelpt pays the money.
MR. CLIFT-That may be your oplalon, but it does net winy so ith the Act. I am not objecting to the matier of taxation; but you might pat a ryecial tar of one cent on letters Hee they de In Canadi. That wonld be better than putting it on recelpts, While not abjscting to the tax Itselt, I think if ought to be got differently. Any measare fmposing taxntion eught to be definite, so shat we shall lusw exactly whe has to pay the tax. There Is no penalty for not putting on these intamph on recelyts, and nobody charged with the daty of secing that it if sone I would suegest that the Stininter reconilider the mister.

MR. KENT-I think there is a seb eral peanlty In the Aet of 1898, 1 atr not referring to the Act pnassed last yenr; but I mean the Ant of 1808, I think there is some penalty for lsaning unstamped documents.

MR, NIGGINS-Mr. Chalrman, In the War Besiaton Act of 1914, there is is a petinlty ot $\$ 10$ for drawing cherues on a bank und not stamping them, and I think in the Stamp Aet of 1898 there If a general potialty for not stamping doemmints which reequire to be stumped, and it weuld appear that that hardiy coult be enforced in caset urLier the present Aet Thare is one principle I thlail that the hon, mersber oppouite ought to Eear in mind, and that is the princtple which the hini. naember for Triaity, De. Lloge, magrented. As he han su弓gested we are now dealling with z war tax and I 40 not thilisk thint this enactment any more than the maessures of 1914. ought "to be viewed werely in the spirit of tariation eneh as would be levied in onilinury clrcumatances. It la merely a war tax, such as is bofng levied everywhere elre.

Now there is another polnt. We must all heknowledge that there
-as eounderable foree in the poxition the Opprosition fook the tian thme this anatter waz up, that two dollar recelpts were 100 emall to levy this tax on; but now we must retacmber that ten dollars ie the anijount. That I think, fatriy correaponul frith the class of recelpts that are taxed in other countries. Agaln, it fract be remembered that it is not jrush of a hariahip on a man who fe pald ten dollars to puit a two cent etamp on the recelpL. I to not think firmt men will do as snkgented by the hon. mieraber for Brizua surkesta, jmike out a number of amall roceapte In order to evade thie two cent taz. Of courne it misy cause a tomporary upset and canfuston, trid there will no doult be people from whom we will not got this tax at all; but 1 think tonerally, Str, you will find that an in the cafe of the 1914 enactiment in the mala tho people from whom we get the revenue will follow out the law.

Now I am sure my friend, Mr. Whnsor, dfa not mean what be sald about the trouble thif tax is sulng to cause for the Government in the Narfliert Dintricts 1 hive too zuch rimpect for the logalty of the people ln these dirtricth not to feel that they wIII with plesgure put a sitamp on thair rocelpts, in the zame way an will be dotie all over the eountry. It is onily th temporary lify and we all hoper and truat that it will not be of loog duratton. Now I woald like to pofnt eut to wiy tron. friend that thale will not be af zreat a hardshlp as has been murywited, ami the great amount of tevente in roing to come from the poopte doing the ble valume of litanfness, and the carnal mna and the small husines man will not be incorventenced to the extent iugreated here.

MR. MORINE-Mr, Chairman, that
fo a sery clever bit of npecial plesdise Aptatently gou cas eever anything wuder the name of war and then It ticouther rgtic Thti is lid moife a wat tax than way ofter tax it in all Enitg lato the Cunsolitatiol Repranar Tuit, and is all to be apiat for the
 It le rot at sueation of raining money lo spend on war, but an to where we

On mothos this Report wae nocelf. ef.

On motton for the ratoption of the Report Mr. Morine moved an amendment that the second Resolution be stricken out.

Whereupon the House divided, and there appeared for the amendment:Messrs. Morine, Clift, Hockman, Coaker, Halfyard, Jennings, Targett, Wineor, Abbott, Grimes, (10); and againet it: RL. Hon, the Prime Minlster, Hons. Colonial Secretary, Mlanter of Finance, C. E. Emerson, J. C. Croable, Minister of Marine and Fisheries,MinIster of Publle Works, Mesiri. De7ereux, Downey, Mortis, Moore, Moulton, Parsons, LeFeurre. Currie, Hig: gins, $Q$. Kennody, Young, Waleh, Kent, Lloyd, Stone (22); so it passed In the negative.

Whereupon the Honse divided, and put, and there appeared for it: Rt. Hon. the Prime Minister, Hons. Colonfal Secretary, Minfster of Finance, C. H. Emerson, J. C. Crosble, Mintater Marine and Fisherles, Minleter Public Works, Moasrs, Devereas, Downey. Morris, Moore, Moulton, Parsons, Le Feavre, Currle, Higgins, (7) Kennedy, Young, Walsh, Kent, Lloyd, Stone (22); and agalast it: Measrs. Morine, Clift, Hickman, Coaker, Haltyard, Jennings, Targett, Winsor, Abbott, Grimea (10); so it passed tn the aftirmative and was ordered accorilingly.

The bll entitled "An Act to amend 5 Goo. V., Sess. 1, Cap. 10, entitled: 'An Act reapocting Stamp Dutles'" was then introduced and read is flret time, and ordered to be read a seeon time on fo-morrow.

At halt past 6 o'cloelr Mr. Speaker left the Chuir untll $80^{\text {collock. }}$

Mr. Speairer resumed the Chalr at elght owelock:

GENERAL HOSPITAL HILL.
Pursuant to Order and on motion
of Hon. Colonal Secretary the Pouse resolved itself into Committee of the Whote to consider the Bill entitled: *An Aet respecting the General Hoe piltal,"

Mr. Speaker Teft the Chalr.
Mr. Parsona took the Chair of Committee.

HON. COLONIAL SECRETARY avr. Ctalrman, it will be remembered that on Tuesday night last I informed the Houpe that I would owing to the Inteness of the hour, refrain from making any remarks on the matter now before the House. I felt sure that hon. members would prefer my not detaining them later after a day's stremuous work. Thereforo 1 askod the House to go into Commifteo this evening for a few momenta untll I explained this measure which circumEfancea hive brought about it witl be remembered that last year the then ton. member for Bonavista, Mr. Coalon asked a qucstion in this House in reference to certain olleged irregular thes tiaking place in the General Hospital. It was then alleged that Dr. Keegan was taking certain supplies for blis own use, and the questlon then arone an to whether he was fustified in doing this. The Government lirough the Prime Mnister, stated that they had no knowledze of any such thing happening. but upon enquiry, it wais found that Dr. Keegan admitted that certsin supplics were taken, but that he hat thought he was entitied to these by virtue of his oflice The Government intimated that his office gave him no such right and requested him to discontinue the practice, which, I am able to say accordine to the Commisston be loyally refrained from. Infortunately, thls was not the sole trouhle at the General Horpltal, and for some months previounty, I, he Coloninal Secretary, and therefore departmental head of
the Inatifution, was aware that a great deal of miaapprehension, quarrelling and friction whis existing in that Inetifution. 1 might saly that one of the frat duties that I had to perform upon assuming my ofice was to go down there and try and straightea some ilute diftcultes that had taken place between two of the officlals, but whlch 1 am glait to say, sulbnlded. However, as tIme went on, these difficulties and misumderatandings became more freguent and more sentouk, and I found that it was utterly imposaible for me at ienst to adjust or prevent these Incldents from happening. I had immediate interviews with the Medical Superintendent and Interviews with the Superintendent of Nurses and soveral muracs and others of the atnff, and found things had been so sirious that it required some special remedy. I further informed the Exacutive Government, as far as I knew, how things stood, and then six representatives were selected to form a committee as the only way to find out the nature of this trouble as to appointment of a commission of enquiry. This all took place last yearabout this time last May, and the Goverament deeided to appoint a commission of throe sentiamen whom they consfdered would make an unbl assed and thorough onquiry Into all matters relating to matters of that Institution. That Commision con sifted of the hon, member for Trin. Ity, Dr. Tloyd, the Hon. J. Alexander Roblison and How, M. P. Glbbs, K. O. These pentlemen agreed to sccept the comminsion entrusted to them, that wan to tare evidence and seberally delve into the slate of affairs exleting at that inntitution, a matter which, I believo, required the best part of the past twelve mositha, About two or tbree week ago they sent in thels report to the Government, a eopy
of which has been placed in the hands of every momber of this House. It is therefore umnecessary for us to go into the contents of this report. I Dave no doubt that every member who has read it, will conclude that the recomniendations made by that committee are such as will immensely aid in the future the proper government and control of that Insitution. The amount of evidence that was taken was very large. I have not had an opportunity of reading that evidence myself, as I was content to take the report of the Commiseloners, who, 1 know, framod the report from all the evidence they had in hand. I do not desire to Inow the different interviews hold in that ingtitution, nor what one offtelal satd before the Commissioners of the other offclals. I am content to take thy opinlon from the report I have just alluded to. That report is the basis of the bill now before the House. It is well known, not only in offlelal clrcles but generally throughout the country, that the conditions existing in the General Hospltal have not been all the Govermment would require. 1 bolleve that a great deal of this work II dae to nom-appreciation of the re tattve positions of some of the offic Inls on that staff, that there has not been a proper defintion of duties. The duties of Dr. Keegan never were clear1y defined, acther were thone of the Superintendent of Nurses. I think the time has now come, when we must conalder the results of this Commiss ton which lies embodied in the blll now before ns.
Cur duty is to safeguard the people that are in the Hospital and see that they ceceive proper nuraing and proper medical treatment. Our duty is to see that the Institution is conducted is such a way that it will be conducire to the betterment of the health of those who so there. I think that it is
a deploreble fact that such an fnatl. tation as we have, atid 1 have no de sire to caat any reflectlon apon thome in chitreg at it, itoutt hisve a bitt of thit kind lorought. If thinic that the callinge of aursing sud medical profentons arv of a parttcularly werred hinti, but this hiftit of thitur turs beem going on for a long time and it might transpire that in the near future such a thing might arfse that might eidanger the tlves of somie of the paijents. A whort time afo I had a memerandum from twenty-alght- nurses glving me twenty-four hour notice that if I did not take a certain course of actlon they would leave the institution in a body. Tinat was a very serlous matter, pronetiently the whote uuritng staff threatened to leave it a body. 1 fmmediately san the sertounness of it and took aetton, the onls action that coutd lave been taken that would not endainger the ps-tenti-and we appolatet a commitr nton to report ont the trittitution and thuy linve roperted fn fivar of this hill. An I sald betore it in a depiorable faet that we have to bring in a biii of thit nature, The cettlis of these surnes is one of the highert callings that man or women could attain to The great war which is now raging 6 the olther site of the worlt in Which the greatent nattens of the worid are now sagnged, has shown us one side of humm nature; ahown us hour men are bury diry itter thig devislog micans for kililig one another selentifically; Ahown es how Europe can be turned fnto as alanghter foume is the spplficition of sefence; situm ut a slde whleh makes us wonder whether or not the Christian Doctrtne hus beent in fattire. The beit milncts of nie day are devotleg thetr chergy to the Invention of machinery for destruct. tion, machinery to deatroy their talewtpen, nuti the one brlikt ipot in the whole landscape, the ouly bright

Flate of it. is the noble wortc thent han been wndertaken by the mirn and wo tres who have mone forth from thefo fomfortable homen from thetr sood poittanir to imetirtate thin मuintig suil eare of the ricit and Foumdet. It In the one bright feature in thle ermat toettict. It is a calting for which we til liven the lighent regard, and watch plicen men still women on a bleber footing in the werlit than any other falliak outalde of the Church; and t fay it is mont unfortunate that here to 81. John'e where we have an infritution of this kind, run entirely by the government it whoald be in wuct is condition that it betomes necosvary to introduce a bill $\alpha$ ot thle natura. A Treat Acal hay bopn flome the last few Jemen to Improme mit extand this work of the hoeptial, and ranke that in\#tliutina tmote up to date and when We look herlt ent the puist tro emmot hut ham nifmimition for the great ftridee that have been made in thts country In 1918 Dr, Keversen in hte toport gavera sithopile of the prowth of honpliale in St John'ri, and I think this Committie will observe from this report that in the old dnyen very litte ittention whs siren to thone who suffered in healith and were throwa apon the public chartiy (Honourablo member reats from report), 1 murely giva fou that quotition to whow you what the people hud to fat up with, and that little attertion was siven to thetr eamtort fHancuratite metaber contiunes reailigs from ruport). Going beek to the present finstituifine I might fisy that la 1511 the Narecs Homas wan theneit lop Gotement whilleme tht mt fA the Kins Etward Homen, Irviloss fo that time the numes han to ocra ir bedse in then hospltal Itselt, they faid no slttias rooms, latb ruoms and कvergone whe telt-hted thit thrue tho were iderotias thelr lives to thin Work nhould have a comsfortable place ta live in. Bemides it was absolistely
essantlat that much a home should be bullt, Therefore it was commenced in 1310 and opened in 1911. There is a paragraph tien th the report to whtch I whil reter the Commillee (Honourabte momber here reads from report of Dr. Kengan). That paragraph is in keeping with the lart parsemph of the preseah bult whieh provides the maschfanry for collecting fews from those who avall of the institution, more espectaity those who can afford to pay, This inatitution is run entiroly by the Government. It is mup ported entirely by the votes of thlis flouse, and it is costing a very large sum of mbacy annually. I have had propsred it atatement whtch thows the growth of the coat of the institu. ton In the past neven yeare. In 1909 the total coat wan $\$ 84,138.60 ;$ tu 1910 T30,273; in 1911 \$13,750; it 1912 \$51,409 ; in 1018 \$ 83,588 , and in 1914 \$75,887, so you can see that in the past ais years the upheep of the General Hoenlet has more than toubled. The nutmber of thoed ongaged on the atnff is at prevent elghty one. The number of patients on an- average is one thuifred and teh, Att the beds are Ith led all the time. The average cost per copita is aisty cents per day, that is tor attendanee. In other words the attemidimed to pattanti coets por capita uixty cmats per day.
The averige cont per patient, Including all expentes, maintenanca, mainrter thil ofl the orpentes fretoded to that $\$ 75$ wi9, is $\$ 1.20$ per day, So-that every parient that la down in the General Hospltal tonishe is costling the Cotomy $\$ 1.30$ por tay. 1 underetand that this is tiot in exeess of what it is corting instituttone of that class in other parts. I have been informed by chie of our madical men that there ia a hospital just outshde of New York which is about the some eize an the Genern Honpital here; they have, I think, 180 beds; and he states that the expennes as bhown on our ac-
counts in vary much in line with what that hospital cestes. Ours is a little higtier, of cource, but that woutd be zatural because we bave to pay a lijghor price for cortain supplles than they have. Now, Sir, stoce the year 1909 a targe ampuat of moner thas been apent on the extension and improvefent of the General Hospital. The flurso's Ifame, to which I referred before, bas been built, nlso a new bolter house, a new laundry and new kitchens have been built and equipped -lth every modern appliance: the vards have all been remodelled, exfenstoris buft, and the place made capable of accommodating the number of patients to which I have referred, The amount spent in the year 1908-9 win $\$ 19,244$; ; fin 1310, $\$ 8,344$; fn 1911, P1s.025; in 1912, 859,188 ; in 1913, $\$ 39,8$ at5; in 1914. \$11,917: and to the Sth Aprll 1915 ; 82,092 . This makes a total from the 30th June, 1208, up to the 15 th Aprlt of this year of $\$ 158,429$. Now, Mr. Chafrman, I think you cnn realizo that having spent this large cum of money, and continuing to tpend avoh large sums annaslly for the upkecip of the hespital, the least that ean be expected is that things would be carrled out down there in a fiay thiat would the in keeping with the efforts that are being mnde in the twis of fmprovemest, And ifeet sure that thin Bill points out that way. I believe that it is oniy necessary to jut the different clanses of this BII into operation to once and for all put every official in that institution in his or her proper place Fach ofttelal wim know oxactly what his or her dutles are and I hope that a better understanding wilt be arrired at. I hope that the Board of Governors contemplated by this Bill will be men who will not alone be capable, but will undertake the work from a bumane standpolat. It ban been contended that it will not be easy to get mon to tuderiake this work, but If I know the
cttivens of St. John's as I claim I do know them, 1 think we could get 60 met, If wo need them, every one of whom woutd be entirely eapable. We heard here only yesterday, in connection with the tuberculosis campaikn, of the work whith the Hon. John Hierves did in endeavouring to fight that great scourge, and I have no doubt that there are many men fin the communlty of the sume temiperament as Mr. Harvey, if they are given the opportunity. Why it was oniy last year that the affatrs of the city were taken over by a voluntary committee, every oin of whom was a busy business man, who very rarely lave a minute to upare, but I am proud to state that they bave found time in which to make an effort to fmprove condilions In this elty, and that is a greater un taking even than thife work at the hospital. Aten could be found for that, and I have no henitation in sayine that slx sood men will be obtainable who will undertake this work and who will perform it from the standpoint of the highiest tideals. They can do a great deul because thls Act gives them great powers. They wilt be re prosentative not slone of Et. Johu'a but of the whole country, and they will be men who will not be bound or faftuenced by Party poftitics, denominationalism, or in any other way: they will be froe and untrammelied; they will meet as is body, and they will endeavour, 1 mm sure, to find out evergthing that appertalns to that in atitution, and once they determine ot a. stop they need fear no criticism from outaite 1 contend, Mr . Chatrman, that thise le a litg atrlie to wards the goal that we are all so amxious to sec attained in connection with the Gerterat Hosjltat, I have felt तilt atong that it was very undesirabio and very unfair that the gentleman who should happen to be occupying the position of Colouial Secretary
hbould have the responsiblity of smchan inistitution as that thrown upon hids shoulders. I feel that diffculties have arlsea down there during the past twelve or elghteen months, which if there were men in chare who liad is thorough hrwiedee of matters such as this boerd would have, could have been easlly adjusted. I therefore thfnk that thin appointing of a Bourt of Cover. nore is $\pi$ step in the right direction and the keynote of the contentment and good feellig which should eatet In that Inntitution if the work for which it is latended ie to be preperly carried out, I think moet of the dimculties that have arisen there are trivtal and have been due to a mlsunderstanding and misconception of the ditierent poaltions, and 1 thlnk the best way out of them is the appoint ment of a Board such as this Act contemplates: 1 am sure that that Board will not be in operation very long before all these dimicultes will be stralghtened out, it is not neceskary for me, Mrs Chairman, to go through the diferent sectfons of the bili. It has now been before the Comsilttee for the last two daye, and I and suri the cmombers of the House have glven the matter their very car nest considaration. I now lay the mat. ter in thelr hands, and I wonld sak thom, in discussing it, to remember that we are actisted by the very beat motires, and are endeavouring to do what we can to make that foatiution all that we destre it to be.

MR, MORINE-Mr. Chairman: It *o often talls to my lot to criticiee, In a spirit that may seem to be faultfinding, measures that are introduced Into this House by the Government, that it is $\pi$ very kreat pleasure to me this evening to be able to give this Bill my hearty support, Whith the exception of a very few verbal criticisms
which 1 may make as we paes along more for the purpose of aselating in carrying out what appears to be the object of the pill than angthing eise, I think the bill is really a remarkable one th every respeot. The Colonial Secretary anda that Ie was deplarable that it should be necessary to introduce the bill 1 am rather theined to think the opposite. The circamstances to which he has referred sing have been deplorahie, but this bill is such a very great advance upon anything We have had, that out of what was certainty a very complex and tiff colt subject arreat grood has already come. 1 entrely mympathise with the Colonlal Secretary, as head of the Department whifh has charge of the hospital, and with the Government generally, upon the great diffenities with which they had to deal in conneotion with the ndminigtration of the hospital; and also one can quita syrunthise with thono who had charge of the hospltal and who were coming dafly, and hourly parliaps, into conthet with tritating thing that Jarred upon the narves of all. We are per saps ant to forget that they do not look at the sentimental slde of thets work; if beeomes to them a matter of dally labor, and all the irritation which one feels in aitmost any avock Hon is perthaps doubted in their case by the strain and strese of the peculat work walch they linve to perform. Now, 1 know, and have for a areat many years known, a good deal abont thie dafly worktas of the hospital. I ntwave took an fintereat in it both in the Coverumont of the country and the Opponltion, and followed its working closely, and I am bound to eay that I think tbat exen those warring frections in the hospital are, most of them, pereons who have got into that condition through the deep interest which they took in thelr work. 1 be

Heve that if ther had less interest in thetr work there would not have been as much frietion botween them an there has been, I lenow personalby as most members of this House do, these who have perhape boen the casses and at the amo time the viotims, of the greatert amount of tronble, and we know that they liave bern in their Individual capacittes remaarkable in the dischurge of their dutess and one can only hope that this Board of Oovernors when it comes in, will so clear the atmosphero that everythlar will sink bock into its proper place and that things will work along harmonlousty. I would like to kiy in passing, too, how much 1 enfoyed the really remarkable report which the Commission present upon this matter. Knowing how aifloult were the varions subjects they had to Ateal with, how extremely hard it was to get at the trath of various matters, 1 muat eay that 1 think it would be extremely difficult to find three persochs who could sand in a better report. It is well written, goes straight to the point, and opan up with conercto recommendations with which, I think, all of us can agree. It th one of the beat reports thet 1 have ever seen presented in this colony on pubHe matters, and 1 congratulate the entiemen who were tuembers of that Commiselon. and also tho Governzeent. upon the work. I believe that yon can get good men to form thls Hoard. I would express the hope, however, that they will not be pertinns who take no taterest in poltical afrairs, becnuse that olass of man woold not tale much finterest in the affrofrs of the hosptual; but 1 do think that none of them ought to he membera of this House. As far as possflite they enght be witharawn from active parthzinn work. It they are members of the Legielature at all, perhape one or two
that we liave in our ayes who are members of the Legislative Council anglit very proporly be on that Board; but certainly they ought not be any eloser to netive politics than that, because tho questions that will ariso there for is lons time witl be questions that will border upon the domain of polities, and it will be better for the Institution and for the Government if the Board are entirely outricie of tt, so thit the Government, when they are approached, as they will be for some time following the old practice. can say with porfect truth. Thic is a commisiton over which we have ne control; they have charge of this mettor and we cannot intertere with thelr deciefon. I underefood from the Colonial Seevetary that the Commissten will bo representative of the whole oountry. I hope that it will rot go outaido of Sc . John'a. I quite agree that it should represent the whole country. but the members should be restdent th St. Jolin's ao as to be able tr glvo dafly asalatance. I may say sarther that I think you will find from ex. perfence stsewhere that a great polnt will be to get as Chairman a broad. exocutive man, who will put hle heart Inta the work. If you get the right Chalrman you will have very little ditflouity. There are a few verbal alterathons that I will euggest as we go aloing I think mynuif that perhaps, as has been auggested, the Superintendont aboald have the power of suspension, because I do not think that yon ean have any Jnatitution thoronghIy eifficent unlebs there is a man at the head of it with full and complete rosponisibilty. However, the Commis slon, wifter it has been appointed and hos had some experience, will be able to tell us what fa the best to doand to ash for amendmente to this Bill. As wo bo drough the bill section by eection I will suggest the alterations which I would like to see made.

Is the meantime, I have the very greatest plensure in giving the blit my suipport. I think it is one of the best that has ever been presented.
HON. MR. EMERSON-Mr. Chair man: I also talke very great pleasure In siving my hearty support to this bill. I think it is an excellent meastre, It is based upon the report of the Commiasion which the Government saw fit to appoint lant dession whon the serious conditions existing nt the hospital were pointed out to them. The gentlemen on the other gide of the House, and particularly theso sltting on the back benches, are rioted for their enthuslanm in trylag to do all they can in the fntereat of every institution. Wa certainly give them credit in that respect, and I have no hestation in saylng that the outcome of thin Bill is due to the intorost taken by Mr. Coaker Inst year when he askod certain questions nhout the hoapital. When these quesHons were asked the Covernment imdiately made enquiries, and owing, as thin Colonial Secretary has sali, to the fact that there was continuons trouble existing down there, the Government was compelled, in the intereat of the institution and of the whole conutry, to appoint a Commission. I rond the report of thet Commlssion, and I must gay that I do not think that report could be improved upon; and 1 am quite satisfied, from what I saw of the evidence, that the report if bnsed upon the evidence, I beHeve that the measure which ts now before the House, and which is the outenme of that report, will be beneficfal to the institution and will put it on lts proper basls. I was very much interested findeed in the extructe read by the Colonfal Secretary, from Dr. Keegan's ovidence, becanse It brings us beck to the old days when the sick and teeble were not as well feoked after as they are to-day. The
present boppltal Is built upon the aite of the old milltary hoopital. It wat a kreat plty, all Dr. Keegan pointed out, that money was spent te extenalthe the buldinig on that alte. It is a barren wpot. it han bure aurroundilage. and the utflook in wot to any may telpfut to ensralencence. We lare the beautiful Watertond Valies, and several ofhoh piramant elted around St Jotirs.s. with pleuty if trees growity sround thom, hater ant rforis, heatity purroundings, wbich would have bees much more sutable than that bieak spot whime thro thoigttait riou itaste It was an asfat plty that so muct money was spent ou such a phace. With fispect to the condition of the inatlcutfoer at thin jinuant time, it was wory annogieg to the Government that thees complaints shonid have beon coming $\ln$, consldering the tmont of mones that we spent on the hosptal stnce 1502. The figures have airendy lueeb tiven by the Eolo ntal Secretary. They bave been ftcrentan गour uftor 5ikr, Thit exphath tures in ounnectlon with the Nurner Hiume and the extenaiens to the hrild trge weiro very great. We did not hesltuti to गpont thit monny, becaure we fully rallised that the object was a orthy oae and that we could Hor apend tantry tin a better causa, ine if wain a very great anacigatice to si Indeed to find that thingr down there erese not runnine! amoothly. Now, I fink thit the Commlanton who undertrote the duty of Foircuatitig this to. atitution and patilug it on a proper hals hare done good werk, wal I her Heve that when biey recommetiled the chofatment of il Board of Governon they were dolng exactly what they fomadered tinhte and I aino beileve that results wit justify therm in thels metton. The bitt in $n$ r vary ittupte otiel and a vory comprobeasive one. It has leen morisel out in every dotail to carry out the report of the Commis.
slonems ns far an poselbles atid 1 have no doubt whatever thet when it is enacted lato Latr, and in tin operatlon, fill then litite dirfurences downt there at the liospital will alsappear: that tilnge will go well; and that that inatitution will he a crocit to the country.

DR. LLOYD-Mt. CEntrmin: As the detinttion of "Bepirtment" is birem for then purpose of savins a reiettitouis of worfie, und an the mord fr enly umad onoe at the beginnitig of the socond parmuraph, 1 would sagsent itat you put it th the sponvd paraFirlh. GENERAL HOSPITAZ BTLA.
Purnuant to order anit on mption of
Ham. Colvalal Secrelary the House re-
solved tuelt tifo a Committiee of the
Whole to conatider the lill entlited
"An Aot rempecting the General Hon-
fitht:

Mr . Spealier left the Chair.

Mr. Parmons took the Chalr of Commiltee
Mr. Spenker resumed the Chatr.
The Chairman from the Committee reported thit they had consldered the matter to them reterred, and had passed the BII with some amendments.

On motion thits report was recelved and adopted, and It was ordered that the Bill be read a third time on tomorrow.

## STAMP DUTIES BILL.

Pursuant to order and on motlon of Hon. Minister of Finance and Cus tome the BII enttled 'An Act to amend 5 Gen. V., Sess.1. Cap. 10, entitled 'An Act Respecting Stamp Duties" was read a second time, and it was ordered that it be referred to a Committee of the Whole Houne on to-morrow. DISASTERS FUND BILL.
Pursuant to order and on motion of Ft. Hon. the Prime Minister, the Bill entilled "An Act respecting the estabHishment of a Disasters Fund" was read is second time.

RT, HON. THE PRIME MINISTER -Mr. Speaker, In moring the second reading of thits bill 1 desire to point out to the House in a feu woris the object of the bill. I have placed on the desks of the hon members a copy of the Daily News of August 4th last and it they look inside of that paper they will find a complete report, occupylng the whole of page 5, of the Exeontive Committee of the Marlne Dlseaters Fund, 1914: a most intoreatligg report indeed although we all regret the elrcumstances which made it neceseary.

The blll which I am now fatroducing Is the result of the demands of the committee in respect to a Permanent Disesters Fund as well as to the fund they are now oporating.

The bfll proposes, as section 1 provides, that
1.-There shall be a Committee to
be known as "The Permanent Marlne Disasters Fund Committee" Chereinafter called "The Committee") to constat of nine urembers, to be appointed by His Excellency the Governor-[nCouncil; of these the Colonlal Secretary and the Minfster of Marine and Flaheries shall be members.
1 may say that that is the representation which is acting at the present time

Section 2. outlines the powers of the committee so appointed.

Section a deals with the ralating of roonles by the committee.

Section 4 empowers committees now in operation to pass over any aurplussen they may lave to the control of this permarent committce. The Section reads as follows:
4.-It saall be lawful for any Committee, person or persons, corporation or corporatlons having the enstody of any fund now or hereatter ralsed for charitable purpones, where the objects of the fund have been sattifled. and the surplus of the fund remuins unexpended, to pay over zuch eurplus to the committee, and the reeffid of the Treasurer or other properly construted afficer of the Committee shall be s suticiant dischnrge therefor.

Section 5 embles the Governor In Councll to appolat the committiee Is a body or soclety for the purpose of determining all claima under seetion 3 of the Act 2 . Gnorge V., Cap. 25, entitied "An Act Reapecting the A oufatnace of Sufferers in Marlne Pieartera" and att questions fri reipeot thereot. It will be remambered that in seec 3 of this Act it is provlited that "All clrifims licreunder ind all questions in respect theroot shall be determined by the Governor in Councll. or by such body or soctety is thoy may appoint for the purpoee." From thif it would eeom probetble thit
it was contemplated to panx orur any mins after diatribsition to thy Crumell for them to thipope of is.

Tur follomins if xir oithict from 10 Itter dated June sih and directed to ilom. Johan Murris, Clalreats of the Commitue by His Eireflescy 8 is thaluer Davidsoin, who was to close contant with mans of the large afrens fir the Old Country, His Ercollem© m mys:
"T woeld nukgent for the comsiderntson of your Committen that, if it
should be posslble to apare aome portion of the large sums now in your hands for the immediate needs of the suffererg from this calamity, It woutd be wise to form a Fund in att of those who are left destitute through the toll levied on our seamen and fishermen by the finexor able sea."
The Committee is authorized by Mayor Ellis to say, that when in New Yorl, Boston and Montreal in connection with the Reliel Fund, the hope was senerally expressed that a suffielent oum would be ralsed to enable the Committee in charge to devote some portion of it to a Permanent Fund for the rellet of the familles of the Newfoundland Sallors and Fikhermen lost at sea.

On behalf of the Executivo Committee of the Masino Disastere Fund of 1914.
I have the heoour to be,
Your Lordshidgs obedient servant, J. ALIEX. ROBINSON,

How. Secretary.
To the foregoling a reply was recelved from thetr Lordships, snying that the matter could only be effect. ively dealt with by epecial legiala tion.
In Vlaw of this raply the Committeo colicited the co-operation of some legal Eentiemen, Mensra. Conroy, Blackwood and Warren, who tindis promfeed to prepare suoh legislation as may be necessary, in accordance with the resolution adopted at the citizens' meeting in the Court House on Aprll 7th. The present bill is the result of their recommendations.

I would suppose that the gentlemen of this committee would be reappointed, and I have no doubt that they with the experience they have thus far had. will know the most deservIng eases which come betore them, san thus be able to give the necessary rellef. As the Fund will be
founded on charity it is to be hoped that it will increase as the years go by.

MR. KENT-Mr. Speaker: Regarding thls bill I think that there can be no two opinions about the desirabilfty of eatablishing such a Fund for the purpose of collocting the contrlbutions of the people for the purpose outlined in the bill; and of course the discussion here will at most only be upon the wording of the bill Some elrcumatances in connection With the changing of some of the moneys of tiffs Fund to a permanent one will have to be dlscussed here, and this House will be called upon to Justify the same. Then akain the amomet to dlstribute will vary from time to time, stuch as when a wrdow marries again; the children will still be depending upon this fund. The question to be settled Is, if the beneflciaries should get greater allowances when the number of dependente has become leasened. This matter will liave to be teken hold of by the committee.
Under this Bill, of course, without spectal legislation, prebably the Commlttee will have no such power, but as to how far the doctrine of oy-pres should be applied is a matter which would require to be very carefutly considered and thought out. Then there are other quegtions of a耳imilar kind. For Instance, where persons have given or may sive in the future for some definite reason, or for some particutar accident that they may desire to ansiet, I think that these funds ought to be ear-marked and not put Into the general fund of the Permanient Committea. On the other hand, the arlstence of thls Committee will be an Inducement to poople whe wish to give legacles to thils object, or otherwise put into etrect thetr charitable intentions in $r e$ lution to people who suffer from disasters of this kind. Wo discussed
thle matter st aome length when the Bill was before the House in 1915 providing for the payment of $\$ 100$ to the dependents of those lost at sea The natere of the arocatlon la which our people is engaged is aurrounded by dansers, and it fis only right that we should have some such sofeguard or assurance as is provided by a permenent fund against accidente of bis Ettio. As far as the detalls of tha matter are concerned and as to how thoy can be eared for in the bill will bo discussed in Committee, but the ldea of estallishing a Permanent Fund to one which will be acceptable to all parties who desire to relieve the distress of those who suffer trom nceldents arlsing from the gea.

The Bill haviag been read a encond tive, was ordered to be referred to a Committee of the Whote Honee on Monday next.
PATRIOTIC ASBOOLATION BILL.
JL. Hon. the Prime Minister gave notlee that be woutd on to-morrow nak leave to fintroduce of Bill relatting to the Newtoundiand Patriotie Agsocintion.

PACKING CO, RESOLUTIONS.
RL. Hon. the Prime Minlater gave notiee that he would on to-morrow ask leave to miove the House fnto Committee of the while to consider certain Reuolutions contirming an agreement between the Government of the Cotony and The NewfoundInad American Packing Company, in relatton to the establishment of Cold Btorage and other matters in conhectton with the Fracrles of Newtoundland.

It wan moved and seconded that when the Fouse rlsea it adjourn untit Mondiy bext, May 10th, at three of the clock in the afternoon.

The House then adfourned accordingly.

MoyDAY, May 10th, 1515.
The House met at three of the
clock in the afteracoa, purauant to idjournment.

Hon., Colonfal Secretary tabled the Report of the Commlsston on Fishery matters.

PETITIONS.
MR. JENNINGS-Mr, Sparker, I beg leave to present some petitfons from tho Imbabitants of Green Hay about timber reaarves. 1 would ank that thene be referred to the Department of Agriculture and Mines for their constderatlon.

MR. STONE- 1 beg leave, Str, to present a petition from Hillview people on the sulject of Prohibition. The petition is largely slgned by the people of this place fincluding Rer. Cater. Winsor, I ask that thls be referred to the Colonial Secretary's depertment.

MA. ORIMES-Mr. Speaker, 1 beg leave to present a petition from the Inhablitants of Clarke's Beach and Bareneed on the eame subject. 1 need tiate no remarise in this connection, sos the aulucet has already beon fully diseuabed here.

MR. HALFYARD-1 beg leave, Sir, to present a pettion from the InhabItants of Vlctorls and Rogers' Coven, ${ }^{3}$ logo, auking for the sum of $\$ 150$ to repelr a bridge destroyed by fire in the year 1912. Great Imconrenfesce Ir cansed by its not belng there, and 1 trust the Government will telee thla matter into consideration as soon as they can.

Mr. Hallyard-gave notice of questloin.

Mr. Grimes gave notice of quention.
Mr . Abbott gave notice of question.
Mr. Kent gave notice that he would on to-morrow move that the Labrador Pulp and Lumber Co, and other Iumber compariles bo heard in parauance of their pettitons to that effect, at the Bar of the House.

Mr. Coaker gave notice of question.

## QUESTIONS.

MR. JENNINGS asked the Minister of Marine and Fiskeries to lay on the tsble of the Honse coples of returns of expenditures of all monfes allocated for the construction of public whart at Point Leamington. These allocafions were made under different hendings, some of which were as follows: -South West Arm, New Bay; Point Leamington, New Bay; Chairman Road Board, etc., but were all for the same whart.

MR. WINSOR anked the Minlater of Marine and Fisheries to lay upon the table of the House coples of returns for amonints allocated to Capt. Darius Blandford, in the years 1913. 1914.

Mr. Speaker informed the House that ho had recelved a message from the Legislative Counell acquainting the House of Assenibly that they had passed the BII sent up entitled: "An Aet to amend 5 Goorge X , Sess. 1. Cap. XI, entitled 'An Act to increase the Revenue by the Impopition of certain Dutles on the Estates of Deceased Persons'" without amendment.

## QENERAL HOSPITAL BILL

Pursuant to order and ou motlon of Rt. Hon, the Prime Minister the Bill entitied: "An Act Respecting the General Hospital" was read a third time and passed, and it was ordered that it be engroased belng entitled as above, and that it be aent to the Legislative Councll with a mersage requesting the concurrence of that body in its provisions.

## PRODUCTS CORPORATION RESO. LUTIONS.

Parsuant to order and on motion of Rt. Hon, the Prime Minlster, the House resolved itself into Committee of the Whole to consider certain Besolutions, in relation to an agreement entered into by the Government of
the Colony with the Newfoundland Products Corporation, Limited.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Commiltee.

MR. MORINE-Mr. Chairman, I take the opportunity of replying to some remarks made by the Premier a week ago, when, through Indiaposition, I wae unable to answer; and at the same time to make some comment upon the amended resolutions before the chair.

Before doing so, I wish to refer to certain bad motives which have been attributed to me in connection with my opposilion to these resolutions by certain "lewd fellows of the baser sort" outside this House, I am not in the habit of explaining my conduct 1 prefer to let time explain it for me; but I think I may be excused for referring very brlefly to two InsinuaHowe whtch luave been made, namely, that I have been moved in my opposition (a) by batred of the Reld Newfoundland Company and (b) by the moncy of the Anglo-Newfoundtand Developraent Co, which has retained me.

Now, Sir, I want to emphatically deny that either of those has played any part in my opposition. I have given no evidence at any time of any liatred of the Reld Newfoundland Company, and I deny the existence of it on my part. To a large extent 1 hold myself responsible for that Com. pazy, although it was Incorporated by my successors in office, because 1 feel thit, fathering the contract of 1898,1 am to some extent the creator of the enterprise which goes under the name of the Reld Newfoundland Co. Therefore there ts no person outside of the Company itself that could have a greater desira for its succese, than I have, because its success in carrying out its great enterprises will reflect
credit upon me, and justify the boast which I made at the time the Contract was passed and which was quoted by the Promier a few days ago. Certainly, 1 have never allowed my personal relationships with that Company to affect my conduct in this House, whether at the time when I was solicitor for the Company, or since my return to this Colony; and I challenge anylody to point to anything In my conduct at any time or anywhers which sires any support whatever to that insinuation, which must have found root in the heart of somebody who felt himself animated by motives of that kind, or capable of them, and attributed his own bad heart to me.

With regard to the Harmsworth Company, I may frankly say that 1 have, since I came to the Colony, been in recelpt of an annual retainer from that Company, which retainer does not Increase or decrease because of anything which 1 do in this Honse. The legal work of the Company is done by Mr. Wood, K.C., who is not a polltician and who represents the Company in this connection. The matter was ineldentally mentioned to me, but aftor I had taken my stand here. I think I may say that the Harmeworth Company are not opposing this Bill as a whole. Their opposition to It is entirely in so far as it might affect their intereats; and as the section reforring to the East Coast has been strieken from the Bill, any ground which they might have had for opposing it has been very largely removed: but this does not affect my opposition.

Reference was made the other dny to the fact that in 1905, when the Harmsworth Contriet was golng through the House. 1 moved 22 mmendments to it Probsbly it will throw
some lisht upon thls unfair charge of interented motives actuating me in thls House if I say that at the time 1 fought so strenuously in the House against the Harmsworth contract, 1 was solleltor for the Reid NewfoundInnd Company, which was selling a yery larke amount of property to the Harmaworth Company, very much favored the contract, and very much resented $m y$ opposition in the House: but 1 felt that in this House 1 represented the people and not the Comjany, and I took my stand here in opposition to the personal interests of the people by whom I was employed. as I think every member is bound to (do, and $t$ hope always to be able to do.

Now the Premier, with mallice aforethought, I think, dragged the Rallway Contract of '98 Into his discuasion the other night. because many of the members on this side of the House have all along disagreed with the views which 1 take upon that contract. I sm not now golng to deal with the remarks which be made concerning it except in so far as they tpply to this mattor, because I do not think it proper that anything should tura our aftention from the sublect before the Chals. At another time I will Justify anything which 1 did is coanection with the contract of 98 , end in the meantime I do not intend to throw my last finto the ring merely to oblige zentlemen on the other side of the House.

There were two or three remarks, however, which the Promier made by way of argument baped upon that contract which he thought fustified what has been done in the contract now before us, and these 1 propase to deal with briefly. In the first place, upon the question of freedom from taxatlon, which it is proposed to ex-
tend to this new company, he polited out that freedom from tasation on the callwey, the telographa and the dry foek, were proulded for in the Centract of 98, and he sald that that forraed a good precedent for this. But If any person will think for a moment ho will disoover that it to no preced ent whetever. To exempt the rellway from taration for the fitty year darius which the Reld Company undertook to operato it was not kin ing anything to the Relds, because If it hand been lieble to tavntion presumably they would have required a greater frice tor the operbtion. That freedom from teration was as much ane of the considerntions pald them for operating the rallway as the fand whlch we save them. To bave left tho rallway subject to tazatlon wouta only have increased the price whilch wo bad to pry, and consequently wo gave them nothing when we exempted them from tuxation. With regara to the telegraphes which thay were to operate for thatry years and the dry foek which they purehesed from uis. the same rumarks bold geod. To have feff the telestaphas liabile to taxation would have created the necessity perhipe of a subuifly from us to them. It would almply be taking fironey out of one pocker and patting it in amother; and the manc to true of the dry aook. The pueation will tmmeat afely clear theete up if you romemtier that in the caro of the Reld Now fouadhud Co - Fe were direct vendora to them. and they were pirchasers from we. of contructors with wis, and any treedom, which we gave on the one side hod compeasation upon the other. Eut wh aro now deallag with A Company which in the main to not going to get its property from un,tt te not purclinsing from us, and we are getting nothing from it in lie way of coasideration: therefore, in dealing
with them, we are entited to act as we would act with any putale eparty who came in and proposed to carry on bualness in this country. The positipn if entirely different from the Reld Newfoundland $\mathrm{Co}^{\prime}$, whech was difectly contricting with us for the pertormance of certain public serThece. These men are proposing to carry on an enterprise for thelr owa protit and advantage None of it comes to us.
Another remark made by the Premter based upon the Feld Contract, can exaily br dtsposed of. Referrlag to my observation that this contraet should have beon in the form of three contracts deallig with three different sabjects, the Premler said in his osagrerated way that the Reid Contraet afalt with thirty-threo subjects.

RT. HON. PRIME MINISTER-No Id did not say that.

MR, MORINE-That was the phrase you used.

RT, HON PRIME MINISTER.-NO, I gave the number of subjects, and numed them.

MR. MORINE-Well, my answer to that is simply thles: In the first place I am act responsiflo for the contract of tis. It was drafted by the late Sir James Winter-a master of clear ex pression. 1 lhave never lieard from 1\$58 down to the gresent moment, meybody expresslige any doubt Bs to the meming of any section of that contract it is as clear as water. There were pernons who dotibted the oxpedioncy of making such a contract, but tiobody ever expreased any doubt as to the moaning of the barzriln, or as to sny phrase or section of the Contract. And that ie the dis. ference between thiat contract and tafs one. The Feid contract dealt with a varioty of aubjects in a codifi. ed form. It first dealt with the railway
ant it fenft with it esmpletely; theo whe the teligraplas; then with the dry dock: thes wilh the stram-toot errite Per lestasice We Nind to the pention of it dealiens will itus rallewt A. provistion that the miltray sheold bo froe trem lesation. We find sa tehtr teretm meter the telournt tient of it that tie telomenthe shout be tree from taxation. It is all pers fectly clenr. Thers in as attempt by one clsuse to mir up and nevatiy asd mydite the mesning of the Contract. Now, that is the difterutice betwees the two and that is what 1 am strit ting at. I do not mesa that we should haro thren merparnte contructs thtrotased at three dimerubt timm, hut that the centract shewid dnal wib the three maln sableeta la cotitied form. and th axch a way that in tooking at It mer swat mot it mare what war pro pasif. The best proet of the correctsees of mey obbuction has benes the rert proper crembat of the Govern-
 methe nod sarrow: anentmests The wide amendnuest, arikise net the Fast Caich, ath the narrow amendmentr felliter the therturn pritir nielite Why wat that? Because thien the urambert supgorling the Oovertment hatent the viatous mryuments mate by mymelf and otherr Weys saw the force of the objectionn which we wets making te to the mixef and muldiled enadilien of thite coar thect
Now, ese we fine by, 1 wemld like to alhu refor to the atatement tumele eat. side the House, ast ta) that I masle an ethat trone the titr equrt of the Levilaturs Mr. Furkine Erembloly Fha hesend ma here knems that in made an attick upoe the Geverammet, set Trin Mr. Firlang: thit 1 note it him in the racot complimentary manHur: in fact, that I haved my allyeltion to the cunduet of the Government up.

HT, MON. PRIME MINISTERTearb has teen men cesmentation slace

MR. MORINE-I did not hay thrre Nin. 1 woull mat assimn that there a cold ber Xow, witi mberener to that n mark of mibe in cormattion with the filling of the Government to enguge emphtert Mone to anctit in the pre-
 thot 1 ans sot atalits to atthek the dermemse 1 tely tairn to be fatr I think I amen rifht in minging that the ctigmal drat arriamatit war preplea by ats. Firluage The Primeter Elid that if was before the Councll Ct many occavlons; that they discus
 pley aty indanuis to it; but 1 think 1 an compet whem 1 ky that he told an that thry thd met coavilt may trat Enin outedo the Comelitiot attempt el to pat the erigenal drill teto shage
 enrred to thom from the discrustors ot the Cormell. Xow my ariumat of Jetions. if bit dhurty emprosed to frime is thits that after all that vas dime a lawyer or lavyers whether in flothice or otherstios stowle tare boub ziked to take this Imelymated ithans, ruit ticle it isto shopes, so that if eould espreat becturately, cheanly,
and properiy whit wan the $\operatorname{tntentlon.~}$ That that was not done, and has not benn done up to the present time, han beent the caum of great dnlay in the Howne, and will bo the canse of ereater delay biefore this becoraes law, beeasie this tis now a ctacreditable document-I am now speaking mere ly trom the standpoint of draftumasstip aad nothing else.
One other remaric made by the Premier to connection with that oris: innl contract desarves attention, and that was with refereace to my objectlon to the fact that so manny mien may be taketi out of the flibherles. The Premeler referred to my adrocacy of the cotitrict of "25 on the ground that It woald give areater employmens and sald I tow argued the ofther way, Now, that sort of argument miftht de celve hr canal obierver, but it will not decelve nuybody who will rugard the contitions of the country as they wers In 1857 and an they are today. At the end of 15St we were In thlo porition. -We had lhat the worst fluhery the country hid known for a great masy Yearai there was more poverty and more unenstoyment than at any pre vious time; the rallway had fust been compteted heross the coustry, bet it wae fiot in operatioas the Harmpworth COn. सnur tut tir operathon, not wan it thourche of at that thme, and thero was very litule, If anything, belng tome at Dell iniand; there was theretore evrity rumba why romithtire should be done to employ the people mueh morn larguly. Hat the position today is entirely diferent. Now, it is rot that we limb torn lirimy fuefi to the flahery, but not enoush. Now, men can ret employment at Bell Esland, or with the Harmsworth Co., or the sthiut 1., theed Co, of they can croms easily to the adjoining province and get employment. We have good fish-
erters snd good prlcest and one of the strongont arguments advanced here by the Geveriment on this openins diy was that the prospecte for the tialiery the presunt year were bettes thin ever before, and that the price of that and the deminat for it abroad vonld make it remumerative for our people to engage in the fiekerles more thinely than botare. That is entlrely the epporite condition of affairs to that which extated in -98, when the fold Rallway Contract was put through, and, theratore, the cfrcumvances which fustifled my argument at that thme do not Justify a slmilar argument at the present time.

The Premier said that in counection with the Harmsworth deal $t$ had mov. ed some twenty odd amendeneats. I ami very proud to eny that I did. Env. ery bie of them कns voted down in this Honse 1 thak there were only four of ur on the Opposition ride, and Do repard was pald to any of the am*tifmentir whitch we proposied. The most of them, however, found thelr way tuto the contract whon it came before the Legislative Coumell, and 1 was Justifled in the position which 1 took. The Government on thin ocfarlon has acted very much more aisuly, and very tuuch more creditntir, thail जla the Gorernment on that oteanton, when ther simply pat themselves in dendiy opposition to the smondmunts because they were tiored trom this atide of the Houne Whito the prasont Government, and I coumpatulate them apon it, have listennit to some extent to the voleef of reasch. Now, whem 1 look over thone amendments I like to cram atfention to the nervices which I performed for the country on that occanton. 1 find that one of them limited the property of the Company which was to be free to inxation, to mill yardo, mill facill. ties and water power around thelr
mille; that another one provided that it should be lawful for the people to pass and repass by stream over the demised premises. As the Company were taking the whole milddle part of the country out of It, that was a very wlae provision. Another one provided that the people in that country ehould have the right to travel over it in any way pending the construction of roads. Another one was that all the preservatton of game should apply to the demlsed premfees. Another one was to the effect that righte over cortain water-powers on the Exploits Rtver should not be exerefsed after four years; and another one looked to the right of persons to enter on the demised premises for the purpose of carrying on trade in the way of laws of the Colony with reference to shops and stores, so as to provent the Company from obtalning a monopoly in this directlon. Another one looked to the conditions under which the agreement would cease unless the Company commenced operations within a certain time, Any person who cares to look over the Joumal of 1905, I am satiafled will agree with the principle of every amendment that I moved on that oo casion, and will admit that they were not moved for factious purposes.

Now, let us glanco for a few moments at the reraarks made by the Prime Minister (and I will take them uD as thoy were mentioned casually). In reference to the objection that thin contract gives freedom for ever from customs duty upou all machinery and matorial used in the operation, the Premier sald that every machine means labour and that, therefore, if ought to bo admitted tree and there ought to be no objection to that provisfon. In the present condition of the country that may be true, but we have to look forward, we have to take? a tong, long look, we hope that this country will not always be in the
condition in which it is to-dey in that respect. The Premler sald that it by and by these thlags were mazufactured here that the Company would buy them here because they could get them bere as cheaply as anywhere eise, but he forgot the middle state, which exists in this and every new country, when small industries are belas started, and whein without the fm position of a customs duty it would bo impossible to protect them from ourside compettion. He forgot that it may be the prifilege and duty of this Legislature by and by to proteet industries whleta may krow up auxilfary to his bis one, if it becomes a fact, for the manifacture of the thinge which thil compriny will want, and we shall not be able to give that protection to any extent whatever, becaueo undor this contract this Company is free from custom duties for ever.

In my opinion twenty years fa quite enough to give them exemption from any form of taxation. The Leg. islature of that time may continue pursiting the policy to bring in their materials duty free, which we now pursue in allowing therm. But they may not, and 1 dalm the right for the Legislature of the future to do as they please in this matter. We have no right to take away from them this right, and to mortgage the future of this Colony. We have to feave to them the same liberty that we found when we came here. Wo have to lesve to future Legislatures the privllege of protecting the futura busipess of this Colony as they see fit. And the same remarke apply with equal force to minicipal taxation. At present, with very fow exceptions, we have no munfeipal taxation in this Colony, and we may not have it for years to come. When we do have it, It will bear equally upon all allke, and 1 seo no renson why an industry of this kind, an frodustry that is destined to be a great one, an findustry
that is to be a most profitable one. I do not see why it ahonld erea seek to be freod froai the orifary muntepal taxation placed upon every other buslnesi and every other Company. What would the enterprise bo worth if it cannot afford to pay a small amount of municipal caxation which everyone else paye? There ts some exenee tor froelig them for five, tea or twenty yeare, walle thay are building thotr damn and factorjes, and getting their buxinees, end whlle they are contrlbuthing to the employmeat of tabour In the country. UD to that time there may be some azgument put forward for allowing them freedom from tix ation, It mny be alald that It is desloable to get In hero big infeatorn from outside. Suppose we grent all that, why stioutd we grant them freedom from all faxation for over? if the lesislature of the future sees that thicy are not doing wall, thoy will see that it is not wise to impose taxation upon thom sud they will not impose it. But why ahoutd we take away from the legislature the right to co as it sees int at that timo? Why thould we say to this company "You ehall recelve the paupers dote" by retiaving them from taxation, as yon do the very poorest of the poor? They cannot be unfairly taxed, oxcoptional1y. Their nelgabotra at the flshery gre taxed. Men who have to work and etrugzic for a liying will have to pay municlpal taxation. Why ahould not thte sreat company pay it? I iay this down ats an unanswerable argument that if at the end of twenty years this company can not pay munielyal taxatlon without infury to its buiness, then tre do not want it at all, because it will not be worth having. To put It another way, if it is worth having. If it bas anything like the future before it that has been painted here, then we ought not go beyond a reaaonable perlod of years, mortgasing the future of the Colony and mortga-
ging the future Goverument of the Colony. There has been no argumeat fudyanced in favour of it. There te nothing before the House to show why It should be given. There is no advantare to us In granting it. Is the promoter to get anything he aska for -lmply because be askn? Because he will never stap asking is long as you are soft enoush to give to him . But way ithouid we in this House bifndly whichout any argument before us, without everythins before us, except the word of a bungry promoter (I am not spenking of the gentieman personally) way should we grant evorytuing that he asks, mortgage the future of our country, bind the hande of future legfilstures, all becauze the borse leech callin "More, more!" My answer to the Premier on the question of duties In that now tho absence of duty may fiot do any harm. In the future it may not do any harm, but it may bo that it will te the eavtrg and the hopo of macmiseturers that may spring up ie the country, and then these manufacturers ought to vo protected by a customus duty.
Now another superficial remark of the Premler's, one to which the at fention of tho Hoase ought to bo drawn, is that we lave been talling about our natural resources ad namepam. We have been tankfar about our patural resources, but nothing ever came of them, We bave been talking ebout our prospecte in natural resources and we are still talking about them. That we want to change all fline fel me remind the House that the difocovery of electricity is a matter as of yesterday, that the water powaris of the continent have been ruating to waste from time immemortal. No one ever found any value In thom ontll the dincovery of electricity, snd to-lay outside of Newfonndfand you woald find it impossible to buy a water power at all. In the great province of Ontario, in which
this matter has been sone more tally Into than anywhare else, yon cannot gat more than a leane of a water jower for twenty years. They are buying back the water powers which Governments in the paut have given away. And the fact that our vater powers have heen romilag away for such a time la mo reasm why wo ahould male haste to threw awsy the few that we have left. On the contrary, it is our duty to find out exactiy what we have and protect them in the public interest. How much would the eity of St. John's give to-day if it coald get back the water powers of Petty Harbor for the city? And yet at the time when we were pausing it into the control of the Reld's, when wo were giving them the right to develop the power there, not a voice was ralsed fin the togiahture agatust it. No onn dreamt of Its simplying the elty with light heat mind power, It was thought tipposeftile to lifing it ten or twelve miles. And we all give it to them without is thought. What a splendid tring it would bo for the city if that power were free today. We cannot get a wheter power near the elty now and so we will never be tree from this manopoly. As the years go on it inay be popelble to convey this power many times further thin It was possible is few years ago. A day or two ago $t$ heard tha prometor say that It was not the Intantion of the Company to carry on the manufacture of thoir products at \#amilton Inlet, but Just to create power at Hamilton, and tranamit it to somewhere in the nolgh. burhood of the Stralts of Belle Isle, a ditatice of 200 malles, and the promoter says that they can do this with is tois of only 25 per cont. We could that linve dorn maything like that ten years wro, and if in the noxt ten years we can make such an advance in olectrielty, what may the next ten
yenta bring forth? if anyone had cold ut come yoara ago when we wore hasilig or the axperiments in wiretess thast we would have sent measage tound the world In that way, mes: sibses right acrose the continunt, we woutd have langlied at them, and yet I venture to gredlet that in not too many years we will be able to transmit electrio powor by wirelesa. It seented almost absurd and imposatbla ts us whon we sat round this tatbe some yeare ago and hesrd the tok of a manhine that was worlied by wireless, and we thought that there tust hive been some wires under the able somewhere connected with it. And hore we are today actaally stumhing over ourselves in an effort to throw away one of the best water powers in Britich North Amerios, because wo do not see what good we can get out of having it there, be cause of our own grose ignorance.
The Prime Minister referred to the Anglo monopoly an one of the thinge that this nomintry had to deal with in the prist it was only a smonil thins compared with what we are siving now. But oven in thet case it was found in after yearg to be a burden. Whit hrppeneid as soon as the monopoly explred? Why we had numbers of companies liere, and now we have a large number of cables lnnded in the Teland that could have been fanded yearif before if past governmenta had fot sranted a monopoly to the Anglo Company,
To the Premiler's remarks regarding the Fast Coast area it It not necebaary niow to reply, becavise he intimated that thls section had been dropped fatd it would oaly be wearylng to go over the arguments that I ased arainst that at the time.
Tin apenking of the contract, aection by section the sald that the firat section gave nothing but the
mater fower of the Humber, snd thas that was alruady in the pos seasien of other people Ope of the thingre of which I comptatin fo the as notree of tatormathin under sliteh we are labering. It is a shame; it in In. deciat, that we wheula be deating with itis greit area, and that the Depart, munt ef Crown lands in not able to give us anything like accurato tyformation. Surely it is not unfair to Hily that tetoire ithe Government weat Inte this prention they shonidd liare had a report, from some competeat pernin to thy tiefore the legislatare fufformation shewing that svetion 1 noly given what atrenity if th the handn of sommone sle Permonsilly. 1

Thee what about the pow ene of the streams thit may or may Hot flow late Orand Laket Who kovs the Itumber dratnage area aceurate181 Cas unyone in the Department of Crown lanits leff me whit is the Itumber itralnage areat Bere we are thtrtyads mewhirs of thartiament, asked to vote lwar creat rightu asit Furbers of ar it thatit tine thitry of thr Mand, asd I do not bullieve fhat there is a singte memper of the Lesteinture that known, any mirn thata 1 know, what cte Humtiry itrifuige ares lif. and what we are giring away, what the nature of it is and miat prospecta it haz 1 thlik $t$ min ithth th matag that flals is a mertoes matter, and that it in lmponifile tor tax to con: pirobond what we are dolng witheut information an to just what, ware giv-
her away, and where the powress are Eitendior to, and whom wo are lalurfius. I suy that it is diecreditable to this ticitititure.

Thure shmuta be placed butore us the must deflnite and accurate faformation as to whether we are not-Indur: fing otherts. Thare la no exnuse for fur blindly हiving away anythine withour linowiag exactly what it is we Ire itvink, When ise Premler says that nection 1 given nothing more than thio waler powern of the Humber, he errn tnexcuably. He tin giving, without the slightest Justice to those that are thern, the richt out expropriation Fhich roes with section 1 . He sives the fie power to dums the lalien and streams. *hir right to divert them, and make them fiow where thay nevor nowed ititore He glres thetr the sholetete tipht evur all the sater powern of fornar Troak area, and the flumber area, and by shother sectlon ever the flamiltes talet, sod so far so the Hambet erva is ecmeernid, the right to ilestruy the property of other peofle lo giviag them the power of exfopriation Jou are violatint a great ferivipte of British Juitice, the right of property. You are violatink the sacrednesy of ownerahip. It there is fine thing more than another upon thels the prosperity of the Colontes tus boen bavect it is upon that priscliple that an invertment once made fin inacrod tathe Eviry Dritiah Coiiny fotlown the Mother Country in pirmetrieg the rights of the Inventor. They all mo os the princtple that erfry sctur spett in a Mrittish Cotosy to an mafe an if it wern is a Britisk hank. That is thee rearnh why from all fon worth over invetments Dow infar the Hritiuh Colomies.

From the Continumt and frots for fill countría monez vill go out finore tredy to a Britith Colony than ta any othur part of the worlid be-
caure thay lonow the British Colonioes follow the Mother Country in their regard of this first right. And yet what are we dolng here. We step in and destroy every first right in the ureas which we convey, and the more fact that we proville tor arbitration, is no fustification whatever. You bavo no right to take my property that lies alongaide of yours, mereIy becanse you pay me for it. I have a right to keep it. 1 have a right to do what I like with it I have a right to lose it if I am foolish enough to do s0. But the boltom of my risht is that I can do as I like with what is my own. And when you step in and say to these people who were there before thlis Company, that they must be violetitly dispossesaed, that their property may be conflicatod, you arg guilty of a crima. Because by the Folence and force of this legislature you are taicing away the rights in property of others againgt thofr will, You have no right to say to a man, ' I want your properly for nomeone else.' You are using tho power of the Legislature to ateal, to ateal awny the right of a man to do as he lkes with hls own proporty, and let me tell you that you will rue the day that thls bill becomes law, because once you pass this contract, you say to the outside wortd in no uncertain tone that it is unaste to invest a dollar in Newfoundland.

Now I heard some language used in thls matter that was inexcusable. The Premiler referred to "land-grabbara," arf if the people in possession of these lands juatified that name. "Specula tors," "Iand-grabbers." he called them. The land-grabbers are in this country, and they are the props and supporters of the Government. The land-grafbers srabbed the land and sold it, and the Government stood hy and ahowed them to go on in face of the advanctug value of lands in this
country, they allowed these lands to be marleted in the wildest and most discroditable speculations, and the promotore in tbla country were men who went fito the markets with their pockets full of recommendations from Government membors. The srabbers are the men who sold the lands, not the men who put their solld eash into them. On is rough estimate there is in the nelghborhood of $\$ 3,000,000$ invested in cold cash in the Humber area by men who are of high stand. ing in the citles of the Unitel States and Canada, men of substance, men of etanding, men of Influence. The Vendors realized $\$ 300,000$ from the Company that was to have operated at Deer Lake, and that Company has tolay spent nearly $\$ 400,000$ in cold eash in this country upon the etrength of the laws of the colony. Are they fnd-srabbers? The land srathbers are In this city, and the same land-grabbers are supporting the Government in thin iniquitous deal, and helping to take away the property that they fold. The Penn Company, whitch has * water power can be destroyed by this company, because this company fin divert thls ntream, lower the watar power and do as they like. This Pern Company is composed of reputf ble man in Philadelphia, men of ret ponsiblity, and all you sive them is t onesided arbitration. And it is not it all clear evon then that they ean tat more than the value of the water fower which is being destroyed.

What about the timber lands which Tie of no use, only in so far as they fin be used with a water power flose by? These men are forced by fils resolution to scuttle out of the country, and take my words for it, han they get out they will curse the name of this country, that allowed them to be trapped by landirablers into making investments flint were afterwards stolen from
them by the Leginlature supported by men who sold them the lands. There la no man to-day, so for as I am aware, connectod with the holding of lands in the Humber area to whom It is falr to appoly the stigma of land grabber. I think the St. George's Company has tasco,00e invested in its fands in thile area. They are reapensible men, men who intended to oarry on "tis ladustry. They are not land Erabbars. The lanit grabbers were thlowed to earty on the nofarious work under tho very eye of a complacent government, and they lave carried ou that work in the name of Newfoundland all ovar the contfnent. And now when their work in done, when there are no more geese to be plucked, their victims are atigmatised and fnsuftoi. HThiey aro lind Ernbbers. Away with thom! We are gofing to take sway their rights and give them to a franchise grabber." That sort of argument ought not to be uzed.

I am not in a position at the pres: ent moment to siy exactly how much money is invested in that area, but : know that it is at least $\$ 1,000,000$. And otte of the intecenctes of this white transaction is that we do not know hove tunch is Invested there, who are the men that have inveited it, and the fact that these mon have not been notitiei of the bill. They ought to have been notiffed and they ought to have been permilted to come hefore this legisliture and pat up thetr argument, put forward any request they may have for thiefr own protection.

It is an thexeusable thing that we should go on with this Bill without giving proper notice to those people anil an opportinity to come here and protect themselves if they can. In all reason what can you expect if you do this? Wherever ane of these men exlsts, In the United States, and there are some of them in pretty nearly ev ery big eity in the United States and
of Canada. the name of this Island will stink, if you allow this Producte Carporation contract to go through in fts present form- A 揾ossessing these people of their rights without their permisslon and without giving them an ouportunity to defend thomaclves.

There hai never been a contract of this lind brought before the Legislature that we have not heard some cisptrap appeal to Demos, some cinptrap appeal to populer sentiment, some atterapt to stampede the crowd throush self-intereat: and that mani foated itrelf in the apeech of the Pre miler when he taked about the number of men who would be employedthe great number upon the Labrador who wonld be able to maintain themselves, and then the humgry thousandm who are cóming back from Boston. Toronto, Montreal and Chicago, and everywhere olsig to which they have gone in ordor that they might work at Bay of Islands. It is an argument that it is alwaya easy to make, and 1 suppase it continues to be effective, aithough it has backed up every bad Fenture that was introdaced into this country ifince our memory runs. It is an argument which you can make In support of a bad venture just as fany as you cmin in support of a good one. All you have got to do is to thite in millions, employ man in thousamds, and rush the thing through-to be regretted afterwards. Thes number of promising things that were gotig to be done in thils country during the past few years is greater than the number of members in this House, and thicy have falled so badly that it would be offenaive even to enumerate them. How many men are comIng back here from the clties of Canada on the पnited States to work in tily industry that may be started in this country? The most of outr people who are away are employed as mechanifes; 1 know a great many of them fill the city of Toronto, where they
aro working as "handy men"-carpenters, or masons, or something of that sort; and every one of them gets more now that be wouft bo liable to get in an induetry of thit sort. Probably the same ts trie of the peopte In Boston and Chifaso and the other large American citics. The most of them. In any case, have been there long enoagh to get settled down, and they do not desire to return agala.
They are not at all likely to come back here and go into the class of work which they could get from an fnduatry of this Kitid, because this sori of industry will employ probably onily two kinds of labor-the common laborer, and he will be the commonest of laborers, and then there will be a fow specialists, trained men, who at the outset will be brought from abroad, and afterwards there will probably be young men of our own whe grow up with the Company, such as we have to-day in the Anglo-Newfound latd Derelopment Company. There will be no place for the most of our people who are abroad; and for thone for whom there is a place there will be no better wages than they are now fotting in the places where they are. At present there is no wage scale in the Bill, and it is not proposed, 1 mm derstand, to put one in. Tiie price of tabor in Bay of tatands will be precluely the price of inaor in Sydney at the most; and there will be no reason whatever why a man at Byduey sthoutd come to Bay of lelands, much Iess why a man at Boston, or Toronto or Chicago should come back here.
The rate at Sycney is the rate it Wheta they can hire foreiga labor. A Newfoundlander goins from here tomorrow to Syduey han to compete wfth the tarefgn erements comtng from thie continent of Europe, and the average price is all that is paid. That same foretgner can come to Bay of Iflauda and work there, so that the
average price at Bay of Islander will be based upon the average price at Sydney or any other minlug locality. And I say here now to-day, that with fish at the price at which it now is, It is a mietake to the country at largo a miatake to the trade of the country. and a mistake to the fisherman, to talte him out of the fiaheries at the pretent time, where lue te a spectatJit, and try to tura him tato a daylaborer on an industry like this. The ditmind for freah fish an a food wili increase, and the pries will fnerease? 1 -am vary glat to say, so that we can with contidence look into the future, tind eay that our fishermen will never be worne puidt thin thoy are at the presont moment; and survily 1 am merely echoing the sentiment of this Honse when I repoat what I heard the Minister of FYaheries say across the floor of the Honge a few days rgo, that the fisherman of this country is as well pald as any man of h/s lind In any part of the world. Theretoro, It say that if you do create an industry at Bay of Islands, in the matn it will employ forelign laber and in so far as it takes our men away from the fisherles it will do them no Enod; and consequently the most of this talk about the mon who are to be employed here io elaptiap. So far nis the talk about employing men on the Labrador ts concerned, that is en en worne. Tho Premier spole of this ar though thare were going to be an tndustry created at Hamrition Inlet, or fomewhere else where all the 'Ilvyers' alonis the Labrador could get employzient whon they Mlied. Now, that is a protty extenslve coast, and to trivel to wherover this industry may be will be a pretty difficult undertaking for the pieople on the Coast. The Idea that a very great number of fishernuea who are now reatdent on LabraCor are golng to work in this Industry on Hamilton Inlet is a very fantantic notion. We understand that if
a water power is avalled of at Hamilton Inlet, a wire is to bring the power to the Straits of Bell Iste, and that somewhere near the boundary lino with Caxada, one ssde or the other, the real indurtry is to be started. That is not inkely to prove much of a boon to the people who live in Northern Labrador; and therefore the only object of talk of this kind must be to obsecure our intellects to the real guestion which we have before us.

Now, Mr. Chatrman, thus far with reference to the remarica made by the Premier. Now I want for a few moments to outline some of the reasons Why 1 oppose this contract, even in Its present form, and with thls I shall be very brief findeed.

In the first place there are the provisions which I will eather together under the name of the Taxing Clauses, including customs duties. My objection to them has already been outlined.

It is that they ought to be IImirted to twenty years in evory case, for the reasons which I hnve already given; and by and by when we come to deal with this, 1 shatl move smendments in that direction.

Then I object altogether to the clauses in connection with expropriation in its present form, because thoy do not appear to me to meet the needs of the case. I shall presently rafor to that at length.

Then there are a number of tho oxStigs clauses which require rorbal alterations and sharper detinition. I will be prepared to deal with those as we take up the diferent claubes in coumittee.

There are a number of new things whick 1 think ought be included, and I would just refer to them to inalcate my line of thought. In the firat place I think that a provision ought be put into this contract to the effect that within a tlinted time the Gov-
ernment must be satisfied as regards the capital subscribed and paid up in thls Company. At the present moment it is what I might call a figment of the imasinution. It is a paper company with, I presume, three sbares each of $\$ 100$, not paid up. It has no thareholders. It has no capital. I do tuot think it is right for the Governfaent to be dealligg with a company of that sort, and theretore we ought to grovile that within a time to be fix. ed they shall have a certain subserlbed and palderep capital. That is necessary for this reason. You are providing here that within two years they shall "begin" work, and that they shall complete within five years, and duriag the whole of that time you are ty ing up these regiona from everybody else; you are stopping development at once; not a dollar will be epont it the Elumber region by naybody there iffor we pass thils Act. The people who are there-The Ponn Company at Junction Brook for instance-and who have money with which to proceed, will stop immediately-they liava prohably stopped now, because as long nas that blanket bangs over them for five years it will be perfectly useless for anybody to start anythlng at all. Therefore I think that not more than fwelre or elshteen months should be given the Company in which to raise ${ }^{4}$ cortain amount of capital in cash. and prove that thoy have it to the Goverament, and unlees they are abie to do that within that time, this Fhiote ribramment stroutd become nult and void wilthout its befing necessary to take any furiter step, and thus rofaove a wet blanket from the indurthes of this country.

Then, Sir, I think that this comfany ought be made do what you provided in this House three years ago should be done by the Deer Lake Company. You atipulated that the Deer Take Co. should put up $\$ 250,000$ as
security for the compensation of people whose property was infured. In view of the fact that this Company Is going to bo a very much bleger concern than the Deer Lake Co , and that many more people will be fnterfored with and Infured, I think It would net be wnfair that this Company should be asked to pot up \$1. 000.000 , as a truast fund in the hands of the Gorernment, an reourity for the claims of persons who may do inJured by this Corporation, And 1 am presently golng to mave somelting to that effect.

Then, Sir. I do not think that the arbitration clause has been handled properly. You provide that ohe arbltrator should be named by each of the contesting partles, but you let the Department of Agriculture and Miner name the other. Now this Company is necessarily going to bave a big influence, backed up as it is by the Retd Newfoundland $\mathrm{Co}_{0}$. over ony Goverament hore, and to a lirge extent they will own the Department of Mines; and to allow that Department to mame the umplre in thenc arbitiatione is practically to confts cate the property of other people unfairly. 1 think, therefore that the third arbitrator showild be nppointed by the Supreme Court Judges, and not the Govornment- and not by one Judge of the Supreme Court, but by the three Judges,-s0 that thero will be at least a falr deal between the poople whose yroperty is beivg taiken and the people who are taking it.

There are a whole lot of amendments that require to be mace along the lines of the Rarmsworth contract concerning public rights, which are not protected at the present the by anything wheh I can find in these resolutions.

Now, I want to sum up very brletly why I object to the resolutions in
thelr present form. Finst, because there is not sufficient information before the Committee as to boundarfes to Justify it in adopting these resolutions. We don't know where the Corner Brook or Humber Iralnage area extend to, and we ought to know. Second, as to water power, we don't know. There is the whest possalbie zcope and the greatest concelvable value at atake, and we know nothing. Third, as to the effect which thase resolutions will have upon other peoplo with rested rights we know nothing. and wa have not sought to fanow anything. We are carelesaly and shamefully proceeding with a messure whifeh may afreot other people withqui even lnowing the names of theso yeople or whereabouts of their property. Fourth, as to the value of the tranchiunes which wo are giving away we liave not even en opinion by a sompetent peraon. Wa bare no report from any Government Departmant or from the Government Figinser. We are proceeding In the aheerest of ismorance Then, as to the value of the induntry which we are invited to as nist, what do we know except what a yromoter hase told me-one of a race that has become a pest, one of a class that as a rule io not belleved, 1 rofeat that all that Fe have before us todsy as to the value of this Induintry is upoin the uusupported statement of a promoter, who bas not a cent in thite matter, and wont put a cent in: to it unless It pleases him; and apon that statement we are kiving him franchises of wront talue in ordis that he may hawk them around to the Investors of a continent As to the Labrador sclieme, why it is tanket on to this in the most easual manner, as though it were not worth ten cents. It is a mere attachment to the Humber aren-a mere endeavour to get a Leginiative tranchisn which can be held on to and made uec of if It is of
any value and dropped if it is not; and this Legislature, without consld-
eration of any concelvahie kind, is running pell-mell, tumbling over itself, as it were to give a right over that great power down on the Hamilton Inlet without erea knowing whether these men are serlously going on or not. Why, it is only a tew months ago stnce we had another gentleman here, a man of high standfig . from Montreal, representing forefen capltalists, who liad a proposftion conceralng that water power which might or might not have been of great idtvantage to this country: and there is no doubt but that we conld have many applieations for thls power in a vers short time if we held it to ourselves. Instead of siring it away; and yet here we are, as I have nald, tumbling over ourselves to give it awny to a promoter who wan't eyon toll us what he intends to do with it-who, in a manner which shames our common scrise, tells us that he has not a cent In the proposition, that he doea not know fust what he fa going to do, but aaks us to give him ttit power to order that ho may bawk it around to see what is in it. If it is worth anything to him it is worth something to the country. Why not ficep ft unttl we get something for tt?
My next objection fs that our manner of proeeeding in connmetion with vested righta will deatroy the credlt of the cointry with investors abroud; that we ure viohating wli Eritish principles by not giving falr notte9 to inrestors who, whatever we rafy think and whitever thelr interests may be, have at least the right which we clatm even a German submarine should sive to one of our stitpas. We zre procied: ing with all the winton careleashiges of righte thnt the Germang sre Bhowing in afnking our vessels without notice, with no opportunity to infend
themselves; and our proceeding cannot fall to bring discredit on the whole colony.

We are grantlig franchlses that will crash out all projected industJles, and we are hand.ng over the west eoast of this country and the Lab rador, as far as Hamiltion Inlet is concerned, to speculators, bound hand and foot for years to come. I object to the scheme of these resolutionsnot to the industry but to the scheme, Because it is badly concelved, badly tramed, and without safeguards. The renolutions in every line bear proof of the carelessness with which the fchome has been worked up. 1 object to it becaune it creates a monopoly of the whole manufneturing possitbiffties of one quarter of the country. The whole west coast is tied up and handed over to the Relds and their asgocinte industrien by thir BII. Alt the Industries over there will be handed over to once concern, which 1 am not How attacking, because it is the concorn which it If, but because it is not desirable that its monopoly should be Ereater than it is. I object to the freedom from taxation which you are pro poeing to give, first, becanse it is untair to the competitors who are not also made free; second, becanse it interferes with future local developpeat; third because it unconstitationally intertores with our successora; fourth, berause it is umnecessary to any srowitg enterprise; fifth, because ft is an unfair discriminntion in favor of this enterprise it it is succeseful and vixth, becamse it is a useless dis: erfmination if it is not successfol. The men who cisim to be establishing a freat Industry are anking to bo rohered from burleas which are com. mont to mil. The promoter says that this particular industry in the United States has had its capital increased by watering it twenty thmea. From one million it has Erown to twenty militions, not by increase of cash pald
by mahecribera, but by accumulative the protits they have jald thetr ahareboldors 10 per cent and fincreasod theff expital twenty timen aver; until to day the whareholders in the Uated States in this induatryhiesays, who puf a million doliars into the concern, are drawlag 10 per cent per year on twenty milions. He nays that a similar Industry in Cruada is paying oven bet ter than is the one in the United States and that this industry is ex pected to pay better than elther of them. They never expect to pay more than 10 per ceat on the watered stock. And the man who sayn that in publie here in St. Johin's is the promoter of a company which is down upois its kneen asking un to gire them freedom for ever from every form of taxation. Whtte they make millions out of the natural renources of thin conn try, the people of the country will have to pasy taxation which will be imponed upon them to leeep up the pubtle serrices consequent upon this very ludustry. A more fantastle, a more abeurd, a more unbellevable propoittion was never put betore a wober minded Legtalature. If they need thls freedomin from tanation they are pairpera and ought not to be dealt with by the country at all it they ere gotng to make a great foduniry, they ought not need it.

We are raahing on like prodigals efrlas away everythige we have-talstig the substance which the Creator has given us and throwing it at the teat of these men.

Sif, to content myself with merely critictaing has never benu my attitude In thin House 1 have always destred to be constructive, and I can see the basts of an industry which we mikht help to create in this country, in the Hember area, to which 1 could give my aupport. it belleve that there are ereat nutural advantages there for an lidentry of this kind which are enoughi in thembelven, and moore tham

Eninagh, to give. We can cive them the power, the wateralfe facilities, what the markot. Thes have to go to Cave Bretun for thrir coal. hut they could not get a suter power there; they have to go to Spuin for their byilies and to the Trifted Elates for thele phorphate, but they could get telther water power nor cont in elther of thene placess. They cate bring thelr coal and thelr pyrites, and thelr phow phate to May of Lelands at the sheap eit concervibits rite, ainit with the power and the limestoun that we can klve them, wlithout any of the eatraondinary privileges which is contain ed in this Bill, they could have a tnanchise which woutd be blg enough for eny reputable company, and all that ve ought to give. For that parpose 1 alld be preparsd to exupport resoliltions to nasemble if I may une the term, all the sater powers which the Humtar ts capaster of, tato ane great power, but I shoula want first that the area over witich the Compuas vould have control ahould be atrictly, snif, if 1 may use the word, satiatactarily, deriond; 1 should want the eapltal wulseribed pardiatly and pald第 in purt, su that we might know that we were dealing with a conapany Forth inaline with; 1 should want to see that the vasted rfelitis of othor pernatis ware purchased by private ar Fingomente wlith thine periona, if posible, witum a limitied than: and 1 fuld be prepared to go aven further gind malan nome arrangemint whereloy vested rishits which could sot to our ehnsed vtihln $\pm$ reasonable ttme ghinuld be arbitrated upon fairly; then t nhould thee to see the fourth Ereat priaclple, that after they had created their water powar there phould be alieguate proviston tor the thee of all aurplus power by uther peobte atil for public purposien. There in no provislon of this zind whatever it this contract fie relation to the Hums ber arem, alihnugh it finds a plaee
there with regard to the Hamilton Miver. There ought to be a provialon in thil contract that the eity of Bay of Istands, or whatever it may be called, and all the induatries which may हnow up there, shall have the right to acquire any surplas power which thin Company may have from its work at a price to be flixed by a fair board or commiesion. If thote fundamental things were provided for, 1, for one, would give my assistance to put a fair contract through this House.
1 would give the Company unlimit. ed water powers; I would give them treedom from customs dutiea and all forme of tasation for twenty yeara; 1 woutd provide for a falr arbitration of all rights not acquired withln a Imited time by private sale; I would ghe thom watII the lat January, 1917, to get thetr capital subscribed and the necessary portion of it pald up; und then I would provide, what you have not provided for in this bill-a tupse of that water power to this Colchy fo case the Company did not carry on its industries after it had etartvi. All that you are providing for liere tos that they shatt thegin in two yeare and finish the expenditure of tive millions in five years, and then they get a 99.year lease, renewable for ever. Thiey can stop thetr tndustrles when they plenee, sit down on their culuches, and ayy to Jou: If you want thin whter power of the Humber for my other varpose, you will have to pay for it through the nose. You are putting this company in the posfiton, If they fall-by and by to carry on their fudustry through some now ferLilizer balag disoovered or zomething of that sort, to hold up the water power of the Humber River and the development of the whole West Cosst for ever, or until you buy them out. becauas you have rot ais clanse provialine for a lappe. It you look at whet is happening in Ontario, what do you find there? In every case provision

Is made in thelr contracts that if the contracting Company ceases to apernte satistectorily within a given time. the property lapses to the Crown, and zot only that, but all the permaseat tmprovement which may be made in vaterways also lupse, wituout pay maent, becauke they have become part and parcel of the waterwayn. The locks and the dams and all the other things that linve created the power, tapse to the Crown in that country, without compensation, because the Company has had iss times and if it fails it is not permitted to saddie the country elther with nea-development, zon-continuance of lis work, or with a big bill to bay them out. If there are any bulfdings or thinge of that sort which can be used, they are bousht by the Covernment at a falr price, Such a clause as that ought to bo the baste of any senalble scheme.
Now, I am satiifled that a little reflection will shove un that some such echeme an I have outtried is possible, and is the proper one, and nil that any reasomable men ought to ask, if Mr. Wheon's carblde imiestry is oushalr se great as he says it is, all the eapital that ho needs can be got. If wo give him any more than I have outlined. we are wastigg the valnable nssets of thif country, wa are aimply throwtog pearls brturo these peopte. We will be golac vers far if we give them all the franclises which 1 have outtin. edt, snet evon some of these woald only be fustiftsile because of the importasce of uniffling the powers of that coant and ereatigg one porrer; otherwhe one conil not juetify eren as much as 1 hive suggested here; but there can be no featiflcatfon whatever for this cotitrat as we have it before us to-day.

1 can realive and sympathize with the desire of the Rovernment to promiote the promperity of the country. The Prezter has always been an op-
timist in thes enatier, and the har ah wark. I beliere, been sinours in the delestona soler whiels he has habouret
 oame down ts thie Atomes and parv powely promofted auything which was msubulent, but he has gromoted notue thimer that mert me fntefenmithe thrt If it were not for iny abuailant charify I would sot say that, because the thinge themsatver hive talled by their oirn whight. And with this optimistic frame of mind which ts no natural to hime, and which to sucts is large extent fias helped film to his muccena as a pulltfilan-becanse he fint flat the patest to make ather people dream thil rony dreans of Ate own owemight erpertence he has fatlim noce mors Inte the errur of atriag as ear to thent propositions, which ate dilitencelvel, fildimestet, mat midetemmitho thr thetr gremit frite; ant sototy can penbabiy teel it so kemply as le does witen the thinks of it The Gioverument, prokitly for thin first thmer to thin the tory of the crustry, has hat the coerage of tis own convietions fo eoming dinwn here and acceptivis to a large
 spon this ulide of the House, Governmenin in the past have been too weak to Hinteb to the volice of remanis if it chme from the othor litito. Thisy liave carrief thlags through with what they thosaht wan streagth, but what was reaily only an vahibition of futeltere-
 telate the Government upes liaving Haisued to fle voice of protent, and in niusy ranpects agreitig to ferlreble *ementuriete Nor, 1 \#nint to nimt then still turther, fur the lave of the cossHy whict we all acciaim, and which. Ithink, we ath featre to eerve, to tuke thene thint the mitter urnt, eiter it taks trme mucathe, if you tikn, to preperty echatiter every provialice stere In is it , and all the provisions that oughit to bo added to it; and even it

It is ancesamery to ebme lack in a apeeinl ansulon of the Howes to adrpt a finlahad mesare, 1 tor mee sum prozored to comar leck ated aerme withtet por as any time for 1 was werver telete hrmaty convinced of anywimp fham 1 am at the preseat thine, that at we bane this tritt fa tie prisent ahaph "en will be purticipants of a trapeay If the development of this counery.

RT, HON, PRIME MINIBTBER,Xfr. Chatrman. I do not propoue at thlie faguent to occupy tho time of the House st say freat lenath, as I imagise that there are others who have sot yet apokes who wilght care to particljate in this debate But there are swa or three polms which 1 should the to give expresalon to ber fore golice firther, more particularb) In reptr to the lon. member wha lan junt wat town. In the firit place I should time to ithasese lils mind Ia relation to what be has fost nald at mearta asy ehany of zethy with reterntice to the contriet strucn $=0$ huve rame fin bils Howse Althuegh I lesve no doubt it way hin fatenifini ta complienent and congriteIate the Gerernusiat on doing whar other nevertmonts hare failed to do In the past, I to not think it woutd bie fate for tis to lay that wnettais on our aouln and accept that compliment Ee has me mapnanimonaly erpremed, becaune 1 wiab to make clear, an : bave en mvernl former octasions is sayd to do. that the umendmente tentalsat to thts remoturlime ate atsindments merrely to make atmelutely tertaln that which was mot unoertato. I do mot mate 1 hare met atratited. zer wili I nelmit that arer of the heal eventracilenes ploced Dy aim opoes that fentrect ese be matrintinit, teet tha tolnts lavine leing ralaed, If in bat fight and proper that me as a Lecio. letare whould not allow any mesarte to 80 through this irouse, where any
possiblity of doubt ean arise as to thin coatract proving contrary to the faterests of the Colong. This is the firat polint 1 wlah to make clear, and I deaire that it be tharonahty underatood. There te nothiar whatever to tapify that ans membier oh thts stide of the हoune las in any way woaken ed in the supporting of this contract. 1 lawe semp contrants ge through this House and pans the Dpper Houne and avergone knowes an well an I So what liappesed to them whes the Court toolk them falo conulderation. Fut it Is fmponaftle to druw ap a documeat. on the Interpretation of whilch people cas aneer difarree. Why the Prtey Ceomeft, \#r ! tave matt on torwar accaslotas do nothing but set aralde the julgmenta ot the Blghest Coarts of the Irupire liook ap any of the Prfey couneft ruports and you find thens outting aalde the Mghest Joigneents of the land. None of un clatm to be Solomons Every statute that comes lelore this Hause is capable of different interpretations. Where ambls: afty has arlsen we have dobe what we eould to eradleate it, acting on your burceitton. Thit ts att you like dome to chasige thly bllt; but whee yew exy that peopte. who have tnterests fa that arna of the Humber tratnage. arn havtur thatr property eoaftip calel, taken awny framfulestly from them, roe criticime your ewa Interpre tation. The maln pelat eny tron frtent whinis tis thie ifteget -ptricy he says it fo "wetne thas the Cer matis," that we are taktige awny the property of private peopln exactly as tha Germum ira dutis without no much as giving moticell and so on. It sounda very well but it is not cob vincing to intelligent men who see how mitters ruatty itima. There tilis heen me a:tement to conflicuts. The same criliciam whe offored when the Harmsworth BIII wan belng pansed.

Every aere of land wat be takon les these Harmuworthe" raic the Opposi tion. But as a matter of fact fleme has noit boen ons single arbitratipn, and tits is a similiar properition is the K. pitules resion. Tou um siving no fielits awny under thifs Conatract, and fieti where there is fatnage, there a pemmly is prorided. My learned tromit who has Jisit aat dowa reforred to the form of arbltration in referuace to these rights provided it wers in the Bupreme Court, because be betirwed that this Compank mirlit be wo large and infleratiat that it woutd not stly own the Crown Lands tret voatd dirgely prefellice in lis faxour every Corermenat in the futare. Thls in the renson then, so be mult that we should depart trom all precedeat and to Into the Suprumi Court as a tryfunat to settle evory artirrution that arlies in meletirs to a hir of ivad to the Humbier Rtren We have all the hlebeat rocard and respect for the Suprome Court and we lnow it woeld be difticult to flad a letter trilhumal or faire ror more impartial men than the Eupmone Court lut in this case we ine sreaties a reasomakle and talr tritunal tor every finterest. What is the Court of tribusal procided bere is thle mesolution. Ope arbitratur in apjolnted by the Agriculture snd Micas Departuest, er the Minlater or somethe uoter tifm, the party owntng the had appofits an Arbltrater and the flompany appoints an arbitrator. We \&o sot wast the mame Arblitratore, for avery case that arfies there is a dif. berven arbitration. As I sald before 7 is oractically two spalnat one, be tane gou have the Company coming to here as strangers, one man is apfelnted by the ownur of the properts the other by a publle otttelal of the Conapary, and 1 sutmite that ther appolntment from that suurce is just as tikely to be an honest appolntment
'and an tmpartinl appolntment as any arbitrator that can be found even In the Supreme Court. I do not Ithe this way of refteeting upen people that nomentiat characterles the bon. member that juat ast down. It seema to tropts that evergone is purchas able, that nig minn can be bought Because a Company is large it does not mieas that it cas buy exergone autside lis doot. The lifstary of the Colnny as regards its public depart menth Elves tue poeithle grounds for mach is nuggestion. Why my bon. triead uTen proposes a eontract of his own lere this evening and he layn. down four or five prinofples which he evolves from what we hiswe before un to night. It is meerely an attempt to make peopte belleve that there is nomething difforent in what he now purpones, whes T think evoryone will readily porcelve that there is a very greit imblarity between what he proponen and what actually in before us.

He firat. refors to the "locking up" of all tho water powers in Bay of Istade fist there is ao one water powor there that can of itself be sumf: centiy developed. It ts true that the fleuren are estlmates from the other alde but they are the only flesures that we linve. I have done what I could to check the estimate, and I find that it woult cost about $\$ 7.090 .009$ to Gevelop IBp,190 hursepower. Howiver. thitw is nullicient amta before is upon which to work. My hoe, friend would prosiose abother contract under freer conilttomis, which tr that it there be any surntis powec, that it wit be sold to the pabllic. That is very theIf slast is goting to lappen, evea if you sever pat in thst clanes, it there fo any narplas. That clamse wan pat into the fimmilton firer contract, because there wili sertninly be a very targe norplas: but in the cisee of Bay of thlanils, it to an entirely different
proposillon, because all the homepower generated there will probably te required. It they shouth have mare power than is necessary thers. they are not golag to be Hike the dog in the mansger. It is onty reasonatile that if there is a surpius thare to sell, they will sell it to other people awd lincrase thelr rereaves, so Jons A) the purchanars were not eompect. fors is buslnese.

Then my learned friend pointed out flat there was sothing to the contract that providect. In the event of eperations not being continued, for the water power'i coming hack to the people. In otaer worde: if, after carrying on operations for olght, ten or twenty yenrn an the case may be, anethor diacovery is made which will to away wth the manufacture of thin fertlizer, then the water power does pot come back to us. Well, do thetr zulttioni whith are invested in the Y 4ms, power houses, machlaery, ote., tome back to them? Suppose that atter ten yearn, nome new discovery is tuide, what in golus to happen? They fill nell all that outfit to some other tulustry, Slappose that Lord Northctifets property shuold cease to be of any value, what is he golng to do whiboet the water gowert Is le goleg to sell ity What value is it going to ie to him to has it to lifa breast, It De paper bualsess does not pas i im? He will sell it if be can get Guy one to mell it to. Thum if he cangit got anyone to self it to, the thing catuot he maluable. It le not vorth ever sotting it hack. But if $\$ 10,0 n 0,800$ If speat on it, it mast be worth a great denl, and, belng no use to them कill come liack to us ftr tho tornim of *nother Infuitry in anothar way. My larned friend auked the cuention why *en were not muking a provinion ons gesied in hiff new contract by which theme people would be called apon to pat a cortaln eapltal withiti a certain
time. But these restrictions throule an Industry and make it harder to borrow a dollar. These people have to so on the marlet and get money. They say, "We have sot certain rights in relation to the creation of a great thutestry, rou have great water powers and we want them. The combinntion of the two ought to produce is large induatry in the country. Then we will go to London and borrow money. But if they are so bound up with restrictions, they will not be able to borraw a dollar. Everyone has had that experience in small enterpriges as well as in large ones. We ail remember many contracts which hite been pasmed here In thla House, 1 am not the only one that has someflmes taken a rosy view of them. What alout Whiteway, Peter Teasier, Shea, R. I. Kent und otherst They were cotimiatic about such contracts in thoir day; but when the contractors went to the money markets they fallcil to get money, and the contracts fell through. We must try again; we cannot give the thing up for ever,
Then my learned friend elarged me -I hope not intentionally-with makIog sppeats to the sympathy of the people outalde. I stated what I thought a reusonable cutcome of such an industry in this country. I did not speat of thoso peopte who appeared before thls House, by petition or otherwise. Athd whe have timber finterenta In that region, as land grabbers. I sald there never was a movement to establieh an industry here yet when we wero not falling over land grabibers, and we taust do what we can to lielp atang the promoters. But. 1 never for a moment relerred to these. land ownern as a class, as "grabbers" If was not with a view of putting the position unfalrly before the House that I referred to the people in that way. 1 never suggested, as my hon. frlend sagn I did, that thero were any
persans coming back from Toronto, Rostou or Montreal to obtain employ. ment in this industry. When I was asked who were foling to come home, I sald, aome of those who have left the finhery and gone abroad. We oan get 1,000 men from Labrador. Every. che that knows the Labrador conditons, knows the conditions of the people there. There are 4,000 people on a cosst of a thousand milea. Probably one out of every family will be glad to get work with the new Company. The great thing is that labour will be given to our people. Fancy what it is to be buried down there in Labrador during eight months of the year under semi-Arctic conditions. That is why 1 suggested that men could be had from Labrador, because they would be only too glad to find something to do. And then there are thousands of our men working in the mfnes in Nova Scotia, living in shacks. these people would be only too willIng to come home, and live. There are two or three thousand people there who would be glad to come back. Then take the men who go tway pogoflshing. You can bring them home, and, better still, you can find employment for thousands of them in Newfoundland, giving them a chance to work the whole year round. These are the places where tre can get 5,000 men.

Then my learned friend, speaking about this Company, said that the Company were gotng out to devour every bit of land, mineral and timber, in that part of the country. What are the facts? If you read the section you will see that in the firet place they are limited to a certain class of land for certafn purposes. They cannot take a man's property and dentroy it forever. The section we have here is a verbatim copy of that in the Tharmsworth contract. First, they are given the right to aequire ungranted Grown Lands.
")- If at any time or timen durtar the sald term the Company shall be deatrous of seyutrtag lands lacldont to ffoware infititio or rigite of way for telegraphon, telephenen, power trankminalon tlaes, rallaws, tramways, rosidi, or itte for millis, worke, face torfini, Warchousen, or for wharves, plers or dionlie, of other nhipping faeftition In cunnectlon with the Compony's operittonis for the purpose aforeunti and withlin a dintases of fitty milen therefrom up to and not exceutrig to the whote ten thousand acres, on tandir betotegtig to and in the ponsestion of the Crewn, the Gevernosfla Cowaell shall, upon the repaent in writter of the Company, con vey sueli lands to the Company at the price of thirty cents per acre"
Thut in only whis any pernon call get today, atid at the same price. Then If they want any other landli, they have to pay compensation.

The section readp:
" 10 - if the Company whall be at any time or timen dnalroun of acguirIng lande faoident to flowage righte or ribhtis of wiy for tetregsptis, tetephothes, power tranamintion lines,rallways, tramwny, or roade or siten for will wurks, factories, warehouses, or for wharyes, ptirin, dockis, or other satpping faclutiea sot belongtas to or not in poinesalon of the Crown and In connmetion with the Company'h operattont for the purporien iffornaide and within filty millon therefrom, and ehall be unable to aaree with the owgero ee ecoupiern of much lande an to the purehtee matey or eampenstiton to be pald theretors, the Company with the conisent of the Governonls: Contiell way entet and take much lands and the purchase money or oth er emmpenentlitr to be pata ty tho Company to the owners or occuptera of wuch lands shall be settled by ar-
bltration in manner prorided by See tion 55 of the Crown Lande Act. And tupon payment to the owners of Deouplem aforesatd of the amount award ed in such arbitration the andd lands shall become and be the pbolute indefeaulble property of the Company:

This is a final section and applion to large and emall claimn alike. 1 do not admit that the construction of dams around the Humber will cuuse may dertruction of property.

MR. MORINE-What do sou know? about the place anyway, You havo But roporte.

RT. HON. THE PRIME MINISTEA -Parden me 1 went into this matter 7 or 4 years ago when you remember We had this very same queation before the legislature in relation to the Deer Iake Company. I went fato the matter fully with Mr. Howley. Mr. Batley also Mr. Balfour and othersi, who lonew that country well. Then an to Grand Lake, I thtrk it will be found that no proposal ever contem. plated raising Deer Lake to a lavel sutich greater than its ordinary flood level. Then the helghts of the lakes suint be consldered,- the summer Belght, the spring lieirht and the abformal helght.
I admit the poasititity ander the Bill. that certain lands may be mubraarged, but it is the intereart of the Comprany to submerire ta fittle as posaible, because they lave to pay for avery ticre they une not granted them in this Bill. They Lave to pay for it. If we are gotng to allow any minor intereste to stanid in the way of a iarge interest like this, then there Is no bope that say Andustry will ever be sturted In the country, because we will be unable to make any contract with tham. Tuke the cape of the Pera Company.
MR. MORINE-Suppose thelr water powers are spolled by lacking up
*ater, do thry get compenmatia for the tomis of valun in limber lanat

An f waid in the begiontuge. I am stafmuly dralrous of veling these thing till mbathonet t mat the mambers af the Covertiment and the othor mampIors in tale this matter finto consils. * whlas Thrser matters to which 1 bave Mterni, I thimk, Etelet be coeWhand before WE go into any more Etalls at the Act. Section to providea Be follemese-
10-If the Cumpury shall be at asy the er thene deritroan of eequating finty inrtimt to flearem riphts, of $x$ clits of way for telecraphes, tele phines. pover tratrmienton lines, ralt Tays, tramemy, or roede or nites for Ey iir sorks, tarturtes, warebocaes, or Eir whirves pters, docke, or other Enipptar tacilitios not belingetng to or not in posioselon of the Croven snd in Einatictlum with the Compang's apernt fir for the purposes sforesald and "ilains firty milen it erefrom, and vball bo unable to agree sith the ownern ar ioccupliere of sueh lands ess to the firchum montr or compenimitfon to
be patd therator, the Company with the consent of the Governor in Council may enter and take such lands and the purchase money or other compenbation to be paid by the Company to the owners or oceuplers of auch lands shall be settled by artiftration int minaer provided by Section 550 of the Crown Lands Act, And upon paymont to the owners or occuplers aforceatd of the amount awarded in such aroitration, the satd tands shall become and be the absolute indefeaslblo property of the Company.
Where any private rights are submerged, destroyed, damaged or injuriously affected, in one case the submerging may only be temporary. One section is intenced for that, and the next is a different case altogether than the others. If the Prlme Mfntster would look at these Acts and the remarks under them, ho would see what I am trying to convey to him .

MR. MORINE-Mr. Chairman: There is nothing at all to connect the list phrase with what is the main intention of the Aet. I think in connectlon with this, as I sald on the opeaing day, I thinik the Compantea involved ought to be subject to and under the control of the Leglatature. Now, under this clause this Company can eliminate any competitors that arlise its the area of ito influence. We need not even wait for this Company to commence operations. Immediate iy the resolutions become law, every one who has rights down there, anyone who owns land or mills down there, wiil find his property become absolutely worthless. From similar cases in other parth of the world we can draw our own conclustons as to how this woll affect the contingeacy of any similar industry arlsing there in future. They whll have to sell out to the Company and take whatever the Company will gractously give them. They are subject to the rights
of thin Compmy. It is only a matter \& time when they will fall in the Company's haudk. Everyono knows 1 ame not stretehing a point when 1 say this, it is culy what evontailly tunat happom, if this section, $x \mathrm{~g}$ it now stands, becomes lew. You have only to look through the statutes of Oitawa and you will find flagrant exnmples of thif very thing where the Logistiture findreatly Invalldatea the private righta of people. Now this to rot a question of what the Premier thinks or what I think or what people on thils side of the Honse think, or what yeople on the other, it is whol ly and solely a question of what the peopto thembetres think who lave finterests there. Are they taking the bencolont vlow of the Premier, 1 wonder? We seo pettion after petstion coming in asking that they might come forward and be heard, (Some are even supportera of the Governneent,) preyias that their property be saved from conffacation. The Albert Heed Co, and many others have all given notlce, but these are nothing to the number of people whose rights have not yet boen brousht to the notice of this Legislature. We are not told of the money Inveated with imber rights and water nowers or ther matters which cannot convenontly be brought up by thetr ownera it this prosent juncture. Adjourn thie fonse for a month, and give notico that those people wIIt be heard and you will see the force of my remarka. Now the Premier talks about the water powers there. He sald that he thought it wovid all be required by this Company. Well then, why cannot provialons be muade that if they do not dovelop theae wator powera It shall be sold to the people, not at the price they name but at a Tigure fired by the Tribual we have before referred to, A Commiasion of some sort, or the Suprome Court or anything you like, so long as the
price out in a reationable price it think thils is a wise kuegestion and one which would commend itselt to and Leginlature I atir not an ex pert ou the mulbject of nater pewert and I do not think the Promier is eiliher, but I do not see why he te 10 resty tu accegt the atntement of a- protioier. it neemis to me that flith Water can be wtilised smeral timon ot different polnta of the river. The preFention of the Compeny Aiscinif a motimpoly in not only windom, to it. peems to moth but ordinary precaution; We ousht not to degrive earselyes of vereryining, and what they to not actially wae ought to retert to Fs again. My argument that $=$ srrivielets should be ruade agaisest lappe of rob tract or whist is to happen when contracts have lapend (tor we munat admit the fertiliaing induetry misht die oat) wha answored by the Fremier, who maid they would well hanck to the country. Thes of conrse we would have to bay at the Company's figures, which prokably would not the amall, and we wonld lave to sell to parloum small industries becauso the Cumpany could not see how to develup ons. We have nothing here to prevelat the Company from keoping thetr landa an lone ns ther Hze The Colony truld be theltiy foread to bus th back ateer a long tima it is no anawer to nay that thiny have is rhght to soll it; thay are eethlue it tor eothing. Tou wre told they are eolas to eire autmething for it in the way of dereiop ment, but if they to mot develop - 1 think we ought to have the right is talie binck, that is done orgrywherd. The Premiar mas jou wre wruss whes yom say you are gettine tothitry ter argues that our people ure elis ployed and the eoantry ban derbiogod. frat if this floen not happien can we get our tand back? it in enly ordinary precaution an I have naid. Stuppoainer in the corree of years the Company ahould fall utterly, are wo
colige to leave the water powers for ever in the hands and control of thene peoplet I think the lack of provis fon for a contticency thit ufght well arise is atier madness, A proviaton such ns this Fould not ulter the it. ranclal prospents of the Compaily. tarata the Promier retern to the Hyrmaxarth Company, but the pre Eiles is ouly too proze to met his own bad examiples ap an jracedente for hits future conduct. \#le wan Minfter of Juatice, 1 remembar, at the thine, and he haw taken a zrout A cat of Fhat 1 wrould counider blame as greatby to his credit. Anyway what art If facts that dasingulinh thene two eapes Mratiy, the Harmeworth'e cume bere with their own expltal aed *e knew It; we knew, too, that they wete cming to make paper for their own use, sot to be sold. They had alroudy acroired moen of their properfy there, and thie is very different to the specalative proposal placed before es now. This preaent company de pends upon a remponsire sule of the ganntecture The Hormeworths were dupplying thelr own zeeda That it frimme bot fortunutely bas not faul bo any stalnment on our tarl i trunt that tee will be mble to dlecuss mark reanintion lis tern whea the-matter coties hefort we ieter on.
MR. DOWNEY-Mr. Chatrman, we are fold momenthare that "Janguafe Ls gives to men to enable them to dismuse thelr thorglits." and as 1 lis tauded to the hoth. mumabers' crilliciom on thit othar stile of the Heune I foand that I exuld come to no other conCluthag than that they eaiogent to the fill tan-adrantagea of thin prifilege It is tacopenfunte to me how thes can fall to appreclate the benefite of the acremment bour tefore the Hocken. and 1 am frelined to enapect that many. of the atrotitats thit have Bean brotukht before this Fouse thln aveuing are merely papfunctory, My
view of the agreement is that its one distinguiathing feature in ita reazonableness, This impreanes leseff to me is its satient charactertstie. It is a matter of far reanhing consequences to the wuter powers involved and wille this aspeot lends itself to critfcinm, it appears to me to be mont reasonably bet forth. Bome two yeara back the Government made an sozreement in connection with our raltways, and as part payment for the expeudlture connected therewith, they agreed to grant to the Reld Newloundland Company certain ianda and wator powers, and 1 think we woutd have been acting dishoneatly it we hat intented subsequenly to debar them from their utilization of this grent to utilize them for ourselves in another manner. Thitas may bay will not attoct individual rights concerned. Apart from these conceestons they niso ask for about tive square miltes of marble or limestone, and ten thousand acres of land which the company will seloet for themsalven and certain minor privilegea, This le not too mueh to expect for the very conslinerable and large benettis the Colony will reap from the capital, which must be expended in order that the Company may bie inaugurnted. Wa bave been told that private righta may be adversely effected by the expropilation cliuse in the agrecment. Now as a matter of fact I am aware that a ereat deal of the privato interestis affected by this Company are being dealt with by Coutruct, and I have had lettere trom zeverat partiois who have had dealings with the Company in this way, and thay expressed themselves hifhly satiefled with tho termes siven. I think there is only ono outstanding claim, and that will be arranged for within a day or two. We are also told that it is undesin: able to have the Relds appear ain Dis.
ectors of the Products Compaig. This strikes tue to be very unreasonable and quite adverso to our own intercats. The fuidil can go into the money nisikete of the world and obtain the capital uecessary for this, as uo othir persou in Newiotindland can, and the very fiecs of luviag men of thelr finmefal atanding is an odvantage as an hdvertisumeat of Nowtoundand is ibe money markets, it is a common fisce matter to hear the Reids being villited for things they have falled to do. 1 am not lere us a detender for the Reide. 1 num under no fompliment to them, and 1 may esy pithout fear of contradiction, 1 am fot evich on spiattag tormin with them, hat I have for nome years hat an piportantily of viluessling the tatours hoy huve undertaken in carrying out that colitract, We never hear thom ompliain of any losis, although ve chiow thoy have smifered severcly on fainy occastona. They lume loat traim and atcamera by fire, uceidenta, floods und mus? other wiys, but that conuteolly of entoryirise that liae so distinFallind thin ever atmce they luve feen here, has never been ahated for a dingle day. I have heen fimiliar with thair bulinaw for many years, and I twiver had occision to express mypelif (fharwise. I remamber diatiactly whous I was dolng turtuess on the West Const 1 was ainoyed by certrat acttons comimitted is the Refld Eros, but upon mallection I realized that thair actlons ware not only just1 fond-but, tund thay bocu otherwise they wonld mave suerificod the rights if others to at most monfair extelt, and ioday 1 am ready to admilt that they aiwase have acted in the most fimjarthil mamer for all concerned.
We wern told durng the dfes curston of thle mitter that the Goverinieit shoutit provide data to check the esteulatious and other
statements that were furnished by the Products Corporation, but we know that the surveys and data that have already been acquired and which are still inoomplete have cost $\$ 100,000$, and it follows that to make the required surveys and check those data would entail a largo espenditure by tho Government, and tiothins could have been dorfved from such surveys that would have been commensurate with the colossal expenditure that would have been undertaken by the Colony. We were also told that it was unwise to give this Company the control of the Muskrat Falls on the Latbrador. The Muakret Falls, 1 am prepared to admit, are a xery valuable water power. More particularly would it be ralunble it it were situate in a Provinee of the Dominion, but stuate es it is om the Labrador where the electrical energy has to be carrled more than three humired miles, this enorgy can only be uitised in the manufacture of some material such as that which is to be manufuctured by this Corporation, and $I$ think this fertiliser is the onily product to the manutacture of which the energy of these Falls could be turned. I am prepared to contend that it will be absolutely fanpracticabte to undertake any large logging or pulp operations on Labrador for a variety of reasons. Climatic conditions and the difiliculties of Hife together with a hundred and one other difficulties would make it imDossible, Labrador timber will poasfly be utilised in yeare to come, but it ean onty be dons by permitting Its export. I think anyone practically famfiliar with the dificultles of logeing and pulp operations will admit that it is useless to hope for the utilization of this timber withth the Labrador territory itself. This Corporation is gotng to ecnvey this power to the

Straits of Belle tele, but it is questionable to mo whether the manufacture of the Labrador timber conld be prolitably undertaken even if that were done, and it can only be utilised where you have a large deposit of time stone ha we tiare at Bay of Is lands, and where it ia possible to convey to that ucetion the coal and phosphato rock that will secure a repetition of an industry similar to that which it is proposed to start at Humbermouth. Then, of course, something practicable may result. I cannot but foel that every poscible advantage will accrue to this country from the finception of this Corporation. 1 am Eure that every member of thls House wIII remember the opposition oflered a few years ago to the Harmsworth cliarter, and the number of objections then which were eald to be ilicely to result, but I do not think that there is in the country today anyoae who will saly that the fincepthon of that fadustry has not benefitted materially thie whole country, and I ara quito convlneed that half a doaen years from now it will bo as diftcult to find anyone opposed to the products Company in Bay of Islands, or unyone to condemn the act of the Legislature that gives them this charter. My particular district stands to gala fmmeanurably by the devolopment of this concern, and 1 am equalty sutisfled thiat the country at lurge will henefit to a most apprectable extent. 1 can see nothing in the agreenient before the House injurions to the counky and I seo no reason why the privileges and rights that are contamed here should not be granted to them.

Mr. Speaker resumed the Chalr.
The Chairinan from the Committee reportod that they had considered the matter to them referred, had made
some progross, and antiod tenve to att aenin.

On motion this roport was recitved ant adopted, and it was ordered that the Commiltee have leave to sit agoin.

BTAMP DUTIES 1inl.
Fursmant to order and on motion of Hon, Atmister of Munnes and Cus toms the Houne ruantved ltaitf Itito Committeo of the Whole on the Itill emtitiod "An Act to amend 5 Gea. V .. shemb I. Cap 10, watitiod: Aat det Tumpecting Btamp Dutien."。

Mr. Spealer left the Chair.
Mr. Pursons took the Chatr of Commaties

3 Hr Bpenkar resumed the Chatr.
The Chairman from the Committoo roperted thitit they hat conafdered the matter to thom ruferred anit had puanad the Bill witiont mmendment.

On motion thin report wan ruceived find udoptod, and it was ordured that the Bill be read a third thme on tomorrow.

## PERMANIENT MALINE DISABTER FIND BILt.

Purmuant to order and on motion of At. Hon. the Prime Mininter, the House resolved tiself lato Comatitee of the Whole to comalder the Bial entilled: "An Act rempecting the ontalilishmont of a Formanent Martne Disasters Fuad,"

Mr. Spenker left the Chalr.
Mr. Parsons took the Chair of Commiltee.

RT. HON. PRIME MINIBTERIf will bo remembered, Mr. Chairman, that when thls hill was before the House the other day for the secont reating it wan mugrestad that posefbly to sive the Committen pownr to deal with periain inveatr mente would require somen lifte connideraflon. It oceurs to me that this whole matter will be mafe fn the hamta of the Cemailtiee fiom mamaking the funde, and those that will take thetr
place-Inter on. All these perionn are Forking without any pay, it it really a labour ot love for them, and I think that the shole muster will be mate In their hanis ds a matter of bact prutly the whole of the fund of hast iprini, $\$ 300,000$, that wis recelved frous the subscriptlons of the Whole world has been itienatly erpended op to the prerrat thme and thay have been able to provife more than urual for each cgle. The only section now in that one in which it is prurided that any casee where money If now erasted by thie Comimftlee, if the beneficiaries mariy or became otherwize tadgendint of any chaim on the find the Cumnittee vill have yower to tranifer such nara of money to the Permatent Prisanter Fund. 1 think it will be safe to leave it to the Committee to may when and how that amount sliould have been dispanned. It is not compalnory; it han not to go to any fund; if is only that if a certain sfate of factas comon about they will lage the discretion to spply it to the Permanent Givastor Yund. The Committee, of course, will decide whather it is hetter to keep that amount in case anty further alIccatton should arise out of the anme disanter. We are leaving that in thelr tands. An I asy it is not compulsorf. It will be found by fooking ot the section that we are icaving it to the dincretion of that Commitree. 1 think If is a very good thins to estatiliab in Permanent fund, suck an thla, I hare no doubt that it is ane that will be a marce for penple of twearn to mhtm bequents, and that it will increase to a rery larke tum in a bhort while If tind there are planty of precedents it Beghand in operation similar to this For inatance, goire back to the Crim. eun War, theme were Tiery larse fuade catahitiolod, and there are large sumg ifill belag expeaded. I think the Faluelava Fand wae oace Thun there wan the fund in relatien to the "Rury.
dice" which turned over on the Eng Hish coast. There were many of such fusds, in which there were btg amp ounts expended, and there has been legteletire antioriky to pass them over to ellier funits of a simitlar nature. It is not miy fatention to put the bill flirough now, and I would ank the comrnitteo to connider the matter and we wit decitip it to-morrow or it the next ittling. It wan origimilly intended to find a place in the bill for thts committee to thave franking privileges se thint their corrosponitence may go free. That is a reasonable concession, and 1 propose to move in amead cuent in reintion to it at a later atage

MR. KENT-Mr. Chutrman: When the matter to which the Premler roferred wat before us the other day, I had not had the bill very iong, and 1 thengtit thit fands eubscrthed for in general object shrald be devoted to that object alone. As the bill now etands we are leaving that matter fin the burna of the Committee, It is not compulsory to the Committee that they aboutt transter the funds in their hands, but we are leaving to theit discretion overytilng in retation to the detribution of these funsts, and teaving it to them to say what shall be done with any surplan. The pribofpte eribsottor to पlits sectton ti s ontweiple that is embodied in the equitable docirine ol cyprese it is a doctrine spptied by the Coirts in the difposat of charltabte trunts, where tho particular object for which the trunt wan created either failm or becomen exhabisted, of the aby other reakon parses ont of existences. In any caes, ruch an that, the Court will give uirections for the application of the trust fund in the bands of charitable trusteen or apply the equitable toetrine of cy-pres. The doctrine whfch vormite them to apply the fund to nearest availnble charitahle purposes to that trust for which the original
bequest was intended. In the present case the original object was the main tinance by these trustees with the fande in their posacmion of those who tuifered in the Marino Dlsaster of 1914, and when it becomes unnecentary to use thess fands or any of them any furthas, they are given power to transfer thom to the Permanent Fund. I atate this to make clear the meaning that I had for the remarks which 1 made on the socond reading of the dili.

MR. COAKER-Mr. Chairman: I Winh to ses thet as far as tho Comfittee is concerned 1 am very pleased that a mearure of this kind has been introduced. I have no objection to the Bill. I have nothing but good to say of it, and for my part I am very klad that a fund is at lant to De establinhed, of which the result may be that in the future when we meet with a
finster auch as we have bad in the past, those who suffer will find some practical consolation from the fund Which will be in the handi of the Committee The F.P.U. during the list twelve menthr lias established what wer call a Disaster Fund, which is only applicable to Union members it is a fund to which the membera contribute, sad from it membera who are injured, tose limbe, or become alek so that they are faid up for flve of sif monethis, wit ret from the fund a. cortala amount of moner. It also bolpe the memters to buy artifichal timbn. We grant a certain monthly or hult-gearly allowance according to The number of the family. There was 6 case lant year whicre ten men were toit on thi Jxptolts, and their famittice were helped out of the Fund in conbection with the digaster, We generally get contributlons about Chrlattoas. As for as we are concerned we have tothing but good to say of thla bill and we have no objection to it whatever. 1 am very pleased to know
that it is the fotentlon of ite Govers ment to appelnt the prenebt Marine Ifesuters Committee that haw bees ritting on thr "firmthern Crume" ind New formiliand" Fund in the past guat. I perfectiy aprev witk that aurzoation 1 im anen that the entincrourt of the forkemmont fir this ithoctlinh mill Tr nait in very great henetil
MR. JENNINGS-Mr. Chalrman: mitight I suesest that there ought to
 whnrely the Commitien is to receive Informantion from flie Macistrate or other officern in the virtours piarem. Frotatity ir was the tntentina to place that matier in the hanie of the Elommilliee, but ir not, I woulid rarepat test Hr ifintitritis, four tin ir ontern Cestame Ottivers and oflars be fir structed that in case of acoddent they ste to wad Informating, fintilied infirtitition, tif th Committion.

HT. MON. PRIME MINIBTER-Xr. Chalrmaz: 1 sen aig wiflection to tht propotal made br Mr. Jennlags and p mernent to the Committer flat it wauld lo a very great Impruvement to pai it in the fith that in case of acridetit accurtisic. that it whall be that itity of the efirifitrith to outth thif Commititee of the details of the eecident and of the number of families that are ateected by it.

RON. COLDNAAL BECCHETARYXtr Caatrman: I would tike to my that I thlak the maricertion of Mr. tanthen tir oni this, imfiousti it las beve acted spoin in the part poar in the Emeline Dimasien, still shesid find a place in 18 bill providing tor the
 Oni of the aifirutties that the Comemittre was faces with vas the cetulng of detalled information, and it would +n comntethty kifir til timt thti tir formanlint before devothy the fanc. The Jieth. Johe diexandur ftobinson, gecretary of thie Marine Dinaster Foue, ald mobie wort fr thtr eormee.

Fion. Krarguine poedule to be dene tedid 1 imay say it was no wmall umdertaliak for the gentlomen of last
 The thamks of the viobe country for their work as thie Prltiia Mintater fuadt, It was to them a la lese of leve, fuat 1 thimk the selectline of these three men,-Hen Jotin Harris at Chalrisif, Hen J. A. Hestavoti, SeEntary init Hoin. Folte. Wazwin ma Freanuror-whe tie very theit that coufd be miade for werk of thin kind. The bent featers of the fund is comfimation wits ohuer funds was that there wan no pererlapptare The fund that wite bujoct wit that miar carried sot, atil valle it might have bees bes tilictal to tiare kept the fund open 1 figer thas it $\begin{aligned} & \text { oas acrertholess tan ro } \\ & \text { ro }\end{aligned}$ I-lis wese very atlefoctorg; and at no fitie worn theme palt withoct ine cum fattern bolme quate surn of the necrasb ty. 1 freet alr, that the nepoption of This daenare will reliwe the rase as fur an valuatary mulectiptions may be ficcestary. I bauk last yoar masy oit the Imailns people trtimated that If a pormunent fesd vern ertalitiahied theg woult give large aubecriptions, and 1 liare mo dovite thint this moutd fe the cane if this werre adopted. You all remember the "Regulaz" "Liltle dap" and the other marfan diauters of the past, wat the suffective way teliot was given is all easec, Nouting coula have leen more effective than So manner in which Bla commitiee fid Dirir warli, and I think thle Howe appreciates the work dane ase bebalf of this abject.

MR. CLIFT-I would tike to ney, fir Chairmas, that 1 eciotne eviry thing thint has been sald by thep Colothel Afocritary is reflerence to the *ork of thinee who binit to do with the dimarbutlies of ther timis of the Martie Dlasatars Fimd, snd I voulat Hho smy that three more auftable men
oould not be found tin the clty for this work. I know the great work done by the Secretary, Hon. J. A. Robinson, and $t$ think that the thanks of the whole commuxity will go out to him and the twa gentlemen associated with bim in his labor of love. I am pleasof to finow that some iteps are Detug taken by the introduction of this bill, to establish a Permanont Marime Disasters Fund, but 1 can't help relterating fome portionis of my remarisis on-the bill which was betore the Howse nome tew years ago protiding for payment of $\$ 100$ to each of the fishormen who hive lost thetr tivea. At that time I had a feeling that thin amount oushit to be ralsed by some special means from the industry it was connected with. I had a feeling air, that it was not fair to take $\$ 100$ from the current revenue to pay the fiahermen who lose their Hves, and not proside a similar sum for those iost in pursuing otiher oceupations of life. I felt that the finduatry ftaelt should bie charged with the payment of this amount by the fmposition of a small tax os such things for instance as the altipping, for which the whote sotony would be contriouting. Thits tax would provide a fund from which smoh amounts as these woald be payable. Howèver, that measure patsed into law, and is act upon the statate bookg, and I see no reason now to reconsider the -matier. Now, however, that we liave been asled to provido Ior a permanent Dieaster Fund, 1 bave been ted to feel agnin that zame tdea, and that there shoald be some tax on the fishing Intustry wheh would contribute to this fund rather than that we should make payments directly from our current revenue. Perhapis a sufficient sum may be raleod by berevolent donations and by subecriptloms of various linds to let
this queation of taxation stand over for the prosent.
I have not quite made up my mind as to the righi of thile House to trank: for the surplus of the grarine Disaster Fund to the beneft of this fund,- the fermanent one. The amount wss not enbicribed only In this country, About talf of it came from oututito for the purpose of relieving the distress oceasloned by the disaster of that year. The sympathy of the whole world was aroused, and prictically demonetrated If the genllemoh allo allocated the fund and who were the moving factors in its collection would let the Fremier bave it as their oplaion that any ourplis over and above that reguired for the Marine Disaster Fund should go to the permanent fund, and It is likely that they would do this then we might be authorized to include It in the permanent bill. I am not quite sure, sit, 8 to tits being correct without that oplnion being given The fund was given for a partieclar elass of people, and one would think that they should recelve the whole amount. if this fund is so well oft, Why not bave it made to protide for tha time until the youngest beaettisry is 17 or 18 . The money waa subseribed for thint purpose in the ev. thit of the death of any ose of theme t might be alright to do this, but therwiee I caanot feel that ft le right. fowever, with these few opinions I im prepared to support the bill.
MR. HIGGINE-Juat a word or two about the question ralsed by my tread Mr . Cirf. I think as in matter of fret when the original fund was opened the futention was to have a permanent fand. If I miatake not, it was at a pubfic meeting that this was decided. I think it will alno be found that a resolution to that effect was made at that meating and I think also that when the fund was started if
was contributed to with that intention: namely that the surplus be transferred to a permanent fund The rematks of the leader of the Opposituon th my optaion practically answer the aspect taken by Mr. Clift as to the right to approprinte this money. That is that it was subsoribed for a certain purpoae, and this being accomplished the amount left was to be transferred to a fund for doing similar work. I think that in this wray the remarks of the leader of the Oplar vorlis. I think that in this way. the runerks of the leader of the oppositicn explain to the member for Twillingate the position as it is, and I think he will agree with me that therc can be no diversity of opinfon in this matter.
MR. CLIFT-Just one word in reply, Mr. Chairman: 1 was one of a very few at a subsequent meeting of the committee who objected to the primelple of establishing a Permanent Fund out of subscriptions already raised. I questioned the practice of doing this as the subscriptions had been sitren to a cortain fund; and I do so still. However, I have no de sire to delay the House turther upon thla point.

MR. COAKER-Mr. Chairman. I have thought over the matter and have agreed with what Mr. Cift has safd. In my humble opinion howerer, the best scheme would be to have a syatem of compulsory insurance adopted. This matter has been coneidered by the Unfon very favourably, and I am hoping that the day will come when every man engaged in this hazardous work will for $\$ 8$ or 10 insure his life for $\$ 1000$. It this can be brought about the need for a fund Hike thts would be very amall indeed.

HON. COLONIAL SECRETARY.1 think, Sir, that the answers to Mr. CIIft's questions are those given by

Mr. Higgins, The money was collected, allocated and the remainder left on hand was to be transferred to a permanent fund which had been advocated by many of the donors. I think that the dependants baving received each his or her portion, the only thing than can be done is. to turn the rest over to this fund.

MR. KENT-Mr. Chairman. I think it is very necessary, at the Colonial Secretary has sald that no idea should go abroad that any one has been at work to divert this fund from the purpases for which it was given. The point is this, that when the com. mittee found themselves allocattig this money and hat finished it, they found they had a balance on liand. They had money and no place to dtspose of it. This fund supplies a disposal for this, and If placed here, it Will serve a similar object to that which it was collected for, and given for by the doniors. I think that it would be very wrong to have it said that any surgestion of diverting this money from its right channel was at any time contemplated by the legialature.

MR. CLIFT-1 was referring only to the surplus money. We know almost the whole fund has been alloeated to the dependents of that rellef. The only question in my mind was the allocation of the sarplus. Ought we allocate that surplus elsewhere when we see widows and children for whom it was collected living with a small pittance. My fiden was that as thfo money was subscribed to this fund it ought to be devoted in its entirety to this fund, and I was questioning the fidea of turning it, even as a aurplus to the permanent fund.
RT. HON. THE PRIME MINISTER -It will bo remembered that on the 2nd reading of this bill 1 had placed in the hands of members a copy of the Marine Disasters Fund. It will

Se fountil there that there wee a balanee of $\$ 60.000$ on hand after the roet whs slliocated. The report sald This batance vili probabtr se used to kees the aursifors ta cane of titness or thionirativi to thetr meak viandtitio, or worls to that effoct, that they canmot say that this $\$ 80,000$ will be conwimed. If it is not what can they do Hith ItT Thir tilt enritter themin to tranefer it to the Permanient. Fund and In that way the moner would be dotng aimilar work to that for whtele it whis

Parlhamentary Practice we find may precedents. The aecond reailing is the stase at which these objections are fianilly heard to private Bill, or pub He Bins: wheh misy minterially effeet private rights.

Now whe all romomber the preced. ont which arfected this country when our Delerates were at the Bar of the Houpe of Lurds in 1891, and there are other cases which are referred to in "May" where counsel were heard. I think Mr. Spealer that these pettioners have interests which may be affocted by thle tilit as they submat here, and I would ask that a day be fixed apon which they may present their casp as to how this contract sffects thelr righta and intarests. I think, Sir, it vould be well if they were heard while the Resolutions wero in Committee. Tha time to hear them ts bofore solng Into Committee some day on the motion to go Into Committee. The reasoin I say I think thite is the best time is becume the House will have idonted the Contract and the Fesiolucionir by the time it comes to the second readits and I think it is only fair that the petitionere should be hoard bofore it is mdopted and ratified by the Legislature. I beg to move:-
*That the prayer of the petitionern bo accelled to and that a day be fixed "upon which the anid companies will be benin by their Coumset berore the Ban of the House respecting the subject matfer of the petitions."

MR. LLOYD-I beg to Second thi motlon. (The motlon was carried.)

## QHESTIONS.

MR. HICKMAN gave notice of quebton.

MR. WINBOR Enve notice of question.

MR. HALFYARD aslied the Hon. Coloniar Secretary to lay on the table of the House a statement shewing the ubmos of the Mall Courlers for Fogo Dintrict for the Winter of 1915, the
numes of the routes, and the smount paid each Courler per trip.

HON. COLONIAL SECRETARY:I beg to table the information,

MR. HALFARD asked the Hon. Colonial Secretary whether the contractors for the Constal Mafl Service If the Govermment pay tor the use of irivale wharves for landing Irelglif. and passengers. If the contractors do ret pay, unfer what clanse of the respeotive contracts are they exempt therefrom and the Governmont ohliged to pay for same.

HON. COLONIAL SECRETARY That is in course of preparation and we shasl have it this afternoon or to morrow,
MR: ABBOTT asked the RLeht Hon. The Premier, in the absence of Hon. Minister of Agriculture and Mines, to lay upon the table of the House: (1) A statement showing the famount of money allocated to Mr. Thos. G. Ford, of Mitdle Amherst Cove. for puting out a fire that oo curred on Bonavista Neck last summer; (2) A copy of retumas if such are sent in.

RT, HON. PRIME. MINISTER_-I bes to tablo the fiformation.

MR. COAKER asised the Right Hon, the Prime Mininter to lay upon the thble of the Horse all correspondence and any other information in reference to the Mobile Water Power,

RT. HON. PRIME MINISTER.-I have anked to have that prepared.

MR. COAKER asked the Hon. Minister of Finance and Cuntoms to luy upon the table of the House a statement thowing what amount was Jost by the Colony by the failuro of Mesars. T. Smyth \& Ca. to pay their Customs Bonds, and why the Bondsmen were not called upon to pay.

RT. HON, PRIME MINISTER-The answer is being propared.

MR. COAKER.-Asked the Hon. Minister of Fininnce and Customs = to
lay upon the table of the House a statement showing what it cost to operate the Smyth Waretouse Bulting; what insurance is pald; what amounts have been paid for repaira to the said bullding and what the rocelpte for the last twolve monthe amonit to.

RT. HON. PRIME MINISTER-That is also beint prepared.

MR. COAKER.-Asked the Minlster of Marine and Fishories to lay upon the table of the House a statement givlng the mimes of the crew of the dredse "Priestman" the wages Dald each per month, the number of days the dredge was in operation during the year 1913-14, the total cost durlng 1913. if for (a) wages, (b) sood supplies, (c) conl, (d) insuraneo.

MINISTER OF MARINE AND FISH-ERIES.-That han been tabled.

MR. COAKER.-Auked the Hon. Colonlal Secretary to lay upon the table of the House a statement showing Whose teader was sccepted for the Bay of Iatands Mail Service: and what mount to be pald per week for the ssid service.

HON. COLONIAL SECRETARYIn reply to the konourable member I ber to say that the government has accepted the tender of the "Euplirates" Steatubhis Co. Thie S. S. "Port Saunderg" is pertorming the service for $\$ 1 \$ 0.00$ a week, one trip a week.

RT. HON. PRIME MINISTERWith reforence to a requeat made yeaterday for the letter trom Mr. Howley I beg to cable that.

STAMP DUTLES ACT.
Pursmant to order, and on motion of Hon Minister of Finanee and Customs the BIII entrled "An Act to amend 5 , Georke V.. Sess. 1., Cap. 10, entilled "An Act respecting Stamp Duthes" wae read a third time and pasaed, and It was ordered that it be engrossed, being enttled as abore, and that it be zent to the Legislative Council with a message requesting the concurrence of that Body in tis provisions.

## PROHIBITION RESOLUTIONS.

Rt. Hon. the Prime Minister gave notice that he would on Monday neat fiove the House into Committeo of the Whole to consider certain resolutions reapecting the prolibition of the fmportation, manufacture and sale of intoxicating liquors.
HERMANENT DISASTERS EUND BILL.
Pursuant to order and on motion of It. Hon, the Prime Minister, the House resolved itself into Committee of the Whote to conslder the Bill entitled "An Act respecting the establishment of a Permanent Marine Disasteril Fund."

Mr. Speaker left the Chatr.
Mr. Parsons took the Chair of Comwittee.

RT. HON. PRIME MINISTER.-Mr. Chairman, when the Committee last zat on the Bill I intimated that there was an Additional section 1 desired to add in relation to the Fermanent Committee sending their letters free and I propose to add the following:

Hetters and mailable matter addressed to or sent by the Committeb or Seoretary thereof shall be exumpt from postage."

It was also proposed by the hon. nember for Twillingate Mr. Jenninga that on the happening of an acctdent batfication should be sent by the Magtrate near where the accident hapaned to the Committee in order that the Committee should know of the accident at the eurliest opportunity; tosether with the particulars surroundIng it. 1 propose to add a section carrying out that suggestion.

MR. MORINE.-Mr. Chairman: Referring to the language of section 4. I presume this means by public subecription. If so, it strucle me some Himited words might be put in, such as "for charitable purposes". I presume thla refers to money for charltable purposes. I think the language is a litthe too broad, and, might occasion some
umaile in the titurs of manne, thits wonlet thechele metacational Grats. I nay to lirpercritional perthape but I thisuift that thuse worde being sedfed minghir sure comsiaeratie trouble is the filure
RT, HON, PRIME MINIBTER-THE saheroquent subisuetione taterpreted this, inr you will nam when ene reail them. No steratien is necenarr.

The Chairnien from ohe Comumitten revorted lint they had conaldernof the matter to tham rabuired. and hat poesef the ilit with soune muendenuts.
On mothon this mpert was regetred and ndepred, and 11 wat ordered iliat the lili be read a third time an to merrow.

## HON. COLONIAL SECREARY-ME.

 Spaiker, I would like to say lo resperct to the remiarks of the honouralile leader of the Opponition that the eb ject of pucting the eleotion down for Decetober was for two reasons, As the Premier has peinted out in his remurks the Councl clonos Its accounta at the end of Docember, and it is constidered wadeairable that an wlection mhould take place in June, and that the freombry Coumell thould fistl the estimates for the current year alrmady made and be committed to those es timater. The Comminuionees thought that it would be much better if the new Councll going in were to have the opportumity of opening sew aceounts and making the estimates acnurting to its own ideal, that it would not be commilted to asything done by its predeceasora. In the second place, last your whin this Comminaloa wha appointed br this House it was done for one year and on the petition of a very targe number of citlionan in St John's, and to extend the tithe for an other six montha is cranidered by the Oovernment sufticlently long far the reason that they have no authprity from the eitizens, no requent from them, to go any further than one year. and coupling that with the fact that it is undestrable to hold an election In December they considier that they ouyht not disentramechise the prople of St. John's for a longer period than Ghey had asked for. I quite agree wibh the Leader of the Opposttion that thewort of Che Commintoit will bot be cormplotest at that times but 1 thinik that it will be to vell alvancod thint the incuminif Coomel! youta bo stite be colulber the werk wlithut iny wert vas pownimity of its belar la muy way tulurel Whrin the Cotumianfureors twak othine lant yearil whe wempliterot that ther whuld liave hund work to carry out the tark in thin thme, and I thlult the sitfsens of SL. Joan's are enitar a srent deht of Erettiteite to theen gantlemen, whe are all nuccesw (c) buey mett, who trive iterotet s tyrge ampuat of their valuable time tir the gast year in the imternat of We city. They tonk up the work and zisye done it kratuitounly; they heve hind to give a conslderable thme fmore kurlicularly Mr, Goaling the Chairmans, Who has been moat devoted to this Foik and who has siven iavaluabte beervice in improring the condition of urfaita), and I think that they have suecoeded. Now Sir. I am not partloslar what action the Dovermant may lake Ther csil elther let it हr out no luse toth Fith power to conthine its ntuis of Ttunlinal affatro and derote its attentlon to drafting a mearure for in: forporstion, or the somond, zlimernative find this the Coceramient bas electe! Io taks. vtr: To let the commislun thulurue nimisfatration and devots tiv trinter of its time to trnttion the pataum But is that aliernative is a topted namly it shoula be enampleto Whilid it le wery definkle thas the werw kon it itcuit comit to thiter thir जirt efotem, it is not vrirgthifis and wes a inght arrange that the Comminsian shomld tarminate it the send of tha fincal year.

Under so conditions protht the saw cousel to be callied upos to begha weith Jumary firnt.

Now what does this mean? That on December 31 st this commisslon passeb out of existence. It can no longer approach us as a commisaion. Already the position set out by the leader of the opposition that they will not have finished their work, and though not finished will have no power to go on with it, has come about, and so this work is golng over to a new body of men who may know nothing and misy have no sympathy with the plans of the others, and who may not have studied the things and who may not be in a position to take over the work and will not have Legislation drafted for the next year. As far es this Bill provides now, no authority is given for this commission to approach the legislature. No means for approaching this legislature is to be left to those preparing this charter. What is the reason? Is it merely that the Gov. ernment thinks that it is an tmposslble thing to walt 6 monthis more after waiting already 12 montha.

Under this Bill the exdstence of the present commission continues for the 18 months. This is not at their own requeat.

The least that can bo done is to keep this commission in power until It has completed its work, and the completing of the work may need the keeping of them in power till June 30, the middle of the fiscal year.

Now this would violate two things.
(1) It would extend the distranchisement for a further six months.
(2) The sew councl would commence work in the middie of the tiscal year.
Now this second violation could bs got over by making the time of the new council to extend $31 / 2$ or $41 / 3$ years. Everything could be done in this counctt as is usually done, the only atfference being that the first year would ond after 6 months work.

I say first of all that if we elect the Hew Councll under the old set and
under the oid franchise, it will as a councll have no sympathy whatever with the profected Incorporation.

Surely it is reasonable to expect that the new council should come in tinder the new incorporation, and that at all events is my position.

Let section 1 be so altered that the commission remain in power until June 30 next year, and in the meantime finish thelr work. The corporetion being in the finterim made out the new council could come in at the end of the year under the new act. Have them elected under the new franchise.

Now Sir, that is my opinion, and in dosing I would again say that I hava no sympathy with the keeplng of this commission in control under the power of the Governor in Coumell. I havo nevirthelesp to give my approciation to the members of that co cutission for what has been done.

MR. HIGGINS-Mr. Chairman: This matter is one in which the members of the House, more particularly the city ones are sreatly interested. I think I am correot whon I say that there is no difference of opinion about It. While the member for Trintty has sald thfngs oppostug this bII, yet lie admitted that the Commission form of Government was doing better work than the ordinary form of government. But the honourable member himself knows that the present commission ia a temporary commiesion appointed more or less to be representative. When the present conditions came about the Government approached the conmission and asked them it they Whethed to remain in power for another year. They naturally did not wish to outlive the time appofated for them, and had they asked for a further 12 months adverise criticism would certainly have resulted. Finding the commissloners naturally opposed to dofis this, the Government thought it advisable to take power to reappoint

It, and this is why I think the Colonfal Secretary numed 6 monthe as a suitable length of time for the commission to finlsh their work, it must be remembared, wna I think averyone appreciates the fact, that the past year has bean a very minfortunate year for the commisston to do tie work. When one year was set wo must remember we were not calculating for the bapperninge of last year. That 1 think in is large degree explaine their delay in getting down to their work. However this extension of time ought to enable them to finleh thelr work, and like Dr, Lloyd, I hope that the charter or measure will be ready to be passed by this lesislature at its next aitting, and that as a result of this the now councll will be ahle to begin wark with this new charter. It is of kreat importance that thif be done, as to have a new councl assume the control without it would mean a toss of at least halt ith vatue. 1 think it if ouly fair and fight for un to say how much we appreciate the work of the Board in the administration work it hal done so faiflifully, and to axpress the confldence wo have in them as a result, for the larger work which they are about to do.

MR. MORRIS - Ot course Mr, Chais man it is understood that most mearurge that come before this House are of importance, and some are of greater importance than others. Some mattera are of universal interest to the Colony, whilst others are purely local and of special intereat oniy to the Henuurable Members entrusted with them, This measure is a purety mumicipal one, and whilst of importance and interest to ue all as eftizons, it is the princlpal concern of the Fonourable Members respresenthis St. John's.

Last year nome three of four thousand citizens petitioned this Legislature to suspend the operation of the Munelpal Act and to place Clvie management under the control of a Board of

Commissioners, I beg to say, hore now, that the persoanel of the Haard eould not be more representative and more quatitet in every way to discharge the dutien entated upon it. I speak now Sir with an thilmate experience of over twenty years of Clvic Government, und with the spechal opportunitien I have hat of knowing, I am of opinfon this Board has perform ed its onerous, and in somo casas uncongenial work, during the time it has bean in office in a most methodfeat, business-Itie and acceptable manner, and without fear or favour.

The fact that the Board is not in a position to submit a charter at chis present Session, is not to be wondered at, and arises from no faule of the Board. The individuat members of the Board, who are all busy business-men, have devoted constdemble portiona of their valuable time to this matter of preparing a charter for the City, and especially the Chairman Mr. Gosling, who has been in communication with the varioun municipalities and Civic Boarda both in Canada and the United States and has obtained copies of their charters, Byelawa and regulations which hive been submitted to the Comminseton, who are diltgentiy, from atl the data at its command, compiling a new clvie chartor, which it is beHeved will be both equtable and accoptable to the ratepayers of St, John's, it was found to be impoasiblo to have such a Charter ready for presentatlon at this Session of the Legifilature, and hence the neceaeity of this House to declde whether the Board will be contimued in office for another year, to enable it to perform the woric sratuitonisly takea up by the membars, and so fulthfully and well carried oat by them up to the present time
Whether the Commiasion should stay or not, is a matter for this House to decide, but I wish to obserres, and I am In a poaftion to say that nelther the Chairman nor any member of the

Commission has made any representation to the Government, or to this House, with a view to be conttined in office. The Commissioners are not asking this House to grant them an additional term, but if this House stould decte to extend the term the Commissloners are propared to accept office for another year, thus enabling them to intecesstully carry out such clvie reform as they had confidentily oxpected to perform when they took upon themselves the duties of civic Govermment.

For ny part Mr. Chairman, I Efve my hearty support to the Bill now be: tore the Chair, and would have had mach pleasure in suporifing even a tonger extenafon of time than that aoted.

MR. KENNEDY (St. John's) - Mr. Speaker, last year a large petition from the eftizens of this town whe prenented to this Legislature, and acting on this a commission was appointed by the Government. This Commission has done excellent work, but there Is mare yet to be done betore its work Is finfahed and so this extension of time. This extension of time is the Government's proposal, and I was talling to some Commissioners the other day, and learned from them that personally they wanted to get out of It but they had to do their duty.
Their worlc haa been an excellent success. Sowerage has been installed in many plicees all over the clty, a means for dealing with night soll has been arranged. Now in place of the old unhealthy odours of some of our back streets, one is impressed with a nice wholesome atmosphere.

Even that is something to comment on. They have atso, as has been stated, improved the water syatem. They had an expert come down here, and the saylug that was accomplished in the system more than warranted the expense of getting that expert down. Now, I don't propose to delay the House, as the ground has all been cov-
ered by other speakers, but I thought it only fair to add my meed of praise to the men who have been conducting the city's affairs. It is my hope that when this Bill fs brought before us in Committee, we will try and got them to remain for another year to continus the work which they have been dotug.

MR. COAKER.-Mr. Spenker: The last epeaker has eaid that the present Commisaloneri are a bugy lot of men, and that some of them would like to get out: Well, that is exactly what I sald last yoar when sou brought in the Bill appointing the Commiasion. I contenced that these men were too busy to attend to the affairs of the dity; that if you were going to agpoint one appoint it to prepare a charter which might be submitted to the House; but that you should not expect men to prepare a charter during twelve montlis and run the city affaire. The hon. member for St. John's Woat has borne out the statements that I then made. Now, I am opposed to Commissioners being appointed by the Government to run the city. 1 objected to this last year on the same grounds; and I think that the time has come for the Gorernment to tall the Commiationera to get out when thelr year is un in June. With regard to the work of the Comminatoners, I myeelf have soon a good Ceal of improvements in the town. I believe they got good value for the money expended, and I hope, as Dr. Lloyd has polnted out, thet their work will be an tncentive to the next men to follow in the footstops laid down by the present Commissioners. of course, this is not a matter which concerna us very much as Outport men; It in a matter whisch concorns the city representatives; and all we have got to do ls to express our oplnions with regard to the bill betore the house. I do belleve what I have Just sald, that 1 did not agree with you last year, becauso I did not believe in the Com.
mission. I knew these men were too busy, and would not be able to run the affairs of the city and also prepare a charter; because if you are going to get it chartar which will be sutuble, it will mean that a good deal of time will hive to be devoted to the preparation of it; it is not going to bo done in 24 hours. There is another thing which is rery serious. It thẹ pregent Commisafoners are to get out in De cember, then the election that will appoint their successors will, of course, have to take plece under the otd form of government. Now, that in a serious objection, I should think, if you are going to have a new charter, then have one by all means, but it in the meantime a Council is elected under the old form it will mean that you will have a pretty good tangle. Certainly, the present system might go on untll next June. You might give them anothar twelve months. They won't be able to fintah their work by the enil of the year, becausa there wIII be no Houne of Aasembly in seaston to pars any charter which they may prepare. If you have got to pass the charter here, and then have a new Council, it ta onily right and proper that the new Councll should be elected under thie new charter, and therafore you will have to let the prosent Commisaionera continue in office until next June. At the same time, I think that the snomer you terminate the work of the Commisston appointed by tha Government to manage the muntelpal atfairn of St. John's, the better it will be for all conoerned.

MR. MORINE.-Mr. Spanker: It appetred to me that the appointment of a Commisalon to run the city and at the same time to prepare a charter Was not Iltely to wort out well. Pro paring a charter is, in the main, a theoretical question-as to whit portion of it should be representatire, as to whether it would be ropresontative of Wards, of nome from wards and some
from the eity, and questions of that kind,-thay da mot require any pracHical experience in Councils to settio. It mas nothing to do with practical work. it is a question whinh statesmen have to decide with the all of the experteace of other cities and our own experience abroad to settle. It it largely a legal question as to whether you nhondd collect taxes from the landlord or from the property Itaelf or from the temants. Thome are not questions to decite which it is necessary to have any experimice in connection with the aftmintatration of the Council, because they are theorotical quentlons to some extent, and to a lugge extent we wauld bo bound, in deciding them, by the experience of other parts of the wortd. So it appenret to the from the Etart that the attergit to appeint at commission whleh would carry on the work of the eity and at the aume trime prepare an chartor would tafl, and it has falled. I took occasion the other day to speak to the Promier of my own personnl teellig about the matter, haviag regatd to the unsettled condtion of attairs ia relation to the city governmemi. I buid that my persotal opinion was that this Council should be authorized to exist for another yeur, so that we dhould live unother messlon of the flouze in which to consider proper legislation. Then, after that legialation Wh atopted, a new election could be freld and a new Council, upot a new basis; come in. Pertomally, that appears to me to be the wine course. Now, what. have we hure betore un at the present time? We have a proposition that an election masy be held beforn the and of Dacember ;until that eiection is fielt mit the mew ruan come tis, this Comnell shall hold on. That grovides that the Coumeil eliall como ta elected under the old charter. If-you bave a new charter, and it providea for a dif. ferent lind of Council, all that eleo thon trouble and expense is gone to for pothing. Now, tor illurtration meroly:

In may cities abroad they have tried to combine the ward syatem and the city system, by means of the election of atdermen from the wards and comptrollers from the city; the comptrollers being a sort of Executive Councit, which decide upon the work to be done, and the aldermen a consulting body in connection with the recommendation made by the comptrollers. In other words, they have tried to work out a sort of system of executive government with a consulting counclf from the various warde. Woll, that has worked out very well in some cities. So far as we here are concerned, It has been contended that the best council wo ever had was the first council, when we had ward men. Then, atter a while, as the personnel seemed to decline, we changed that syatem for the other system of men elected by the whole eity. Then we had another drop, because it is quite evident that men of means, men of affairs, are not going to submit themselves to the election of a whole city for tho small class of work which they are ealled upon to do In that respect. You are bound to have a decline in persomel. Finally, we got to the position where this body now in control had to be called into office. We have a class of men in the present council-men of affairs-who will not put themselves up for election for the present time, if you go baek to the old system. It Is quite apparent, therefore, that the old asatem will not do, and that we must have something in plece of it. Well, why fin the name of all that is good should wo revert to the old syatem and then have to change it six or twelve months afterwards. That seems to me to be stmply nonsense. What I would urge very strongly for consideration would be this. Change your bill, saying that an eleetion shall take place before the first week in December; give this body power for another year, giving power to
the Govertior in Council to terminate it by proclamation betore the end of the year it lagiskitlonis is enacted in the meantime; then appolnt a commis elon of two or three legut men to consult whe the present Councll or with anybody else for the purpose of the drafting of a proper measure to bring into the House next session; prepare your bill; pass it; thon lold your elec. tion on the new basis; then publish your proclamation terminating the present Councfl. Now, the present Counci1, excellent mon as they are, cannot form a new charter. They are not lawyers; and this is an exceedingly difficult professfonal work; but there is no doubt whatever that the experience of the present Councll will be exceedingly valuable In assisting the Fight kind of Commission. While not making any invidious distinetion, I could potnt to my friend Dr: Lloyd as a very sultable man for a Commission of that sort, After our experience of his excellent work in comnection with the Hospital Commission, I feel that we could lizve no better representative. If the Government would appoint a Commisslon of three two from the other side and DF, Lloyd, and take eare that the other men were of his calbie, those men, consulting with the Councl! could bring down a bill to this House that would he worth our while passing and would, $I$ am sure, operate to the great advantage of the clty. I think that it would be a disaster to allow the sptendid work of the present Counell to be lost by reviving the old condition of affairs, because if the matter is left atanding for any considerable while it wout be dealt with at all; and now that you have got everybody thinking about the matter, why not adopt the sugsestion that I have made? Persotially, I have had some experience while I have benn out of the colony, and my own feelling is very strongly in favor of the gcheme which I have deacribed. I think it would work very
wwil. Wiert Thure are a mamber of cimpose whiet the want alderman, Who repre-zte as suall sortine of ibs the, ta if lieptill tir facos ont thinete and et knowier what whoath be dowes and white he woly times of fif wait aint in tituty ta tikiea azrt

MR. HICKMAN asked the Hon. Colonfal secrotary to lay upon the th. We of the Hourse a list or returne of all monies and goods glven out of tomporary rotier in Bay do Verde Dis trict during 1914-15.

MON. COLONIAL SECRETARY$I$ beg to tabie the informntion.

MR. HICKMAN asked the Minister of Marine and Fisherles to lay upon the tahte of the House the cost - of tranaferring coal and machinery from Bay de Vorde to the Fog Alarm at Raccallet durtig the jenr 1918.14; ulso, to state what became of the coal left on Bay de Verde whart is the Fall of 1013 .

MINISTER MARINE AND FISHER-IES-Thist informition is belog prepared.

MR. HICKMAN asked the Minluter of Marine and Fieherles if any peraon is paid a sulary for looking after the Government whart at Bay de Verde; if so, to give the name of the person holding the appointment and the nalary per annum paid to him. Alwor a statement of cost of Sydney cont tinded at Bay de Verde in 1012. $1913-1914$ for Baccalleu, and who supplied the ceal.

MR. HICKMAN aeked the Minister of Martne anit Meherles to lay upon the table of the House returns ot all monies sent from his Department to Bay de Verie. Dintrict durling 1514-15,

MA. HICKMAN asked the Minister of Norine and Fiakeries if there fs any money allocated for a Ferry at Low Potnt, Bay de Verde District; it so, what is the amount and who received it.

MINISTER MAR. AND FISHER-1ES-Mr. Speaker, I misht say the answer to questlon number 3 is be$\operatorname{tng}$ prepared; number 41 have very much plenature in tabllige As to number fo 1 thay $\begin{gathered}\text { Hy } \\ \text { my Department has }\end{gathered}$ no connection with ferries, and the
question will have to be addressed to the Department of Publte Works.

MR. WINSOR asked the Hon Colomint Secretary to lay upon the tablo of the House coples of returns from all Belleving Ofllcers in Bonaviata District from October 1914, to date, with copies of all bills in connection therewith; also, vouchers for same.
PERMANENT DISASTERS FUND BILL.
HON COLONIAL SECRETARYThat information is being prepared, and I shall have it to-morrow.

Pursuant to order and on motion of Rt. Han. the Prime Minister the pill ontited; "An Act Respecting the Establishment of a Pormanent Marine Dlsastera Fund" was read a third time and paseed, and it was ordered that it bo engrossed, betng entitled nil above, and that it be sent to the Legistative Councll with a message requesting the concurrence of that Body in ita proviaions.

## MUNICIPAL BILL.

Pursuant to order and on motion of Rt. Hon. Prime Minfster the House resolved itself into Committee of the, Whole to consider the Bill ontitled. As Act to amend the Act 5 George Y.. Bession 1, Cap. 10, entitled: 'An Aot reapecting Mumietpal Affairs and for other purposes in connection with the St. Johin's Muncipal Councll'

Mr. Speaker left the Chais.
Mr. Parsons took the Chalr of Cominlittee.

RT. HON. PRIME MINISTERI should like to make a few observathois relstive to this sublect, which was discussed here yesterday. I think some little confuilion exists se to the effect of this messure in rotation to our present Commission. I know womething about the muntclpal atfairs of thle town, and, since the appolntmeat of this Commission I have Hept in tonch with them, and may

There to a grout teal of mlempter atimitine in exnnection with the equestin at it trecuittrittion of ine CounIt, is mallien to the ratepayert. On + trally, whes the Coumefl was ere8 kef the frunchles of the woters vpo \& scted that Counell was contione entrobr to matepayern who pald some * int likn 88.25 , That was the equali lianton mecenary for a reatient of fies clty. But thlnge have changed riset then. asd it fatat to remember *1 that thome whe palt water or wewof rutes hat no greater eloims than flase whe from, other sources pald the rat of the revianie Last year the f trame wan $\$ 890.000$ with $\$ 50,060$ or frhase collieted from water and * wrecharn Now un a matter of fact fliw matn payers so mot pay suiftelont to derray the cost of maintaining the tyitnm which they enfog. If you are thereated you can easlly ascertatu

Trom tho Councll the cont of the whe ter rupply up to date It is I bellens. nomewhere fa the aetghbourhood of Tred, 000. That menns some eighty of ufnily thominid dollars s year for snimlonatice alouie find the Coumell tialy tiets uizty or eevanty, In othar whords they ire getting this nervice at the coat of people whon do not ret It Indiractly, of courac, other people pay. It in not the rato payer who gots a bill बwary linlf yenr that metntafne thin tuwn. He gete hin guid pro qub. Why nhotild he get hin watar eerrice or his meeturnge trae any more then lie ohould get hir milk or krend or beet? And thit is only a memall if. em in the Councli's Incoms of $\$ 849$. 000 . So whiti I winh to potent out in this thit ilie Comell fif not ificely to reduce the preacit frunchise. In oth. er worde every man who zow yotes in the Mitnicipality is contributias to the tazntion, Whether his be a bacher lor or a murtied minti, whether be flyen is is hotal of mainitains a homil of hil own. Fivery man in St John's In as rate payer diredty or Indirt fly . From conl alone they get 760,000 ; they get something Ifka $\$ 12.000$ from the Government in ralation to the fire der partment. They get $\$ 8.000$ for lishtIng the city, from elght to fen thous and for ronis sind brlates, and three thousani for elearing this streets of enow, ate., in winter time, and four Thouinnil for Crown rentif. Bepldeis the thxas on tire and Ite Insurnmee com. panfes and the taxes from this Reta Newfoundind Compuny for strest car servioc, mad taxes on amnnomgnts and varfous other ftems amounting to ahout 8240.000 In ail So that I think as regaras the quertion of the fraschame it in Hot Mkely the Commteston will atter thist.

As rognoris the ward syntem. We hnd thet an I have alrenfy polnted out from 1888 in to the year 1852 and today you find most penple and the
frement board dwlied as to the st Yamtakem of thut system. Some thinis that if you lrad a ward system, the mmallur the ward tho more likely you 'Would be to eget men to stand for that ward, while other men admit they wrould prefor to stand for the whole city, So that this system of wards henis Itmetr to a egreat deal of argh* ment on efther side. I am howerer, not prepared to vote Bgalnat the ward -yytem if it comes before the House an a practical system. It misht or tulsht not be adrantngeous. It would depend largely upon the ciass of man volting ind the elass of man Hkely to bif elected

The point, however, attempted to be made here is this Honan last Tuegfary by the opporsints of thls Ant wan thet lyy the pespaze of this present mensure the walae 11 kel y to flow from the work of the Cornmission might be curiniled or affected. I do not admit that most of the matter the Board reporta on can aeriously be nffiscted by utatute, If you will regd the report tabled bere you will flad that nine-tiontlis of it deale with mattors that can not he affected by legisthetan at ail. A great deal has been shifl about a charter, but I thinle the oaly thing wef want is to get half a đoren krood men who will honestly farty out the puhlie services you have. Nitu-twiths of thls report deals with matters in no way contiected With the Lateintature. Every reform they have mude stnce the asoumption of fheir tenurn of offlice has been minde Whthout any refarence to the Legislature What they have done in the past ther ean very easily do in the future. There is much room for Im provement on matters that are purely ifuentions of administration. Is there snythinit mare tharoughly discunting than the way asites and garbage are collected in thin town? Ia there angthing worse you can tmagine? From
the hours of sine ar ten at aleht tuntll twelve in the marning the receptacler for abhes and sarliaen are overfilled "Hth गtery concetmhle wirt of tem modity, parbage, pepers, suinence, liah cultinge from tallors' shops, cutuing from thamiths' shops. Thes aliout ef
 eomee ap and begin aurinunly cienaifa up the streets. There is no send of lesiatation to remedy thls shocidur utate of affatris, a covernd reapiptucle so recelve this garbase wosid romave mnetr that war dhenather from the stght of people who have to pass afonen these roads it hat for muaty ruarm my ettice on thatry simet whpasite theistar of the fint 14 nit ant I terter went tlirough that street in the morn Ince on mis wray to that office it tea oicleck in the day lut I san bies cletriter th the firt that had eneme slated in the strweth there the mirht Letore. 1 mention this ant to yout =ay blamen na zaist Clouactis or the present Doarll of Commlealoners. Councll has complete control of those but it appears that there might be nome doubt as to their aethat ownership. Their term of office is to be brought into accordance with the Fisonl year, Iftection to to at large or by wards, as decided; but as to the cucstion which was ralsed here for diseusion, aamely, the change from elective Counclls, although it is with. fn thelr power to recommend that, still. I know enough of the matter to say that thero will bo no recommendation by this Board to go back to government by commission. Then it is proposed to sive more general powere to the Council to pass byelaws ta relation to proceedinge of the Council, elty ctenning. omeial bulldings and so forth; then they deal with the water supply. As a matter of faot there is a great denl of ail thin dealt with in the present bill. Then there are provisions for street Hghting, and regaraing the queation of taxes. Then there are two or three pages caaling With omilils; the duties of the Secretary and Trenaurer; the duties of the City Engineer in reiation to water and newerage; duttles of the Anditor and Medical Health Omcer; of the Sandtary Supervisors, of Impoundera and other officers; Regulations in regard to the dog tax and so forth.
Now my point in that a yoar ago the presont Board was created and they were given a year to enguire into the present city goverament and varioua rervicer in contiection tharewth. Thay have been in power nearly a yoar, having been appolnted in June, and it is now oroposod that a forther teran of str monthis nhould be given them so that they may continue to make faquiry finto these various queations and how thoy can be improved and roforned. The only urgument in tavour of thetr appointment at the tince wss the fact that potitions for that pur-

Dose had boea blghod by ditizens to the number of three thouzand, petttions natitug for a Muncelpat retorm. They were funtliled as citizens in making a movement to bring about reform th their clty and in nek'ing for the appointment of those who would make some exquiries. A year has passed and if the present Legcialation is not enseted at tho end of June, पe will have to botd an election without having done anything. It is proposed now to give thom ancther oix monthe, until December, to hold an election then, and in the election to uise the old form of Government. When the Board is goligs out in Deeember they ean make a report and make certain recommendations towards Levigiation; but the Board elected in December will be elected under the old charter, whatever is fin their report. whatever recommends ftselt to the members of this House will be put into law at the noxt sesslon, and there cun be no daubt but thint the Board elected in December will carry out the now Invr. 1 belleve that the Board clected in Decembor will be favournbite to the reform in Wualelpal kovernment recommended by the prenent Commissioners. As I reato bofore I lcnow a little about this Muriolpality. I do' not mean that I am the onty one. There are members on both sldes that know fust as much ae I do: but 1 do not think that 1 cas be contrudicted when 1 nay that the old Comenifa laze done very good rork consldering that they have been Himited to these meana. 1 think we will be ante in assuming that if they wre eferted in Dicember any reasonable recommendation that will be left bebind by the proviont Cominferioners will be carried out by them. They will have to carry it out because the report will come befors thts House and any properal wbich they make in
regard to taxation or Municipal Government which appeals to this House will be put frito Law. Some may say that the present Board may auggest a commlasion. They may give their recommesidation to this form of Government, and then we will liave a Board elected in December that will go out when the House meets, but I do not think that this Honse is going back to the old form of appointIng a Board. Every member of thls House has supported a blll which is now before the Upper Chamber to give overy man in Newfoundland the right to appoint his own Board, and I do not think that we are going back to the days of " 98 when electlve coumcils were done away with by the Government of that day, when we had governmeat by commission under Mesers. Burciell and Bradshaw, It turned out a dismal fallure. There is no check on the Commissioners, as you have in the case of an elective board, because you hiave not tha eheck of the ballot box, I wrold be the last in the world to be a parity to any measure that would lessen the value that witt come from the prascut form of government. Of course this prosent Board has done very good work. I know the work they have done beeause I have been in touch with them ever since they were appointed, and as one of the ropresentatives of the clty I have to be in continual touch with the Council in regard to matters arising almost daily. Under the prosent bill they will be given six monthis more to complete their report and when that report is tallied next year so much of it as recommends itself to this House will be put into law, and I am quite sure that elective councils will be the only form of kovernment that will recelve the supnort of this House, and I am equally surv that the incoming Board elected in

Docember, will continue to carry out the ratorms left behind.

MR. LLOYD-Mts. Chnirmnn, I beg to move an amendment to Sectlon 1 In relation to dates. I do not think that there is any necessity for me to cover any more bround than 1 did reeterday, as I said then I think it deFirable to keep the present Commifdion in power until we meet ngain and consider the recommeudatlons and deal whith thelr report; and consider the churter that they will recommend. That charter will be brought finto befog at the next seastion of this House and it should be the charter under whifch the first Council should be el. feted. There ts nothing to my mind in tise laboured argument of the Prime Minister that will affect the principle vilela I bave lald down. There is nothing to justify bolding an election unfil the new Act has been brought into force. Thare is no reason why we should sot keep the prerent Coumbs. alon In power, until we put the charter propeced in their report to the test. There has been no argument brought forward by the membera on efther side which will clange that princlple. Last year I spoke againat tise form of Covernmont. Thil afternoon the remarks of the Premter have been that fatnt pralse that damns. It daman the report before it is 3rought fn ; It damns the charter bofore we bee it. We are practically told that no one can bring in any eharter more acceptable to this 'House than the Act that is already on the Statute Book. If that is eo then it was a most extraordinary proceeding to appoint a commission twelve months dgo. I have no destre to labour the matter. I have already expressed my opinion, and 1 to not deelre to profong the dobate by fiofing over the ground again. It is clear enough, how. ever, that the gentlemen in charge of this Commission do think that a new
charter is desirable; whether they are right or not Is a matter which we should be able to know later on. This Commisaion was brought in belng to recommend any reforms that they might thlnk necessary, and I think it would be a great mistake to elect a Board under the old law before we have considered the work which has been done. They were appointed to consider a new incorporation charter. Their other work was mevely incidental and that means reform. The Premier let the cat out of the bag that their work has boen absolutely futile.

RT, HON, PRIME MINISTERI made no swel statement.

MR. LLOYD-Now let me finish. I repoat Sir, that the whole of the time of this Committee this afternoon was occupied listening to the Promfer making clear to overyone that be considered that the work of the Commission was futlle is0 far us drafting a new charter is concerned. I chal. lenge anyone to dony that that was the impression left on the mind. The position is that the Commission was glyon certain work to do. That meant work with the aratting of a new charter, and we are asked this afternioon before that charter is brought intobelag that a Councll should be elected under the old regime and should be allowed to come into power. There is no reason for $1 t$. Tho only alleged reason is thet the fiscal year will begin on January firnt. Now even if that advantage is granted it would only affect future boards. The dififeulty would only spply during the first six months of the year 1916; because after that the Council would be able to make their nestimates an on Decembar 31 st so that in Euture other Counclis can begin the fiscal year in January. It is proposed to attain that ond by putting into power men that have not the slighitest sympathy with the work that has been done by the Com-
mission, and the Premter himgelf has elearly enough shown no sympathy With the laea of at new eharter. The new Council wonld be of exactly the same frame of mind as those who were turned out by the present Board. Havfig given the Cormmission work to do we ahould allow them to do tt, and no new state of affairs should be brought Into being before the new Council is elected. No election shoutd be held under the old regilations until we meet again and the new bill is put in, find in order to give effect to that I move that in section 1 subsection 1. third line, the words 'December, 1915; be stricken out and there be oubstituted the words. 'June, 1916, and on the fifth Ifue the word 'January' be atricken out and the word 'July' subetituted. The effect of this would be to allow the House to deal with the proposed bill next year and provide for fin election to he beld under the uew regime.

MR. CLIFT-Mr, Chairman, I do not wish to make any lengthy remarks unon the questions now before the Chair. I do not thinls that this is a matter thit should be regnrited in a party Ight and I do not intend to der! with it in that way. Last year we were ehgaged considering petitions from a litge number of citisens of St. John's asking that the control of the Municipality of the elty be handed over to a Baard of Commisslonera for a pertod of twelve months Certaln recommendations were made by a Coramitee of citizens on civic reform, find this Ploard was appointed for the purpose of giving them time to conflder these subbestions, That Board hiss given good attention to the work out has not, as far far I have been able to asmertain, heen ables to finish the work which thoy undertook. I think the citizens of St. John's owo fo debt of gratitude to Mr. Goslling and his colleastes for the manner in which
they have pariormad their dutios. Thay have not had ttme to finish their work for the reasons stated in the report, and the present bll is to give them Eufficient time to finish their work. If we were looking for a slogan of batthe on this question I wouli sugsent. 'Let Goating finiah hle work, and I think in view of what hes been done by the present Bonrd if thewe gentlemon conld be induced to continue in office for another twelve monthy it would be a great advantage to the city. I listened with a great deal of interest to the speech of the Prime Mimister, and I know thers is no one In the city who knows mors, and is more capable of forming an opinfon upon Municipal affatre than hs, and no 1 Hstoned with a great deal of attenfton to whit hie had to say in roterence to the question, and I concurrof in the main with everything that he suld; but I disagree with him eio far as one point le conoerned and that is the extending of the term of oftices up to Degember next. I would surarest an extension of another sifs monthe to give them untll June, 1916. I underitand that soma of the memhers of the Bonrd are desirous of getting relief frum thene duties. Anyone who looks at the work done by them mulut know that they have gone to work about the performance of thene duties In a most businesslike way. There in not a man on thet Bond who In not a busy man, and they have been prepared to dive conslderahle time In the interest of the eity and It will he very bad if wo do not give them sufficient time to finigh the work which they undertook. I agree with the propomal made by the learned member for Trinity,

1 can't see, Sir, any good reason why their term in office should not be extended for twelve months instosd of six months. I do not mean to sey that the members of the board are

Feolding that office, but if we could induce them to remintn I thituk it would be a great advantage to the city.

RT. HON. PRIME MINISTER Mr. Chatrman, I womlif make it quita clear thint ino farmber of the Bourd flas anked for ati extaublon of time. They have not aslced this; on the contrary Home liave Intiranfed that they do rot want to ztop langer, The legtalatare munt he ifepared to ondeawour to keep them here. This bill wes lurouzht in fot this very reason. We hold it lif not deairable to let them go. We are afking tham to cantiane for bix thonths in ofllee suid then go out and stuily, and with their 18 monthir expartenco formulate the chniter required. We mast bee this chiag through now we have started. A great deal of the vork will require to logislation, und can bo accomplishend in the ar monthe. The flring of the aix thontha doee not mean that the proaent ia an undeoizable atate.

What I suid at the beginning of thit nession wis thfes That no cliar ter conld be it very great fmpreyement on the prement Act. I dla not ing: geat that the progent syatam is incopBble of imnvoverunent Rut the prear ent Aot fis founded on in experfence of thirty joark

DR. LLOYD-The Rt. Hon. member is fully jersmated in his mind that luny changes will be but of alleht importance.

RT. HON. PRIME MINISTERGrent reforms and grent food may bo Hecompllatied which will not nead legisfation. The present ient bes worked for twonty years withont then neceasity of a change, Mont of the reformal needed ari In ndminlstration.

DR. LLOYD-The reforms are mainIg administrative, shd with regard to the new chariar 1 undoghtecty arrea with what the Fremier sald. It is quite olear the Board does not agres.

What has been the reason they have dene aothing but that they bare been up against it. The reason for their not having completed the charter thay say is 'no tlime to consider IL.' That shows the natural differences between themselves. Otherwise they would want to be put in charge agatn to finlsh thelr work.

MR, CLAPP-Juet one or two words Mr. Chairman, on this aubject. The main point is whether the adoption of thia is going to prejudice the city totetr or not. These men have done nobie work in sacrificing their time. They have also done it eratultounly. Now this House is asked for more time for them to consider the measure to be put besore this House. Is the Honse or thls city goling to be any worse off in the hands of these people for a few monthe more who for 13 months past have done thetr work so thoroughly? They must bave the interente of the city at heart. I quite agree with my hon. friond, Dr. Lloyd, that there is nothing they hope to galn by it. Why not allow them to finish their work. The bill will be brought in, and anything objectionable can then be removed. The elty will know best the mea to place in office. I think Dr, Lloyd's remarke th the main are good. This bill does not affect outharbours. 1 therefore think that the outharbour members will be convinced they will bo toing thelr duty to let the present Commission rest. I agree with Dr. Lloyd and ailpport his amendment.

MA. DWYER -Mr. Chatrman, I would suggest allowing these men to stay in power, and paying tham. They are doing the waric for nothtigg bue the pleasure of doling it now, and will get crodit only on what th the result of their labours. 1 do not tee why it should be necessary to have these men work for nothing like this. We have $\pi$ Board of Works responarble for pub-

He works of this arrt, and I think that department ousht to compensate them for their work. Everyone will admit the value of the work dove, and no one can pasn through the city withont appreclating it. Tha city bowever, is th a very poor state, and I would lay the stigma upon the Board of Public Worke.
MINISTER OF PUBLIC WORKS1 did not fatond folning in this deBate Mr. Chatrman, Dut I thfuk I nuest defend this attack on the Board of Works, made in the remarks of my honourable friend. I might inform my Son. trlend that this departumbt is at present much overwarked.

MR. DWYER-Overworked!
MINISTER OF PUBLIC WORKSYes, there is more than enough worik for the offcialk there. I think my hon. friend will ugree with mee thint it It hardly falr to blame that Board for the proaent state. However, the Chairminn of that Board is propared to tako all that mey be coming to him on eccount of that department, and to enswer natmo. In reference to the bill, there seems to be some difterence of opinfon as to whiciker the time should be extended or not.

I have no daobt but that the incoming Board will be as sood as this prerent Hosud. Thie pruent las certathly done freat work, and they deserve compenation, bat the one polnt I would like to refer to ts as regards thie extenifion of the boundarles of the ciry. Thore have beon Intely a great many large residences bullt fust outslde and withtn a few rods of the clty. and just for enengh away to cscape taxation. They enjoy all the wfont. aken of the oity on account of thelr proximity and yet are exempt from any tasation. I think it great deal of revenne might be derived from res fdents on such property it the boundaries would be extended all around the elty, but especially in the norit.
eriy direction. I think that the matter ought to be taken into comaidarstion.

Another mitter 1 think ought to bo conalidered in the present nytem of dealing with rubblish. Everywhere wo see evidences of lack of eneryy on the pert of the empioprete of thit it jurtiment, and I think a thorough reeonatruction of thls branch would mesan a saving of thousands of dotfirn to thim etty. The Coumet otifit to purnue the mem in charge of that department and see that the work ts correctly done. There ts no eartily good retann why there shonta be mo mach duat in this place, hut tee lave It, and an a result we rwallow it and ruin our clothes with it, and have tilthy houses, Whit we want now is roapoasible men to take charge of this work. We want sood, strong, dotormiaed men who will see thin thitis through. It is my hoge that the men will be lound to make a great ianprovement in the management of thin town.

The smendtant jropesel by nr . Lloyd was put and lost.

RT. HON. PRIME MINISTERMr, Chalrman, there te in small an endemat witch 1 propose to put in there (seention 11.) In stead of Outrite at this coloan:' 1 propose to put in *Not teftim it realdent of the dity.
I had a letter today from the Chairmana of the Commivsion Mtr. Gosiinge in relation to atiother small amendment that I flimk will be agrecable to the House. The section that the Chalrman refera to wats paseed tin 1910, and in as follown-In any contract hereaf. tir matr for fitting for tintiftatton in bouse or part thereof within the mumInfpal Thmilts of SL. Johin's, of the yetrIy reat value not exceeding fifty dalfurm, there thatl be impled in cuntition that the bouse or portion thereot is at the commencement of the bolding in all respects reagomatiy tit

Ior limman fankiteiloth, and that the bouse or part thereot shall durligg the holding be kept by the owner or lowooe in all rempeots seacamality fit tor tumant halitation:' Well, therv you will notice the rent is flxed at $\$ 50$. If the oue care which they took unfor it the reat was 8 sio. 1 now profote min mmentment by miriking out the wurds 'tliny dollirs' and mubatis. alilige thorefor the words 'one buadred doliam:

DR. LLOYD-i would mursest that thitend of doling it in that form we should repal the whole section and adopt if apoin, leaving these words vol.

RT HON PRIME MINIBTERWell. then, the rection will reall in thla way: 'In why contract hereaftor made for letting for habitation a house or part thereof within the munPelpat Itmits of St. Jolin's, there shall be tmplied' ete., whthout saging how tuich the rent la-making no limita. tlon.

AHR, MORINE-In the cane of is man firing a houre tor $\$ s 00$, why not im. gly the coudition that it be हanitary and fit for humaan habltation?
MR. COAKER-THITR Bre tots of hocese at $\$ 109$ waich have not git it. It lionlan to mes like setung after the fanaller houses.

Str- Speaknt reenmed the Chatr.
The Chairuan from the Counitte zeported that they hud coumbdered this matter to them reternet, and liad parand the pill with nome amond. menta.

On motion thls report was recelved and ndopted, and it was ordered that the mily be reud a third time on tozocrrow.

## PWCKING CO, RESOLETIONS.

Purnuant to order and on mintion of It. Hob. the Prime Bilinlater, the House resolved Itrielr into Committee. of the Whate to conidder cortain Rezoluttoms confirming an Agreement be-
tween the Government of the Colony and the Newfoundland American Packfag Co .

Mr. Speaker left the Chair.
Mr. Pareons took the Chair of Committee.

DR. LLOVD-Has this Company undertaken any work so far?

RT, HON. PRIME MINISTERThe only thing 1 know is that they lave for a conaiderable while been negotiating with Mr. Clouston of this city, Ho has been dolug something in the insiness of dealing with boneless fish, and as far an he hag gone I think he has been successful. He is acting for them, and I think they have an option on his property in the easat enc.

DR. LLOVD-You have no information?

RT, HON. PRIME MINISTERNo.

MR. MORINE-Do you know anything about their capital?

RT, HON, PRIME MINISTERNo.

DR. LLOVD-As a matter of tact I beard that some contract had been cotered into.

RT, HON. PRIME MINISTERI dou't think any contract has been finallzed. I think they have been in correspondence with Mr. Clouston. Beyond that, I don't know that sinything has beon dose. I dou't know what their capital is, or whether they have made any contract. but I am making enguiriee. I have no information that I could absolutely state to the House. If I had, of course, I can appreciate that it would be of value in connection with putting thls meas. ure through.

When I was In New York in January 1 met some of these people, hut I have nothing deffinte. In the meantime, as I say, I am making enquiries and when we pass the second reading I will have their incorporation pa-
pers. Persotially I know nothing whiatever about any contrnet.

DR. LLOYD-What is the actual course in reference to these contracts?

RT, HON. PRIME MINISTERWe pasa the contract section by section.

DA. LLOYD-Are we dealing with the contract now or the resolutiona?

RT. HON PRIME MINISTERWith the resolatlans.

DR. LLOYD- 1 would suggent that we berin with the contract.

RT. HON. PRIME MINISTERYes.

DR. LLOYD-Mr. Chairman: I wish to make a fow remarits on the Bill. I may say that, in the main, I am ono of many on this side of the House who realize the Importance of Cold Storage and who trust that thels profect wilt be auccessfut. The remarke that I shall addrese to the Committee on the matter will not be to the end that thite contrict bo rejectad. They will be mevely referring to the meanIng of the contract and on the point whether or not it should be amended. The main point in the contract is that the Government will undertake to give a guarantee to assist the earnIngt of the Company, thould the ordinary earnings frill, so as to unsble the Company to pay a divldend of 5 per cent. Now, this is not a new feature of such contracts. So fur as I remember, there has never been a contract brought into this House that this clanse has not ellefted constacrable debate. I w/sh to polnt out, In the course of my remarks, that the reaulis of provioun debates have not been taken advantuge of in tormulatIng the resolutions in this particular case. It is propiosed in the first place that the term of the guarantee shall extend zifteen years, ind there is an implication throughout the whole contract that the agreement shall only
lant for fifteen years. I say, there is an Implication, becanie, although it it not expreasiy atated, that in the ingeraffon. I woutd suggest that a resolution be passed making it clear that the agreement is to terminate at the end of fifteen years, Now, in references to this suirantes, 1 wish to dray atteation to the wording of that, nuil to make the matter clear 1 would go back into the history of Euch agremments and polnt out that In one of the enriler agreemonte the guarantee is that the earnings shall be brought up in such a way, ehall be ruded to It such is way that the Company shall be enabled to declare five per cent on the casli invested in a. particular form of the fncustry, in connection with the cold storage of freah thah. Ats objection was raisod to that if the company met losses and were unable to declare any div/. dend, that this would entall on the gaverament firit of all making good ell the loeges, and then a suffictont adoltion to that to enable them to declare a divifend of five per cent. The first amendment which wos made on one of the earffer contracts was to cut out the loss liablity. That was done by sfating that the gaarantee should not exceed a certain sum. You buve the stame principle here. There Is an assumption liere that the guarantee fs not to exceed 5 per cent. of that 8 sob0.006, in all the guarantee thall not exceed $\$ 25,000$. Well, now, that in an nioption of the principle which was agroed upon in one of the easlier moanures and the abject of it war to cut out the loss and to guarantee mo more than five per cent, on the cash finvested in that particaliar form of the industry. In the Trefethan \& Lord contract there was another pravinton made. By the way, I don't know whether the Pramler has the eontract?

RT. HON. PRIME MINIBTER1 will get it for you.

DR. LLOYD-II I remember righty, the principle adopted was this: That the guarantee should not exceed five yer cent. of whatever the capital night be that was inveated, and that the total amount of such guaranteg to all partien should be limited to a capltal which should not exceed $\$ 500$ 000. Now, let me glve an example that 1 wish to take. Here we are contemplating an investment of 8500,000 . Suppose, however, that you take the cane of one factory or two factorlen, gnid assume, for the first year, that the capital invested in the cold storege plant ie $\$ 250,000$. We abould atill we liable under this agreement to the extent of $\$ 25,000$, although that is ten per cent. ou the cash actually expended. That is, wo should be liable in that case, if they met a losin of 5 per cent. to make good that loss and also to continue paying a dividend until they wore able to do so, because the only limitation proposed is this limitation of $\$ 25,000$. Now, If the eash Inreatment in the cold storage plant for the first year happened to be $\$ 125.000$, and not $\$ 500.000$, and they met a very severe loss, we should be still bound to pay them $\$ 25,000$ if that were necessary.
There is also another point that I want to drav the attention of the committee to. If this contract is of any value to these people then ten years zasaratee is ample, and 1 think that it would be reasomabla to limit the time to ten years which, for a guarantee in a pretty long timie. I would Hite to draw vour attention to section 4; I would suggest a verbal change there, in relation to the eriploymeat of tabour. It appears to me that, onterfige into this contract, we have nothing Dut fatth to rely on. Then again in sectlon 3; the very fact that there is no reference to Crown Lande in that
act mureconts that it is not mannt to be tnoluded, and in setation 9 there 18 the हौस objection We वरe brime Ing thte compatis milety gety so minet of tos raw imaterial duts frein to come frato comactition wilh other tac: torles which cuitiot sell their proifyots at euch a low price, the the fieserm on will sufter: i draw the attention of the government fo that fient, thirt thes Hitay inve it sinuce considerittou. I um ghail to sice that the Goveriment has sean the nevesatiy of putting in wuch a clamsa ns in moction 18, Now, Sir, the minin objoutfone to the resolution te the questanh of guaratien. We are asited to lesialate an aimost everythifter To my mind the whote thing In rather firconieroouif, and it tie the most important question of the con. tract. However, with many amand mential thlak that thit 1mit mey te made a reanomable one. $I$ wish to re peut that a perion of tön yeurs in long enough for the gunrantee.

MA. MOAINE,-MF. Chairman, I wieh to muke a Rew observationa at this atage of the cormittee. I am not one of thome oin thie side of the House who sulport thile mensure All down through the jears we hinve been constdering contracta such as this, and hotlifie thas ever come out of them, A thort time ago, 1 liad it laid down to me by a geutleman of experlance in these matiers, who snide that it was a Bafe piractiptetto fo by that any company looking for a-exarantee was not mafo. I have no faith in tho man who would come thio the coumtry and earry on in mittor of tifr limid, trying to finduce peopie to make tavestmente by starting out and asking for a guarantee Your agree to सive thene people a. 15 yours edurantee, and at the ond of that time the busizese drope. Any one who looke at thits mitter from a commerchist stamijpotat, would root be attracted by It. If there is a commero ial future belore this, thoy do not Watit it petty grarintee for such a
imall noncera as this. A great objecfron is that you are making the way for imporing tremandous enstoms dutfore in the future. Yoin are making all fort of agreements and petiy regulathus of one lind and another. It fa dimitalige to Himk that we are giving fo meveh and gettias so little in refurn - know that this is onily a small nialter, but it in the prfaciple at the boltoth of it that 1 object to. These sontractors seem to get whatever they tisk. My apposition in this matter is hased upoin priticiple.

RT. HON. PRIME MINISTER.-Mr. Chiniman, I wiah to make a few retuarks in reply to what my hon. frfend has just sald, in the geaeral princtple that he lafd down, 1 eatirely concur, but in dealing with conditions In this country we have to do unusual thinga. This te the only country in the wortd there there is no cold stornge plant, They have it all over the Unit ad States and Canada. We nave no means of aendtug codfish or herring out of thls country, not because we laven'l got the commodities, but befanse we cunnot sell them, I do not faow any other way of inducing peotile to come here and take an intereat in the matter, than by string them these conceasions. When I was in Liverpool I saw different birde in cold fitorage, which were ten and twelve fears old 1 kiw salmon ten yeara ofd in New York. This is an attempt to bring a company to start cold stortige. Loolding at the mitter from tho Woret etandpoint: suppose that we had to pay the whole $\{25 ; 000$; it might be worse. As a matter of fict, thifs cantreet is based on the act which was firtmduced by the dovernment of 1898 , of which tuy hon. friend was a member. If. was passed in 1898 and nothing came of it. 1 am not saying that in any sense of complafnt, but it show that eren as far back as 1898, Govornments were lookling around for somie way of Induetug poople to come
here ant start collt sthrape. The Gorerument of sis Piotert Blond enterel lnie an elatorate owintract, liat mothtिद dime ot th. Stow की five the tenpmition frume then peopis in Niew Tork, whe arm prugaret tw come here and entablinh as enild storare paac. Tint engtrat iockias fot a koaranten was no pooid. Take for example the case of the onotract for frundeng the Canaittry ratimect whith to bettit camb pieted hy the Gatiatian Gorertment, and aliog the Ropel Walk to whleh il mubuify wan given lore many yeers ako. ot $\$ 50,56 t$. Tha mantarfats come it dely fere. Niew the flepe Whalk has expanted and in paying $10 \pi$ and re onfver me entritity. That is the effect of tolpturs thirt turittittio. Ther firte Stons dfourse canne helote the Les wasture ar that thae and asked tor
 not entit storarn hire fo hecanse we ure ant eatermiatis ethmach That is the aniver to the potit mufe by my tratsnit trimt. गte mermet to tho tyter कु ot cuntinas duties. it in anly for is years diop seariy ail the iteme here ann on the tree lles atready. I think if yon toutir 3on with thita thit that ir कa.

MAR. MORINE-Mit. Chatruan, Just a word ur two The faet that we pasa eif in Act in 1898 giving in suaranted if ththor an trrmiment aknimit thin. Our experiance from 1898 down to the prenent time nhows there ta me udvnntage in dulng tt: and the fuet that we turve tifer thitr imethot for serentepn yearn is bew an argament upsinst peottuntur it. Whatever may have been lay optaloes- If IBSS I bave turt romer tor thr carminont that if ir not a root principle
dpale there is the sientine as to whietsor the prfice we wiolli get for ere tith trimi colt itorize tir compe fition with othur flah wouid be sul: finmut to piey for the tont of cold atortor ith Now the Premter apoke about thithitiota til Cinitffin ind Amerl
 if the watern immedtately acjotetse finst roasts and the differvice be twene the price of thistr filh and the Drice of our hath is not sulficlent to say ies to pet oer fish is cold atornge and tukn it there. The linn. member Fpoke of muittan. If is sulte true that Zustrallinn matton is put in cold ntorare and hrought to England sold tiene in competitlon with natire mutton at a price quite eumelent to mako It protitables but it does not follow that It would pay an to put our fiah in cold storngo mid take it kp to the Inlted Etates and eell it in eompethtion witb the tinh there. Hewavir, it niay bur talent for grantod that if the surknt is offered and there in reasgmahle expectation of proniahte bue Ifors in thls dirsetion some of our Ifrtates mern will be format solr too reaity to engage in it. of eourse it pust be remembered that merarty all fuols deteriorate in eeld atomen and - ill not command anythine tike the price of the treah article aold ts the game market We sll know for toatance that the pouttry coming hers from the United States no matter how Frill preserved in cold storagl, is very different from the frenh article, I do tot think, Sir, that we thould give thils guarantee.

MON, MIN, FINANCE \& CUSTOMB -3tr. Speaker, Just a word in this Enldject. 1 do not altogether arree with Dhe Bonourable gentlemen on the ather slde of the touse when be futimates thist this propoaltios seeds too yarl encourngement, and if therv Thas maything tn it it womle not moed vo mach encourngement. Now look at it finat frome the finherman's stans polnt Whiefe are we ta cots athrade the tar as lall to cotccerneat We all know bov minck the finbermen at at. * the sland often muftes is the mienthe of Juty, Angust and Beptem. tor for tack of batt; how much time
thay- tewe traltir to moll balt, and we ult know whut if would mean to the

 and came back in tho avening with. out a finh owine' to the want of Batt. Now to ferte the butt muk tfoul hat some to the unvatinu of codtiah. owe this to then fricet yodinnt in todas them is no nercasuity of puttiag it in cold thorite Thirs trim lio nocomitty when If in Wortih misht dotiars exuintal to
put it Into cold stonate. Now sarwal fovernmonts have dealt wtih this cold ftorake proposttion. I think Str. Mooinn wald thee first Art was hutrodured th this Hogne in 1828 . Well whem you tale ap that Aet and come to mualree that Aet and set vhat help you moutd fei frum it in putting up oold stomge plants uround the lutund you will find it is pretty hard proporition. Bat this iet is a difterest scoporiton. We trant them to pat up plants worth plout fire thousand dollare. They ean 10 cilind with squid. It is a laft thas fo tavy to leres and can be uned all the Jear. If you put up capPis you mat coly wase if for talt furlse the capilis school. \$frudd za 1 anld can be ured at dily thme and will leep well for qutrit or tea monalhs. Now I think a propotront then the one wew bare lafure bas to-day should recelve every encourngeatil If yoa can furniab squild to 130 6 bulers beest spring and they go on the erounds in March and April and tier oan catioh four or fire tripited 4 ginuals of that earh it wilit more than affant thin five per cent, muaraintoe dinQor tais Contract. I think this bait forthin is one of the most serforas Heoblems that ran come batore the E Tous.

Thlie the Coast of Novs Scotis for Instanice There are over 130 bankern Atrua Lamemburg and the aurroanding countrien golas to the bank filhery thic iering Where to they fet the Tait Bach ind srery one had halt focured lant Jamuary und Feliruary Sot of cold atorage in Feliruary 1 mat 6n. Hatifix and was talling to a stuile fane who had tomething like ten or fifieon vessels going to the Gruad Hamke and he told me ther were balt. tal with herrine that had boee luroueht Trom Grevas Bay and put lu cold storgen I do mot see why wo shauld not be able to accompliati nomething like this here on a amall scale, and if thene peaple ars comitg here they certainly
are not comitig for the $5 \%$ we are to pay them. On the other hand I am aure they are not gulng to come without thiey recelre thits sticourngement. 1 think Mir. Chairman, that this House oaght to paas the Bill and give it all the mapport and encouragement possthte 1 liviou the ennertion of belt supply around this Ieland is a heary question to solve and if we can to any way tuprove the metuation i think जev witl be dotng ar mach for Nem: fomeniland as has bemb done tor a long timen, and when a proponition tike thls comes beforn the flowe 1 foel we eannot treat it too "libermilly.

MINISTER OF MARINE AND FISH-ERIES-Mr. Clatrman, I wrould the to make a Iew remarks on this Bill. I have listened very attentively to the apeechen from the ierni sentliemen on the other atife whome trasiness it is te Crittelse the Bum, and any Bil that comes ap here; and quite rifhty so, because if they did mot do that the Government minht bring up womie blte that would have to be crittelned by Its awn membark. 1 sgran mith the inat spenker, the How. Mr. Caahts is quite a number of Mie remarks. Thero Is a grest lons to this comntry every year because wn hare not ethonet halt to keep our fishermen soling. This io well known to every man interested In our fisberles. Thn han. member Mr. Marine $4 i 4$ not thituk there was asimon exported trum Itritinh Colump Wic. Whatt if tir eitt look up the Cart adian statistles be will find there are thounands of pounds experted annually Srome Beitinh Columbia to the Dalted Itritar tri colt starnire ant rifht tomm to Montreal and Torenta. Not onty in salmon exported all slous that jart from the Fraser Hiver anil other rifars til firttit Cohimbin: but tart year somie was experted to Great Mritain via New York. This ventare was not repeated owing to the conditiona thes provaitise buit it tis bitternd When the war ceases is great trade
can be developed $=1$ th Great Brlate.
He alop statod that be thorght no good would come from this colid storage bealnese. Well, that is ouly bis oplnion, and it is one privilege given to us all that each can have ble own opinton. Well that is not wy opualon. although mine may not be warth any Bore than his. The bos. member for Terryland pointed out one great bets ent, and that would be the mupplylag of balt. Herring are imported into the Uaited states in cold storage from Eritiah Columbla and sold is Bonton and New York at three cents a pound. They cas be ahlyped trom Vancourer across Canaita in refrigerator cara und sold in Gloncester to the flaherram for three oents a pound. They come dowa here to liay of tshands anil Bring up our herring and sell them fir fire contin a poumh. Now the reasees of thls is he does not mant to *ill our Newtoundland lierring for buit. They would rather sell them it the market in thelr fromen state.
It was also stated by Mr. Caphin that a eargo of squild was fmported fiblo Grual Baak and solit for fire or nis ceate in pound there. Cargoes were also Imported into Lamenture from Frowldence; and there were carkoes of squid sold at SL. Jacques and Rose Blanche this year. Thin I think ought to show this House the benefit of cold atorage as far as bait is concertel. When I mas at Rose BIanele Mr. Harver had a cold storage plant there and 1 was dellghted to see the fisbermen coming in with ten to twenty Give quintalis of Esh per boat, 1 myseit any the men coming up to the celd storage plant and luying balt for five cents a pound 1 said to one of them, This munt bin a great cotrenlence to you, and he satd it certainly was, and that the boata came from all directions to get this bait.
Now searly anybody who is a tiaberman will agree with me there is one
thing that all governments have negfected and that is this question of balt supply. There is one thitog I do not agree with in thls Bill. Instead of having three cold storage plants on land the Company should be forced to have two on land and one Hoating cold storage plant. 1 hope it thls Company ever comes here the Govermment will fasist that they build and equip a cold storage steamer capable of carrying so many thousand pounds of bait, and go around our coast and the Labrador coast and sell to the flshermen; because on the Labrador coast we annually lose thousands of quintals of fish through lack of bait.

Mr. Speaker resumed the Chair,
The Chairman from the Committee reported that they had considered the matter to them referred, had made some progress, and asked leave to sit again.

On motion thls Report was recelvod and ndopted, and it was ordered that the Committee have leave to sit again.

The remaining Orders of the Day were doferred.

EXPORT OF TIMEER BILL.
Hon Minister of Finance and Cus. toms gave notice that he would on tomorrow ask leave to Introduce a Bill to amend the lisw respecting the Export of Timber.

It was moved and seconded that when the House rises it adjourn untll tomorrow. Thursiay, May 13th, at three of the clock in the afternoon.

The House then adjourned accordingly.

## THURSDAY, May 13th.

The House met at three of the clock in the afternon, pursuant to adjournment.

PETITIONG.
MA. ABBOTT.-Mr. Speaker: I beg to present a petition from Middle

Brook, Gambo, in the District of Bonavista. This petition which is largely sfencil asics that the sum of two lundred dollars be allocated for the purpose of making a road down there. The potitioners stato that the absence of this road causes conslderable inconventence as the people of that place liave to utilize private land in order to get to the water-front. I sincerely liope that the Government will see its wny clear to graat the prayer of this petition; and beg leave to refer it to the department to which it relates.

## QUESTIONS.

Mr. Winsor gave notice of queetion.
Mr. Conkor gave notice of quention.
Mr . Kent gave notice of question.
Mr . Mortne gave notice of question.
MR, STONE asked the Hon. Colonial Socretary: (1) if any appointment has been made to till the vacancy at Government House cansed by the death of Mr . Ellis, the late gardener there; (2) if any aalary has been pald on this account since the death of Mr. Elils; it so, what amount and to whom pafd.

MR. STONE asked the Hon. Colontal Secretary to lay upon the table of the House a detalfed statement of all monles pail to Messrs. Kennedy Bros and Mesars. Spratt Bros, for worl done in or around the General Hoepital for the years 1912-1913 and 1914.

HON. COLONIAL SEGRETARY This is being prepared. I expect it will be up some time this afternoon.

MR. STONE asked the Right Hon. the Prime Minister, in the absence of the Hon. Miniater of Justice, to lay upon the table of the House a copy of all correapondence, if any, relating to the case of the Crown vs, Frank Murply, of Placentia, and othera in 1914, with referonce to breach of the Game Lavs, the amount of the tines imposed, and if the sald fines were pald.

RT. HON. PRIME MINISTER,-I beg to table the information.

MR, STONE asked the Hon, Colonlal Secretary to lay upon the table of the

Fouse the total cost to the Government of the Dally Telegraph Message from Hallfax, with details of this expendlture and of the amounts pald by all parties in this country for using this message in newspapers and otherwise.

MR STONE asked the Hon. Colonial Secretary for a statement of Parcel Post arrangements covering frequency of service and the reason why we are not served by the croascountry traln.

HON. COLONIAL SECRETARY-1 shall have the former question ready to-morrow. The latter part I beg to tuble nuw.

## MUNTCIPAL BILL

Purauant to order and on motion of R. Hon, the Prime Minister the Bill entitled "An Act to amend the Act 5 , George V., Sesston, 1, Cap. 10, entitled "An Act respecting Municipal Affairs, and for other purposes in connection with the St. John's Municfpal Councir' was read a third time, and passed, and it was ordered that it be engrossed, beling entitled an above, and that it be sent to the Legislative Council with a mpssage, requesting the concurrence of that Body in its provisions.
PETITIONS RE PRODUCTS BLLL.
Pursuant to order and leave of the House, Mr. Howley K.C. appeared at the Bar anit presented arguments ou behatf of his clients respecting alleged possible injury to their interests arisIng out of the contract entered finto between the Government of the Colony and the Newfoundland Products Corporation, Limited. The Companies representeit by Mrr. Howtey, K.C. were as follows: The Labrador Pulp and Lamber Company, Ltd, The American and Newtoundland Pulp and Lumber Company, The Internatlonal Timber Company, The St George's LumCompany, Ltd.

## SUPPLY.

Pursuant to order and on motion of Hon. Minister of Finance and Customs the Houss resolved itself into Committee of the Whole on Supply.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Commiltee.

HON MINISTER OF FINANCE \& CUSTOMS.-Mr. Chairman: 1 do not propose to ask the committee to discuss the matter of supply this atternoon: but I would like to explain the several rotes, I think that each member will find on his desk a copy of the Supplementary Supply for the current fiscal year, amounting to $\$ 167,680.97$ in all.
For the Premier's Office we require 32.500 for Incldentals, the appropriation belng inadequate to meet the clatms for cablegrams, telegrams, and other services, there boing a large increase as hon. members will easily understand, bacause of the war.

For the Colonial Secretary'a Department we require $\$ 8,224.44$, which I shall describe th detall. We ask \$2.200 on account of the Census, and vital statistics, of this $\$ 2,000$ is to pay the cost of binding and printing the additional volumes of the consus, In past decades the censual returas conslisted of two volumes, but this time there will he four, two of which have already been tasued and the third will be ready in about two months' time. The information obtained through the list census 's about double what has been obtained from any previous census, and the cost of printing is increas ed accordingly. For the Vital Statlstice office we require $\$ 200$ to pay special bonuses to registering offices whe forward their returas promptic, This wat previously pald by the Tuberculosis Commission, and since that body has ceased work the Departaesat of fital Statistics has assumed Theblity for the bonases. For coisolldattoe of laws we require $\$ 3.521 .41$, iurcaenting a payment of $\$ 503$ ench to tie sever members of the Commilsslon, and a umall sum for incideutsls fict the Scaling Commisslon we reguire $\$ 2,500$. to pay the fees of each
of the judges, $\$ 500$ aplece, and $\$ 260$ to the Sertetary and, Stenograplier. a bile the maiance represents paymetats of witnesoes and other incidentals.

For the contingencies of the Colonial Secretary's Oflice we require $\$ 1,000$, mainly tor telegraphing, owing to the facr-ased volume of wock in this rennection arising from the war and alao for stationery and sandry expenses.

For the Marlne and Fisheries Dopinfment we require $8200, \$ 100$ for un increaze to the stanographer and $\$ 100$ for an increase to the lighthouse mb chantclan, both voted last year, but omltted In the Estimates; and for the contingencies of the Marine and Fishtries Department $\$ 3.400$ are required. A. Minate of Councll provided $\$ 2,374.43$ of thls sum, but as $\$ 990$ of lighthouse contingencies have been charged to the Marine and Fisheries vote, we aak for the extra $\$ 1,025.48$.
The Publle Works Dopartment requires $\$ 2,750$ for fuel, $\$ 2,500$ being for the post offices and telegraph offices In the outports, and 3250 for the departmental buildings in the outports. The amounts voted last year were inadequate, many new offices have been opened, each of which required an amount of coal. In Grand Falls, Bay Roberts and Hr, Grace Bulddings, the quantifles of coal required for these buildings canuot yet be determined until after the winter's experlence. This vote is to cover coal supplied, but not provided for. The vote of $\$ 1,000$ tast year was not suffictent.

For Insurance and Keepers we require for the Harbour Grace public buillings $\$ 375 . \mathrm{Mr}$. Thamns Tobts, carotaker, salary $\$ 150$. Requisites, \$40; Francis Martin, fireman, salary \$135; Panl Hlegins, to attend to repairs, winding and upleep of clock in publlo buildings, and also all clocks In public offices and buildings in Hr. Grice, $\$ 50$ salary. These mon were
sppolnted by the Government in July of the financlal year.

For the Grand Falls public building \$400. H. Whitemarsh, caretaker, appointed in November, began work in Mey, 1014, salary to caretaker $\$ 360$. Requisites, $\$ 40$.

For that at Bay Roberts, \$440. G. Snow, caretuker, salary $\$ 400$, and reculstes, $\$ 40$.

Fo: the Museam in St. Jobn's, $\$ 120$. Inercase in Fireman's salary from $\$ 220$ to $\$ 540$.

Then again. for repalrs to publie buildings, we need for the completion of the Grand Falls building $\$ 2,500$; for that at Bay Roberts, $\$ 2,950$; for the Grand Bank Court House $\$ 1,600$; for the Analyst's office in the Court House ut St. Join's. 8300; for the Eardener's thalary at Government House $\$ 520$, and for Mercer': Cove Postal Telegraph otflee, $\$ 650$, making a total of $\$ 8,580$. There tralso at sum of $\$ 2,200$ regulred to cover repalra done to the plumbing and beating plants in various public buildilngs. For the Government Ensineer's Office we require $\$ 1,150$, in connection with the Branch Railway Trunt Account, for aalaries, travelling ind living expenses, ete., for April, May and June.

For the Head of Administration of Justice we require $\$ 20$ to increase the salary of Edward Collins, Jalter -1 Hacentia, raised by Minute of Couneil; for police anauities, we require $\$ 187.50$ as perision to Constable Petter. of Twillingate who has been retired owing to ill health; for reglstration of Jurors we salk 8300 , the vote not being sufficient, and the account always over-expended; for constabulary uniforms we need $\$ 700$, as a delayed shipment of clothing last year placed this mmount in the current fiscal year, vhereas if it had arrived in due time the pasment would have been made out of the vote for last year, whlch stood in credit pearly $\$ 600$, and which
became a droppel balines: for Cosatabulary saiarien under the cable ser Flee sule se ask saspe, to pay tor the work, boart, and loteting of nyecfal constables puariliag the cable stations In the Colony becasse ot the war. We aloe ask $\$ 400$ for constahulary coss vepunce. to corer the expensen of ne censary transfirn of ith men, the vote of $\$ 1,900$ taken to cover the same not beithe sumfleat thin your becanae of the frequent movements of men owing to the war. For the Plre Department we ank $\$ 300$ towarda additionat ald, represeating grants to renerve man of the Soath Side and City Stations, as there thive beent heavfor requirements than usual this year is connection with the reserve men.
The Fhance Depurtmeat requirea the tor Suprente Court continguncles and 52.500 for maghatrater contilegercles, hat these firmins represent a retuachon of tess on the formar and fso0 © the fetter ar eompared with the upoctal wotes last yout. Dhider the Publle Works Departaset the pollice intartion at SE. Jotnn's, 3500 Jor supplies und manintensince for the Pentientiary to the sume way, and 31,759 for the mathtenance of German prisooers in outport Jaile, it having been necenary to tranufer a number of thene wen to the outportes so as to make room in the Peattantlary tor erdiaary rogulire munts. This mikes a total undur this nervice of 82,180 , practicully all wecatienced by carins for Corman prib anern đuring the war.
Ehider the head at Lercialation we
 is for the Legistative Counell, the principal item being 3240 tor matertal making snit titure of a new earpet in the Connefl Chamber to replace the ove that had done futy there for more than twenty zeark. The carpet, 1 might may, was sotd at Batowrs Auetion Market by direction of the Presiden: of the Upper House, and the amount
fectrod was turnsh orer to the Truanarg. The chlef other thema ef ithe amount are 1100 eart to the Wentern Biar, May Roberts Guardisa anid Boll Lalad Miser for publiating the denntes of the Upper House, and the balanes is reqresented by aundry exroants For the House of Assembly we revalien 811,300 is round fieares. of this, 8570 is represented by allomancen to the cutport membern and ofticiale for travelling expecines, ete. during the war sesaifon; alno amounta for printing and publishing detates. tumsarik, Journata, and Acth, ote, and zome accounts for 1918 being incladed with those of 1514 bocause the pubilicatice of the rolumes was delayta orimg to the election the privions fall. Yer Gemeral Lexialation we roceile tuse for Misdine the Aets of the acration ant sa00 for books sapplled to the lathrary. We atao seed tase sore for fuel and leat is the Coloalal Ewildine arivine from the increamed Pan of ceat and light there. Fires and Helita me now seeded th the oftions. mid dariug the whole fall and witter ther teecimental hosaiquarters was located hars, while there is in adaltion. the heatiug roquired during the sension of the Lakislature.
Enuler Elucation we ask 8300 , the niflitional payment of $\$ 100$ each to the Anetiean nod Mothodist anstutant toapictoris, rales ander Minate of Councll Lat year, and as the Educa thon Aet has aot been amended to provice the money, Supplemental supply lins to be takea for it.
Tonder Pablle Clasitiles mx ank, tor the reilet of alle-hodied poor, 720,009 . If being necemery in riew of the dis kese in various directioss caumed by thin matural drcumataness to which the war gave riac, to make proviation fir analstance daring the part winter bi some exient is this difrection. Hos. nembers on the other alie of the House will remember that they wern naxious that the Goverument should
move in this matter, and this outlay has thus been occasioned.

For the Lunatic Asylum we reguire $\$ 4,287.50$. Of this sum, $\$ 8,000$ is due to fincreased prices of new contracts caused by war conditions. In other worde, the contractors, as soon as the war broke out and tacreased duttes were put on, there was an advance In the cost of supplies, represented to the Government that it would be unfair to hold them to their original fig. ures under the ctrcumstances, and thls contention was admilted. We also need $\$ 1,000$ for fuel and Hight, the amount voted last year being too small, the setual outlay befing $\$ 6,000$ $\$ 287.50$ is needed for salaries, two term porary watchimen beling appointed to replace two permanent ones at present incapacitated by chronic iliness, ant whose retirement is being considered by the Government.
For the General Hospital we require $\$ 17,860$. $\$ 8,000$ of this is for fuel and light, due to a short vote last year, $\$ 8,450$ is for maintenance, due to short vote, and also to the clatms of contractors as already mentioned, and \$1. 410 for salaries. The amount of $\$ 1,200$ for the aeting House Surgeon, Dr. Knight, was left out of last year's estimates by a typosraphical error. The wages of three firemen are increased from $\$ 420$ to $\$ 540$, to put them on a par with other Union firemen, and this makes \$180; and the male helper in the lititchen is advanced from $\$ 150$ to $\$ 180$.
For the Poor Asylum we reguire \$1. 440. 81,030 for maintenance because of contractore' elaime as already mentioned: $\$ 300$ more for fuel and tigat; and $\$ 110$ for salarles, the chlef male attendant belig fincreased from $\$ 350$ to $\$ 400$, and the assietant from $\$ 270$ to $\$ 330$.
For the Lazaretto we ask t230 for mnintenance, because of war pensiona as aforesald.

Tinder Head 8, for Lighthouses, we nsk $\$ 9,450$. $\$ 450$ of this to cover outstanding bills for advertising notices to marfiners and for stationery and other supplies for the Likhthouse Department; and $\$ 9,000$ for Lighthouse maintenance, the vote being short as several new lighthouses have been put in operation. The expenditure for maintenance last year was slightly bver $\$ 65,000$, and the entimate was $\$ 52,000$, or $\$ 13,000$ lose for this year vith twenty new lights and fog alarms to maintaln.
Under Head 10, Marine and FisherLes, we ask for $\$ 21,740$. Of this sum. $\$ 9,000$ is representod by repairs, doclage, and supplies for the Flona. She needs practlcally a new deck, her boller and engine rooms require large repairs, and ate will have to dock for an overhaul, while her first supplies for the spring will also represent a goodly sum. For similar work for the dredse we ask 33,000 . In order to carry out fully the lobster propagation enterprise, we need $\$ 3,700$ more; the increase to boatman's salary omitted in estimates, is an item of 240; and the Gamo and Fisheries Board ask for 86 ,000 in order that they may be able to meet their requirements. It will be readily appreciated that owing to the war, which automatieally disposed of the tourist traffic, there was a decided fall in the revenue from fishing and game licenses, while the protection service had to be maintained fust the same.

Under head 11, we require $\$ 7,000$ for Customs to cover general refund. The demands under this head, espectally with regard to keprosene and gasolene, conld not be more accurately estimated and are growing all the time.
Under Hoad 14 we require for gen eral contingencles $\$ 32,000$. The ac. count to date has bean overdrawn $\$ 26,000$, and we need $\$ 1,000$ to cover penslons up to June 30th that have
been patd to offetals, who, through ill-hoalth, were put upon the pension Hist since the last sesslon and whose pensions could not, of course, be provided for them. Under the Act by which the Bell Island Transportation Company was granted a concession for a landing way at that place, we have to pay a subsidy of $\$ 500$, and as the Colony also undertook to make up to the shareholders the faterest upon their amount, we need $\$ 2,000$ for this purpose also, whille we estimate that we will require another $\$ 2,500$ to cover the vote for sundries up to the end of the fiscal your also.

- MR. KENT-Mr. Chairman, betore the Committee rises I would like to say in connection with Supplementary supply what I said the last time Supplementary Supply was asked for. 1 do not think it is sumclent when asking for Supplementary Supply to come. down with a general statement. Eech item ought to be cealt with more folly than it is in this account. Thls atatement ought to be a statement in detail from the Minister in charge of each particular Department which is responstble for the expenditure that has been made to antsclpate the tresh vote now asked for. For instance, take the Marine and Fisherles Department. Wach item in that account ought to be gone finto here by the Minister of Marine and Fisheries, ahowing why it is necessary, what expenditure has been incurred, what progreas has been made in the works, it it has been made for works, and what needs other than works have made it necessary to come here and ask for supply. In the same way the Minis. ter of Public Works ought to come unto the House with his accounts down to date which occasion the extra vote and explain why each vote required this overdraft. The same thing is trae of the Colonial Secretary's Ollice. the Prime Minister's Office and the

Department of Finance and Customs. I think it is due to members of the House that this ought to be done; it is due to us when we are asked to vate these moncyn that we should know wby we are doing it Such a goneral statement as has been given I do not think sufficlent. We are no wiser now than when we started as to why these increased votes are askod for and each vote as I have said ought to be explained to the House tiy the responsible Minister, who is responsible to the House for the vote that is asked. The Minister of Finance has, I think, done his duty in dealing with it in the broad way in which he has done; but it should be tollowed, before the rotes go further, by a statement by each Department, giving detalls and particulare ns to why such vote is required by that Department. I thfok we ought to liave from each Department a statement such as 1 ask.
HON. MINISTER FINANCE AND customs - Mr. Chairman, I beg to say that it is the intention to give all intormation possible We could not anticipate last year two-thirds of the amount that we are asking for this evening.
Take the Marine and Fisheries Department for instance. When we came down with the Estimates last year it was not known that we would have to repair the Flona. Yet we found during the whinter that Lloyds' Surveyor and Captain Enslish practically condemsed her: and before that ship was ailowed to leave port certain repairs hat to be made. When she was surroyed and an estimate made it was found that nine thousan 1 dollars was necessary for the work. We could not roresae that last year, and consequently it had to go into Supplementary Supply. Any information that hon, gentlemen require wo shall certainly sive. Now take the dockage
and supplies to the dredge. If we can go within two or three hundred dollars of that amount I think we are doing well. of course we would not have to ask for this at all if the dredge were allowed to spend the money earned by her the past six months and now put to her credit. It is merely a matter of book-keepr ing. Next ia Lobeter Propagation. Last year after the House closed the Commission appointed by this House decided on a certain figure to be pald for female lobsters. When the House was in session we could not estim. ate that expenditure. We simply voted five thousand dollars and we found that has not been suffleient. I think In every other case we can give the Committee a satisfactory explanation. We went as near the actual expendfture last year in our estimates as was possible. I have never known any Government to come into this House and ask for a smaller amount in Supplementary Supply than we are now asking for.
MR. KENT-Mr. Chairman, I would like to say in reply to the Minister that I do not for one moment question the necessity of these votes; but what I have said is well Hllustrated by the case of the 'Flona'-that before these votes are finally passed the Minlater of the Department responsible for the expenditure should give some explanntion as has been given in reference to the case of the 'Flona.' For instance the Minister of Marine and Pisheries should como in here and explain why it is necessary that the 'Fiona' should be overhauled, what estimate has been made in comnection with the work, and why it is that it was not anticipated last year. That is merely an illustration of what I think ought to be done in the case of every vote asked for in Supplementary Supply. Every vote ought to be explained separately and in detail to the

Committee. I do not think there ought to be any trouble about thas. I simply make this request in order that it may be considered betore we come down toraorrow.

MR. CLIFT.-Mr. Chairman, it is refreshing to hear the Miniater of Fintance say he hias done what the Anditor General told him, I am very pleased to hear that and I hope ho will abide by the Audit Act and the instructions of the Auditor General a little more closely in future, and when he comes down next time with hils additional estimates 1 shall be very glad if he will tell us where he is goling to get this money that he needs.

MR. COAKER.- Mr. Chairman: When the Minister of Financo and Customs brought down his original estimates we had quite a little fuss over the procedure and as to the information that should be given to this side of the House. Now we are ratsing some objection to these aupplementary votes, and if he wishes to got them through he ought to give us all the intormation possible about each item. We want to know how much money has been spent, where it has gone, the halance left and all particulars. Now with reference to the "Flona" vote, I no not agree with him that this could not have been foreseen. If the Government did not know the Ship's Husband should have known last year and should have made the necessary arrangements. With regard to the $\$ 3,000$ for repairs let us know how you are spending it, that you are not fooling It away. Now with regard to the Lobster Propagation we gave you $\$ 5,000$ and now you are asking for $\$ 3,700$ more, and we should have full informa. tion about this. I do not tatend to delay the House; but I do not think it would be any delay to let us have the necessary information. We will be satisfied if the Head of each Department comes in here and sives an
explanation of the amounts requifed by His Department.
Mr . Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered the mattor to them referrea, had made somie progress, and asked leave to slt again.

On motion this Report was received, and adopted, and it was ordered that the Committee have leave to sit again, PRODUCTS CORPORATION RESOLUTIONS.
Parmuant to order and on motion of Rt . Hon. the Prime Minister the House resolved itselt into Committee of the Whole to consider certain Resolutions, In relation to an agreement ont rod into by the Government of the Colony with the Newfoundland Products Corporation, Limited.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Committee.

MR. GLIFT.-Mr. Chairman: Before passing that Resolution I would Hke to ask the Prime Minister if it is his Intentlon to make any reply to the objectlons that were raised thls afternoon by Counsel at the Bar of the House. This is the first time to my knowtedice as a member of the House -and I have been associated with it for quite a number of years-that wex ever had the pleasure and privilege of listenling to Counsel at the Bar This afternoon Mr. Howley, on behaif of the several Companies he represented, polnted out certain objections that his cllents had to the measure now before the Committee. He pointed oit, for instance, that in the Labrador areas which are dealt with under this Contract his clients, the Labrador Paper and Pulp Company had very large interests and that these interests would be affected very materially by the pasaing of this Contract, that it would give the Produets Company control over the drainage area and the water powers in the Labrador for a
period of five years and during that time the enterprise and investments and properties of the Company he represents would be tied up. Now there must be some argument I take it on behalf of the promoters of the Contract to offset what has been said by Counsel at the Bar, and I should like very much to know what is to be sald upon the other side betore 1 make up my mind as to how I shall vote on this particular matter. If what Counsel has said is correct then the interest of the perzons whom he ropresents will be materlally affected by this measure. 1 am not at all clear on this matter and the Prime Minister may be able to enlighten me as to the nature of the holdings of these people.

RT. HON. PRIME MINISTER-ORafrary Licenses.

MR. CLIFT-Does the Prime Minister know if this Company has complled with the provisions of the law to make these licenses good.

RT, HON, PRIME MINISTER.-I have no reason to think otherwise.

MR. CLIFT,-I would like to know in a general way what is to be said on the other side against the argumenta of Mr. Howley. As 1 sald a fow days ago, In approaching this measure I have no desire to offor any fractlous opposition whatever. My onIy desire is not to vote for a measure that may affect tho intercets of others and that may be the means of putting a monopoly in the hands of a Company or may not be in the beat interests of the Company. The serion is too late now and we have too many other matters to dispose of to sit here merely for the purpose of making Op position. All I want is to get information on these various matters before I can make up my mind as to how 1 am going to vote. The American Newfoundland Pulp and Timber Company say they have no water powers. If that is so their timber
must of necessity be of very little value to them and if they have to acquire water powers from the Products Company it may be at an expense which they cannot afford to ineur. I woutd like some information on these matters and also in reforence to the matters I asked about when speaking on this suject before. I daressy he will be able to give It to me and if he does it will help me very much. I asked the Prime Mínister to bring down the conveyances by which certafil water powers were conveyed to the Products Company, I sald that I was aware that the Roid Nowfoundland Company owned certain lands on the Humber River over which water was running, in other words they held lands under the bed of the River, and that boing so they would naturally have some interest in the water running over the land but it would not of necessity give them the water power and when it is stated that these wator powers have been conveyed to the Products Company I would like to luve some more information as to what has been conveyed to the Company. In addition to knowing what was conveyed I would like to know the consideration for the converance. If the Reld Nowfoundland Company own the land and claim the water powers why do we come in here and grant them these water powers? If they own it why need we convey it to them. If it has been granted or conveyed to the Products Company by the Retd Newfoundland Company 1 would like to have some information as to the matter of conveyance and 1 would like to be informed tally as to the concession from the Government or the Erown to the Reld Newfoundland Company respecting these water powers, I also referred to the matter of reservations along the banks of the River and around all these lakes and ponds over which the Reld Nowfoundland Company had rights because they owned
the fee slmple of the land. Along these waters and around these Lakes and ponds there is reserved a right of way for the public. Now this right of way does not agpear to be reserved in this agreement. The Prolucts Company are siven certain rights without regerving in any way the Public Rights. It sems to me that is a very important matter. As to the other matters that have been referred to by honourable members on this alde of the House 1 do not propose to deal wifls them at the present moment. Certain amendments are being made in the original resolutions. The Premier informed us the other day that he had certain concessions from the Products Company. He sot them to agree to cortain concessions before entering into the agreement. They would naturally think they were entitled to every. thing set out in the agreement; but they have agreed to certain modifications which are now betore us in the form of Additional Resolutions.

Of course that will modify the eontract to some extent. It seems to me to be a pity that it has not been found possible to limit the period of freedom from taxation to, say twenty years. I do not altogether like this prineiple on which frestom from taxation is . sranted for an unlimited period in the case of duties on imported machinery. because 1 regard the importation of hew michinery as a necessary complement to new fndustries. If it is advisable to give a concession of free dution on the original installation of these works, it follows if the Company Imported new machinery for addittonal works thoy would naturally be entitiod to free admisaion. I hope the Premler will explain to me what I desire to know as regards the rights of theso parties as far as water-powera are coneorned and also as regards what he has to say in repty to any observations of Coumsel at the Bar this afternoon.

RT, HON, PRIME MINISTER-In relation to one or two polinta referred to by my hon. friend Mr. Clitt, 1 might say it was entirely an ommisation of mine that he was not handed a copy of the grant. I may say that beyond this 1 have no other information. It is simply an ordinary grant of land and whether it conveys water-powers or not 1 am not prepared at this prosent juncture to state. I do not mean to say that it does. 1 know that it is one of the ten mile blocks of land that Junction Brooks runs through. As regards the 1904 Act in relation to the transportation of timber there you are dealing with rights of land, and here we are only concerned with the right of time. In relation to any special reply to what has been sald hero this atternoon, all I can say has been sald over and over agaln in this House.
MR. LLOYD. -Mr . Chairman: In reference to this point 1 would like to know whether any additlonal constaeration will be given to the question of the transportation of $\log$ e, and whether it was the intention to approach the Company on Clause 20 of the agree ment which puts them in the same position as the public at large.
RT. HON. PRIME MINISTERSince that point is raised I would like to polnt out that there are no further amendments golns to be made there. 1 have done the best I could do here and co not propose going into this further untess some advantage can be siven as a reason.

MR. KENT-In consideration of Sec tion 20 . This is the fundamental clause of the whole matter. I consider that it can considerably affect the whole grant.
DR. LLOVD-Mr. Chairman: Thoro is just one matter here I wish to point out. I notice from the first this demised water power is subject to existing srants and this is inforred from the remarks of the Premier just now.

1 would like to draw the attention of the House to the fact that it may be necessary for this Company to intorfere with these water powers. 1 am not sufficiently informeal to speak with nny degree of accuracs, but 1 understand $t$ at there is an oxisting wa:er power hald by the Penn Compans. which cau be seriously interfered with by thif. The Penn Company is interested ia the water power at Musknut Falls, whrte. if you refor to see. 1. you will find the Company is also intorested in. This matter placos the scheme in a more undesirable light. The mere compensation for the water power would hardly be sufficient. They should be in a position to ask the value of the water power from the Company and obtain it. Can the Prem. ler glve me some explanation of this?

RT. HON. PRIME MINISTER.-The only answer is this that where any damage is done to any water power the act provides for comprensation.
MR. LLOYD.- That was not the point 1 was referring to.
RT. HON. PRIME MINISTER.-I lnow. Such an aspect as that ralsed by the hon. momber has never been considered.

MR. LLOVD-My point is this: It is desirable that industries other than this should go on as well.

RT. HON. PRIME MINISTER.-I will take a note or thll.

MR. LLOVD. -1 think it is of aufficient importance to be considered, and It is extremely unlikely that the Company will object to it.

MR. KENT- 1 think that the matters we have heard this afternoon and which the Prime Minister is about to disenss with the Company ought to be attended to and the result made known before the bill is adopted.

## RT. HON. PRIME MINISTER.-

 This first resolution can be allowed to stand over of course, but I think the second can 50 on.DR. LLOYD.-In reference to the polats that have come up this afternoon ralative to the Labrador water power and more espectally the drainsge area of the Hamiltoa River, I would like to state a few Ideas which bave occurred to me during the progrose of these dobates. The Premiar may resolve them or hater Information may leave no room for donbt. The question was as to the streams which run into the Lake Melville and I would Hike to know in speaking about the dralnage of the Hamilton River what the eastern termination of that drainage is. Under the contract we may presume that it goes to the sea. Well, then In Lake Melville a part of the sea? Can the Premier explain thls polat to me?

MR. DOWNEY-Mr, Chairmin, I have no Intention of occupying the time of the Fonse in analysing the different opinfons that we have heard set forth here this afternoon concerning the advantagen and disadvantages of the advent of this Products Compnay. I am convinced that the coming of this Company will materlalize into something that will considerably advance the interests of this Colony in the future. But I would more espectally reter to the positions of some of the Compantes with regard to the water powers. Now anyone who will take the trouble to consult a map will find out that the Prodacth Couipany is situnte at the south slde of the Grand Lake. In connection with the position taken by hon. members in reference to the areas beld by private parties I may say that water powers are necessary for the operation of pulp and paper mills, but up to the prefent time the Pein Nowfoundiand Company has not shown any Intention to utilize its power for auch purposes. They simply hold it an a mere speculativa proposition. I need not refer to the different objects which the Products Company hope to obtain as the ground has been gose
over so thoroughly by hon. memhers but 1 have great faith when this induatry will bo in fall awing the people of the Weat Const and of the whole Island must be greatly benefited. I bave therefore very much pleasure in eupporting this mgasure.

MR, LLOVD.-Ot course Mr. Chairman, my hon. friend Mr. Downey is speahing without any authority. I presume we cannot take his version of these facte as authorized by the Company.

MR. DOWNEY-1 have had no conversation with any member of the Company. I am speaking from my own personal knowledge of the localfity.

MR. LLOYD-Of course the Hon. Member cannot have a knowledge of the mind of the Company, as he does not speak with their express authority. And seeing it placed before us as his own personal observations wo cannot accept it as of any value. Even if it were of value that woald not affect the position that the Company may change its views afterwards when the deal is corpleted. If we conld get from the Company a confirmation I should be satisfied but until then I fear that 1 am unable to accept the hon. memberli remarks as of any value.

MR. GRIMES.-Is there snything decided as to the question of wages?

RT, HON. PRIME MINISTER-Yes. I may gtate that I have very fully discussell the question of wages with the Company and they express themselves ratisfied that any wages they will pay will bo in excess of present wages in the same class:

DR. LLOYD- I fancy the Prime alintster stated that the wages would be from $\$ 700.00$ to $\$ 1000.00$ whiteh 1 Ir over two dollars a day. That means I pronume a minimum age of two dollare a day.

Mr . Spenker resnmed the Chatr.
The Chairman from the Committee
reported that they had considered the matter to them referred, had made some prosress, and asked leave to sit again.

On motion this report was recelved and adopted, and it was ordered that the Committee have leave to sit again.

LOCAL AFFAIRS BILL.
Mr. Speaker informed the House that he had received a message from the Legislative Council accuainting the House of Aasembly that they had passed the Bill sent up entitled "An Aet Respecting the Adminstration of Local Affairs," without amendment.
EXPORTATION OF TIMBER BILL.
Pursuant to notice and leave granted, and on motion of Hon. Minister of Finance and Customs, the Blll entitled "An Aet to amend the law rospecting the exportation of timber," was introduced and read a first time, and It was ordered that it be read a second time on to-morrow.

The Minister of Marine and Fishories tabled the Report of the Game and Intand Fisherles Board for the year 1914.

The remaining Orders of the Day were deferred.
It was moved and acconded that when the House rises it adjourn until to-morrow, Friday, May 14 th, at three of the clock in the afteracon.

The House then adjourned necotdtingly.

FRIDAY, May 14th, 1915.
The House met at tbree of the clock in the afternoon, pursuant to adjournment.

PETITIONS.
MR, COAKER-Mr. Speaker, I beg leave to present a petition from the Inhabitants of Fortune Harbour, who ask that an allocation of fifty dollars be granted for the improving of a landing at Black Duck Cove, Belle Isle. Some money was expended there last year which created conslderable fm-
provement, but the sum here asked is required to complete it. It is in the district of St. Barbe. I hope this will recelve the immediate attention of the Government and asit that it be reterred to the department to which it relates.

## QUESTIONS.

MR. COAKER asked the MInister of Marine and Fisheries to lay upon the table of the House copies of all tenders received for repaira on the S. S. 'Flona.'

MINISTER MARINE AND FISH. ERIES-The reply has been tabled.

MR, KENT asked the Hon. Minister of Finance, or other Minister representing the Justlce Department, to lay on the table of the House a detalled statement of all amounts paid under the head of Civil and Criminal Prosecutions from July 1, 1914 to date.

HON. MINISTER FINANCE AND CUSTOMS-This is being prepared.

MR. MORINE asked the Rt. Hon. the Premier to lay on the table of the House all information in the possession of the Government in relation to the manufacture of fertilizers in the United States and Canada by the methode proposed to be used in this Colony by the Newforndland Protucts Company, espectally in relation to the capital of companies manufacturing; and the locallty and output of manufactories.

## GRAND BANK WATER SUPPLY RESOLUTIONS.

Rt. Hon, the Prime Minister gave notice that he would on Monday next ask leave to move the House into Committee of the Whole to consider certain Resolutions relating to providing a water supply for the town of Grand Bank.

SUPPLY.
Pursuant to order and on motion of Hon. Minister of Finance and Cus. toms the House resolved itself into Committee of the Whole on Supply.

Mr. Bpeaker Inft the Ohair.

MR. STONE-Mr. Speaher: I beg te entorke aif that bas been asid by tre han members on thith stde with reapect to the mavier at Gremspond. i thow fin to be a hardwortiliay man tho is trytue to earn an honest tivebihood. 1 am very well acquainted vith him, and know that be is al chay atriring to make an honent folin whin tie ean. 1 thme that tho I Hast the Government can do is to pat Bim on a par with other maolers, and I bope that the Premier will do all In hits power to do thle.

HR. COAKER-ls anyme atle to elve any laformation as to bow many fermas prisohers we bave Aere sow?

RT. HON. PRIME MINISTER4 am not is a porition to state the exact number, but I will eapulre.

MON. COLONIAL SECRETARY1 think there are three or four in Macientia! four or fixe in Bay of lahinites Ifve or afx in Harbour Griee: कnd about fourteen hare.

MR. KENT-I would Thee to know whether anything has been doad in the matter of the Reports of Detates if thls Houre. It will be rememberIf thist I brought this matter to the dittention of the flocse soune time sep, and the Premier promised that the Titimal Eeonomy Comenteston tould take it ap. I to not obaerre any tmpravemeal.

RT. HON. PRIME MINISTERI may eny that I immediately toid the Bupervisor to let mel have a report an to what he considered might he done in the master. He msde a roport to me, but it has been fmposuble to to anything up to the prenent time. I hope before Monday to have a cont
ference between the members on the other slde and two or three from this side to see if it is not possible to improve affairs in this respect.

MR. KENT-1 would like some information in relution to that large vote- $\$ 16.421$-for the House of Asnembly.

HON. MINIBTER FINANCE AND CUSTOMS- 1 can give you the detalls. I have them here.

MR. KENT-By raforance to the statement ziven by the Minister of Finance 1 notice that the greater part of the amount is made up in connection with the printing of the deSates. Now, 1 think unless the system is improved that this monoy in simply thrown away. I notiee that the printivg of the Journal for 1913, and the publication of the debates in the Hansard cost $\$ 2,770$, and tor $1914 \$ 1$. 839. The difference in over 8800 . Now. If I remember the debates of 1013, I Goa't think they were nearly as bulky and voluminous as those of 1914 , and I don't think the Journal was either. Or couris, as regarde the pubHicatton of the detintes in the other manner. I don't think that they are of any value whatever. They don't appear until tite in the summer, and nobody takes any interest in them. I would like to know what the explanation is of the difference in the cost. Is there any person who can glve any Information? There does not appear to be any relation between the work done and the amount charged.

MR. COAKER-As regards the expenditure for printing, I think the time has come now when the Government ougat put this work up to tender. I have not the ellightest doubt but that the Colony loses a 'arge proportion of the amounts pald for printing. Thiero fs quite a lot of competiHon in that Hine now, Under the present system, one or two flrms have a monopoly of the whole thing. If the work were put up to tender I have
not the slightest doubt but that $\$ 26$. 000 could be saved to the colony in this conmection, and that aum is worth mahing an effort to asve. 1 bellove it is only fair to put this work up to tender. 1 might say that so far as t am concerned $t$ conid not tender. We have quite enough to do to look atte: the work which we have, but there are estabilishmenta who would be very glad to tender for the work. From my imnowledge of this work, 1 know that the companies are getting it now are malcing 50 per cent. clear proflt on all work done.

MR. JENNINGS-Mr. Chatrman: Misht I ask the Minister of Marine and Eisheries from what vote in his Department the Const Finhery War: dens are pald? Are they under the Game and Inland Fisheries Board? I do not notice the vote here. I am of the oplnion that that service could be diapensed with altogother, as I cannot gee of what use it is. I lenow from my personal knowledge that the Warden in my neighbourhood does not do very much for whatever money he recelves, 1 don't think that the service is of the slightest benefit so far ss the preservation of the fieheries is concerned.

MINISTER MARINE AND FISH-ERIES-1 beg to foform the hon. niembier for Twillingate that the Coast Warden is a different service altogether from the Game and Inland Fishertes Board. The hon. member says that he knows that the gentleman who is Coast Warden in his district does not do very much 1 think that a Elance at the reports will convince lim that this service doos good work for the amounts pulta.

MR. JENNINGS-I have not got the report.

MINISTER MARINE AND FIBH-ERIES-Thnt is not my foult. These men are, as a matter of fact, not pald enough. They are not pald half enough. You cannot expect a man who
is only getting $\$ 25$ or $\$ 80$ a year to travel around the coast very often. Five thousand follars is our whole grant for the Coast Warden service of the Colony, I must disagree with the hon. gentleman on this matter. I think that the sarvice is absolutely necessary, The hon. sentleman will remamber apeaking to me loat yoar In conhection with bonts anchoring on the spawning ground down in Fr day's Bay, I think, in spite of the fact that there was a rule which stated that boats shouta not anchor near a spawning ground. Now, these are the things that we are up asainst. If you make fishery rules to protect the fisheries, you will have to see that they are carrled out, and you wou't get anybody to do the work for nothing You must have somebody, and you must pay for the work. As to whether they do all that you expect them to do is another thing. We will suppose they don't, but then according to thelr reports they are doing something, It was only a fow days ago that I recelved an anonymous letter from Bay of Islands referrligg to breaches of the Fishery Rules by certain parfies. Our Warden was paid off last winter. when the herring fishery was over, and the Warden for thls year had not not yet been appointed. I wrote the Magistrate and asked him to empure into the matter. He made an Investtsation, Zound that the statements made to me were correct, and had the partfes before Court. Now, there is a case where, if there had been a Fishery Warden there, he would have been able to prevent any violation of the rules: and there are other cases of a slmilar nature right round the colony. But there are a number of those men who don't get enough to encourage them to do all they might. If the hon, member will call at the Department, I will be only too glad to give him \& lift of these

Warders, and an explanntion of the work which they do.

MR. JENNINGS-I might say, Mr. Chairman, that 1 was only speaking from what I had heard. I quite agree with the Minister when he says that those men are not patd enough to warrant them in giving the time and attention that they might to thile work; but to my mind, as far as the matter has come under my notice, wo might just as well have no Fiahery Warden servico at all as the one which we have. I have often thought that a very much better system would be to get some reliable man in each centre, some man who knew his duty, and pay him for the work which he did. You would then be certain that be would see that the rules were observed, and that he would report on any breaches that might come under his notice.

MINISTER MARINE AND FISH-ERIES-I can only say that if the how. member for Twillingate will give me the name of a good man-a man whom he conslders will do right and Just-in hils nelghborhood, I shall be only too slad to appoint him.

MR, COAKER-I would like to ask the Minfeter where he has the vote tor Fiahery Wardens in the Bstlmatee?
HON, MINISTER FINANCE AND CUSTuMS-You meas the Game and Iyland Fisheries?

MR. GOAKER-No, Fishery War dens.

MINISTER MARINE AND FISH. ERIES-Under the head of Fishery Protection.

MR. COAKER-I would Just like to say, in reference to this Fishery Warden matter, that I agree with Mr. Jennlngs when he says that thls is money thrown away. 1 have had conHiderable experience, and 1 feel like endorsing what he has sald You don't get value for the money whlch you spend. The men may get around their
ferthelfetions a couple of timme during the seasok. 1 remember helue an Fibery Wuriten ases far Gupdor Bay. 1 went the rsaud twices and at the end of the teswes I told the Covernmeat

Mh. COAKER-Ther onatht to havi 7. Heht at Soble tehnd after watting ao lone for ane. Thure is a great ne rocity for it The poople pate throunh the math tlekie all the yoor round. toler thrumeth the bay. Any man wit fittend to it for $\$ 2 \mathrm{em}$ a year.

MR. STONE-Mr. Chalrman, now that this mattor ts before the Committee, I wish to draw the attention of the Government to a petition that 1 presented here last year from the Inhabitants of Port Rexton. They are in grent need of the dredge down there. The people of Trinity mant ft . I trust that the Government will see to it that the dredge is sent down there.

MR. KENT-Mr, Chatrman, I wouta like to ask the Colonial Secretary if the public wharves are to be used by the constal boats only or by the pubHe generally. There is also annther matter in relation to the letter on the condition of the railway. The letter contalns some very grave statements, In connection with this. What was the ropert of the Government Engineer? The condition of the rallway as diaclosed in that report is anything but satisfactory. The whole live requires to be overhauled. I am sarpy that 1 did not bring the report this afternoon. The Government Engineer dite not report the line as belng in a satisfactory condition.

RT, HDN. PRIME SINISTERMr. Chairman, I took the matter up and had several conferences with him with the reault that he has instructions to deal with the case and sae that the contract is earried out. He has written to the Reld Nftd. Co. and sald that prosocution will be entered upon without further notice He has instructlons from the Government to ge on and do what was necessary.

DR. LLOYD-Mr. Chairman, the Minister of Finance tabled a statement which 1 hive hefore me. This statement is remarkable for Its candour, and I compiment the Mintster on IL I will read it because his cardour is expressed in words. I may say that it in a statoment tabled by the Minister in relation to the supplementary Supply for Legislation. (Hon. member reado statement.)

The only fault is that he does not tollow up those words by deedr. I find that in the estimates for next year his estimates are still short to the extent of this Supplomentary Sup. ply, and the Supplementary Supply for the current year has not yet been zshed for. I must repeat that this in remarkuble for ite candour.
Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered the matter to them referred. had passed certain resolutions, and asked leave to ost agnin.
On motion this report was recelired and adopted, and it was ordered that the Commirtee have leave to sit again.

## PRODUCTS CORPORATION RESOLUTIONS.

Pursmant to order and on motion of Ift. Hon, the Prime Minister, the House resolved itself into Committee of the Whole to consider certain Rezolutiona, in relation to an agreement entered between the Government of the Colony and the Newfoundland Producta Corporations Limited.
Mr. Speaker teft the Chalr.
Mr, Parsons took the Chair of Committee.

RT. HON. PRIME MINISTERMr. Ohairman, there is a question on the order paper in relation to this mintter nisked by the hon. member. Mr. Morine, who was not here when ft was called. 1 wish to say that there is no information.
There was a polnt ralsed yesterday by Mr. Thloyd, the member for Trintyy in relation to the Kenemou and Tennemiah Bivers. Neither of these rivers flow into the Hamilton. Both enter Into Luke Melville some miles below where the Hamilton River emptlen into the sea. Both were visitod by Governor MacGregor, and you will find references in hifs report as to the locus in quo of these rivers; but
to remove any doubt that they will be in any way reserved during the five years-these two rivers around which the property of the Company is marked red-1 propose a resolution to this effect:
RESOLVED-The undertaking by the Govermment that it will not grant to any person during the perlod of five years referred to in Section 2 of the Agreement any water powerg or water privileges within the drainage area of that part of the Hamiltou River between Lake Winicapau and the sea shall not apply so as to prevent the Government from granting or otherwise disposing of any water powers or water privileges on the Rivers Kennemlsh and KeLemou flowIng finto Lake Melville, and the expression in the Agreement "from the head of Lake Winicapau to the sea" shall mean from the head of Lake Wlutcapan to a point on sald Hamilton Piver twenty five miles below the Muslorat Falle.

As to the other point raised by the Leader of the Opposition, 1 lave made an amendment to section 20 which 1 think will be acceptadle. It reads as follows:

RESOLVED-That Section 20 of the Agreement shall read as follows: "Notwithstandlag the grant of the water powers herein all persons shall have the right to the temporary use of the said waters for the purpose of passing to and fro in boats, and for fishtngs, and for the purpose of floating logs and lumber."
MR. LLOVD-Why temporary?
RT. HON PRIME MINISTERBecause if not temporary any one person might ao there and occupy the whole place.

MR. LLOYD-May I ask the Prime Minister if anything has been done outside of granting monetary compensation for injury to water powers of others. They should be able to get from the Company the same ameunt
of energy they would develop themeelyes if their power were not taken by this Company.

RT. HON. PRIME MINISTERI have not been able to attend to that point, it is atill under consideration.

RESOLUTION 2.
MR. KENT-Mr. Chairman, I have already expressed my opinion regardIng that Resolution. I think the principle of admitting construction materfal and machitnery duty free is all risht, and probably for a limited perfod a Company coming in to establish works of this kind would be entitled to a certain perlod of exemption in this respect, but I do not think we ought to make this unlimited as regards time. I think we ought leave fature leglslators to view conditions as they extst wien a perfoc would lapse, and not tie their hands so as to render them poweriess to put any import tax upon the materfals mentioned in this Resolution. I think that a poriod of twenty years would be ample security for this Company in this respect; and it should be left to the Legislature that may then be in axipterice as to whether they would extend that time, elther in its present form as regards construction material and machinery, or whether it would estend it in some modifled form under the conditions which would then exist; for it may be that the conditions which would then exist would warrant removing the exemption altogether, Now I would move the following amendment. After the word "old" the words "shall be admitted into this Colony free of duty" shall be stricken out, and the words "imported into this Colony within twenty years of the enactment herekv. shall be admitted free of Customs duties."

The amendment being put. was lost.
MR, MORINE- 1 beg to move the following in amendment.

RESOLVED.-All lands, waters, water powers. buildings, erectlons, and
all property whatioever of the Comjiny for use in connection with the manufncture of phoaphate of ammon10, nitrite of ammonia and other fortilizers, carbide of calclum, cement. and their bye-producta, aituate at Day of Tatands or wittiln the dralnage areat of the Humber, or within the drainage area of Corner Brook, or at Labrador shall be exempt from Munielpat takation during twenty yeara-from enaetment hereof section of the Agreentent in the Schedule hereto shall be held to taclude only suich lnnds, waters, water powern, bulldings, erections and property ati are for une in eonnection with the manufacture of phosphate of ammonia, ultrate of ammonia or other fertiliceras calclum carbide, cement or their byeproducts.
The effect is to limit the time to twenty years instead of leaving it unlimited as it is at prescent.

The amendment, being bit, was last.

MR. CLIFT-1 bett to propose the following amendment:

REBOLVED-The stock, dividends debentures, debenture stock, miortangs es, atid other securttles of the Company shall he exempt from taxuifon during twenty years from the enactment hernot:

The amendment, befig put, was ioat,
MR. LLOYD-1 leng to propose the following amendment:
RESOLVED.-All phoaphate recik, pyrttes, etectrodes, sodes, and hags and packaizes for the distrthutfon of the Company's prodncts required by the Compaty for the purpotie of the manufacture of phoopaate of ammonth. nitrite of miminats or other fertil. laers, catelum carbide, pement, or their bye-products impoefed into this Colony within twenty yenrs of the enactment hereof shall be tree of eastoms duties.

The amendment. being put. wais
tont
MR. COAKER- beg to move the folliswing amenament:

RESOLVED:-All coal roquired by thin Company for the parposes in the pext preceding Elesolation meationed derpaited into Labraior within twent5 seurs of the emactment hereof ahail to free of Cubtoms duties.

The amendinent, being put, was fost.

MA. MORINE-That is the ReacTetfor which parmitis the taking of tea thousund sores of find. and there is is email amendment which 1 thinlt tory necesmary. It is to fimit the time to a poriod of twenty gears within Whitel they may take it. As it staneis Ift present they may talke it wiftin ninety-nine searn or nine hunifred and aifuety nine years. I to not thinte there 18 as rensonable objection from any: standpoint to litniting it ta twen1) yeara. Then there is a technieal alteration that 1 think the Premier will see is nesessary to enrry out the meming. It in this. At the present the then Renolution says they may talie such land belonging to or in the ponsuesion of the Grown. Now lands under timber temses are in the owneryhto of ind belonstig to the Cfown. and 1 thinle in frw would be helin to be in the porsesston of the Crown Thie would allow them to go in on lands held under timber Hearses. These licensees ouly give the right to cut timber, the ownership remains in the Crown. Vider the clanse as it is I mbmit this woulid anthorlse them to po th on lands already under tease or lleenise for the purpose of expropriating them. and of ccurse taking the timber on It. Now, I think thege two changes will be nasented to by the Govarament

Then there is a third one, and it is Dils. It is not the intention of the Government 1 preaume to allow a clause wheroby a party can come in and thee at the rata of thirty centa
an acre, land on bith stites of a water power, carrying the soll uniter the water power and preveating any body else from using it. I take it the Intention is to allow them this fand up to 10,000 acren for thelr bulldinge, telegraphis, telephones, ete, and that the point has not been considered. 1 am going to move my smendments and Iisk that they be millowed to stamit orer, so that the Premier can look into them and wee if they are not reasonable concessions on the part of the Company, and very destratle ones on the part of the Coveramont.

RT. HON. PRIME MINISTER1 hisve no objection to stantling over these or any other amendments. The points rafsed by my friend aro somewhat novel. I would point out to him that there is nothing in the seetlon compelling the Governor in Counell to make a grant. All that he has suggested can be reserved or the grant refusad. However I shall be glad to take up these sections.

MR. MORINE-With Just this quelIffcation that I think it ought not be lawtul for the Governer in Council to grant Innd under a water power for thirty cents an acro.

MR. KENT-There is one matter referred to by the Premier that I carnot agree with, that is that the Government is not bound to tasue these grants if asked for them.

RT, HON. PRIME MINISTERWhat I meant to say was that I thought there was power under the section for the Governor in Councll to make any much reservation as to pubile rights as he may think desirnble.

MR. KENT-That is an evasion of the question. I have not looked into the matter, but It think unless reserv. ed bere the Government have no right to make reservations, because once this Contract and Resolutions pass the rights of the Government and the Company can onils be found
within the four corners of this Agreement, and any limitation the Government wish to introduce with reference to these grants mukt find a place here.

MR. LLOYD-I would tike to emphasize the point raised by the Leader of the Opposition, and I would like to call the attention of the Promler to Section 9 of the Contract. The Government undertakes elearly to earry this out. In that Resolution it merely states that it shall be lawtul, but 1 would also draw hls attention to clause 1 of the Renolution, which makes clear that anything not exprossly provided for in the Resolutions and covered by a clause of the Contract shall be taken as having been resolved upon by express terms of the Resolutions.

MR. MORINE-If you have any doubt that under the Resolation the right to resarve is in the Government then add to the Resolution that the Governor in Council in kranting any land nthull have power to make resorvations for public purposes. Then agaln, it may be that it woutd be inadviaable in the public intereat to zrant any particutar land applted for, and I think that power ought be siren to the Governor in Council to reserve any perticular section of land.

RT. HON. PRIME MINISTERI may say that later on 1 shail aubnilt an additional Resolution in refard to this section, No. 3.

MR. KENT-In the resolution that I propase to substitute for the first In this lill, it is mode clear that the five millions first provided in Section it shall be an expenditure en. tirely different to the five militions provided in section is thereot. I beg to propose the following amendment:

RESOLVED. - The expenditure by the Company of the sum of fire milHion dollurs, provided In Section 18, In and about the business operations of the Company, shall mesn an expenditure at Bay Islands and or with-

In the drainage area of the Humber: and or within a radius of ten miles of the month af Corner Brook, fil and about the construction of dame. buildinge, docks and transmission lines for the business and operations of the Company in und about the mannfacture of phosphate of ammonia, nitrate of ammonin, or other fertilizers, calctum carbite, cement or thetr by-products; and the fallure to begin actual construction work or to expend such money , within the times menttoned shall alsolutuly prevent the Company from talking or bolding any rights whatsoever tunder any Section of the indenture of the sehedule hereto, and the indenture, the demise under Section 1 thereof, sid the grant under Section 1 thereot. shall be wholly void ab initio.
The difference in that is to see that the expenditure of the propesed capital is in such cases tor the purpose of the construetion of the works named under the resolution, etc, the main point being to make it for construction work.
I have understood from the Gorernment that an agroement had been made with the Company that all this should be expended on construction work and nothing cline. 1 would also suggest that the words "and opersthons" be cut out of thls agrement.
MR. MORINE-1 notice here that in one case zout plrase the enme thing in two different ways. May 1 enquire the reason why there is a dlstinction in the langunge. This may give rise to the question in the future that you intonded to dirferentlaten between the two cases. It is a proposed resolution which I think will commend ltself to everyone, that In lisu of this the words the construction of dams, buildings, doeks and transmisetion lines for" be added.
MR. KENT-1 have already stated that 1 object to make arbitration compulsory. I think a person whose property is clamaged by any Act of the

Company ousht to have the same remedy open to bim as any other perem. Instend of these parties gothis to Court if they so desire, they have only one coures open to them mider thise bill, nad that is arbitraHon, a proceeding, which entails endlese fees, a spectal tribumal, and many minor difficulties to got tho same work dione for which the Judges of the Supreme Court are paid by the Colony. Adyway, arbiltration ousht to bie mede optional. 1 think that this vioulif be an lmprovement.

MR. WORINE-I do not see how Yous ean eomplete theso mutters fhis futuranon, bectuma you are Bolug ta Drepare amendments expressive of the fcen of minting opifond eithor Court of Arbitration Tribumat asd we am nut cuite ready for this.

It wIII be nescessary to have the Judicature Act amended to glve the Judges the necessary powor to crriy oit these yrovisions, before these now tuties are imposed upon tham. The amendment which i now propose to muke deating with the matter of arbitration is taken from the Deer Latie Pulp Act, with aome improving differences, and it heals with the ruas Hon as to whether or not the arbiltrationa cuatht to be oblisatory. In cas es where the amount involved is from one to stity dollars there is the memas provided of golime before in stipenifary masietrate, as well ae the opthen of golige before the supreme Court in the ordtnary way. This ty tho ouly way that will give a poor man in equal footins. I am desirous however of seeing this stand over for further consideration and amendmont.
MR. CURRIE-I would like to axpross a layman's opinion in thla matter which fis now occupsing the stiention of the House. Not only do 1 covsider arbitration a cheaper method for everyone, but I also deem it consilierably more satiefactory. The poor man finds the preceed-

Ings in the Supreme Court sttended with too much expense, and While he has the option of an appest there, I do not think he would care to run the rislis entailed. A man can get his work performed move to his satisfaction in the majority of cases by arbitration.

MR. KENT-My idea is meroly to make it optional, The Courts ought to be open to every man. As regards matter of expense, 1 have had some. experlence in theec matters, and may say I have known arbitrations to be subjeet of more expense than any case that has been withln my exper ience in the Supreme Court.

MR. COAKER-I am surprised to hear the hon, member for Burln giving voice to these eentiments 1 should have thought that every lig. man in Newfoundand had had sutficient to do with arbitrations. Wa: the hon, member alive at the time of the telegraph award that waa given to Relos? If he was I can scarcety credit the fact that any layman could after the experience we have undergone aanction a further chance of a repetition. When we submitted thit matter under the Act of 1898 the Col ony was fleeced of a very large sam of money that never ought to have been given. In the face of this we have a man in this House givting voice to the opinion that he would rather trust his case to the consider atton of a tribunal other than the Supreme Court. I wonder if the hon. member knows that the man who was appointed by the Government of that time, Mr. Biake, himself sald that it ought not to have been more than $\$ 750,000$, and that when the matter was dectded they gave $\$ 1,580,000$. When he expressed his disapproval of this they said they would make it $\$ 2,000,000$ which they could themselves have done, and rather than permit this he was foreed to sign for
$\$ 1,580,000$ rather than see the Colony fleeced for three mitlion. Can we talk of arbitiation after this? It is a mere question of common sense. Are we boing to lay ourselves open to a repetition of this treatment. In the case of proceedings in the Court everything is mapped out, and a man If not liable to be fleeced because he ean appeal and have his caso more thoroughly examined if the is sure be is in the right. The judges are indopenifent men, and can state what they please. That is the reason that a rich Company is tinble to the same treatment as a poor man. The frict that is Company is rich is immater in1, If this Company decides all its diftlcutties by arbltration it means that we are merely gtving other people's property to Redd. It is Relid over agein. We must treat the Reids according to the way in which they have treated us in the past. In the case of the arbitration they would have fleeced us of three million it they had not been fronted with a man life Mr. Blake. 1 defy any one in this House to contradiet what. 1 have fust sald.

MR. CURRIE-Mr. Chalrman: The remarks which have fallen from the hon. member for Twillingate have no relevancy to the matter under discussion. We are not deating with Govermment arbitrations, simply with matters between private parties, and for that reason I do not agree with the suggested change. I do not think the small man should be compelled to take lifs case Into Court as this requites: he wonld probably be compelled to follow it to a still higher fribumal if the amount involved was large enough, and the additloual burden wonld drive fitm out of Court. I think that the small man would be better aatiflied with the arbitration than have it go to Court.

MR. MORINE-We seem to have been getting away from the subject
we were discussing. What I would suggest to solve the difflculty here would be that all cases involving below a certain sum to be named, should be treated in a summary manner. This would be a cheap way for the poorer man and would in my opiaion prove considerably more satiefactory. Of course he could always have the option of arbitration. An arbitration can prove expensive because the arbitrators can demand whatever remaneration they desire for themselves before they will determine their award. Thus a great deal of possible expense may arise. The award cannot be taken up untll the arbitrators are paid. And then the Supreme Court will treat the matter in an impartial manner that is parely to be found in an arbitration. Not only that, but the men who hear the case are men accustomed to deal with similar cases, and have a deep knowledge of the law. In the case of a Company like this they have sufficient money to enable them to have always a particular man to handle their arbitratiohs. He will be a man of weight, and unless the poorer man is able to pay for a man of equal standing le will have a poor chance. He probably will select a friend who might lose a good caso through utter incompetence. The men who represented conflieting rights would be too strong for him to deal with. As a matter of fact arbitrations are fast disappearing. They were originally ereated to obviate the expenses of the law Courts. It is a practise that tends to become more and more infrequent. The member for Burln may have constdered this the cheaper way of getting out of a difficulty. In my experience it is anything but the cheapest. By removing this difficulty you prevent many an injustice that may occur.
Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered
the matter to them referred, had made some progress, and asked leave to sit ngain.
On motion this report was received, and adopted, and it was ordered that the Committee have leave to sit again.
The remaining Orders of the Day were deferred.

## WAYS AND MEANS.

Hon, Minister of Finance and Customs gave notlce that he wonld on Welnesday next move the House into Committee of the Whole on Ways and Means.

It was moved and seconded that when the House rises it adjourn until Monday next. May 17 th, at three of the clock in the afternoon.

The House then adjourned accordingly.

MONDAY, May 17 th, 1915.
The House met at three of the clock in the afternoon, pursuant to adjournment.

## PETITIONS.

Ma, STONE- I beg leave, Mr, Speaker, to present a petition from the inhabitants of Catalina, Little Catalina and Melrose, asking that dogs be done away with. 1 ask that thls be referred to the department to which it relates.

Mr, Abbott gave Notice of Question. SUPPLY RESOLUTIONS.
The Chairman from the Committee of the Whole on Supply reported a Resolution which was read a first time as follows:

Supplemental Supply,- $\$ 167,620,97$.
The sald Resolution being read a second time, it was moved that the House concur with the Committee therein, and the sald Resolution was agreed to.
PRODUCIS CORPORATION RE SOLUTIONS.
Pursuant to order and on motion of Rt. Hon. the Prime Minister, the House resolved Itself into Committee
of the Whale to conslder certain Resolutions, in relation to an agreement entered into by the Goveramont of the Colony, with the Newioundland Products Corporation, Filmited.
Mr. Speaker loft the Chair.
Mr. Parions took the Chair of Committee.

RT HON. PRIME MINISTERMr. Clairman: When we were in Commiltee on these Resolutions the last day, there were certafn amendments misgested by my hon. friends on the other side. One was by Mr, Morine, in rolation to arbitration, and one by the hon. the Leader of thin Opposition, in relation to reserving the risht of elther party to go to Court. Both of these lave been acceptef, so that the section will reat in this way: "Resolved:- Where in the Agreement provision is made for the holding of arhitmtions under Section ह5 of the Crown Lands Act, the followins procedure is substituted in Heu thereof. Thare whall be three arbitritore, one appolated by each of the contesting parties and one by the Eupreme Court consisting of not less than two Judgeg. The application to the Suprame Court for the appointment of an arbitrator may be made by elther contesting party, upon motion, after four đtays' nottce thereot has been duly served upon the other party."
There was another amendment proposed by the hom. the Leader of the Opposition in rolation to the expenditare of 预,000,000. That is agreed to. No change la made down to the third last line. After "transportation" add "Power housen, rullways and plant": then you strike out the words in that third line "business and operations," Then there is an amendment progosed by Mr. Morine, No. 7: limiting the grant to within twenty yenra. That ts agreed to atso.

MR. HALFYARD-Mr. Chairman: If the matter now before the chnir only affected me pergonally. I may bo

Inelineil to silfently allow the measure to be discussed. But as 1 consider the Bal we are asked to ratity as the most important that ever come betore oat Legislatare, 1 heve a duty to parform to thio peaplo from the section of the comitry who sent me here to represtant them,

The contract is of the gravest im. portance for the future weal or woe of thil country, and demerves the most serions and eareful consiferation. In discussing this measure all perty feelings should be put asido. White the personnel of the partien Who are abltue may not be of the flrst or any vital importence; yet we cannot rid our minds of the fact that the parties who now have control of such vast areas of this counitry are also the directors of the Company who are seelting such vist concessions, which If grantad, will give them control of the kreatest and we may say the only naset of any value the Colony has left.

Will it be to the intereste of thim country to make this mighty corporntion atil1 more powerful without any reservations or limitations whatever? TVe are crenting a monopoly, tho value \#nd tufluenee of which is so great thint it is difficult to find a parallel to the old or now world.

In this enifghtened rige of the Twentieth Centary, among the most ndranced nations and colonies, the otheot is for the State to feep conthot of lis matural resources. We are dolng the exact oppoalte by legislatthe away everything that is of any taine to the future development of the country, and for what? For nothingis excopt the hope that is held forth it will sive employment to some of our people.

Is the return tor such vast conciantions in any way commensurate With the sacrifice we are asked to maike? Are we to mortasase the future of the country for a shadow or an frnagenation? simply tor the sweat and
labor of our people to further enrich a corporation, which is obsessed with the enormity of the wealth they have already wrung from the taxpsyers of thls colany, by way of building railways and infamous awards from ariftration courts, as a result of the blunders of past governments.

Are we in making thls eontract to repeat the mistakes of the past? Are we never to learn from bitter experience that awful consequences may follow from an til-conaidered or badly drafted document?

A burnt child dreads the fire surely we should have the sense, or instincta of children, if not, that of hardhendod politicianis, statemen or business men. We should not be lured to the glving away of the tieritage of future generattons by the fantastle $\quad$ glttering of the word employment, at this one of the darkest hours in the hifatory of the country. In 1898, siveenteen years ago, the condition o? the country then was taken as an excuse for malding a contract with the Mensre. Retd. is it too much to say that the deplorabte financlal condition of the country has been taken advantage of to malte a bargain with thia Leptelature, which surpasses Shylock and his pound of flesh.

We know from expertence that so nmendment or change can ever be mado in this contract after it le once ratified by the House, without the proverblal poand of flesh being enacted to the infinitesimal part of an ounce. Shouta we then unthinktosly rush headlong into an undertaking and seal forover every possibility this country lins in the untold wealth of its water powers, without any reservations whatever?
It may so lappen that not in the very distant future our water powers may become so vatuabte that a rental could be obtnined, which would bring an annual reveaue to the country of a million dollars. if stich should
come to pass, coming generations will curse the men who were so stupid as, to sell their birthright for a miese of pottogo.

The resolutions as brought down to this House remind one of the great Athenian lawgiver, Solon. It is sald of Solon, "that he was obacure and ambiguous in the wording of hile laiss, on purpose to increase the honour of his courts, for sfince their difference could not be adjusted by the letter, they would have to bring all their cases to the judges. who thus were in a manner masters of the laws."
The parties who drafted this documient must be true diselples of Solon, for it is it most ambiguous document, and even to the ordtuary layman of the most limited intelligence it cannot fail to provoke the statement that the men who drafted these resolutions were elther knaves or fools. If knnves, it was designedly written with the idea to grab everything, but if it mot with any determined opposition, they would pretend to grant some concessions or make modiftentions that the members of the Logislature milut imasine they were giving something bick, and yet retain everything that was desired.
If it was foolishly or fenorantly drawn, and it the leaders of the Government had anything to do with it, we are indeed to he pltied to have Bueh man purporting to be lawyers Hnd statesmen at the head of affaira fin thls poor old contract eursed Colony: The resolutions as amended, find brought down to us by the Government, are in my opinion adding treult to injury, Are we over to be regarted as a party of men who live only for the present moment and anything which holds out the probability of giving employment for the time beIng at the expense of tomorrow or the next day is sood enougls. Thls is not good enough for me, and it
should not be good enough for any man who has the honour to sit in this Legislature.

We are building not for the day but for all time. It is selfish, unwise unpatriotic, and is only the actions of weaklings and fools to be enamoured of the prismatic colours of the Iloatteg bubble or the beautiful rainbow, which is an evidence of sunshine aud ghower, for to have the pleaslng phenomenon we must have not only the sunshine but the cloud and the rain aa well. That which we aro asked to witnegs now only exhibits the rainbow side, but we must as ratlonal befiggs look for the cloud and the shower which are causing this pleasung presentation of all the good that the passing of this contract will bring us.

We find behind the sereen the greedy, grasping hand of a carporation, that is seeking to monopolize the future development of this country and to bind hand and foot as fav fis they are concerned the future leglslators of this Colony, The possibillties of electricity are beyond our imagination, when we consider that it is only twenty-five years since tht transmission by wireless was first developed. Its miraculous nowers are beyond our comprehension, still it is only in ita infancy, and what will come within the reaim of its operations during the next twenty-five years may be still more wonderful.

In the Hudson River a lighly successful experiment in the propelling of boats by wireless, has become an accomplished fact. A fifty-foot boat is driven up and down the river by a wireless station at a distance of half a mile from the river. The boat is made to travel th any desired direction.

It is only reasonable to suppose from the marvellous accomplishment of recent times that in the not dis. tant future, that all the river boats will derive their propeling power
from some mighty power station many miles away, We havo water powor enough to give power, heat, and Heght to the whole Colony.

Supposing at the end of fifty years from the passing of the 1898 contract, when the rallway will revert back to this country that our railway could be cheaply and efficiently operated by electric motor power. What an thestimable hoon it would be to the people of this country if they possessed these water powers that we are now giving away.

In thirty-three years from now, according to contract, we shall have to take over the railway with all its rolling stock at a fair valuation to be pafd' the Reid Nrld. Company for the game. Supposing that locomotion by steam at that time will be obsolete, the rolling stock wilt be practically worthless, and the possession of our water powers would then be worth militions to the country, if for nothing else only to operate our railway. We should not raltroad these resolutions through the legislature blindly. The hol members of the Government should gravely consider what the pass. ing of this contract may mean to themselves, their children, and their children's children.

A Bill was introduced in the Nova Scotla Parllament to incorporate a 12 million dollar company. The Halifax Tramway Company, because they had contrel of the Fall at Gaspereau river, seventy milles from Hallfax, which at the utmost would only develop 10,000 horee power, the engineer would not guarantee any more than 5,000 horsepower. If that water power was worth twelve million dollars at that distance what are our million and a hale horse power worth to this country, when 1 h.p. develops 3-4 kilowatt, and we have to pay the Reld Nfla. Co. 15 cents per kilowatt for electric Hight,

I have endeavoured as briefly as
posaible, to give my rensons for placing myenif on record as being opposed to this eontract, as brought down to thls House, and if the Government is determined to put the matter through. all the talk and recommendations from thls side of the House will be of no avall. In thls matter the Governiment ts acting according to its mad policy of providing for the pret ant only. Their policy is "let the dead trury 'iss dead." Live for the present, let future sencrations provido for thomiselves, forgetting that they are pting up lithimites and otstacles that will make it imposaible for people to five in this country.

MR. MOULTON-Mr. Chalrman, 1 wish to say fust a fem worde in connection with this matter. I have liftened for a while to the different epeakers on both sides of the Houso and among them there wore nome able speaches. 1 give the opposiliain members credit for their effort and I beHove that every honourable gontleman on that side, spoke in aarnest and in the interesta of the country. The lant Bpeaker brought in about the Raffway contract. I must say that from the beginning I was alwaya in favour of it. When the 1898 Contract passed, the hom, mamber for Bonavista sent me a copy of it. I thought that that was the best thing thut ever happened to Nowfonadhad. The Company lost in the operation of the railway for soveral years-from $\$ 290,000$ to $\$ 240,000$ every year, but they cartled It through as lor ae they could. If think that they deserve great credil. Then about the Harmaworth deal. At that time 1 had the pleasure of sitting on the Opposition side, when I fought in favour of the twenty-two amendments proposed by Mr. Morime. I bellevo that evary man on that side feels that he ls doing right in opposing this bill. I believe that they feel in their hearts thet this bill witl हo through. We liave heard is groat
deal about the injury that it is goling to do to other parties. We have here before us pratests of the Pean-Newfoundland Company that own land situate on the South slide of Grand Lake and the limit, in the vielnity of Hinde Lake; both of these lota of land are not less than five hundred teet above the waters of Grand Lake. We liave also before us, proteat from the West Coast Pulp \& Lamber Comgany that own lands at Sandy Lake. Sanily Lake is 270 ft . above the sea lovel, or 255 ft , above Deer Lake. We tinve alse it protest from the Grent Northern Development Company awnors of one huntred square miles attuated at different places around Grand Liake. 1 may say that Grand Lake tiself is 240 ft . above Deer Lake. A Elanee at the Geolegical map of Newfoundland will convince one that any operatione on Deer Lake and on Junction Brook no matter how great the dam will be, or how long it may be, will in no way tatertare with the above mentioned properties. If a dam is required at Grand Lake, the only parties to be interferod with would be The Great Northern Developmeat Company, and a dam of 20 ft , high, right at the railway bridge at tha outlet of Junction Brook, would not, damase the Great Northern people's land to any extent-not more than $\$ 1,000$. Thise who know Grand Lake und have travelled it, can certify that in going lack from the shore of the lake one hundred yards at the lowest placelis, they will get a rise of ground of not less than thirty teet. The Went Canst Pulp \& Lumber Co, have some more Himits in Bay St George, which is more than fifty miles from where the Products Co, will be operating, and as they have no water power on their Iimitn this Company would in no way fiterfere with them. We then take the Packer. Harrisan, O'Connor, Sherwood and Begent limits nituated between Bay of latands and Bay St.

George all west of Cooke's Brook. These timits held by the above gentlamen mantioned cannot in any way be interfered with by the Products Co., no matter how many dams or mille they may build at Bay of lasands, Deer Lake or Grund Laks; and an 1 aald hefore, on the Packer. Harriann, O'Comor, Sherwood and Begent Limith, there are no watar powers, merely rivers for driving purposes, that is for the driving of loss. St. George's Lake which is situnted midway between Ray of Irlands and Bay St. George, is only aixty-tour ft. above nea level, and the rlver from SL Cleorge's Lake emptylng Into Bay St. George has no fall on it. The Serpentine Pulp and Lumber Co. laa limits contalnisg thirty-five miles at Sprace Brook and the sea-coast south of Bay of Islands, a distance of about fifteen to twenty milles. The timber will be shlpped from the sea-coast and cannot is any way be interfered with by the Products Co. They have no water power on their limits that would be of benefit to any body, St. George's Lumber Co. that has Limits on Flat Hay Brook, Bay St. Georze, Is not less than eixty miles from Corner Brook, Bay of Iminnds. They have no water powere on their limita, and no tund that would be of any special benefit to the Products Co. The above statements are actual fuctis and obtained from the best sarveys and maps obtainable in this country, and I challenge contradiction from any mem. hen of this House. 1 may ald, however, that Deer Lalce is fifteon teet ahove dea-lerel, and the drainitur and raluing of Deer Lake in summer time of ten feet, wroula not domiso in my oplinion, and the oplaion of those conlpretent to Juilge, property lueld there by different people to any extent. I do niot think any sentleman in this Houne can contradict the ficures that I liave glveth. Thls will be a great benefit to the country. Mr. Halfyari
talked about the electric tramway: in Falifax. The people objected to hav. lig a company opernting them. Thes wanted to to it themselves. Would the people of Fialifax constider that it would be a great benefit if they could rua the whole railway themselves? I am pleased to see the Op position firhiing this matter however, thil it meand that we will have the whole thing thoroughly threahed out and arrive at a satisfactory bill.

MR. KENT-Mr. Chairman, the lands granted to the Reid-Newloundland Co., carry no more than the satural flow of water over the land. We do not cive the rigits to water jowers thomsolven. They are mally getting a good price for thatr water bowers. A grant of land does not give any such rights. We are reaily Eiving the most vatuable right that it if possible to acyuire

MR. MORINE-1 beE to propose the following amendment to Sectlon 20:-

REROLVED-It shall be lawful for the Governor-lu-Council at any time vithis tweety yoare from the enactment hersof to grant to the Company any lands belonglag to and in posnession of the Crown and not under taase or Hoenieg, which may be raquired as incldent to floware rizhts or fights of way, for telegraphs, teleHones, power transmiesion lines, miflways, tramways, coads or sites for mille, works, factorics, or warehousen, of $s 0$ much of the seashore or foreshore and of the public watere and Innd thereunder an may be reguired for wharves, dockis, quags, piers, ware bouses anil other bulldings for the furponea aforesaid or ahlppiag facllffies in connaction with the Company's cperations and withla a distance of fifts ralles therefrom but the cuanti. ty of land so granted shall not exceed in the whole ten thonsand acres and stail not include any land under a
stream or river where a water power can be created.

The amendment, being put, was lost.

MR. MORINE-I bog to move an additional clanse re water powers which explains itself. The Company is given a lease tor 99 years of cortain water powers, it may use part of the power and refuse to develop the rest. This section gives the Governor in Conncll power on the report of the Government Engineer to compel the Company to develop these powers to their full extent. This is from the Ontario Act, and if it is nocessary there I submit it is necessary here also. Here we give them practleally a perpetual lense over certaln water powers without requiring that they shall develop these powers, We should be in a position to kay to the Company: "You must develop these powers or give them up. You cannot be a dos-fn-the-manger."

RESOLVED-The Company shall develop and utilize the water powers hereby demised by the construction of necessary works and the Installation of suitable and necessary plant and machinery for the production of some form of power to the oxtent whlch such powers are rensomably capable of physically, and shall use the power so developed in the operation of machinery or some other commerolal. mechanical, or Industrlal purpose. or the said power so developed or any part thereof shall not be reguired for such purposes by the Company it shall furnish power to any person, company or corporation reguiring the same power up to the amount of power which the said water powers are reasonably capable of developing, or such lesser quantity as shall be actually required or in demand. Upon repert being made by the Government IVigineer to the Governor-in-Councll that the water powers nforesaid have not becn developed and ptilized to the
full extent of which they are physicalIy capable by the works constructed or the plant and machinery installed by the Company, and that there is a boma fide domand for power in oxcess of the quantity of power developed and utllized by the said Company which might in whole or in part be supplied from the water powera aforogadd, then the Governor-in-Councll may by Order-ln-Council require the sald Company to dovelop and render ayailnble for ase the additional quantity of power so shown to be undeveloped and cupable of develomment or any part thereof, by the construction of the neceasary worlss and the installation of suitable and necessary plant and machinery within a period of time to be named in the said Order, and in default of complinnce with the gaid requirement the Gpvernor-fn-Council may order and direct that the lense and Erants hereunder or any of them sliall be forfeited and cancelled, and the same shall be forfeited and cancelled accordingly.

The amendment, being put, was lost.

MR. LLOYD-I beg to move a Resolution re the renewal of the demise beyond a period of ninety-nine years.

RESOLVED-Notwithstanding any-- thing contalied in the indenture appended the Company shall have no right of renewal of this demise whea the term explres at the end of 99 years from this perlod.

The amendment. being put. was lost

MR. MORINE-I beg to propose the following amendment:

RESOLVED-The expenditure by the Company of the sum of five mfllion dollars, provided in Seetion 18, In and about the business and operations of the Company, shall mean an expenditure at Bay of Lslands and or within the dralnage area of the Humber: and or within the drainage aran of Cornor Brook; and or within A rad.
fias of tea miles of the mouth of Corner Broolt, in and abut the construction of dams, butldings, docks and transmission lines for the business and operatlons of the Company in aad about the maniafmeture of phomplate of ammonta, niftrate of ammontia, or other fertilizers, calcium carbide. cement, or their by-products; and the failure to biegth actual construction work or to expend such money within the times mentioned shall absolutely prevent the Company from taking or holding any rights whatsoevar under any Section of the Indenture fo the schedule hereto, the indentare and the demise under Section 1 thereak. and grant under Section 5 sliall be wholly void ab initlo.
The word "begin" in the sald secthon shall mean the expenditure in constriction of not tess than one hondred thousand collars within two years from the enactment hereof, and not less than flve hundred thomand doltars shall be expended in the work of construction each year for two years thercafter.
The amendment, befng put, was lost.
MR. MORINE.-I beg to propose the rollowing aiciendment:

RESOLVED-The expenditure by the Company of five million dollare provided in Sectlon 2 of the agree ment shall be an expenditure in addl don to the expenditure of five million dollars provided in Section 18 thereof, and the firat named sum of five million tollars stall be expended In Nowfoundtand fo and about the conutruetion of damis, buildings, cooks and tranamiablon lines for the bustniess and everations of the Company for and abous the manufacture of phosphate of amimonla, zitrate of am. morim or other fortlizers, calcium carbide cement, or their by-products: and the expenditure of ten million dollara provided to be made in the construetion and operation of the

Company's plant on Labrador shall mean an expenditure for the construction of dams, buitlitige, docke and transmission lines for the Company In and about the manufacture of phosphate of ammonia, nitrate of ammonfin, or other fertitizers, catchum carblde, cement. or thelr by-products.
The amendment, being put, was lost.

MR. MORINE-I beg to propose the the following resolution:

RESOLVED-Uniess the Company shall by the lat January, 1917, have a mubsoribed capltal of not tess than five million dollars, of which not leas than one million has been paid up in cush. and shall prove the same to the catiafaction of the Governor-in-Counell, which satisfaction shall be slgnifled by a minute of Council, all rights, privileges and powers granted to or conferred upon the Company hereby shall cease and determine, and any lesse and grant hereunder shall become rold.

The amendment, beling put, was lost.

MR. KENT-I beg to propose the following amendments in conncetion with Section 4, as regards tuxntion on stoek dividenden and securltes of the Company.
RESOLVED-All construction material and machinery for the Company's mills, factorles and works for the purpose of the manufacture of phosphate of ammonia, nitrate of amtronla, and other fertilizers, carbldo of calclum, cement and thetr by-products both for original installation and further extension, but not in aubstitution for old, tmported into this Colony withlo tweaty years of the eat netment liereof shall be admitted free of customs duties.

RESOLVFD-All lands, waters, wafer powers, builaings, erections, and ill property whatsoever of the Company for use in connection with tho fanutacture of phosphate of ammon.

It. nitrate of atumonila, and other fertiltiers earlide of celelum, cement, or thinif by-produets, stinute at Dar of trifinis, or withtri the dratramer ur: ea of the Humilier, or withis the draisagn srea of Corner tirmoke or within a raflus of ten sulles from the mosth if Carnar troot, of at tatiritof. shall he exnmat trome foumielpat taxsthen dariae twenty yedra from the enactmeat hursot. Bertion of of the Amememt in then whectute tirruts ithit be leld to laclaile onily apoh inadn, waters, katur powers buldines esections and proprrty as are for man In comenction with the minnterture of zlimplate of amanakia, extarst or their iof-prodects, situate as last menthenes.
megerviwh The stock, atritiente. debeatures debestare stock: mornraces and ether secwatities of the Cempany chall in etempt trom trin timn, durity twenty yeats from the enactanent hareat.

REAOLVEID-All phomphate rock, porthes itictrotes wols, and hass mist prackiges for ctisterbation of the Conapang's products reguined ly the Compasy for the purpese of the manunseture of pherphate of emoment., is trate of ammanis, or ocher fertilisers. calcfurn carblite, exment or their by produets imported lieto this Colony willis isenty yeare of the enevemen. bereot shall be tree of exatoma dut|ex.
ENSOLVED-All keal required by the Company for the purposen in the सint preceding remeluthon mentineed faportad late Labrsdoe whalis twesty Jears of the emactment herrout ahall be free of cuatome dutien.
 Jont.

MR. MORINE-I BES to propose the followitus amendment:

HESOLVED -Nothing contained heretn, or th the nehedule of thite act, shatt take from the pubtie or any
nember thereof any right now existfie ly ther or eastom to firk, shoot, Gunt und trap. or, of navieating atreamis, riyers and lakes, and to zuintalie thereme for use in such noktrutton any kind of ressel or boat.

This amendment, belies put, was iont.

Mr, KENT-1 hig to propene the tothowiar amentment:

REsHoLvKD-The exemption from tration upon the stoeks. diridends. eitenturrs efebenture stork mortearon or ather arcarltice shall apply only to such as are bons filde required for Bhe purpese of or retate to or are depired trom the mortar, boalnrms, or sperations of the Compeay in relaFon to the mimutacture of pherplate $\mathrm{n}^{0}$ emmente, stirate of ammorls and ather fortiliser, cartile of celolum, ormest and thelr by products.

 thom that princtple It the merve object I sot ho cwer-ride the patent hav but Eieredy to male the tern twenty-one Tiark, gen 1 ane gulte willing to necole $\mathrm{to}=$ flemolation settine that fork But 1 am not preparnd to let thie prevert Resolution ko without pomif protont to juitify mignott and
this Honse in dealing with this matter, and I woald press upon the Gorernment to find out exactly what the meantug of this clause is and to net before us something clear and definite I may point out that nelther the Fremter nor any member of the Government lise said one word in defence of this elause. It has been absolutely ggnored. Even the object of it has not been mentioned it any speech from the other slde.

RT. HON PRIME MINISTER${ }^{1}$ think 1 explatned to the hon, member tefore when he ralsed the polat. It is quite true that I did not reter to it fn my original remarkes, because there did not appear to be any need to refer to that particular clanse.

MR. LLOYD-I reeollect that the hom. gentteman sati lie knew nothing about It.

RT, HON, PRIME MINISTERThe position I took was the position I took this afternoon, that it is simply for the purpose of confirming patente fastied by the Governor in Counefl, namely:
No. 184 dated April 21st, 1914, for manufacturing Phosphoric Acid and Phosphates, and No. 189 dated May 16th, 1914, for it method of making nltrogen compounds, and No. 190 dated May 18th, 1914, for Phesphorie Aeld Products, and No. 193 dated July 25 th, 1014, for methnd of producing Nitrogen and Compounds, and No 196 dated Aug. 22nd 1914, for method of manufacturlug ammoniated double super-phosphate, and which patenta have been mranted to Jesse Critz King and by $\mathrm{E} \cdot \mathrm{m}$ asalgned.
I think the whole point nov resolves Itself down to a question of fact, whether they have been nestgned or not. I hive been fiformed that they have been regularly assi, ned. When the rgreement was first under consideratioa a year ago, that matter was under consideration and rhaht up
through the various discusstons, Then there were other patents applled for whith 1 was fnformed wan treluded in the asslgnment.

MR. LLOYD-I think wo are entitled to know whether the Government as a party to this arrangement Intends that thle patent shall be made valld, although at present it may be invalid.
RT. HON. PRIME MINISTERCertainly not 1 go further and say this Remolution does not make valld anything that is invalid.

MR. LLOYD - If that is so we have got to do something. It is not the inteation of the Government to make valid nomething which but for this might be aet aside in the Court. I hope now that the Government will reconsider this matter, and not enact something which may give a black eye to the whole project; and the Company ahould consider from their side whetber they are prepared to go fito the London market or the New York market and say we have abtalned the passage of a law making our patents valld, even though they bave been obtained froma a thide.

MR. MORINE-This is "the nigger in the wood pile" of the whole contract. I think to give these people a monopoly would be a most improper act. This practienlly gives this paper company a mosopoly for twenty-ote years. Surely it is not necessary to the making of fertiliser to hand orer to these people a monopoly without any kind of reason or fustification. Prohably In time to come when we come to unflerstand the meaning of thene various sections we will realize shd regrot that we gave away by aet of Parllament righta that we have no Pheht in the world to deal with. Why In the name of Heaven should we rush into this contract withoat regard to prilinary buainess ways? Why give these patents untll we see each as. sifument? The Government is sitting
down and dota nat ask for the amalimments, It is not evek eonaldertas the force of what it in dolug bare, in fart 1 du not think that it reatly underItinidis the meanins. Decauant it what the Premter dembe with ts alt itiey lanow. then then objeect of thin aection wepuld be veriectly aseless. whiteh it maniTentby to not.

MR. KENT-Mr. Chairman: 1 to not see the ohject of thls seetton ,unteris it in to sfie momethtur that the primefpal Aet dons aot rive. If it gives nabettifag that the prifuctroit atet foeer bot give thien it ousht to be explatued, and the Government oaphit to be in a position to put that informantion thation the Horme if the asatginient Itisilf of Jesise Critz icine is a fiulty itter an it goes to tha Cotrpany, why ahould we legalise itt it it is a cood
 thin section, unless it is coseraltigs tomething of which wn have no explanation. That is the oniy faterpretathom thist cati tee phit on IL Thai can lee the oaly interpretation that can he put upes our passing that elumse Wiliont noelas the ansignment and somerime the ribtt of titrit partlen, that there is momething conectaled. Partien may have equitable rigite agninat the Pateatoe himeelf: partien that to not even kwow up to this firit font that such a comtract in it ous templation; parilen who lave elutrme, legal or equitable, amainst the asafeument of the s-l-st, If thurce is fa askigment, and if Berte is an ascienment what oljeat nen the flompary have to not prodachig for the Covernmant kuch ensienmetri Why but produce the aselemment and pout It on the talle of the Hewse? liet them evali any where the assignument. la. This ciamse ought not to mo through. and no ous wim any sense of what is rubht can let that elamse so throuch without conserring the legal and equitable rights of thatrd perties. If
within these yeare a person clalmn that Mr. King had wo fight whatever to that patont, and $=8$ are aware that thers ure cans where the right to a Quteat has been contested, and erery Diwjur in St Jolae's linowes that no year pazses by that be has not got to adrlee uipon the question of faulty filiey ta patenis. If this clanas goes throurth we are passing it without Moentry what rights we are excluding. We oaght to necure treme pooplo even if whe did confirm the patenth. We oughit to mecure people who have rishis againit the patent. There is only one object that I can see than thie clanee can have, and that is that the faw ibs at present it etander in Newfoundtund, roquires the ownety of petunts to bring them fato opernilon sithle two years, I would, if nocusEry. extend that titie for the bringthif of these patents fito operatfor. bui I cannot far the life of mee see Fliat abjent there is for this clause vilume it is to do array wits the rtghts of some third imnocent porties. 1 atpilt that it woold only be fair to extand the right to bring it into operaflus tor five or meven yeara.

MA. LLOVO-I am surite prepared that there should be some amendment that their rishts should not cease if thoy do not bring thelr patenta finto operration in five years say; but I do pot thirk we ought to pasa thin neotion iunlens there is some reanon for H.

AT. HON. PRIME MINISTERCtme of the amenilmetts that has been sugreuted conicerthe the conservitg Ithe flowuib at water where any fourer rould be awpilled, and I lave ailmitted thint matter, and have had of cermple of the romofations printed, malch 1 will table tomorrow, I musRout that that runtter stand over till then.
MR_ COAKER-3tr. Chairman, I
propone the following amondmeat:
"Except as herelnafter provided no male person shall be employed by the Company at a lower rate of pay than twenty cents per hour, provided that this shall not apply to those persons boarded and lodged by the Company while In their employ."

That means that for all purposes except those mentloned, the Company shall pay twenty cents per hour, that is the lowest wage that the Company shall engage anyone to work at. In view of what we have heard from the Premier in presenting this matter to the House-in view of his statements as to the labour of this Company, to the great benefits that would accrue to seven hundred or a thousand men I think that the least that the Company can afford to pay for tabour is twenty centis an hour or $\$ 600$ a year for any man who works. Unless they can pay this wage I spe no good that can come to the labouring people. We are told thiat there is koing to be a great deal of omployment for the fishermen I hope there will be, if the fishermen require it, but 1 cannot see what good is kolay to come if they do not pay at least $\$ 2.00$ a day. If we cannot get that from this tremendous business, it is no good as far as the Colony's workmen are concerned. There is no tishernen going to leave his home where he is established at the fiahery and so to Bay of Islands for $\$ 1.40$ or $\$ 1.60$ per day. The only people that I can see it is going to benefit are those men who have not done well at the fishery, and who wish to put in three or four months at that kind of employ. ment. This Company will employ a great number of people at logetng. That will be a great benefit to the fishery elass For all other labourers they should be pald not less than twenty cents an hour, and unless a concern of this lind can pay that it is of no value whatever to the work:

Inis people of the Isiand, and I hope twat the Governinent hefore they pass these resolutions will take the rate c) pay into consideration, and arrange with the Company that they shall fitro thin rate of wage if they do that they will be helpling the labourers of the country:

MT. HON. PRIME MINISTERMr. Chairman: The first objection that I have to the proposal made by the hon. member is that at the outtco it will moan that the men will It the 60 a day, because these men [11 work ouly eight hours a day. To pit in tearefore of wago ench as that ie it mintake. Wo mast assume that this Combany; is actuated by the filituent motives. If we look at the fectir we will find that in 1890 when we made a contract to build the road to Port aux Basques we stipulated on felienty cents a day for labourers fild they got ninety cents, and in the nost contract we put a diollar as a minimum wage, and there were very fenv who ware not pald more. Then when we vere giving the last contract the rate of wage was $\$ 1.50$; that meant that no one could bo paid a less figure than what we stipulated, but in flume caser we were giving a contract to a man for a public work. In this easo we are not doing that, and if the stipulations in this contract are not canifed out we get hack all the rights that we have glven, It is my hope and belief that when these people begin the rate of pay will not be $\$ 1.60$, but $\$ 2.00$ and $\$ 2.50$, because I feel that they will not bo able to get the people to work for less, and if they caunot keep up with the rate of wages pald by other comparles then the men will not stay with them. The rate of wages is to a very large extent dependent upon the law of supply and demnat, and the starting of this company in the Island will increase the price of labour consiferably. If you pot in a rate of twenty
cents per hour you are tellity the eompany what joe thrak to a geed mate of wngn-what is a sood stand. ard-that 1 think ion mistake 1 thank it is a milatake farthermers became thate to no mecteasty for is They will not be abite to get anjomen to work for lises than kian per day, and it miteti have a vers injorices eftect npua their obtataing moner in ise forvien market if you put in all these restrictieser and corenath.
MR. COAKER-Mr. Chinlrman: Just one word if reply, 1 think that twentr cetate an hour shomid be pluned in the Dill. Every man will work twelve hourn in fry in the nummar, more partiouthrty oin the coisstruetion sork. We have itwe at thise yeare to so le fore they spend this sw.000.000, and if
 minhmum vage we will look after them after the cenatractiot work is ovar, and it necessary, mee they get twenty firt or thifty centi
RT, MON. PRIME MINIGTERIn that case 1 thithk it wopld the safo to leave the whole thleig to you whe out any attpulations in the bill.
MR. COAKER-Well let uis make the limit 52.00 a day as a smallent arnount. Lat them give stipe a fay if you the. If to got belleve in the Premior's stalement. If you do not helleve in may ausuestlon, then let ni mee that ther ent at least $\$ 2.00$ a day, I do not \#\#tel to tmake truekte fort the cm pasy, hei 1 want to aee them stre a wase that will let the ishourine thatl then To-Any they fan give a man lenk then 4820 , when $=0$ tet in the prele enstract that her was to pay 31.50, the

## PACKING COMPANY RESOLUTIONS

Purnuant to erder and an motion of RL. Hop. the Prime Minister, the Hoise resolved itseit into Committee of the Whale to consider "certain Renolations contirming af Akreemeat between the Govarnment of the Colony and the Nesfoundland-American Parling Comipany, Incorporated"

Mr. Spenker lett the Chatr.
Atr. Parsons took the Chatr of Comp mittee.
rt. hon. Prime ministerMr. Chitrman: When these resolythene ewre betore the Ilaum nome one or two changes were made. We have bud the whole thing reprinted. ent I that the polete have heen made quite clear.

MR. COAKER-3tr. Chairman: When this matter sus before the House wo had two very excellent speveles on them, one from the Mitrfiter of Marine and Fisheries, and the other from the Mininter of Finance These brought the attention of the Howse to the matter brought up here by ue lant sear, namely. the ball geention. Thero sbould bo balt depats erected. This bill peorides that thare thall be three places for startius that. Bati in onty meationed in the last ctasas: and there but to prohiftit its expart, 1 premume thrre $=11$ the arraaromets made to have falt depots autablished. There are grent renulta awating the opening of noels depots.
HT. HON. PRIME MINISTER1 think that the Company when they are ence started, wenld do this to their own interests.
MR. COAKER-That to not enongh.

We wast to be aure of it. What the surn is the Coluny golng to ket for this uxpenditure of $\$ 255.066$ per yeart What lemefit is this sotns so bet if by dolne thle we also provide frest belt depats to supply to bankers and store fishermen, we would be dolng seme good. Now you take sas ane whld you are golne to luyest. Sup. pone you ralue a loan for that am: ount. You can livest if in a better wiy than this. Suppose you inveet this In 200 balt depots. You can do thils, and still have some $\$ 200$ left to openate them, and get them started. If each of theme gnt 100 gitis of fish, we would have 20,000 quintals, and this at it per stL would mean $\$ 140,005$ revenien Thise the extablishment of thees dopotes weatid mean an atetrione to the revesuin of 8140.000 . Therefore If we spend thise mooes on bait do pets ve would hare an addition to An tevenute of this \$100.000. Now Tru sme golac to spend siseme; on What? On secturing 85.000 or th6.000 revenue on the Cape Share: 1 certats1y eatinot usree to such a mroponal ha this, lat un first get the Rish, and then get cold atoraze for it. 1 do hope the Gevernment =ill down sach a proposition. There is anothar thing 1 object to th this Coatract, and that Is that it is conifined to thla one Company. If sou are zofnk to make It in oppoaltion as it is to the outports. thes malie it zeneml in its appliteathen: sive every other compung the saime eption. Why give this Company any spectal tavour? Why not let any ecmpary: a local company, arnct stathons at the same ratee? Many mould acoept the proposition. What 1 would recommend is to pass a bill guaranteeting every compary earrying on such a buatioss a dividend of 5 per cent. for 15 -yeare.

1. belleve gitr, that the guestion of a bait supply for our fisherien is a quention just me important an the

Newfoundland Producte Bill. You would have had lots of residenta in Newfoundland today if you had started that. There is lots of fish; lots of it, but not buit. Supply bait and I am sure of a return to the reveniue of at least 25 per cent. I believe it you invested $\$ 12,000,000$ on this now, you would get a return of $\$ 3,000,000$ per year. There is lots of fish. Every fishermen apends at least a month or two doing nothing in the search for It. Thli country las had a Govornment now for over sixty years. and not one yet has helped the flaherman to get one quintal of fieh. No one Goverument out of all that have had power. All they did with the fishermen was to tax them, I hope the Government will look into thil matter and sce what they are colng beforo passing this contract.

HON. MINISTER FINANCE AND CUSTOMS-Mr. Chairman: The hon. member opposite has only to look up the past history on batt depots to ree the objections there are to them. The Measra, Job Bros, \& Co, some 12 years ago erected plants for thls purpose, and kept them running the whole acason. It may be interesting for the hon, member to know that there was not $\$ 100$ worth of bait sold there for the whole year, and naturally the burinces was closod up. The whole explanation war that the flehermen had lots of hait that year, and gathored it for themeelves. If any industry like this is to be carried on, the fishermen ahoutit patronlae it. It is only with their contlmued patronage that the venture could suceeed at all.

HON. MINISTER MARINE AND FISHERIES-Mr. Chairman: As the time ts getting late now, I will postpone my remarks until the next ressfon of this House. Then I hope I wIII be able to show the hon member that the Government is ready to en:
tertain the offer of any company who will agree to estnblish such an indus: try as has been advocated lere this aftarnoon.
Mr. Speaker resumed the Chalr.
The Chairman from the Committee reported that they had considered the mutter to them referred, had made some prograss, and asked leave to sit. a sain.
On motion this report was recelved and adopted, and it was ordered that the Committee have leave to ait again.
Hon. Miniater of Marine and Fisherles gave notice of Bill.
Hon. Minfister of Finance gave notice of bill and resolutions.

The Minister of Marine and Fisheries gave notice that on to-morrow he would ask leave to introduce $A$ $x 311$ providing for satety at sea of Bank Fishermen.

Hon, Mintster of Finance and Customis kave notice that on tomorrow he would ask leave to introduce a Bilt rempecting certain Retiring Allowances.

Hon Minleter of Finance and Customs gave notice that on to-morrow he would ack leave to move the House Into Committee of the Whole to consider certain Renolutions relatuig to the Exportation of Timber.

It was moved and seconded that when the House riges it adjourn until to-morrow, Tuesday, May 18th, at three of the cloek In the afternoon.

The House then adjourned accordingly.

TUESDAY, May 18th, 1915.
The House met at three of the clock in the afternoon, pursmant to sidjournment.

## PETITTONS.

## SDPHLY:

Purnasir to Coriter and os motlos at Hon, Minthter thasser and Customas. the Hinase rnantved Itseir into Commtttwr of the Whinie on Supply.

Mir Buratar Teft ther Chaifr.
Ptr Phemad tont the Chalr of Cour tatue.

RON WINISTER FINANCE AND CUTTOME-Mr. Chalrman, it thlak: that each moviber Fill find a copy of fin Alditionui Katimates on hls denk. A number of these votes explaln
themeelves; but any information that 1 can give is at the difposal of the hon members. Under Head 1 , the trterest on 3500,000 at 5 per cent tes 385,000 . The amounts under Head VI. have been discussed already, in Supplementary Supply, Head viII. These are amoante which have been applied for during the year. Head X., Whart at Fogo, and pier at Portune. These are long-felt wants in those localtiles. The amount under Head XII. wis omitted th the main eattmates. Head XV, the amount herein mentioned is to be allocated to the dependents of those who have given their lives for the Emplre th the present war. To this date, something like fifteen family mon have been lost, whose familles have recefved immedfate rellet trom the Patriotic Fund. This Patriotic soctety hise done considerable work afnce its instutation, having relieved something like 150 cases of distrees. Among these were thirty families who were dependents of Newfoundlanders who enlisted in Canido. This Assoclation has pald out something like $\$ 4.000$ in relfef from time to time it is the fintention of the Goverament-witimntely to bring down a penston Bill. They find however. that it is so besot with difficultien that cousiderable time would be ne cessary satisfactorily to effect this Even in Canadn they have not yet been able to loring down such a Bill in a final form. But we anticipate by next session that we will be able to bring down a suitable Bill for the dependents and the wounded Nom the Finance Committee of the Patriotic Assoclation here was appolinted for the Patriotle Assoctition which was inaugurated last August. The funds were kandef over by the Government to that body and were diepoeed of as they deemed fit Last September when we decided to send a continkeut of flive hundred, that body was formed under the patronige of His Excellen-
cy the Governor, who called that As sociation together horo in the city. Man of all classes responded nobly to his sollcitation, and gave what axaletance lay in their power. From that Finance Coumsittee, of which Hon. Sir Eagar Bowring was Chirman. most iplenilid results accrued. All the payments and accounts were carefulty andited. Billy to be pald were brought before that Conumittee, signed by the Chalrman. and Immediately sottled. A Sub-Comnulttee was formed to draft a pension ncheme to submit to the House thls year, and when they had availed themmelves of all the fnformation in this renpect they possibly could, they deem. ed it expedient to suggest to the Goverument that the penston BII should not this yeur be brought down, but rather that they shomid vote a certain sum, $\$ 10,000$, to be placed in thoir hands to meet the current expenses until such time as this Bell could be property framed for the conwideration of thls House. They deemod that it would be moat convenient from every point of vew that they thicmselves should attend to the payments of the different dopendents of those wounded and cisabled through the war. Having the fullest confidence in that Committee, the Government declded to adopt the suggestion. The suin of ten thoneand dellars is requested by them as necessary for the earrying out of their idpas, The recotmmendation was dratted and submiltied to the Patrotic Assoclation a few deyn ngo, and the penslon seheme proposed is somewhat similar to that which the Canadian Corerument are adopiling. In the case of dinablement the Finance Committee recommend the sum of one dollar per day for each individual below commiknioned rank: a dollar and fifty cents per day for lifutenants; two dollurs per day for captains and two
dollars and fifty cents for malors. That is for total disablement. When a married mish is totailly divabled hiss wife will drat the amount due. A whow will draw one-hall. it is rather complicated when you conalider the details, but the Committee recikon thit thr ten thouened Anllare they anh here will amply suttice their needs tor the present. They will take charge of each case and will have orersthting ready to eutumit to the next soastion of the Leglatature. The Fin. ance Committee have auhmitted a nuggestion to the Patriotic Assoclatton. Who linve hanted it to the Governmont, and I am arking the Conmiltee thin evening to ndopt their recommendationis by voting in the ailititionm) eatimates the ten thonsaind dollara anked for. The namber of depencients of men in the Camadlas forcos, Who oricieally were Newfoundlenalorn lout emigrated to Canada, where ther foined the Army, will be entlitad to monor, which will, howerer, be reimbursed by the Canadian Gavernment. It is not necesmary for me to te inte detalls with rernel to this as nearly every necond man in this Howse is a member of that Canmiltiee.

Under Head XVI, we ask for thifty theusand dollars for the election expemes for the prohibition plebiscite. The Governmett, an you tre sware. are bringing down a Bill whieh will be diseussed to-day or to-morrow in eonBeetion with thin matter. Tha law. est fleture to defriy the uttrndant expomsen entalled to flxed at thirty thounand dollars. There is another smail amount which has been brough: to iliy Lotfee strice 1 enme to thir Houne, which has been otritted through Inadrertence from the aldiftlenal estimates. I refer to the Operntor at Broctinite, who Twentrnes the sum of sizo. This afflee which has been closed for some time, the Goverument now decides to re-open. Any information on thin nublect in my pow-
er I shalt be most plessed to forward to apy mamber iteslring name.

MP. COAKER-Mr. Chalrman: Speakiar in eonaection with the salany of the Aualyst, under heed nine. I woulid theo to know what the duty of this man lic. and what work he has already accomplinhed to show for this salary.

RT. HON, PRIME MINISTER1 may wiy that this is an office which could anly be dispensed with with zroat diriculty, Stme his appointment he has treved of considerable value to the country. He does all the analyming in regard to lignors, ete. and performs all the analytieal work that is thiline place under the Fopels Act. In sidiltton to work which he pertarms through then Crown Lamin' Ottice, he the 31 st. roralted in the weleome sadt condncts the techbleal nchool in St, Jolin'k. He and Dr. Hrelom have done comnldernble works Io relation to man. yfacturen in thin town, and particular: dy is relation to the Pullis Health if the town. He has performed indle penalile nertiees in relation to aunh tiry regulations. 1 think from every polat of view this is mont llikely to prove beneficial to the Colony.

MA. COAKER - Mr, Chairman: The 3 Infinter of Finance his ontimated the east of thin wharf it Fogo amounted to about 518,000 . but 1 ans of the opinfon perisually that the Hon. Minister would be tearer the mark if he put It down at $\$ 18.000$. Whether the couthtry is gutting fall ratue for the money Whtetr hais toen spent on thts whart I do not know. 1 have not seen this , harf meututy. I am of the optnion persomally that had this Job been put dit for thnder you woulld have got a doson mest to to fo for five or elight thousand dallurs. Of course coamisnloters do ant alwayn employ the cheapest methods. I know that in the enie of Mungrave fiey spent $\mathbf{8 6 , 0 0 0}$ Without any suthority first betng obtatned, and you come to agnin and
support these men. In the year 1913 Fogo was honoured by a vistt from the Premfer. Foko baving only a smill tanding place it wan constidorably in need of a whart. which the Premier promised. The rosult was an expenditure of thirteen thousand dollars to cateh the vote of these people in 1913. Had there been no motive there would have been no whirf. You might say hat there been no Sir Edward Morris there would have been no wharf, but I say had there been Do thaton there woutd have been no wharf, for these people have been. asking for a whart for several years. and it was cuily the fear of defent that prompted the liberality of the: Fremier, 1 auppose the Premier han kiven up the fiden of visiting outports now. He hins the comtmon sense to percelve the fuifity of such a course.

The Finance Minister has admitted they are golng to pay five per cent. intereat on the toan, Now, to the MinIster morloum when the seen money becoming ab dear. When lie pasts five per eent., or in other words, Efty thoname tollars on every million, and saye he to economical. If thils is not warning to him nothing would be of any etfect. He wants God Almighty to mark worde of warning on the alde of this bullaing, be is weighed in the batance and found wanting
1 thint a pler fa necessary for Fortame. I only liope that a sood substantial one will be put up, and that we will not have petitiens coming in here andine for money to rejpair it. Wo consider $\$ 5,000$ la a large amount to vote to any place for a wharf, but we will say nothing about it, and should be guite content if $\$ 5.000$ is expended similary down North. I hope the Minister of Marlne und Fisherles will mee that he gete full valus for every cent expented in thin direetion:
As regards Prohlbitlon, if we are golng to lave a plebleolte I hope be-

Fore we consider this we shall know whit the intentions of the Bill are, and 1 think that if yon are going to the expense of thirty thousand dollars wo ourtit to submit at the same time fhe Producte Bill to the people algo. It would not be much more of an expenditure, and 1 think that this 'most fniquitous deal, as it has been called, should receive the sanction of the people.

Now, for the firat time in the hiatory of the Colony the estimates amount to over four millions of dollars, of mare, exactly four million and fitty thonisand, and 1 think it is fully time that we thould conslider what we are dolng, for when you have a Colong of two fimatred anit fithy thousand people, and you take four million and Eifty thousand, then all I eay suy is that it If un wonder that people of the Labrator who Blave to earn kour humdred dollars it year find it hard to have to hand one-third of that sum to the Govermment. It is a mont terrible condition of things. I thinic we aught to save every cent we can; for or hund you apend ten thousand dollirs in repairing lighthouses. Now, pould not this stand uath mother year, lintil we see how thfngs drag Blong: one would think you had bushelf of money to give away. The fuct of the matter to you have to tax evurything conemvable in orter to get alont as best you can. Why yon actuaily mako, or compel, rather, people to pay two cents on every ten dollars worth of zoods they buy. On the other hand, you spent ten thousand doltars to repalr lighthouses. I think tile mifht well stand for another zear, My friend, the member for Bonavista, informs me that it is no use criticising this expenditure of six thousand dollars because it is afready giveat, and we cannot get it back; we can only amile pleasantly, becauso it Io a thife of the past, but I must confeas that 1 can fit no way congrath.
late the Government on the methods it choses to employ. However, I have thls consolation, that you will not be abile to continue these methods very much longer. 1 hope you men are really serious in your consideration of financtal conditions, and that you will earnestly endeavour to curtall wherever possible the expenditures of the future.

MR. HALFYARD-Mr. Chairman: Whth regard to the Fogo Wbarf, I would like to make a few observations based on my personal experience of the time. In 1913 we had a small grant from the Department of Public Works, $\$ 500$ of which was passed to the Marine and Fisherles Department to pay off the debt on the Fogo whart, which was done at the expense of the entire district. The roads and bridges suffered severe neglect, and we wer6 left in a most dangerous condition, tor the money which should have gone to them was contributed to the payment of the debt for Fogo wharf. I am glad however to state that this barden is being removed from the remaining section of the district or course this wharf was the outcome of the Premier's visit there in 1913. I hope the people will much bonefit thereby.

RT, HON PRIME MINISTERMIt. Chairman: Just one or two words, more for the sake of strict accuracy thin anything else. I should ilke to gay that my visit to Fogo had nothing to do with the wharf. Instructions had been given months before I went. It had no relation whatever to the election. As a matter of fact, one of the Commisaioners was a gentleman who It was reasonably expected would be the candflate oppostng the Government candidate. Mr. Hodge and Mr. Earlo were the Commissioners appointed.
MR. COAKER-NOt the M.H.A.
RT. HON. PRIME MINISTERNot himself, but I think it was his
son. These Commissioners were selected on account of their complete finowledge of Fogo, and particularly as to the puble whart that was to be buitt. Now. when I went down there In April 1 saw that considerable work had been done, particularly in connection with the excavation. It was found very difficult to get a site at first. 1 do not know the place well enough to be able to offer an opinion as to whether the site selected was a good one or not. But I have learned that it is not. A whar! in Fogo would be of advantage to the whole district, and also of adyantage to Twillingate district It was not consldered that the wharf would cost more than five or six thousand dollars, but after the Commissionars had made their contraets and got out their material and had found it necessary to make a very large expenditure in blasting the site of the wharl, this over-expenditure oceurred. Then it was a case of spending the money or losing the work that had been donc. Now, it is not correct, as my friond, the Leader of the Fishermen's Union Party in the House says, that 1 brought the wharf down with me, I was not giving out wharves or giving out anything else. 1 went dowa there merely to study the locat requirements, I had never been in the Dietrict before. It was practically the only distriet in the country that 1 had not been in, and I wanted to see Fogo, and I went down there that summer; but it had no relation to the wharf, and I never mentloned it while I was there. I never mentloned it at any meetlog there.

MR. COAKER-Perhaps in the houses.

RT HON. PRIME MINISTERMaybe. if I was spoken to about it. but as a matter of fact, I do not think It was a matter considered of very much importance at that time.

Now in relation to the other matter as regards the amount. The am-
ount put down is five per cent. Thu: is merely to cover a temporary toan. It does not follow that the Intereet on the loan will be tive per cent.

MR. LLOYD.- 1 understand there is to be another Loan Act Introduced.

RT. HON. PRIME MINISTERYes.

Mr. Speaker resumed the Chair.
The Chairman from the Committes reported that they had considered the matter to them referrer, had made some progress, and asked leave to sit agnin.

On motion this report was received and-adopted, and it was ordered that the Committee lave leave to sit again on to-morrow.
PRODUCTS CORPORATION, BILL, -Pursuant to order, and on motion of Rt. Hon, the Prime Minister, the House resolved itself into Committee of the whole to consider certain Resolutions, in relation to an agreement entered into by the Goverument of the Colony with the Newfoundtand Products Corporation, Limited.

Mr. Speaker left the Chair.
Mr. Parsons took the Chatr of Com. mittee.
RT. HON. PRIME MINISTERMr. Chatrman: There was a question ralsed by wy learned felend, Dr. Bloyd, the member for Triutty in connection with electric power. 1 have a silght atnendment hore which I shall read to the House:
"In any case where the Company, fn conserifing the flowase of water or developlag water power under Clause 1 of the Tndsinture, the schedule to this Act, shall cause any materisl de. preclation itr the capacity for development of a water power which prior to the 16 th diy of April, 1915, Was owned by the hoider of at grant, It. cense or lease to cut timber over tands for the operation of which the sald water power was necessary, and the sald owner and the Company cannot agree as to the compensation to
be paid for such depreciation, it shall be inwful for elther the Company or the said owner, in Heu of paying or receiving compensation to require that the satd water power be assign: ed to or taken over by the Company. and the owner shall assign and the Company shall take over from the owner the satd water power, and the Company shall, on demand of the assignor supply from the time the water power of the Company is developed, and when the same is required by the assignor for the purposes of operating timber lands or other industrial purposes and contlnuously thereafter, an equivalent electric energy to that which would have been developed on the assigned water power, and shan sumply the same to the assignor at the site of the assigned water power or at a placo agreed upon between the parties, at an amnual rental equal to ten per cent of the estmated cost of developing the assigned water power on the said property. Any dispute as to equivalent electric enorgy or as to the estimated cost of developing the assigned water power shall be detormined by arbitration in the zumnor hereln provided."

MR. LLOYD-Mr. Chairman: I must say that I do not accept that amendment. I think it shows the monstrous thature of the whole contract. The proposal is that instead of compensation in moncy they shall return in kind what they have taken away. Under the Prime Minister's ameadment. it this Company comes in and by the tlevelopment of a water power over which they have control they injure tinother water by depreclating its power, there is no compensation in kind.

RT, HON PRIME MINISTERThat is not so.

MR. LLoYD-I say what is offered Is an Muston and a fraud. They are attempting to give a shadow where they have given away the aubstance. I say it is simular to what was at-
tempted hore in the House the other day in the guise of an amendment, when it was attempted to grab a tremendous area of water power on Labrador under the guise of a coubt as to whether Hamilion River ended at Lake Melville. We have got the same thing here. The Government has approached the Company, and instead of siving something they turn and offer an illusion and a shadow. Now let me prove this is so. I would like to do it by means of a diagram and draw the attention of the Honse to the fact that over a great area of thls country-one of the biggest timber areas in the wholo country-the Company is given absolute control so far as the development of water power is cencerned. They may injure the water power of another company. Now the propossal is if they should injure such a water power-by lessening it. then they should repay in electrical energy what they have taken awayBut there is nothing to compel the Company to develop this power, and their proposal is an fllusion and a fraud. I say that an offer of that kind is an Huston and a fraud, and an insult to the intelligence of the House, and shows the monstrous nature of the whote contract. As I said before It's a traud of the same nature as was attempted to be perpetrated on this House when under the guise of giving a. concesstion on Lake Melville a part of the timber area of Lake Melville was offered in order to srab something not given by the Contract. It is ono of these things in which a crafty Solficitor shows his staill in robbling the country. He thought he was dealing with a set of fools who did not see through his tricks, and did not know how to show him up, or did not have the pluck to stand up in this House and expose them. As regards the am. endment, 1 oppose it.

I shall now move the amendment as I have it, and not as the Company of
fers it to you. The purpose of this amendment is to make the Company give back what they are taklug away in sbsolute disregard of every principle of legislation; in absolute disregard of every right and Justlce, and in absolute diaregard of the rights of British investors. May 1 point out, Sir, that if outside investors will bring this matter to the attention of the British Colonial Office this Bill will be held up as a fraud on British investors, and a deprivation of rights we have no right to allow. The Company's propossi is a fraud as I have stated, because it takes away substantial rights and returns a shadow for these rights taken away. It says we will give you a return in kind if we develop our water power. We take the right to destroy your wator power and then if we develop we will pay you in kind. Bat having destroyed the water power they may forever leave it undeveloped. Now as I make this statement. I see the Solicitor of this House ahake his head and prepare to pass something over to the Promler. Now. Sir, that is to say that a Director of this Company socking these concessions is in this House fighting for these concessions under the disgulas of a gown that is supposed to protect the interests of this House and this country. Now, Sir, I ask under all these circumstances, ane hon. memberg of thls House going to sllow this robbery to take place. I, for one, am prepared to fight it. I am going to move this amendment, and I call upon every man who has any respect for himself or any respect for the dignity of this House to support It. And for one I am prepared to disown ft , and 1 cannot allow nny such resolation to pass that will interfere infurfoasty with private rifits.

MR. KENT-Mr. Chairman, 1 do not think that the resolution proposed by the Prime Minister onght to go Into the bill. It will do more harm to
the bill than if it were left out altogether. Owners of water powers, as the bill stands now, have the righe to the proposed form of substituting monetary compensation, but under compensation in lind that the Premfor is proposing the owner of a water power will find himself in this position: It he has a timber nren he can use the water power in comection with the particular area that he owns, He can use any motive power In connection with that particnlar area. If he wiahes to develop an industry, or if he wishes to use the water power tor any other purpose, then he has no remedy, beoause under this resolution as it is worded at present, he has to take substituted electric energy, so that really it is worse. It makes the position as indicated by Mr. Lloyd, far worse than anything in the bill before. It gives an equivalent power for auch power as the owners have to be used for a particular purpose. Mr. Lloyd's amendment gave an equivalent power to the owners of wator powers for any purpose, and there is nothing unfair in that. There is nothing that the Company can obfect to unless there is a desire on their part to take the whole area and control it, and control the development of the area, and cut out any other person from the development of the area, and not only that, but to cut them out at thelr own price or figure. In the amendment as proposed by Dr. Lloyd, there would be a certaln amonnt of protection for the men who hold a water power in these arelis. The amendment proposed by the Prlme Minister is worse than if there were no resolutions in the Act at all. If you are not golng to accept Mr. Lloyd's amendment then for goodness sake do not put in that one proposed by the Promier.

MR. LLOVD-Mr. Chairman, the wording of that amendment as proposed by the Prime Minister is so
oleverly drawn that it is a fratud. It doos not mean what 1 proposed, it is an abaolute fraud on private rights.

RT, HON. PRIME MINISTERThat is the amendment as submitted to me.
DR. LLOVD- it is not.
RT. HON. PRIME MINISTERYou proposed an amendment. It was your emendment
MR. LLOYD YeB, but that is not my amendment.
RT. HON. PRIME MINISTERYou sent me a draft amendment. I came here today with a resolution stating how far the company was prepared to go, it was your proposal.
MA. LLOYD-It was my proposal, but not in the form in which you liave brought it down here.

RT, HON. PRIME MINISTERNow let me say what I was going to say. You proposed a dratt revolution, and 1 came here today to point out how far I was able to get tho Company to accept your amendmont. There are two or three polnts to which they will not agree. I lanve snbmitted your amendment and they have agreed to it to a certain extent. Now where Is the fraud?

MR. LLOVD-This is the frand. You deprive owners of waler powers of the right to get monetary compensation because immedfatelv thls agrooment goea into force they muit take up the water powers froin the Company, and furthermore the right to take up water power is deferred until this Company lias developed it. which may be never,

MR. MORINE-Mr. Chafrman, I must confess that I would like to hear some explanation as to why the Premier has proposed this amendment. A member of this House proposed an amendment the other day and the Company has been consmilted. find we have now before us a resolution which the Company are willing to concede to, because when it wae
put in that form it is adopted by the Covernment and by the Premier, who is responsible for ft. We ought, therefore, to know exactly what it means. For instance, I notice in one or the amandments the right to pow. er is confined to the purpose of oper ating the equivalent. Now there is a case such at the Penn Company on Junction Brook, who have a water power for any purpose not merely for operating the land. They do not in the development of that power have to contine their power to the land. They can use it for any purpose they like. They can operate anything they tike The water power is Hot neccusarlly attached to the timber land. Now why not have the words "Or other industrial purpose" in the amendment. At the present moment the Penn Company has the right to use these water powers for anything. You are going to take away those water powers and this amendment will compel them to take equivalent power for a defined purpose I hope that nelther the Premler nor the members of the Government ever thought of that becauso if they do, if they deliberately put in that amendment in that form, then It may Justify the language uned by Mr. Lloyd.

RT. HON. PRIME MINISTERThe position is this: an amendment was origtnally proposed by Mr. Lloyd. I submitted that to the Company. The amendments in that resolution of Mr. Lloyd'n are thelre.

MR. LLOYD-The origimal dratt is not my dralt copy. It is an amendment on my orlsinal.

RT, HON. PRIME MINISTERYes. These Interlineations have been removed. Nothing has been added. The amendment was yours. You originally submitted it.

MR, LLOYD-The orlginal draft was mine, but this draft is not mine at all.

RT. HON. PRIME MINISTERIt is yourl with the interlineations. MR. LLovd-On Saturday at your request I dictated an amendment and sent it to you. Yesterday you proposed this amendment, which is not the draft copy that I submitted on Saturdiay. My amendment has never saen the light of day in this House. What has seen the light of day is not mine. 1 made the amendment by putting in the Interlineations, and that has ween rejected by the Company.

RT. HON PRIME MINISTERAs I sald, it was your original draft with these finterilineations. I teft out bome of these interlineations, that is the only difference.

MR. LLOVD-The difference is that you left out these interlineations in an amendment proposed by me. I proposed something as a protection for these rights, and put In these amendments. You have changed that and the last is worse than the original. Originally the people had the right to monetary compensation. Now they have no right.

MR. MORINE-Mr. Chairman, the substantial point is the one I reterred to a minute or two ago. You have left out the words "other Industrial purposes," The effect is this: These people are deprived of the right to vse the existing water power for any purpose whatever, and you simply call upon thle company to give them an equivaleat water power for a partleular purpose, namely, the operation of their lands. We talse away the right to operate these water powcrs for any parpose they want. There is no reason, as far as 1 can see, why thls mmendment should be put In. I suggest that you take further time to consider It, and conslder whather you woa't put in the worde. "other industrial parposes"

RT. HON: PRIME MINISTERThe amendment as origenally propos
ed did not coutemplite Hamilion Inlet.

MR. LLOYD-Yes it aid.
RT. HON. PRIME MINISTERIt only dealt with the Humber Fiver. As regards Clause 2; That hat aiready been dealt with in the agreement to give fifty thousand horsa power to owacrs of propertfes lying within one hundred milen of the power hoase I notice you put in the words "by way of charge." That is not important, is it?

MR. LLOYD-On yes it is. It is very important. They must give it bnek.

## RT. HON. PRIME MINISTER-

 They get it as a mortgage on the whole property; that would be the effeet of ft .MR. LLOYD-No; it would be a mortgage on the water power. It is a mortgake in kitud.

RT, HON. PRIME MINISTERYes, it is a charga on the whole water power of the Company.

MR. LLOYD-That is what if intended it to be.

MR. MORINE-Might I ask the Prime Minister to postpone thls amendment, and let it stop over this ofternoon.

RT. HON: PRIME MINISTER$t$ have no objection to any reasonable postponement. I would like to have thie mattor as perfect as possible. I do not consider the amendment necessary, and I have only proposed it to satisfy the hon. member. I do not see how any right can possibly be affected without the owner getting fully compensated. The hoti. member for Trinity suggested to add power compensation in kind, water power for water power, and I have put in that amendmont, There was one other matter to which reference was made on May 4th by a question asked by the member for Bonavista, Mr . Morine, as to whether the assignmeats from Jesse Critz King of pat.
ent rights to the Newfoundland Products Corporation were in the handa of the Government. There were no assfenments, but there are assignments from Jesse Critz King to a man called MeTaviah, which I wleh to tnble. The patents have boen lusued fin his name, and are in the Colonial Secretary's office The original patetitee was King, and he assigned his rights to McTarinh, the Vice-Presldent of Canada Carbide Works. McTarish has asaigned these patents to the Reld Newfoumdand Company, and I have these ssolgnments lere. They hold them in trnst to be reassligned to the Newfoundland Products Company. They liave only fust come down and were executed on May 5th. As I giny these are the sssigmmonts by a man named MCTavialh who holds the patent rights under an assifament. They are held by the Redd Newtoundland Company in trust.

MR. LLOYD-Is there anything in the deed to show the truit?

RT HON PRIME MINISTERNo, that is what I have been toid.

MR. LLOYD-Has anything been done?

RT. HON. PRIME MINISTERNo, nothing.

MR. GRIMES-His the Sollcitor of this House drawn them?

RT. HON. PRIME MINISTERNo. He had nothing whatever to do with them.

MR. COAKER-Does he say wo?
RT. HON. PRIME MINISTERYea. he says so, He had nothing to do with dratting the resolutions elther. They were drafted by the Attorney General and myself. He has had nothing whatever to do with it alnce they were introduced into the House.
MR. LLOYD-He is in the House.
RT, HON. PRIME MINISTERThat does not matter.

MR. COAKER-Mrr. Chairman, I wilh to say a fow words in regard to the solicitor of the House being prer
sent in regard to these matters. This is not the first time that such action has taken place, Last year the same thing happened in regard to the matter of tobaceo. He was here when the whole matter took place, and then he advised a Minister of the Crown as to the position which be should take in the matter. During this debate he has listened to the whole proceedings. He has sat in that chair and taken in every word in comuetion with what has been done. It is all right for the Prime Minister to say that he knew nothing about the thing. That is quite right, but he is a man who sees everything that is going on bere, and he hears it as solfcitor of the House. He notices every word that is said. We are not going to put up with that kind of thing. He is most vitally interested in this bill. He is supposed to be Solicitor for this House. Now it is not in the interest. of this country that we should hase the Solicitor of the House-the Solficitor for the country-also the Solicitor for a corporation that is getting a contract of this kind. It is enough to bring down a curse on the head of every man that votes for it.

Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered the matter to them referred, had made some progress, and asked leave to sit again.

On motion this report was recelved and adopted, and it was ordered that the Committee have leave to sit again. PAOKING COMPANY AGREEMENT RESOLUTIONS.
Pursuant to order and on motion of Rt. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to consider certain Reecolutions confirming an Agreement between the Government of the Colony and the Newfoundland-American Packing Co.

Mr. Speaker left the Chair,

Mr. Parsons took the Chair of Committee.

MR. COAKER-Mr. Chairman, I beg ta move the following resolution:
"The contract shall be subject to auch terms and conditions as to the annual volume of work, the clase and proportion of fish, including bait fishes handled; the minimum space to be devoted to the storing of bait-fishes, price to be pald for flsh, and the location of plants as the Governor-inCouncll may from time to time determine,"

Now, Sir, the objoct of this resolution is to have provision made so that the Company after two or three years may become dealers in the bait fishery. I think that thia might be added both in the interests of the Colony and the Company. I would also like, Sir, to move this resolution:
2. The Minister of Marine and Fisheries may order and cause to be maintained an fnspection and supervision of the sanitation, maintenance, and operation of such plant, storehouses or warehouses, and may regulate and control the temperatures to be maintained therein.
"3. The Governor-in-Council may make such regulations as he may consider necessary in order to secure the sufficient enforcement of this Act and agreement, and he may by such regulations fmpose penalties not exceeding fifty dollars for every violation of this act, the agreement or regulations, and the regulations so made shall be in force from the date of their publleation in the Royal Gazette or from such other date as is specified in the Proclamation in that behalf"

RT, HON. PRIME MINISTER1 do not think a repetition is out of order when the member is repeating them to show and explain to the House what he means by them.

MR, MORINE-I rise to a point of order. The Committee havisg once
given ite ruling, no further reference should be made to 1 .

RT. HON, PRIME MINISTERWithout wishing to interrupt my hon. friend, for whose opinion I have a very high regard, I think that the Minister had only read the words, and he was going on then, I talce it, to explain that one could not take from these words the meaning that it was attempted to construe lato them.

MR. MORINE-There was no need for an explanation. He was going on to repeat.

DR. LLOYD-He could not go further than lie did. He sald It was true. and could anylody doubt it. In spite of the fact that the Committee refuses to act, 1 intend to ask for a ruling every time this insult is used, and I will insist upon getting it. The fact thet it has not beon taken to the House does not prevent ma from obtaining a ruling. If the Committee is determined not to do Justice that is no reason why I should not try to obtain it.
hon Minister finance and CUSTOMS-Mr. Chairman: These are the words as they were taken đown: 'There are members in this House Who come here and make opposition for the sake of making opposition, and with the object of having their opponition speeches reported and circulated and making people think of the excollent opposition made." Now, I cannot put the constrnction on that which the hon. member on the other side does is it correct or not?

MR. MORINE-Now, Mr. Chafrmen. I rise to a point of order. If this sort of thing is going to be permitted, where is it going to end? The Premfer is in charge of the debates of the House, and if he is goling to permit this matter to be made a farce of, 1 ank, where is the thing going to end? Do you want to stt here alt night and turn the thing finto a bens-garden? Some of us can atay here Just an long
as anybody on the other slide, If that is necessary.

HON MINISTER FINANCE AND CUSTOMS-Mr. Ghairman: This debate started on the Cold Storage Bill. In explaining that Bill I made certain statements that have delayed this House for the last halt hour. Now, in malding these statements I was quite in earnest, as regards the amendmonts proposed this afternoon. Those amendments as 1 explained to the House, could not possibly be accopted for the reasons which. I have giveth. I then stated that while I was prepared to atand for the interests of the flishermen of this Colony as much as any other man in the Colony, I was not prepared to accept the rmendment made by the lion. member for Green Bay. Then when 1 told them that they were not, many of them, in earnest, I was attacked by the two princtpal lawsers on the other side, and by the Leaden of the Filehermen's Unlon. The three of them immediately jumped for my throal. Now, we are not here to lurt one another's feelings, but the other das here, Dr. Lloyd, in his speech on the Newfoindland Products Bill. attarked the Sollcitor of this House, who was in the House at the time, but whas not in in position to answer for himself.

MR. MORINE-Mr. Chairman: I Tise to a point of order.

HON. MINISTER FINANCE AND CUSTOMS-He attacked him right here in thls House.

MR. MORINE-I rise to a point of order. Mr. Chalrman, I have as much respect for the Chalr as anybody in this House, but I muat say that I expect you to keep order. The Hon. Minister in now referring to a debate which took place in the House on anothar matter.

HON. MINISTER FINANCE AND Customs - 1 am going on to connect it with this matter.

MR. MORINE--Pardon me. You, are
alfogether out of order in refering to previous dehates.
HON, MINISTER FINANCE AND CUSTOMS - 1 am not out of order. it has been the custom In this House.
MR. MORINE - It is contrars to overy rule of procedure when dobating ono anbject to refer to another debate

HON. MINISTER FINANCE AND CUSTOMS -That is only nonsense. custom is law.

MR. MORINE-Is every bad custom that the Minister has been pracitising in the past law?
hon. Minister finance and CUSTOMS-You sit down, or 1 will deal with what yon were guilty of in the past.
MR. MORINE - The Minister should linve some respect for hils position, if the bas nono tor himself. Mr, Chsirman, are you goling to permit this? 1 ask yon if it is in order for the minister to refer to a debate which took place on another subject in discussing the matter before the Chair? I want your ruling.
MR. CHAIRMAN -1 adviso that the hon. member contine himself to the mater before the Chair.
HON. MINISTER FINANCE AND CUSTOMs-A few days ago in the House we had an explanation from the genteman on the other Bide telling us that he was here in the in terost of
The objeet of this is that 1 do not want this Legielature to pass a bill which cannot be amended again for a period of 15 yeara. As far as I can see, 1 think that both of these resoluHons agree with the wishes as expreesed by the Minister on the other side of this Honse. I want the Government to lie empowered by this bill to make any changes which in their mind would be necessary, without waiting until the ritteen years are up.
hon. minister finance and customs-while I am as anxious as he to see the interests of the fisher-
men of this Colony conserved as far as it is possible, yet I cannot see cye to oye with the hon, the introducer of these amendments What he wants and what I favoured in my apeech of the other day is provided in this bill. The Corapany promises certatn things. In this bill cold storage for balt is provided. Are we going to dictate to them just because we are going to guarantee them 5 per cent, on thetr carh invented? This would be most unSair. To bind them to do what the hon. gentlemen aske for, would be very unfair. How are we to know that next seazon the fishermen will need balt from thes plant, if they can catch fish outidide they are not going to buy it. What would this Company do with the fish on their hands in such a case as this? We must romember that there are members of this House who make opposition for the sake of making opposition, and of having their speeches reported and circulated in the papers, and of having the people who read these think of the excellent opposition they have mado.
DR. LLOVD- Xir. Chairman. I Tise to a point of order. I want to know if that remark of the Minister is in order.
hon. Minister finance and CUSTOMs-sit down and hold your tongue.
DR. LLOYD- t rise to a point of order and will not sit down until I get satiafaction. I ask if the Minister's remark ts in order?
hon minister finance and CUSTOMS-Oh, sit down.

MR. MORINE-Mr. Chalrman, this is no place for bullying, I aelk, who has the floor?
MR. CHAIRMAN -The Miniter of Finance has the Hoor.

DR. LLovD-Mr. Chatrman, 1 abk for a raling. The Minister has charg. ed certain members of thls House with unworthy motives. He has charged certain membera with making opposition for opposition's sake, and I
ask it he was in order. You have gtven no ruling. If you won't I will ask the Speaker.
MR. CHAIRMAN-1 cannot infer anything from the remarks of the Minister.
MR. LLOYD- 1 ask that the Com: mittee rise and ask the Speaker for a raling. I ask that the Clerk of the House take down the remarks and the ruling of the Chalrman.
HON. MINISTER FINANCE AND customs itr. Chatrman,
MR. LLOYD-1 want a rulfing on this point. There are certain rules in this House, and 1 claim my porition.
MR. KENT-When a motion such as has been made by the hon. nember Is made, it te the duty of the Chatr man to have the words in question taken down and handed with the ruling to the Speaker.
MR. CHAIRMAN-1 gave my ruling.
MR. LLOYD-You gave a ruling. Now 1 ask that that ruling be taken down and reported to the Speaker. I ask you to leave the Chair. The reporter in the box can farnish the necessary words.
(The words as reported were handed to the Chairman.)
MR. MORINE-Mr. Chairman, 1 rise to a point of order. You were asked for a ruling. What you gave was not a ruling. We want a ruling.
MR. CHAIRMAN-I gave a rulling. 1 said the Minister was not out of order.
DR. LLOYD-I ask that that ruling be given to the speaker.
MR. COAKER-I think that the Minister was a trine exclted, and that rather then have this continue, will withdraw the statement he made.
hon. MINISTER FINANCE AND customs-I did mean it. That was why I sald it
DR. LLoro-What 1 object to, Mr. Chairman, is the attribution to the opposition members of this House of unworthy motives.
(The words as taken down were read to the House.)
MR. MORRIS-Are these the worde?
MR. LLOYD-I object to these and ask if they are in order?
MR. MORRIS-The rule is after having the words read, to have the Commiltee rule upon whether they are in order or not.
hon. MINISTER FINANCE AND customs-Mr. Chairman, we have taken twenty minutes hero today -
MR. LLOYD-Yes, and we will take gnother twenty before we will be through.
hon. MINISTER FINANCE AND customs-You all heard my words. Here they are as reported. You havo heard them read. Are they in order, or not? "There are members in this House who make opposition for the sake of making opposition
MR. LLoYD-1 rise to a polnt of order. I want a ruling as to whether a repetition is in order. I want another ralling. I object to having insult added to the former words.
MR. MORINE,-Now, Mr. Chatrman, are you going to stand for this insult to your own dignity. I ask the Minister to stick to the debate now before tho House.
THE CHAIRMAN -1 have already ruled, and advised tho hon. Minister to conrine himself to the matter before the Chalr.
hon minister finance and customs--Some people want to jump on any proposition, cold storage or anything else, which comes down here, no matter in whose interest it is. We were told by some people here last fall that seven-eighths of the fishermen of Newfoundland were starv. lig.
MR. COAKER.-Point ot Order, Mr. Chairman. Are we diseussing what was said about the people or the Cold Storake bill? Now, I hope the hon. Minister won't turn this into a row. I have a certain amount of sympathy
for him when he gets vexed, because sometimes I get vexed myself.

HON. MINISTER FINANCE AND CUSTOMs.-I was going on to say that we were told in thits House time and again that seven-elghths of the fistiermon were gofing to starve durIng the winter. Is not that correct? Weli, now, when a proposition comea before the House to glve employment to the fishermen of thits cotony why is it that we find the same men trytig to put up an argument to show that it is detrimental to the fighermen of the Isfand and shoutd not become law? Now, what better proposition could come before this House, so far as the Interests of the fishermen are concerned, than the Products Bill? Here you lave a proposition that will cost something like sixteen or twenty million dollars to put into operation. Do you mean to tell me that that will not be beneficial to the fishermen of tills colony? And yet we have had people patting up this obfection and that objection-splitting bairs-and saylug that we should not pass that mensure. For what purpose, may I pol:? Tatce that bill and rend it down and any fatrominded individual can tead in that Bill good for the colonv. I giant you that there are lots of ntanses In the Bill that ehoufd be looked into by the different lawyers in this House, but when you come to look at the Bill as a whole it must the admitter thitt never a better occupled the fitove of this House. It ie in the intereats of the fishermen of this Island. It weans labor for then. Now, what does this Cold Storage Bill mean? If you can distribute cold storage around this Island in such a way that evosy fisherman, whon he is short of batt during the fishing season can get it-it is a hard thing to do. but it you can do it, then no better propopition could come before thits House than one which would have in view the accomplishment of that end.

But how are you going to do it? There is no man in this House, or outsile of it, who has mate any effort to explain to us how it can be done. We are looked upon as the greatest bait depot of British North Americn, and what do we find? We find that certain men on the West Const last year and the yoar before had to import balt from the United States. Now, if that is to be remedied, it raust be done by cold storage; and if you can romedy it, untold good will come to this Island. Bat I do not want to carry all my eges in one basket. We were told here, when we wero discussing the Newfoundland Products Bill, that if we passed that Bill the result would be to take our flshermen away from their natural avocatlon. Now, 1 contradiet that statement. Take half, more than half, of the fishermen of this Island and ask them how many euintale of codfish they have taken since last October. Why, two-thirds of our fishermen have not seen a codfish slace last October. Only on the West Coast do they prosecute the fishery during the months of January, February, March and April. Two-thirds of our fishermen have not gone fiehing yet. They cannot get to St. John's to get supplios for the fiahery because the coast is surrounded by ice. And then we are told that if we pass this Newfoundland Products Bill that we are doing an injury to the fishermen of this colony by taking them away from their natural avocation; that those who would go to work on that plant would be taken from the fisherfes. Well, that is not an intolligent argument, Sir, because what happened whon Grand Falls and other like fndustries were established around this fsiand. Did not that tend to enhance the value of the codfishery. All theee arguments go to show that the statements mule here by Opposition members are made only for Opposition sake.

MR. LLOYD I riee to a polnt of order. I ask for as ruling upon whether it is proper for any member of this Houre to atterbute unfalr and unvorthy motives to other membens?

THE CHAIRMAN-It is not in orAer.

MR. LLOVD Thon I aek whether jou conslder it in order for a member of thls \#louse to charge another chember with traking apeeches for the inke of Opposition?

THE CHAIRMAN-I dan't think the Minister sald

DR. LLOVD-I am asicing for a rul ing on my polnt of order.

THE CHAIRMAN-I have not heard niything objoctonablo.

MR. LLOYD-1 am not asklng that. I nm asking you whether it is in ordes.

MR. F.J. MORRIS- 1 rige to a polnt of order. The han member in asking for a ruling upon that must connect the guaition with the present speaker, otherwhes it would be polntiess.
MR. LLoyD.-But surely that has been done.
MR. MORRIS-The Chatrman has atready thewwered your guestion. He sald thit he regarded the obeervations made by the Hon. Arinister of Finance as not reflecting apon the characters of toon members of thts Housc.

MR. LLOYD-That is not the paegHon at all. You were long enough in the Sponker's Chalr to fnow thitt the Minlster was aboolutoly out of order:

MR, F. J. MORRIS-No, he was not.
MR, LLOYO-You would not rule that frotn the chalr.

HOM. MINISTER FINANCE AND CUSTOMS-I way that people coming hare frum oitiafle with a proposition Iike thut now befere the House should the ercouraged on behall of the fiehermen of thifs fitand. We were told the other Clay by tho Premier In his speech thut at thousand men could be got on Labrador. Well, should not an

Indistry the that be encouraged? Should we, then, as members of this Hotise, bo indecent enough to get up bere and call those men namea of all kinds? Were we not told in this Hourm the other day that the class of men who come here and propole these InArustios and endeavorr to promote them were looked upon as peste,-1 think that was the word used by the hon. member on the other sldet
MR. MORINE- 1 rise to a polnt of order. If I understand the hon. member correctly be is now reterring to the debate on the Products Corporation and statements made in that debate.
HON, MINISTER FINANCE AND CUSTOMS-1 am apeaking of tho Cold Storage Bill and ahowing to this House why the flshermen of Labrador and elsewhere should be employed.
MR. MORINE-A moment ago, when you reforred to tho statement which I made, were you speaking on the Cold Storage question?
HON. MINISTER FINANCE AND CUSTOMS-Have a little patience. Now, I dou't look upon these men as pests: I look upon them as blenstings to thls country.

MR. MORINE-Mr. Chalrman. I slae to a polat of order. The atatoment referred to by the Hon. Minister I maderstand to be a romark tiade by me

HON. MINISTER FINANCE AND CUSTOMS.-If the cap fits yont, wear it.

MR. MORINE-The language which the hon, momber is now commenting kpon is langusge which 1 used in a apeech on the Products Campaign, in referring to the promotor of the Products Corporation. I aek yon now. is it proper to be referring to that debate in connection with the Cold Storage Bill? I ask for your ralfog?

MR. CHAIRMAN-MIY rullag is that in this case it is juat a mattor of one
thing leading up to another in the course of observation.

MR. MORINE-But, Mr. Chairmad, the Hon. Minister is now referriag to lansuage which I used then and is proceeding to condemn that language.

MR. CHAIRMAN-I $n m$ not to assume that he is referring to yon.

MR. MORINE-But he said so fust now.

MR. LLOVD-Ask for a ruling.
MR. MORINE-As Chalrman, you should uphold the dignity of the House by insisting that, when a point of order is raised, no member of this House shonld be permitted to continue to debate out of order. That is what is happening now, and I asts you to prevent it.

的
MR. CHAIRMAN-1 cannot see it.
MR. MORINE-Will you kindly give me your ruling on that, and I will ask the Speaker about it?

MR. CHAIRMAN-I have already said that I cannot assuma that the Hon. Ninister is referring to you.

MR. MORINE-Well, if the hon. member for Ferryland will say that he ta not referring to my language on the Products canipaign, then I will withdraw my point of order. I ask him whether ho was or not?

HON. MINISTER FINANCE AND CUSTOMS- 1 will give you the same unswer. You will have to walt until I tell you.

MR. MORINE-That is only what conld have been expected from you. You have as 1 Httle respect for the Chairman as you havo for me.

HON. MINISTER FINANCE AND CUSTOMS-Don't you talk about respect. You have very little reputation in that direction.

MR. MORINE-1 can tell the hon. member for Ferryland

HON. MINISTER FINANCE AND CUSTOMS I can tell the hon. member for Bonavista, or God knows where

MR. MORINE-Well, I happen to know where you came from.

HON. MINISTER FINANCE AND CUSTOMS - I am not ashamed of it.

MR. MORINE-Well, you have done enough to be.

Mr. Speaker resumed the Chair.
MR. SPEAKER-It appears to me that there is occasion for me to take the Chair. I would just like to impress upon the House that the same ruling that governs in the House governs also in Committee, and I would like to see them a little more closely attenied to than they have been this evening. This is a case where a sudden disorder appears to have arisen, which Justifles me in stepping in and taking the Chair and restoring order. Mr . Parsons is quite right in some of the rulings which he gave this afternoon. In that no ruling of a Committee can be referred to the Speaker. It is solely in the province of the Chatrman to decide any question ralsed, and there is then only the appeal to the Committee. If the Committee supports the Chairman's ruling, that finishea the matter. Now, I just want to say to hon. members that I am sure that every one of them Is Just as anxsous to preserve the dignity and prirHegen of the House as I would like to see them, and that they will be safe in their keeping. I am now going to ask the Chatrman to again take che Chair.

MR. LLOYD-As you have referred to certain rulings

MR. SPEAKER-I was just speat:ing in general.

MR. LLOYD-I am entitled to ask for rallings.

MR. SPEAKER-I have already called the Chairman to the Chair.

MR. LLOVD-But you have not given time to ask for rullings.

MR. SPEAKER-1 do not intand to bave any diecussion whatever. When the Committee rises, it the hon, member has any remarks to make I will be only too glad to give him my attention. Mr. Parsons will take the Chair.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Committee.

HON. MINISTER FINANCE AND CUSTOMS-1 do not want to delay the House this afternoon any further in connection with the discussion brought on by members on the other alde

MR. MORINE-That is a lle.
MR. COAKER-Nobody ever sald a word in connection with the Cold Storage bill of what you are saying now.

HON. MINISTER FINANCE AND CUSTOMS 1 am just going to speak on the Cold Storage Bill. And I want to say that 1 am not used to being barked at.

MR. COAKER-Well, don't you bark at anybody.
hon. MINISTER FINANCE AND CUSTOMS- If I do I apologise for it. But I will not allow you to bark at me. So far as the Producte Bill is concerned, you will hear mo out when we go into Commiltee on that Bill.

It belue now hall past six, the Chalrman left the Chair until eight ofclock.

The Chairman resumed the chair at eight o'clock.

HON. MINISTER FINANCE AND Customs.-Mr. Ch-Irman 1 merely wish to add a few words to the Gebate before the committee risee. I had netarly finished my remarke when recess was taken 1 oblect to the amendment moved by the hon. member for Twillingate. In my opinion such an amendment would take from this bill, In as much as it is a private bili, by putting too many safeguards around it and trightening the people from coming in at all. They ask for very tule, considering the importance of the bII. Cold storage for balt is a long felt want and where to begin has been a conundram. There is very little reason why the fishermen of Newfoundiand should be with-
out bait Cold storage plants will be easily supplied with herring for bait. But the herring bait is not, as the fisberman knows, the right kind of balt for certain seasons of the year; whife the caplin is avallable for two months only. Squid, however, can be obtained at any season. Well, I take it that these people, before putting fish in cold storage must first put up bait for their own protection. As this is a commerclal venture it is only natural to suppose that by putting up that and if they can make money by that transaction, there is no reason why they will not continue to put up bait in cold storago. I fail to see the use of bringing in this amendment, for you are simply Erightening away the pople. The only thing that we have promised is to give them $5 \%$ on their investment, it they do not make sumfient to pay a dividend. I would like to see this bill safeguarded in every way. We must first entice them to come in, then it is very easy to stalk to them; but to adopt that amendment you are only carrying out "the dogin-the-manger" polley. I think that there is suffelent scope in this bill for the Government and for the fishermen of this island, for cold storage bait to be provided them in retall. Fend down the bill and you will find that the statement is cold storage for fish purposes. They do not outline what kind of fish it is. Codfish in cold storage has not been a commerclal success in the United States, but there the fish was little more than chilled. The rish is taken and gutted and then it is packed in ice. First there is a tler of fish then. a tier of leo, then another of tizh and so on. But 1 am afraid that it would be extremely difficult for us to make frozen codfish a commercial succes. A frozen fish is very unpalatable: it takes the flavour from it. No market will take that fish. When this bill was framed first, these people asked
to be allowed to export balt. But that is not the pollcy of the Government to allow balt to bo exported. Mrr. Chatrman I oppose that amendment for those reasons:
MR. LLOYD-I rise first to support the emendment and in doing so I wish to point out that the ideas embodied in the amendment originated from the other stide of the House. Thisy are taken from the policy of the Government Itself-from a general Act passed in 1910 on this vory question, relating not merely to one company but to all companies which should receive the advantages that are to be given to this Company. That Act was tmtrodnced by the present Government and was put through by the strensth of the present government in the Honse and therefore in seeking to attach these amendments to the present bill we are doing no more than asking that there be attached to this measure rules whith have atready been approved by the Government. Now, Sir, I will draw your attentfon to Chapter 31 of the Acts of 1910. The firat section says that it shnil bo lawful for the Government to guarantee, on behaif of the Colony, for one or more years, not exceeding fifteen, the annual payment to any person, firm or company engaged in the business of cold storage and other baEiness comected with the fisheries and bait supply of the Colony, of a sum by which the nett aminual profita of such person, firm or company may be less than tive per cent. on the capital Invested. That is the same fidea, and therefore in seeldng to attaeh to this present bill the lidea of balt supply and putting it in the bill Itself, is doing we more than accepting and following up what has alresdy been done In this House. Now, another amendmant which is proposed originated in the same section. "Sueh guarantee slasll be subject to such terms and condltions, as to the an-
nual valume of work, class of fish handled, prices to be paid for fish, countries to which fish is to be exported, as to the Governor in Council may appear expedient." Section 6 of the Aet says: "The Minister of Marine and Fisheries may order and cause to be maintained an inspection and supervision of the sanitary conditions, malitenance and operation of such plant store or warehouse, and may regulate and control the temperatures to be maintained therein, in accordance with the regulations to be made as hereinatter provided." And the lnst section is as follows:- "The Gorernor in Council may make such regulations as he considers necessary in order to secure the sufficient enforcement and operation of this Act, and he may by such regulations impose penalities not exceeding fifty dollars on any person offending against them." Now, I would draw the attention of the Govermment to the fact that the amendments proposed here proceed from thele own initiative on the genersi scheme of what the guarantee should be given for. The guarantee was to be given in connection with the cold storage of fresh fish and also balt supply. In the present measure there is no undertaking that this company shall deal with bait, though there is nothing in the bill to prevent them from doing it. It is quite competent for them, under the Bill, to deal in bait, but there is no obligation on them to do so.

HON. MINISTER OF FINANCE AND CUSTOM.-Mr. Chalrman, I quite agree with what the hon member says. That is my point. We put so many safeguards around that Act that we safeguarded it out of exIstence. But I don't see why we should put that into this Act which we are now considering. These are only matters of cotail. We are guar unteeing these people in this Bill tonisht five per cent, on the money ac-
tually invested, and not a cent more. Those people are not coming here and putting up a cold storage plant at a cost of milttons of dohars for five per cent. But that is the only consideration wo are offering them. We any that if they are not able to pay that dividend we are prepared to pay it. Why should we dictate to those people as to what they should do? It is for thetr finterest to tiandle the bait end of this buslaess. They are coming here for fish, and to get fish they have got to have bait. The simplest fletiermen in this Istand knows that ycu have got to have bait to eatch fish. Why then shoull we frill thife Bill nround with a iot of noasense of this sort?
MR. MORINE.-Mr. Chairman, in reply to the question whtch has been asked us to what Justification there is $\mathrm{fo}{ }^{\circ}$ putting an amendment in a private bill, the answer is simply thls: That when a private till or a bill concerning a private company, is brought here, we are justifiad in putting in reculations whleh we know will ensure the carrying out of the perpose for which the guarautee ia siven. As to whether these amendments should be put in this Bill or not, in fow lays ago, whent this matter was before athe House two excellent apeeches were made one by the Minister of Finance and Castoms and the other by the Minlste: of Mar tre and Flsherles, deallag with this matter of the bait supply. The only objection to thene specehes that I could see was that they were not reletive to the Bll at all, because the Bil containin no guarantee to provide a batt supply. The Minister of Finance and Customs spoke of the great necessity for a bait aupply through the country. The Minister of Marine and Plaherles sald that he thought the Company owght to bo able to provido balt and send it around in floating plants to different placee around the

Thland. He pointed out the goed that It could do. But the difficulty was that none of his theories, sound as they wers, found any place in the renoluttons or had ainything at all to do with the subject before the chair. Now the Minister of Finumee and Customis has Just sald that in order to get lish to put in cotd storage this Company will have to supply batt, th order that someboily may cateh flish for them. But he lias himself sald that this Company con nover go into the cold storage of codfish, and consequently they wont he supplying bait for the catching of coiffish. If they don't put codfish in cold storage, they ean only put हalmon, hatibut and flsh of that Irind.

HON. MINISTER FINANCE AND CUSTOMS.-What about herring?

MR, MORINE.-I didn't know that they caught herring with bait. I always thought that they caught them In nets, Now, therefore, if the Company carrices on the only business that the Minister himeelf admite they can earry on, they woat require balt. You đon't catch malmon with buit. I don't know whether you catch halibut with batt or otherwlee, but they are only caught on a small part of the western coast, or out on the Banke. Now, when the Minister of Pinance and Custams and the Minister of Marine and Plaheries talked about the great need of batt-in which I entifaly agres with them-they meant bait for the eatching of codfish; and if this Company does not deal in codfinh then it son't deal In balt.

HON. MINISTER FINANCE AND customs.-I didn't say that.

MR. MORINE,-Well, it was equiralent to that.

HON. MINISTER FINANCE AND CUBTOMS. - I sald they could not Treeze them. They could put them in cold storage but coutd not freeze them. Now, don't mifscanstrue me.

MR, MORINE,-The Minister, it I
understod hims properiy, waid, and mo fir as my stiett lunowind ge goes I akreet with him, that cold starage for codflish cunnot be profitably carried an by this Company.
HON, MINISTER FINANCE AND CUSTOMS—No.

MR. MORINE.-Wull, if you didn't mig ap, I say it, and this Company is trying tn deal chlefly in other flathen -In matmon. in halitut, in herrting, if

MON. MINISTER FINANCE AND CUETOMS-litr. Chainnims. Just a ward in restr to thin hon mumber. 1 Hink the House anderstood trum Mr, E. layit when be read the Cold istorare Aet, that that was a reaeral act. It has ne bearing whatever on the Aot lefore ns Section 5 of that Aet rands: This Gavernor in Coumetl may, out of any monezs appropriated by the Lerstalature tor the purpose. prant towards the comstruction of any plant, stari or warniouse, a rubutify not exceedinir in the whole thirty per fent of the amount eapended or approved of in such coustruetion and Etmipmont, etce" 1 grant you that bla argument in alrikht an regarda that
contract, but this is different altogether. These people are not asking for 30 per cent; they are asking for a guarantee of 5 per cent. If they are not able at the end of the year to pay 5 per cent. to the shareholders who have invested money in this plant, they then ask the Government to come in and pay the difference betvreen what they are able to pay and the 5 per cent. When the hon. gentleman who has fust sat down thinks that we should have the opinions of competent business men as to whether this is likely to be suecessful or not,well, whero are these busincas men? We have for years been waiting for them to come forward and give their opinions. It is all right to get up in the House and tall that kind of stuff. but where are the ment The fighermen of the Island are watting for them. This industry has been estabHished in other countries. Take Canada and the United States. There is no necessity for Gloucester or Boston to worry about bait. Why? Because the whole coast is searched from one end to the other by balt catchers, and it is taken and put in cold storage. And the same applies in Canadn. The 150 Lunenburg vessels that sailed this spring had their balt ordered, and all they had to do was to go to certatn parts of Canada and take it out of cold storage. And here we are in one of the areatest balt deposits in British North America, and our fishermen have to import it. As I atated before, certain men in this Island imported a cargo of squild this year. One of the men interested in that told me personally that they had bought this equid at 4 cents a pound, and sold it at 6 cents a pound. And here we are looking for men to come in and give us an opinlon as to whe. ther this business would be profitably carried on.
MR, LLOYD -Mr, Chairman: If eny,
thing which could be sald would strengthen the amendment it would be the speech of the hon. member who has fust sat down. His speech has been on the necessity of a balt supply and the advantages of a haft supply. That was the burden of his speech the other day, and that was the burden of the speech of the Minfster of Matine and Fistierfes.

I may eay that our poesition in bried may be stated as this. In dealing with this Company on the question of Cold Storago we make no provision whatever for the storage of fresh fish. The Minister pointed out thint in the Act which I have just quoted there io provision made for a subsidy; that beligg so, with our experience before us while we are now on this very question in this House why not tale advantage of this Act and offer a subsidy for the sake of procuring the advantage of cold storage? Why can we not take the advantage of benefitting the country thus, under thin scheme?

MR. HIGGINS.-Mr. Chairman, it is not my intention at this hour to participate in the controversy now demanding the attention of honourable members in this House, but 1 merely wish to say that from the remarks of Mr . Morine one would judge that this company could go on and exact $5 \%$ and nothing would result from it, but I think if he looks at section 6 lie will see that the Company makes nome very advantageous proposals. (Hon. Member reads section 6.) I merely wish to point this out because the Hon. Member carefully excluded from his argument anything in relation to this section.

MR. DOWNEY,-I degire it to be Alstinetly understood, Mr. Chairman, that I um speaking in no spirlt of egotism in making the statement that I bellove I am warranted in claiming to be the only person in the House,
and perhaps in thls community who has liad practical experience in this country in the cold storing and marketing of frest fish and thls experience debars my accepthis the statements made in the House this afternoon by the Bon. Minister of Finance and other speakers to the effect that they do not lools forward to the New-foundtand-American Packing Co. doing an extonistre bustriess in cold stored codflish.
1 remember some few years back siving to this House some facts and figures ith connection with this bustness, but as It is so long since and ns these facts and figures were then given in connection with a difterent enterpilie, It may perhaps not be out of place if I again briefly refer to them at the present time.
Thut for many years convinced myself that the system of Cold Storase could be appliod in our fishery operathons with the same mensure of advantage that it has been applled to the meat and fruit Interests of Ausmalin, South America and other coumtries
I labored for some years to dievelop un linterest in this scheme through the preas and by interviewing inditidmals but I could succeed in doing nothtrig and with the fncoption of the Fort aix Basquea-Cape Bratou steam service in eotenection with our ruflway syatem I thought the time was Hipe for a practical effort to prove the feaslbillty or otherwlee of the transportation of fresh fish through the metfum of cold storage:
After haviug posted myeelf as to the requifrments of the American and Canadian markets I, throngh the asstatance of a local firm-and I may say the only one who were sumfiently enternitsfug and whose foresight enabled them to graap the possibility of sotting liway from the stercotyped methods of handling fish that have been so long the only ones resorted to

In this country-located at Port aux Baspues to as to be in immediate touch with the transportatton fachttifos that the Bruce nervice to Cape Breton provided.

In thoso daye, 1998 to 1905 dry codfioh only commanded $\$ 4.00$ a quintal and 1 would wask this House to remember that it takes 224 Ibs of "salt-bulk" fish, 308 Tbe .of "eplif" fich and 500 lis. of "round" fisth, to make a Ory culntal.

When I begno buying fresh fish I paid from a cent to a cent and a quarter a pound for it sind as I took this fish with the head on and the bone left in I pald from $\$ 5.00$ to $\$ 6.25$ for the equivalent of a dry quintal.

As I hinve already stated ury fish in those duys was sclling for $\$ 4,00$, from which the coat of "eurtng." of salt, and the discount for cullige, amounting to at least 60 cents, per ouintal, had to be dectucted, wo that the not price to the fisherman could not have been more than $\$ 340$, consequently when 1 pald from one cent to a cent and a cuarter per pound for fish with the head on and the bone left in and of whith 500 ths - tos required to yteld a dry quintal. 1 was absolutely paying the fishormen from $\$ 5.00$ to $\$ 5.25$ per cuintal when thay could reallse but $\$ 3.40$ for the same as đry fleht.
In the case of Salmon the result in ndyantages to the Histermen was egually marked. As very many hon: members lanow it requiros practically 300 tbe of frosh ealmon to gield a harrel of 200 lbs when ealted and in those days No. 1 salt salmon wes selfing at about $\$ 10.00$ por barrel, from which the cost of the barrel, the sait, finspection and other charges had to be deducted so that very rarely did fishermen malise more than 80.00 not for their malmoin. or Just three cents a pound. As we never paid less than efx conts and in some cases $01 / 2$ and 6Me. we were really payting the fishermen from $\$ 18.90$ to $\$ 21.00$ a barrel,

MR. MOULTON-1 have very madi strapure to supportine the bill, more eapeciatly as I have for many ymens taken a deep titerest in the traiter $a$ Cold storane of our fishes. Somethlas Mike thiry.five years ago. 1 wnt manager of a large plant fir the cold starase of mackerel, nalmos und other Rehes to Ghosester County, New Aruaswick The fishee were caneht daring the summer weason, sold stos ef and shippod during the wlitee montin to the Beston market, and keanerally realined profitable prices. Arain atout the year 1898, I was thteristed in the Nem Enghas Cols Storage Company whose beal office wan at Closcester. This Company hact two large harges employed to the cold storagn buatunes under an tm troved chemical proces, from Bus geos to Phacentla. The Governmont purnitted this aperation on condition that a suffictent quantity of heit hahEa was kept on hand to meet the aeede of war fieliermen. The Rahen men finied te tuke advanteres, peotht if for the reason that pleaty af belt was obtainnitie in the meaal way, with the result that the Compuny mifterel great hose trum a Hamedal stasipotat, so ther had malculated upan selline harge equantites of batt to our people. The baxisesi of edta storase is to riakg and apeculutive that it to almoni tiviposibile to induce criplialists to pet theto sionig Into such an undertaking unlase they are assurnd of In Govern. mient suarantee stuilhe to that provided for io thit meanura sonue
few yoars ago, the question of eold wwime was a live ome as 1 dolleve it is today, and at that time 1 was ank-- F by the Boart of Trade to sive my views so tho matter. Darfine that pericalar period oer dried nish lis the forvign markets did not realise the persent dis guod priows and it was thought desirnble that these markets cevild be somevhat rellered if we could achit a portion of our staple cold etored into the United Staten und Can: ala. 1 mugcested that an thie wan a question alfocting the whole country: that a lerge and repreneatative compaiy, comprised of as matay of our businens mien ar pocelbles alhould be found, with a capital, say of a bant milliat dollans to liandle the project. and to afive it a fair and square trias. The object of the company wrold bo to put up our various firhen, anif partilularly cod, into every coscolvable formi (except hard itry cure) in order that nur ordinary torelgn markints miny not be aventocked with the cen tiin mault of a fall in price. I nloo surgsoted that to order to carry out this unidertalive it would be necesaary to ernct cold storage planta in difterent portions of the liland and a Commencement might be made by conastructiog one or tro on the Weat Cast The vlews of several other buithem mes on the subject at that the wart obtalined. but nothing seem. ef to have come from the movement. Eivenal mantil cold merage plants for Bill were in wogae from tims to tume af the Wrat Coust, but they falled. eving to the luck of patroasge an the purt of the thatermen. In mey oplalom thom plants man outy dectare divt ©ents when operated on a large Fale, wach as contemplated by this Ein. it weme rather an anomoly that te thir country, where we so JealousTh euand our halt nistes as to probibit thifr exportation for the une of the mithermen, of other countries, that we *itnessed lust year, the importation
of squild bali from Gloucester, to the value of $\$ 20,000.00$ for the use of our fishermen living between Burin and Channel. We all remember the passage of our Baft Act, and the machinery then employed and now being employed, to carry out its provisions; and yet it may not be known to the House, that for some years past, our flehermen rely to a considerable extent, upon frozen squid which ther procure from St. Pierre. Thore Is no question whitever but that rertilizing plants, opereted in conjunction with large cold storage and boneless plants, will pay hnndsomely if managed in a proper and skilled manner, and the dily must come when a very great quantity of our fish will be exported In a manner different from the usunl band dry cure. I am a great belfever and have faith in cold storage contueted undor proper methods, and I welcome a measure such as this one, which to my mind, will greatly aid in bringing about a desfrable change In the manner of preparing our staple, and other fishes for the markets of the world.

MR. COAKER.-Mr. Chairman, the remarks of the various speakers on this measure to-night bave been of un extremely fiminble character and everybody seems most anxious to accept the suggestions of every member in determining the value of these amendments, but nothing that has been said by the hon. gentlemen on the opposite side of the House wII lend me to think that I have been wrong in any suggeation here totifht. Mr, Lloyd has already pointed out that these amendments have been takon from an Act passed in 1918 by the Government itself. These am. mindments interfere in no way with the work of the Company as far as the-engineerling and 80 on if concerned. The regalating of this matter is left entirely in the hands of the Gove
ernment. I would not Ilke to propose any amendment to injure the Company in any way but I think you ought to put some provision to bear out What I have sugcested. I would like to have some respoase and have these suggestions answered in it practicable way for they conld in no way injure the provisions of the Company and are from every point of vicw reasonable. You have stated that you lave said all you are going to say, but I must confegs that I will be very sorry to see this Bill going through without these amendments. These amendments were not made from an opposition point of view. The object is not to injure the Bill, but rather to lielp it. and I sincerely belleve that the Government will see eye to eye with me and when you come in and pay $\$ 35.000$ to run cold storage plants you will be backward in your duty if you do not compel the company to take upon itself the responsiblittes enumerated in the amendment. The Minister of Finance and Customs When he referred to this question of the cold storage debate remariced that $\$ \$ 1,000.00$ worth had beon imported Into the Colony this year by bankera on the West Comst. If you take it into conslderatlon that the Government has been in power for six years and spent thirty million dollars durfrig that time with the result that the fishery continues exaetly the same, then I may say it is a very strange thing that the flshermen have to go to Gloucester and other places in Nova Scotia to procure bilt which coutd very rotsonably be secured in this country, and the Minister says the fishery is flourishing but I Bay that if this is all true the flehery is a fatiure. I may tell you that it I hud the handiling of thirty milition there would be no place here that would not have a bait depet. It is not to our credit to have thirty thousand dellars worth of squid imported.

It is a matter that could be managed so easily, and these amendments provide for this matter with so littie faconvenience to everyone that I cminnot see why they are not adopted. What shall I say if you do not accept them? They cannot affect the Bill is any way, but I hope that the Government will be reasonable and appreclate the value of my remarks.
MR. DEVEREAUX. -1 arise for the sake of supporting this resolution. We have all leard what Mr. Coaker has said in reference to his resolution. and we have heard with much pleasure his remarks on his amendment to the BHI now before the House, I fear that the hon. member does not reallze that in order to invite capitalista to tnvest their money we must make the proposition laviting. We are all thoroughly aware that the salmon fishing is not what it ought to be. Outside this city there is one of the best salmon grounds that we have, and salmon has been sold in our local marke at the low rate of ten cents per pound. This could not be if we had cold storage. The value of the sal. mon cateh is not more than $\$ 500,000$ annually, and it ought to be one and a half millons, and the only course to increase such a fishery as that is by the introduction of some such measure as is betore as to-night. Not only salmon but caplin, herring and many other fishes, can be utilised under such a scheme as thil. It we had cold storage for bait, a matter which has been particularly emphasized in this debate, we would be able to utliize all these industries, These poopte are not investing $\$ 500,000$ for the purpose of getting five per cent, They are coming here to make money. They want to make ten or twenty per cent. and I am sure that in loss thin two years from now cold storage of balt will be an accomplished fact. On the West Const this year cold-stored
herring sold for $\$ 1.70$ per hundred; squid at more than four cente a pound. Surely it is right that we should do something in this matter. So far the history of cold storage in this Colony has been a tallure. If we had cold storage there would not be the same thing as happens year after year, plenty of fisb on the grounds and the fishermen looking for balt. The hon. member for Twillingate stated that if bult had been cold stored last year there would be no trouble to get all the fish we want. We all know that there were not enough squid last year. The year previous there were very few but no one has yet made coldstorage of bait a financial aucceab, and consequently it is hardly fair to lexpect a large company, such as this, to place money in an industry here without getting some interest on it. To encourage this matter the Government is giving five per cent,- the difference between the earnings and 5 per cent, and as has been stated by the hon. member for SL. George's, Mr. Downey they can send away coldstored fishes to an unlimited extent. Herring, salmon, caplin, lobster and all the fishes that we have can be utilised without exceptiou. The fishery of this ialand is undersoling a very mariced change, The introduction of motor hoats into the catching of fish will make a marked increase in the catch, and with this increase there will be a great necessity for cold storage I had hoped that a bill such as this in the interests of the country and of the fishermen would have passed this House without any adverse criticism from the Opposition elde, but it is quite clear that no matter what the Government brings down th the way of legistation, having in view the benefit of the people or in reference to the fisheries of the country, it is subject to a captious criticism from members of the other side, and
it appears that it does not matter whether they are fishermea themselves or not. There are unfortunately many men in the Island to-night without fishery supplies for the summer, and I think that if a bill, such as this, had been in force-if an industry such as this had been in operatfon for a few years, it would have given a material help at such a time as the present, to those suffering from effects of the war in this regard. A year from now we may have a very large suppty of our fish. sold straight out of the water. If that is so the demand for salt fish will increase, and this will revivify to a very large extent a fishery like the Labrafor which is becoming decadent. We must make an effort to get some such induatry as this established in the country, so that we may bring back that prosperity which has been lost by the lack of initiative on the part of legislators in the past. To-day we have a Labrador flshery fust practically dead. Unfortunntely the depression extends not only to the Labrador fishery but to the Shore fishery. It needs some encouragement; it needs some stimulus to make the fishermion catch more fish, take larger chances and get larger prices. 1 have listened with very great interest to the remarks of members on the other stde, but it appears to me that there can be no reason for interfering with this Cold Storage Company to the extent which they suggest by the fucluston of cold stor age of bait in the bill. The history of the cold storage of bait as a financial proposition fs that it has been a failure and contracts of a nature such as this in the past have not been carried on with financial suecess. That is why I say that the Oppositton's critte. Ism is captious; that is why I say that those on the other side of the Honse are criticising this not in the interests of the country but to obtain certain political capital by their critic-
ism of the bill. I believe if we allow this bill to pass as it is without amendment when we come into this House for another sesaion next year we will be able to congratulate ourselvea upon iss passage, and that we will all forket in the seneral prosperity which it will bring the little disagreement which we have had this afternoon over the subject before the chair.

MR. KENT.-Mr. Chairman, Just one word. I think the hon member who has just sat down has been most unfair in his comments. I think the amendment proposed by Mr. Coaker is an amendment introduced for the purpose of improviag tho bill, and I think that to call his observation "cesptious criticism" is to say the least uncalled for and unfair. The amendfment itselt is to my mind an fmprove:ment upon the bll. First of all this kind of bill itself is one which I have always contended is wrong in principle. We should not undertake an intustry sueh as this kind by contract. If we are golng to encourage the cold storage business or a fth business of any kind, which is the principal industry of this country, it ghould be done by general legislation laying down conditions on which the fishery may be carrled on so that any person who has capital and is prepared to go into the industry in any way will be able to do so. We should not make contracts such as this whith are virtually creating a motropoly. We are granting special privileges and apecial rights, and that to my mind is not in principle in conneetton with such a busmess as this. I have always contended that in regulating such an industry it should bo done not by contract but by general legislation-a general law as setting out the terms upon which the Govermment is prepared to encourago any particular business or industry. We have on the Statute Book a law dealing with this subject. If it is not
sufficient to encourage the industry then Incrense the concesstons so that it will be sumelent to induce people to zo lato is. Some day or ether all these contracto will rlse up against the country in the shape of claims for arblitration agatust a goverument that is deatrous to beanflt the general good of the fishery. I take that objection in the linginaing to the method of legtalation. The Mll bufore the House is In Itselt one to encourage the cold atorage of flah. I think if we accept the principle of legielating by contract the Government should inform the House fully on the buslness etatuह of the people with whom we are contraeting: We should know whother this business of cold storage in cipathe of mafntaining Itselt as other busficases do ar not it. Is not a balt act. Thare is nothing in it with regard to bait, oxcept the company dofire to eater upon a supply of baft to fishermen. The method of cold storago or any other method whereby haft can be rupplied at all times and Dlaces whore the tishermen require It la one of importance to the Itshery. That hat been discuseod overand over mgals triside this House and outside. It is omin of the fomdimentit steps that balt whould be supplied regulariy in places where the fishermen want it. That is one of the thlegs which the Pritue Mhiater lia been strungly advocaling and so has every member of this Honse, and the amenitment proposed hy Mr. Couker is one for the incrense of the supply of batt.

Durlag the period of fifteen years the Government is golng to give these people in sum of monoy equivatent to si percentage on their capitat and it is only falr that we should have the power it we require it to compel thom to supply batt for certain partis of tha country, I think that, accepting the priaclplo of legislating by contract it is a requert only in the interest of - $B$ country to ank the Government to
hold to themselves the power to make this rogulation as the amendment proposes.

MR. WINSOR.-Mr. Chafrman, I wiah to make a few remarke also. The amendment proposed by Mr. Coaker is not for the purpose of destroying this bill but to bring into effect the meaning of the bill as lald down by members of the Government party. At one time they will explain to the House that this Company is not going to touch bait and then they talk as if the whole country was golng to be flooded with it. Now this amendment is proposed for the purpose of puttlag the Government In the poiltion to nay to the company at Bome future date, you shalt supply bait to the fishermen, I do not think that the hon. member of Placentia, Mr. Devercaux, kchew what he was talking about, and I mm sure that there are a lot of members of the Government that are in firour of the amendment proposed. There is nothing in this bill to compel the company to carry bait, and we ask for this amendiment to compel the company, if required, to supply the fiubermen. 1 believe in the policy that this country should be run for the tishermen. The fishery resources are the only industry to carry this country through .We are undertalding the expendtrure of $\$ 25,000.00$ without any assurance that it is going to help the fishermen, and our experlence lias beea in the past that these wonderfut compantes do not turn out so philanthropio ar people imagine. If we want these people to supply batt then we should lay it down in the contract. My opinion is that we should put up hait freazers under a general faw. Why should we allow these men to have a monopoly of any particular basiners. We lnow that they are not going to be in favour of the fishermen. This party is here to support anything in favour of the fishermen. I just want to make myaelf plain. We are
here to defend the fishermen, and it is not becuuse we propose amendments which are in favour of them that members on the other side of the House should insult us, and say we are slmply opposing the bll for the purpose of opposition. I say that we ought to lay this down in the law and that these bait freezera should be crected if requested, and the mere fact that we propose this amendment does not justify any member in making a charge on the other side of the Hovee.
RT. HON. PRIME MINISTER.Mr. Chatrman, Just one or two words in relation to the amendment proposed by the bon. member for Twillingate 1 quite sympathise with the last speaker in some of the remarks that he makes and the only way out of the difficulty as far as I can see is for him to come over with as on this side of the House. In relation to the arnendment itself I may say that when the contract was being discussed every effort was made to obtain from the Company a guarantee that they would sell bait at certuln prices and keep it in cold atorage. In the past, unfortunately, the fallure of this cold storage scheme has been due to the fact that the contract contalined a provietion binding the companlee down to the establishment of bait depots and selling at certain prices, and the reault has been that when they go to New York and other money markets thy are unable to get the necessary capital. This ts not a mere amendment to the bill. If the amendment panses it would be an amendment not to the bill but to the contract, a contract which has alreads been signed. The promoters of this scheme have been here and have discussed overy itom in this contract, and when dilecussing that the Government urged the desirability in the interest of the country and of the fishermen to put in the contract an
agreement that wonld bind them to supply bait and keep certaln depots of bait running and fuarantee certaln prices. The promoters of the scheme salid to us: "We are establishing in your country large cold storage plants. one floating, and the other stationary, and we cannot guarabtee to supply batt at certain prices." As 1 may in the past the guaranteetng to wupply bait and deliver it at certaln prices lans made it limpossible to borrow moneg. That has been our experkence in the past. 1 was in this House and supported the first cold storake contract that was introduced by Sir Robert Bond when he sat in the plice which I occupy to-night. That was a contract with a gentleman from Montreal to supply elghteen cold storage planta, end that gontleman pointed out that the one thing that made it full was the provision for the supoly of bait. Three or tour years ago we made a similar contract. It was identical with the previous one with certain Americans who came down here from Maine. This wns the watract with Trefethen and Lord from Bangor, in the State of Malue. They came bere with the very beat of references and made a contract with us. And we were told that the people were accusing us of giving the country away and people were trythe to zet up a publle meeting against this contract with the otjeet of stopping it. Their own merchants can tell them that there is no money in it, else they would be in it. Why to they not tourh it They talk about scarcisy. and yet no one will come and undertake this work. When we find some one wiling to do it it is our duty to lassoo him, and having done this, this is the reply we get. This is the reply we get when we enter futo an agreement with a company that hase been In the business for 200 years. Wo eatch one million oulntals a year. If the fishermen would look after their
hait supply better thing could double that without much trouble, but they camnot get anyone to put any money finto it as they do not grarantee a market to that person. That is why none of the merchants will put any anoney into it. It is not a casc of any minnudenstanding with the Government: Why it is only a fow yeara ago siace the whale fishery to the value of $81,500,000$, ractically disappeared. last year and every year the sealing industry is becoming less valuable, and less attractive, and will not pay the merchant, and can he be expected to drop money when the chance is very silm of the veature betig successfult My hon. friend the leader of the opponition stated the case very fairly here to-aight. He statod that he wis an objector to this form of sontract. He favors putting a genural late on the Statute Book so that whonoover will may, knewing fully What he is albout, take savantage of fi. He think that a government can in this way be making a coutract which will not rise un against them th after years. The toon. gentleman knows that we destro to make no such contract As to placing one in the Statutes, that too la unnocessary, for there is one there already; one that buas been there for years, and one that mucoends one that was put there in 183s. Dr. Lloyd has antd so here tonieht.
Thin there were the amendments of Mr, Coaker the hon. member for Twillingate Theso were taken from the exineral net; but atthough that act mus on flie Statute Book for years and Jears, yet no one ever avalted of ft. For the lnat 10 years it has been thare und no one has yat taken any notice of if. The atet of 1s9s whtch that act macreeled was introduced by the ben. member for Bonarlate, Mr, Morime, then Minlster of Marine and Fisheries, and an no attention has been ziven to elther of these nets, we
are now driven to make another but this time an special contract to have this businese carried on. it is my enndid opinton that this contruet is as good a one as can be made at tha present time, and 1 would emphnsize my sincerity in connection with it.
I would like to polnt out, bowever thiat the amendments as recormmendell and moved by Mr. Coaker, are not zinendments to the law, or to the gencral act, but amendments to a conitract, slemed, sealed and dellivered which camot be amended except by the consent of both parties.
What does this contract amount to anyway. It is simply this: This company undertakes to erect and keep runsing at a fixed rate three plants, and will spend half a million dollars on them. These will run at a standard fixed in the act. What do they ask? What they want is security thint they will make $5 \%$ on the monoy. Is this pot tho least that we will guarantee them? It does not mean that we wift have to give them five per cent., but make their profits up to fire per eent. For example if they make one, then we whi give them four per cent. If they make four, we will pitve them one per cont. It they male five, we will give them aothing. If the plan is an utter fallure the Goveruments is bound to the extent of but $5 \%$ of the half million per year; that is $\$ 25,000$. That is taking the worst view of it
It is only an expenditure of $\$ 25,000$ per year on the ristherien, and who would object to this. Suppose that without this insurance as it were of In good thatiery, tho fishery was a fullure; no one in this House would I am sure oppose a vote for rellef to the extent of $\$ 25.000$. Could not this amount bo dectucted from the roten for bridges, Old Age Penstons, and Edacation. So then, it will not be quite plain, that this is an investment puraly in the interents of the fishertes, to develop them. In addition to
this the comapany lins agreed to undirtake things not included in prevrous acta, My friend, Mr. Coaker, sayn that we tave spent $\$ \$ 5,000,000$ for the serea jears that \#e have been is pawen So we may bave. But the whote of this money came trom the country mumally, through the prabite reveaue; and every ceat was spent on the pablif $\|$ inrvers of the Coloay. It wail spent rmi repatring roaits, penslone hosplitals, pulblic schools, and other thilie mervices, which must of necousty be kept li good ropair.

1 may kay that even the amend meats proposed here to-night have beet dipcuseed by the zovernment and the company, and found to be fmponifthe. Thite was done not once of trilees, buit ten tham. This compung cannot undertake thie, nor can any company, it muit be remembered that the estabilishment of cold storage planis in itself is a rifky venture. This la the thind within the paat twelve yours The other two were failuron Those fallures have beat at objeet Inseon to the country. My friend bere to-Might, Mr. Devercaux: hase referret to the enctition of the piopie th sotue parts of the country mhen' they caanot eet a full supply of balt. It is a mont seriotan condition of allain. Thea agaln there is the lobeter fiktery, This fliliery too is falling Last year it will be romemp bered it drepped to 12,009 eases. From s0,900 as if uned to be ynars ramo Thas the liaheselor fotherg, the horring fiabery; these are failing too, in daet all our fistercies demand immedtate attention to keep them from being lont.
I do that agree with aeveral stato ments that bure been made here to aicht, varticularly that made by Mr Morine who ts thot fiere niow, whint he sald that it was fruposilhte to aell ood at a profli. What you ean bay here tor 10 cents, you can sell it Nova

Ficotin for 20 cents, snd what is tran of Nora Sootin is also trae of Canada and the United States.

MR. COAKER-Jurt a wond or two Mr. Chairmath, in reply to the Protiler. His anld he had showod whers tiv amendments were impossible 1 do not think that be even touched upkn aby reasone. He went over the whole of the flyhers problem except this one point. He Jast explained that the merchante would not invest ene ount in this indratry Well mm knew that, but also know that this Covernment liefore it came into power had this as one of its first proflems. Slx years ago It wais mantloned in the upeeches of the Mflafiter of Minances anif Cuitomil, but nothing tus been tone yot. If you want the opinion of the flabermen on this thattor all you havo to do is to look up the memorlal to tho Governor in 1910 from the F, P, U. and that oxplains their ponition. The Uafon in 1510 offored to opernte such depots if the Government would find the material etc. neceasary for their bullding, but nothing whe done. The Government tept putting the fiftermen off from yenr to year, and nay now that they cannot ent any company to undertakn the work Do yas knet why they hite not mucceeded? This in why, They put the bait supplied by the fintr. frmen in the depots, and clarge so highly for their labour that the fiebfrman ts not eotne to go to that expenae unlenn it is abeolutely necers kary. What you mant is depots run by the fistarmen themiselves, and I am zure that with these the Tishery would noon fruprove with then lmproved conditione. If quarter of the money that has been spent by this Government were apent on things like thin to limp out the flehermen, the would be a far diffureat country to-day.

As I ald before, the Company that. cannot accept such an amendment an

1 propesed this atiernoon is not worth the grass which srows on the Southside Hill. Supposing that you get these plente that yon are talking absut; supposing thay are established, and that they buy $5,000,000 \mathrm{lbs}$, of codfish and export it. Well, where are you then? About 30,000 quintals of fish will be the equivalent of what they will export Is that golag to make very much diference? is that going to make the price of fish very much higher? But as 1 pointed out thee other day if you ware to ralse $\$ 600,000$ and spend it in the erection of bait deposits in tho outports, that would ereet, even if they cost $\$ 4,900$ exeh, 100 bait deposits; and if those 100 batt deposits only had 1,000 quintals ench, that would mean 100,000 quintals, which at $\$ 7.00$ per quintal would mean $\$ 700,000$. But I think, sir. that under this plan you could Dut up balt deposits for $\$ 2,000$ each. and that would mean a total of 200 around the shores of the Island and give yon $\$ 200,000$ to operate those stations with Now, Sir, the hon. member for Bay St. George dellvered a very exeellent upecch to-night on the subject of eold storage. The racts that he presented to the House were amaziog. It is a wonder to me why the Governmont does not utilizo hif knowledgo and expartance. Why not put bim down in the Marine and Flsheries Departiment Instead of having hifn weoting lis time in the Departmont of Agriculture and Mines. He contrd use hife ablity and dio some good In the Flsherles Department if you would follow his advice, it is a surprise to me that you ehould have a man on that eide with such ability and experifince in connection with this business and yet that you have made no attempt to utllize him Now, Mr. Chairman, I am serious about this matter. There is no one who wishes, and hopes, to see tmore come from the fisheries than I do. I have given
five or six of the best years of my lifo to try and do all I can to uplift the fishermen, and if a matter connected with the fisheries comes before this House 1 claim the right to propose any amendment which 1 believe to be In the intereats of the fisheries and of the fishermen; and it we have no right to make amendments in connection with matters of this sort, then the least you might have done was to consult us through the Minister of Marine and Fisheries before you prepared your bll so that we might make any sugreations which we thought would improve it. If you had this ametament, you could say to these men, when their plants were established: You will have to get bait de poafts, and you will have to supply bait to the fishermen. I don't say many of them would avall of it, but the bankers would avail of it, as was proved by the instance cited here this afternoon of men having to send abrsad for bait. But what is the good of my talking? It is useless for us on this bile to make auggedtions, because you will be making out that we are sayling nometting wrong and our friend from Placentia will be gettiug up and making another speech like he ald this evening, I don't bellove he meant what he satd, but he sald it, and he hind no right to say it. because there is no one on that sido that 1 have more respect for than him. He saild I was bitter. Well, he has not Been much of my blterness if he thought I was bitter this afternoon. 1 am bifter when I am treated badly, but he will find no better if I am treated right. Now, Mr. Chairman, our amendmint, of course, will be torned down, but I want to tell you that it that establishment goes ahead you will be sorry that you did not aecept it.
(The amendment was thoroupon pat and lost.)

MR. HALFYARD-Mr. Chairman, I
wish to make one or two remirlas now that the amendment proposed by Mr . Conker hiss been turned down. I wouta the to know what aetton the Minister of Atarine and Fisheries will talse. I understood from his remarks the offer day that he was going to try and influence the goverament to put some clause into the blll that would make it quite sure that balt deporits woutd be provided by the Company that was undertaking this cold atorage business. 1 am sorry that the Miniater of Marine and Fisheries is not hero now so that lie might inform ns as to why that clause if not inserted in the Bili. What has caused a good deal of debate in connection with mier eill to the fact that the membern of the Government who have expressed themselves have not been opan and sbove board in thelr remarke. Thit burden of the remarks made by the Minister of Marine and Halherles and also by the Minister of Inance and Customs during this ses. won on this subject has been on the supply of halt and the great benefits that woald be derived from balt der pote and wo were given to understund that the ohter object and atm of these resolutions would be the supplying of bait to the lishermen. Now, it they land not talked in this way but stmply apoken to the different clauses of the resolations and explatned what they coally-meant, a gooid deal of the time taken op in thls debate would liave been sared. Eren Mr. Devereaux, In hite romarks tonight, tried to make it appear that this Ball would result in hait beligg supplied to the fishermen. Hir remarliss, when butted down ko a fine polat, consisted of loud-mouthed nolhlumat-trying to make it appear that we on this silde of the House are oppened to Cold Storize-opposed to a measure that is now being brought down by the Goverament to benefit the isterests of the fishermen. This is very misteading. The amendment
which was brought in was for the purpose of trying to make the bill more pertect, wo as to insure for the tishArmen that bait would be supplied, and that was all the criticism that was offered to this Bill. There is more about Jam factories in this bils than there is about bait depots, but tothing has been said about that. We are glving thete people exemption from sugar when tised for the preservation of berries, trults, \&ec, for exportation from the Colony. It includes the delydration of Eish and other producta, and so forth. The only person who has been open and free in his expres wion of opinlon as regards halt depots in the Minfster. He has told us plainly that they could not get the company to perept thin ágreemetit un: leas beit derote were iof oul ulto Bother. Bait depots have been left out, and therefore it is only nonsense for anyone spealing to these resolutions to attempt to show that this Bill has anything at all to do with getIng buit for the fiehermen. It had nothing in the world to do with it. if It clalmis by putting up fish in a different way than salted and dried to Telleve the eatch that has to be ex grorted in a dry state, it may help a 1itle; if you give employment by way of Jam factories so much the better; If you eatch some of the ocls and trout that are in the rivers and lakes of this country and make thom worth something commereislly, alright; but ellminate the idea of bait depotir and khen we have the bill as it purporta to be when it passes this Houne All the time that has been speint in mak. frg speeches, that have been repeated cier and over again whenever any bill dealling with the fisheriea comen before this House, might linve been saved. Without taking any forther time, I may say that it affords me the Ereatent pleasure to support anything that tends to benefit the country, anything that will give the fishermen
a. greater chance of catching fish and of getting a botter price for the fish caught; and I l.cje that now thet you have determined to put the thing through. the outcome of it will be of sreat benefit to the country.

Mr . Speaher resumed the chair.
The Chairman from the Committee repartec-that they had coustdered the matter to them referred had passed the BII with some amendments, and recormmended that a Bill be introduced to give effect to the same.

On motion this report was reeelved
On motion for the adoption of the report. Mr. Coaker moved and Mr. Hibifyard seconded, the following amendment:
(The amendment moved by Mr . Conker in the Committee.)

Whereupon tho House divided and there appeared for the amendment: Mesara, Coaker, Halfyard, Stono, Targett. Winsor. Abbott, Kent, Clift, Lloyd, Clapp, Dwyer. Hickman and Grimes, (13) ; and against it: Ft. Hon.the Prime Minister, Hons. Colonial Secretary. Minister of Finnance and Customs, J. C. Crosbite, Minister of Public Works, Messrs. Devereaux, Downey, M. J. Kennedy, Morris. Moore, Moulton, Parsons, LeFeuvre, Currie, Higgins, Geo, Kennedy, Waish (17); so it passed in the negative.

Whereupon the original motion for the adoption of the report was put, and there appeared in favor of it: It. Honl the prime Minister, Hons, Colonlal Secretary, Minister of Finance and Custams, J. C. Croshie, Minister of Public. Works, Messrs. Devereaux, Downey, M. J. Kennedy, Morris, Moore, Moulton, Parsons, LeFeuvre, Currie, Higgins, Geo Kennedy, Walsh (17); and agatnst it: Messrs. Coaker, Halfyard, Stone, Targett, Winsor, Abbott, Kent, Clift, Lleyd, Clapp, Dwyer, Hickman and Grimes (13); so it passed in the affirmative and was ordered aceordingly.

Whereugon the bill entitled "An

Act for the confirmation of an agreement between the Government of the Colony and the Newfoundland-American Packing Co." was read a first time, and it was ordered that it be read a second time on to-morrow.
PATRIOTIC ASSOCIATION BILL.
Second reading of Newfoundland Patriotic Association Bill.
RT. HON. PRIME MINISTER-Mr. Speaker, I move the second reading of this Bill. When we are in Committee I shall avail of the opportunity to discuss the Bill more fully than it woula be possible to do on second reading. The intention is to fulfil the expressed desire of the Patriotic Association to incorporate His Excellency the Governor, the Finance Committee, the President and members of the Legislative Council, the Speaker and members of the House of Assembly, the Chief Justice and Judges of the Supreme Court, all the Stipendlary Magisirates of the Colony, the Mayor of SL John's, and their successors in office. As you are aware, the patriotio fund, which is to be administered by this corporation, has been obtained by publie subscription all over the country, and there can be no doubt about it that having regard to the means of the people and the many calls made upon them in relation to other matters they have responded splenddly to this appeal. Their splendid effort has not been confined to this fund alone. They have given their money treely and willingly in relation to other atds for the soldters and sallors, as well as to funds like the Belgion Rellef Fund and many others of that nature. The future historian of Newtoundland will not forget to dovote a chapter to the way in which the people of this country rose to the great occasion through which we are now passing; and if history is written correctly and dispassionately, and written by one who will properly understand and appreclate the time in
which wo life, it cannot fall to render to the people of Newfoundland the fullest measure of praiso because of the course they took in connection with the great war which is now rag. Ing. We are not il large country, and not what could be called a rich country; but nevertheless I think, having regard to the number of sotdlers and salfors that we have sent to the front, the aplendid patriotism shown by these young men, and the splendid spirit of sacrifice shown by their mothers and fathers and sistere and brathers-the splendid devation shown by those who remalned at home, especially the mothers and the fathers, who are really in thelr way doing as much for the Emplre as those who have gone-having regard to all these facts, the future Pedley or Prowse will, I have no doubt, palint a pleture that, whilst we will not be here to read, will be a souree of great consolation to those who will come after us, War was hardly proclaimed before the spirit of the country was evinced by the popular clamor to do our part, and it found its fruition in many ways, but particutarly in the matter to which I refer to-rilght. What must particularly strike everyone, over and above all, le the splendid unanimity that has existed amongst our people in relation to this matter-an example of unanimity borrowed from the Empire as a whole, from the Mother Country and from our sister dominions. It is, then, for the purpose of establlsting a permanent board who will take these funds and administer them, not as a charitable fund, because there is no charity about it. It is to go to the men, and to the dependents-the wives and children and familles-of the men who are to-day fighting in the trenches for us. This is no charitable dole that this body will have to administer, but a fund the character of which is
as noble and as tine as the private purse of His Masjesty the King. I think, Mr. Speaker, that we will all be klad to facilitate the Patriotic Assoclation, who come here and ask us to enact a small measure to give a status to their operations which, 1 think, they well deserve Now, when we go into committee to-morrow on this Bill 1 will be very glad to lay some facts before the Committeo in relation to the amount subscribed, the amount spent up to the present time, and generally an outline of the manner in which this corporation propeses to spend the money.

MR. KENT.-Mr. Speaker, I think everyone will agree that the titea of incorporating the Patriotic Commiltee is a very good one, and that is the Idea which underlies the bill which is now before us. The object of the bill and the objeet of the committee is one which 1 am sure:everybody will approve of Our Patriotic Cormmittee, particularly the Finance Committee, which has been in existence since the outbreak of the war, has done very good wark indeed. The men who compose that Committee have given considerablo attention to the duties which the position imposes on them. These duties, of course, arose out of condlitons over which we here have no control. They are regrettable, but they are necessary. They arose out of the war which is raging in Europe at the present time. That our people have doue their duty In every way that they could do it as eitizens of the Empire cannot be gatnsald. This country is a small one, but proportlonately to lis populs tion, it ranlis as high as any portion of the British Empire. These young men who have enlisted in our military and naval forces for the purpose of defendinz the Empire agninst an unprovoked attack, in a war which is betig carried on, as wa are learning from day to day, in a manner which
shociks the sunse of humanity, these are the people and their dependents that this Committen is to take care of-net to the sense of proviting for charitable asalstance to them, but nhaply a payment in achnowledgment of duty well done, ot a great sacrifice made by them and their fanillem in the cuuse of the Emupite.

There young men have guac forkand to ative thetr lives. We are asked to provide a permanent comanittee of our mont prominent eftivenn to take care of the fand subecribed by the publife for their ifepenitants. This committee athould be afteen a corporate extatunce I will support the principle of this measure but it is too late tonleht to discuss the matter as freely us we would wisth. We should like to pay a tribute to theso young men. When We io tato comimituec, every member witt have an opportunity of paying his tribute of pralse to these men and to their families. Lat us hope and trust that tmmense casualties will not visIt the troopm that we hava seat forwurd. Let un hope that the troublea in Europe will have passed over betore our young men will be placed in a partion to lowe their lives We know frotn the reports, that our neikathors in Canada linve met with great lons in patting ap a fikht aminst the foe which will atand out in his tory. $t$ am sure that if our men got fute the firles thee, they too, would put up a flaght in the hesucur of the Emptre, that would do credit to their Klas and Country.
Pursuant to order and ma motion of Rt. Hon. the Prime Minster, the Bm entitied -An Aet rolating to the Newfoundhend Patriotle Asechation" was read a mecouit time , and It was orien ed that it be referred to a Committiee of the Whole Houne on to-morrow. BANK FISHERMENS BAFETY BHLL
Turatuant to arder, and teave granted, and on motion of the Minister of Marine and Fliheries, the Bill on.
titled "Ait Act providing for the matety at sea of Bumk Fiatiermen+ was fatroduced and read as frat time and \# was ordered that it le read a socend time on tomporrow. sawamis mal.
Mir. Speaker informed the सouss Want he had recelvel a mesange trimi the Leslalutive Coundl acquilatios we Howno of Anvembly that they hat paned the Bill entilted -An Aet He spectine the Operation ef Saw Mullk"with some amenderite in which theng requested the concurreace of the Hoane of Aleembly.
On motios the Councirs amend. mente were read a first the and or cered to be read a second time ou tonarrow.
The remainting orders of the Day were deferred.
It was mavnd and seconded that When the House rise it adjoura until tomorrow, Wednoeday May bith, at throe of the clack in the atternoon.
The Houne adjourned accordingly.
WIEDNESDAY, May 1ith, 1915,
The Houre met it throe of the dock in the afternoon, puremant to asyournment.

Every persous on bearit these boats shonld be firovided wink Hfe belts. An act almb ler to thie wis hrougtht fr force four of five yeert ago by the Ammrican

Goverument. I do not know if it exists in Camadia st this present time. lbut know they are uabd there largely Lito belts should be served out for each member of the crew, which he himself looks out for, and keeps it undor this pfllow, or withiln reach of his berth, eo that at any time he is called he has it at hand. In the olden days the owner supplled a compass for these forfes, but I am told at the present time this is not slways the case, and I have inserted in thifs clause a provislon to the effect that a compass should be on each dory as before, so thet men retting trawls in foggy water can take their course and get back to their vessel ugatn. is owing to compasses sometimea not belng sapplied men are forced to wait there two or three days. Then there is atso a provision for the new Fog Atarm. I shall explatu what I mean by the word "approve" here. There are a number of Fog Horns now, the "Jensen" betng generally used on the Banks at the present time. There Is however, an improved patent on that one which a very good hom and can bo heard quite is distance.

Now, in addition to this we might Insert a penalty clause which I think Tould bo of constderable use.
I have lately been in communiostion with a number of Skjppens on the West Coast and when I submitted that suggestion to them they agreed that it would be an improvemicut and migit indeed be the means of saving many tives The Merchant Shtpptng Act of course le only for forelgn soing vessels.

As regards other exiating conditions on hoard these ships I think there is no room for tmprovements. I have much pleasure in submitting thia Bill to the Honse for consideration.

MR. MORINE.-Mr. Speaker, of course we all sympathize with this Bill but Ithink betore going into Com-
rulttee we ought to consider two or three questions. There is one point that strikes me. It says that a Customs Offlcer whall be satisfled that this Act is carried out in the first instance but there is no provisions for tis maintenanca.

Pursuant to order and on motton of Minister of Marine and Fisherles, the Bill entitled "An Aet respocting the Bank Flikhery" was read a second time, and it was ordered that it be referred to a Committee of the Whole House on tomorrow,

## RETIRING ALLOWANCES BILL.

Pursunnt to order and on motion of Hon. Ministor of Finance and Cintoms the Bill entited "An Act rerpacting certatn retiring allowances" was read a second time, and it was ordered that It be referred to a Committee of the Whole House on tomorrow.

## PROHIBITION BILL.

Pirsuant to order and on motion of Fit. Hon. the Prime Minister, the Hoase resolved Itself tato Committee of the Whole to consider certain Resolutions respecting the Prohblition of the Importation, Manufacture and Sale of Intoxleating IMgunes.

Mr. Speaker left the cluair.
Mr. Paranes took the chalr of Commiftec.

RT. HON. PRIME MINISTER.Mr. Chairman, with regard to thils Resolution it will bo romembered that only a few days ago this subject was betore the House in relation to a resolution proposed by the han. mamber for Bay de Verde, Mr. Hickraan, and on that ocension I gave this Houss to understand that during this session a resolution would bo brought down dealling with this cubject and I now bes to submit a eeriea of resolutions Which afterwaria will be formed in a Filt to ensble the electorate of this country to decide the questlon as to whether we should have probibition. In relation to the sele, the Importation,
and the manafacture of intasicatias Hguors. It is not a movet quevtion in thitn cometry Tor it mriat ming Jime It has ocrupled the attention of the Whofe Collony ant on raritous ocesttens the attectlon of thin liones: The berfunstur af protifimen te a theithet extent was when it froad a plane in the Fitutute Book sway back to the carty sreventien the relutions to locat spthit ititich wis a promttitutionoly of asle lis upectriet shatrlets of the mountry. Thite maiter wan betore the House By 18y kbit alie in 1899. I remernher thint. In 1 liss it was fally divenneed in thla very room and when the vote whe tiken it was a tio and the casting rote

Was erven by the Speaker, Mr. MeNeily. I think it was the next year (or poestlity the firat year was in 1897 and bext yoar 1889), it came up In the sume form as to-day in the form of a proposal for a plebiscite vote, and ou that occasfon there was a considerable mafority against It. Now the question ngain ribes as to whethef we are fustified in submitting this to the people. In other words is it a wise princlple to adopt to send to the country and place before It a question auch as thin proposed here. The result of thrs matter may vary targely inconvenfence a great number of people, are we then Justifled In tak. ing away a' private right from these porsons? There is is specintty large class in thifs community who do not thbuse liguor, but we-must rememhor that every day citizens have to ettbicribe to Tegi fatton and lews chat to a certain extant limit the private rights and liberties of the people. That is our only fuatification, and it fo only becnuric etuch a streng demand arlees that we need now in this way, wheertatit what the majority desire.

Now 1 do not think it is gulte fulr that it should 80 abroad that we are pasaing thila piece of legialation because our peopte are intemperate. I am aware that there ts a certuin equantity of intoxicating Hquors consumed In thils countrg, but the percentage of this country is conalderably itmaller than that of siny other country that I can name It la obly fatr to say that the quantity consumed in this country las been going down steadlly of late. It fe true, bowover, that there is a large quantity of liquor consumed. I think it is somewhere in the neighbourhood of four dollars worth a bead per annum. Anyway thls the the outslde figure, although Mr. Hekman when introfluclag his resolution put it up a little higher. For if you take the population to be two hundred and
firty thousand, I would ealimate the outnile Heure of the Hguor Bill would be abont one millloa dollarse I have calculated in various ways putting down first the question of quantity Imported, second the dutles pald, and thirdly, I have minde calculutions as to the probable extienses and profits of priblte houses, and I-cannot posstbly make it any more than one million, or four dollare per bead for the entire population.
And when it is remembered that in Great Britain the consumptlon is gomething $4 \mathrm{ise} \$ 14.00$ ber head tone can undecztrnd that comparatively there is mint a veiry large amount consumed ir Newfoundland And furthermore, I have eften haurd It sald that notwithstanding the local option practically all over the rsland tho samé cuantity of liequor le bedng conbumed. That is not so. The following rigures will show: In 1973 about two years after the firat Local Option Dill was Introituced, we had to Newtoundland in wines and spirlts $246,000 \mathrm{gab}$ lons, Beer $62: 000$, wines 14,000 and fperits 167,000 , that was 1.51 gallons per hend of population. Coming down to 1890, whifeh is the next year in which we buid figuren, thare wete 160,000 sallons, malding it .75 per hend. In 1910 it increased from this 160,000 to 165,000 , and ne the population had Incrensed during that time tho proportion is 08 per head. So that from 1873 down to the present day it has docreased from 1.51 por hoad to .ks. Now how does that compare wilh other coumtrles. In Belgium it fs 2.81 per head of population; in Prance 2.72; Italy 2.42: Weat Australla 2.27; Gormany 2.30; Buglumi 2.50; Writed States 1.16; Cape Colony 35 ; New South Wales .20 ; New Zonland .73; Tasmanhis 55 , and Canada 54. It will be seen by that that we are it a very sood position. and that demplte it great doal of criticism people should not go away with
the impremslon that we are not a soleer people. The people have asked for this mearura. Thiey have asket for s piothatte upote $\pi^{\prime}$ साensitre thich in teare tevere thath wat ever passed in any eountry fin the worlit; hocanso here we are not alone preventing the fmp portattint tir sele, but me propore to probilith the importation for privale iodividual use That has never been done fin any other country that 1 am ताrate of fin ther State of Matme to day atyone can import any equatily of tliganr that he may require for his own use as loag as lue does not sell.
 lowed to import liquor into Newfoundland for any purpose except it be for sacrumental purposes or for medfelnal purpomen. Uniter the local Optfon Law, as bow in force for fitior yearh. We have always permitted is aale in Local Option flatricta tor macramental and medtehnal purposen. I to not know of any settiement that has avalled of that provision in the law but they can nlways do sa. In Loent Option teghitation liere we tave at waym preaerved the right to mell for these purposes, Now the main resetution tere outalife of the mere machtnary for atection is that, it the numher of votes poiled in the affirmative be a majority of the total roten polled at then efecton and not fees than 40 s of the voters on the Electoral Lat, then the eiection ie carried. in the flrit place, It will be seen by that thist in minjortry vote hise to be oftained, and that majority vate han to lef fority per cent in point of aumber of efoctors on the rertent Hint for then electen of 1914. Itr other worts is has beea certified by the Deputy Colonial Becretary the aumber of votera for 1513 uns 44.474 . Forty per ewnt of that would be 24.589. Detalls of that will be found in the Year Bools tor the varioun dintricts bat I have had thit Tepufy Colonial Secretary taike
thene figures from thie ofticial records and thene figures lare been farralahed Eic. In the year 1918 there were 43.502 Foten who went to the poiln and roted out of that 81,005 , and of course In addition to that there would be a fuall per centage who were nidded on that ocranton mufer the supplementary Ilnt of roters, so that when the electiun takes pince in orfer to carry Prohibition it will lee necensary in the first place to lave a mandority of those pho go to the polls to vote, and in Adattos to that the number in fave fur of prohimttion will have to bet forty per cent. of the namber on the list. Aveuming that it will be carrfod, a Prorlimation will Issum that lifquor is eot to be Imported Into Newfounctand or manufactured or sold except for the purposes provided In the Act after the firat day of January, 1917. That date io fixed in order to give a reananalie amount of time to thone Who are engaged in the bualanase to dibpasa of their stocks that they may fave on hund, and to underakes noune other eccupation, and to erable the Ciovermment of the day to adjuint the finmelal position of the country, that will be teapporarily changed by the passase of the measure. It wili be notleed provision is mate in this Aet that after the passage of the meamure epirits may be imported for sacratrental purposea and for medictral purposes. Of course thers are peoplo who will polnt out that we are not Juntifed in permitting the male after prolithition has been passed for medsclan purposes In other wondy bint we abould leave out this proviston on the ground that tt is not moeded at all That would be a serfous eastier for the Leglalature to hnsume; I serfous responsitatity for the th lay down the priuclple thit ne intoxicattois liquors should be prescribed by doctors. Some will go so far in to
may that if yon give the right to foes
tore and drugesists to import Hquors for thene purposes you will open the door to any amount of smagelfing and be simply handing the businesas into the hands of the druggists. That is an argument that will be used by some, In reply 1 would bay that our experfence has been in the outports that druggists have not abused their Ight or in any way violated the law. and that perhape whille one or two drugelists may be found in this country to violate the law there will be dozeas who will wish to carry it ont in the bpirtt til which it ta enincted. After we lave had experience of a year or two if we find that there is any violation being attempted or any effort to break thin law it will be an easy matter for this Legislature to reatriet the importation in auch a way as to make violution impossible. We can in thlf country, I think, pass a low without having to assume that it will be certatinly violated. Here we are wift a cosst line of thousands of miles, and when this Act becomes law there will he a rory large profit to be matd in limugeting. There witt be a premium upon smugeling because there are plenty of men who would give anything to have it, but these thifigs can be guirited geathat as they arize from time to time, and none of theno argumantin are eufficient for us to restrict doctors from prancribing apiftss for medtemal purposes anit atlowing thom consequently to impori it.
1 do not lnow that it is necessary for me to go throught this bill in detuil. The time. 1 think, has passed for the mere dfecussion of the principle of prohibition. It la not so much a question of whether it would be a sood thini for the country. The only queation we are onnicemen with is whether we shonld fllow the people of the country to pass upan the questhon and see whether they should be
excluded from the sale, manufacture and importation of Hifuor. That is the only question and I thinl that any peraon who will rond the bill with a fair mind will come to the conclusifon that any less majority of votes woald be unsafe in a matter so im. portant as the present. If this measure is to become law; if it is to be effective; if it fa to be peasible to carry it out, we must hava pablic support given 1t, and unless we have H rensonable majorlty; unfoes we liave a great majority in favour of the bill, you will never be able to deal with it, and it will larilly be on the statute Book when you will be called upon to put town breaches of the mont flagrant kidad which will call upon the cauntry for very large expenditures. We now undertake to expend about $\$ 20,060$ for the purpore of the alection, fad we ahould at lenst provide the necessary machinery that will make the bill effective. Thare are men in thif country who do not belfeve in prohfbition, who believe that a people ought to be made zobor by moral persuasion, by example of one kind and another. There are some who require ntrong restrictions to keep them from temptation. There are others vinose arcument is that no Legtslature obould placo a restriction upon the individual aotion of any independent man who doen not need such restrictions as these. But for a matter of this kind I think we are justlfied in taklug some riake. It does not mean thet thege who fight for this measure tre abundonins the principte fo which they bellevo ,but thare in a better way to acoomplish this namely. morat suasfon and example 1 huve nlways believed and always expressed in thita Howse the opinion that in order to natie a sober peopie there must be education by mornl sunsion and by example, and that can only be accompllimed suceensfally by * takdug the
etiltiren which soang taking them When they ure alght or than years old. nue aitminivtertug to them the total ubrtinence pletes not is a jerrubetory wiv, pent in any way that will Thitit thith rematt it to mintmportant, bat in the tuost solemn manner pos allot and with-all the rimal with which gep ean sorround it Make it

 per tent, of then reghetend votern aro
rognirnd to hrise this into operation. The praviston is that if the number who vole fir this meneure is not a Emoforlty of the electers, and that the rumber of electors ithall be forty per cont. of the total mumber of rughturod woters theth this shall not come finto eperatlon. Is other woris in onfer to carry this bll the triands of profifhltom hare ta hare a misjoirty of thone tho whele and forty per cent, of

Lial namber of regintered wotes in the Iniand. Son that ail these that 2ppoes thit measure may ntay awny twew the polls and allow the friends ef prohibition to try to atir up 25,009 fotern in ferour of is. if those that Fre opponod to it su to the polls it will he neceseary that the total vote ghall he 69,300 and out of that nump bor 24,800 muat vote in favnur of it. The total vote at the last gmoeral eleofion was 43,000 . So that in that cane there trunt be a larger vote polled than it the last general election, no that all thoap interrsted is tavour of prohitition muit strugsle to that they cuil got 200 yuter mare than were pollef that this. While the sumber ef people on the list will profelity bre formewhat lather than wore of the list at the lant election thare are thoubande of mea oat of the cemairy really tif the lias, wo that rumily at this slecgino thane will not be is the cowntry io rote as many pecuple mat at the last - Licilon alimoush there are more os the lint, no that all those who are sway and all the personar whe are atek. will by this methind be turned inte anth-wotern, Thair ahyence will Antp to eut dows thin tatul sumber of those who vote and unless the majority cosatitute forty ger event of thame who are on the lint thene recolationa witt got so fate affert Or if 200 talce the a ther metboit all thut will be nocrasery will be thint those that are opposed fhall Temain at bome and Ellow thay Who are in havour of it to got 25,009
votes if they can. It appears to me that that is very unfair. It is throwtag a bunten of work upon those who are In farour of it and allowing those who are against it to remuatn at home. It is allowiag those who are afrald to stand for the atreigth of their cour victions to remain at home. it is foreing the triends of prohitition out Into the ficid. It is corering ap those that ire agatrat prolistitfou and drfving the friende of it out inte the open. It in throwing all the effert upen one slde and none on the other. And surely it in a falr proposition that one side should be as active as the other and that mere carelessnesm, neglect, ftlnest or abseace should not be counted agalnst the proposition, and there should be as much interest, as mucts friteltigence and energy and as much flghting on one stde as on the othon. The very absence of theee men will be more detrimental to prohiblthon workers than thefr presence because If they are flrst to go out and fight, the argument to their fight will all help those who are working for prohlbition and get thetr forees Into the field beanse if all that are opposed to the proposition can remain in the back ground then not only ter point of mumbers but in potnt of interest it will tell against the workore for prohlbition: and the friends of temperance would make a mistake if ther etfd not force this questtion biefore the people as they would it thoce who are opposesj to it had to get out and get 25000 votes in the xumn wiy 3 It those who are in fivour of it have to do.

These reaolptions amount to this: If you can ge; the weight of the country to go to the potts ant voto isatiat the lifuor traifle, then you can have prolibition and not before Every perion who does not vote for you voten menthst you. I seg ther te turfatr. It is the same as moking it a
rule that no member shall be elected to this House unless he get not only the majorlity of the electors, but also a certain percentage of the voters regliteref. As it has been suld a Govfroment should not rale unless it has in certaln percentage of those who are regtatered on the liets. That percentage, however, ought not be an excessire ane, If it is this it is unconstitutional. Why should the rote for this be on a different seale to evarythifig else. It seerus so me to be manttestly anfair to the body of people who vill bave to see thils thing through without the help of either political party. For this reason I shath, when we go into committee move that this section be stricken out and a more moderate clause put in. I thall aek that it be made the majority of those Who vote, and not some fixed parcontage of the electorate. Let the people vote for or against prohibition, and let the majority win.

There are two or three euggestions I will want to make when we go into cominittioe. In the first plice I will zulove that provision be made for sothe central authority, respouslble to this Legislature to take complete elarge of the importation of liquor, pad thus make the measure a full one. Boctors and clergymen could get thelr supplles direct from him, and from no other. It is provided here that doctore miay import. Now that may be secessary where there are uo drugisists but certainly not where there are some These druggists will of course get their supply from the central authority, who will of course miake no proft, but juat take chargo of the lmportation. We munt remem. ver, and this is the canse of this precaution belag nocessary, that the detiand for this liguor will be greater than formerly, aul that we must bevare and not turn our drugglst shops into saloons.

Now we have provided here thla section: "Every medical praetitioner, Heonied hereunder shall koep a recond book of all futoxicating tiquors dlaponsed by lim for mellelhal pur poses, siving the date of euch transaction charmeter and amount of Hiquor dispensed, name and address of patient and tame and addreas of the person to wham the Intoxteating liquor was dettivered." But this provides no way by which these verseriptlons may be chooked with the amount imported. We do not provide any way to stop any tealoge. You make a method to hare booka kept, but you appoint no one to have the power to examine these anit no one with this authority. Now the should provide that those who trade in this stalf, will have to make monthly or quarteriy returas to somb person who witt clieck them with the amount fmported, and thls would alio provide a method for the distribution to doetors a return once a month as I have suggested woutd make the country certaln that ith withes were being carried out to the fullest extent.

If you are gofng to have a law the this upon your statutes then have a lut which witt be as good as one can be. If th no good having one that can be violated. Great care must be exercised in this direction.

So. air there are two thinge for Bhich I stialt press when the Houne goes lato committeo on these resoluflons: the first that the vote be malle a mejority vole and nothing mare or lews; the second that suituble arrangements be mace to have this law a most rigid and effectual one.

RT. HON. PRIME MINISTER-Mr. Chalrteth, Just one Word in reply to the hon gentleman who has Just sat down. He hiss satd that under Britioh law the majorlty rules, and that it it not correct to thinit that manjority to a percentage of voters.

My learned friend went on to point out instances to prove tis statements. We will look for a minute at what happened in Canada, a country my hon. frlend has sot up 88 an ixmmple. In 1898 a plebliscite war granted, ani the majorliy voted for prohibition, but the Government of the day did not conslder that the vote for it was a sutficient one to grovern the whole country, and accordingly did not declare prohiftrion. Slince that time that country lias had a change of government and this government has not thouicht it advisable to lave a clange of the present system. This was Juat what happened, When the wote was tuken, 278,000 roted for prohlibtion, and 201,000 agninst it. This was out of a population of some $7,000,000$ people. My learmed friand will agree with me that such a small rote as that ahould not rule, oven thoush they bo the majority of the electorate whe go to the polls.

We want this bill to be as thorough as such a bill can be We want to lase no openinge, but have the people face the square issue As to the matter of a central authorlty, 1 shall be glad to accept the auggestion of the hon. memher; for while I do not doubt the veracity of efther our doctors or dragrists, nevertheless I think with him that it would be best to have zomeone to check the returns as they would be ptssed in.
MR. MORINE,-Mr. Chairman, I fare no doubt but that by the time we finiah with these resolutions we will have a very good bill or at least one whitch will be a great improremont on the present. With regaird to the Irime Minister's reference to Canala, 1 man may that though it in a Camndthn proceeding, yet I do not atand for it. it is only as a warning that I would aik its consideration at this time. In thir eane the people were sranted a pleblselte, but were not told thint they
should get a certain precentage of the electorate They got a majority, but thise fin charge went back on the original cantruct and told the tompors ance people that the majority was not large niough und the matter was droppor. A great many of the inhabitanta of the North West took no interest in it, and without knowing it, became anti-temperance voters. This was accounted for largely by the vast bxtent of country in thase regions.

I think it only fust and fair that the Govermment abould fix a certain maJoftry before is bill so Hgid and Important us thts shouth go through, and that they should lix aay $\mathbf{2 5} \%$ of the electorate, but $40 \%$ is altogether too high, an tmpositble tigura. Why $40 \%$ Is tore voten thin put the presont Government in power at the last election. You are atiting that those in favar of prohthtton geit more votes than you yourselvess sot to put you in power for four yeara. For this renson I will mave that the rote be made 45 mil fistead of $40 \%$ an here and fn this way will meet the Premfer half why; $35 \%$ will mean 16000 voters, and it the same thme is majorlty of thase who do vole if the majority want it, nad at the same time total 15,000 pooplo, then surely they should got what they want: 15.000 tuen ought to get thair wfill. In my optaton $25 \%$ is quite a sood peremtage to get.
MR. COAKER.-Just a remark or two Mr, Chalrman, on this eabject. I cannot see eye to eye with the Pre-
in in some of the remarks he Just made. I bellove that $25 \%$ is a high percentage to ablt for, I think that safe woulf be quite high enough. This is a different country from Maine and therefore ought to liave differont constitutionas practice I think that if prohibition once bectime law, the change would become so great that thit Govirminit wouta ilever be ask-
ed to repeal the act. I think thint they have made a mistake in quoting so high a percentage, and feel that they will reconsider their decison betore these resplutions pass the House; $40 \%$ In aul trunasaible voie to ket in Newfoundland, and 1 think that unless the Government is propared to make it smaller, they may as well withdraw these resolutions. They are aaking for 3,000 more votes than thoy got in the lest election, hefore they will grant prohibition. It Newfoundland dons not go lints Confederation before she gotis 40 m of her voters to vote in favar of 1. then I am afrald that she will never get that.
Aa far as a prohibition fiethe la concernad, we as a untion are not going to take an active part. This is a matfor that has never come up before ns th our conventiona, nor hat it been spolken of by uie It this measure becomes law, as it is now, Newfoundland will revar get prohibition. I hope that this objectionable clause will be cut out. It you mide it 20 or even $35 \%$ I believe there would be some ponvilile chance for the temperance workers, but at $40 \%$ I woula call it an imposslbility.

MR. HIGGIN8.-Mr. Chnirman, the only point of friction as 1 can underEtand it, betwem the two pattes, is the percentage question. I think, Lowever, that the hon member who oppones this will admit that nome restriction is necessary in order that the position taken by Canada may not be follownd here.

Consifierable las been sald thes mternoon alrondy, and very well sald, on the subjeet of the percentage vote. The hon. member for Bonaviata and myself had that point more or less in dispute between us on the last occasfon. At that time I stated that I thought that the ordinary majority which obtains at an orilinary election
ourtht not in thif case be the gulde or stunduril A sreat deal has also been sald thle afternoon and on tho lest occaston when this petition was before us about the fait that this Covernment does not stand here with a majority of the electorate belitad it: and of course the argument, on the face of it, it a claver one, and without bentg annlysed woutd cotumend itselt. I hive no doubt, to those theo thithe that tho fora of pattige in a par eeatage there an had; hat ua a motter of taict, Mr. Chitrmint there 18 no unatoges at ant tetween the two canes. There is no isfolliarity, no poestble methoit of comparison between velat revidto that velura of it Rovernmiont of otherwleo mat what docides prohibttion, for this meinon, that a Government is nnt returnad ar defenated upoin the nimetior of votes witcil it aceures but upon the number of representatives that it can bring to this House Therefore, fiven, it as a matter of fiuct, iti the fion memuler toir Bonavista (Mr. Morlne) and the hon. tucmber for Twillingate (Mr. Coaker) have very properiy and truly suid, from the iftandpofit of votas, 1 I minioifty tu nember of representatives did reculve more votes thas a majorfiy. (yet whetion flat is true or not tif mot ir qublition of ciebate), but even assuming that it is true, that is a condition that doees not at ail compare wilh the proatint lespe. This lis a tritetht frutres. It in rict in quiteitfon of a number of roprenentatives who elight be eiected by a minority votev ff. for argmant make, to an ordmary eloction, down ti the dtstriet of Bansvista a huge vota is segured by one dide and only three mea veturned, and the ilame other afietrict thron men from the oppaitne Bfot ure returnad with a very amall majority, the great majoricy in panixistin weuld not count; but here what is solmis to be voted up-
on les Do you think we oukht have mrohibition, Yen or No? In other words, It la a metralght line-up on two siden. Thare is no fite comparimon, I wath tilt, at all, betwheen the two cases, tad if in anly fuore or lens bessing the cuantion to nogegest that there in. That is. No, 1 There in Hikewiev no catuparinan botwera a pleblsclte of this nituren aind the retura of a memlier to tho Houne of Assembly in thle renses. that In the caso of the return if is tmumber for tha Abeombly (and I fon't know whethor or trot it is more itmpartiont that prohitbition) thare If ain ealabilathed Instliutton. thiere is the foet that alt that the treotora hire ealled upon to declido is His to whether one man will have the fines or somepne clise, but now they are tintint to maketia great turift change Up to the preaent time the right line toen hers to manufacture, fmport and bell lletuane ith cortain parts of the Islind and ta purchume and une in all fuits. The people of the counitry are מuw golng to be usled to lave all that canditiat changed. It has been mid fitre, and 1 think truly sald, that the dioveroment the the bilt hair met the situatlon to ma mexent greater than the tioat aftent arlfocate of temperance coulh aven expect, liecanse the Govcemment tiae etue to tho extent of *iglin thas to no whape or form thall Houar of auy hind be imported into, or manfoctured in, the Colony exfopt tor thin tro purpasea ciamedtaedieinat and sacramental; the Gor: errament trus even fong to the extont of fagiog thit it shall not exen be Dermitied for private use We ware told in advame that when this profoctuin came up it wae golng to be a fatter of prolibiting the importation for raln, but now the country to goling to bee aaked to prollithit the induetry, and no man from the Cloverior down can oltaiti fiquor for private use.

That belor ao, and thls meanure belus atteniled with such farreaching conrequinices nurely to is onty right, and mut motme culy rietit hut antry in thr with the duty of the Goverament, when are briogiag to thin Bul, and of the Houne in constaertig it, that they shauth an that betore ract a dramtle change can be made there shall be a mbistantial pronouncament of public opitifon: and 1 anir rure that the utruagit atrocate of protimilot wowhl apt allempt to say that if out of 62.000 electors, 25.000 went to the poite, and $18,00 \mathrm{~m}$ vetne for protidtittion tud 12,609 ernefret it, that protititfor eunht to coune lato ferce. Why, the Tery arrumint of the hom. member for Trilitugnte in $\pi$ justification of the ponftien of the Government, when tie traly saise that it would be a thounuid timen better not to have prohibition it nit than there a eandttorn of thinse which wouta be worno than theme whith exist to-doy. And in nupport of the ponttion which the Glovermuntht takn, wre tirve thetit in front of ane rigit in the community in which to tive, the evidence of what fir the opinlerr of those whe met toInthir to cinfifier thte mintur to the Intisest of problsition, and who placed upos recuril a resolution to the it. foct that in their opinlon there bught to be encehirt, of sarg por cent. of the electernis of the Ioland in faror of protalbstion befose it ahonit be carrled Sow, does not that \#how that thene veeple the hare so much int Alart ite cawe fer which they are ntritine nocogite that to have flint caass a aecenes it mest lave pablie opinien belind ft. It is falle fur an to diperss herw us to whether problitition is cotue to carry. As the introfucer of the- repolotions has sald, this to not thu time for that, and I am nomewhant uurprised at the paor epinion of teme parnien ventimant that the tion. mem. ber for Bonavinta has. I don't think
that one who le auche as recominend advocate of yrolithition as be is, will serlouily mutntain that 40 per cent. will not bo socured ia the Inland: and idon't think that he Kimselt, andent. proalbtuonit thut he th, woult eas: tend that, if that dttd happen-if it zere really a fact (which, as 1 nay. I foabt) that apt four people out of tea are looktig for prohifition, because thint is what it means-that prohinhtion should carry. This thing put down in plain languge means that four people out of very ten lave got to support prohlatition before it can carry: and surely that lis uot an unronsanable vroportion: nurely four out of ten is not a large pereentage to ank. We have, as 1 say the ituatra. tion is froat of un that thase whe Lave siven this ambject earnest conuldorution have themientven placed the "tandarid at $3: 1 / 5 \%$ and it ts only tair to ansimio thist la plachis that standard they did so unconectously with the Idea that they were well withis the purcentaze which they thought youlit be mecured. It ta onty natural to eappose that those who have so well at heart the cane for which they are etrivieg would place al atandard that ther fell safe aboat. 1 would comsiend to the attertion of the hon. enamber the stitements that liave !umin made in pubtic bere by those who buve beas intereted in this matter and which sre cunetly on a line with a statrment which I trot the itberty ef ewollar to the House on the last cocadon when this matter was be fore us, mamily, the poritios thlene by chn Government in the Old Cometry on thls queption. when it vas suld that a matter Illie thbs, which contimplatof mach a madieal, mech as dratic elianse, should not be gone into unInas publite oplaton were behind it. I tulah we oun fairly say thla, Me, Chairman, that it we cannot get four out of every ten of the electurate to
vote for a canse like prohibition, that uny prohilition which would be put to ferce would be a farce; if it tha fact, as has boon naith, that you cannot got that number, then all 1 have to noy in adrance fis that 1 think that the putture of the measure on the statute book at atl ta anis fabor lont. If that is railly the position, then the adrocates of prohibition eill only hinve to continue their geod work and educate the pubilic in this mutter. I do not think that we are jentified itt taking the poifition here today that this country is ont tour out of ten in favor of prolifbition, whatever may be ear minividual opinlone upon it: whether for ar against 7 think that the hath meaker for Honavista hats very commendably and very tranily expresed the spirit in whitch the Goverument has met the posittion when he polatis rut that in chits case the Gorernment hat crave down and put beTore the coumtry a phatit meesure which teaven no room to toubt that the Governmeat hus come to all who are interastod, whother for or against the importition and sale of Hquor, and han reaid; We nre golng to tike a vote and after tho vote has been takes we will dectio what wo are to to. If that rote. by a mejority whels amounts to forty per cent. of the electorates. is in fisver of prohbltition, thes on sach a date the importation, manufacture and sale of liguar will the stopped in the Colony. No adroeate of prohitition could posibiby hope Zor a fuller measure of prohtiot tifa to bo put belore the country. I do - uat think that it will be tho case, as han been nuxseated here, that yon may have a rote of 19.000 and have 25,000 for and 24,000 aminst, and have prolibition carrited by a hare mitjority of 1,200 . It that fos soling to be the poiltion, if the forty per cent. that will be ascured la only koing to be a bare maforlty, syen then it seems to
me that the public rentiment is not atrons enough. 1 hope, if prolibition If to be curried, that the majority nill be no promouncod as to leave no donbt whatever as to what the people want, because 1 think that those who have themedree zilyen ao mach time to the niaster wili be the first to admit that 11 will not be possible to carry out succenofulify any measure of this kind anloes public sentituent is atrongly bebimi it. For tuatunce it is proposed bere that llyguor he adrultted in for medicinal purposes. What kind of abuse of misuse of that liberty will tre made If the great hulk of the people are not in favor of prohilition: but if pubile sentiment is strongty in farar at it, no matter what liberties you tuly allow you will not have any violations of the law. I think, Mr. Chalrman, that the proportion or the percoentagy in this cuse is not one that ean be romoonably objected to. I uitnk that it would be wholly impropur to have this mensure corried excopt by making sure that there was a mabstantial majority in favar of this chaze. 1 thimk rimally that thls cannot at all be compared with anything if the way of the prerlous elections Which have been referred to on other Lanues because it must be remembereal thut thil to the first time that this House has had before it a moasure uis mroat ase this. It is thet trat time thint thate who liave been so earnestby ndvocaling temperanco have had their wiohes gratified, For yearn and syure past we have heard the cry of eimast workers ta the cause of temperance of the deairability of having macbliery so that they might have a ohance of toetias the feellings of the puople: petitiona hare bretn ocoming in bore tumerausly signed by some of the prumtnent people of the Island, asking for a pleblecite to test the sentiment and find out if the majority of the peoplo wanted prohlbition; and
legsiature after legialature hes beon asked for that. To-day, I think it can be truly sald, the prayer of these people has been acceded to for the first time in the form of these resolutions. I do foet that there may bo difforences of opinton amongst us us to whether or not the percentage is high, but in the light of what I have said I think it will be found that it is only a fair proportion to ask, because the success of earrying out a prohibition measure after it is pasaed is going to depend upon the strength of the sentiment that is behind it, which sentiment we hope to see expressed at the polls.

MR. MORINE,-Mr. Chairman, occasionally wo find that the best friends of temperance say something or do something whith other peopleI won't say those against It-make ube of. We have an fllustration of that now in the suggestion that some Clurch bodles and Temperance bodfes sugkested 3015 Der cent. I think it is probable that somebody amongst those who passed that resolution was told that some such percentage as that woutd be necessary in order to get the Government to bring these resolutions in , but 1 am not governed by the opitnions of other people in matters of this kind, unless I have a chance of letting these people know what my opinion is, and 1 fancy that If 1 liad the chance of pofnting out to those temperance people the spectous. ness of the Government's position 1 weufd not have very much dififeulty in getting them to reverse that resoletion. The propoaltion is fair or unfair upon its merits, despite any opifiton givon by mybody outside thils House. The next polnt is this: The clever member for St. John's Fast, who is going far in thls House and Till soon fill a position for which he is eminently qualiffed, has thrown out another specious argument thls afternoon in his suggestion that because
the English administration recontly sald, or some newspaper man sald for them, that they would not enact drastic linuor legislation in Great Pritnin at this timo without knowing that the body of the people were behind them, that that has some sort of uppilcation bere. Now, it is a well luown fact that in England the liguor fintereste are so tremendons in their Influefice, and the drinking habits of the people are so set and so widespread, that they have to deal with difforant conditions altogether from what we lave to deal with in thls coantry, where the Illquor Interests, Duside of the city of St. Jolu's, are of no poittleal fmportance and have no weight, and where the hebite of the people are such that what we decide will be the linw will be toyally accepted by the people; and therefore a. remark mude in England, applying to the condiflons there, that may or tway not have been statesmanlike, has no application to thie country at all. I hope, therefore, that we won't have any further suggestions regarding condlfons in Eaglamd brought out as arguments here. Now, I did not say, as the member for St. Jolan's Eest seems to think, that there would not he forty per cent, of the vote polled. I was pointing out the unfafrness of so handiling this matter that the opposents of the measure could stop at liome while the frlends of it had to do all the work, and I sald that it was not fair to Impose apon one person \& heavier obligation than was imposed tupos the other. It is not falr to count the deaf and tho sick and the absent ne opponents of thie mesuure, as you are in this proposition I satd that I was prepared to consider as large a proportion of the total vote as 25 per cent. The member for 8t. John's East could see no smatogy whitever between the principle upon which the Government comes in with a majority
and the prinelpte which would make thin law. He pointed out that the Covarument is a question of represontatives, and therefore you may hare a majority of representatives but not of the totill rots. Thint in gulte truc, but the whale prople, even the oppononts of the party etected, loyally necent the deciston. The people know the law of the country, and even thone who voted against them, secept it; and theretare the prlinclple which is in force, and whith the people aceept and act upon, is at good encugh peinctple for this prohitition question. Now, 1 want to suggest an amendment, in that connection. and I hopes the member for St. John'a Bust will give me hifs hearty support, and that is thls: That fistead of havtife probibition by an total vote of the people, it be prohibition by districts. Let cumilidates for and against go to the districta; let them have a eongreit in St. John'r: and let the mnfority of the representatives carry or deleat prohibition. Now, the member for St John'e Kast wanta to follow the malogy of the Government, Well, then, let uie put it in that way. Let un put up what the United Sates call electore to be voted for by the prople: Iet all diatricts elect as many itectors as they have representatives in this House; and then let them meet and fiee whether we will have prohibition in this country or tiot. Then we will carry out the abatogy of the electlos of a covernment; then we will enry out the analogy on Wifeh aill our lisws are made. 1 am mitiefied that the temperance people of thly country will be prepared to aco cept that proposition.

## RT, HON, PRIME MINISTER-

 The reprisentatives mfight ropresent a muluority voteMR. MORINE.- That ie the principle which put you tr ottice as Prerier and forced the present govern-
mont upon the -country, so that you ouath to be in fuvor of my proposition. Another fulue atatement which I have teard liepe thif oveaing and which wearm to he acesptat by everybiody freent myselt. Is that in orier to enFores prolithition in this country you Liave got to have a miviority of people In favor of it. I don't belleve any fuch thing. We enforce all sorta of tawi in thilic eountry nad we don't nisk whethur the pionple are in favor of them or not. The poople olvey breninse if if the law, You make proliftition the law of the catiniry and eight out of evern ten will obey it frecause it ls this law, no mattor Whethor they agree with it or not Oricn tet prohitiltion be carried and become the lnw of the Inni, and thero in a largo boidy of law-abiding peopla fin thif comatry who will it once acripte it. Thfa fin the first thue that we hive adopted the princlpte of reter frdum in this country, ant 1 hopa it fill be the lant thme that we will 50 to the expeuse of referring a question to the people limiead of handitng it here, al we do every other equation, an is Pesutt of cotivedion. Government should conslder the proposition, and not thus afd the anti prohibitionist.

HON. COLONHAL SEONETARYMr. Ohairman, I haid no intention of entering into this dineunaton, but 1 would like to net my hon. triend right It the fintron intict he fuit utrotot He should not go uncorrected. At the lest election the number of voters was
 betine 7 ditroremine of 11,971 bietwern the registered list and the number of those who roted. That is acconding to the official recorde.

Mr. Qfimes.-Thint tr in very firge number:

HON. COLONIAL SECRETARYWell, that in the number whio voted at the election. If every one voted then it would require $60 \%$. I grant that outelde of that, $10 \%$ vote agninat; turt that 1095 representr thrien whe flld not rote at the fant election.

Mr. Chalrman, I have atways taknh a part In any debate that has come beform the Moune in reforinen to thit quertion. 1 look tupon it in mm fm partial manaser, and have always leen an adrocate for prolibition. but 1 do tor wimfir that thif tr the right phace to settie a question of this kind. It enght to be settied outidie.No reasonablin opposition ahoald be entertintreit to Emintitting it to tha peopiti. The hon. member for Bonaviata claime that this quention abould the decided by the miffortiy of those that go to the palte. But he must remember that It Canatla, where that might have neemed justified there was not ruffirfent tuturent taken. That tis why it fittod there. 1 ttitnk that the Gor-ernment-has demonatrated its sinetrity to the people by hringing down ther bifl. There is no opprosttion to prolibitien In the Government ranles If the jeople mant-it, but aot to be car rleil by a small minjority of the people. No mat wants to nitrocate anythin
that is going to injure the people of this country:

Our prosent legtslation on this mubfoct has not prevented the consumptiom of liquor in thmen districter that voted for local option and they now ank that more stringent legislation be Introducod to prevent conditions that they roted aroturt Nows, 1 think that thla to a very sald position and that these people are jumilfind in looking for meth legtalation. Therre ts a strong Aentiment abroad in fivvour of prollbitlon. At the name time it you have frolhitition It think you onglat to have prabile sentimeat belind it; you should have a measurt thet will be hackisf by the poopie. If feel rure that trone in favour of prolitiltion will not stind in thin thek kround. No doulht-there will he indilfereace, but II will be by the poople who do not cars whether this till passes or not. Fuless yous cuil eet forty per cent, of the vote you shoull not have problldtion Tous abpaly sot have it unless you have a mtrong emilornation frome the pople. That is what this bitt teman. Thire to so desire to harko the cent tlon or fool the people It is entirely Erank and botest and I clulm that the Covernment have foute flurther than any othar Govermment upom the question for a aumber of years They are not afraid to srapple the fauue and they zow bring dovin is minume that ahould bo moeeptable to its entrenty to the whole commuilt, with perhaps ere ir two exocptionas 1 teet firs the temperance peopte fio not want is earts dila thing with a mall muber of voters 1 ressonally bellers that the teajuritica people will Azve a very large and a far peachtng infuence workitus to earry this mear fure: because erery metutement has its clergruan and avery elergyman I be Heve, will be a prohithitionlat and will have a large influmee on the votern fs this matier. On the other hand I
do not soe how any opposition can be got up by thoge of a diferent opinion. 1 to not belleve you will liave liny opposition. I belicve that generally around the country there will be no opposition in regard to thls movemeht, and the questlon will bo left entirely to the consideration and fudgment of the poople themselves. Therefore, I belfevs, if thes measure passes you wIll have a mensure that will have the eadorastion of the people, or of a mafority of them and it will be accepted and carrled out.

1 was glat that the hon, member for Banavista this afternoon polated out one clause of the BIII whitch probably was its weah point, that was as regards the method of distributing in toxicating liquors for medicinal purposos. Wo tll know and appreciate that if there was not some very strong provision and very careful supervision great and far reaching evils might necrue from that source. I know the thing is bristling with dimicaltes. The Goverament have fiad the matter under consideration on Beveral oceasions and whitle we want thie people to have spirits that the doctors may prescribe, we also want some method that will bo acceptable to everybody. The dimicatity is, of course, how to control this distribution. Perhaps there is something in the contention of my friend that we ought have some central distributing zuthority, some man who will have a check over the liguor bold so that it will not bo diverted into channels that thif measure is intended to prevent it from reaching. No man in this House or outoide of it wants to have a law ont the Statute book that will not be a credit to the Colony and to those who enact it: and to make a law without providing safeguards zo that It wilt he respected and carrfed out only amounts to a delusion and a share, The Government do not want
that to happen as regards this measure

I intend, sir, to vote for thfs Bll as it is: I believe in submitting the question to the people, I think it is the best move ever made by the temperance people. 1 thlak, sir, we are going to settle this question and we will have no more occasion to come here year after year and amend these laws on the Statute Book, and I hope that these improved conditions will exfat which the temperance people are so much concerned ahout. I feel that once this measure ls put to the people it will receive very strong support all over the country:

MR. MORINE.-Mr. Chairman, the Coloninl Socretary very properly said that he did not intend to refer to the motives that brought this matter into the House. 1 think he was wise in that; because we too often have the debates of this House sallied by the imputation of motives that after all havs nothing whatever to do with the question at fssue, It makes no difference whist a man's motives are as far as lifs argument is concerned; that argument felther strong or weak according to the facts uyrin which it is based. I am glad to say that on This cuctasion there is no alsposition th. talk of that kind. I think that this discussfon should be conflined to the merlts of the measure before us. Now the Colonial Secretary has a touching fuith in thie frlends of prohibltion-the Orange Society and the other societfes he did not name the others but referred to them indirectly; he says the is certaln they are golng to work for prohibition and he has no doubt as to the result of thelr work; then why alla he put this $40 \%$ in the Bill. It is put in, Sir because those opposed to prohibition do not think there is a ghost of a chance of it befng carried under thls Bill. Now if our friends on the other side of the House have as
much faith as the Colonial Secretary in the outcome of this measure why Introduce this Bill at all. Why not introduce a prohibition meaeure right here now. I for one am prepared to vote for it . It would save all the expense that the election will bring. Now let us get down to the figures, throwing nside the odd numbers. There were 61,000 voters on the Registered List last election. Now at the last election 49,000 roted; forty per cent. of 81,000 is 24,500 . Now it the vote is as large as last election, all things cousidered, the temperance people must get 24,500 in order to have the deaired number. The other people have only to stay away to the tune of 24,500 and prohibition is defeated. That Is all. Under the terms of this measure all the careless, all the indifferent, all the opponents of prohibition have merely to stay away and say to the temperance people "earry it if you can." There would be no objection in their going because If the temperance people got 24,500 they would carry ft . All the opponents of prohibition have to do is to say to tho oloctors, don't worry about prohibition; don't worry about getting your dirink, let the other fellows do the worrying. Now it may be falr that you should make people show their anxfaty and interest. But why make only one slde do so. Why make the people that are votiug for prohibition, many of whom here not the slightest personal interest in the matter, who are voftig for a theory if you like, voting for morals, voting for rightcoumness, why make these people work and go to the polls, while the other people, the interested, the caroless and the indifferent can stay away? Why put an enactment of that class on the Statute Book? If you are against prohtbitlon you need not vote, you need not show your colours; you need not go to the polls and show how
you intend to vete. If you go to the polls you have to face the hatred, the accusations and the suspicion of those vested interests, and you must do all this if you want to vote for this measure for the betterment of others. Now that is unfair, and it ought not be permittel. It has exidently come to this condition in this country that If you have convictions and believe in temperance you have to show it and work for it and suffer for it; but if you are againat it you do not have to put up with any of these penalties; you do not need to do anything and the Legislature will look out for you.

MR. WINSOR.-Mr. Chairman, I would jast like to ask a couple of euestions. What is the meaning of this? What do these Resolutions mean that aro belore us? What are they for? Are they not for the benefit of the country and our fellow-creatures, and for the beneft of those unforturiate people that cannot help themselves, it seems to me that it does not make very much difference what kind of laws you want to carry out in this country they will be brought into the House of Assembly and passnit but when you come to a tempersace law we must talk and have a lot of agitation in regard to the matter. Now if I underatand this matter right and if I understand the temperance teaching the diesire is to make our fellows better. It is to try and do some good for our brothers, our mothers, our sisters and our chlldren, and i: seems to me. Mr. Chalrman, that we ought to try and do all we can to help those who cannot help themselves. To my mind this about the greategt resolution ever brought into the House of Assembly is correct. If seems to me we cannot have anything much better than that. We could sattle the whole thing here now, but it appears we must apend a whole lot of money before we can get anything defintte
ahout it. fi werms we alast apend the am linfire wo can earry it through. I wonder why the Goverment do not tortor the matter helere the Hiems af ance and see it ithe mumhins noult pase ft ar sot. HON. MR. EMERSON-Mr Chairman, before thls resolution goes through I vish to place ziry walt onl ref cond as treing entirely in thvaur of it at it nuw stanche. It will bo remems. bernd thint whes thly matter wan frocght belore the Hoave wimn two or thiree weelas sigo by the hon. memy lair for Bay de Verde, Mr. Miekman, 1 ofpposed the then resolution an the ernmat that Marte wan hn mandara Ifume the proptie ef thir tumetry to wirrent the tegalature taline sueh a draatic stes as the rawetment of a uibciure to grokitit the impertation
 my I rtatel that on that occanlon ef at we lat so suthority from the Fople por taking noch a step, and I am selfi of the optalom that it worald tive beun a very bieh-bnnted proof edlar cen our part lan we ugread to the terme of that resolation. It may ret to out of place to remilnd this Howe thint in the Resolation now nider discusulon we ure golur a vory Iong way in the directind of temper \#nen reform. for as far an 1 cuif usteigtand ap country in the wrurld has poremed an fultrifiun from import: Iir futosicaring Hoporn for libe ewz ne. Thi parsoge of this meanure vill trits the creartion of a precedent in the way of Imatalation. Althotesh 1 ame fo favour of thls mearurs and in: Find to vele for it, 1 deny that thers ti may roat maceanty in this mantry Air then mituption of sarh sutreme les. filations, for I botiere thet it would be dimeult ta get a marn woter and law. Iblatier people than thoee who tuhabltthls country. Particulariy is this the
case in the Ontports, for na matter what time of year ons msy visit them. a pernan under the influence of drink is rarely met with. We carry out our pledige in a willing manner to provide machinery to allow the peopie to paes on this momentors question. The prohibltion of the importation of liquor unguestionably affects the Hber ty of the individual and is far-reaching in its consequances in affecting the reveutes of the Colony. Whether we are acting in is wise manner or not at this juncture when businese le so deprossed owing to the war, remains to be seen but whatever shortage in the revenue will result from the nonfimportation of llquors must be made up in some other manner, and the people must be prepared to supply the Btiortage. It must not be imagined for one moment that the prohfbition lisw will be carried out in its entirety, for our coest line is so rast that some liquors will find thetr way in, and it Is possfble that a large amount of money will be required for looking Bfter smugglers.

I am in accord with the Recolution which provides that in order to carry frohibition a vote of forty per cent. of the reglatered I.lst of Electors taken In 1912, must be obtained. This percentage la yrovided for the purpose of ascertninisg the sentiment of the country, It would be munifestly unfair to xay that a majority of the voters shonld carry prohibition for it might happen that a very small per centage of the electorate would go to the polls and In such a case a few people woutd determine whecher etery Individual should be prevented from importing a bottle of wine into the country. Under this Bill it will take about twenty-flve thousand rotes to pass a prohfbltion law, and those in favour of the movement should have no difficulty in procuring that number.

People will be very much surprised

If this measure does not earry at the polls but it would be unfair to put a measure Like this and allow it to be carrled without a fair majority, This is a very serious thing to do. If it Were sfaply a question of the prohibiflon of the importation of Hewor for sale it sould be a different matter but whes if comes alowa to abrtonsty finterfering with the righte of individunis then it is only fair and reasausble that the people of the country should be consulted and the sontiment of the country at large sliould be asceptained before such a meawure is pansed. If there is any amendment required in connection with the esfablishment of a central depot and If it is found that it would be advantegeous to have this centre rathor than place it in the liands of doctors and druggists I am quite prepared to necept any amendment in a reasanable way.

MR MORINE,Mr, Speaker, the Premier hae privately intimated to mo that he would be prepared to accent an amendment looking to the appointment of a central authority for the importation and distribution of Hquor and I have suggested to him that before these resolutions so through it woald be the proper place to put In an amendment living up to that magestion and I beg now to propoes this amendment:

Resolved-Upon the fssue of the Proclamation Inst mentioned the Governor in Councll shall appoint a conirolier of the importation distribusion and sale of Intoxicating Ifquors permitted hereunder and shall make rules and resulations for the performance of lis duties and proscribe eruch foes as to the lesue of Heenses fin may be safficient to cover the salary of the controller, and the expenBea incirlent to his offlce, which after publicntion in the Royal Gazette ahall have the force and effect of law as fully as if enncted herefn.

The Controller shall annually make a report to the Governor in Council to bet lald upon the tables of both boases of the Legialature at the seastion thioroof. Sueh report shall bo in wieh form und shull contain such parUntiliars as may be preserfbed in the rules and regulations made by the Governot in Councll under the next precelling section.

If that resolution is adopted it will, 1 think, cover the point which 1 have ratsed. I beg to move the adoption of that amendment.
(On the amendment being put it was carrled.)

MR. ABBOTT.-Mr. speaker, I would tike to say a few words on this matter. in the firat place, I would Hite to say that I am wholly and solely In favour of the prohibition of the sale and importation and manufncture of this giguntle evil that saps the life of thousands of people all over the world. There are many evils in the worle. But llquor is by far the worst ant biost fer ranching in ita effects. If it werd not an ovil it would not bs restricted. If it is an evil, then it should not be licensed. We should sheolutely prohibit its uso nuywhere. There are some people who say that sunh a law cannot be enforced. I say it can be enforced as well an any other haw. We do not license murder or theft. Some people mafntain the ides that auch reatriction is an finterference with British treedom. Such people are entirely wrong: We prchibit etenting, murider and other offences. We are not allowed to eateh trout out of season. There are always restrictions of some kind or another in every phase of life that camnot be looked upon as unwarrinted restrlctions on our individnal freedom. They are neceasary. We have a law at ready on our Statute Book in regard to tils very matter. We make liquor sellers close shop at six o'clock. But there is no one in this House or out-
side of it that can put up a good case to justify licensing. Some say that the liquor tratile is aecessury. They say it is necessary to the revenue. To these peopte I eay thever mind the revenue" That is a matter that is beund to adjust lesel?. The good that will be done by the abolition of this gigantic evil wll mare than offset the loss In direct revenue from this source. Strong drink cannot but have an evil influence. It weakens the will, dits tracts the mind and undermines the houlth. Tho greatest minde in the world have been overcome by it. There is un overwhelaing wefght of medleal testimony against ita use It has wreeked the most educated of familfes and interfered with the conduct of every bualness. The cane againet strong drink is indieputable. Wheever got any good from its urey What man ever rose under its influence? The history of introng dring in written ta blood. War cannot equal fts ravages It works more death and debtruction than any other diseaso. No oue can say a good word in its favour. It is the cause of more erime than can be imagined and when people cannat bo control themselves as to keop awny from their worst enemy, then the law shouid step Is and protect. then und make them soler.

Before concluding I would like to ask a fow questions. Does it pay to liave a hundrod homes closed, ruined fand turned futo veritable hells so that we may aupport, this evil? Does it pay to have 5 if women and childran turned out of foors so that thelr husbands may become sodden with drlik? Does it pay to tolerate an evil traffic that does nothing more than creste orime anil dlsease? We know thit it doen not. We lanow it without argument find we can prove it by figures. Look at the State of Kansas. For thirty years they lave had prohibition. In 70 out of 105 counties there are no insanc. In 38 counteis there are no
poor houses. In some countles they have not had a serious crime for ten years. Last year they had $\$ 200,000$, 900 in the banks. Farmers own $\$ 225$,000,000 worth of property. In one year $\$ 45,000,000$ was added to taxable property. Only $9 \%$ of rented property is held there. The mortality rate has dropped from 17 to 7 per thousand. Does it pay that State? Persons who question have only to look at those wonderful figures.

MR. MORINE.-Mr. Chairman, in reference to the next resolution I suggest that it be split into two. On the top of page four the definition of the term "Intoxicating Liguors" should be a separate section as it applies to the whole of the resolntions, I notice a tittle bit of confuston in mixing up the sale and mpnufacture and the sate and importation and I think it would make for ciearness if we dealt with importation, sale and manufacture in separate sections. In the first part of that section I suggest the following, "From the day named in the proclamation tssued in the next preceding section provided no person except the Comptrollers shall import intoxteating liguors fato this Colony." That deals with the importation Itsell and we can deal with the sale and manufacture in a succeoding one. It would be hetter if these resolutions were numbered for the saice of reterence. Then we want a penalty clanse attached to that. It ought to vary from a small to a large amount so that the convieting magistrate will have a large discretion, say $\$ 10.00$ to $\$ 1,000$.

MR. KENT.-Mr. Chalrman, Jost one word in regard to this matter. There are a number of questions which arise in regard to this matter that need consideration. Take the questlon of drugglsts. If a doctor prescribes spirits for medfinal purposes according to the amondment as 1 read it he would have to go to the comptroller to get the liquor. Every time
he wanted to fill a preseription be would have to go to the comptroller. The Bame would apply to the clergy. men, as they would not be allowed to keep in thelr possession wines for sacramental purposes. I do not think that that ought to bo necessary for druggists and clergyment.

RT. HON. PRIME MINISTER.-Is it your suggestion that a department be made consisting of a controller who would Import all Intoxicating llquors and that he would sell it in turn to druggists and doctors? The original bill provides that druggists and doctors should be perintted to fmport for medlcinal purposes direct. 1 asree with you that it would be too open and too broad if avery doetor and druggist were allowed to import separately for himself. I think your proposal to have a central authority to supply all these would be better, and will make proyislon for that.

MR. MORINE.-There are also elasuges to be made in this clause. In my opinion provision ought be made for examination of these books. Say once a month, Adopt the suggestion of the Premter and, say "under a penilty not exceeding sollo. (As to the clause prolibiting manufacture.)

MR. MORINE,-Make a separate clause applying to the sale of spirits. Have this clause for manufacturing only.

MR. GRIMES.-I would ask the Premier why the flies are belng made so small.

RT. HON. PRIME MINISTER,-In case of very small breaches of the act. We are leaving it to the discretion of the Magistrace.

MR. GRIMES.-A fine of $\$ 10$ is not very large. No one would mind that.

MR. MORINE-It is left entirely to the discretion of the Magistrate He will fine according to the serlousness of the offence. This will permit him to deal wita any case before him in a
tree manner. Fine nccording to the cate, bo it small or large.

HON. COLONIAL SECRETARY It appears to me that the obfect of permitting the timportation of Hiquori tor medicinal purpose is so that the peeple all oyer the faland may have an opportunity of gettins wines and liquors for that purpose, Now we are providing a system whereby we appoint a controller and he lissues Liennses to Migistrates, or Doctors or Drugetets all over the country: Now these people will be under a very great responisibility, In the first place we compel them to keep a record book ot liquors dispensed and lay down penaltiea, 目ight or heavy, for any breaches of the regulations; but we carnot form any idea whether the doctora or druggiste all over the Island will ficcept licenses; you have no machinery in the Bill which provilies that men will be able to get liquors for medleinal purposen, becanse neither dootora nor drugglsts are compelled to keep liquors. There may be no doctor or druggiat in a pottlemeat. In a good many places the doctor te the druggiat. He might say he did not intend to leeep liquor, that he was not goling to assume the responsibility the Act calls for and may refuse to accept a ticense. That defeats the clause whitch purports to provide Ilguor for medicinal purposes. 1 submit that position for members. Thers may be gome means devised to get over this alficulty.

MR. MORINE-I thinle if doctors decline to give preacriptions for liguor tor medlefnal purpose it will be because he thinis it is not necessary. If you allow anybody elee to faaue euth presoriptions everybody will be getting bich. You may be sure if a doctor thinks it is neceseary for medicinal parposes he will keep It; he can command bis own price lor it; but if he doas not think it necessary he will not supply it.

HON, COLONIAL SECRETARY,The position I tako in that wo have no means of compelling anyboity to ascept a license. Thid may lead to a very, eserious situation, wheroln peopte who need liguor for medicinal pur poses may not be able to obtain it.

MR, HALFYARD. I suppose there is nothing in the Act at the present time that compels any doctor to take a Heense; but if a doctor needs it in lis practice and needs it to cure his patents, I daresay he will keep licuor in the same way as he keeps drugs now.

MR. KENT-There is one matter which should be borne in mind in connection with this sale of liquor for medicinal purposes. Take this country in winter. There are a number of settlemente which from one end of the winter to another do not see a doctor. There is a great body of medical opluion which considers the use of atcoholic liquors as necessary in medical practice. Now in settiements where there is no doctor or druggist the people are prevanted from obtainIng Uquors for medteinal purposes. I think it would be well to consider under what conditions peopte living in fuch settloments would be able to obtain liquor for medicinal purposes.

MR. MORINE.-I would auggest that the Leader of the opposition preparo, an amendment wholi can be put in tho Bill at a later date.

RT, HON, PRIME MINISTER.-The election under this Act is not going to take place until next November. This Legialature will be meeting iggain betore the Act goes into operation. and if any amendment is needod in the meanitme it can be made. This is merely an outline so that the pablic Who are golng to vote on the Bill may be fully a ware how it is going to be worked out. After all there are only two matn points in the Bill first that an election will be held; and secondly that prohibition will come into opera-
tion on a particular day if sufficient votes are cast in the alilimative. The Legislature will meet again before that day and any necessary amondments will be made. It was thought denfrable to put as much as possible In the present bill, so that the public who have to vote on it would be informed of detailis.
In reference to the fees to be pald they will be as follows:-fieturning Ofricer, $\$ 25.00$; Election Clerk $\$ 20.00$; Deputy Returning Officer, $\$ 7.50$; Poll Clerk, $\$ 6.00$; Booth HIre, $\$ 5.00$. These reductlons have been made as the work will not be difficult and they will requce the coat of the election considerably.

MR. COAKER.-I beg to propose an amendment that instead of the words "forty per cent," the words "thirtythree and one third per cont." be inserted.

MR. GRIMES. -1 beg to second the umendment.

The amendment was lost.
RT. HON. PRIME MINISTER:-I would the to ruggest a slight alteration in clause 18.

MR. MORINE-I would suggest to the Premiler that when the Bill founded on these Resolutions is brought down it would be wise to have a speciat clause in it providing that mansfecturers may obtain liquors necer eary for mannfacturing purposes from the coatrollor.

RT. HON. PRIME MINISTERThat is provided for in Section 25.

MR. MORINE.-That section says: "It shall bo lawful for him to have in lils possession, \&e."; but there is no provialon where he is to get it. There phould be a clanse providing that the manafacturer is to get it from the controller.

1 would like to make another sug. gestion with reterence to that clause on page 5 providing that Aruggists, \&c. shall heep a record. You will
notice the fine is for giving liquor. There is no penalty for a failure to nupply the record called for under the Act. I think also there should be a proviston to the efrect that the controller ruake an anamal report to the Legislature of the work under his control.

Mr. Speaker resumed the chair.
The Chinirian from the Committee roported that they had conaldered the matter to them referred had pasaed the Resolations with some amondmeats, and recarmmended that a Bill be introduced to sive effect to the fame.
On motion this report was recelved anil adopted, and the Bill entitled "An Act Respecting the Prolifition of the Importation, Monufacture and Sale of Intexicating LAquors" was read a first fime, and it was ordored that it be read a secand time on to-morrow.
GRAND BANK WATER CO. BILT,
Puriuant to order and of motion of rt. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to consider cortain refolutions relating to the providing of is water mupply for the town of Grand Bank.

Mr . Ppeaker fert the chait.
M.. Earsons took the chatr of Commiltee

RT. HON. PRIME MINISTER.Mr. Chalrmal, these resolutions have been founded on a report made by the Government lingineer in relation to providing a water supply for Grand Barnk, in the Dfatrict of Buriu. I propone to table the report of the Government Englneer, so that before the matter is pinseed by the House every member of the committee may have uni opportualty of reading Mtr. Halls report: The sabstance of the report ts that having rialted Grand Bank and baving made a very thorough examination of the wator supply there be has reported in favor of providing a water aupply for that town, and be
has made an eatimate of the cost which is somewhere in the victnity of $\$ 85,000$. Now the people of Grand Bank have asked that this Legislation be enseted, and these Resolutions are founded on the existing leginlation dealing with Placentia, Carbonear, Harbor Grae, and other towns in this Colony that at present bave a water supply. In the case of Elacentia, the original stock there was, I think, $\$ 8,000$ and it is now $\$ 16,000$. The Government guarantee has always been met and they have always paid the interest In the case of Carbonear the capital stock amounts to $\$ 40,000$ and in the case of Harbor Grace to $\$ 76,009$. Now the Government Fngineer estimates that the cost of this undertakfing will bo $\$ 36,000$; but in order that ftere may be suffecient wo are going to aak in the Bill for $\$ 40,000$. In addition to the ordinary manner of meeting this the people of Grand Bank are satisfied that a tax on eoat going into Grand Bank be tnserted in this Bill in order that they may be able to meet the thterest on the guarantee.

Now by the first section of the Bill you will notice that the people to be incorporated are Ceorge A. Buffet, George R. Foraey, George Bell, Samuel Marrls, Johin B. Patten, William Forney, Simeon Tibbo. Thomas Foote. A1lan MacDonald, M.D.; Aaron E. Butfett, George C. Harris, Samuel PlerCey, John H. Forsey, Lionel B, Clarke. Robert Dunford, Wiliam Weod,George Dunford, John B. Foote and Thomas Stoodley.

These names that I have read will be a sumiclent guarantee to this House that the directorate of this Company will consist of such men as to ensure success. I hope that other important places in the Colony may be able to avall of a similar guarantee. Thls question of vater supply is an Importnnt one. A great many of the
settlements are so small that it would be impossible for them to have a water supply. The whole question will lave to be taken up in relation to wells before long. In many of the settlements the water is not conducive to the health of the people. There should be an arrangement that will prevent tmpurities of any character from going inte the wells. The water should be tested and then a concrete wall and a cover on top should be put there in many places everyone that comes for water rinses bls bucket into the woll, and forelgn matters are thrown into thom. Some comprehensive scheme will have to be thought out and some aystem adopted to keep the water pure and from freezing in winter.

The sections on this bill are based ou the Placentia Water Company's Act. 1 will draw the attentions of the committee to any aiteration.

Mr. Speaker resumed the chatr.
The Chairman of the Committee reported that they had convidered the maiter to them referred, had passed the Resolutions and recommended that a Bill be introduced to give effoct to the same.

On motion this report was recelved and adopted, and the Bill entitled "An Aet Respecting the Grand Bank Wator Company." was read a first time, and it was ordered that it be read a mocond time on to-morrow.

Mr. MORINE.-Mr. Speaker, I wish to make a personal explanation before thls House in reference to what some newspapars have been saying, namethat I am compensated by the Harmsworth Company for protecting their interests in opposing the reaolutions in relatton to the Newfoundland Products Coporation, Ltd. I wish to say that I receive nothing from the Company for my work liere I have no interest in any way in the matter.

PATRIOTIC ASSOCIATION BILL.
Pursuant to order and on motion of RL. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to consider the Bill entitled "An Act relating to the Nowfoundland Patriotic Association."

Mr. Speaker left the chair.
Mr. Parsons took the chair of committee.

Mr. Speaker resumed the chatr.
The Charman from the Committee reported that they had considered the matter to them referred, and had passed the Bill without amendment.
On motion this report was recetved and adopted and it was ordered that the Bill he read a third time on tomorrow.

CUSTOMS BILL ANENDMENT.
(Councll's amendments to Customs Biil.)
hon. MINISTER FINANCE AND CUSTOMS.-Mr. Chairman, I do not see any reason why we should not pass that bill. Wherrtage has atways been charged and we did not dispute it.

Mr. KENT,-Mr, Chairman, I do not raise any objection to the matter itself. But it introduces contusion in. to our law.

RT. HON. PRIME MINISTER,-1 thint it culte reasomable that this should find a place in our Castoms Act.
Mr. COAKER.-Mr. Chairmnn, in regard to this amendment, I might ask the Government if they are prepared to go on record as taxing flour two cente a barrel more. I fall to see Why the Government should insert thls umendmeat at all You are simply accommodating the men in the Upper House. I know better than some of the members of thils House why that amendment was put there Why should we protect them?
Pursuant to order, and on motion of Rh. Hon. the Prime Minister, the amondment made by the Legislative

Councll in and upon the BIII sent wD entitted "An Act to amend the Customs Act, 1898" was read a second time, and concurred in; and it was ordered that a massage be sant to the Legishative Council acqualnting that body that the House of Assembly biad passed the suif amendment without amendment.
The remaining Orders of the Day were deterred.
MR. HALFYARD asked the Minister of Publife Works (a) What amount is paid annually for fuel and cleaning Conception Harbor Hr, Main and Holyrood Court Houses, Givo a detailsd account of expenditure of same; (b) Give a detalled nccoumt of Expenditure of Spectal and Maln Line Granta for Conception Hr, 1909-10 and 1910-11.
MINISTER OF PUBLIC WORKS. That angwer will be tabled to-morrow.

Hon. Colonlal Secretary tabled the Roport of Newfoundland Savings Bank for year 1914.
Mr . Hallyard gave notice of question.

VOLUNTEER FORCE BILL.
Rt. Hon. Prime Ministor gave notico that he would on to-morrow ask leave to introduce a Bill to amend and continue for a further period the Act 5 George V., Sess, 1, entitled "An Act Respuoting a Volunteer Force in the colony."
It was moved and seconded that when the House rises it adjourn untit tomorrow Thursday, May 90th, at three of the clock th the afternoon.
The House then adjourned accordingly.

THURSDAE, May 20th.
The House met at three of the clock in the afternoon, pursuant to adjournment.

## PETITIONS.

MR. WALSH. -1 beg leave to present a pettion from 180 fnhabitants
of South East and North East Arms of Placentia nsking that the boundarfes there for net fistiery be extended. I have personal knowledge that lat gear there were over 40 nets spread over the present area, and this great number meant that they were considerably crowded. As the sulmon caught here average in valuo about $\$ 4.000$ it is my belief, slir, that it should be encouraged as much as possible, To bave theso limits changed would not affect anglers at all, but would be the means of giving the residents an opportunity to eatch lots of salmon at the proper season, rathor than catch lots at a time when halt of them would only be good for fertilizer. Then better results could be had whon tho spawning commences.

1 bope that the Government will consider this matter and deelde to grant the request of this petition. I would assure them that the cause fa a doserving one, and I have no doubt but that the Minister of Marine and Fisheries will give It a suitable recommendatlon when the time comes. 1 ask that it be referred to hifs department.

MR. F. J. MORRIS,-1 bave pleasure In supporting this petition, and 1 misht say that some three or four years ago 1 presented the same petition. That potition was referred by the Minister of Marine to the Fisbery Board, and they refused to endorse it. The people have put up with it thus long but now are asking for this reasonable alteration. I would andorse all that lias been sald by the Introducer of this petition, and would express the hope that it will be favorably considered by the Government:

MR. DEVEREAUX.-I have much pleasure in supporting this petition. The people presented a slimilar one through my colleague Mr. Morris some yenrs ago. There is a great deal of
foeling over this matter there, espechally in the arms interested, and the people are demanding their request. 1 would strongly urge upon the Goverament that this request be acceded to, and that these boundaries be extended as the peoplo ask.

RT. HON. PRIME MINISTER.-I am sure that when this matter comes Sefore the Government, every conaldsration will be given to it.

MINISTER MARINE AND FISHER-IES.-I remember this petition being presented some years ago by Mr. Devereanx, the hon. member for Placentia, and it was referred to the Board of Fisherles. That Board sent Mr. Croke to examine into the conditions, and their decisfon was the result of this report.

The first thing to be done when thls pettifon comes before the Board will be to liave another investigation, and If the investrgation approves of the widenlag then it will be done. I would bay that personally, I endorso what my friend, Mr. Walsh has said, und hope that the request of the inhabitants of this portion of his district will be granted by the Board in charge of this work.

MR. KENT. -1 would like to repeat, that there is considerable feeling at Placentia about this matter. I would sirongls urge that a thorough general firvestigation be held, and that this matter be adjusted to the satisfaction of all eoncerned.

QUESTIONS,
Mr Clapp gave notice of question.
Mr . Winsor zave notice of question. Dr. Lloyd gave notice of question.
MR. HALFYARD neked the Hon. Colonital Secretary to lay upon the table of the Hoase a statement shewing the names and ages of the Old Age Pensioners residing at Collerli, Ini the District of Harbor Main.

HON. COLONIAL SECRETARYIn answer to the hon, member I may say that thls matter is in the Depart-
ment of Finance and Cuitoms All Old Age pensions are pald in thast Depirtment.

MR. HALFYARD anled the Minia ter of Publle Wurks to lay upon tas table of the Heune a statement showlige the amount of money sent to Cob ller's, Harhor Main Dintrict, daring the years 1913 and 1914, on necoumt of Main Line, Local und Spechal Crants, and the coples of all retaras tor kame, wherover retarns hinve been recelved by the Departuient.

MNISTER PUBLIC WORKS.-That statement is being propured .

MR. HALFYARD nsked tho Hon Colontal Secretary to lay upon the table of the House coplee of the re turne for Poor Relief in the Distriet of Foga, for tha Quarter elillig Mareh tivt. 1915.

HON. COLONIAL BECRETARYI loge to lay on the tuble the litformathon askel for. This is an corigtinal decument, and 1 woald nak that it be carefully looked after.

MR. HALFYARD anlied the HiL Hon. Fremier, In tho abnence of the BfinIster of Agrictiture and Mines, to lay upon the table of the Honme a statement shouing the ammber of sheep. bulle, and plgs; the pricea paid for each; anil all vauchary for same; hought from Mesarn. LeMtolne Bros,. of Sydnoy, during the yoara 1012 and 1913.

RT. HON. PRIME MINISTER.That is beting prepared. I hope to be able to tatle it hare next dis.
Patriotic assoclation mill.
Purmant to oriler and an motlon of Rt. Hom, the Prime Minister the Bill entitled "An Act relatiog to the New. foundland Patriotle Aunoclathon' wai read a third time and possed, and it wat oridered that it be carrossed bethig entitied an mhove, and thint it be sent to the Lenislative Councll with a teenange requeatisg the couriminsie of that body in its groviaionil

## SAWMILLS BIL.

Puriunne to ordar and ost metion of Hi. Hon, the Prime Minkter, the Hasen resolved itself into Commaltee If the whate to coturtdir the Leklyfalin Council's amandmants to the Saw Mulis Act.

Mr Speaker left the ehatr.
Mr, Parnane took the Clair of Comtultted

RT. HON. PRIME MINISTER,-MF. Cthalrmun. it will be rememhered that eariy in the sameton aw amenilment Wiai fritrodiond in relation to the saw Mrili Aot, oul the amendments which the Counch lass mode I shall be glid to explain. Thore fin, in the firet fruce, lin amentment proposed by efding the followisg avords' to nection 1: "But any person actually engarad Hir the comatruction of kay broif or Vesul may be pramitted to have nuch duluittly of lumber as miay be biona gite sefurnot tor such actual conItruction kiwn or manufactured in a sav mill and woth salinis or manufieture shall not bin a violation of the privisiotion of thite Aet"- In rection 2 it tin propoited to strike out the words Fouse ymar" and substitute "elghteen monthe" When the Act went up from liere the sectinn ruad "twelve monthe". Then it tr proposed to adt has a now aection 1; "Section 1 of Aet 4, George 5, Can. 17, entitled CAn Act rempecting the Operation of Sus Millit In hernby smended by the addiflen of the following sul-sectlon: (b) The guantity of timber wheh a thestain under thin woction shall be permitied to manufuctury in whaves or duading for maklis lurrels for finb. ecy moutrimitite of for the making nof nhingias lobster lathas or lobater dosus shall not excend a tomp of 60 . 600 feet board meazte in any one Fear. ${ }^{-1}$ wili be remembered that in this wection thete are a pumbor of tebsemfont deffritric the varfouir conelitions that ury to form part of

Heanse. Now, it Is proposed to add thile addfilomal one. It seems that this will be a reasonable Ifmitation for this elass of mill. Then section 2 is amended by strikitig out the words "On what is known as the three mille Itmit," $s 0$ that the Heense will ouly apply in the future to places outside that arch. Then this is added as a new nection 3: "Gection 3 of the suld Aet is hereby ampnded by striking eyt the arords ${ }^{2}, 000$ berring barrel staves ehatl equal 1,000 feet board methime" and substitutise cherelor the following: " 2,000 barrel staves shait squat 1,000 feet boarit measure." The only change there is leaving out the wrort "herifng," Ind makitug it "barrel staves" instead of "herring barrel staves." Herring bartel staves was used ts the standard in last year's Act, and thore appears to be some doubt as to what is a herring barret stave.

Mr. Speater resumed the chail.
The Clairman from the Committee reported that they had considered the mitter to thom referred, and had pass eil the ameniments without amendmenta.

On motion this report was recefved and adopted, and the amendments betog read a second time and concur. red In . It was ordered that a message be sont to the Leglslative Counell aepuninties that boily that thif Honse had passed the smendments without amendment.

## PRODLCTS CORPORATION AGREEMENT RESOLUTIONS

Tursuant to order and on motion of Ht. Hon. the Prime Minister, the Houre renolved Itself Into Committee of the Whole to conideler certaln fesolutions, in relation to an agrecment sntered into by the Goverament of the Oolong with the Newtoundtand Productis Corporation, Limited.
Mr . Spenker left the Chair.

Mr. Parsons took the chair of Comfalttee.

RT. HON, PRIME MINISTER.-Mr. Chalrmisn, in relation to the reaolution which we wese discusslag the Inst time wa were in Commlitee, I have hind thls section redrafted, and I think everything of any Importance that was auggested by my Iearned friend, Dr. Lloyd, the hon. member for Trluity, has been inserted, except that this afteracoon he has drawin my attenfon to the fourth last Hoe, and sug. Rested that the words "on thelr said property" be stricken out, as being wordil of limitation, and I agree to that. Then, in relation to the resolution on page 5, the second last on the page, I want to move the reconsideration of that and still further reduce it from 25 milles to 20 miles.

Mr . Spaaker roaumad the Chatr.
The Chairman from the Committee reported that they had considered the matter to them referred and had passed the Resolutions with some amendments.

On motion this report was recelved.
On the motion for the adoption of the report, Mr. Kent moved and Mr. CHift soconded the followlis amendments:

1. That Resolution 2 be amended so to read as follows:

Resolved-All construction materfat and machinery for the Company's mills, fectories and works for the purpose of manufacture of phosphate of atumonla, piftrate of ammonla, and other fertillzers, carblde of Calelum, vement and their by-products both for original installation and further exfenifon, but not in substitution for old, Imporied into this Colony within twenty years of the enactment hereof, shall be admitted free of Customs dutles.
2. That Resolution 3 be amended to as to read as follows:

Resolved-All lands, waters, water powers, bulldings. erections and all
property whatsoevir of the compaty for wse to connection with the manilfactire of phosphate of ammonin, pitrate of ammonia, and other fertiliseric carlite of catctum, cement, ar their by-products mitaate at Bay of Inlands, of within the drainaga areas of the Humber, ar whthin the Aralnapt area of Corner Brook, or within a radias of ten millen from the mouth of Comer Bruok, or nt tahirador. whall be exempt from Munlelpal taxutton durtug twenty years from tho enactment hereof Section of of the asreament in the Schedule hereto whall be liefd to thelude outy mueti tands, waters, whter powers, buildfagn, erectlons and property $m$ aro for use in connection with the manafacture of phosplate of ammonta, uftrite of ammonis, or other fertilizers calclum carbide. cement, of thetr byprodnctir situate an lant mentloned
2. That revolution 4 the amemted so as to read as follows:

Resolved-That atock. dividenis, dphentures, tebenture stock, mortfagion and other mecurttes of the Compeng shall be exempt from taxation durfng twenty yearis from the onictment theroot.
4. That remolution 5 be amended so us to reud as followe:
Resolved-All phosphate rocis. pyriter eloctrodes, moda, und bugs and pactaigee for dtatribution of the Compong's products required by the Compary for the purpose of the mermfus: tare of pliosphate of ammonia, nitrate of ummenia or other fertilizers, ealclum cartide, cement or thelr byproducts timportint tito tith Cotony wittifn twenty swarn of the unactment heroof ahail be free of Custome tation.

If That resoluitoin to he ammoted so as to resid as follown:

Itemolvel-All coil regiareal by the ecmpany for the purposes in the next procoting remotuttor mentionet im-
perted inte talinulor withis twenty years of the enactment hereof shull be friee of Customs duties.
6. That resolution 4 be amended so- as to rend as follow:s

Resolved-That exemption from thxstion upou the stocks, dividenils, dethantures, itetuature stork, uiortingen and ather socuritien of the Company shall inelude only ewel tetocks, divi. tends, đebentures, debenture utock, mortgages or other necurities is are bons fido required for the surpose of or relate to or are derived from the workit buslaens or operations of the Company in relation to the manufacture of phosphate of ammonia, aftrate of ammonia and other fertiliaers, catbide of calimm cement, and thetr byproinacta.
7. That resilution 11 be amended so as to read as follows:

Resolved-The expendture by the company of the sum of tive million dollarn, provided in section 15, in anit abont then husisers and operattons of the company, shall mean min expendlsure nt Bay of falands and or within the drulnago area of the Humber; tud or within it radlus of ten miles of the month of Carnor Brook, in and sbout the construetion of dams, buildIngn, docken, and transmission lines for thin tuithmis und operitions of the sompeny In and about the manfac: ture of phomphate of ammonith, nitrate of amminalu, or other fertiliaers, calclum carhite, cement or thelr byproducts; anil the fellure to becin actual Conatractlen work or to expend auch inosey whith the times montionod chall alimotately preteat the compaty froun taking or holling any zichts 3 hateve: molor any section of the Intenture of the Schotate hereto and the indentare, the demise amCor Scetion 1 thereof, and the grant tuiter tifithon 1 thereot, initf bit whot Is weid ab lultfo.

The word "begis" th the satd see-

Hon whall mean the expemditure in construeten of not lese than one humfred thousand dollara within two ycara from the enactment bereot; and not Ioks than five hundrent theusand dollius shintl be expenilea in the worle of construction each yeir for two yearit thureafter
8. Thit resolution if be zmented so as to reall ate followa:

Renolved-The right of all permons to drive their logs of timber down any stream, Ilver or other boily of water. es by law or cunton Eatablished, shull not be interfered with lousened or restricted by anything hereln or lis the Schedule lereto or In any teuse or grant hereunder; and if aby dam, weir or othar structure be erecteat or bufft ft cpunection with development work by the company, with the object, intantipn or effect of damming the water or fimpeding the flow thereot, fill and proper provision shall be made by the company for the safo and convenient pasilage of logn end ttmber over and throush the same.

The company shall not destroy or obstrnct the passing to and fro in bonts of any river, strenm, pond or body of water; but shall furnieh streh locks, canids, pastages and other means in mily the necessary for the proper and safe curmounting or passIng of any dams, weirs or other work made or erected by the company.
If That the pollowtng additionat prasidments be atoptel;

Resolved-Durahle and efficient log aluices, and flah ways for the free pasgage of flall at all times and noasons, shall be coustracted by the enmpany min or ahout all dams to the saflafacthan of the Mintatar of Marine and Pteharlen:

Reablved-Not hater than the lirnt. day of Jamuary, 1917, the company hiliift pay over to the Nintster of Jinamee the sum of one million dollars, which shail be held in trust as necur-
ity for the peymant and compensation of all Jugements and uwards by arhltration agninst the company hereunder, made within six years from the enactment hereof, and the amount of kany such Judgment or award not paid by the company withis one month from the date thereof shall be pafd cut of the sald fund. The balsince of such fand tegether with interent at $31 / 2$ per centum por annum computiod arinully, shall be repaff to the company at the end of seven years from the enactment hersof. Upon fallure on the part of the company to comply with the provislons of this soction, the nald agrement and all righte, lenees and grants thereunder shall cetise and determine and become vold.

Resolved-Nothing contained herein, or in the schedule of this Act, shall fake from the publlo or any member thereof, any right now existing by law or eustom to fish, shoot, lunt, and trap, or of navignting straams, rivers and Takes, and to malntain thereon. for use in such navigation, any lind of xeren) or bont.

Resolved-There shatl be rewerved to the Government of the Colong a rifht of way throukh the areas here by daminod for ronds, railways, tolegraphs and telephone lines, except overlauds covered by bultaliags.

Resolved - It shall not be law. fal for the company to enter on or tation any land under the provisiona of fuction 10 of the setiedute thereot exsept withiti is perfod of five years from the ennetment hereof.
flesolved-The company shall develop and utilize the water power bareby demised by the construction of necessary works and the fistallation of suitable and neceaary plant not machinary for the production of some form of power to the extent which auch powers are reasonably capable of plywically, and whall use
the power so developed in the operation of machinery or same other commercial, mechanical or industrial purpose, or if the said power so developod or any part tuoreof shall not be required for such purpose or purposes by the company it shall furnish powor to any person, company, or corporation requiring the same up to the amount of power which the sald wator powers are reasonably capable of developing, or such legser quantity as shall be actually required or in demand. Upon report being made by the Government Engineer to the Governor in Council that the water pow. ers aforesald have not been developed and utilized to the full extent of which they are physically capable by the works construeted or the plant and machinery installed by the company, und that there is a bona flde demend for power in excess of the quantity of power developed and utlized by the said company which might in whole or in part be supplied from the water povers aforesald then the Governor in Councll may by Order in Council require the sald company to develop and render avallable for use the additional quantity of power so shown to be undeveloped and capable of derelopment or any part thereof, by the construction of the necessary works and the installation of suitable and necessary plant and machinery within a pertod of thme to be named in the said order, and in default of compllance with the said requirement the Governor in Councll may order and direct that the lense and grants hereunder or any of them shall be forfeited and cancelled and the same shall bo forfeted and cancelled accordingly.
Resolved-Notwithatanding anything contained in the indenture appended, the company shall have no risht of renewal of this demiso when the te:m exptres at the end of 99 years from these presents

Resolved-Except as hereinatter provided no adult male person shall be employed by the company at a lower rate of pay than twenty cents per hour; Provided that this shall not apply to persons who are given board and lodging by the company while in its employ

Resolved-The provisions of section 4 of the agreement forming the schedule hereto which provides that "notwithstanding anything contained in Chapter 109 of the Consoltuated Statutes (second series) entitled of Patents' such letters patent shall be valid and continue for and during the perlod of twenty-one years from the date of the original patents" shall behold and construed to fnclude in the provistons of Section 12 of the sald chapter, but all the other provisions thereof shall fully apply to the said patents and each of them. Nothing in section 4 of the sald agreement shall be held or construed to prejudice or affect the rights or interest of third parties.

Whereupon the House divided, and there appeared for the amendments, Messrs. Kent, Clift, Lloyd, Clapp. Dovyer, Hekman, Grimes, Abbott, Winsor, Target, Stone, Halfyard, Coaker, (13); and against It Rt. Hon. the Prime Minister, Hons, Colonial Socretary, C. H. Emerson, J. C. Crosble, Minister of Marine and Fisheries, Minister of Public Works, Messers, Devereaux, Downey, M. J. Kennedy, Morrls, Moore Moutton, Parsons, LeFontre Currie, Higgins, Geo, Kennody (17); so it passed in the nogative.
Wheroupon the orisinal motion was put, and there appeared for the adoption of the report, Rt. Hon, the Prime Minister, Hons, Colontal Secretary, C. H. Emerson, J. C. Crosble, Minister of Marine and Fisherles, Minister of PuDlic Works, Messrs. Devereaux, Downey, M. J. Konnedy, Morris, Moulton, Parsone, LeFouvre, Currie, Hig.
sins, Ged. Kennedy (17): and againet if Meesrin Kent, Clift, Hoyd, Clapp, Dwyes, HTekman, Grimes, Absott, Winsor, Targett. Stone, Halfyard, Coaker (13): so it pasaed in the affirmative and was orderod accorting: Iy.

On motion this Bill entitled "An Aet tor the confirmation of an agreeramt entered Into by the Government of the Colony with the Nowfoundland Product日 Corporation, Lirmited* was reat a first time, and It was ordered that it be read a second time on tomorrow.

## BANK FISHERY BILL.

Pursment to order and on motion of the Minister of Marine and Fishorios the Heuse remolved Itsalf into Commiltee of the Whole, to comalider the Bill entitled "An Aet Hespecting the Bank Fishry."

Mr . Spealker left the chair.
Mr. Pareonis took the Chatr of Committen:

MINISTER MARINE AND FISHER-IES.-Mr. Chairman, I have nothing else to say with regard to thly bill. I gave an explanation of what it was for, tha mufoly of oit flumermen witte at the hanki. I um wure that evary member will support this bill I do not think that any more can be added to it.

MR. COAKER.-Mr. Chairmat, I have no objection to make to this blll, and I dou't think that anyone atise will lave any objection to it; but I do wonder why it took so long as it did, to provide stuch a meastre. I inif glad to see thild the Minister lif falcing an axeoptional lintereat in the fthermen, and I hope that moxt year when we meet, we will find that he will bring dowa quite a number of hills in the Interests of the fishermen. 1 notfee that the Upper House oppuras anything that the Ftahormen's Thifon introduces, Ho we wautd rimher that the other side Introduced such menturen,

MA. MOULTON.-Mr. Chajrman, 1 Hgree with this blll and will certainty support it. There onght to be more Iife belis on board of these bankers. While I agree with this bill, I whould Hike to luve it include not only bankers, but all schooners. Every person pught to bo forced to hive a life belt oin the water. But neverthetess I heartily agree with fhis bill.

MINISTER MARINE AND FISH-ERIES.-Mr, Chairmun, I may bay that the bill covers all these clanses of schooners. The bank fishery schooners form in clase in themselven. All those classes are in that act; But like a great many other taws, they tave never been carried out. I think that the customs officer shoutd livie the authority to go and look over the ships to soe that the act is carried out Go arouni to the customs officiale clear of St. John's and aele them for the Merchant Shipping Act, pud you will find that they don't hoow what it means. I advise that they should sll have one, they cost but 15 shiltugn. I asked Mr. LeMessurler if they liail ever been aent uround; Every thnu should have theso acts, and 1 think that from now on. that lew will be enforced.

MR. LeFEUVRE-Mr. Chairman, I think that this bill will meet with general approval, and I have every renects to belleve that it will. There Is on the net a regulation regarding constal versels. As a matter of fact a man lias a much better chance of being rescued from a banker, than from a coanter; because thare are comparatively hut a fow men on bourd of a coaster But I hope that our renseln will bie notifled that this act th now in force. Wo know what diversition of regulations there are in regard to thuie. The rutes in one part are different from the rules in enother part. The people are not acqualnted with those rules and it is very necesmary that they should know them. 1
hope, Mr. Charman, that this bill will be enforced. I hope that it will not be put on the Statute Book and left there unobserved, but that it will be carried out in every particular.

MR. STONE,-Mr, Chalrman, 1 have much pleasure in aupportiog this bill. I belfeve that it is one of the class that ought to have been introduced years ako. We should all support a measure of this kind. CataHas, my native home, has alway been a banking centre untll recent years, But even now many of the captaine who go to the Weat Const, come from there. The first banker sailed from there under Captain John Hiscock. Mr. Chairman, I kive this bill my hearty support and hope that before long other bills of the same nature will be introduced.

Mr. Speaker resumed the chair.
The Chairman from the Committee reported that they had consldered the matter to them referred. and had pansed the Bill withont amendment.

On motion tals repert was recelved and adopted, and it was ordered that the BIII be read a third time on tomorrow,

## PROHIBITION PLEBISCITE BLLL

Pursuant to order and on motion of Rt. Hon, the Prime Minlater, the Bill enttied "An Aet reapecting the Prohilb'tion of the Importation, Manufacture. and Sale of Intoxicating 1 Iquore" was read a second time and it was ordered thet it bo referred to a Committee of the whole House on to-morrow.

## GRAND BANK WATER CO. BHL.

Pursuant to order and on motion of It. Hon, the Prime Minister the Bill entitled "An Act Respecting the Crand Bank Water Company" was read a second time, and it was ordered that it be referred to a Committee of the Whole House on to-morraw.

WAYB AND MEANB,
Purnuant to notice and leave granted. ind on motlon of Fon. Minister of Flinance and Customs, the House resolved itself into Committee of the Whole on Ways and Means.

Mr. Speaker left the chalr.
Mr . Parsons took the chair of Committe.

HON. MINISTER FINANCE AND CUSTOMS.-Mr. Speaker: Thia if the seventh occasion upon which 1 have had the privitere of presentlag the annual financial statement of this Colony. I would be very pleaned if I could address the House in other ctrcumstances than those by which we are aurroanded, ae the reanlt of the terrible war now Gevastating Europe. The hostilities have changed the entire financial aspect of the world and even our Colony his not been free from the effects of the distocation of commerce which the struggle has brought about. On former occasions I have been able to hold up tha bright slde of the shield, but this year, white the aspect might be much darker. I regret that I cannot apeak of expanding revenues or the substantial increases in production which have been the record for years past.

This, of course, is not a condition in which Newfoundiand is in any way peculiar. It is common to all portions of the Empire und the whole of the world, more or less, has been thrown Into finenclal and indusirial depressson, the extent and duration of whel no man cun predict at the proaent time. We have but one duty to perform, and that is to face the alfuation with fortitucte, and to romember, moreover, that during the paat genernfion this Colany has passed thrangh pertods of depreesion; when no war it all sffecied the situation, quite as bertons as this. and each time we have weathered the storm and emerged from the perfod of trouble and
ansiety smiling and prosperous and with renewed contidence in the future of our Island home.

Without further preliminary I slanll now proceed to deal with the figures covering the finamelal year ending on Jume 20th, 1914, respecting whteh I can offer a completed statement; that respecting the present financial year, which ends alix weelts henco and rospecting which it is possibio to approximate very closely what the position will be when our books are closed; and that for the nimanelat year which ends on the 30th of June, 1915, and regarding which I can only say that, in the light of existion and prospective ovente, I must rek the indulgence of the House.

The position regarding the financlal year that closed last June has been more or less anticipated by statements already presented ith this House, and it will sumfice, I think, If I merely state just now that for that year the Revenue of the Colony on Gurrent Account was $\$ 3,618,828,85$, being $\$ 300,711.58$ less than that recelved for 1912-13, which was $\$ 9.919,040.49$.

The only hoads of rovenue whtch inereased wero those of Postal and Telegraphs, from $\$ 203,987$ to $\$ 215,125$, an aitvanice of $\$ 11,13800$. Crown Lands from $\$ 105.009$ to $\$ 145.021$, an advance of $\$ 81,012.00$. Inland Revenue Stimp trom $\$ 16,646$ to $\$ 18,152$. in advatice of $\$ 1505$, and the fees of the public institutions, whicls rose from $\$ 3,905$ to $\$ 4,459$, in advance of $\$ 494$. On the whise hand, there were decreases in Customs Revenue, from $\$ 8,288,304.00$ to $\$ 3.088,818.00$, a diminution of $\$ 199$. 001; in taxces and assosemente, from $\$$ 㩆.729 to $\$ 38.651$, a drop of $\$ 17,077$; in Fees of Penitentlary Broom Department from $\$ 11,617$ to $\$ 9.340$, a decline of $\$ 2,377$; in intorest on guaranteod toans from $\$ 58,396$ to $\$ 56,314$, a short. afs of $\{2,082$, while in miscellaneous there was a drop from 884,765 to 836 , 736 , a shortege of $\$ 48,025$. The inerease.
in the Postal and Telegraph Revenue is a general advance due to expanding husiness, and maintains the average rate of increase which has continued for the last decade. Tho fnerease in Crown Lands is due to the payment, after the elosfing of the account for 1918-13, of large amounts of arrears socumulating for several years and enforced at that time. The increase in Inland Revenue Stamps, Hke that in Postal und Telegraph revenue, is due to the srowth of business. The decrease in Customs revenue of practically $\$ 200,000$ is of course, explained in part by the duty-free importatim of tea, sturar, pork and salt beef, there not being the expected increased import of other articles which pay duty. The shortage on the guaranteed loans is due to the fallure of the Harbour Grace Water Company to pay its interest on its stock. The Penitentfary Broom Factory has not been able to do as much business as in previous years; hence the deelline there. The big shortage in taxes and assessments is due to the Direct and Western Union Cable Companies declining to pay the annual tax on their cables on grounds that are now before the Courts to be passed apon. The large shortage, too, in miscellaneous and general Revenue is occasioned by the reduced receipts on sccount of the interest payable on the loan for rallway construction deprisited in the local banks, and also by our credit balances in the Bank of Montreal being smaller than in the provlous year.

The expenditure during the current y car 1919-14 amounted to $83,928,178,21$, ani Sncroase of $\$ 111,616,79$ over that for 1912-18. This is spread virtually over the whole of the heads of expenditure and was obiligatory in order to properly carry out tho public services.

With a revenue, therefore, of $\$ 8$,
 szo.tits 21, there is a defiet of beet. sussc. er, in rucoil firurse pamenot.

For the current fiecal year the poestoos is an fotlowa: The Reveaur tor then twe mowths wetter ealedt in Agrit fith amounted to 12.451. bris and I est1-

 pois the Kapenditure for these tea anumber was $12,876970.00$, wnd the oircimated expendilare for Mey and Jung
will be $\$ 1,188,000,00$, a totat of $\$ 4.014$. 520.06. Thls will teave a detict for the year of $\$ 714,592$, but we have available the remainder of the canh reserve, $\$ 198.900$, and we propose to apply that towards. reduelag the groas theflet, wo thin we therefore entimate that there will be, when the accounts are spumed, a shortage of $\$ 516,000$, which is emproviled for. We propose to ralse a loan to meet this ahortage und a Bill with that object in wlow will be introduced in a day or two.
In puasing I might say that the funded Pablic Debt of the Colony on the 20th of April was $330,450,765.27$. We also have a floating debt, ocens foned by our raising temporiry touns from the Bank of Montreal of \$460.D00 in phace of loans authorised at recent sessions for the same sum, but which for the reasons niready given were not easily floatable to the local market and now we propose the rals: fige of a loan of $\$ 518.000$ to meet the deficit on thle year's aceount. This will make our puhtie deht, an June 30th, roundly $\$ 31,500,000$. Besides that, as the Houne fin aware we have mide provision for a war loan from the lmp rial authoritien of $\$ 1,000,000$ on aswaunt of wheth there hat been expended, roughly, about 8500,000 , and It miy be estriated that the remainder of the amount will be exhausted br the end of December, Our obligar. tions, therefore, at the end of 1915 will total $\$ 32,500,000$.
1 will anticipate any criticiste that many be made in regand to the altuation In the Colany at preaent by polnting out that the conditions which peevail liere todiny are only what extet th every other part of the world, and that the record of every country of which we know: is that of thefleite and the inevitable expedienta which these combpel, for miking each country's accounta square so far an is ponefhle.

In the United Staton the Treasury

Department, aiter the outbreak of the war, mate proviston to cope whit an Expected deficit of $\$ 100,000,800$, althourch the Walted States is not at wir and has not a man to the fleld. in Camads, where participation in the war fins becn imdertaken ox a sulbstantial scralo, in very henvy deffect will aline, it is nitmitted, have to be faced, apart from its war outhy-and this will be increased in proportion ns Canada enlarges her contingent for netive service. With reference to other countrles, it te in the knowledga of every one whe hours me, that in Europe the nationa are burdenigg themselven with obligations that will conthrue for at least a meneration, in the endeavour to do their part in the strusghe whicts is now being carried on Gere. Morsover, the paralyatug ef. Fect of the wur on the worlids trace Even that of neatrat countries, in well Illautrated by some returns just made pultilc by the Department of Commerce of the United Statex. Allhough It was tredicted at the outset of the war that America's opportunities for an exornious expansion of trade were to be found in the paralysis of Europran commerve as a rencle of thortiliHens, thene trade returns show that the very reverse is the case. Though there if no war in South America and thongh the Bratish command of the seia lins destroyed the lifg German trade proviounly done with Argentina, the Unittod Stutes finds she sold but it euarter million dollars worth of goods If ore in that mariet hast Junary than alhe dild a year before.
Stimarly, Amertean trade with Arasit fell ofr at the rate of a million a month durtag the past nine monts. Clims took five million dollars worth leas of Amerlcan coots in the sume Tertod. While dapan actually to in than war, latercourge with her, so far as America wan concerned, continued as free as over; yet American exports to Jopan nank by nearly thirteen mall.

Hon dollers the past nine monthe. similarly, commerce between Canada and America, though as uninterrupted as ever, resulted in America seiling inirty million dollars worth of goods less in the seven months from June to January than ake ild in the beven correiponding montlis of the previour year. Under these ctroumstances we have cause for cratitude. I think, that Newtoundland hes been able, during the ten monthe tince last July to sell fer rish at prices never exceeded and to enjoy unrestricted access to the markets in which her staple commodities are sold, nud. viewing this fact, we cannot but comgratalate ouraelves that our position in very much better than might have been, had different condifions preyalfed on the ocean and uninterrupted intervourse with the ontsice world been restricted as it might easily lave been but for the work of the British Navy, It is true, of course, that the war compulles a very seriona reductlon in the operations of the mining compantes at Bell Istand, but even there we now find that conditions are truproving and that the prospect is that operationis thls year will be entarged constiterably, and that posalbly a reaumpltan of activity on old time Ifinea mity be looked forward to.

For the fiscal year beginning on the first of July and ending on the 20th of Jume, 1515, we estimate an expenc iture of $\$ 4,072,000$ made up of $3:-$ 369,000 voled by the House in main estfmates within the past two week and the sum of $\$ 89,060$ for Su-piemental Estimates fntroduced by me geaterday. Agalnat this 1 am estim uting that the Revence for the com Ink year wIII amount to about $\$ 4.00 \mathrm{e}$ 000 as well. For this anticipation I will probabiy be accuned of beins too nangnfne, but $I$ wonld point out in the first place that the Deputy Mia: tster of Customs, who is an expert

In such matters, caloulates that $\mathbf{u}$. der normal conditions, the duties now imposed sbould sield the Colony 8750 Qu日 more than we are at present rejeetiving, and as conditions gradua:is reture towards the normal there will be a sradual betterment is tho Revenue returns. His statement thowing the 'nercase of revenue, whieb would come in normal times, from the additionr to the tariff since 11th March, 1914, ls as follows:
Alcohol .... ....... .... . . 89
Cordiatre . .... .... .... ... 139

In the next place 1 am encouraged to hope that there may be a large fincrease in revenue during the next financlal year, because, admittedly, fraports have beon reduced very considerably stace the war began, and denlers have been pushing their old
stock where posstble and refusing to import again until the situation became more clenr, and that, as these stocks are exhausted, they will have to be supplemented by others. In the third place, 1 look forward to a very aubatantial betterment as a result of the increased oporations at Bell island, where, 1 am reliably informed, the Deminion Steel Company expecte to employ a force of a thoussind mea all through this year, and where the Nova Scotia Company will also, it is expected, increase its output aomewhat. In the fourth phee, I think we may count upon another large aufmentation of Revenuo through the starting up of the new fertaliser anterprise on the West Coast, should the Legislature conitrm the contract with Mr. Willson and his assoclates. In the fifth silace we hope for, sabstantial returns from the pit prop polfey which we are aaking the Legtaltture to endorse, and whith we trust will serve the double purpose of providing emplogment for our Fisherfolk who are unable to secure supplies tor Labrador, and of licreasing our revenue by the export duty.
We do not, however, intend to trust entirely to these conditions to ensure the destrod increase of rovenue for we purpose to bring fite effect certain tariff changes.
Through ell of these factors we ex pect to secure an augmentation of the Revenue by nbout 8760,000 and we are hopetul that the improvement in the conditions generally will enable us to witness a restoration of the equilibrium between Revenue and Expenditure to June next.
Hon, members opposite will, 19 doubt, maintain that this expectation will not be realized, and possibly they may be right, Much will depend on the continuance of the war and the conditions which will attend it, but, as 1 have ulready sald, it is im.
poseble to foreeast with any great acouracy the likoly situntion which will prevall a year heace and we must allow a large margin in our calcula thons. I mifht point out, however, that Mif. Lloyd George, the Britteh Finance Minister. in bis Budgot Speech do Hivered last week, emphasized to the people of the United Kingdom through the Imperiul Parliament that it would be fimpossble for many months yet, to foremast the requirements of the British Exchinguer, es much would depend on the progress of tho war and Ita effecte upon commerce and industry. For wa here 1 can only say that thle is a time when to my bumble judgment, we should endeavour to cullivate the most clieerful and hopeful vlow of the situation. That the view we take is not an unreasonable one I misht inatance by some quotations from the figures of the various Departmentes for the part year. The customs revenue for the flamelal year 1912.13 was, altogether \$8,283,304.35 and that for $1918-14$ was $\$ 8,089,62758$, the decrease being caly 8193.676.82- This shows further that, us a matter of setual finct the redaetion of dutian put fato effeet at the bession of 1418 actually only brought about a shrinkage of less than $\$ 200$, 000 in the Customs Revenue, the other $\$ 100,000$ being due to reductions in Crowa Lands and other revenues arfring from the world depression then in existence. For the current year the prinelpal aliortage in the Revenue of the Custome Department will be representes by the reduction to ore shipmente from whlch royalty we recelved in 191314, \$95.475.28. The Crown Land= Revenue has, of course, sutfired most as a result of the war, the struskle haviniz paralyzed activiffes in connection therewith for wherean tho actual Revenue in the last fisenl yeat was $\$ 45,000$, the actuil Revenue for the ten months
which ended with April amounted to p6x, $\operatorname{ses} 23$ und the eatimate for the nemationg twe monthe is tsioe, mat-
 et9, altogether, a reluction ot menaty 15t,hot un hat year's ficares. The figures recarding the Crown Lauds Itvense in the varime emb-divielions are as followa:

Tetal . . . . . . 172.923 .29
The total trale of the Colony for the peit necat your amounted to smer 278,259, the froportn totalling $\$ 15.132_{\text {r }}$ T26 and the exports $\mathbf{1 1 5 , 1 3 4 , 3 4 3}$, there beling therefore an axcess of 159185 in tmports over exporta. It may aot be amiss bere to supply some flyares whowing the thereane in total trafle sface the preseat Government took office:
Year
Euted
June to Imports Nxportif Tti. Trade $1609-11,402,737 \quad 11,848,313$ 23,251,650
1910 12.799,896 11,824,997 $24.624,695$
$1911 \quad 12,388,910 \quad 11.975,767 \quad 25,259,357$

[^4]mental contingencles, $\$ 5,000$ for allowances under the Marine Disusters BII, $\$ 9,000$ for increased fuel and Hetht, and $\$ 34,000$ for repairs to publife bullilings This latter Item, I might explain does not represent an actual tucrease, but lu due to the transfer of repairs mider Public Charities and Administration of Justice, to the vote for Clvil Government. The increase of 89,570 for pensions is due to the fact that there ate many more on the list niow, the number of those previously pald out for Dopartmental Contligetscles having been eliminated from that vote and pat on the regular pansion Wat. The Admfilstration of Justlee costs us practiculy no more than formerly, but on accomit of legisiation there if an increase of $\$ 2600$ in the printing and $\$ 8,900$ in the various contingencies, whenpend nearly $\$ 100,000$ more in education now than flve years ago, of which $\$ 83,000$ goce for salarfes, a thousand dollars for retiring allowances, $\$ 1,200$ for travelling expenses of inspectors, $\$ 2.500$ for Higher Education, and the faterest on the vote of $\$ 100,000$ for the erection of new buildings, 85,000 more. On PubIfc Charitles we spent nearly $\$ 120,000$, represented by $\$ 22,000$ more for perwaneat and canual $\$ 3,000$ for orphanages, $\$ 8$ 500 for conveyance, $\$ 5,000$ for medicat attendance, 82,500 for Labrador sick, $\$ 2,000$ for extraondinary outlays 87,000 for pablic charitien, $\$ 12,000$ for public health, $\$ 30,000$ for tubercufontr, and 56,000 for the hamaretto On the Lighthouse Department we spent $\$ 2,000$ more, $\$ 30,000$ being represented by matitemance, this facluding many new IIghthoneses that have been Iny9, 87,000 for publice charities, $\$ 12,000$ belng the salaries for the keepers to operate these new statons. We spend 322,000 moro under Agriculture and Mines, 828,000 of this boing by the Board of Agriculture, 86,000 for toraet tire provention, $\$ 1,000$ for timber
inepectlon, 84,000 for the Fire Patrol Service, and $\$ 1,000$ annually for the tmporial institute, while we drop $\$ \$, 500$ from the vate for supplies and petty surveys, ard $\$ 4,000$ for the conl bering vote. Roads and briages show an increase of nearly $\$ 10,000$ due to new forries and motor nervices. We have fincreased the outlays for the Fostal and Telegraph Depariment by $\$ 283,000$ in round figures. of this amount new mall suhsidies represeat \$85,000, rallwuy subeidties 89,000 , the extenalon and fmprovement of the telegraph servioe $\$ 44,000$, aalaries in both branehes $\$ 49.000$, annual contribution to the Postal Union, 84,700, Ocean and Gulf steamer subsidies 320 -000. contingencles 815,000 , etc. On the Curtomis Department wo spent \$75,000 more, this belng not altogethor a matter of actual oustay, the cont dutes and water rates pald out to the Municipal Counch accounting for $\$ 24,000$, refunds for $\$ 25,900$, contingencles for $\$ 12,000$ and salaries for only $\$ 12,090$ and the whole service. The amomis undar Contingencles and Audit Act vary each year according to special requitements, and the increasen are only trivial, particularly in tiew of the largely increared Revenue and Expeniiture during the period.

The amount on deparit in the Co lonial Savings Bank on the s1st of December last was $\$ 2,483,732,95$. The amount on deposit in the Savings burcans of the four Canadian Banks doing buriness in the Colony on the same date whs $\$ 5,187,985.49$ and the amounts on deposit at lutorest \$2,733, 958.19 all of these may be legitimate: Ir regarded as uavings of the people and the sum total $81,405,676.33$ is tharetors very credituble. The value of the Goverament debentures held in the Colony on the same date was 33,804,218.64 and the amount of secarittes held ty the Colony at the end

## of lant Year an atcomit of Whe tharr ance, was $\$ 1,58,480.06$.

| 20.714.01 | 17,578.10 | 3,136.41 |
| 12,000.00 | 12,900.00 |  |
| 52,000.00 | 51,568.74 | 431,26 |
| \$125,467.35 | \$118,769.94 | \$6,697.41 |

This balance appeared as $\$ 19,355,23$ in last year's accounts. The expenditure on aecount of Loan, 1914, which was advanced from the Surplus for 1912-13, and which was replaced when the lean was ralsed, was $\$ 683.11$ over the actual surplus. The full amount of the expenditure having been repald, the overdraft of $\$ 633.11$ hae to be added to the smount appearing to the credtt of the Surplus Trust Fund in the balance sheet for 1312-13.
of the foregolig expenalitures, 1,2 , 3. 7. 8 and 9, are self-explanatory:

With resard to 8 , the sum of $\$ 8,000$ was appropriated in sid of the vote for thin Board of Agriculture of this sum $\$ 7.224 .73$ was spent which, added to the outhicy under the vote, gave a total expenditure of $\$ 48,083.75$ on an origimal vate of $\$ 40,000$. Notwithitandlag the above mentioned assistance, thifs vote was overdrawn by $\$ 1,759.03$.
With regard to 4 , the sum of $\$ 8,500$
of which $\$ 5,235.62$ has been spent, was nppropriated to cover the Indebtedness of the St. John's Agricultural Soclety for hay, this indebtednees hayfing been talsen over by the Government.

With regard to 5 , which is a sum appropriated in aid of Postal Contingencies, it was all apont with the exception of 55 cents. The total vote inclading Supplementary Supply and transfers from credit votes, was $\$ 36,902.00$, this added to the amount received in aid from the Surplus Trust Fund shows 8 total of $\$ 44,902: 00$. Of thls sum $\$ 44,898.49$ was expended, leaving a balance of $\$ 1.96$ under the Public Sorvice Act, and 55 cents under Surplus TrusL. The original vote was $\$ 19$. 000.00.

The following statement shows the expenditure under the several Loan Accounts for the year under report, viz:-

The Hosac met at taree of the cloct in the nftemoan pormanit to is f wirnmest.

## PETTITON8

MR KENT-Mr Speaker I hure thed baul-t jullifinte whics 1 boce fovi tio promit ce, bitall of the Hop Wind Lamber Con, Mr. IE Cothmanf; Iranlitr's Agractes, Eishop, Some 4 Clo, Dowrine Broe, M. S. Ballivan, A. It. Tteat Con, P. Touptomus mit Monroe a Ca, in relation to the raportation at plt props. In presenting this Fertifion, Alr. Speaker, I may may that I do Enmed, hut may own riews on thin matter ure thuit 1 utall reguire to lie fally nownfaged by requiry as to the wisil is of ernmting this petition. I fon't Ihtak that the Lagislation that wus tisued last marion shuald be allow if in bee mond brgoad then sexper whdrly for ctye tust Juer, bet as thisor mint avposer to conolder that they bave a affrowies, I woald mak that the mub f i matiet of the pellitie ho tugulred into boy the Gorernarnt, with a yen to den vrtain whether ang inquiry te bilor itome ur not. 1 woald ank thint the perttim ber roturnd to ther Tepertment of Flunnee a Cuntoms.

HON. MINISTER FINANCE AND CUSTOMS,-Mr. Spenker, I might say that the matter fefferred to in the petition is now under consideration of the Government. AII allowances will be ruade in order to give these propita what is consldered reasonable time.

QUESTIONB:
Mr. Abbott gave notive of question.
RT. HON. PRIME MINISTER.-I
beg to lay on the table of the House answer to quection asked by the hon: member for Fogo on yesterday in relation to some agricultural mattars. The vouchers are origimals.

MR .HALFYARD,-Mr, Spesker, I beg to call attention to the fnct-and I shonld Ifice the Minister of Public Works to be here-that a cood many questions have been asked thet have not been answered. I apprecinte the fact that an effort is being made by a good many of the Depariments to oupply answers, but some departments are not like others in this respect. I had a question on the order paper of May 7th, and have not yet received a reply. It seems to be important, and I wouli like the Speaker to call the attention of the Minlster of Publle Works to that matter.

MR. COAKER,-With rogard to the suswering of questions, I might say that I am very thankful to the Minister of-Marite \& Pisheries and to the Colonital Secretary for the manner in which they liave replled to questions which have heen asked them, but there are Departments which we find it very dimicult to get information from. 1 want to say that if on Twesdiny the Information that we have askod for is not tabled I shall give notice of moving an addreas to the Governor asking to hive the information produced.

The Speaker notified the Rouse that he had recelved a message from the Legislative Counull stuting that they had passed the Act entifled "An

Act respecting the Establishment of a Fermanent Marlne Dlsaster Fund" with some amendments, in which they reguested the concurrence of the Houste of Anfembly.

On motton the amendments were read a firat time and ordered to be relid a second time on to-morrow.

RT, HON. PRIME MINISTER-Mr. Speaker, I would like to ask the hon. member for Twillugate what are tho questions to which the rafera as not linving been answered?

MR. COAKER - 1 will get you a Hst if you wish.

RT, HON. PRIME MINISTER.Think you very mueh.

On motion, the Councit's amendments to the Permanent Marlne DisBeter Find were read a first time, and ordered to be read as second time on ta-morrow.

MR. WINSOR asiced the Hon, Minfater of Finance and Cuitoms to lay upon the table of the House a statement showfag what was the extra work done by the Castoms Officer at Greonspond in the year 1918-14, for which he received the smount of 349.88 per cusirter:

MR. CLAPP anked the Minister of Public Warke why the motor boat plying between Woody Point and Norris Point Is not rumning, and why a ferry row boat has been re-instated, and ii. It is the intention of the Governmeat to continue same or not

HON, MINISTER FINANGE AND CUBTOMS.-The answer to that is being prepared.

Question No. 2 was ordered to stand over as the Mivister of Public Works was not in the Hoasc.

MB. LLOVD asked the Hon. ColonIal Secretary what action the Govern ment has taken in reference to the improvement at the railway stations st Northern Alght, Long Hinrior CrossIng und Bry Buils Arm.

HON. COLONIAL SECRETARY -

In reference to thlis matter I mis say thint lest year, immediatoly sifter the House closed. I latid it in the hunds of the Govermment Engineer with a request for a raport it have to-diny asked litm for the report, and he hopes to have it ready by Tuesday,

MR. GTONE asked the Hon. Colonial Seerstary to lay upon the table of the House a statement showling the amount of able bodtelf poor rellef ziton out by Relieving Offlear or othors at ench settlement in the Distriet of Trinity from January 1st, 1915, to date:

HON. COLONIAL SECRETARY,That statement is in course of preparation.

MR. CL.APP asked the Minister of Pablle Works if a motor boat was plying between Woody Point and Norris Point in 1913, and by whom was the ganoline auppltet. Further, whother the motar haat wie rumitug if 1914 or not, and was the supply of sald gasoline to run naid boat re: fuund by the Sovorument or any tepartment of the Government in that year or not. And by whone order was the supply of sasolline eiven, und by Whom supplled.

Question 5 was orderod to stand over, as the Minister of Public Works was not in the Honse.

MA. TARGETT anked fhe Hon. Cotonial Socretary to tay on the table of the House a copy of ail moneys patd out for abte bodled poor mellet by Foor Coninisstoners and others tin the Districts of HF. Giseo and Br, Main, giving the amounte pald out at each nettloment from Jan. 18t, 1915, to date.

HON, COLONIAL SECRETARYThat reply is being premared;
MR. TARGETT asken the Minteter of Merine and Finherles to lay upon the tabite of the IFcuse a afatement showing whether a lightheeper has been appointed at New Perlican in the Dintrict of Trinity. If so, give

The name of the man appointed. If an appolntment is to be made will the recommentations of the mombers far The district be accepted.

MINISTER MARINE AND FISH-ERIES.-In repts to the hon. member I beeg to fulorm hilm that all the applicatlons for that lighthouse are now in the hands of the Government for conslderation, I think 1 know the reanno why the hon. memiher aaks Whether amy uppointment has been made. There is an application umongat the number whleh has gone to the Corernment, and I liave no dabbt he woula like to know whether that applleation hes bean recommended, If he will tet the miatter stand for a little phatle be will find out, 1 think that every pirnoin who knows anylifng about that appilication is in its favour. BANK FISHERY BILL.
Pursuant to Order and on motion of ItL. Hots the Prime Ministar, the pill entitled "An Act Respacting the Mank Nahery," wan read a third time anit pasied, and it was ordored that ft be enarossed, heing entitled as ahove, and that it be sent to the LegIstative Council with a messase requestion the concurrence of that body ta itin provinfone.

reported that they liad considered the matter to them referred, and hiad pussed the Bill without amendment.

On motion thie report wes recelved and adopted, and it was erifered that the Bill be resel a third time on tomerrow.

## RETIRTNO ALLOWANCES BIL.L.

pursuant to Order and on motion of Hon. Minister bluance and Customs, the House resolver itsalt finto Cominttere of thic Whinte to conilfor this Bill entitled "An Act respecting certain retílug allowuncas."

Mr. Speakter left the chair.
Mtr, Paraions took the chitr of committeo.

MR. COAKER-May I ask whist prorortion of the salary is the pension. If it two-thirds in every case?

HON. MINISTER FINANCE AND CUSTOMS.-Yeg.

Mr . Speaker resumed the charin:
The Chairman of the Committee of tha Whele reportad that the Comuiltiee had conilderod the matter to them referred ind fiad passed the sume without amendment.

On motion, the report was receivel end stopted, and the rill was ordered to be read a thift time on to-morrow. PHODUCTS CORPORATION AGREEMENT BILL.
On the motion for the second raading of the Bill entiled "An Act to confirm an Agreement entered Into by the Goverament of the Colony with the Newfoundland Producte Corporn. tion. Limited," Mr. Kent maved, nnd Mr. Coaker seconded, the following amendment:
"That in viow of the extensive power to control the development of the natural resouron of the Colony within the extenaive dralnage areas covered by the contoustan's gianted in perpetulty to the Compnny under the agreement forming the schedule to the set and of the unlimited time for Whean the exemption from taxation is
given and the abseace of any suffiflent kafeguards in the ggreement to protect private rialits and vested interests and also of the absence of sufflicient information regarding the anbject matters comprised in and effecttif by the ald agreement and othor finiters, if will be in the beat intereacs of the Colony thit the consideration if the dgriement and its ratfleation by thifs House be deferred untll the seaslon of the Leristature to be hefid In tine your 1916 and that in the mean time the Gavernment trike all neess. sazy kteps to dugutre fell oult necor: ate lifformintion resarding the areas. powers conconsions, rights, and privi,ribes jrestased to be granted th sine Company ind of the efrect of their being so granted"
Whereupon the House divided; and there uppearad for the amemiment: Messra Kent, Lloyd, Clapp Grimes, Abboth. Winsor, Targett Stone, Halfyard, Coaker, Morine (11); und Reatnet It: Rt Hon. the Prime Min\{ater, Hons. Colonial Secretary, Minlatar of Pinance and Customes, C. H. Eimerton, J. C. Croabie, Minieter of Pablle Warlas, Minister at Marine and Thaherles. Messrs. Montion. Moore, Morris, Pursons, Currie, Devereaux, LoFeuvre, Downey, Walsh. (16); so it paand in the regative.
Whereupon the original motion for the second reading was pat; and there appeared for the motion: Rt. Hon, the Prime Mintater, Hons. Colonial secretary, Mintater of Finance and Customs. C. H. Emerson, J. C. Crosble, Minifter of Public Worice, Minister of Marine and Fisheries, Mesare, Moultoin, Moore, Morris, Parsotis, Currie. Devereaux. LeFeuvre. Downey, Walsh, (16); and agalnat It: Mesara, Kent, Llogd, Clapp, Grimos, Abbott, Winsor, Targott, Stone, Halfyard, Coaker, Martne (11): so it passed in tho pfirmative: and whe ordered accordingly.

It wes ordered that the sald Bill be read a nucund time, and be reterred to a Comalttee of the Whale Houne on temorrow.

The rematning Ordorin of the Pay were deterred.

It wan moved and ancturted that when the Howe rlees It adjourn until Tustay hext, May 25th, it three of the clock to the atternoon.

MR. COAKER - 1 =ant to draw the attention at the Trime Mtintiter to a represeatation which I have reeelvat of the condition of the S.8. Euphritea. She ts matd to bo unienworthy. I fuat 4ith to request thit a commintion be teat to report on the mistier.

MR. LLOYD.-A day ur two azo, the Colmint Fecretary tabled in mtateraint of the amount pald for patitic marsages to Fialific. That service might be Improved vory kreatly, In maylag
 the work dathe; 1210 is distributed letween two persons, each geting \$116. We catnot expoct much for that num. Thir mentranir comiti tha fthartmed with advantige, and mande more concine la that way, money might the saved.

HON. COLONHAL SECRETARY Mr. Spenker aftor the outhreak of the Wur I ment to the poat offlee to inquire If thofe hind beet any additional charee for the putife mithingo: int I was told that up to that thee they had net received a aill for any mearsagen, I found ont on applying to the
 for 21 montha for 8 gile. I do not how how that whe made up. It was aD pareatly a guses on thetr part. A Nf. Wher of Hellifax, zotr seen for the complling of the taesmeren and that is ait. The Eastern Prenu Aapoclation getn the musmeen firit, then Halifix, then the "Hieffax Horate," hind then it comisn to uis. This is exclasire of tay oharge over our own line. Now thit messingen it prosent cont about
\$1320; and we get $\$ 300$ from anch of the sowsipapers. That is $\$ 1500$ recelred agalnat $\$ 1229$ expended. Now I agree with the hon. member that We are paying Mr. Wier rery littlo for the work that he has to do, which has been rreatly Increased by the War; and also that mome arrangements whould be made to improve the serFiee. At presment the messazes are atent haphnarit. I will take the mattr up with Mr. Wier and see if the nivasages could be made more conelise. If we reduce the number of Wurils, We can hand the difference of the cost over to Mr. Wier. That is the cose as it stande, I witl see what 1 can $\delta 0$ in the matter.

MA, LLOYO.-Mr, Spenker, ft is not a matter of bofiting down the messaget, tut of eltminating the repettion whtch It so prevalent in our messaces.

HON, COLONTAL SECRETARY.Mir Speaker, 1 think that the fault is with the fact that the work is divided Butureen the two editora; when refetition is mure to remult.

MR. LLOYD.-That cannot be, bethase ane is the editor of the mornter fuper and the other of the even$t$ te papar.

MR. COAKER- 1 might say that the Government is making $\$ 300$ profit cut if the newspapers. Now, we do zol olbloct to that, but we want you to spend the mame amount of money a 4n-to-date sarvice These men at F-milinix onght to lie patd a fatr salary. we shosid then get a better aervice. The matter rhould be pat in the hands of the Colonfal Secretary, and 1 beHove that he will give us satinfuction.

MR. MORINE.-Mr. Speaker, I have fhown Mr. Wer personally for a long time. 封e is the Baitor of the Evenfous Mall. The news that we do not got is hargely due to his slenire not to go bayond any limit that might be
aet. I follow the thanatias mapers and I mottice that thare is sot muen dilevence the their mexagene and var. I abiolt the ta kis inome atrange meate antle with Mr. Wher, whernde nosen luphructmente ceval be mate.

Purntant to order and on motion of nt. Hon. the Prime Minister the Housed reiolved itwelf into Committee of the Whole to cotuider the Bit entuled "An Act Renpecting the Grand Bank Water Company:"
Mtr. Speaker lett the Chalr.
Mr. Parmonn took the chatr of Commilter.
The Cuilruan from the Commiltee reported that they had coasildered the mantter to them referred and had peaned the Bill with some amendment.
On motlon this report was recelved and adopted and it was ordered that
the Bill be read a third time on tomorrow.

## VOLUNTEER FORCE BILLL

Pursuant to order and on motion of Rt Honl. Prime Minister, the Bill entitled "An Act to amend anif to conthue for a further period the Act $\$$. Geo, V., Sess, 1, entitled "An Aet respocting a Volunteer Force in the Colony" was read is second time-

RT. HON. PRIME MINISTER.I beg to move the second reading of this bill.
It will bo rememberod I think that the Aet passed here last session contained legistation for only one year. Under Section 11 of that Aet it is provided that that Act shall contriue in Torce for one year from the ciate thereof. It is therefore now necessary that the daration of that Act should be continned. To expletn this I shall read this section of last year's Act.
(Rt. Hon. Premter quoten Act.)
Section 2 amends Section 2 of this Act by adding at the end of this section the following words: "Or the officer commanding the Volunteer force on retive service." it will be found that the appolnting of officers vesta in His Excellency the Covernor under last year's act and it is now proposed to add these words at the end of the section. Up to the prosent time although the troops are commanded by officers on the other side all appolntments have been made here by His Excellency the Governon as Colonel, but it may be found necessary that that authority should be conferred on the officer in command when our contingent goos to the front and whon there might be no opportunity of communfating with His Excellency here.

Section 3 of the Act amends Section th of last year's Aet by gtriking out the words "but not exceeding one year" I may as well quote this section. 5 of
last year's Ant to explalis more clearly what is meant by this amendment.
(RL. Fion. Premiler quotes Sec, i.)
Section 4 of thils Act merely pointis out that theer amendments shall be helld to have been in force and to have taken effect from the date of laat your b Act. 1 may bay these amond. monts come to me recommended by the Patriotic Association, and IIfs Exceltancy the Governor, who has been specially charged in relution to the entlettag of men with various duties therowith connected, and I hive no doubt that thewe amendments have received every thought and care before beina recommended to this Eegielature, Ibog to move the second readtug of thit Bitl.

MR. LLOYD,-Mr. Speaker, I am propared to udmit thls measure with some exeeptions which I shall propose at the Committee stage. The exceptiona will bo to Section 4. That soction is an absoluto breach of fafth with the men who have enlisted and ousht not to be there. I do not know what object it can have unless it be to force those to remain who enlisted uinder very different terms. 1 do not think any practleable object can be obtained by it because I think every man will be willing to carry out. the tequirements as to remaining or reenlisting for sorvice but this Lagislafuce onght not to be a party to a breach of falth of this kifnd.

RT. HON PRIME MINISTERThat matter will be considered in Committee.

The bill was then read a second time and it wis ordered that it be referred to in committee of the whole Honse on tomorrow.
EXPORTATION OF TIMBER RESOLUTLONS.
Purnuant to notice and leavo granted and on motion of Hon. Minister of Finanew and Customs the House resolved itself inta Committeo of the

Whole to consider certals resolutions re tha exportatios of timber

Mr. Speaker lett the chalr.
Mr. Parsons took the chair of Commiltree

HON. MININSTER FINANCE AND CUSTOMS.-Mr. Chairman, it will be rememitered that lant year we passed kin aet in the War somion allowing the mportation of timber from Newituindfant and Lahrador. There was ir cak tain reasen why we atiould allow the exportation of timber trom Newfoundland after the outbreak of the war, § there was a zreat dematif the the ord Country for pit props, and it whe mavpristig on enquiry to find that that induatry was so little known in New-
 as it did, We were aaked to allow the exporiation of pit props and we pasaed an act for one year allowing them to bre eut ont the throe mifte thriit In Nievfoundlani and exported free of duty. The same thins applies to Labrador, When we parsed that Act n great rumber of people were under the impression that fhen war wrould be over by that time,bst we find ourselyes no nearyr the end of the war to-day, In fact wfthin six or etght mionthir arter the paasing of that Act we had a request from the Brithh Government to oxtend the thinf of cuttiog ift props ant after tue conitderatfon they were allowed to be exported up to Docemher 1925. That Act ouly allows people to export pet prope for one rear anit it is only nfter grave conindecration that the Gokermant proposes to bring down this tifl to allow the exportation of yt prope tund putp whot thulit talsnador as yon sill mee by thin Act for a iertod of ten years. The pit prop Industry to very ming snemis à simall infinutry one hemity wurth reuprntr: trig-but when we come to enquire lav to the matter we find that the value of thls wood imported Into the Eritish Felem lnty yenr amountent to itolat three
time as uuch in out codrishery. They were valued at $£ 4,450,000.05$, and to thet smenent =ar be atifet thr umtemt eet in thr Enitec Kingtom itaulf acmedhing the Ehieden. Whem we come to coudlder theat fizurn we are
 this futuatry is worth. Jait timagthe it we could gont than foiturty-zai Induntry whileh to carried on in Rinsila, greden, Norway. France, Portugat and Spifh, Matudy at ELAF0,006. Now It strlkes us thint the time has arrived When Newtoundtand should be pregared to ant lis alare of thie industry. and that if cime of the meanons why fodsy wo bring down this amendment to luit year's act, giving perminion for the exportation of pit prope from Iabrador for tes zear. It will induce foutuile capitelligt to come in and take bold of thin mazy thmber areas on that coest and munt no douht develop great Fearth nad be of ereat help to the fulincmim. I hare hare a report of zome gentlemen who wrame sent out Furt your to emquire futo thas Induntry In Nowfroundlanit. There were four gentleraes frota the Board of Trade fil Loutho, and ane represeatative of the pit ourners. Thoy came here In Septomiber and beld extematve enEnitfeil araunit the const and then thint to Canida atid from there returnef to Finglind, init mate a report an a remult of these sinquiries. Last Jear after thin pamitue of thils Act, and Fhens it wais fit that pit props were b) bel exportad from Nowfoundland, pollahle fifforteation wne ohtained as to quallity and quanity of the pit trops People weire surpioned to find Che enmbier of zucuircments that were \#ncraviry for our pit propic. When
 Fundland and as for as the tlmber anif other segratrements are coneorned thicy ware formed to be stroag and to cumm op to $\begin{gathered}\text { irarything that was re- }\end{gathered}$ quired. I flad from the report ment
out by the Board of Trade that thesse gentlemen who were here sey that Newfoundland pit props compare very favourably with those of any other part of the world. The reason why the Government are making all extenston of ten years in this bill is to give peoplo a chance to go down and tiko hold of the propertas on Latimdor and ro fato the fudustry in a large way. Surely if the United Kingdom can take pit prope to the value of $£ 5,000.000$, there ts no reason whatever why Newfoundland should not get her part of that trade. Rubeia exported to Eigland $1,538,714$ cords, Sweden 359,998; Norway 114.777: Germany 28,926; France 984,331; Portugal, 315,628: Spain 103,125, other foreign countries 5,391 , making a total of $3,451,228$ cords, valued at $£ 4,445,066$, and in addition to this it wea estimated according to thes report that 700,000 tons of timber were cut for pit props. If these countrles can afford to let thelr unmanufactured wood out of the conntry into the United Kingdom is it tnreasombile to come In here and pass an Act to allow them to be exported from Labrador Take the Labrador to-day, and if we were to develop this Industry we would see a future for the individuals who live there and a future for the labouring olnases of tils country. There fs no renson why men would not go down there for eight monthe of the year if they could get continuous work for $\$ 1,50$ and $\$ 2.00$ a day. Thera fo no reason why we should not allow them to go down and eut for export all that wood that is going to waste. It has not been the pollicy of Governments in the past to do this but I am slad to say that it is the pollcy of thie Government to do it. 1 alwaye belfeved in it in the past, 1 could never see any reason why we did not cut the foresta of Labrador and utilise them when they would efive labour to our people. The time
hias arrived when we should uttize those larger nreas and allow certain companfes who are prepared to go down and to develop them. There is one nepect of bile matter which may titerines with these forests betug developed. bat perhaps that can be got over af a later date. I find from thals report that the frelght from Russta, Sweden, Norway, Germany, Frunce and Spain Is $100 \%$ less than from Newtominlatid or Lintarator. That would be a serfous atrawhack whiteh might, howerer, be overcome if the future, it th only now that we aro waling in to find out that there Is something on the Labrador that we can employ our poople at. Thio prinelpat thing to-day is to tind emplogment for our people. In St. John's tofuy there to nothing of any kind, no induetry, at which employment can be given, itid epart from Bell Ishand, fhare seemis to be no liope for the im medlite future If we were in the position that two or three thousand of our people could be employed it would be a great boom. A itollar at cutting pit propas is of more value than the possibility of earnitg it at the codfishPry. It the a dotlar certain, whereas the other is very uncertafin. As far ta Nowfoundland is concerned, objection will be mindo to cutting pit props. Thas bill protects the whole of the three mile limit, and the bill itsalf show that it is not our intention to allow pit props to be exported, nfter the termination of the war, from Newfoundind. This bill gives peruission to export pit prope from Newfommland for one year from the date of its pissare. While that may be a holp to the Remplere at thls time I do not think that very much will be developed in thut wiy, Some thme must puas before lan lalustry of this kinc con be established, nill they cannot do very much within twelve months. A number of pit props miny be cut by
planters and fishermen and several cargoen tmay be sent away but the amount cut while this law is in foree If not goleg to be very large. There is quite a lot of valumble information in the report of the Board of Trate of England and I will table the communication made to the Government. and the report Itaelf for the information of the Honse. There are several aections in the report deuling with the queation of employment for the fiahermen and other matiers, all of which ure of great interest. The report also deals with the timber ltaelf and also facys that there is always an unlimited pupply of timber in the laland, and that over 100,000 cords of pit propa could be taken out during the wintar months in the three principal sectons of the laland, which they deacribed in the report. That would mean 300,000 cords of pit propt could be taken from the woods during the year. That would be worth one and a half million dollars. 1 take it that if we canl get this induatry going even for a year it will give a considerable amount of employment and bring quite a lot of money Into the country. We heard last year in this House the cry that the fishery was a fallure, and that the people wore going to starve, and we were aeked by members of the House what we were going to do to relieve them. The relinf uppears to be at hand in this fudustry, and if the repart of these gentlemen is true there ought to be no dizïiculty, even in Newfoundland to supply enough employment during the coming year for those who are out of work.

Then as rezards shipping facllities, there are all in favor of Newfoundland.
(Quoted tabled report at length.)
It will be seen from this thut the main disadvantage for Newfoundland Is due to the fact that the vessels would have to return in ballast, and

It is consaquently harder to get ships to so with cargoes bat one way.

1 think. Mr. Chairman, that this mattar now botore the Honed will be the mentes of elving lotir of employment to our people. There is a large supply here, and lit could keep the men enraged during the winter. This would mena a revenue of about $\$ 2,000$ trom thin industry on our luades, Nowfoundtand ia not lifely to starve in the future. We linve them here, why shouth we not dtspiose of them? It Is tinie that some of our unused induatries be developed. The small tax of ono dollar a cord would atill perfilt our Bropa to be axported more cheaply than they can be had from other places, and at the same time Gring employment to our fishermen during the winter scason. Any finformftion the this cruestion that is desired by thit commitzee, and can be sup. plied by fuy deparment, will be giadly aupplled.
MR. CLIFT-ME. Chairman, I would lifee to make one or two otiservations on this matter now before the cluilr: uven at the riak of looking at this matere from a party stanidpofint. It hae been the polley of every government to preserve our timber suppliet and to profiblt the exportation of the same, and I do not know that uny reason bus arieen why this should now be changet and why this polioy of yeare thould be doparted from. Betore being abledt tio consider this mat(er I would ask that the Minister table all the information he has at hand, includits the letter from the Britiah Goveriment in thiln connection; and the report, axtracte from which he has just quated so exthastively.
Hon. Minleter of France tabled Hits.

MINISTER OF MARINE AND FISH. EAIES-Mr: Cluatrman: I lave juat Histened to the rencrike of my learned frimt, thr Litsyd, the mentiber for Triaity, In refuratiee to thly master tow lefure the Hewsh shle matter ofefuptrye blt-prupe. This is of courne. क part of the timber of this oountry. I.e liys sriat stress apan the may t Wat fhbs bill is herouatat ing, and say" I I inturpret him corntelly that the Ch vernment aife lave hat opportunity fo discius thle matter at thelr party fimetturas and have had all Informafiom bofore them on those pecastons.

As one who is interested in the welfare of this country, and in the people who sent me leee to represent them. 1 consfder that 1 could not tet this bill go without saying something in reference to it. 1 have heard quite a Jot of talk in this House, from both sides, on our timber areas of Labra-dor-the Hamilen Inlet, Grand Falle, Melville Lake and Northwest River, and all the reat of it. It is quite true that there are timber limits on the Labrador, and what has been safd of them by the different gentlomen in thib House may also be quite true, but 1 would like to sek the House how many fishermen of thls country have got limits down on the Labrador? And yet we come here and say, with such grave faces that thay must be reserved for the ifshermen. T have not taken the trouble to tind out from the Crown Lands Department how miny thaber timits efre owned on the Labrador, and by whom they are owned, but if this Bill does not go through In a day or two I shall take that trouble; in the meantime I want to sny that I don't thinic that many of them are held by fishermen. I was tore last fall when we passed a Bill to allow ptt propis to be exported on accomit of the war-to help out Great Britain and her friends in their need, and we did right in dolng that. Now, our peopte have suffored thits winter for the want of labor. Bell Island has been closed down. There are oniy two or three hundred men on Bell Istand which the companies have been prepared to look after, and whatever work has been koing they lave got ft . That destroyed the means of Hyethood for half tho libbor in Conception Bay. Sydney was clased down. and our men had to return with hall the money that they earned other years and with very little to spend on food for the winter. Very few of our people go to Grand Falls or Bishop's: Falle to work, lmowing that there
are plenty of people down north who know much more about lumbering than they do. Therefore, the Government have had to come to the assistance of men lit Conception Bay who never in their lives before askod any Government to help them. And why? Becruse we have not been able to give them work. Many of the men were satisfied last fall to go to the Larbador and cut pitprops or anything else which was wanted, if they were guaranteed a winter's work at a Hiving wage: and something might have been done for them last fall when this Bill was up. I have crulsed the Labrador Coast from Chatean to Cape Chldley and with the exception of firewood, stage stuff, and an occasional spar that the fishermen cut off these limits, I have never seen any benent that they have derived from it. Stnce Cabot first sighted Cape Bonavista that is the only beneflt Which our fishermen have derived from the timber limits of Labrador, and they never will derive any benefit from them unless they get a chance to wark down there. We say: Why don't people come hero and build nills on the Labrador? Well, why don't the men of money in Nowfoundland go down there and bultd mills and spend their money, if they have such faith in it, and give our men who need it some employment? With the exception of one company, I think, we have never heard the sound of a sawtuill on Labrador. Now, what are we saving this timber for? Are we going to save it and allow our poople to starve when we have got that Godgiven wealils down there. Why, I supgose fluring the last fifteen years the Oovernment have had to feed the 3 , 000 people that are on the Labrador to the tune of eight or nine thousand dollare a year. This is not taking into consifieration the people of New. foundland, but the natives of Labra-

Thew chatrmen Ieft the Chair at cas $8=$

Thin Clantrman resumed the chair at. stipht oflock:

MR. COAKER.-Mr. Chalmun, before rwous 1 mas whout to rise, hut lind to letenttons of speaking ont the a ubject betore the chair. I intended to mak the Miniseter to have the Com: filvin rive mitit also to ank the MinIfer of Piriasice and Castoms to table thr erteit of the thember arens on LaSindar. If ourght to inform the Y louse as to the people who own thone fres varrumadity Hamilton Inlet. 1 flimk that the requent of Dr, Kloyd fuas miosi pourtnous and fatr and Hat to be errantel. We have been fipmont to granting any conceaxions for the exportation of timber. ParTirularly are the PPE oppowed to it. and wis want to give It due constdera. tion. If the Minteter woald have the Comaliten rien we would apprectate t.

HON. MINISTER FINANCE AND CUSTOMS. -Mr. Chairman I have no objection whatever to the proposal of my hon. frlend, but alt the fuforma-
n is now before the House. We are prepared to give whatever information ts required.

DA. LLOYD.-Before the Committee rfaes. Mr. Chatrmin I want to refer to a rumour that was abread, in reference to some privnte tests made by those interested in the exportatfon of timber. for thatr own bentift. What I asted was, if the Government had possessition of the, results of tests carried out by commissfonern not by private partfes, triterestet tin thimer: I was told of the result of that teat by one of the parties that were interested in it. A matter of that kind is of great importance.

HON. MINISTER FINANCE AND CUSTOMS.-Mr. Chuliman I may say in reference to the timber that fir in proctically useless while spruce is more useful. There is no report of any other test in the hands of the Government.

DR. LLOVD.-Just what does this test mean. Does it mean a test by sight or practicnl test of the strength of the timber?
RT. HON. PRIME MINISTER.-It mpans a test of fts strength.
MINISTER MARINE AND FISH-ERIES,-Mr. Chalrman I wonder if the hon member will tell us who put the rumours around. Is it possible that there are some of those men in. taroated in the timber thembelves teltlog the outaide world that our timber is no goodt The quicker that such men were put out of Nesfoundland, the better.
DR. LLOYD.-Well. now, that is exactly what I want to get. I want to ko into the matter. I am in a ponl: tien to state what I have nlreaty iffirmed, aamely, that if we lad the

Boerd of Tride report lafid wefore thut House It would be an absolute and clear proof of the value of our tanterlal

MR. MOULTON.-Mr. Chalrman, what has this to do with the matter at all. If those people want to buy I don't sae why we should not sell. In the post they have heen getting this from the Continent now they cannot get it there and they come here. If we can sell, there is no reason why we Fhoute not.

RT. HON. PRIME MINISTER-I think what Dr. Lloyd is asteing for is quite right. Possibly some of those people who are interested in pit propa don't want anybody else to come here, and they are putting this rumor around whith to detrimentat to the country's interests. We will look into the matter.

Mr. Speaker resumed the chnir.
The Chatrman trom the Committee reported thit they had considered the matter to them referred, had made some progress, tud asked leave to sit again.
On motion this report was recelved and adopted and it whe ordered that the Conmittee bire leave to stt agnin. PRODUCTS CORPORATION CONTRACT BILL.
Pursuant to order and on motlon of It. Hon, the Prime Minister the floume rerolved ftialt tuto Commilttoo of the Whate to conaider the Bill obtitled "An Aet for the confirmation of a contruct with the Newfoundland Producta Corporation, Limited."
Mr. Speaker tete the chair,
Mr. Parsons took the Chalr of Com. mittee.
DR. LLOYD.-Mr. Chalrman - I would like to ank whether the Premier is in a position to let us know Whint the offect of the clause In the figncement relating to pistents is, and whether he has yot bucceeded in ob-
tainfing a modification of the tarns of that clauset

RT. HON. PRIME MINISTER,-I am looking into that matter,

MR. COAKER-In retereace to Clinsear. In thit word "tapridor" to be allowed to sof Are these people to have rikhts all over the Labrador. wherever they choose to go. Mr. Howtay, the couneat far nome of these companies, lan drawn attention to the fact that that concesenton will have to be amended. Is anything colms to bo done?

RT. HON. PRIME MINISTER.-The worls are deflined. Thore was a slizht amendment suggented by the hoth. mamber for Bonaviata (Mr. Morine) the last day. I have inverted it in Section 7. He sugrented taking cat the words "At any time wititn twenty yeare from the enuctment hernol" and putting in at the bottam of ther section the wonte: "Provitien that the Government ahall ant be mder obligation to srant any such lands at any time atter the expiration of $\pi$ pertod of twenty yearl from the pasalug of thin Act," Then he asked for a further amendment in the shmen neetion limiting the right to tolke land for flowage righte That late alioo been assenied to.
MA. QRIMES.-To this last Section I beg to move an imendment to read is follows: "This agroement is sulbjeet to appecoval and confirmation by the Lerisiature of the Colong when after tiaring sutimitted it to in teiter endum a majority of the voters have deciared in the favor" A suggostish of a sfimilar nature was offered a tew tiys agn tiy Mr Cnalier, whind itherse sfig this measure and I Alerire to eme body it into as smendment in order that the volce of the people will te hearit and their will be the governfigk power to the pasping of this menaure through the Leglelature Tae

Government hak recelved no mandate frim the prople to conter auch anormaus canctestions to the Newfoundtiint Trotucts Co. coñomitous of suich mamltedn as to cause alarm throughout the country giving rfse to maky protesta frota persumil of all shades if polttice When we remamiber the names given as the Directorn of this Company - the Mesars. This fir the rolation that In Rupponied to bxiut between the poofill and thinir elected reprensantalives fa any syatem of pepular Government. Uatiortimately for aur oomery, repces centatives have not mo wirwedt theitr refetion to thelr masters, the pople. On the other hand, they hare so acted as to lead many to betieves that offee thected Gliffig thetr four ywars ferm thet ure tree to eaercias utireftrieled. fy the pmocntity pover betonging to ilis poople fis cousurments is it wirs hive absicaled for a fasit term and ha is Tree to do whaterer damape to them his own inferesth or hls own findivaun oplalone may leai bim to Io. und it is their vith menay dities, intit fath the peopite's that is maile eftectfve Tie Premler a fer day wro when insensater the Prolalation Mtic deflered he was in favarir of the bift be-位 nubimitied to a referendum, bo fatum it titerfared with the private thehte and libertifis of a devetion of the Wroplec, and the fickslatine sorald mot Ia justifed is restricting or dolag
away with these rights and libertios: without the expressed will of the people, given through a plebiscite. With himi 1 coneurred. But if it is a right and proper course to pursue in connection with Prohibition, is it not equally so in the present Willson bill. Are we not interfering with the rights and Inberties of the people in refnising to allow them the last word on a measure which gives great private interests enormously valuable privileges and creates an octopis whiose tentacles will embrace within ita eruel grasp the falrest portion of our Island home? I would therefore move the amendment as already stated.

MR. WALSH-The pollicy of the Peoplo's Party when they were inangurited in 1908 was to develop all the uatural resources of the country. This contract fa only the natural outcomet of that polloy. After listenlng very attentively to the speakers on this gues tion and only after careful consideration of the various arguments that have been put forward 1 bave decided to vote for this measure as it now stands and I think that after this bill passees a new dny will dawn for Newfoundland. If we consdder the amount of money to be exjended in New. foundland in construction work-an expenditure of eighteon million dollars, we will reallze what an amount of good that will be to the working people of Newfoundiand, and I fall to see why any member should oppose the measure. With such an infustry is this, It is quite sure that the Inbor Ing question will be solved once and for all. Year after year our men hive been compelled to emisrate to forefgn countries, like Conida and the States, and look for work. I do not attempt to give any expression or opinion on the technical points of the contract but from the polnt of view of the working man I think I am cap.
able of expreaning an opinion as a working-man, because I think I am the only member of thla House who has taken part In every klnd of labour in Newfoundland and the Statoa. From tho point of view of the working man I thinik It will be the very best thing that could possibly happen to have this plant eracted at Bay of Ialands and have thes money exrended in the country, If you employ 1000 proplet at $\$ 1.69$ a day you will find that many of those who lave pone away in the part will be glad to return to Newfoundland to work in thelr own countrys. With regarl to the onocsition vut up by the hon. memher for Bonswista, Mr. Morine. who rmestions whether yon will be able to forluce in gool claks of men to come fere to work, I venture to say that if yon went over to Cape Breton and told them that it whe possible to get \$2.00 a day vou would lieve no trouble in eetting 5,000 men to come back to Newfoundlend ond labour in this country. There is hardly a family in diny part of the Istand thint in the past some member of it has not had to: emigrate from this country in yeara Jome by. I atnnd here to-night as the only rupresentative of $n$ large famfly who were compelled to emigrate to loolt for employment. My father is huriod under a foreign goll; my brothars sure labouring in it forelgn comtry nind they. Hke many others, wonld ve gind to rotiorn to this country, if there In an aspured employment in slect I thlnk with the passing of this contract a new eri will dewn for Newfoumdland. If we look at Grand Falls wh will kee what in very ugeful sonurce of emblnyment it has been and of what vatne it has been to the country, Men elter fishing during the surntier montins have gono to Grund Falls Hinl Blishons Falls for four monthe of the year and have earned enough to
keep them in Independence. Thata induatry will be four times as large as that of Grand Falls. They are apeniling $\$ 18,000,000.00$ on construcHon, whereas the Harnusworths only opend three or four millions, and I do not see how shy member can posilibly rajse an objectlon to such a corporation coming here, I have during the last fotr daye looked up some information in conneetton with the maniffacture of fertilsers and I nee that there is a factory at Ningara Falle which cost ten millions and whtols in the thist year lias dontted tes output and expenditure. This should, I thinir be a positive suarantee that this Industry will be a paying concern. Once an tnctustry ifke this to the operattor it will bring in some smount of capital into the country. Looking at the thing trom an impartial stanapoint, if we had parsed the amminments as proposed by members of the Opposition the only effect ther could asve woutd be to atringle the indiaetry in its infancy. That is the way in which any patrlotic Newfoundlander would loois upon it. We should all holp it out to the beet of our anifity. and to our best to fitroduce induswies likely to be of beaeficial intereat to the country. While it may be all right for fion. membera to mate suggestions it is harcly fair to expeet as to adopt all and every of the amendments which they propose One or two of the smendments made In the early stage of the dehate hive, I think Improved the bill,but with those in if I think that if the coutract pass-位 as it now stande, it will be the most benefietal contract that this Lesfisiature has ever passed.

MR. COAKER.-Mr, Chalrman, Juat. a word or two in reply. The homs membors seems to reffect upon bon. uembers on this aide of the Fouse and upon their patrlotlsm lis New. foumdanders. What 1 have to say,

Sir, is that I belleve that I am as patifotic as any membera on that side of the House and 1 feel frees to vote a calnat this measure as if I was atterwarde going to heaven. I Bay that this contract will rise up against every member that voted in favour of ft. I say that seriously. becanse I think thero are too many real objections to the mensure, and in saying it I am Juat as patriotic as any one in this House, and any member on this side who has suggested anything, any emendment to the measure, has done It with the bost intentions in the world, and with the hope that they would ket the Government to provide Ior thetr objections to the contract. From the very first I felt that I would like to see an Industry of thls kind sturted on the Humber, and I had no objection whatever to an industry and a contract granting rights and privilegea like that granted to Reld or flarmswerth, so that we might utiltwe the advantages of the country, and turn out a first class imdustry, and, if possible make it a success as great es in elther Canada or elsewhere: but I do object to the exemption of this company from taxation forever. I obect to the admission of all their material forever without taxation, and 1 object to the manuar in which you bave treated the leborr question. It vas sugrested that we should put in the contract a clause to provide that no labourer should be pald less than twenty cents in hour. I belleve if you had put in that it would have cone a great thing for Newfoundtandera. You would have had more Nowotundlanders return from the States as was spoken of by the learaed member for Placentia. If you had fixed 32.00 an day as tho price of tabour it would be a great good in the interests of labour, but you have not tone that and when you start out on this work on the other side of the Is-
tand thle Compaty =ell Het laboar ins cheap is poscible. I never wiw a parporntion yet that was at all phllanthrople fa regerat to tatione. They wifi ent hibener an cheap as pokalte. ## WAYS AND MEANS.

Pursuant to order and on motion of Hon. Minfster of Flinance and Customs the House resolved ftself into Committee of the whole of Ways and Means.

Mr. Speaker Ieft the Chair.
Mr. Parsons took the Chair of Committee.

MR. LLOYD-Mr. Chairman: I presume that the time is now arrived when we ought to talie up the discussfon of the proposals of the Minister of Finance and Customs with regard to the revenue, in the past fow years Mr. Kent's criticism, it will be acknowledged, has been fair, Impartial and Illuminative, and not characterized by any merely Opposition view; and we can only regret his absence today. This year we naturally consider the disposal of this year's revenue in the liglit the Minister has aiready enlarged upon, as it was only to be expected that he would, and we apprecfate the fact that the flnances of the past year, the current year, and the forthooming year are very largely influeneed by the war, which has naturatly consfdernbly dtstocated the trade of the Colony. While I propose in the few remarks that I shall make, to deal with that aspect of the matter, and whife i recognize that white the Revenue of last year has beeu mainly influenced by the war, I whall endearour to point out other causes or which we shoutt take due regerd, liecause all the conditions that will affect the revenue in the forthcoming jears should recefve the most iminute and careful consideratton at our hands.
The Govermment through its mouthDiece, the Premier, has already told us that it is estimated that, at the
end of the current year, June 30th next, the expenditure will exceed the revenue by the sum of seven hundred and fifteen thousand dollars. Now, that in itself is an important factor of whith we should take due notice, for if we limit our vlew of that aspect of the matter we shall understand netther the difficulty the Govermment has been facing the past year, nor those difficulties which lie before us this coming year. In considering this sum of seven hundred and fifteen thousand dollars, which is the estimated deficit, it must be remembered that that deficit is a net amount due after taking into consideration the revenue which it is hoped will be attributable to the Budget proposala of 1914, and that therefore we roust take into consideration what additional revenues have been gathered in on sccount of the extra taxation that has been placed on imports and exports sfnce the Minlster made his Budget propossl of March last year. I propose to direct the attention of this Honse to these matters,
We linve first of all the fact that the Minister intends to meet the defieit by a loan of nearly half a million dollars, and, secondly, we must rememter the fact that that deficit is being lessened by taking some one hundred and ninetyefight thousand dollars from the cash reserve, making in all Geven hundred and fifteen thousand dollars. Then, you come to the additional revenue by which that deficit hus been brought to the least possible amount. By the courtesy of the Minister, 1 have before me a statement furnished by his Department in the earIy part of the session as to the revenue recelved on account of the customs tariff proposed on September 7th, and Eivigs the amount of revenue collected on these tariffs up to March 21st. This statement shows that $\$ 230,257$ was collected on that account. Now that left three months of the current
year, during whtch rovenues of a amaller naturo would bo coming in. Now, I assume the Department will have benolitted by September taxation, fudging from this statement to the extent of one hundred sind sixty elgit thousand dollers by June 30th, so thot there is some four hundred thousanid that will be collected by Jume 80 th from last September's taxation. Nov, the moaning of that fil this, if that tar. ation had not been proposed in September the deflict, Instead of being geven hundred and fifteen thonsamd dollars would be one million, one hundred and fifteen thousand dollars.

Now, that does not talce into conslderation the whole of the taxas intposed in September last. There were taxes imposed on various commercisl documents and stamp duties, ete. I stand subject to correction, but if I remember rightly the Minister gave the House to understand that that tacation would be good for twenty thourand dollars. I presume that this twenty thousand dollars thus fimposed has been a contributing factor in keoping down the defleit to Beven hundred and rifteen thousand dollars. It must further bet remembered that last Thursdsy additional taxation was impored on such revenue as is now being collectud, and will be collected on thls year's necount up to June 30th next. Now, judging from the normal revenue that taxation should be good for at loast twenty thonsand dollars, and it will then be seen that unfess we take into consideration the revenus that has been derived from extra taxatlon on this year's account, whicis has been imposed since last. Budget Speech, the deficit would be, but for that taxation, in the neighbouthood of one million, two hundred thousand dollara. I mention these facts, partly founded on actual figures furnished by the Departments, to show the alfr: culties with which the Governmenit have been faced during the eurrent
year, and turther to emphasize the fact that the main factor in causing this defielt lias been the war, and that that war is continuing with little Ilte: thood of beiligg through by the time we are called upon to consider the Buidget of neat year. These ure the facts as they stand, and we nust bear them tin mind nis lucidly as we can when they are under discuesion. Moreover, while we are consitiering the finatiat difficiltles resulfing upon this war, we must romember that it is not the sole factor or cause in matitug un trife deffict; thera are other contributing canses to which it if fair and proper that wo should give due considaration. Now, to get at these factors we mist necessarity go bick and examine the clrcumstances of preceding years: The Minister has already enlarged upon two factors outaide of which 1 do not propose to go in my arguments now. The Minlster has spoken of cifromstances which have had an adverae effect on the revenue of the proceating year, the first of which was the general depression of traife, world wide in extent, the speond the pollicy of the Government in preceding ynars, the policy of the Government as set forth in this House in the Sassion preceding the thast general election.
Now, I propose to make a few remarks on the question of the general depression of trade by him referred to. The Govermment and the Minlater of Finance were slive to this faetor fourteen months ago when he made hin Budget Speoch in 1914. At this time tre spolte of the world wide depresefon existing outhice this Colony, but which he said at that time was tot felt at all in Newfoundland. He evidently tatlolpated no such depresslon here, for at that time the Gayernment led us to believe that this world whe depression had practically no tuftuence II Newfoumdland, We were told that business operations
were golng on the shme as ever, and within the bounds of Newfoundland that depression had no effect. Now. is it not aingular, after such a statement as thls, that Inst Thursday the Minister should have enlarged upon this as the great contributing factor in the deficit of this year? He even asserted that the deflelt of last year was largely due to this depression in Newfoundland, but it muat alno be observed that when dealing with thili matter he quoted largely from outside sources. He told us the Canadian Minister's view on the depression as it was in Canadn, and also referred to its influence in the United States, but there waa no reference, except a bare, cold statement, to any such depression in Nowfoundland. Now, that was somewhat strange, becanse if that was a contributling factor, he could have told us more facts without havIng to quote outside opinion. I will even venture to dfapute the accuracy of the Miniater when he assumed this to be a cause in such a large moasure of the dericlt of last year, and 1 would point out that 1 bring into testimony his own speech, the facts and fienres furnished by his own Department. If the House will have reference to the Minister's speech and more particularly that part of it which relates to the Colong's trade, it will be seen that be quoted the truporta, exports, and total trade for the years begluntige 1509, to the end of June 30th, 1914 , Now, the remarkable fact about that quotation Is, that it disproves the Minister's contentlon, for if he will have reference to the exports of that year, he will find that by Jume 30 th, 1914, the exports of that year were bigger than were ever known in the history of the Colony. That is the purchasing power; the exports, which of courbe are all our prodnce, ware netually greater than any other year in the hiatory of the Colony; therefore we cannot asamme that the depres-
slon in trade made liself felt at all at that time, for we had more purchasing power that year than ever before. Therefore 1 charm that in coustdering this matter we can very properly dilspense with that contention that de prostion in trado liad suyything to do with the revenue of that year. The real cause, I contend, was the policy of the Government in the preceding year, a polley which dielocated the reventie, a polley which was throwtug some four hundred thousand dollars worth of revenue on the free list; and I am borno out by tide attitude of the Goverament in provious years, and the nitutude of the Ministor himself when he pointed out that the throwing of such an amount on the free list would have a serioun effect on the dislocs. tion of our trate. If this thing ever was to be done it could only have been done by atages, and the roault of the esperfment ctasely watctien from year to yoar. It was in pursuance of a uromise made at, election timet that the Government took what they conolder ed to be an harote mensure in placing sueli al large umount on the free list, Fad we bave been suffering from the evil coasequenees of that Act ever since.

But if we lend our attention more to that aspect of the matter we shall not fully realise the oxtent of the evil cansegueacn of the Election Butiget. We shall better renllse it if we go bacis to the last Budect itay and constiter the uspect of matteni its furnished to the Heuse at blas time. You will remembur, Sir, that at that time the Minlster estlmated the revenue was ehort same 8150.000 .00 , but the fully expected to pay up that on June 30th. With the mifuttombl taxation that he אwat then imposing, the shortage would be folly puid up and the surplus would be stiown at the end of the year. That expertation was disappointed, the Bhortage ghown tariy in March of
$\$ 150.000 .00$ krew into a deficit of $\$ 301.000 .00$, so that the extra taxation imposed in March, 1914, had not even the effect of keeping the shortage at the level at which it was in March. Extra taxation was imposed and the shortage continued to increase. Naturally in order to get at the effeet of the taking off of the duttes in 1913 we must took at the actuil deflct and how that deficit was kept down to the amount that it was, because we must keep in mind that $\$ 301,000$ of a ahortage would have been greater but for the extra taxation imposed in March last. We must, therefore, find out how much was collected trom March intil June 30th, that helped to keep the hatance down to $8301,000,00$. If we get down to that you will be able to consfier the full effect of the slection budget. The tigures which the Minister furnished me with last Thursitay show that the tarifif imponed in March 1914, added to the Revenue between March and June $30 \mathrm{th}, ~ \$ 114,000.00$, hut for that $\$ 114,000$ of extrit thxation the shortage of last year would have been $\$ 116,000.00$.

RT. HON, PRIME MINISTER,-YOH are not allowing for the increasod expenditure.
MR. LLOYD.-NO, becrawe when the Minister whs furnishing thls balance he mate aflowance for the additional expenditure. But even so, it I had allowed for extra expemilture. 1 would look to the Leader of the Government to nhow me how it could be altered becaume the expenditure haying been made it would have to be paid out of the Revenue and it contributed to the shortage. I have not made allowance for extra expenditure because every year the irintater has made short estimates knowing full well that extra expendilure was uot provided for, and he went into extra expenditure with hts eyes open, filly open, and he is the one to account
for it The poaition is this, that by the oxtra taxation imposed last March the contribution to the revenue umcoanted to $\$ 114,000$ by June 30 hh, and if it were not for that the shortage would hate been $\$ 115 ; 000,00$. What Is the meaning of all thin? The moanItig of It is that instead of the reveaue xebounding. as the Mrnister and the Glovernment led the House to expect from their itatement in 1913. so an to make up the $\$ 420,000,00$ which they liad taken off, the revenue was netually less by a greater amount than the taxation which they took off. The revanue ulhowed no hnogancy but acutally there was a great depresston by in amount kreater than was takEy off. Thint is a factor that was not influenced by the war. A factor to which the war was not a contributing cause, bachuike wir was not dreamt of in those days:but although the war was not dreamt of in those days the evil effects of the 1913 finnncing was beligg felt during the then current year, and fiE beltig felt now and is a contributing catiee to the deflicit. Now, Sir, hisving pointed that out whit is the mornil? The deflelt on June 30th, 1914, has been met in two ways-one, by the increase of tuxation hin Maroh, 1914, find the other by a recourse to the cesh reserve; und what is the result of the finaucing of that year? In the Budget of 1914 there whis a deffolt on curtent account, not on account of uny moriey contributed to the war. bocante that wan covered by a loan. There wis il deficit on ruaning acsount of $\$ 1,200,00000$. That defieit of $\$ 1.2090000 .00$ has been met in three ways. It has been met by taking the balance of the cush reserve, by the extra taxation of list September, and, by the extra taxation of Thumsiay linst. It has been met, but not met wholly. It hav been mat partially, and we are silll fices with the notice of if loan act by the Government calling

For 3500 000.00; liut we ment bear in mind an adrenn blanee of $\$ 1.290 .000$. Hiew shall se atand seat year! That is what we curat face. We face it in two ways. Finet the taxatlas of September last continses. Socondty, the new taxation of Thursiay las conf thuser. Kow we must fint out how marl the tew tavation of Beptember last and of Thurnday laat will help to reture that $\$ 1,2 \pi 0.00$ adverse his: saice; because wre are bacent with a war year and bow are we keins to buet that? Although we cannot shy witt itectaton y et wa cair male nowid eatimate. The revenun imposed last Beptember up to March-alst, brought to 332,000 , that is for seven monthe, sappose we toutte that for the whole sear The Septwmber Bladget in caiculated to laring in just about \$1Ce, eno , I think 1 am taking an outatce osttmate: If the athifiter cin lave it higher I will accept angthing reasominile, but i ath taking stope90 for then mext yoar. Then wes have the trisation tmposent tait Thurstay. What will be the effect for neat yeart It is a war yoar, but suppose it wan not ह Wer Yaar. Suppose we trane the bottefit of is normat foar and estimate that revenue at eleven per cent let us take the list of importations for the yoar Eintlise June Joth, 1914, which wher a hormal yent, and that witt cive as an autadde eatimate. If we cal esiate that, my eatimate for a nermot Jour of then thrtt tmpoent furt Thursiay las \$100, (00s. It le bound to bring in lesk. The Minleter himpelf has net nllowet far that amoant, ace
 Thurnday. Then we hawe an extra reveuse for next tear of sobs.aed, andwith a shortage, calculated on the bas
 it is no wronider, Bir, that the Minister departed frum the neual castom in dealing with the thadget matturs tart Thurmany. It in no wontuir thit

1 weudd He to luwe a word or two ni the revenue proposals themaelven.

I have atroady polated out that the polley of the Goymrument is to make 4. sampling of taxation. I cell it a eampling of niw taxtlon, bocatue ovotr if cafoulated on a normal year it does not brine in more than $\$ 100,000$; that will teave wis with a tirs defflt next voat. Now why thils allence? Why have not the Government faced the struation out by celling us frimbly that they Hre preparted for a deflit on a war year? Or that they will meet the situation by a recourse to the revanue whifen they took off in 19187 I thithk thet 韭 the "nigger in the wood-pile" Havieg in 1913 made a step that has Ind the Mintater whare he te-tadiay; the Government has not the cournige to reverse that policy. They havo rether lookad to ealoulated isporifeney. The Goverument has to parnhtet trits case lis stiowtrg thitt there whe a deffeft is the Bond Administration of \$170.009. Suppose it wais true; I wonld like to know if the Minisier thas tieen evintine the preaent deffelt on the same basla because he has not heen tortunate in hifs forechst recent1y. I may racantly becaure the Mtntsfer was fortunte at other thmes; it times when le had no cantrol over the Novenue when it stmply fell in on him, bint he whe art fortminte to 1915 In thit year the thefong off of thit thexution was to be met by a buoynat revanue, and ft whes short $\$ 400,000$. In the next year the distocation was to lie met by in mew taxition hut thastead of the uiditional taxation meotiag the defict there was $\$ 300.006$ of a shortage Last star he was ulso equally out but I do not blame hitm for thint because the wrr eame in and bronsht In a faetar over wiftet he had no control. Rut these new taxes are ohifectoniltiey fir thit flrit plice biecatuse they are not enteniated to hring tif eny revenue wortle whille. In a war year the Minlater will be very fortumate if her sete $\$ 00,000$ out of 4 t , and
that may be gatherod from bis speach Iest Thursday. It is objectionable because it will feverse a pollcy on wheh the Governmont han spent mioney. It kets to worlc and handicaps agriculture ofter having established socieffes and commissionera to stimulate the industry. It is objectlonablo henuse it handicaps the fisherles, the staple Induatry of the Colony, and the hundicap in not worth while beculse wo are not getting any return out of it.
Now, Sir, I draw my remarkis to a close I have not, I think, said anything in any way to deparage the Alinster, but 1 have simply thrown out these tew observatlons upon the aspects of the case as they have appealed to me and I hope thoy will help to clear up the stiustion.
HON. MINISTER FINANCE AND CUSTOMS.-Mr. Chairman, just a word of twe in reply, I must edmit that the hon. memher has lat me down very eusily. His remarks are not as ptrong as one would have expected from such a eritic as himself. He ta one of the princtpat erities in the House and when he midertakes to criticise budgets one would have expected, if anything, a moro stringent erritctam this has been glven this atternoon. He admils from the start that the war has had considerable to do with the finances of thite Colong. 1 nm with him there, hat before going Into that he stated that the financial position last year was not due to the wir, My reply to that is this: that two yenre ago depresston was apparent all over the world: not alone in Nowfoundland but in Canoda and the States. We must all look for bad years. From the begtining of thelr torm the present Goverument have thit prosperous times, Durtige the first four or five years the revenues were very hish, and it was not to be axpected but that we should meet with
some reverses; but this much we must admit that the present Government has done ita beet to meet the situation. While they recetved large revenues and surpiuses in the past they have given them back to the people in improvements-light/houses, tos-alarms, roads, bridses, education. Coming down to the deficlt last year of $\$ 300,000$, while the learned Doctor thifs afternoch pointed out that our exports were right up to the hilt-the highest in the history of the countryhe has nicely avolded the question of imports. Slnce the war began the importe have dropped very consider: ably, more particularly the import of food stuffs. Everyone in this House knows that an enormodis amount of revenue is received from importations and slince the outbreak of the war I think you will find that white peo-
; have as much money as they had before the war they have stopped purchasing imported artictes. You will find, I think, that after the war is over there will be as much money in the bantas as before, but white the war lazta the importation will be very small and the revenue will be comparatively short.
Last year was a very bad year for all financlal work and the fact that this Colony's current revenue falled to reach all her obltgations by such a small amount spetks woll for her. Everything was demoralised on account of the war. Last year, Canadn had a surplus of about $\$ 30,000,000$. This ycar it ts epected that she will be thife amount short. Yet she is the Enct: Rou-tiching of all the British dominions. In fact it is my opinion that Dever Brttist eotony ill the wortd over will have a shortage in revenue as a result of this war. The learned Doctor doee not hope for fimprovement eran whon we get buck to normal conditions. I am very hopeful that when this war is over, and nor-
mal trade sets In, that Newfoundland will be able to flourish without any fncreased taxation. If you will calculate carefully you will find that our revenue during the past few years under normal conditions has paid four and a balf millioh dollars. I make bold to say that even if the war does hold on another year, that at the end of that time, If our people have a good season Newfoundland's financisl condition will be good; her trade will not be demoralised as has been suggested.

It the war is over, and her industries are working as usual her Bell Island industries, her Grand Falls and other industries, I fail to see, as the how. member has foreseen, any resson why we should have a deficit.

He also said that the sole cause of our financial difficultios was not the war, 1 do not agree with him. Did We not have, from the year 1909, a series of surpluses, amounting in all to ahout $\$ 1,000,000$ ? Our reserve was increasing at the rate of $\$ 250,000$ per year, and what should prevent us from taking off duties to cover that amount as per our promise of 1908 1909. Even if we did make a mistake, who reaped the benefit? Did not the people? If we made a mistake the people and they only benefitted.
I take it that even if we did not take of the taxes in 1913, we still would not have enough to straighten out our accounts. That was not the cause of thif embarrassment. The cost of living here to-day in small compared with what it was ten or twelve years ayn. The country has progressed wouderfully. Why should it go back now? We have been accused of makIng estimates for next year which we dare not hope will be reallsed. This Is untrue. Under present conditions f. Is well rifgh impossible to estimate is year's expenditure in advance. If the war continues. I for one cannot,

Fhat tar alruify them tratt mith what 1 wuit is to pelat aut to the Minister tast I think blis beat way de treat the prowest aits: atfon voutt lise toriel fo liave haif mors ruand to the axpesititurs ithan to the tasuifon. Ite selmits is late statement list efitieen menathe or the Yent men in tementon min mintfeet mot antr for this tuantry turt sho is thm maritime provinoces the taet to the whole rorld thern was a \#ivernt dipteretem. Hfe tatmmity miftht hirrtr eonalifered that that feprneston would conet laerey and instead of lookins
arounit and seetige whit lie coutd tax he migtt have tried to reduce his experidture 1 think that if he had gooe over the aeveral ltems of the Ettsyater which were pasted by this Mouse lait week he would have found Atmela able to curtail the revenum entro three or four or even flive thoo. natid dellary without effecting the efliclency of the ppotitic ervices in Eny way. I have referred to this mat. ter befork: I have salid that he mishot heve cut out mereral thingm which ceuid have eatily been dispensed with. and 1 am comvinced that the proper sing to dral wilh the present situa, thim in to reluce expenditure rather than increash tazation. There are Hems of expenditure that might lave hriat riatured. it is admittied that at the end of fune there will be a large A tilich and that in order to meet that dinill, it will be nechasary to borrow fioney, It is sudinitred that at the mid of June 1916 there must be a faxther and ereater defleit than there Fray in 1515 , and yet the Gorernment pan maile no effort to reatuce the * ty has to pay far ite public sertlees.

No ote cualit foresee the conditions wriaine out ot the wart no one could firvene the nar, but we have been in Henatow twles stnce the war bogan. To were In Sesalus in September, tilt, and we ure agaln none, and our expenditure is Jate the tame as if thrre was mo war in evistimee. We vill of neceatity be balled upon to pwy largn sums of mener in connection with the war, and there necesaar If mant be ereat idegression in ouir qudes, and a decrease in our revenim. and the asty wray lett to get mosiny in if rolucturs then expendture and not facrearing the taxation. This is my virw of Be timanelal situation, sul the way it ousht to be met, and 1 hopen thint the Goverument will see if they
cannot curtail somewhat the great expenditure made on her present pubise services. I am not going to point put-it woutd be needless to point out-atrections in which the money could lave been saved, I am not going to point out votes that might have heen done away with. The Minister knows them as well as 1 do. It is more necessary for us to shoulder our obligatione than to carry on our public services at such a cost. We can do away with a considerable number of obligations by reducing our publice services, and that would be a better way of meeting the sltua. tion:

RT. HON PRIME MINISTERJust a word or two, Mr, Chairman. I have listened to what has been sald here, but I think that generaliy speaking, the positions laid down would not be reasonable ones for the Government to take. Take the position mentioned by my hon, frlend, Mr. CHift, the momber for Twillingate, He thinks that the estimates could havo been reduced by $\$ 5,000$ if they had beon gone through caretully. Well, I might toll my hon, fflend, that these estimates were all earorully gone through, and while some $\$ \$ 4,000$ was saved on the public services, that was the best that could be done, and the greatest amount that could be cut off. You can cat orf little bits here and there, but the result is so small as to be worthless. I personally thlik that taxation is the beet way to deal with the present situatlon, You fire giving the pubtic a better and more expenefve sorvice, and in that way the extra money ta fust going to themselves.
The suggestion of the member for Twilingate that expenditure be curtalled at this season of the year is not as practical as he has made it out to be. He who to-day does this without necessity is his country's worst enemy; in the same way that a mer-
chant would be who being able yet refuees to supply our men for the fishery. I am sure that my hon. friend will now agree with me that curtailment is not the best way of dealligg with situations such as the present.

Now, Mr , Chairman, if you will on1y look at the Estimates which we have passed, you will flnd that nearIy all the large votes are votes which cannot be curtailed. In the first place, we roted one quarter of the whole amount for interest on the public debt. That cannot be reduced. Then there is nearly another million under contracts, for coastsl steamers and services of that sort. As ap Illustration. we pay 875,000 a year to the Bowringa under our contract, probably about $\$ 300,000$ a year to the Relas for mail steamers, and for trains. You cannot curtail these votes. We vote $\$ 300,000$ for the schools, and it is hardly worth our while to begin on the school teachers, elther by reducing their salaries or closing the schools. Then I wonder if anyone on elther slde of the House would like to say, at a tlme when everyone is asking for larger grants for roads and bridges, that we should reduce the present vote for that purpose.

MA. CLIFT-Yes, I would, If necessary, and education too.

RT. HON. PRIME MINISTERI am glad that the hon. member has the courage of his convictions in that respect, but I say that would be herolc at a time when our people were poor and unable to pay taxation; but my point is this, that never in the history of the Colony were the people better off: and even if there are a tow hundred, or it may be thousend, that are looking for supplies today, whilst they have all our sympathy, we must condemn those whose narrowminded pollicy keeps these people on shore. I don't agree, Mr. Chairman, with the pollicy of cutting the salartes of the teachers and closing the
publice schools, and, I think my friend on the other nide, if he will give that matter a little reffection, will be sultinfied that that is not the policy to work under. We voted over half a milition for the Postal Department-I think nomewhere th the nefghborhood of seven or eight huadred thousand dollars: and whilst a reduction is propesed in the salaries of those underpald officials, at the same time petition after petition is presented to the douse for increases in salaries for these very people. Now; it seems to me, Mr. Chairman, that it is not by reduction that. the present deficit can be met. I can assure the House that not once or twice or three timea was this matter carenully gone into. Every vote was carefully considered before it was brought down here, and the estimates were prepared with the full knowledge and bellef that any curtaflment would result in an impuirment of the publie service, and would be of very little advantage as regards a shortening of expenditure. Now, my friend, Dr. Lloyd, the hon. nember for Trinity, confined his remarks to a different aspect, and argued aloug different lines, and with the exception that 1 differ with him as to his conclusions, and as to his motives that he suggeated, I cannot find any fanlt with his criticism; but the Doctor rarely fafls to hark back to the policy of the Covernment in 1013, when they toolt oft the duties. That, he suyn, was a mistake, and haring made the mistake we lave not the courage to come in and ropair the error. Now, I don't agree with lim there. That polley of taking off the futies was the wetl-conuldered pollcy of the Government. We had gone to the country on It, and If wan one of the matters in 1908 and 1909 that was solemnly pledged to the country that we would reduce taxation on the items mentioned, and year after year in this House the very parties who
are now objecting so strongly to the taking off of these duties made speech after speech in favour of their being taken off; and I think if you will refer to the Journale you will find that not atorie wiss the tate teader of the party. Sir Fobert Bond, and 1 think 1 am quite correct when I say the present leader, Mr. Kent, in favor of that pollicy, but they were in a burry to have that pollicy carried out and proposed resolutions bere along those Innes. The pasition which the Gorernment had to take then was this, that the time had not arrived; that we were not warranted in taking the dutics off then, becausc we were under nther obligations and other promisea that had to be carried out before we would be in a position to remove these cutles. Now, what are the facts? At the-risk of being tircsome and tedinus I have to ask the House to re-member-and I am not speaking in tuy sense of complaint or with any desite to bring up old sores-that when we came in in 1909 we were confronted with a defleft of $\$ 190,000$, that thad to be met by a loan bill-a debt entirely contractod by our predecessors. The next year we had a surplus of $\$ 420,000$, or la that nefighbourhood. The next year we had another large gurplus, and the following year another; and then, when we had made provision for all our publle services, had provided for the interest on all our loans, and had increased the public service something like $\$ 1,000,009$ in five years and were well within our means, there appeared to be no risk whatever in taking these duties off. It hase been pointed out here that that led to the deficit of $\$ 301,000$. Now, If you will look at the figures before the Committee it will be found that the defleft from the Customs that year only amounted to about $\$ 200,000$ : so that at the very worst, the Finance Minister in his eatimate, although he
took off $\$ 400.000$, was only short $\$ 200$. 000 as regards Customs duties. These are the figures as stated in the Budget. And what happened in the meantime to bring the shortage up to $\$ 500$, 000 ? Well, that has alrondy been pointed out. The general depression all over the continent reacted on Newfoundland. Before the war began at all we felt that depresaion. Boll Island closed down, and we not alone lost the revenue that would have come to the Colony if people were employed there, but we lost the direet revenue coming from that Island and from the ore that they would be shipptig. So that everything points to the fact that the Government was fully justified in putting these articles on the rree list. Now, it has been asserted bere over and over again that that was an election dodge that was resorted to last year merely because there was an election coming on. Now, I don't think it is fair to make that insinuation, and to question our motives in relation to a public matter Ilke this. I am very sorry findeed that that aspect of it should bo takon serlously by my friends on the other sido. ft was not an election dodge; it was simply carrying out a polfcy and a pledge made to the people four yeara before; and which would have been carried out the very first year we were in offlice only that there were other services crying out for attention. In that four years we added $\$ 100,000$ a year to education, $\$ 60,000$ to Old Age Pensions, and put up 50 or 60 new lighthouses and fog alarms all over the country; we bullt telograph lines from one end of the country to the other in the district of St. Barbe; we lald cables in Fogo and Placentia and Burin and other places. If anyone will fairly and dispassionately examine the public accounts with a view of finding where that $\$ 800,000$ surplus went, he will find
that every dollar of it was spent in the way that he would spend it himself it he had the expenditure of that amount. And what would have been our financial position to-day if there had been no war? If the Colony had mssumed its normal condition, what would be orar tinanclal position today? We paid the shortage of $\$ 300$ 000 ont of the nest egg that was down In the Rank of Montreal. It was as well for us to pay It out of the Bank of Montreal as to pay it from duties on tea and sugar and pork. These dutles were taken off to fulfill a solemin pledge, and to relleve the most deserving class in the cominunity. If we have had to put them back partially, if we have had to put on new dutles, it has been because of a condition of things over which we could have no control and for which we are not responsible, Now. I look upon the present position of the Colony as being far from embarrassing or in any way serious. We had a shortage on the 30th June last which has been paid out of the $\$ 500,000$ that was put in the Bank of Montreal for that purpope. We have boen putting that fund there for the last ten or fifteen years, and the object and purpose of puttins it there was to meet a rainy day. That gquared the year 1913-14. Now we are threatened with a further deficit of $\$ 750.000$, due very largely, if not entirely, to war conditlons. We have something like $\$ 200,900$ to meet that, which will leave a fleticit of over $\$ 500.000$, which we will have to bortow in order to pay. The Legislature will bo asked to pase a bill to meet that I hope that in the very near future our revenue will be of such an nbundant character that we will be abio to pay off every cent of that. We could have done it easily in the years to which I have referred. We could not alone have paid off $\$ 500.000$ between the years 1909
and 1918, but we could have pall off * 800,000 , and there is no reason in the world why the yourf that will follow the war should not brtig us cibunCint overflowing revenue to pay for the uhort revenues which we have tudiag. Our importors are anty tmporting that which it is abwolutely neces. sary that they should lave. They are endeavouring to get clear of old stocks that have ticen tying on thetr sthelves, in some cases for years. That is No. 1 reason. No, 2 is that a certain class In the community are practieing econamy, taldng ailvantage of present condifions in order to put money away. That is why we have ehort revenues. We thre not short in our exports. Last year, with the exception of the lobster fishery, we had a very fair fishery, nit we got a higher price for our fith than evar before; anid 1 nim quite sure that the exports for $1914-15$ will atso surprine those who may have nny doubt on that polnt Now, my friend, Dr Lloyid. for crittelating the Budget thes afternoon was rather of opinion that there would be a still further and tergar defict the coming year, which bekthe on the 1st Juty, 1815. I thtrik in that reepect his figures are slightIy out. In the first place, he entircly overlooked, as was pofnted opt by the Minister, somethfog $\mathrm{Wke} \$ 100,000 \mathrm{fi}$ crelation to the ftom of kerosene oll. and the other ftems reterred to. Further, as regaruls the 10 per cont. he only estimates $\$ 100,000$, while the MinIster extimatas $\$ 150.000$; bo that in $\$ 150,009$ whloh can be faifly added to the eatimate made by the hon. memhas. Now, under normat conditions, we would not require any of this addltional revenue. The entimate here of $\$ 715,170$ ts the eatlmate of Mr. LeMeesiriter an the amount which would be eollected over and above the revenue us it existed in normal times. That in the eatimnte given by hlm to me nomething like two months Rgo. Well,
now, it you add to that the fneroase under the present tarift, I think you havo a fair margia to go on; and if we lave say fair mportation at all durfirs the coming year, beginning on the 1at July, 1915, I think we may nately bly that the eatimates of the Finance Mrinteter in that respect will be borne out. There is no deaire whatever, and thero never has been any desire or any ntention to keep back from the House or from the country the fulleat information in relation to this matter. We have had to put on these taxes to मoeet in unftue, extranratmary and unusual case, and I am quite satistied that with a littlo patience, with a litthe wif-rollance, and with hope and coufflence in the future, that the Colwny will come out of the pranent condilling of affairs an it has come out on other oceasfons. We must romembep this that previous to the war, and prexious to the general depression Which has been referred to here this cyentng, this Colony was never In a better position; the people were never better off, never more comfortable, मuid you have only got to look at the statistics to see that: you have only got to take the value of the earning power of the people tan or fiftean years ugo and compare it with their cerning power today. Divide the population of the country when it was 200,000 into the earning power of that dey and see what were the per capita earninge of the people, judged by the tmporter and exports, and divide 240 . 000 to-day Into $\$ 16,000,000$ of Imports and $\$ 15,000.000$ of exports, and you क्रill see the condition of the people. I remember that it was considered a aplendid hoast in this House when It could bo stated that the average earnthes of the peapile had come up to ghout $\$ 200$ per family. But that day han passed by, and we now wnit somethitng hetter than $\$ 200$ a family or $\$ 300$ a family, or nven $\$ 400$ or $\$ 500$ a
family. It is not what the people are taxed but what they are earning that counts. A man cares very little whether he pays in 85 or $\$ 10$ if he has got the means of paying it. it is along these lines, Mr. Chalrman, that we have, got to think. There are many ways in which the present financial difflculty might be met, but the Government are satisfied, after giving every conslderation to the matter. that the course which they have adopted and which they will pursue is the wiscet course and the best course: and that any course which wrould have meant the cutting down of the public service, which would have affected every one and every industry in the country would not be in pursuance of the purpose and object which we have in view, namely, to deal with the crisis through which we are passing in such a way that it will inflict the least possiblo injury on every one in the community.
MR. LLOYD-Mr. Chairman, 1 have no intention of prolonging the debate, but I want to make a correction in reference to what the Premier has fust stated. I admit that 1 have not taken into consideration the statements of the minister in reference to kerosene oll. But I do not admit that I lett out of consideration anything like $\$ 100,000$. I merely sald that in taking into conslderation my estimates I did not include that because it was too small. Let me prove my point. First of all, let us suppose that the Ministor of Finance, recelves the benefit of that taxation. In his own speech he quoted from the Assistant Collector of Customs who estimates thas the value of kerosene of September last, was $\$ 65,800$. Suppose it is $\$ 66,000$. Suppose there is no drawback at all. How the Assistant Collector makes up that, 1 do not know or whether it is the net duty. Suppose you put on the draw. back, what does it amount to? We
have a means of extimating that,when It is taken in normal year. But in a normal year you only got $\$ 12,000$ and not the $\$ 20,000$ or $\$ 80,000$ that the Minister is talking about. The total duty before the drawback is paid comes to 877,0000 in a normal year: and Mr: LeMessurier estimates $\$ 00,000$ It will onty amount to $\$ 12,000$, not 870 . 000 or $\$ 80,000$. The other point that I want to make is in reference to gasolene. I mado no allowance for a drawback in gasolenc. What does it amount to? The amount of gasolene consumed on June Soth, 1914, amounted to 188,000 gallons, Suppose that the total duty was reckoned at 6 per cent, of that. So that even if every cent was pald back out of the revenue from kasolene. It could not come to more than $\$ 10,000$. I take that to be a fair estlmate. Suppose that $\$ 13,000$ was the drawback on gasollne. it would only amount to $\$ 20$. 000 and that is only one fifth of $\$ 100$. 000 . 1 must point out that if there is 820,000 not taken into consideration. 1 was exceptionally liberal in reckonling the reat. If the gasolene is excluded. It does not effect the main argument.

HON. MIN. OF FINANCE-MT. Chalrman. last year we pald out all the drawback received on kerosene oll It have not the figures here, but will furnish them if any hon. member desires to ace them. As gasolene is going out of businese and Kerosene is taking Its place, we cannot estimate the kerosene at tess than $3,000,000$ gale. Last year it amounted to $1,500,000$ gals, and this year the gasolene is gradually dtsappeartng. You cannot catimate the kerosene importation this year. Take last year's estimates; the kerosene off amounted to $\$ 84,623,95$, and the amount collected in revenue was $\$ 15,000$, I do not think that there $\%$ any trouble about these figures

DR. LLOYD-Mr. Chairman, I ac. cept those figures; but I have already
allowed on account of kerosene only $\$ 64,000$, and 1 have already given him that. I am allowing that you receive two third more than that. 1 am taking into consideration a revenue from kerosene oil at $\$ 64,000$. The drawback for gasolene is $\$ 10,000$. That only makes a drawback of $\$ 40,000$ all told.

MR. COAKER-Mr. Chairman, I do not agree with the remarks of the Premier or the Minister, as regards the prospect for the coming year; I would rather be able to belleve that we would have $\$ 50,000$ at the end of the present year, than a deficit. To begin with, we are going to lose a large proportion of the lobiter rishery which will not be worth more than $\$ 20,000$ this year. Then we have lost a large amount of money on herring. on account of the ice. Green Bay has lost $\$ 50,000$ worth of herring alone. I belleve that when the books are made up there will be a deficiency, but I hope that it will not be as bad as Dr. Lloyd pointed out. But you need not look for any increase, even if the war ends in a few months, within 18 months from now The people have $\$ 250.000$ less than in a normal year. The higher price came after all the fishermen had sold their fish. It was the merchant who made the profit, not the fishermen. Then the large shortage in labour amounted to $\$ 200,000$. There is no labour this year on the railway.
I do not expect that on the whole this summer the people will get more than $\$ 6.50$ for their fish, but approaching the fall they will probably get $\$ 7.50$. OH1 will be worth $\$ 120$ or $\$ 195$ instead of $\$ 75$ as last year, but they need not expect any large price for their early fish. Conditions during the coming year may not be too good but they will be no worse than they were during 1914-15.

Now Mr. Chift said this afternoon
that we should retrench; but instead of retrenching you are imposing an additional taxation of $\$ 250,000$; and you are going to take it directly out of the pockets of the fishermen and the workingmen; because thls extra taxation is going to come from them. You are putting a tax of eleven per cent on motor engines, and of course you will make it more difficult for the fishermen to buy these engines, It is hard enough now for a fisherman to get an engine and you are making it harder. It is monstrous for you to do this and you never did a worse thing than put a tax on motor engines. Instead of helping and encouraging them to get these engines, and instead of giving them loans if necessary to procure them you now turn round and put this eleven per cent tax on them and render it almost impossible for them to get them. Now I Eay to the Government put taxes on in some other direction, or cut out some of your useless expenditares, hat do not put this tax on motor engines and crude oil used by the fishermen,

We should be endeavouring to give these men every facility, and trying to provide them with anything that would make their work easier Instead of hindering them by taxation. Talk zbout encouraging industries, You encourage capitalists and concerns like the Ropewalk by allowing them to get In raw material duty free, and pay onormous dividends and build up enormous businesses, and you impose this tax on poor fishermen, and hamper an industry, that is higger than all the others I do not see how you have tho heart to do these things. There must be some other way of meeting the present situation without taxing this $\$ 250,000$ from the poor fistiermen in addition to all you look from them last year in the way of taxes on flour and beet and pork, which amounted to about $\$ 750,000$ Now you have also put a tax on all agricutural imple-
ments and cattle feed etc, and you expect to make thirty or forty thous: and dollars from that source. Talk about an agriculturat policy and encouraging agriculture: why you are making it imposatble for a farmer to make a living at all. Then you are putting a tax on molasses. You expeet to get 830,060 from that source. Of course the consequence will be that the fishermen will have to pay about fourteen cents a gallon more for his molasses of course all these taxes that were now befng put on would defeat their own object; because the people would only be able to buy the harest necessities, and then orily in small quantities, and the reronue would consequentiy suffer. Then as regards the tax on salt; it was most unfair. One half the business men had been abte to get in thelr salt duty free and the rest would have to pay the tax. You could not have given the smaller man much consideration or you would not have done that. of course you cannot intend solng to the country again or you would not be doing these things. It has been stated the exports were large last year and that the fishermen did well. It is true that the exports were large; but the money did not go to the fishermen. Thay did not get the prices for their fish that they should have got. The ones that made the money were the merchants. The morchants that handled that fish last year made a clear million dollars as the result of the increased price of fish and yet these are the vary men that are to-day refusing to give supplies to the fishermen. Why does not the Minister of Finance take the matter up and lssue supplies to the fiahermen. Let them give security to the Treasury. Why not do something never done betore. All around us are happenfng things like never happened before. Our people are leaving the country in large numbers to look for work abrond. I
heard that one hundred and fifty men left Conception Bay last night to get work in Sydney. If the merchants will not supply the flshermen many more will have to leave the country, and we cannot afford to have this happening. We need these men to keep the country up.

1 wish I could agree with the Minister as to what he says in relation to the condition of the country, and what the revenue is going to be next year: but I am afrald that he will find on June 30th 1916 he is going to have a million dollars deficiency instead of finding everything square Our atfairs were in a pretty bad condition evon before the war, and they will be in it much worse condition now that the war is on. If you would cut down expenditures and encourage the fishermen instead of hampering them by these taxes there might be a hope of improving our position. We will not he able to get any money for twelve months to spend on rallway construcflon, and even that will be quite a loss. Even if we did not have this war we would have had an upheavel In our trade couditions, because economic conditions in this country are not what they should be. The businesh men of Water Street are no more capable of running the business of the country than 1 am of being President of the United States. The whole system will have to be turned over from the top to the hottom, or we do not know where it will end. There are only a few men on the street who know how their business are being run and whether they are making money or not. Our present system will never bring stable prosperity to the country.

1 have some further remarks to make in connection with these Resolutions, but I shall make them at a later stage I would now suggest to the Government that they reconslder what has been done in connection
with the Resolutions: and they might take up the suggestlon that we have made and see if they cannot do something to encourage the fishing fidustry Just as they have protected the Tobacco Factory and the Standard factory. We have protected the Nall factory, the Clothing factory, the Ropewalk and now you are taxing the industry that has to malntaln the whole lot of them. Now, 1 ask the Prime Minister and the Minister of Finance and the members roprepenting the Government on the other side of the House to get together and take off those taxes, and instead of trying to provent our fishermen from getting motor angines try and devise some means to assist them in purchasing them.

HON. MIN. OF FINANCE AND CUSTOMS-Just one or two words in In reply to the honourable sentleman. I do not agree with him at all when he says that this tax on motor boate and crude ofl will come hard on the poorer fishermen. The fishermen that are able to buy and run motor engines are of a class of men that are more or less independent, and about neventy five per cent of them have small bank accounts. Now I know what I am talling about for quite a number of fishermen in my dintriet bave motor ensines, and each and everyone of thene men are fairly welloff fishermen with small bank accounts: and if they can purchase these engines and Increase thelr earnings there is no reason why under present conditions we should not come into this House and put a small tax on these men. It is not a tax on the poor tishermen. As I have fust sald the mea that use these engines and this crude ofl are the well-to-do fishermen who are increasing their earnings by this means, and it is only $r$ ight that they ahould pay a small tax.

If he can Increase his present eatch fifty per cent. surely it is not unjust to put a ten per cent on his engine and tive and a halt cents on crude ofl. This clans of man has not been bearing his fair share of taxation in the past, and we have now fmposed thls tax on engines and crude oll.

MR COAKER-In reply I would Just say a word about the fishermen who own motor engines. Now I can quite see that the men who bought the first motor engines that were used In our Iishery were independent men of the class the Minister speaks about, men who could afford to purchase thelr engines outright. But that condition has changed. The men Who have been buying them the luat few yenrs sre not the same. They are men who buy an engine, paying probably one third of the purchase price down and the remalning two third tir to be paid in three years. We cannot sell an engine on terms lonser than two years, but I think some ensines are being sold on longer terms. There is a great effort beling made by the fishermen in the northern districts to get motor engines. Every Eisherman that has a bit of money or can borrow it is anxions to get enough to pay the first instalment on one of these engines. The honorable gentleman may be right about his own district. but his remarks do not apply to the northern districts.

The Chairman vacated the chair at 6.30, and resumed it again at 8 o'clock.

MR. HALFYARD-Mir. Chairman, I wish to make a few remarks relative to this resolution. I think that the Government may somewhat be excused on the ground that they were deBlrous of keeping taxation as low as possible at this particular period of time, but it must be borne In mind that the policy of the Government in the year 1908 was one of expenditure
and that this policy of itself lays Itself open to the criticism of members on thim side. The question which most. ai-uets the country at this moment is the one of emplogment, for to-day we have men all over the Lsland seeking employment wherever they can obtain it. Suil to keep the old thip afloat I think the Government ought to be able to find some means of getifig revenute other than by taxing the fishermen to the utmost, and for these reasons we object to extra taxation. It is very unfair: it is the last straw that breaks the camer's back, and in the opinion of many of the fistiermen the Government never intends to go back to risk re-election, becanse if they did they would devfse some means of raising revenue more consistent with Gheir policy. If I were a leader of the Government and wanted to lssue a munifesto 1 would turn up the back itles and look at the manifesto for Sir Biward Morrls for 1908, and peruse the words which he used when criticlatng the Government that was goling out and showing up their shorteomtngs, where he deals with the mildeeds of past Governments and maken promises as to the development of our pataral resources-coal, peat, and othor tudustries, and the rindiag of new markets for our fish and other bromlses of a like nature which be maken. His statements would be as good to-night against himnelf as they were at the time they were printed. What has transpired during the past week or two is a direct contradiction of the intentions lald down by the Premier. What has he done for the conservation of our natural resources? has far as 1 cati see, bothring beyond thet bill which was brought down a short while aso. Quite the opposits, -he is throwing awray wholesale, and on that ground I find that the Government has been weighed in the balance and found wanting. From the
remarks of the Premier this evening. one would be led to believe that the country wis in a very flourlishing con-ifition-the people are prosperous. fappy, and contented; but when he wiuted to get thit contract conflimed by the Legislature the one excuse offered was the coudition of the country and the need of finding employment. Our nitaral resourves may be good, they may keep, but we want them, and to develop them now is to eave the country. That was hile argument. 1 cannot see the conslitency of hits remarks on these eccastons. Frat we are in destitute circumstances, and then we are in quite a happy and prosperous condition. The policy of the present Governmetit has brought this country to the condition that we find it in now, and still, no doubt, the Premier will say that everything he promised has been performed, everyuling the Government. hatd they would do has been fulfilled. Take the question of coal and peat: What luas been done with that? It is no bearar being developed than when the Premier came in. Our pat is lying in the bogs, and the attempt to utilize it has fallad. A peomine was aleo made with regard to the St. John's Municipal Act and the adoption of ameadments to compel absentee lundlords to contribute their share of taation. That has never been done. Then we were to lave small cottuge bospitals. I cannot see them uny: where. Bait treezers were to he es-tablished-no one can find them. The autopfition of cold storage. Well we had a bill before the Lerlalature the other day giving a company certain righta so that they could earry out a cold storage business in this country and when an amendment was brought in by this side of the House in the Interest of the fishermen to compel this Company to store a cer-
tain amount of frozen bait the Government refused to accept it. The polley of the Goverament aceme to be to fight shy of cold storage in the matter of bait. They have gone right back on their pollcy; but it is annecesanary to go any further into these matters to hhow where the Govornment hass fuiled. In 1913 the great cry was "Reduction of Taxation" It was the crowning act of the Morris Governmeat that thoy had reduced taxation. They did, but what was the result? We are told that the people benertited directly. They bencfitted for a short whille, but when we had to retarn to these taxes again they found they had to put them on heavier than ever. But who benefitted moat by this refuction of taxation? Not the flshermon, nor the consumers, but the mon who moth the goods. They benefitted hy that, and they benettted by the extra taxation algo. That is a well known tiet to everyone. Not only did thie price go ap an goods that were imported after the taxes were put on but a great deal of the soods that were imported provioue to the puting on of the taxes were marked up and the men who brought in the goods made the profit while the consumer had to pay. So that in the first year we find tifty per cent, added to the original taxation. That is what has happened to the country by the taking off of the taxes previous to the Ceneral election. It was a fallure. It was bad financige, and it dislocated trade Some one has sald that in 1913 the reduction of taxntion was an election dodje. I think it was a very good election dodee. It certainly did the trick. Then there was a promise in regard to a Lunatto Asylum. The old Asylumi was to be taken down and a new one put in its place. It has not not been done yot: I read the report of the Grand Jury on this Institution. Its condition is worse than ever. They
say In fact that-it is not fit for hum. an beings to live in. In 1918 ther people of St . John's were led to bolieve that we were going to have a new Lanatic Asylum and a new Poor Asytum and that we were going to have continuation or night schools. This was contained in the Speech from the Throne and Mr. Kent in one of his speeches lald great. stress upon their necessity. Where are the continuntion or night Echools? The Educstion grants have been tncreased. It would be a disgrace to the Governmeent if they were not, but the teachcrs' aalarleit have not been increased. Thoy are poorer to-day than they were in 1913. They are getting the same salary whille the cost of living hes gone up. There has been an inorease in the grant, and therefore the ehflifren have benefitted to a certain extent, but the teachers have not benefitted. At the time in his reply Mr . Kent said that he fatled to see what the Colontal Sacretary meant in reference to education; and the Pretaler replied saylag: "I cannot see what the hon. member expects, but I cinnot have it in more definite terms than by saying that the Government fntends to take up the continuation or night echools and deal with it as fully us possible, and eatabilsh these sichools so that the people all over the countiy will be able to go to night uchools in relation to navigation and any partionlar braneh of study whieh they wish to take up." The Leader of the Opposition at that time in his remarks on the reduction of taxation said: "When I think of the many obligations feeling the country and see the country on the eve of a General Eloction and when I see these enormous roductiona of taxation 1 cannot but be absolutely certain that you will bave to replace these taxes by other diuties"' It has been shown that Mr. Kent was right. It was bad finan-
cing on the part of the Government. Another statement made by a gentleman who once led this Honse-Sir Robert Bond-in 1910 was, "Before the Government can carry out this policy they will find the country itself at the mercy of the Bank of Montreal with the revenue hypothecated at five or six per eent. Interest." These were statements given by men on the borrowing and spending policy of the Government before there was any thought of war at sil, and at the end of the Fiscal Year 1914, we find ourselves with a deficit of $\$ 302,000$, before the war was dreamt of at all. Can we expect anything else, when the policy of the Government has been nothing but borrowing and spending and apending and borrowing? The only policy of the Minister of Finance has been to borrow, borrow, borrow, and then put on additional taxation. Time and again they have been told that they should follow the policy of retrenchment and economy, but unfortunately the words "retrenchment and economy" are not found in the vocabulary of that party. I should be sorry to think that there was anything of a personal interest in the remarics of any membera who backed up the polley of expenditure rather than retrenchment but we must certainly do a lot of thinking in these days. It is a pity that the Minister did not take the warning given him by Sir Robert Bond and Mr. Kent. They ought to tako some other means than what they have done to meot the situation. The Mininter's excuse, and that of his party, throughout the whole term of their office bas been that these expenaitures could not be helped. They must spend this money to meet the Increased necessities of the country and to build up the public service Which they undertook. There might be some excuse for Increased expenditure when they had surplus revenues
but in these years when we are facing a deficit it certainly is not right. They have increased the expenditure this year by an smount almost as much as they did last year. How can they expect the country to support this increased expenditure? The Govermment has run a career of unparalfeled extravagance so that the fate of the country is ruln. What will be the result of this policy of borrowing and additional tasation I fall to see. At the present time the whole country is feeling the pinch of the war. The Government has determined to continue the Agricultural grant of $\$ 20$ 000. That is a sum of money that might have been saved this year. The only way to get out of this hole and to help the country is by retrenching. proparly retrenching, but the pollicy of this Government is not retrenchment. It is to look after its own frienda, They must find aalaries for commissloners. They must make soft jobs for their frlends either in the House or outside. There are deductions made by the people outside of this House, outside of politics, who have been considering the condition of the country. Brorything is taxed and now you will have to increase taxation on the fishcrmen. You are pling on the taxation on the head of everyone, so that the cost of llving has become almost unbearable, and in spite of it all you grill refuse to reduce your expendllure, ind to carry out any retrenchment in any possible way.

I know that the people of this country will be told that the war is the cause of the present condition of affairs, but I would leave out this altogether and go back to the time when there was no war. There we find their policy of Government was wrong. The estimates were out. Taxation had to be fncreased to carry out their policy. It is alright for the Government ofliciala who enjoy nice salaries
and are sare of their pay to cry out that the times ure good, and that overyifing la airight bat thero is to them a silver iname in that ery. Their poliny is geit out of the scrape as bestyou can, anit that is their endeavor. Thint is thatr demomtistig poticy, That is the pollcy preached to the people. We will get back it we can; we'll get out of thits if we can:
The pollcy of thife Government tis in matter of eraft; a demoralising policy, and the people will boon awake from the steep and stumber they had been privileged to enjoy under pait Governments. As soon as the money Is gone the people will see that they are no good at all. Thay are no good untess they have tots of money. If they cannot get all the money they want it te the member's fault. "You firn in mand" thay may. "othar members got monay for wis hy can't you" That is the polioy that has been practicad by members: The enormous expenitture is for the cood of individual and ant for the country as in whole.

I would any to the Minister of Finpare "Cut ofl that duty on motor enelnen," because I assure you tlue has chanked the conditions of the fisherman. A. firherman must have a motor In till boit now is much यह hio needs a trap for the cod fishery. Perhapo a year or ao ago a man who had a motor in bis boat wie tooked upon as a mint of meame, but thls to not thie casie now Motors have changed now from a luxury to a necessity, and a man who tries to eatch flifl now wheno a motor azainst those who liave ia tuntor. If like a onehanded man against twohanded men. Therefore 1 think that every encouragmaent should be given them to ect motars without forching them to deny themaelves on account of the duty. All thihermen are now setting motors, and 1 know that all the mombiera here wfll bear me out
when I say that the most unpopular thing the Government ean do is to place a duty on motors, such as this bilt provides. If it is at all possible. ent it out, and also cat out that tax on kerosene oil. Both are absolutely necessary to the people: Cat out that tux on school books. They are also a neceasity. I know that that would be an great a hardship an the rest. Schoot foes are very low in some schools. Botue children have to pay but 25 cents per equarter or one dollar par year but school books are thingy Which must be bought year after year. The same booke will not do for more than one year. Thalk of a Government fostering education, and here you charge daty on school books. Many chilifen have stayed away from tehool not because of fees, but becamea of bonke. Yon hy doting this are making it barder for them to attend. A paternal Goverament dolng everything to incroase the education of the people. This tax is equally ohjectionable to the one on motor enFines. Cut that out soo.

On nocount, therefore, of these fnclusions In the Bill. Mr. Chairman, I ennnot for one moment think of givtife the my support.

MR. CRIMES.-Mr. Chairman, the Prime Minister, when speaking about this matter, made some reference to those shop-keepers who stocked dry goode. He made the statemont that most of the stores in the cly and outnide the city had not been Importinis muelh during the past year, but tried to get elear of their old stock, and consiequently personally beneftted. Now, Bir, I lo not see cye to eye with the Premior in that ramark, and would afk for an explatiation.
In the first place, Str, the price of goodn has gone up considerably since the war began, and tg sttll golng up. No fmporter who hins had any experfence in the price of goods is going to

Import as much now as he used before the war. How does he know but that the war will soon end and the price fall. He would lose perhaps forty per cent. You may depend upon it that he will be very careful about the quantity of goods stocked while the prices are as high as they are at present. He will only order what he cannot do without. This does not bear out the argument of the Premier when he expects a large quantity of dry gooda to be imported in the prosent year.

I notice while the Premier was speaking that he laid spectal empliasis on the fact that since 1904 the earaing power of the people had greatly increased, thus giving to his Government the credit. Now Sir, looking at our exports of 1904 we find that they amount in value to $\$ 10,670,000$. Dividing into this the population we get an aversge of $\$ 45$. The exports for the past year, 1913-14 amount to about $\$ 15.000 .000$ which divided by the popilation gives an average of $\$ 62$ per year. This shows that it is quite true that the earning power of the people is increased, but what value is it when you consider the increased cost of living. Take flour for example: In 1904 flour was $\$ 6$ per barrel. To-day it is $\$ 8.00$ or $\$ 8.50$. What benefit can be derived when you pay the extra to keep alive. What is the good of it now that woollen goods has advanced $40 \%$, and now that taxation is beling increased year by year at the preaent rate.

Another thing I want to point out is this: The Minister of Finance points out that the man who has money in the bank pays taxes, whlle the poor man pays very little. Now I take a contrary view to him and do not think he was serlous when he made it. He knows of course that his speeches will be read in the papers,
and hopes thereby that his term in ofice will be lengthened.

Now you take a man with an income of $\$ 400$ per year and this I think is the average poor man's salary. As the Minister has himself said he must spend all of it to get along at all. Now out of this salary he pays about $\$ 130$ to the revenue. Now take the man who gets $\$ 4,000$ per year, and Iots are getting that. He spends $\$ 2$, 000 of that and has another $\$ 2,000$ to put in the bank. He pays to the revenue $\$ 666.50$. He does not pay in proportion to the poor man getting \$400. He spends $17 \%$ to the revenue, while the poor man gives more. There is thus no foundation in fact to the statement of the Minister as the fig. ures of any country will show you. It is a well known fact that every man pays to the country according to his income.

You take a man getting more than $\$ 4,000$. Some are getting $\$ 15,000$, $\$ 20,000$ and $\$ 25,000$. These people do not spend one-third of this. Such men pay to the revenue but 14 per cent, while the poor as I have shown pay $33 \%$. Thus you can see that while the poor man has to pay $33 \%$ the rich or well to do has to pay but 14 or $17 \%$.
Now, Sir, it is the same in every country outside of Newfoundland with respect to the poorer classes. I do not like dwelling on this point, but I am compelled to do so in view of the taxation that is being made in this country to-day. The Minister of Finance has sadd that the well-to-do man pays the taxes-the man with money in the bank. What amount is pald in pork and other stuff used chiefly at the rishery. What is collected from pork? $\$ 2000$ per year taxes are recelved trom these articles. Then there is kerosene ofl. He says that only the man with money in the bank uses ofl. He must have beon dreaming, when
be sald that He bays the rich men pay the taxea anit at the same time proposes to tax Kernsene oil to the eatent of 534 on0, and thts every mas eves, espectally the poos. All then fithernen must are ail. Thn paople tn the rity wse eveciric Hehit, und will pay none of that. Then therr is catthe feed. There In roing to be $\$ 17$.000 revenue from that. This too will come chifnly from the outports. There are people there living from hand to mouth who will have to pay the Govopamant $\$ 16,000$ or $\$ 17,000$ per year, white the othern get tree from this duty. All this showe quite plainiy that the Minfeter was Jolkieg when he sutit the pfopte with mabiy fo the hank pita taxe.
tf the Mhisters ob the other side of the Hinusp are slocers let them *hem thetr stricirty if apptytur the taxation in a ditferent way to the prewaht. H athe Minister is sincere he will ark ltave to withdraw this porthen of hif hiutert anti vitt mo even up taxation that poor and rich may share alike aad no de away with the present system of having the poor mntr pur 239 and the Meh murn 175 . If lie would do thlin be would he nhowing tha aineerity in a practical manner.

MR. MORINE,-Mr. Chalrman, I hiave not been following the debate upon this subject, helag etherwise enmaged, and theretore 1 Intend to make only $n$ few remartio, more for the purpose of putting elureelf on record than anything elise and with meterence to the firanetal propesaty which these
 nothling for the afmplo reason that it Soen not appear to tas to he the the interest of the country at inir prepent thme tor कर्ण नerr muth II mithar ito more harin ocatultie than guod insidf. th fact the financial propenala of the floveriment have bees brought fown. tupply has been rotuif if anything
sosld lave heen dune the opportanity for tolag it has gune by; and these Hesolutions are only for creating the ways snd means of mistnr the sams siready brought dewn; therutore it would serve no good parpose to enter Into a divecusalon of the zennrat thzanclal condition of the Colony, and \#t misht do a sreat deal of harm. I will only mey an I sald on the vote for supply that I think the true polfey of the Goremment shisuld have been to cut the expenditure of the Colony with no uncertain hand, and to lave prisethand econotiy in every direction Father than to apend so mach of the pubilie money anid try and ralne it from the sume people amorigst whom most or it is to be apent Bet the Government have chosen to go on eppenflur an the princlple that the money they sre wperatine goes into the pockets of the prople, and then In order to oftuin the money they are apenting thery put their hand into the ocher pocket. of ther same people and take out the smant, *ithout reckoning, ot course, an what slways happens in that proceris and that fs that a portfon of thin money is always lost Hut, Bir, that has bewn decided upon, we are to make thene expmaditures, and we are now come to the question of ralsing the money. The question to which 1 wish to direct myself briefly fo whethor the proposals now made for raluing the revenuen are the wisest, and it appeans to me that they are not. Mirnt. Ithink that a number of thinge which have been selected are manifeatly Hitner which shocid not be taxed. Ther sevm to me to be taxes placed miven industry, taxes which will tend to prevent induastry instesa of enowraging is. Tuke for instance the tins an agricultaral timplements and upon unimals and upon articles that firmert use, such as fertlisers, ete. That nemmis to be a direet tax, not murnly upon the inflivitinat but upon the Ifvelthood of the indivituat and
upon the raw matorlal be unen in the prodaction of this livelihood. That priaciple of taxing raw material brought inte the country for the promotion of Induitries has beent aceepted an a wronk one by all Coveramenten and no reoponilble Iemintature woutd think of changing that pollicy. Nest you turn and put as tas upon motor engines and things of that kind which the Finhernest use It thelr proseevtion of ithetr Inituntry. Now it is potuenie to aky that articles of, thits kisid are nat, ated by the poorer people and that they coarequentity witt not have to pay the tay. All tasna for the lons ruas lave to be pald hor the producins of wealll. It dees not mat. tar sha pays tis the first ptace AIf intre ure eltimately paid by the proferlige clame All tams in thin cenn: to no matter whe pays them ftrit, are in the last analyala paht by the mat =ho taste she nib eut of the water or thes ther haturat pristice out at the earth. We Mear a let of till abent the rikth mun of the constry paying the taxation that whete da they pet the weath to pay thil tainifoio, This rich men of the country get thele reFenue frome the ladustrial sorikis of the country and it ther pay taxation tangety it to dus to the firct thit they Itive Inmariously on the wealih and dividends which are provided by the produeers that in poor meth of the coumtry aint thereforo if tis that all taxes of thit lind which are taxes upon productive activity are taxes placed upon the poor. We hear nhout the ammunt of trerrs that thim protomitonat mun pay. the doctor the lawyer and the cterigman, but where tle they ant the money to gey for their taxes. We are not protioter outselvon. At the mont we are mere matherern of whalth tuade by other peopter the tases wn pay are merely a wamil amount of the weath that wn talto frum otheria, bee ganee we are not producern ourselven
und are merely gatherers of wealtb uroduced by the industrial clames. Thair to tras of every protesafonit zask, becaume all wentich comes from the sei, or trom the woll and the produener in the mats who turias it into. stralti, who caraws it out from iti bilakel and the rest of us are mernly tax palherers for the Governmient. Thist is att. Thite clase of people eftt siot be bothered by increased taxettion hecanse they will rimply pat glipe fatalion uling the spoducts. There is nothteg mare abount than th thll about the rich peopte of this country prying the faration of the coustry. Everyome of them has mereb) limen itir batherer of vmati eamed 1. wither people sad the moore they tave, the more they heve taken from ethers. Now 1 may ey that if 1 had tien framing thise Resolatione 1 woult have mowed alons altoperther illiteritit linss. 1 weblat hive proctes: fit ain the baimpltike that miore Refonar cuald lavo beem produced br t morine tbe dair on certals articles fincrad of purtime on metimional tuty.
 Sentur prodeend in thls country upen whith the stoty far so Mah as to Be prokilitive Thes ire protiseted im tofor to encournate tismricturars anit they pervilfe a certain amomst of labpur. Incideatally for every ten centa for which they prowile labour they amuvite ntuets cents for the capftafirts to kemp for Hemselves Now then 1 fay that in a time of thla kind we tuusht to considur the fishermens and thin fibuurige clacsen abd if there tir any men we should protect in this fountry il oumht to be the finhermans and 1 think and mucrest that apon fuch urticles us liutterine, flothing. former anit incoun anif orthetes of that Aind wn ectrid collect truch mure mtumbe tr rectactig then ctutlen and ty giving the comamar chesper goodis. The amonnt to whrch chits covitd ber
done of course would depend upon a eareful examination into the standing of each of these Industries, but I fall to see any Justification for the heavy protective duty that fa at present upon theee articlea, We have heard from one gentleman upon the other side of the House that the present condition is a temporary one. Well, it that is so, why put on these extortionate duties upon thinge which have been free by the common consent of Governments of this country for many years. It would be better to have this deficit for a short time. You say you can borrow moncy, then why not borrow it for six months or a year. I would not advocate that as a permanent pollcy, but as you contend that this present financial situation is a temporary and an extraordinary one, why not make a change in the permanent policy and ratge a short loan to meet the sttuation.

Then I read the otber day in one of the newspapere an article apon the enormons revenue we are going to collect from the export daty on pit props, I think it satd wee are going to collect a million dollars from this source. If this la so why put thls tax upon motor engines and fishing implements and upon the rgrieultural industry. Again we were told in the Governor's speech what wonderful prosperity we were going to have this year in the iaheries. Why bother about these extra dutles if that be the case and we are also told that we are going to have a return of prosperity when these regrettable circumstances in which the Empire is now placed have passed away. Then what is the need for this extriordinary taxation. We have also been told that we can borrow money without trouble. Then why make these ehanges in our Re venue Bill. The simple reason is, Str, that the Minister does not belfeve laif these things, He does not belleve
them himself and he does not expect anyone else to believe them.

If he belleves what he says that. these conditions are merely temporary, why not meet them by reducing expenditure as was done in 1894. At that time when the country was in a bad financial condition, the Whiteway Government came in and cut the expenditure in two in many cases and in that way met the situation. You adopt preclsely the opposite vlew and instead of reducing your expenditure you come down here and introduce these most unfair, unnecessary and unpopalar resolutions.

For these reasons I thall vote when the proper time comes, if not to-day, then on a future date, on this matter, against the Resolutions, as they aro propoaed.

I recognize that romething must be done, but I think the things you propose are unwise and as I have alreaily stated most of the things that you propose to tax are essential things which should not be taxed at all.
MR WINSOR.-Mr. Chafrman, I intend to say a few words upon the Resolution for the purpose of putting misself on record. Now, Sir, many of these thinge which we have beforo un in the Rceolutions I consider most unfutr. Many of the statements of the Minister and of the Hon. Prime Minister we consider are not correct. For Instance, we were told this evening that $75 \%$ of our men had bank accounts.

HON. MINISTER FINANCE AND CUSTOMS.-I sald $75 \%$ of the men purchasing engines.
MR. WINSOR.-Every man who is fikhing to-day wants to have an ensine I do not know where the Government gets their information but I know that their information is most inaccurate as far as the laboring elasses and the fishermen are concerned. They make one statement to-day and
another one to-morrow and altogather they are anything but consistent.

We were told many times by the Minister that the fishermen were the backbone of the country. Now if that is so, why not look after their interests and why try to hamper them by putting this tax on motor engines and motor oil. Now there was a great aco made the other day about the passing of the Products Bill and a lot was snid about encouraging capitalists. Now. Sir, why not do somethlng to encourage our fishermen. The fishery is a greater induatry thun any capitañt crn bring into this country. This tax on motor engines and motor oils cupht certainly be stricken out of the rasolutions. Our fishermen ought to be estcouraged and helped to purchase motor engines. Every person who goes fishing to-day needs a motor engine. If thoy cannot get engines they will not go. Some of the achoonerim were laid up for most of the summer Inat yoar and the reason was becanse they did not have engines. Take the popition of a min with two or three sons. If hee cannot get an engine his soms will not go fishing with him and will leave him and go seek employruent somewhere else. Our fishermen are no longer prepared to put up with unnccessary labour and unnecessary hardship in the fisheries when by the installation of motor engines a great. deat of it will be removed. The fishermen in our ilistrict are all endeavouting to get engines. I know cases of our shore where people have loaned their friends money to pay the Eirst instalment on engines and those who have had engines and have acen the benafit of them are all anxious to help their fellow flshermen to get them. The man who has a motor englne can go out ta his trapa in the morning and overhanl them and does not have to work half as hard as the man who lase not got an engine. Instead of en-
couraging grester nambers to get these empines the Government by this athitional taxation, are hinderine the fishermen: I think the Govermment ousht to consider this and see if something else camnot be done to rafee the reveriue, A carpenter cannot work whthout hie toole and this motor ongine is is new tool which has come into the fishtng busituess and overy fishermun in finding the nagessity of hiving one sail should be encouraged to obtain them insteed of being hindered by the Government.
I tlo not lutend to ullude very mueh to the taxation on agriculture 1 do not think that the agrieultural polley of the Govermment since they came into power has tane much good. I belleve that they have given at few atilmals to some farmers and now shey are solar to tax then. It seems to min that the preaent Government is trying to put a tax upon everything and their whole policy ts to collect taxes from the people and spend thom fund it is becamse of that poifey thist We finit ourselves in the position that we are In to-day. I think that if the Government were rum in is business Ilke thanner they would find lots of places where they could cut dowa expenditure I think the Minister can finil lots of wayn of getting out of the preaent finnneinl sitmation by reducing our expentiture and if lie would go into thet matter fully and if all put our ahoulaers togethef I thimk that by a pollcy of retrenchment we could ment this aituation without putting on uny of these taxes at all. I think the present polios will do more to dis. courage our fishermen than anything we lave even hat before 1 think that If the Minister would take adrlee from this slde of the House he would see that there is another way of meeting the present conditions than the manner he proposea.

MR. TARGETT,-Mr. Chairman I
have followed with interest the te marke of the various speakert with regard to thene resolutions. All through the sexalon the members on thin oftier side of the House used to say how much they were in favour of the fishermen. Bat still they flad huatt with *hintever is sald on this side of the House on any subject in relation to the fishermen. I am as much finterested to the finhermen of Newfoumetfland wa any man inside theno walis. 1 wath to nay a few words with rogard to taxation. It seerns to me llike a crlme to tas the poor tolleris. Thie tollens are the bone and sinnw of this country and who otight to do what we ean to help them in the flahing in. dasitry. It seems to me that tristead of trying te encourage them the present Goverument fe trylng to fitl them. That is my ponest opinton. I may he wrong, but I do not think that I um. There have been improve minuts th pearty everyltitas fin thili wofld the last century, imiens it is one thing and that is Legislative matters. 1 know that the Prime Ministar promisent to faker linxatton oft. but it was onaly for a moment. The trouble to that holore we knew anything about the war there was taxation. He aiso ththe af thit the ocumtry is to very sood circumistances. If you are golng to tax the fishermen further, it means that you are goling to put a burden on thema greater than they ean bear.

1 know of men trying to buy onginek. not out of their own money, because they have not got it, bat by borrowtuig it. it ts tiart for mine to pronecute the fishery without eagines. Someone naid that they were going to tax tho points of the compans. Even sithinot hools are tand For men who hav is or 6 ehildren soling to sechool, It to no fun to have their books taxnt. Ar fur ns I am concerned, I beHeve that it is wrong. It is not my intention, Mr. Clanirman to keep the

House very long, but I want th show that $I \mathrm{am}$ intervated in the tollers of the country, I am not interested in the rich lincause they can look after themsolves, fint in the toller who tofle all day and then has taxes put oa him.

MR. DEVEREAUX,-Mr. Chairman. it is un unpleasant duty to have to ferpase is tux; nevertheless it becomes fucumbent sometimes as a duty. It is a duty to the country, to the poor man and to the rich. Why is it that in Eugtund the working man is warking 10 hours out of 24? Why is It that he in working overtime, because it in a vimple duty. A duty to the Emptre, anit to his country. What 1 hure heard here on thls dtseunsion has beell merely cuntroversy vithout ail ennobline feature. We stand today ut an epect-making pertod; and we ought to be prepared to do what tins never been done before. It has Lien thrown across this House that we have been harah to the fishermen. Fiead the history of the country and pery mum will say that we have donn tiverything that was possible in order that the fishermen should be looked after. The taxes placed oti the people are there because we must pregarve thlil outpost of the British Empire, no that the people may reap prosperity when these troublesome timen are over. That is all that the Gorernment is trying to do. You must femember there is sweh a thing as talse nocmomys. If the Premier and the Exrecutive Government of this country lose their courage during the *ar, this country will be in more flanger than ever betore The fiaher sien of this country are loral and ready with self sacrifice and the falflment of their fluty. It must be renembered that the times are abnoranal but I hope that when the war Is over affairs will nssume their naturat aspect. 1 think it is unfair for
\#n to thum complalin whes we cobsider the times in which we find oens selven. It is sot fatr to the fishermon of thle country. The standard of ethics is higher than that. We ahould that freuble ournelves in times sa:h an these, as to the price of this and that.

MA, STONE-Mr. Clialrman, It is not my intention to detay the House but I wish to make some reference to the resolntions now before the chair. I think it only right and proper for metto exprens my opinion, enpecialty as this is so counented with the fishermen. I think that in various depart. ments there has been lots of room for eutrunchment. Tor festance there is the case of the Goversment analyt. tho receives a salary of 81,600 . Is there no way of curbitting thren mimountst Now we have beturn us, reeofutions celling for incresse in tasithons i sey that i cansot poseritly mupport thesin rastuftomin becicatise ithelinve that taxation on the kerosene ofl of the fishermen, ts ahnuri. It is tiet always men whe cath aftord them. who are mettint motor enitnin, ther cause a man has tncreased his serm. lage by means of motor boats, it is so reason why he shouid lee ealied upon to payy that incremere in taration. Thets there is no funtification for the Govemment to tmpoan taxes upon motor engiaes. Wilhont the fishormen it tr it tuestion whether the Lercintature wouhl be here at all today. These resolutions are calling for $\$ 250,000$ to be raised frots the fisherases of the coumtry.

I do not know what the litea is now for raining this tasation, whether it is done to meet a deficit or not; but if
 tainly the faall of the administration: lemeauat to-day we find then spending money th all dirnettons and sow we wre faced with n proposition of thri kind. Under these cobilitious if eas.

Eot poreibly eupport the fiesolutians when the time comes. I would like to jlace myself on recocl as saytor I fannot pasarbly support it unlesa it is Improved upoa and I thlak that if the Minsuter of Finance will conslider that our nabermen ought to be encour Higed the very least lee can do fis to try and have thif amended somewhat unt tatie motor enginen and ernde ofl off the list.

MR. COAKER.-Mr. Chatrmas, me of the most pronounced teataros of the debate fo-night has been thats tax nib motor enginas. and mont of the apeaken who have placed thelt views tefore the House bave nhown that 10. place this tax on motor englties at the present time would mean nothing more or lest than erippling the fiaherim: Now I suppose that the Govermment have not conslidered that placiug a tax on motor enginen at the presnst time means keeptng the pooror fisharmen withoat engines and diseriminatine in favoar of the richer tiell who have enkines. It slmply means that the poor man must atarve Ent the rich man beicnme Helier. The richer men who have atroady got enripes which came in daty free can go down on the Labrador and go out on thin outaide grounds and entch finh where the nrdianry hook and tine meni comnot reach, and can go on the ontside erounds and place their trawle and prevent the fish from coming vlown to the shore and the man withebut a motor has to starve He had an eviuat cliance before but he cannot pompete with a mina who has is motor hoat and he will hare to ktay suhare. The more Independent men have alnadr got ewelines and now yous are preventine the poorer men who are tring to swecre enplines from dotng 20. They cannot afford to puy this frin peir cent, tax, and it stmply means Ther will not get the enefues. I don't auppose that any fishermes will be
foollsh enoush to pay that tax, because I whall tell them to wait a year or two for thetr engine and betore then we will take off that tax. Inatead of encouraging these fishermen you are doing everything possifle to binder them. and it will simply mean thitt the poor man witt become poorer still.

Now it han been argued that because a workman must pay duty on his tools in Tisherman should also pay duty on his engine. Now there is nothing at all in that argument. A planter's outfit costs anything from two to four thowsand dollars. He cannot be a planter unless he has that. He must have boats and traps and genr: whereas is workman can atart
$+\frac{1}{6}$ on twenty-ffive or thirty dollarg. I do not think that argument is a fair one at oll. Then again if we do not catch fish in Newfoundland who is golng to employ the workingman, even though he pays duty on his tools. Who fa going to build houses and wharves and stores, who fa going to give employment to the carpenter and the sailmaker and other classes of vorkingmen if you do not have the fiaherman to catch the fish. Who is gotag to keep the country up? Suppose you take the fishermen out of this country for twelve months where vould you be? How would you be phle to pay your bills? Why you are taxing anindustry that is the greateat of all our Influstrles. I say to you now if you pasa these Resolutions it will ouly be because you have made up your minde that you are never coming back to this House again. I doubt if even a man like the Minister of Marine and Fisheries, who is a strodg man in his distriet will ever come back if these Resolutions are put through.

I have heard the statements made by the hon. member for Placentia and St, Mary's, Mr. Devereaux to-night, In
fact I have beard these same statements time and again. He has atated that the fishermen have had lots of bencfits conferred upon them by the present Government Have not the fishermen been given the duty on taolasses, on tea, on salt and lines and twines, and on thls and on that. You would almost wonder to yourself what do they pay duty on anything? If all this is correct, and if the fishermen Het such a wonderfut price for fish how is it that all hands have not gone fishing. They have no taxes to pay. 1 have lheard it'said also that they are working for three or four months for a few hours a day and for the other eight or nine months they do nothing. If it is so casy to live, with no duty to pay and with so little to do how is it that no more people have gone fishing? It is a wonder that all the bookkeepers and clerks and worktrigmen have not gone into this profitable occupation that the fishermen are now engaged in. But, Sir, the fieherman has had his trials all through. As our friends have stated tonight he has often to get up at one or two in the morning and work till twelve $o^{\prime}$ clock at night. Of course that is not often done. But the independent man does not get all lils wealth from the flahery, and he does not spend elght or nine months of the year in idleness. Go into his home on a winfr's night and you will see him up at ten o'clock knitting twine. Every inHependent planter North spends his winter vights knitting twine to put finto his trap for next year. This man works continuously the whole year through. The man who is no good or who is a lazy man does not do this, and the fisherman who is very poor is very often a lazy man and not industrious and a great deal of his adversity is due to his own neglect. I belfove, every workingman in Newfoundland would be independent it the
worked continuously, I have watched them for the last twenty-five or thirty years. I went down north and found men without boots or shoes, but they were determined to work up and today some of them have as mach as $\$ 10,000$ in the bank. No one gave it to them. The fairies did not bring it they were determined to get on and worked night and day; and now because they have worked so hard and have been so tndustrions and have sathered a few dollars you put on this tax and say they are the right ones to be taxed because they havo money in bank. Take care or you will flind very few who will be anxious to be industrious and make money. You should be doing all you can to help on people to become Independent and save money, and build up the business of the country. Think of all you have taken out of their earnings the last year in the way of taxes on flour ane tea and butter. I tell you that a lat of money to pay these taxes will hive to come out of trunks and boxes and banks. It is not being earned. And the longer the war keeps on the more apparent will this become. Cannot you do somethtig to encourage them Their calling is a precarlous one. Men engaged in the fisheries risk their lives day ufter day, Should we not do something to encourage our young men to ongage in the fishery? The older men are in it already and will probably remain; but what about our young men if you do not encourage them? As my friend, Mr. Abbott says. he has a couple of sons and if they cannot get an engine they are not goIng to stay here. They will probably go to the Canadian North West or Sydney this fall. The news of this tax will travel around the north and they will know that all these extra taxes will have to be paid, and that $\$ 250,000$ more a year will have to come out of their pockets, when by a
little economy you could have dispenser with all these taxes. You do not know what you are dotng. You fo not realize the eftect of it on the country, It would be no trouble my friende for a man with five hundred rifles to go north and turn this country into a bed of revolution in fortyeight houre, not only amongst the fishermen but with everyone else. You do not know the state you have got the country in. It is no good for anyone to give you any advices. You will not take it. I had a great deal of faith in a good many men belonging to the Government, that they would do niything fo their power to ata the fishermen and ald the country. But I have seen so much golng on in this House the last ten days that I am now convinced that any man who is a friend of the fiahermen could not be a member of the Morris Government. I have lost all faith to them. This pit jrop proposition which came before the House yeaterday has: shown me the depths to which a man can go, eapecially when you find a party turning down their Leader's proposition. This measure is not a war measure at all. If it was the party would have accepted the propositions made by the Premlor. These thinga have made me lose any little confidence I have had in you. I know you will not amend these Resolutions. No matter what I say. They will not make me any richer or poorer: but there are a great many men it will affect, men who will know that with a little economy in expenditure on your part these taxes would not be mecessary, the same men that you taxed seven lundred thousand dollars last year. Sinco last September these people have had to pay in taxation the following amounta:

[^6]On Tea ............... 42,000
On Lisquor ... ... ... . . 125,000
On Flour . . . .... ... ... 100,000
On Kero Oil and Gasoline 76,000
On Beet and Pork ... . . 52,000
Or about $\$ 700,000$ in all.
come in and asked for these taxes in September and suid that they were necessary on account of the war we dibl not hesifate to give them to you We would not hesitate now if you had come in and asked for these taxes and shown us that they were necessary to carry on the aftairs of the country. But you could not do this, because we all know you could have saved this money and rerv few men through the couniry would have suffered The ?ish ermen of this country must be pra pared to struggle along and send their sons to be soldiers in the trenclies and enilore on board the warships and their fathers and brothers left behind must pay this enormous tax in urder to keep things going in New. foundland beause of your extrayagaat expenditares.

You know the promises you made before the election of reducing taxation. When yoh made these promises you know the consequences, that you were going to get into financial trouble of course, the ouly reason you did it was because it was election year. You did not say anything to the people at that election about the enormous bills you owed the contractors or you did not say anything about the pit prop business, that you were going to allow these people to so down to the Labrador and export pit props for ten years. When this pit prop bill came in firit, wo bolleved that It was an honest attempt to meet requirements brought about by the War. We knew these pit props were wanted in England and we propared not to oppose the Bill. But now you are extending this for a perfod of ton years in order that timber grabbers and speculators. may set
wealthy. The consequence will be that a fow men will get rich at the expense of the whole country. As a consequence of your taxes the fishermen thls year will have to pay $\$ 2.50$ a barrel more for flour than tast year. They will have to pay 80 cente a hogahead more for salt; fourteen cents a kallon more for molasses, ten cents a pound more for tea, four cents a pound on sugar, two cents on butter, seventy cents a bag on hard bread, two cents a pound on tobacco. Is that not enough of taxes for one year? In spite of that you insist on taking this additional $\$ 250,000$ from the people. Then you are taxing Agricultural implements: The Commissioners of Agriculture ought to have sufficient influence with the Government to prevent you doing anything to inJure the interests of Agriculture. You have spent $\$ 250,000$ the last six years in promoting agriculture and establishing stations all over the country. Now what are you endeav. ouring to do to that industry? I would like to know who is responsIblo for these Resolations. I do not bellove it is the Premier. I believe he his too much sense. There are a certaln number on the other side of the House who do not care where the money comes from so that they have It to spend. These are the fellows back of these Resolutions.

MR. LLOYD- 1 beg to propose the amendment, "That all the resolutions relating to taxation on tlshery or agricultural appliances be read thls day 6 months,"

The amendment belns put was last on division.

Mr. Speaker resumed the chair.
The Chairman from the Committee reported that they had considered the matter to them referred, had passed eartain Resolutions, without amendmiett, and recommended the introducthon of a Bill to give effect thereto.

On motion this report was received.

On the motion for the adoption of the report, Mr. Lloyd moved, and Mr. Coalser seconded the following amend-ment:-
"That all the resolutions relating to taxitfon on fishery or agricnlture, and cancelling the draw-backe on keresene ofl and gasolene be read rix mouthe hence."

Whereupon the House divided, and there appeared for the amendment Messra, Lloyd, Clapp, Coaker, Halfyard, Targett, Winsor, Abbott, Grimes (8); and sgainst it Rt Hon. the Prime Minister, Hons, Colonlal Secretary, Minister of Firiance and Cuntoms, c, H. Emerion, J. C. Crosbie, Minister of Marine and Fisheries, Measrs. Devereux, M. J. Keanedy, Morris, Moore, Moulton, Parsonis, Le Feuvre, Currie, Figgine, Geo. Kennedy, Walsh (17) ; so it passed in the negative.

Whereupon the original motion for the adoption of the report was put: and there appeared in favor of it: RL Hon the Prime Minister Hons. Cotonfal Secretary, MIntster of Marine and Fithories, Messrs. Devereaux, M. J. Kennedy, Morris, Moore, Moulton, Parsons, Le Feuvre, Currie, Higging, Ceo. Kennedy, Waish (17) ; and against It Mesars, Lloyd, Clapp. Coaker. Halfyard, Targett, Winsor, Abbott, Grimes (8): so it passed in the nifirmative and was ortered accordingly.

## REVENUE BILL.

Whereupon the Bill entitled "An Act further to sumend The Revenue Act, $1905^{\circ}$ was introduced and read a first time, and ordered to be read a Hecond time on to-morrow.

## PROHIBITION BILL.

Purauant to order and on motion of Bt. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to consider the Bill entitled "An Act respecting the Prohiblthon of the Importation, Manufacture, and Sale of Intoxicating Liquars,"
Mr. Speaker left the Chair.

Mr. Parsons took the Chalr of Commiltee.
Mr. Speaker resumed the Chair.
The Chialrman from the Committee reported that they had considered the mattor to them referrell, and passed the BIII with some amendments.

On motion this report was recelved and adopted and it was ordered that the Bill be read a third time on tomorruw.

## VOLUNTEER FORCE BILL.

Parsuant to order and on motion of Rt. Hon. the Prime Minister, the House resolved itself into Committee of the Whole to consider the Bill entitled "An Act to amend and to continve for a further perfod the Act 5, George V, Sefsion 1, entitied "An Act respecting a Volunteer Force in the Colony."

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Committee

Mr . Speaker resumed the Chair.
The Clairman from the Committee reported that they had considered the matter to them referred and had passed the Bill without amendment.
On motion this report was recelved and adopted, and it was ordered that the Bill be read a third time on tomorrow.

## TRAIN FERRY SYNDICATE BILL.

Pursuant to notice and leave sranted and on motion of Itt. Hon. the Prime Minister, the Bill entuted "An Act to amend 4 George V, Cap. 6 , entitled "An Act reapecting the Newfoundland Failway and Traln Forry Syndicate, Limited" was read a first time, and it was ordered that it be read a second time on to-marrow,

## MESSAGES FROM COUNCIL.

Mr. Speaker informed the Hoase that he had received a message from the Legialative Councll acquainting the House of Assembly that they had passed the Bill gent up entitled "An Act to amend the Act is George $V$,

Session 1, Cap. 10, entitled "An Act Respecting Municipal Affairs" and for other purposes in connection with the St. John's Municipal Councli," with some amendments, in which they requested the concurrence of the House of Assembly.
On motion the said amendments were read a first time and ordered to be read a second time on to-morrow.

On motion the said amendments were read a first time, and ordered to be read a second time on to-morrow.
The remaining Orders of the Day were deferred.
rt. Hon, the Prime Minister gave notice that he would on Friday next move the suspension of the Rules of the House in relation to all matters now before the House or to come before the House.
It was moved and seconded that when the House rises it adjourn until to-morrow, Thursday, May 27th., at three of the clock in the atternoon.
The House then adjourned accordingly.

THURSDAY, MAY 27th, 1915.
The House met at three of the clock in the afternoon, pursuant to adjournment.

## REPORTS.

Hon. Colonial Secretary tabled Report of the Violation of the German Army of the Righte of nations, and the laws and Customs of War in Belgium.

## QUESTION.

Mr. Parsons gave notice of question.

## PETITIONS.

MIN. OF PUBLIC WORKS-Mr. Speaker, I beg leave to present a etition from the people of Colliers in reference to repair to a wharf at that place. Owling to the pressure of Ice and storms the wharf has suffered considerably and it needs repairs. 1 trust the matter will receive the attention which it deserves. I have also a petition from the people of Kelligrews asking for a sum of money to repair a road leading from the main line of road down to the water side, a distance of about half a mile. 1 trust that a small amount will be allocated for that purpose.

MR. Kent-Mr. Speaker, I beg leave to present a petition from William J. Ellis, Michael J. Keunedy and other contractors in St. John's, and persons interested with building trade, asking that they be incorporated under the name of the Newfoundland Builders Assoclation. The petition sets forth that the purposes of the incorporation are to promote a good undertaking amongst the members of the body and a uniformity in the Customs and usuage of the business and also to create a healthy tone in the building trade and to supply accurate information in regard to transactions.

I may say that the Association which asks to be established is established In nearly every other city. There is
one in Montreal, one in Boston, and in other cities.
1 would ask : Sir, that this petition be referred to a select Committee.

It is ordered that this petition be received and referred to a select Committee consisting of Mr. Kent, Rt, Hon. Prime Mintster, Mr. Lloyd, Mr. Coaker. Mr. Higgins, Hon. Mr. Emerson, Hon. Colonial Secretary.
MR. TARGETT- 1 would call the attention of the Government to the petition of Mr. Alex. Penney, of Champneys to the Government, re application for mail courier. It was referred to the Post Master General.

HON. COLONIAL SECRETARY I will be in a position to inform the hon. member to-morrow. This was passed over to the Post Office Dept.

Hon Colonial Secretary tabled the following notification from the Seeretary of State for the Colonies:"No. 421.
From Secretery of State, (recd. 27th May, 1915.)
May 27.-His Majesty the King bas been pleased to conter on me seals of the Colonial Office.
A. bonar Law."

I beg to table despatch from Mr. Bonar Law announcing his appointment as Secretary of State for Colomies.
Mr. Stone asked the Hon. the Colontal Secretary to lay upon the table of the House a statement showing (1) From whom the Postal Telegraph purchased wire, what quantity purchased during the fiscal year 1913-14, and up to the end of Aprll, 1915; (2) What gauge wire is used, and how much per hundred pounds does the Postal pay for it landed in SL. John's: (3) How much jeer thousand (count) does the Postal pay for painted oak brackete, what quantity supplied daring 1913.14, and up to the end of April, 1915, and from whom purchas. ed.
The answer was tabled.

## PROHIBITION PLEBISCITE BILL.

Pursuant to order and on motion of E.t. Hon, the Prime Minister the Bill entitled "An Act Respecting the Probibition of the Importation, Manufacture and Sate of intoxicating Liquors" was read a third time and passerl, and it was ordered that it be engrossed, being entilled as above, and that it be sent to the Legistative Council with a message requesting the concurrence of that Body in its provisions.

VOLUNTEER FORCE BILL.
Pursuant to order and on motion of Rt. Hou. the Prime Minister the Bill entitled "An Act to amend and to continue in force for a further period the Act 5, George V.. Session 1, "An Act respecting a Volunteer Force in the Colony" was read a third time and passed, and it was ordered that it be engrossed being entitlei as above, and that it be sent to the Legislative Council with a message requesting the concurrence of that Body in its provisions.

## MUNICIPAL AFFAIRS,

Pursuant to order and on motion of Rt . Hon. the Prime Minister the amendments made by the Legislative Councll in and upon the Bill sent up entitled "An Act to amend the Act 5. George V. Session 1. Cap. 10, entitled "An Act respecting Municipal Aftairg and for other purposes in connection with the St. John's Munfetpal Coumell" were read a second time.

## RT, HON. THE PRIME MINISTER

 -Mr , Speaker, it will be remembered that when this bill was before the House, it was suggested that the election of the Board take place in June instead of in December as provided by the bill. It was contendod that It would be unfair to have another election without their having an opportunity to make their suggestions law if they seemed worthy of this. This was the view of the Upper House, and they sent it down as anamendment. There are a few other amenimetts, but they are not of vital interest. One is an error 137 was on the bII finatead of 136. Ono see tion on the bill as it went up reter red to the necessity of a payment of $\$ 500$ by pieople from outside who were filling contracte in this country. Thoy have made a sitght exception whtch is not material. I may say with regard to the important amendment, that after the third roading here, I asked the Legislative Council to amend it accordingly. In spite of this change 1 am still personally in favor of the other, the orlginat bili, but have no doubt but that this will he very satisfactory.
MR. KENT-Mr. Speaker, I thinls as I sald before when this matter was belore the House that these amendments improve the bill. As 1 said then you ought to keop this commisation in power whtll they have made the report asked for, and untll the Government has acted on that report. If you dismiss them in December, they will have no suthority to approach this legislature when it mecta again.

The smendments were concurred In and it was ordered that a message be sent to the Legislative Council acquainting that Body that the House of Assembly hat passed the satd amendments without amendment.

PATRIOTIC FUND BILI.
Purauant to order and no motion of RL, Hon. the Prime Minister the amendments made by the Legislative Council in and upon the Bill sent up entitled "An Act to incorporate the Patriotte Fund" were read a second time and concurred in, and it was ordered that a messuge be sent to the Legislative Council acquainting that Body that the House of Aasembly had passed the sald amendments without amendment.

## LOGGING BILL

On motion the House resoived itself
into Coramitree of the Whole to conslder the Legislative Council's amendments to the Lorging Bill.
Mr. Spealeer left the Chair.
Mr. Farsons took the Chair of Committee.

MR. Coaker-Mr. Chairman, with regard to these smendments, there are some I cannot agree with. Some clauses have been so altered that their whole effect would be nullifled if the bill passed as they left it. They have so altered Section 7 as to spoil its object. What we want is to do away with temporary camps. They have altered the whole bill to such an oxtent that it will be necessary to revise the whole again. Litte amendments they have pat in here and there mar the whole thing, and these must be carefully considered.
They bave the right to put paper there, if they wish. These amendments are going to injure this section considerably. Then they go on and alter the flooring. In our section, as it was sent up, it was stated that floors should be construeted of board; they say "Board or logs sawn flat on the face" That is the old style, which has been going on for 25 or 30 yeare. We want to do away with that. We want the men to be comfortable. We don't want to have holes and spaces in tho floors in which all sorts of tilth ean accumulate, and that is the result of having logs. There will be spaces which will be filled up with the refuse of the camp, and that is what we want to do a way with. It think it unfair for the Council to have brought in that amendment. It is not in the interests of the men; it is in the interests of the employer, who is a little bit afraid of having to buy a couple of hundred feet of board to floor a camp. Then in our Bill we asked that in cases where employers operated a hospital, the men should pay 40c, a month, whith would go towards the upkeep
of that hospital and they should have the use of it. The Council's amendment does away with that, and says that every logger shall pay forty cents a month whether he is provided with is doctor or not, and it does not make auy difference whether there is a hoapital sttached to headguarters or not. If that is amended so as to read that the forty cents shiall be pafd onty to employers who operate a hospital, we will get over that aificulty. Now, these are the main objections. Thes are not Insurmountable, and we ought to be able to get over them. In all probability we will have to consult with the gentlemen of the other House and see if we cannot get them to meet as lialfway. If not, it is just as well to let it stand and go no further.

If we had the Bill in addition to the amendments, the members of the Committee would have a better idea of the changes which have been made.

MR, KENT-lis connection with this matter, Mr. Chairman, I think from the remarks of the hon. member for ' 'willingate that if a committee of thrk House were to meel a rom mittee of the Upper House to discuss those amendmenta that a compromiso might be effected whereby the princ Iple of the bill would be accepted anil a great muny Improvements in the conditions of the logzing Industry enacted; en the other hand, I thinh trat if teati Housea stand on the hill as it ith nothing will be effected. I would therefore suggest that a subcommittee of this House be appofinted with a subrcommittee of the Upper House, and then an arrangement will probably be reached which will be satinfactorv to both parties.
Mr. Speaker reaumed the Chair.
The Chairman from the Committee reported that they had considered the matter to them referred and recommended that a Select Committee be appolnted to confer with a select com-
taittee from the Legialative Councll on the amendments.

On motion this report was recelved anil adopted and it was ordered that a Select Committee consisting of Messrs, Coaker, Kent, Lloyd, Emerson, Higsins, Moulton, Clapp be appointed, and that a message be sent to the Legislative Council askting the co-operation of that Body in the premises.

## SUPPLX.

Pursuant to order and on motion of Hon. Minister of Finance and Customs the House resolved itself into Committee of the whole on Supply.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Committee.

MR. CLAPP-Mr, Chairman: Before the Committee risee I would like to bring before the House the matter of the Rerry plying between Woody Foint und Norris Point, Bonne Bay. It appears that in 1913 there was a motor boat there for the purpose of conveylug passengers to and fro. That motor boat worked up to a certaln time of the year. In 1914 the motor boat was taken off and an ordinary row-boat substituted. Now, previous to that I introduced a petition, numerously signed by the people of Bonne Bay and adjacent places, and I was under the impression that this motor boat was there to stay, and that the Goverument had acceded to the recuestion of the petitioners, and I had no idea that it had boen removed until I recelved a letter from a clergyman at Bonne Bay, Rev. G. H. Maldtuent, to the effect that it had, and hisking mo to bring the matter to the attention of the Government. Now, it nippears to be an extraordinary thing that this gasolene boat shoutd have been run previous to November, 1913, and that after the election was over the boat was taken off. Now, it must tie taken into consideration that Bonne

Bay is a larga place and contributes considerable to the revenue of this country. Bonne Bay paid in $\$ 10,128$ in 2914, and Fogo paid in $\$ 15,090$. Now, why should Bonne Bay be deprived of this ferry when Fogo is allowed to expend $\$ 12,000$ on a pubtic whart. The Premien himself knows, Mr. Chairman, that Bonne Bay lias ne public buftaing of any consequence: that the post office there, until previous to the election, was a disgrace to the place. I don't know whether the Government fintends to relnstate thits ferry or not but apparently, from the reply of the Miniater of Public Works, It does not intend to do so. I would ask that thifs matter be taken frito consideration, and that the people in this neighborhood be given the convenience of a motor boat.

MR. HALFYARD-Mr Chalrman: In connection with public matters T beg to draw the attention of the Government to the condition which obtains in two or three places in Foro district where the people are-greatly inconvenienced by not having postal faclities. Early in the session I drew the attention of the Colonial Secretary to the matter. First, in connection with the erection of a telegraph office at Hargrave; I trust that the Government will see Its way clear fluring the summer to put that telepraph offloc there, It has boen repeatedly potnted out that the expense would not be very great, and it wonld be a very great advantage to the reople if they were brought into communication with the outside world by means of the telegraph. I hope that the Colonial Secretary will remember this matter. The wire is there, and the cutting of the poles would entall less expenses than in as great many other places in the Colony. Carmanville, Ladle Cove, Apsey Cove, and these different sattlements in that nelghbourhood conld he connected.

Then a petition was sent in here last year from Cat Harbor, asking that a ay office be established at Cat Harbor Point. About half the inhabitants of Cat Harbor live on that point, and they have to travel two milles to a post office to get their letters. A way office would not mean very much expense: it would only be a matter of $\$ 10$ or $\$ 15$. I hope this matter will roceive attention also. There is another matter which was brought to my attention by letter from Apsey Cove to-day. There is a post offlee at Apsey Cove and the post mistress gets 810. That post mistreas is also the courler between Apsey Cove and Ladle Cove, a distance of two miles. She has to work the post office and travel twice a week to Ladle Core with the mall. 1 did not think such a condition of things obtained in the colony. 1 am sure the Colonlal Secretary will enquire into this matter and as a matter of justice will see that the person who is doing this worle is properly compensated.

MR. STONE-Mr. Chairman: During last year's session of the Assembly, members of this side of the House ask ed and obtsined certain information in relation to the expenditures on the construction and maintenance of the postal telegraph lines and cables.

The information elicited by the answers given last year was such as to Justify further enquiry and soon after the assembling of the present House 1 tabled a number of questions bearing on the expendlures under the Department of Postal Telegraphs, some of them were but partially anawered, and some of them bore the impress of evasions, particularly where they related to payments made to individwals for alleged services rendered.

The condition of affairs, both as to expenditure and management of the Postal Telegraph Department which the few particulars we have been able
to obtain has disclosed, is such as to challeage more than the pasuling nothee of the Honourabite Colonlat Secretary who is primarily responsible for the administration of that Department, and of the Executive an a whole, who are moralty responalbte for the evident mal-administration of that tm portant branch of the public service.
The statements of expenditure under the bead of Postal Telegraphs which have been furnished this House constitute a grave scandal and evidance rackless squatidoritg of the publice funds by incompetent officials or dishonest publie servantst misappriations.

The scandals and mat-administrathou of that Department as have been disclosed by the partial statements submitted by the Han. Colomial Seor relary are of stteh magnituite as to demand the attention of the Executive, and fustify this House in anking for aa livestigation ander commisston, and unless the Government are prepared to shoulder the responaltility for the meandals ani ctoak the men responsibie for them, they will take strch action $n s$ the condttions demand and reatore contlidence in the adminIetration of the Depariment by its thorough reorganization.

It we take the pubitc mocountr acconting to the Auditor Gemeral's statements and the annual report of the Postmaster General, we will get some Ifea of the enormous cout of thit Department.

Takitig the perlod from 1908 Inclusive we find that the expenditure on account of Postal Telegraphs reached the enormous total of roundly 3700.809 or an axerage expenaliture uniler the head of Poutal Telegraphs of the sum of $\$ 140,000$ per year.

For thls vast outhyy we have in hiat perfod of time buitt over 900 milles of telegraph lines and latd about 25 snots of local cablen. This is eetimnt-
ed. and likely in excens rather than ander the actual mileage, as there are no rellable and accurnte statisHers to be oftalned from the Departmient of Pontal Telegraphas as to the cost, construction, mafntenance and operation.

It would be a theral allowance for huiliting land lines in this country to figure the coit at $\$ 150$ per milfe, wilch would wecount for roundly $\$ 140.000$ for the 900 milles of land lines built,

According to the runual report of the Postmaster General there lawe been 24s millen of cable lald.
We would be making un exceedtagly liberal allowance if we placed the cost of laylag local cables (Includtigg the purchase price) at $\$ 700$ per mille, Allowang every margin and glve the maximium length of cable laid at 25 milles at 8700 per mille and the total cost thereof would be 817,500 for the 25 milles.
Now turning to the expendifure under "maintenance and generat staft" in SL. Jolun's and the outports, including all the operattonis in the service, all the clerks from the mesnengers ap, the superintendent and every official employed by the Department, the repalrers and extra belp-in a word all the expenses of maintenance and operation of the Postal ToloEraph we find the total for the five jears from 1908 to 1918 Inclusive, to be in round sumbers $\$ 350,000$, or an averate of $\$ 70,000$ per year. In cotrparlson to the total earringes of the systems this is excessive it really represents for maintenance and operaHion alone fully 50 per cent. of the total earningr of the whole service is shown th the P. M. Q.'n reports. This in ttaelf conatitutes a scandal and calls for thoroush serutiny by the Government.

Sumuarizing the coat unider the folbwing beadings, which comprise the main expenditure of the nyitem. we
find the following results:-
900 Miles on Land Line.... $\$ 140,000$
25 Mites of Cable . . .... .. 17,500
Maintenance and Operation .. 350,000
Total for flve years, 1908 to
1913
$.8507,500$
Deduct this amount from the grand total under the general head of telegraph expenditure which I approximated at $\$ 700,000$ for the five year pertod and we find in round numbers the sum of $\$ 192,000$ disposed of under the elastic and mysterlous headling of "telegraph contingencles." or an average annual expenditure under this head of $\$ 38,000$. Can the Hon. Colonfal Secretary give the House any explanation as to what became of this annual expenditure on account of telegraph contingencies in the face of the enormous expenditures under the general heads of this Department?

Turning now to individual expenditures, or expenditures under jarticular headings, we find from the statements tabled in answer to my questions and those of last year that cable laying in this country under the manugement of the present postal officials holds the world's record for extravagance. For the five yoar period with which I am dealing the pubished accounts show that the cost of 25 miles of cable is roundly $\$ 50,000$ or an avorage cost per mile of not less a sum than $\$ 2,000$. Yes, $\$ 2,000$ per mile to lay Government cables in this country. I do not wonder that hon. genttemen oppoatte start in amazement at this statment. I do not believe that this grave scandal has been fully realized by the Colonial Secretary or by the membera of the Executive and I will not do them the injustice to say that they have been, up to this moment, cognizant of it, though they ought to be. But I now make the statement that the coat of laying cables in this country during
the five years from 1908 to 1913 was in round figures not. less than $\$ 2,000$ per mille whereas a liberal estimate for such work would be, I am creditably informed, about $\$ 700$ per mile. Further comments from me upon this matter are not necessary to impress upon the Government that there is something rotten in the management of the Postal Telegraph Department,

Why is such scandalous waste of the public funds permitted? And it should not be necessary for me to int1mate to the Hon. Colonial Secretary that a clear and unequivocal explanation of this waste is due this House and a thorough and impartial inventigallon of the Department due the taxpayers of this country whose aweat contributes to the revenue thus recklessly squandered.
Turning now to matters which I regret to say, necessitates the reference to postal officials by name and to men employed by the Department to perform work, we find that there has been a rather loose and, what may, to the average man outside the charmed circle of public offices, appear dishonest manipulation of lexpenditure in vogue in the Postal Telegraph Department.
1 will give the House a few examples of what 1 refer to.
Last year in answer to a question we were informed that the Superintendent was engaged at postal telekraph cable work outside the city from 1910 to 1913 inclusive 26 weeks and for his personal expenses he was pald an average of $\$ 2.36$ per day. By personal expenses is meant board and lodging. For this work we were told that he also received as extra pay $\$ 100$, or one month's salary, that is over his regular salary.

We were also told that Mr. Veftch was engaged at same work and that his expenses were $\$ 2.00$ per day, and that he recelved over and above hif
salary $\$ 75.00$ or one month's pay for thls extra work.

In answer to questions for further particulare this session regarding these expenses we have been informed that Mr. Stott and Mr. Velteh receir. ed two months pay instead of one as stated last year. Mr. Stott received $\$ 200.00$, and Mr. Veitch $\$ 150.00$. Tho answer given last year was therefore not correct in this respect, and there was no apparent reason for withtioldthg the racts anless it wns to conceal the extri payment for which there does not appear to be any Justlfication in the face of the fact that these officials' salary and full expenses were pald for the time they were occupled at this work.

If they were paying other officials to perform their duties whitle they were absent there would be some Justification for the Colonial Secrefary's liberality towards them. But that was not the case and the work of thetr Department was being attended to by the regular staff, none of whom, I understand, received any extra remuneration for the extra work thus imposed. And in view of the ease whith which the postal officials make such mistakes in their answers to questions asked by this House in regard to postal mattera we have no reason for much contldence in the correctness of the answers so far given, and perhaps a little further problns will diselose that still further extra payments have been made to Messrs. Veltch and Stott for the performance of the duties tor which they are being paid under reguiar salary.

Now, I wish to draw the Colonial Secretary's attention to a transaction which calls for eluclatition. On the authority of the honourable zentleman we are informed, as stated before. that Mtr. Stott's expenses averaged $\$ 2.36$ per day for the time he wan occupied at cable work from 1910 to 1913 inclusive. We must assume that
he stated the facts. Well. Sir, within that period the Burgeo-Ramea cable was lald. In connection with that wrork the Government steamer Fiona was employed forty-five dayk Mr. Stott during that time was boarded on that ship at the expense of the Government, no payment for food was made by Superlntendent Stott on board the Fiona. No payment for food was made by him to anybody for the thme the was on board that shif. I have gone to some trouble to ascertain the facts in this case, because it ts one which calls for stritnkent action on the part of the Government if Superintendent Stott cannot make a better defence than he has thus far been able to do, notwithstandthe that the questions bearing on it hinve been in the possession of the Colonial Secretary since the 1 6th of Aprll the answers have not been tabled.

We find that Superintendent Stott took hils meals on board the Ftona for fifty-threo days, and that during that time he put away no less than 236 meals, which averages four per day. leaving very little room for dining anywhere else. Arid for hils board and lodgins covering that period we find sccording to the statements tabled in this House, that he put in bills and recefved from the Department the sum of $\$ 130.00$ or over $\$ 2.40$ per day.

Mr. Velteh also was engaged with Mr . Stott and he also took his comtilement of meals on board the Fiona. and he also was pafd in sum, the exnet smount we have not been able to ascertalm, for board and lodging.

Johm Doyte also was with them, and he, too, took his mieals at the Gavernment's expenso, and he, toe, was patd from the Postal Telegraph Department the sum of $\$ 86$ for board and lodging

Mr. Stott and Mr. Vefteh cannot, as In the case of Notre Dame Bay cable
expenses. explain away awkward amounts by saying "paid."

We find that these officials dined on board the Fiona to the following extent:-
David stott, 286 meals, during 53 days-about 4 meals a day.
George Veitch, 165 meals, during 30 days-about 6 meals a day.
John Doyle, 228 meals, durling 53 days-about 4 meals a day.
And notwithstanding this fact the Gevernment have paid these men at the rate of Two Dottars and over per day for beard and lodging. I have been informed that the Colontal Secretary was not aware of this state of affalrs, and 1 make this explanation in justico to him, as otherwise it may appear that he was a consenting party to this ateal. But he is now aware of It, and the Honse and the Country will look to him to see that the offence will be dealt with in a manner that will be satisfactory to all. If this condition of affairs exists to any extent if constitutes a grave scandal, and one which the Government cannot condone. If these men have recelved payment in the manner and under the eircumstances liere stated, it cannot be termed by any name other than obtsining money under false pretences. defrauding the revenae by a systom of false vouchers. What steps the Colonlal Secretary will take I know not. But that he can Ignore the matter is beyond bellef. The same course was followed in the matter of other cabte loying when the Baleine was under charter, and these men also lived on board her at the Goversment's expense. But enough biss been said to Justlty an enguiry Into the management of the Postal Telegraphes.
Another matter to which I wish to draw attention is certain payments made by the postal for work by outsiders. We find that T. J. Kennedy was pafil $\$ 124.60$ for umloating cable
from one of the Furness steamers. This is really a new departure as all steamahlp companies have to place cargo on the dock unless specially agreed otherwise, and in practice they do not make such agreements for the hanaling of frelght, but charge sufficient fretght per ton or measurement or otherwise for carriage and handling: In what does a cable differ from other frelsht? Why should there be at special stevedore employed to unlond it? Perhaps there is a satisfactory explanation of this. But there cannet be any satisfactory explanation of the payment of $\$ 124.00$ for the work of unloading cable which is as ensily handled as so much hawser. I have endearoured to get at the cost of this work, and from all I can learn $\$ 100.00$ would be extravagant to pay for it. One well acquainted with stevedoring work informs me that he would do the job for fifty dollars and make a ten dollar bill of it. Yet the Postal paid $\$ 124.00$ for that work. Something here demands the attention of the Colonial Secretary.
Then we have C. F. Lester paid the kum of $\$ 200.00$ for loading from the Emple whart into the hold of the Bateine the same cable. One of the Fostal telegraph repairers of many years' experlence has stated that he could have done the work for fifty tollars and make a week's pay out of it after paying his help at the rate of 20 cents per hour. Yet the Postal payn Mr. Lestor $\$ 200$ for that Job. Will the Colonial Secretary Justify this, and if he does not, his duty demands that he shall investigate it.

Then we huve $\$ 77.00$ pald to a Gorerament operator at Curling in addition to his regular salary, and when particulars are demanded we are told it was for building cable houses. The indecency of this other such transaction calls for searching investigation.

We have been shown that Captain

Facliah of the Mana wan pall 118 B asif his enew a fall menth's salary for the time thoy were tytre en thitr ears watting to lay the liames calife. What jestification hax the Colnnial Secre tirr to eiffer fir this antromthumy procesding? It is a poettive diarrace. and to elfowmatancen or exruses can funtify $\mathbf{t z}$
We hive been refunet partfontira of such payments on the followinis:-
Mr. Moulton for 'Thacheses of Corn: wall. $\$ 200$.
Paul He mird, miotor hoak, IMEs.
Hire of achooners, tsit5. 60.
Itepe and provikions. 3715:37.
I Chin Tensy and Sank, fiksie.
वII Dive amiountic eliargedt to Hamen eahte and particutars withheld trame thls flosee notvitistanding repeated fingivit sy mif for the came

Thins there an elher mihait piryments shlich bear the tmarees of

 of contract.

And there is another frature af the Tonfit exfravarance. The matfer of supplies. Here tie obe lill clargel by Saperintendent Stott to the Poutal:1 overall jucket, 2 guernmegn. 1 oil overconal, 1 sou'wenter, 2 pairs of ple: ekin sloves, 3 puiru of towle, 0 cakes of tollet aonp. And yet the Government pays $\$ 2.00$ per day for the pienmomat expenses of thene offtufate whim they so out on eatra work. We liave here a bill from Mr. Hennebury of theaverton, which to a sample of what thin fovernment is pirnittire the nuymest of stilatae for Hemehers's Sorse lie anotlier moandal whirh the Devernment has pot takret ithe tmalite to tiveattpatie it has ties atiliot hiare to this Hoeser that Hemebury's hirser whe wot enenged at Portal work when It was teat, ant yes the Goveramm! tias permittect the puyment of $\$ 150$ to thin man on a elaim of thin nature

Other irregularition It may enmmen:
ate of alaltar character to thear rf ferrel to but satimit 1 have dipeloned enoweth to fustity an investip: Hom. The meppitici teperfimat of then Finstal is nald to he a clonk for aluwes of an eatesalve nature. From investigitlias I hive macortatise t that the Gervernmerit haver palid for poles which were tendered for at four lachus in the tops and which arote dettivered lar bielow that meurarament. If is fresty ptated by pinple who are in a positien to triow whereat they sponk that the Covernument durfors the peat Ien yeara have pald for polen that wrime never cut off the utump, have pala for polen tint up to the apectncattans eantrues. et tor.' tiare puit tior the thetiftioltois hy millway of earlonis of poles whileh fhe contractars ahoald lave pald. I tounct votuch far these statemente. fat I harw anked for fintormation from the Dinhntal Becretary's Deparimest eonervining thear tery matterh, and flere has leves biapte timet for fise Ion werleman to takie thrm, but firy am sithtient. Purliaps the bon. If olt-mas cen $=4$ wig?

Finally, netwithutanting the enorm pui exprnditure fin acrount ot Fowtal Telegmpli. it is undeulable that the nervire his theen tlisgracofully tinetrisient. The interruption which were reforsFid to here at tow dayn amo by Mr. Conter was bat an example of emnerit condtitoser. The conditlos or the fues att erer the: gystem has been dis Eracifil. Toke the recotil of Interrup(iobe Trit 1015, slikeh alow searly 200 intorruptions from Jwazary nret to
 enerol conditionive And what happond to tisto has lappened every fren and to "ax me better fo 21914 timn in 2010 natwithetaniting the large ruthey en acooant of maintenapoe: fipstrets have teen sent to Nuirti. ETM antl Western Putricts to do work With sphas, ority to find tilaumteces musterfat to do the work, and in mome
cases none at all, and men under pay kept idle for weeks. As an instance of this. no later than last Fall a foreman and gang was sent on the St. Anthony branch, and when be reached there he found no poles for the wrorl between West Brook and St Anthony, Other instances of neglect to place supplies can be given if necessary. In places, repairers have rejpeted the poles placed for line builaing.

And for these poles the Government paid full price.

I wheh this House to clearly under stand that I am not going to make any charige against any of the Postal officials ag I don't know whether the information is correct or not. Yet I am frelined to think it is and consid. er it would be in the interest of the Country if the Government appointed a Commission of Enquiry to look into the matter. The information which I hold in my hand fa certainly of auch a character that it requires elose attention. We also wish that the officfals be removed while the investigntion is golng on.

The whole system is demoralized. Both in the Head Orfice and in the outside offices condittons exist which are a diskrace to the public service. Drunkenness of resparistble officials has been notorious and the subordinates hare followed the example of thelr imperiors. What can be expected from a department whose stlperiors have nuch a record for intemperance as that of the Postn1. What can be expected from a Telegraph Department when the Government Will suspend and dismiss its chiet officinls for drunkenness whlle in the discharge of their duties and then reInstate them? What can be expected from a Telegraph Department when Its chief officials will show the oxample of besotted drunkenness such as fa showa to have been done in tho Poatal Department in this eity? What
can bet expected from the department when its responsible officials will lie thelptesaly drunk in the operating roorm before the whole staff for four lours at a time while in an adjoining room the superintendent is ruminnting lehind drawn eurtains and loeked doors? If the Honourable Colonial Secretury want dates and names I um ready to hind them to him. What can be expected from a publie department when such thlngs are permitted and the men gulity of such Ilsaraceful conduct are still retained in the service and reaponsible for its management

Large sections of the Ines have been down for days and weoks at a time and no real effort made to reatore them. Only a few months ago a section of thirteen poleg of the Main Line was down East of Come-By-Chance and the Superintendent and his offledals to repair itwhlle the transmission of buslness was serlously hampered. I would refer the Hon, Colonial Secretary to the Government Engineer for veriffcation of this and to the operator who was then at Come-By-Chance. It is well known that the repairers of the syatem are allowed to leave their work and go fox trapping and log cutting. Only recentis a repalrer statloned at Holyrood when called ipon to attend to line trouble could not be got. He was in the log woods. Another occafion the same repairer was called upon to tilke charge of a gang of repair men when the whole system was tied up by a break and he missed the train Crous St. John's because he was drunk and he was nllowed to sleep off his boose in the basement of the Post office and proceeded on hls way to the Ine worls next day Instead of being sent about his businieas and a sober and capable man put in charge of the worls. It is notorious that the repuirer attached to the city office la genoral.
ly incapable of doing his work when sent to look after the lines and yet the Goverument close thelr eyes to these abuses and the public are called upon to suffer the consequences of such maladminfstration because of the fncapacity and untrustworthiness of responsible officials.

And allow me to inform the Government that the few instances I have mentioned by no means exhausts the eatalogue of offences and scandals which we have knowledge of in the Postal Telegraph Department.
The record of the Postal officials while engaged at telegraph work in the outports is most disereditable. They have been guilty of the most reprehensible conduct and gross neglect of duty and reckless extravazance. Ample evidence of this is obtalnable. Repairers have had to bodily take some of these men oft the repair work in a state of intoxication. When the Superintendent and repairer Tobln were transferring the office at Clarenville they put in three times as long a time at the work as was necessary and while engaged at that work a prominent resident of Clarenville subilicly reproved the Superintendent for hif example for belng un der the influence of liquor most of the time and gave no attention whatevar to the work under his supervieion. At Britannia Cove he was assisted from a boat engaged at cable work, belng incapable through liquor to look after the work. At Lewisporte be and Mr. Veltch gave an exhibttion of boxing that wan the talk of the nettement for months. No matter what supplies were left behind the supply of liquor has been always provided when these men are out of the city on Postal Telegraph work. The record of Bonne Bay and Wood's Island cabte laying is one discreditable to the publie service. The Western Star made a reference to it at the time but
was prohibited, so it is stated, from further comments. Operator Read was taken from his office at Curling to accompany Mr. Scott Juit to Keop him company while enjoying himself at Boane Bay and I am Informed by a man who saw what was golag on that there was no fustification 2or Read to be taken there and that Read himself said to one of the men engag. ed that he did not know what he was there for. Any way Read did no work In connection with Bonne Bay cable but Superlntendent Scott pald him $\$ 77$ extra for doing nothing. The day the Bonne Bay cable was lald Superintendent Scott was not in fit condition of mind or body to intelligently supervise the work and it was done by another person. At one of the Northern telegraph offices Messers, Veltch and Stott left a part of their liquor supply behind them, consisting of a part of a Jar of rum which was forgotten when they were leaving the place. Days have been spant at work which could be done in a few hours and unnecessary journeys have been made over the country by Mr. Veltch and Mr. Scott, generally with repairer John Doyle to do the work for them, And as long as they were making a clear dollar a day over and above thetr actual expenses they were in no great hurry to finfsh the jobs. For weeks at a time both the Superintendent and his clerk in charge have been absent from the Head Office on work which could and should be done by one of them with the assistan e of the local repairers. They have time and again neglected their public duties to the department for the sake of the rake off they would get by being out of the city on postal work.

And now let me give you a few instances of how these rake offs are engineered. We will take the Colonial Secretary's answer re Scott's persoual expensed as laid on the table lagt
year. It was placed at $\$ 2.25$ per day. According to his vouchers (which by the was are never checked by the anditors, if report be correct, he charged the Goverament over two doliarn per day for board and lodging when out of the elty, bealdes all other expenses, and train fares, notwithstancing that ho has been given a pass over the rafirosd because of his official position in the Postal Department.

At Curling the hotel rate giving the highent, was $\$ 1.50$ per day. Stott's nnd Veitch's charges were $\$ 2$ per day In their bills to the Covernment. Honne Bay the same. Explotts trotel rate $\$ 1$ per day. Messra, Velteh and Stot! put in vouchers for $\$ 2$ per day and sot paid for it . In answer to a guestion we are told that nomo of Mr. Veitch's expenses were on account of John Doyle. Out of his Explolts bill of $\$ 61.65$ he paid the sum of 81.70 for John Doyle, Mr. Stott also ex. plains his exorbitant expenses by nayIng paid for John Doyle. But John Doyle says they did not pay for him besldes there is an amount for John Doyle's expenees, pasd to John Doyle for the same Job. Just another instance, Mr. Veftch puts in a bmit for oxpenses at line work between Avondale and Holyrood. He gets paid three dollars for cab from Avondale to Holyrood. Other peoplo never pay more than two dollars for the same route, and distance. He gets pald at the rate of $\$ 2$ per day for board at Avondale. The highest charge there, we are informed is $\$ 1$ per day.
These are merely taken at random to Illustrate general conditions under the present management of the pontal and the reckless waste of the public funds under the present Government, and the virtual embegzlement of the monlen voted for the pubIIc service which is belug condonind by the Government of this Colony. The Colonial Secretary has falled to
lay on the table answers to quentions regarding the Degartimeat over which be presldes whifch 1 am of oplaion would disclove a state of affalrs which he cannot Justify, and show ta this House that the postal officlals are obtaining money under false pre: tences by meamis of false rouchers. The same recklesanens that charactorizes the responsible officials in the matters dealt with permeates the whole system in other Departments of the Postal. I am informed on rood authorits (findeod it is pubific propert) as every operstor in the Postal here is talking about it) that a favorite of Superintendent Stott's in the Fiead office his been given over time Suring lagt year to the extont of $\$ 400$ and that thls was done by the manipulation of the service for that purpose, and it is sitd that this favored oftelal recelved extra pay while he did not put in his regular time. Surely if these conditions exiat there is a very urgent need of a thorough inveatigation in thint Depurtment. From the informatlon obtalnable an encuiry into the Supply Department will be an astounding rovelation, and the scandals associatell with the provisioning and supply of gangs on repair and construction work will surprise even the hon gentlemen opposite. NotElthstaniling the big cost of provis toning construction gangs it is said that the lahoring men were starved and some of them had to quit work and return to their homes. This was particalarly so in Nicholas Wall's Eang. And what has become of the enormons quantitles of tools which bas been charged to the Pontal. Is it As report han it that all the friends end relations of those who have had charge of the supply hiave been kept well supplied, It is publicly stated that officiele in the Hend Office have sold telegraph inatruments, and that perecal outfite of relays and sounder
have been thus disposed of. One instance of many that is sald to have taken place is one of the chfef operators sold an operator an outfit from the Pastal stock for learaing for the sum of 83.20 . And it is also stated that the chief operators occasionally engage operatore to take thetr spectin! duties. The chief draws his full day's pay extra whlch is twice the rate of the operator and puts half in hls own pocket giving the operator the other half. I mention these matters to show the neat methods that are in vogue in the Postal for "making extra pay," Yesterday the Government came in hers and asked this House to support resolutions for increased taxation amounting to one quarter of a maticr. dollars. This increased taxation will fall heavily on the fishermen and laborer of this Colony. You have added a tax of 10 per cent, on motor engines. This is extending the helping hand to the fishermen of this Country with a rengeance. Instend of thiss increased taxation you could have in one stroke of the pen saved $\$ 40,090$ alone in the Fostal Service. I hope, Sir. and sincerely so, that the Minfeier of Finance and Customs will yet sen hls way clear to take off the nuty fmposed during the preaent neasion on motor engines and kero oil and gasolene becanse with the condfition pow provalling this extra burden of taxation is not giving the fishermes of tbis Colony a square deal.

HON. COLONIAL SECRETARYMr. Chairman, I have listened to the very lengthy and carefully prepared speech on the Postal Telegraph Department by the hon. member for Trinity and I feel it is necessary for me to make some pronouncement in the House in respect to the truth or otherwise of these statemonts. The hon. member in the very early days of the session started out with a great number of questions in reference to
the Postal Telegraph Service. Many of these questions are still unanswered owing to the fact that the Postal Telegraph Officials have something else to do and cannot devote all their time to answering questions for hononzahle members of this House. and thercfore the honourable gentleman has had to wait a considerable time to receive all the information he wanted; but this afternoon 1 think he has amply displayed to the House that it was only idle to ask inforaua tion from the source be did, the Colonial Secretary's Department, because evidently he has all the information possible for any man to get in connection with this matter, and I think, Sir, we have heard this afternoon a sfatemint from a very industrions man who since he arrived in town at the opening of the Legislature must have done nothing else but prepare that vory comprehensive statement that he was so good to lay before us this afternoon. Now I want to say, so far as 1 am concerned, stnce I have been in the Colonial Secretary's Office, that 1 have no knowledge of any of the oftences he has alluded to golng on. The questions with regard to cable and other matter dealt with fucldents which occurred bofore my time, 1 think in the year 1910 or 1911, and I as the head of the Department would thercfore bave no knowledge of the alleged dishonesty in this connection. Now I nlso want to state that since 1 went Into that Department-about last September twelve months- 1 have seen the Superfintendent of Telegraphs probably every day, perhaps twice a day and sometimes three or four times, and 1 have not heard of any of these alleged offences. Further I have nover knowa him to be absent from his duties one hour on account of intemperance.

Now as to the cost of maintenance of the Telegraph system I have latd
all information in respect thereto on the table of this House. I have today the last question which was asked by Mr. Coaker with regard to the coat of construction. I am tabling the answer this afternoon. Now as regards the cosi, all the accounts liave been furniahed. The details are given, and where they are not given they could not be ascertained; and it is only perfect nousense for a man to get up and say that the cost of laying a mite of cable is so and so, because it is imposeible ander certain conditions to estimate the cost. The conditions vary a great deal, and the state of the weather, the condition of the water and of the bottom and everything olse make it extremely difficult to estimate the cost of laying a cable. As the Premter has stated a half mile in one place may cost as much as ten milos in another.

But this much I can say, that matters are not going on in the Postal Telegraph service as I would wieh them to go, and there are two sides to this story, I know where the hon. member got the information he gave us this afternoon. I can put my finger on the source he obtained it trom, but I question very much Its veracity. I am not in a position to deal with the lengthy statement he delivered this afternoon, I am not in a position to deal with what went on in the Postal Telegraph Department before I went into the office of the Colonial Secretary, but it can say something about it since I have been there. I have seen no drunkenness or know of none. 1 know of no dishonesty, and I know of no conduct in that Department that would juatify me in taking action as rocard dismissal, with this exception that I know of insubordination there; and I have been endeavouring to remedy it and get poople there ta d: thelr duty frrespectivg of what thair feelings are for thoss associated w.th them. The tricble in
our publife Institutions is that some of the officials think that the institutions are there for their purposes, and the last thing they think of is the pubHic service and the proper conduct of their duties. The whole public service is becoming demoralized, and the trouble is caused by people who should be doing their own work and looking after their duties instead of devoting their time and attention and energies in directions they have no right to. Now, I wish to place myself on record in regard to the statements w'e have heard this afternoon. First, I must ask the hon. gentleman If he is prepared to let me have the documents he has in his possession.

MR. MORINE-Conditionally.
HON. COLONIAL SECRETARY:Yea.

MR. STONE-I have no objection.
HON. COLONIAL SECRETARYWell, then, I will undertake that if I cannot get the Government to conduct an investigation 1 shall resign my geat. I shall not stand here and allow such statements to be made about these conditions existing in a department under my control, and I hope that when the enquiry takes place the hon member will be able to show that the statements are true. IIt is all very well for hon. members on the other side to criticise. It is a very easy thing to tear down, but a very difficult thing to bulld up; and although I belleve myself that there are irregularities in the telegraph De partment, yet if you look into the trouble you must look at both sides. It is not right to look at only one pide. That is my position, and that position I maintain, and I am very glad the hon. member has now brought this matter forward; because it has been a matter of great concern to me the last twelve months. As a matter of fact I had taken some steps in the direction indicated, and had approach-
ed the Government with a viow of trying to find some mogns whereby thie thing could be cleared up. I know there is disumion among the staff, and Insubordination, and that the conduct of the Postal Telegraphs is not looked after in the public interest in the way it should be, and I know also it Is not one man or two who are responsible; and I am very slad that the hon. member this afternoon has given me an opportunity to declare myself, and I will ask the Government, and I belleve they will accede to my request, to investigate the Postal Telegraphs, and leave nothing undone to root out the evils there. Since the Hopge opened, hon members have asked me a great number of questiona about the Post Office and Postal Telegraphs. I can tell the hon. member that the Government realizos that a great many reforms can be broiught about in these Departments. Unfortunately the Postmaster-Genoral has been sick for the past three or four months, and he lias no Deputy fin the Department. Mr. LeMessurler is in charge of one Department, and Mr. Campbell in another, and it is very difficult to come to a decision and get definite fuforma. tion under these conalitions. Mr . Woods is getting an olli man-piast three score and ten-and be cannot be expected to be as active and alive to all the shiortcomings of that Department as a younger man would be. Retorms are necessary, and the unfortunate part is this, that since the time of Sir Robert Bond the Postal Telegraphs have not been ander the PostmasterGeneral except to a small degree. Superintendent Stott has had the right to refer to the Colonial Secrotary or the Government direct. In my opinlon this is a most Important procecture. The Postmaster-General should be the head of the Department, and leverything should come through him, but unfortunately, as I have sald, Mr.

Woods is well up in years and is utiahle to cope with and meet the pres ent conditions; and as far as I could I have endeavoured to administer the office of the Postal Telegraphs through the Colonfal Secretary's Depurtment. But it is impossible to do this thoroushly. It is imposaible for a man with his office in the Court Houes to know what is going on in the Postal Telegraphs. Therefore, I can quite understand that breaches of discipline or other irregularities might occur, but I do not think there can be anything of the comprehensive puture pointed out by the honourable member this afteronon. I am pleased to have an opportanity to impress upon the Government my desire-and I believe the House is unanimous in that desire-that the Government should appoint a Commission of Enkuiry inte that Department; and I canhot see how the Government can do otherwlse than appoint that Commission; and I hope that the hon. gentleman who started so well and so fluentIy on this subject this afternoon, will put his shoulder to the wheel and asblat that Commission in getting at the riglate of this trouble that is in exfstence in at least some degree in that Department it is a most fimportant Departmeat, It is a Department capable of much greater development than at the present time. It is a Department that has been ostarted and run by the people, and it has a clalm upon their patronage. I know as a matter of fact that a groat deal of the work that should go to that Department goes to the opposition Company. I know that people along Water Street will not do bueiness with the Postal Telegraph Department

MR. COAKER-DO You know why?
HON. COLONIAL SECRETARY I do, to a certain extent. I have asked people. I have gone personally to
them and appesled to them, and pointed out that it was their duty as citzens to support their own insitution, and they have told me they could not trust the Department. There were men in it they could not trust. I know this condition has existed and I have only been waiting to make a move in the matter; and I am grateful, as I said before, to Mr. Stone for bringing this matter to an Issue; and no effort on my part will be spared to bring about a thorough investigation: and I hope that that investigation will bring about the necossary reforms.
MR. MORINE-Mr. Chairman, I think there are several things in connection with this matter that do not need investigation. In the first place I think there will be a very general feeling that no blame at taches to the Colonial Secretary, and I regret that he has spoken this afternoon in a spirit which indicates some anger on his part, which I hope after all is not with the gentleman that brought this matter before the House but it probably is with the fact that buch deplorable conditions exist in this service. The next thing I think is that the country owes a debt of gratitude to the member who has brought this matter before the House, and for that industry which the Colonial Secretary refers to and which he has shown since the opening of the House in asking questions about this service. There is nothing more commendable that can be done by any member of this House, than to devote his apecial attention to a Department of the public service and endeavour to correct any abuses provailing theroin; and if more members of the House followed Mr. Stone's example we would be getting a better service than we aro. I think the only answer that ean be made to Mr. Stone this evening is the unqualified statement that a commission will be appointed. And
the next thing is that when that Commission is appointed, it will be up to Mr. Stone to render every assistance in his power to help the Commission in its investigations. That any member of the House is to take it uporis blmself to bring charges against public Departments without standing behind these charges, is a thing not to be considered. If a man brings a charge he becomes responstble for it, and it a Commission is appointed I am sure Mr . Stone will render it every possible assistance. Now there are two or three other thinge I would like to take notice of. Everybody knows, for instance, that the Postal Telegraphs should be under the direct control of the Postmaster-General; and 1 think that it is time that Mr. Woods should be superannuated and a younger and more vigorous man put in charge Now, I fnvite the Government to bring down within the next twenty-four hours a pension proposal for Mr. Woods, and Indicate whom they intend to appoint in his place. They ought surely be able to get a sultable man from amongst their followers. I have no particular interest in any applicant, and 1 do not know whom they would appoint. It is rumoured that Hon. J. A. Robinson, a member of the Upper House, is in the ruaning for the position. I am sure he is a man who would enjoy the publie confidence to a marked extent, because of his well-known honesty, industry and integrity, and I am sure that his appointment would be acceprable to everyone.

Now, there is another point. By common consent of the members of this House it seems desirable to have an investigation into this matter, both on uccount of the charges made by Mr . Stone and from the admissions made by the Colonial Secretary in his speech this afternoon; and indeed the Colonial Secretary is most strong in
his demand for such an investigation. Now, it is too late in the seselon to have that invertigation conducted by a commattiee of this House, even it It were possible to have such a thing. I think the Invectigation ought to be a Judicial invertigation, not by the fudges of the Suprome Court, because in my opinion that is not the proper way to appoinf a Commission, bat by some person, preferably a momber of the legal profesilon. Such a man, for Instance, as Mr H. E. Knight, at prest ent acting as Maydatrate in cmjuncHon with my friced, Mr. Morris. Such a man as Mr. Knight would be free from any porsthte charge of parlisainslip: would be capable of knowing what is evidence and what is not, and his ablity is such that his verdict could be aecepted with confidence. Such an Investigntion will be speedy, it wilt be satisfactory, it will get at the root of the trouble, and when the report is recelved it will be clean-cut and we will know what the trouble is. Such an investigation would command public confldence, and I am satisfed that much good would result instantrineously: A commission consisting of two or three men who do not know one kind of evidence from another. will oniy creato dissatisfaction, and the wholn thing will end by becoming a party question, and I take it this is not a party question. The present Government ls not responsible for the Head of the Department; he was appofited long ago. It is not resporisible in a marked degree for any of the officints in the Depariment or for the conditions that are in the Department; hat they will certainly be held responsible for them it they allow stich in condition of affairs to continue. The only way to restore public confidened in this department is to have a judicial inveatigation, and if that in not done the Government will have to shoulder tho blame and the whole
country will suffer. Nobody desires that. Untortunately, for one cause or another there has not been pubHc confidence in that Department for a long time, and now ta the time to restore that confidence.

MR. STONE.-Mr. Chairman, I just wish to avail myself of the opportunity of saying a few words in reply to the Colonial Secretary. If what he calls the elaborate statement I made thifs afternoon is not correct, he will bear in mind that when 1 made it I did not say it was correct. I only said I belfeved it to be correct. I only eald that if it was correct I demanded an investigation on the part of the Colonial Secretary or on the part of the Government. I have not laid any blame on the Colonial Secretary, becanse I do not belleve he knew these things were golng on; and even now ho is not aware if my statement is correct or not; but I stall be pleased to give him all the Informstion I have fin my possession, so that he can get at the position of affairs up there.

HON. COLONIAL SECRETARY,Mr. Chairman, I am sure the hon, member will appreciate the fact that making a charge in this House on hearsay information is rather a dangerous proceeding. It might be mistinderstood or misrepresented, and not taken as merely hearsay, but as a ptatement of fact by an honourable member of this House. It is a serions position, I think, when an honourable nuember gets up here and states that bo heard that a certain public official was drunk, und was not fit to discharge his duties and was unablo to perform them of course he ought to make it understood distinetly that he was not making that statement as a positive fict. If he only states that as hearsay he ought to say so; because it is very unfair to get up in this House and take away a man's char-
actar without giving him a chance to defend himself.

Now, the hon, member for Bonk vista, Mr. Morine, made the statemen! that I was vexed over the matter. I am not. I merely reaented a statement that I bolleved to be exaggerated; and I resented a proeeeding that seem ed to be aimed particularily at one or two men. I know more of the motives of the partiss connected with the information that has been given here this afternoen than perhaps any members of thifs House are aware of: and I am natisfled that when the inveatigntion is held it will be tound that these facts are greatly exaggerated. As 1 sald before, I quite agree with the fidea of having an investigation, and 1 am sure the hon member for Trinity witl keep up to his wort and tet us have any evidence in his ponsession. as well as any possible assistance in conducting the investigation.

MR. MOULTON.-Mr. Chatrman, I may say, now, that the moment is opportune, that I have heard a areat deal about the charges of the charter of these vessels emploged on cable work. I presume it refers to a charter from the Company of which I am a sharcholider, but I would like to place mywelf on record ae saying that many time there wan anything done in relation to this matter I was not in Burgeo, and cobsequently had nothing to do with it in any way, shape or form. I may say this, from the in. formation I have hat from the' Compatiy, thit thit vessel in question was delayod several times owing to sitress of weather conditions, and that when that solhooner left Ramea in the mornting to lay that cable, It was overtaken by bad weather, and they were obiliged to cut the cable, which mecounts for the amount of rope referred to; from Ramee to Burieo ts about from 100 to 125 fathoms deep. I would thesure the hon, geatleman opposite
that neither the Pennegs or the Mouttons ever recelved uny monty dishonestly or unfairly. Personally, as long as 1 havo been in public life 1 have neves alked the Government for a dollar in miny way for roads, Mghthonsers or any similar cause; and I whilh to record the fact that while these mattors were being transmeted I was not even in Burgeo. I call assure the how. gentleman that if thero was any wrong dolns I had no connection with it. I am aware that the thing looks big ta the eyen of the pecple, and I wish in these remarks tuerely to exempt myself from any blame that may arise from matters with which I had no connection whatचver.
MR. COAKER.-Mr. Chairman, I would like to mate a few remarks relative to the subject now under discussion. I may say that I cannot altognther congratulate the Colonial Secretary upon the defence which he has put up with regard to the condiflons he now admits prevall in his department Laat year I made In this Houso atrong statements with regard to certain matters in connection with the Postal Telegraph Bervice. I asleed him to give it his fullest attention, becnuse I was aware that matters were in a mericus atate. 1 confess 1 to not know what steps were taken as a result of my atugentions. I was: anxiows to refrain from going as far as Mr. Stone his qone this afternoon, lest the whole councry should be put thto a state of alarm and the confidence of the whole country ahalten in this institution. What has been done, of course, has not been stated, but I suppose it is very litile. During the present aesaion I took pocasion to epeall upos the mme matter again, loptng that bee wanld go further Into the matter, However, no explanation came Perliaps had wo been told themo thitegn we might not have had
to go as far as we had. I believe these statements made in Mr. Stone's speech this afternoon, and it is no pleasure, I may say, for any man to got up in this House and say all he knows about a Department like this, I may say I know a good deal and I thought that I said enough to show that there was a great deal serionsly wrong with this Department, and had anything been said to us that steps were being taken 1 should have been the first to see that no effort would be taken in the direction we have been forced to go this afternoon. We know what is going on, and we are forced to our duty, if we do not impress these things on the Government suffi. cleatly vividly to make them take stepe for the remedy of these things.
HON. COLONIAL SECRETARY.Mr. Chalrman, I would like to state several things in reply to the hon. member who has Just sat down, to show that ateps have been taken upon the suggestions. For finstance, 1 may say that last spriag I wrote to the Postmaster-General in Canada with a view to getting an expert in tele graphy to come down and go over our bystem and try to put it on an efficient basis. 1 lnew of no other means to get this work done. The Postmastendeneral referred me to the Manager of the C.P.R. Telegraphs, because it will be understood that most all the telegraph systems in Canada are pretty well under thetr control. He was ready to send a man down in the latter part of July, the war came and upset everything and nothing was done, but that was the plan I had concelved to put on an efficient basis the tolegraph system of this Colony I may say that this plan can be carried out now. In the state of thinge at the time it was almost impossithle to continue it and the matter dropped temporarily. I intended to lay the correspondence before the Government,
with a vlew to obtaining their sanction in the matter. I take it from these remarks that the House will understand my position and appreciate the difficulty with which I have been faced In the performance of these matters.

MR. KENT-Mr. Chairman. is is not wiy intention, Sir, to discu:s matters now occupying our attention. think it is a good thing that the Co Ierial Secretary is coasiderins these thinge, and now that they have come before the notico of the Covernment, I do not think it is necessary to discuss the details that have been made. I think the member for Trinity. Mr. Stone in bringlige forth evidence for his statements made thls arternoon in this House, will but sfrengthen the hands of the Colonial Secretary: The conditions warrant Immediate attention. I must confess that I shall be surprised if some of the statements made turnod out to be true, but that need not deter us from probing to the bottom the rights of thila matter.

Mr. Speaker reaued the Chair.
The Chairman from the Committee reported that they had considered the matter to them referred, had passed certain resolutions, and asked leave to sit agaln.

On motion this report was received and adopted, and it was ordered that the Committee have Ieare to sit agaln
EXPORTATION OF TTMBER RESOLUTIONS.
Pursuant to order and on motion of Hon. Minister Finance and Customs the House rosolved fitself into Committee of the Whole to consider certain resolations re the exportation of timber.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Cominittee.

MR. MORINE-Mr. Chairman. I wish to place myself now on record as
$t$ have not had the opportunity durlig previous discussions of the matter, as being wholly againat these resolutions. I am against these resoluthons, both as regards two years extension in the Istand and for ten years extension in Labrader. I may gay that first as for as the lsland is concerned I think no further exportation of pit props ought to be permitted. All the amount of available timber we linve now in this Ialand ought to be kept for the present. While there is a demand from the other side during the war to which we must glve some antention it scems to me that it can be met in other ways without the sacrifice we are called upon for here. There are other countrics doubtless that can spare it bettor than we can. I think it is a great mistake to depart from our settled policy with relation to our timber. I thlnk the question or the two years limit is a mistake also. If you are going to allow the exportation at all, to allow it for a Hrilted time fa another mistake, because it does not allow for the proper attention which is requisite at this juncture for the preservation of these aroas, It does not necessitate the promotion of any industry among the people at all, it would simpls lead to a "sklaning out" as it were and cutting down and destruction without offering any inducement whatever for the betterment of the people. I think It ought not to be allowed at all, be cause the mere fact of Dlacing any limit whatever on the time for this exportation with regard to timber will lead to many evils. The people who have obtained property in Labrador obtained it with the condition that it should be manufactured before it was exported, and now with your change of policy, you change the whole state of conditions for them, and raise immensely the value of what really is a mere speculation on their part. They are getting land under one condilton,
and holding it under another. It appears to mo that you ought to have some way of getting this back into the hands of the country and the people. Tho country ought to know the difference between the two conditions and realize the conditions which restricted these people. In other words you have allowed these lands to pass to certain partice under certhin restrictions, and now you purpose taking these restrictions away. Now, it may be sald that we will have an export duty which will immensely benefit the country, but your design was to get the duties from the imported commodittes necesaary for the promotion of these industries as well as the exports. If we are in such a wretched condition that we must change all the pollicy of the past for the purpose of getting a littie money at present, I can only say that we will but benefit ourselves temporarHy, and it seems to me on the other hand that if we are determined upon that polley we are wrong in putting a limitation of ten years. 1 merely express my persomal opinion on this matter. 1 know no one else's ideas on the subject. I always thought the best thing for us to do when ndopting a policy is not to allow the exportation is an unmanufactured state from the 1sland, a poliey which might not be so necessary on the Labrador coast. 1 have never been convinced that this pollicy of insisting on the manufacture of the wood upon Labrador was necessary or advisable. The Labrador always seemed to te to be a waste, barren and inhospstable country, airficult of navigation, and not altogether favourable for the progress of industries sueh as this, although I knew that manufacturere would arise in years to come. It always seemed to me that the only duty we could get from industries on the Labrador would be the export duty. I think if any change of pollicy is made the country ought
to benellit therefrom. I am opposed personally to this measure. But 1 am open to conviction with regard to the timber that it is a mistake to Himit this time to ten years. It is absurd to put any restrictions upon the time as it will only serve to prove most detrimental to the intorecis of the people of the country, As it is it harely amounts to your using your Lesislative authority to let these who have interest there hold lands upon condithons different to those under which they first obtained them. I may say that did I think that the Government was entirely free in this matter, I would vote for the exportation in an unmanufactured state of the timber on the Labrador, absolutely, but before doing that I would not let a single acre of land go out of your hands, and 1 would even take steps to acquire what land you could. The peopla who have invested is land knew that a change of law probably would come, sand they took the land on speculation. You could compensate these people for their expenditures up to date. We might do well to learn from the experiences of Ontario with regard to the timber rights, as it is I think that you are merely giving this land away by your change of policy. You say that you can only do it for ten years, and of course from that there can be only one result I think this is madness and there is nothing in the condition of the country today to warrant your taking isteps ilike these.

The conditions that exist at the prosent moment are, we misat admit, oaly temporary to a very large extent and when this war is over we all hope that they will pass away altogethor, but why in the name of heaven sare we recklesaly sacriflicing everything that the colony possesses in the worst manner that we possibly can. Now I appeat to both stdes of this House and all those Interested to look at this matter like a common sense man. Let
us look for some other means of getting revenue. Let us give the other side a chance to get pit props but let us save the wood on the Island. Let ua go to Labrador and eetablish something there of a permanent nature. but evers in this case if we are going to allow them to estabilish this fadustry on the Labrador let us have no Iimitation of ton years at all. Let there be no time limit, let a future Leglslature deal with any limitation they may wish. We cannot lay down a permanent pollcy tor the future, but we can say that so far as we are concerned we have made up our minds that the export of wood from the Labrador is permilted without restriction as to time. I hope that what I have said will not be taken as criticism merely from thls slde of the House. 1 submit that we should do something In the Interest of the country.

RT. HON. THE PRIME MINISTER -Mr. Chairman, 1 am quite prepared to admit that what my learned frlend bas sald has been done with the very best intentions, and what he has safd is naturally free from any design on his part to make any party point by thie critietsm of this important subfect. but at the same time I have to differ from him in his argument on the fects. The policy that he has referred to in refatton to timber lands is not a policy but rather an absence of polley. It is quite true that all Governments in the past have not regarded as desirable the export from Nowfomatand and Labrador of raw materlal. It did not require a statute to make that. All Governments have more or leas decided that they would not allow timber to leave Nowfoundland untll it had been manufactured finto lumber, pulp or paper or some salcable article.

MR. MORINE-But was there not a statute on the book forbidding the export of wood?

RIGHT HON. THE PRIME MINIS-

TER-Since 1904 thare has been in law prohiblting the exportation of unmanufactured wood. That was put in not for the purposes of preventing the exportation of timber so much as to stop the exportastion of timber to St. Plerre. That was the object of the law. It hind no other object.

MR. MORINE-I cannot sgree with you there.
RT. HON. THE PRIME MINISTER Well, I know about it and I can tell the Honourable member that that was the object of the mmendment of that session. I am not soing so far as to say that if they had not that notice they would not hive brought up that amendment, but at that time there was a special effort being made to earry out the Bnit Act is a great number of people In Placentia Bay, Burln and Fortune Bay who brought across unmanuffectured wood to St. Pierre violated the Bait Act, and carried on in smuggling business from St. Pierre, and that was why this amendment was passed. There was considerable friction between the Government, the Colonial Office and the French authorities In relation to what was deemed the persecution of the people of St. Pierre, but it had to be done and it was Justiffed, but now we are engaged on an entirely different position. We are today dealing with the timber of the country from another standpolit. In the first place last session we brought in legfslation to permit the expert of pit prope from Newfoundland to Great Britain and we are to-day extending that privilege for a longer period and I am sorry that the learned member for Bonavista does not agree with that extension because 1 think that We all ought be propared to make a sacritice of this nature in the interest of the Empire and the country We all should be prepared to take great risks and as far ns malcing any ditference to Nowfonndland in con-
cerned 1 think I will be able to glve figures that will convince the House that the few hundreds or thousands of pit prope that will be cut from New. foundtand during the next year or two will have such a small effect comphred with the natural growth of the country that it would not be worth while to prevent it, If all the people in Newfoundland to-day were let loogo in Newfoundland cutting the timber year after year all over the Island they wonld not be able to overtake the netural growth. That is a vory broad itatement to make but 1 ropeat it. If overyone in Newfoundlail to. dey were lot loose cutting on the publie lands all over Newfoundland they wiuld not bo able to overtake the ruiural growth that is going on. $A$ forest in Newtoundland repents. Itself in Iffty years, and as far as pulp wood is concorned it roproduces in thirty years. Now let u8 look ac this cemly and aispassionately. What happenis to-day? What has lappened for the last ten years? What has beanhappening for tho inst two hundred yarg? The whole population of the conntry lass been cutting on the three urfe 1 im it. Now talse these flymes. There are fifty thousand fabilies in Newtoundland; forty thousand of these cut all the wood they reguire for domestic purposes on the three mile Hm it. If they cut ten cords a yenr. that would not be a great deal. That would be less than a cord a month. For forty thousand families that would be 400 . 000 corde a year. Then there would the three or four cords for building operations, fences. wharves, boats. houses, moking say 100,000 cordis, sc that we can affely say that to-fay in Newfoundiand the people are cutting In the nelghbourhood of five hundred thousend cords per year on the three mile limit. That has been going on for two hundred yeark. The whote taland of Newfoundland has been cutfing on the three mile limit, not alone
for domestle purposes, but for all the family and lacal purpones, and they have been cutting year after year for bonts, fences, wharves and other workn and they have not heen ahle to exhaust it: and now when we spauk of cutting thirty thounand cords more to help the Euiplre we are told that we are recklessiy throwiag away everythinis thist the country has of atiy value, As a matter of fact there is no rifhe given by this Aet to ent on the three mile limit anything except burnit wood which if it is not eut down in a few yeara will be of no value whatever. My triend, the member for Boniavista, would be in favour of a pollcy of allowing plt prope to be exported from Labrador but he ayys It ti too late becaune now wn are tolng it after we have allowed the timber Himits of Labrador to pees out of our hands, and that we are not get fing anything for them. New whint are the facts in relation to Labirador? In the first place there are only twenty thousand milten leaned down there. 1 tabled ta reply to my frlend, Mr. Clift, a statement showing the mileago lensed on Labrador and the total amount is twenty thousind square miles.

MR. COAKER-How mach han been asked for,

RT, HON. THE PRIME MINISTER -Not very much more. I cannot say off-hand: but there lias not been much spptled for. The princlpal argument of 3tr. Morine was that it is now too tate to adopt thils potter. The potnt I wast to make is this that in labrador, acconting to the statement which I hare tabled, we have teased twes-ty-two thumand square miles, and for that we have bean getting about firty thoumend dollars a year, I do not know the total amoint of reits collocted; perhaps we only got 340,000 . The point made by Mr. Morine was that it is too late to adopt thif
polley of exporting pit props, and he would have been in favour of that If we had adopted the policy before one had afven the llimits. 3y arguaomt is this. That we are now putting an this export a dollar a cont, and the sost of curting and protuche the arHicle down thers will not make a very profitable Induatry for those to whem the limite are lensen. Anyone who zan read the rocords, anyone who tian any knowledge of what it will cost to put a cord of wood on to the brink of the river and add a dotiar to that will find that there is vory littie mo$20 y$ in it for the men who have leasen of the land. 3ty tearned friond went on further to say that this polley of ten years waia a mistake. If we were giving them fifty years or no limit at all and allowed them to go down and rat as they liked that would be a lienalble polley. I do not agree with bim, In the first place if we did not tave a limit of a few years we woutd tover be able to change this polley. In the first place these people would build expenaive places and workn fown there and attor in few years would get vented rishts which could mot be ronsonably disturbod. so that If they go down without that limit and beutin expensfve operations hitather Government would be very careful about altering or changing the policy. What is the effect of this ton years? In the first place it will aEFord an opportanity to thone who Noid thess limits to go down there and fo Inte the export of puip wood and plt prope and perhaps manufacture Imber, and remember that under the Liw to-day they can cut down and send out of the country any amount of these pit props so long as they shave \$ on the four sides, so that we are nerely getting the labour that goen iato that part of the work. The change which we are making in the taw only loses us the mattional ta-
bour that would be put into the manufacture of pit props. I admit that the polley for this country and for evary country is to keep all the raw material and manufacture it up to the very last point at which it is ponsible to do so and entiance its value. Thls is the policy which is followed by nearly every other country. Take the United States. Any wood that goes from here to the United Statos unmanufactured ean go th tree, but there is a forty per cent duty if if is mannfuctured. Our potley ought to be the same as that of the United States and to a certain extent it is, and also that we should encourage the manufacture to the highest polnt so that we may get all the labour we can out of the article. But how long are we golag to walt for this tin connection with Labrador wood: Can we wait for another lundred years? If we did nothing might still come of it. Awny back fn the ninety's, Mr. Dickie who was the ploncer in the exporta. ton of Labrador timber, went down and triod to manufacture all tumher down there, and spent milions of deltirs and lost It , and in the taet fi)teen years anthing has been dons in this direction Ho spent millions and fost miltions down there, and (o-day there is not a foot of timber being nazuifectured on Labirader. The same is true of Newforndinnic. Onty a few years ago in 1905 we exported from Newfoundland over $\$ 200,000$ worth of sawn lumber. The export was over one and in helf millions of sawn turnber, valued at $\$ 500,000$, and last year there was not a foot of manufoetured Jumber exported trom Newfoundland, and anyone who has read the ell. dence taken before the Royal Com. mission last year of Mr. Horsood and of Mr. Jones the Manager at Crand Faile-will see what they siy in relatfon to the manufacture of lumber is
this country. If we have been all these yeare falling in the development of Latorador the kaowledge that we have in that none of the English or Amerlean or Canadlan Companies have get seen fit to go down there to favest thedr capital in the country. Is It not reasonable and fair to say that It. is not a wild polley to open up LatBrador for seven or ten years with a How to learning something about the country. If we open up the country in soven or ten years we will in the firat place know all about the kinds of timber that are down there. We will know all about the climatic conditions and whether timber can be worked down there in the winter as it ean in Newtoundland and Canada, and we will learn the labour condsfions and we will know about the nmount of timber on the acreage there In fact in that ton years we may set zuch a complete knowledge of the timber Industry to indnce the entab. Hisbment of permanent works there, in the way of factories like that at Grand Falls. If you will look at the report that I have referred to of the Royal Commission you will find In the evidence of Mr. Jones of the A. N. D, CD. that be states they have been operating for a number of years at Grand Falls and have not yet been able to make it pay, and he rays further that there is very little hope of any other person coming to Newfoundland or Labrador until they have made it pay. They are struggling nlont to make it pay but they have falled up to the present and it is a black eye for this country and will be a black eye for some time to come until they malce it pay. The crowning reason we have to look into is whethहir we are dolng a permanent darrage to the country by allowing this expert Are we toing any permanent injury to Labrador by allowing this cutting? As A matter of fact if every stlick was
eut to-morrow it would reproduce itbelf ith thirty years. Of course that dibes fiot fibply to the large sttctas of thrie or four feet in diameter which did not come in that eut, but the timbeer for pulp wood and for pit props witl reproduce Ifsett to iwenty five or thirty years. The proper and judieions cutting around the Island is real benefit and advantage to the whole tonst becaune it opens up the forest and lets in Hight and alr. 1 thisk that We do not quite appreciate the enormoun quantity of fimber in New: foundtant and Labirador, I do not thitak that we realize the tmmenee quantity that falls avery year in Nowfoundland and is never made any use of.
It beigg now lualf past six, the Chatrminn teft the Chair until 8 o'clock.

MR. KENT-Mr. Chairman, I have Instened with considerable in. terest to the explamation which has been given by the Pritue Minister of the proposals now before the Committee. I am sorry that 1 couta not be here the last day the Committee had these resolutions under consideration, bet I must say that nothing thint the Prfme Mintster has sald appenis to me-as a reason why this Act should pass. I think, Sir, that it is a departure to an extent that the circumstences tunder which it is prought in don't warrant. I am prepared to go as far as any person to meet the requifements of the Empire or of its allies in the present circumstances in Europe. We linve a request from the Im perial Goverament nnd a request from the Govermment of the Republic ot France in relation to the export of jil props for the purpoee of helping them out in the working of thair mines during the perfod of hostmittes. 1 think we oukht be prepared to meet those requests reasonably and patriottenily and to the full extent to which they mep prude but I Con't think that
we ought, under the guise of reaueata of that kind, depart from a custom which has been acted upon heratofore by all governments that have beon in power in this country. The question of catting of timber for export in an unmanufactured state is one of the questions which is recelving the most barious consideration In every country in the world to-day that has timber resources; and I think that in Newfoumdland and Latbrador, es far as we can gather from the meakre information at our disposal, are resources in this respect equal to if not kreater than those of any other country. Now. I think our duty in reference to these resources is to nake the very best we can of them in the Interests of our own people and with regard to the future welfare of the colony as a whole. The exceptionat circumstances arislag out of the war may require us to depart from this policy of conservatton for a limIted time and to a limitod extent, but beyond that I don't think we are justified in golng.

I do not think that a request from the Imperial government ahould be taken as an opportunity for extendIng the right to export timber more extonnively than is necessary. The Premiter in his remarks, based his arkument upon the position that this timber liss been there for centuries, and las been cut for flshery and domestic purposes, We have complained here year after yoar of thls tadiecrimitiate cutting, I think it is very necessary here to bear in mind that the cutting is onet of a very different nature from that whicls the Premier referred to in blo remarks. What is it that ruined the forest areas of the Provinces of Ontario and Quebec, but indiscriminate eutting? The forest areas there were there for centuries and cut for
the same purposes as the Labrador timber, until the cutting began to be tor the same purposes as we ara deating with here to-night. They rery soon dinappeared. If you allow thls cutting to 80 on for ten ycars, we wiII have so forest areas left after bist perlod. In the opening debate on the Address from the Throne, I referrect to this matter. This ts the cutting from the "Standard of Emplre" which I read; it has no reference to the exportation of the manufnctured wood"A campatgo is now in progress in the colony for the removal of the prohibition agalnst the export of unmanuffetured wood whitel bas etways been operative but was temporarlly raised lat September to admit of the shlpping of timber to Enghand for use as pit props fo the coat milnes there. This, however, was only made effective for the present season, and unleas the Legislature at the session now dues extends the Aet for a furthor perlod, It will be impossible to make use of it nfter the end of 1915. It ts now boing argued that not only should the term for which thife arrimgement is offective, be extended untll the clowe of the war, but that a renewal of the whole colouial poticy in thls direction which atmed at the stimutation of local manutactures. ought to be undertaken." That shows, Mr. Chalrman, that a eampaign was needed for the purpose of fncucing the Government to allow the exportation of timber for a perlod which involved a complete reversal of the policr of the government. f-hoped that the gorernment would not give into any campalen of this kind. The present bill combined with this Information whowe that the government has not been strong enough to withstand the toree of the campaign. The Act with which we are now dealing is not in relation to plt props. The only rotson to justify that would be to show that
this comes to be of permanent value to the people of this country.

Bealling whit the question of the exportation of timber as an abstract princhpte; it would primartly beacafost the fateresth of thie countrg.Newfoundfund has Its first place with regard to Its naturnal resources. The pulp and papor induntry can beestahitshed and retumerative. The Harmsworth's have Bhown a ceflicit, but if the bualness did not profit thom, they would not be here. 1 have sald that as an abistract principle, we ought to resarve theso areas for ourselves. Labrador ought. to bo roeerved in case of eatabliahfige an industry there. It has not been entablinhind that it is not posetble. No effort was made in thint direction. Nothing was ever cione to prove that it was impasulblo. If it is not possible then I think it ought to bo reserved tor Newfonndrand, Labrador is a depondency of Newfoundland, Are there any olrcumstances under whtch ve would be fustified in departing from that? I can just concelve that it would te poselble; but I do not think that the Act over begins to meot these clrcumatances. We should only killow expartation when there is a law providing for the restoration of the forest trees. I umderstand that the forests of this country renew themtelves very raptaly. Pulpwood will renew ftself every 35 years and be ready for use. As far as 1 know, there sere no regulations with regard to these matters: no question of preserrfing the forcsts. The very same thing an is happening here, has happened Ill other countries which are searchIng around for woods. We are allowing these forelsners who cannot get woods in their own countries to come kere and destroy ours. I think it is a malataken idea to allow natural refources to be wastad in this way, It for a mistaken idea to allow them to export in the way that this Leglslation
will provide. The present law provides that it shall be prohibited to export untess and untll the same has been manufuctured into paper, pulp or other saleable products ot timber.Other saleable products of tumber must be read in conjunction with the words that go before, Any porson woold read that to mean, other sateable products similar to those prevlonsly mentioned. I agree with the exportation of pit prope as demanded by the Imperial goverament, But we ought to atop there, I do not think that there is any need for the cutting of the timber to that exteat, and I belteve that the requirements of the Imperial govermment and of France can be met by ilmiting it to the Labrador. The quantity of timber there, as the Premier sald, is very large, and I think we can provide from there all necessary pit propa required by the authoritien. I think that such a license should be under the control of the Government. and that the government ought to roserve the right to control the licenne at any time, manner or place as they might think fit. I am sure that the Imperial government would not allow us to carry this out. A license is the same as a grant, and it can only be Interfered with by ample compensa. ton. It simply means that these people hold theae licenses for ten years and you are powerless to alter them. Once the Legtalature sllows this to pass it will be fnupossible for them to go bock untll the ten years are up. The licenses should be conditional that they are subject to all regulations watch may be made by the Governor in Councll. Every change that has beea made in the Crown Lands Aet in reference to alterations of conditrons of Heenses, has been on condrtion that the amendment should not effect licenses granted before the passing of this Act. I think that we ought
to liesitate before we pass these resolutions. We are in great danger of destroying our greatest natural resources. I saw it stated that the most valuable matural resources that a country can possess, are water powers and torest areas. We have already given away one of these, now we are about to give away the other. I believe that it is possible to pass a law Which would enable the proper export of wood, if you have the regulations of the forest area. At present we have no law to that effect. I believe that the passing of the present act means the destruction of these areas. It has been argued that a number of people have intereats in the Labra. for areas and because the people have interests there, we ought to take back the aress which these people hold, before making any such amendment in the Iaw. That is a very serious question which the sovernment ought to go slowly in acting upon.
I think, Sir, we ought hesltate before passing these Resolutions. They may, and probably will, have the effect of destroying without any adequate returns one of our sreat natural resources, 1 stated here some time ago that the thost valuable natural resources that a country can possess at the present time are water powers and forest areas sultable for derelopment, such as we have here. We have abundant water powers; unfortunately, the Act passed the other day has put a great portion of them out of the control of this country. Now, Sir, we are golng to destroy another of the moat valuable assens which the country can have. I bellave, Sir, that it is possthle to pars a law which would be ample and proper with reference to the export of pulp wood if you have regulationn surroundfing it sufficient for the protection of our forest areas, but we have no lay
here to that effect. We have nothing here. I belleve that the passing of the present Act means the destruction of these areas. 1 am not in a position to say what the value of pulp wood would be to the owner of theee lande, but am totd that the tax of one collar is too small under the circumstances, and I thtnk considering that we are giving them the rigit to cut on Crown Lands we ought to make that cutting on Crown Lands liable to the rents whtch the Crown Lands Act provite. I think, Sir, that we should pay a mucls larger export tax than one dollar. These people who hold licenses at the present time aro getting a prifilege which their Hecmises never contemplated. We are giving them rights which make their holding far more valuable than before, and these Individunta ought be made contribute more largely to the revenue of the Colony. Returns of this kind ought to be arailable under proper condtfons to tossen the taxes which bave to be borne by our people at the present time. Now that you have deelded. an 1 preamme you have, to pass the measure in the present form, you ought at least let us get from it as muel as we possibly can in the interest of the peopile of the country generally. But I must eay as I sald before, I think the whole measure is wrong in principle. I do not think it should go boyond what has been asked by the Imperial Government. I propose moving an amendment along theae lines, that we comply with the requent of the Tmperfal Covernment. and go no further. I thinit the whole question of the export of puip wood fs Inopportune at the present time, and we should not enter finto the constdcration of it until we have gone much further. The gueation of export itself under our condtions would have to to constacert in reference to general Iegislation. Personally I have got no

Cefinite opinion as to whether it would be in the interest of the Colony generally to permilt the export of wood from Labrador, providing the proper safeguarding and protection of our forest is placed first and last all the time. Besidea pulp and paper we have fing or sixty or a hundred minor intiustries that might be developed in this country, which depend upon our forest areas. The futare of this country will largely depend upon how we consorve our natural resources, and if we now allow their destruction we will do a gross Injustlce to the peopte of the country and lts future prosperIty. The amendment which I propose to move le as follows:-
(1) It shall be lawtal for the Governor in Councll to grant a Heense to any person to cut timber for plt props on any Crown Lands on Labradar, and to export the timber cut under such lifense to any port in the Tinted Kingdom or in the Fepublic of France for pit props, and to krant a Hernse to any person being the holder of a Heenise to cat timber for plt props on Labrador to export timber cut on any area held under and included in such Heense to any port in the United Kingdom or in the Republic of France tor plt props. All licenses granted bereunder shall be subject to the foltowing conditions:
(1) The Ilcense shall continue in force until June 30, 1916, or daring the duration of the present war, if it be not then terminated, and no longer. provided the Heensee shall have the right to export as aforesnld timber cut before June 30, 1916, under tho sald Heense at any time up to December 31, 1916. and in the event of war conffnulug after June 50, 1916, wood cut for the same purposes between June 30, 1916, and the ter-
mination of the war may be exported at any time up to six monthe after the termination of the sald war.
(2) The licensee shall pay an export duty on any timber exported of more than $\$ 1.00$ per cord.
(3) The license shall be subject to such conditions and regatations as to the time, manner, place and area of cutting timber and for the preservation of the growing troes and of the forest areas as the Governor in Counell may fromtime to time prescribe. Before any export entry therefor is granted, the person applying for such export entry shall satisfy the Collector of Castoms on osth that the timber for which he is seekling export entry was cut on Labrador, and that it is exportod for plt props only. and that all other conditions contalned in the Act and in the Hcense have been obseried and fulfilled.
(5) Nothing in the license cantained shall authorize the eutting or exporting of timber cut in Newfoundland.
(2). Any person exporting pit-props without a license under this Act or being in holder of such license without entering same for export or without paylig the export duties thereon, shall be liable, in addition to the penalties provlded by the Crown Lands Act, to a penalty for any such offence of $\$ 500$ and an amount equal to donble the amount of the duty parable on any pulp wood so exported, to be recovered in a aummary manner before a Stipenilary Magistrate.
I I would also suggest that the tax be fncreased. I have no power or authority to move in the House for the
trereasing of any tax: but 1 would suggest that the tax be increased.

RT. HON, PRIME MINISTER.-Mr. Chairman, Just a word in reply to the hon. member. Now, to sum up in two or three words, the effect of my learnen frienit's speech is this, that groat thjury is golvis to take place on the Labrador-a great damage is goling to occur to the forest areas on Labrador by reason of this polley. Now that really is the basis of his whole speech. and that is incorporated in the amendment now proposed, that great danger IE golng to come to the Labrador timber by reason of this pollcy. Now, I am gofng to polnt out to the House the effect of that, if what my learned triend points out comes true. In the first place no danger is going to come If an induatry is not croated. It thereare no pit props exported from Labrador, then no injury will be done. It is only in the event of an Industry growing up in the next ten years, a pit prop industry, that any damage fs poing to take place at all. Now I am foltig to give sin estlmate of possitile development, and the only fear I have to-night in that it is too good to be true, words I used on one occaslon in relation to the Fog Free Zone. The only thing to-night is that I am almost afrald to think about it. I can harilly trust myself to speak about it. 1 am so much afrald it will not become an accompllahed fact. Not only do Inot fear any dangar from this source, but 1 fear it will not become an accompllished fact. If it does not hecome an bccomplished fact no danger will be done. Now let us nssume for the first year we export 100,000 cords; the year after two hundred thousand: the year after three hundred thousand: the next year three hunired and fifty thoneand; the next year four hundred thousand, and Increasing fifty thousand $\pi$ year untll 1925. You will then be exporting 650,000 cords. In ten
years you will have exported four million cords, Now, four million coris can be cut on a thousand square miles. Now there are twenty thonsand square miles leased to-night in a territory five or six times as large as Newfoundland. Now that is the position. Let us examine it a little further. The last year, if this terrible danger, this frightful calamity, comes about, you will be collecting revanue from six hundred and fifty thousand cords at a dollar a cord. Now what does this industry mean to the country? It means $\$ 3,250,000$, valuing the wood at $\$ 5.00$ a cord. It will mean 5,000 men at work at $\$ 600$ a year. That is the pesition. It will mean 5,000 men at work at two dollars a day to carn that three million dollare.

MR. COAKER.-Are you going to put that two dollars a day in the Blll?

RT, HON. PRIME MINISTER.That is ridiculous. How can you put It in a Bill Hke this? However, that will be the position. Unless this industry comes nbont there can be no cutting. It is only in the event of this huge industry apringing up, and increasing from one hundred thousand to str huadred and fifty thousand cords, and spread over the whole twen-ty-two thousand miles under lease tonight, that any damage can mecrue. Now, where is the danger? Where is the risk?

MR. KENT-I think the argument of the Prime Minister is one of those arguments of his that may appear convineing, but is altogether apart from racts. It is not the reasoning that one would expect from him in dealing with a proposition of this kind. It reminde me of the story of the man who was going to start a hennery; who calcolnted the results if every hen laid a dozen eggs, and if every oge became a chicken, and so on. He would become very wealthy in a short time.

RT. HON. PRIME MINISTER.-I

Invite the hou member to lay before the House what he thinks is going to happen next year.

MR. KENT.-What I have said is that you have got to protect the trees. You must remember, Sir, that every tree cut is not going to be fit for pit props, and there is going to be much damage done. If men go in on these areas and cut as they like, it is going to work great destruction. That very thing has destroyed the resources of other countrfes, and if we are not careful it will destroy ours.

MR. COAKER.-The statement of the Prime Minister in reply to the Leader of the Opposition is that if we start to export pulp wood in the form of pit piops, in ton yeara we will heve exported four million cords. Now, that is not the danger. The danger is that in the next three years, before your term of office expires you will jesue licenses to cut pit props on the Labrador to every one that asks for them. They may not export very much; and when the ten years is up what then" People will come into the House and look for an extension of the term. They will say, look at all these men engaged in this industry. Are you going to turn them out after giving them the right to cut there? Why not give them the right to cut for another twenty years?

RT. HON. PRIME MINISTER.-DO you belleve we are not coming back?

MR. COAKER.-God only knows who is coming back. Personally, I do not belfeve any Government ought to be in power more than four yeare. There onght to be a change. When you put a party in the second time, they do not care what they do. They reagon that they will not get a third term anyhow; so they do as they please. I belleve the Government should change every four years. Now, tho Premier sald something about wagee befing two dollara a day. He
sald it would be ridiculous to pat it In the Bill. It is not ridiculous if he is sincere, is it more ridiculous than for him to come in here in 1909 and say he would build tive branel rallways for four millions? And now they have cont over eight millions, and they are not finished yet.

RT. HON. PRIME MINISTER.-I never made such a statement. You were not here.

MR. COAKER.-1 was not here, but I bellered the atatement, and was decelved by it.

Now, Mr. Kent in the early part of his speech said that he bail read a Canadian newspaper, which said that there was a movement now, in force in the Colony to remove the prohlbltion against the export of pulp wood from the Colony. That prohibition was ralsed in September. Now, we did not know anything about it till it came up here.

RT, HON. PRIME MINISTER-That was sent by the correspondent in June.

MR. COAKER.-We did not know it. We had to get it from across the water. We fnew nothing about it that that movement was on foot in this country. I wonder how many genthemen in the House knew about it.

RT. HON. PRIME MINISTER-I want to say that I knew nothing about the correspondent who sent that news out I spoke to nobody about it, or nobody spoke to me. I never heard of any movement being on foot to have this prohibition removed.

MR. COAKER.-The correspondent evidently knew what he was talking about. He sald the prohlotition was soing to be removed, and it wns. I dou't say you lnew anything about it. 1 don't beliove you know a fiftieth part of what goes on. But those petttions were sent out. They were sent out whth a tetter signed by one Norsworthy. 1 would say there must be
kix hundred petitions sent out. They wero intended to be sent to this House but there was so much oppoaition against them that not one of them ever found its way hore.

I don't believe that the members of the Government have gone into this matter at all or know what damage they are likely to cause. I am not talkfing now about a temporary matter during the war. 1 am talking about the permanent policy for ten yeara. The whole country is agalnat you in this matter. Of course this would not be done at all only so many of your supporters are finterested in these timber thmits. What about the applica. tion for one thousand milles which was granted to Jardine of Bay Roberts in March. Why was that issued? It was fssmed because it was expected that thls prohibition would be removed. Then there are fitteen applications bince June 1915 for large areas of lund on Labrador. These were applited for and issued because the removal of this prabibition in the export of pulpwood was expected. Now 1 certainly object to any pit props being exported from Newfoundland. Not one more stick for war purposes or any other purposes should bo exported. If pit props are to be exported for war purposes let them go down to Labrador and get them. 1 am certainly in favour of 3 Mr . Kent's amendment that pit props should ouly be exported from Labrador while the war continues or I2 months after. I am perfectly sutisfied with that. But you will nover take another stick from Newfoundland with my consent. We uhould now have three or four industries in New. foundland as large as Grand Falls and we would if they had been properly encouraged. We should have a Glemwood and Bishop's Falls industries as large and larger than that of Grand Falls. But somebody interfered with them. When these people start-
ed at Hlishopys Falls ther contemplased raining a large ntopuat of moeey and ereating an tintuitry an large or targer thas that owe at Crand Falls. And what stopped them! The Hetid Newfoundland Company. It kept thees mea luige up for a year anid ithreatened them with lawsuits, and the people who were investing their capital in the enterprise dropped oat. ated Mr. Reed tad to go atheut oul his private mouey and start the induatry ea it small scale, The Einglish capitallets would not riak thelr money when thare wirt il poaiftittty of befne involved in a lawniil, and instead of having at Bishop's Hails a larger induntry thas the one at Crand Palle, It tunt to the started ofi a wimaller sicale.
Thers is a suffietency of lamber there and I do not think it is fair play to the people to have thene parties comInr fr ond trvesting thitr moser ander these present eircumstances. 1 wouder if it it Eeneraily known that these people at Bishop'r Patls derlre to matie gt. Jotrr's thetr winter Blippblag port. As the matter now atands Wer have to lie up six months' produre at Ftotwood anit walt itx months before they can again utitize it They never latended to make Levlaporte more than the aummer port, but they intended, sn 1 hime mati, to mike BL. John's their wtater port. They were again, however, impeded. They intended, I bellove, to eatablinh at Bishopt Matin ntt tmftuntry an lirge as that at Grand Falls. They would atilize the railway to Fortune Bay and not bring the timber lack io be manufactured. Foe ere polntr to takr awny aft the chances that this Compusy presested of contritiatios a large industry. Do gou realize what this with meas to the couneryt if yee tre here to two joits time you wili realize that 1 am speakIne the truth. What $I$ asy is this: Keep jour timber, and let the sulp be manuhactured hers, that our people
tay benatit by the labour. It is a mat. ter 1 caleulate, of some soreaty or geventy Aive thessand dollars to the orvemus, and there is rocm for tweaty suck, can you hat thad the water sup. ply. You are string a black sye to the tnduatrits at Grand Falls and Biat. ople Yall. You may asy that they are sot pow setting dividends, but taey are ahewing the pouple aliroad that thiny are not loping money. Eut we. however, munt do more than this-we muat mhow they are making some pros: fit. There was never a mitit tike thile that ever paid within five or aoven yearn, but thoy make money afterwards. I caunot see how you latead with thils policy to improve thess concitiftas, You are putuing a limit of two searn here, and ten on the Labrafor, and you know very well that you sever expect Uhis mar to lant anything tike ter Jean. The peopte of Nowfoundland uwn that timber, and jou gre now by theso Acts depriving them of thrit owni propurty, Thes are the ches that have the right to expert it. The policy lan always beea thet they could oaly export the pulp in a man vifactured atate whitch of courne tieceastates the erection of millis, and an= they will export thls wood, and there is no chanoe of it being mannfiectured here. In 1918, previous to the election there came to me a henchman from some of these Companies, and offered me the sum of sesp,006 is I would stve this meanure my vote t communteated this to a Connest of the P. P. U., anit told them what was done, It le a thing that I weati sever soment to. It manas siving these speculators richts that they zever expected. Twentytwo thousand square milles of land down there, at firty cents an acres, which oill mean scructhing like seven million for these zren. If it in ouly thirty cents as acre it meats fire million twe husdrod thousand. Are you gotne to rob this country to the extent of tive mil-

Hon dollars for the anke of elght or ten land erabbers? What do you mean lo It? Get the land lack, let the Colony lase the land agaln. It the mesi honestiy descrve it, lat them have ample eompensation, and I will support jou in thfs. I do not betleve that we ought to atand tin the way of the countrg'i development an we are dotige by thife policy. If the produce is ileeftef ti New Yort or Loniton, then let it be manufietured here, or some place near here, and make nome attempt at gtving our people lehour, We noed it badts it tha present tfrie. I believe in a tew yearn all our financial troubles will have clenred away. nnd wie mill not lisve to saut our men to Talinator to get molley for fletr labeur. Let it be for two or two and a half or aven three rears, but do not extend it up to ten yoark. I wish 1 coutd betrieve that the Premier when he denit with thin question was sincerv unit consctentiour. If the titte bitrds that sometfries tell things in the efty are teltiar the trath, your Party meetinms are not alwaym vary socret. Thiey hieve revonted the fict that on thes very question you are divided; that is whint in mald on the stroet. Some of the men, it is sutd, wanted to rettre.

RT, HON. PRIME MINISTERI miy noy this never happoned at any party meoting. Our meetings hare beon characterized by a puanimity that comtd give no ponulble rise to a report of this kind. 1 state thils liere In the presence of all tho people who are at thove meetings. 1 male no propoeat that wan not mantmouty agrood to.

MR. COAKER-1 am ver plezsed to heur thes, and I bope the itale Birde won't tell any moro fibs.

RT, HON. PRIME MINISTERI betiere, and I bope, that there is no tiatr in Neivfounttand whio is late enough to be capuble of much an act.

Pernonally 1 know no man low ent eash, and that is way it did not happen.

MR. COAKER-1 am not gotng to nay any more, but if you go on and tulli any more like that I will say a Ereat deal.

RT HON PRIME MINISTERit mas may in the presence of everyone in thls House thas this never haprensd, and that you aro outirely insorrect.

MR. COAKER-Now with reference to the matter we were diacuaing, there are now about five Lundred thousand pords ured a year in Nowfoundluad, and thls has beon golng gn for some years, and still the I-mille fimit han not been eut. The Premier tried to convince me that the 2 millo lituit was as fatact an 25 or 30 years 8go.
BT, HON. PRIME MINISTER1 do not think you litended to milt fuote me: what 1 sald was thlas that the population of this country for the fast 200 yours has been outtlus on The Ianile limit, and it in not cut out yet.

MR, COAKER-There may be a Ittle wood left. but how mueh will You find in Coneoption Bay, for instunce? I have baen over the North of Concoption Buy where 1 know there was a littio. but I know that the 8 -wile limit is pretty bare on the rallraud from hare to Port aux Basques. The country ls a barren wildernems, and when the raflroad went firat it was is beautifut forest. I am sure that fully oun half of our tiditermen are emable to got the wood that they ought to. Ther have to go finto the woods to set it, 1 know that is no on the ereater part of the south slide of Trinfty fing. They hise a ttiter mood tert the Foro, I do ant think thits polies is a foot one, merely because thern is a 2 -mile limit for the people, As a zantier of fact they will eut whers it

Is most ensifly evallible aind woin't leave a ploket standing. Thense men are eursing the fity pit props came fato the country, 1 bot a letter to-day aisking that au pit props be eut. I got a Ietter abking that no more pit propa bo eut from the north जlite of Bonnvista Bay. Thene people ure anxious that they ahould presprve enough wood to serve them with firewood.
 ar petitions, and if yons wers to put If to the rote of-the peopile, savenelghths would vote agatust these pit propt. You go to thele poopte betore the elections and mike promition to them, but you do Just as you Hike when the time comen. Yon Zorget inl you naid to them rnd mit yourcelver in the matter. Then the people complain. When I get in power 1 intend to do everything the people destre. That, und that alone I take it, is whint I am there for. That fo what you are there for Let the people be the sovcrelige power. Let every matter thint concerns the people come before them. Then and then ouly shall we have a legfolature that will make the country prosperous. When the $\mathrm{F}, \mathrm{P}$ U eame tnto power the poople know thint they will get a mquare deal. I do not sar that nverything should be nutmitted to the people, bat a thing like the *roducts Bill ought to be cmbmittat to them, 85 on them alone sespontrtimity whould rest. If we esia only pirlveat this Eofng through, it will bo tee of the beat thlngs for Nomefourtland, but I ame nfratid that if we dis cuss thls question until tomiorrow thoralik we woald not get you to move the inch from the polley that you di. termined upon before you came in here. You nee not going to alter your plans now, no matter what I may siny Yout tro हुitt to make it ten sume If you do that thounands of dollars will chanke hands.

1 say that the people do not want
thits mensure, but the poople are not solige to be comralted lay the men who kovera the country now. The country it agatugt thin bill mid it will hring down upan the liemds of the prewent Goverument the curse of the whale paople. They do not want to have axytiing to do with it. It is not in the fitarentes of the peogle that the bill in passed. If the Gowgrament would devale same of their energles to the development of the finheries fintead of the parango of a. messure such ns this they would मot a buttor bame than they havn in the country torday.

HON. MR. EMERSON-MT. Chairman, it is not my intention to delay this Committee with any lengthy remarlis, hat I wish to nay that I support thala bill in las entirety. The Bell itrelf is divided into two parta. The firat dealing with Newfoundland, wnd the second with Labrador. The term for the exportation of timber fromi Nowfoundland is estended for bine year, while it fe permitted from labradoir for an period of ten years. This lue beem charged as a reversal of the pollicy of the present Governminent. It lias bemis pointed out the polies (if sou ean call it a poliey) that we have been comiucting is more an elsence of polley than anything elise. We have on Latindar large cuantlies of thmolec which have it nertala commercial value. and it Feems to min to be in rifficuioun polley ti) have this tfmber thed up year after Fear when in une or two duyw a forest fire cun make away with milliens and millions of feet of it. Why not let us utitee this thmber at a timie sames as this and aive emplormieat to the people. In rising to apeak in fayour of the bill I had nlso in mind a chnrem that wan fumg teroes the floors of the Houre that certain members on thitis indin wore interested in the pinssage of the hill, That charge wall made by the member for Twillimgate,
and it is only fair to us that he intiould name the mun who is interested by the bill going through.

MR. COAKER-ARe you intererted In $1 t ?$

HON. MR. EMERGON-Speaking for mysetf I ean say that I have no finterest whatever in the measire.

MA. COAKER-Are you not solicitor for a Company that ia intereated?

HON, MR. EMERSON-That may be, but being a solicitor for a Company that is interestod in the bill does not make me in any way interested In tts passage. Thist fo a necenaary thing in the protesaton of the law. The honourable member can make statements such as that with impunity in the same way in which he made a statement about me in the last clection, libelling me fin connection with the International Ore Co., of Alyy de Verte, whon he sprand broadeaat the fani that I hat sigued the Memorandum of Association of that Company. I did not sign that Memorandum of Assoclatton. I had nothing whatever to do with it, and my name was put to it without my knowledze or consent.

MR. LLOYD-Why did you not state that at the time?

HON. MR. EMERSON-FOT the simple reason that it was spread hroatcast through the comery at the time betore I knew anything about it. It was spread by you.

MR, LLOYD - It was not. I never mentioned your name in connection with it at all. 1 am only eorry that 1 tht not.

HON, MR. EMERSON-What 1 want to state is that as far as 1 know no naember on thits alde of the Hisuse is the any way interested th the panbage of the bill. The charge is as false as the one that was made hore to-day that the Premier was turned down at a party rueeting when thla matter was under discussion. There is not 4 particle of truth in it and

I do not believe that even the member for Twillingate himself believes it was trie.

MR COAKER-OL YeB I do.
HON. MR. EMERSON-We were told here to-day that there were at lot of petitions drawn up in favour of thls measure 1 mow nothing about the petitions, I never saw them and 1 hoar of them to-night for the first time. It is a curlous thing that if there were such a number of petitions golng around that we did not have some of them in the House. 1 never heard of them having been about. I etmply wiah to put myself straight as far as 1 am cuncerned and think it is ouly fair that when charges are made across the flooriz of the House, chargen of such a serious nature, the pernons involred should be named and an enquiry made finto the truth of them.

HON. COLONIAL SECRETARYMr . Chairman, I wlsh to make one or two observations on this bill, and In the first place I would like to mako reference to the clipping from the "Standint of Empire" produced by the Leader of the Oppoaition to-night, Which reterred to n campsign supposed to have been started in this commurify for the purpose of setting a raversal of the poltcy as regards the exportation of unmanufactured wood from this Colony and Labrador. The honourable member on a previous ocmaston profuced the same extract, but bis remarks on that occasion did not assume any serious aspect, but I think to-night he has made a statement that has assumed serlous proportions and one that should not be allowed to pass without proper refutation on the part of members on this sfite of the House. He mude a atatement in connection with this matter that the Government was not strong enough to withstand the Company that was started. Now, Sir, I aubmit that next to the Premier himself 1 know as much as most peo-
ple in connection with Government matters, and I can say positively that no members of the Government had any knowledge of any Company of any kind whatever formed to undertake this work, or that any such Company was known to the Executive Government when this matter was difcussed. When this matter was discusged no one knew this Company to exist. 1 am sure that the Premier knew of no Company, and I reel sate in saying that no other member of the Executive Government did elther, and consequently 1 say that the remarks made by the Leader of the Opposition should not be allowed to pess wittiout contralletton which : think I have fully made at this moment. As regards the remark of tha member for Twillingate in etating that members on this side of the House had an interest in the passage of the measure. I do not know who owns the timber lands on the Labrador. I have no futerests in any timber on the Labrador and never had any thmer lands in the Colony, and I think that I can claim that during my time in this House I have always done my Lest In the Interest of the Colony and in that intereat alone, and in making that statement I wish to say that I will not take second place even to Mr Coaker in that regard. Ever since T occupied a aeat in this House 1 have endeavoured to follow out thls polley as far as 1 was personally concerned. The honourable member then referred to a grant going through the Executive Council just in the same way as other grants that have come up. It was upon a part of the Labrador Coast that was outside the disputed territory. Other grants were lssued as they came along without distinction. Mr. Jardine's grant was made out undor the same conditions as other Ieases. I am aware that a great number of grants on the Labrador Coast
were not fssued in the last twelve months nor for many yeara past. It Is not for me to aak why people take out these grants. I have no interest in that. If everything is in order then they come before the Executive and a grant is issued. They get a grant and pay rout, that is all the interest the Goverrment has in ft . In all cases the holders of these grants have to pay large sums of money, and it is not many men that can afford to pay big amounte exseted by the Government for rentals. They do not as a rule undertake the payment of these rentale unlegs they have a large sum of money at their disposal. As regards the pollcy Itself I never was a bellever in the policy of tying up the Labrador. On a great many occaaions I have stated the matter in pubic and stated my conviction that we should utilize for the benefit of the people that timber which is locked up over there. This has always struck me as a dog in the manger policy and I see no reason why we should not utllize resources such as that to the very beat advantage. We have in this country the greatest asset that a country can have a large quantity of timber and we have very little else. Down on Labrador, I have been informed, more particularly at Hamilton Inlet, there are hundreds of miles of great timber lands soing in from the banks of the Rivers for many miles that could be utilized for pit props that lave never been touched since the country was first discovered. What development have we seen in the last twenty years since we have had this polfey going. What hope is there for the future of ever having any great develogment in connection with those areas. It has been found out that it is liardly within the realms of possibility to establish large pubHe operations in that country owing to the many disadvantages, more particularly the fact that there are only
three of four mopths of navization. At the prosent time we know very ittue of any of these conditfons, ant we camot expect anyone to come down and apend millions of dollare in the construction of works unteas they are assured of the succeas of their enterprise.
Every member knows that the iereat need of the country at the present time is employment. There is evidence of lark of employment on every sitte, more particularly in regard to the fiahery as there to a ahortage in auppiles. This bill besfaes helplig the employer and the country, opens up an arenue of empioyment and provides occupation for the peopte who need it, and It than it is a prty af a time euch as this that we cannot hide our political feelings and work together for the good of evoryont, Too years ago We did not think of the exportation of pit props nof did we apprectate what value it would be to the Colony. We were tinaware that there were such benefita to be obtained from this induntry and that such a large amount of this material was betng used in Great Britnity, white cords upon carifi of this wood wero rotting in our forest of ao benefit to the country or the people. I have no doubt that this bilt, If It pansess with be of treat wie to the people themselves. Last year we came into this House and asked to pass a measure for one year. The cfrcumstarices under whicl ise asked for it were such that we thought there would be na necesaity for a longer period. We' hoped to anticipate any earty termfnation of the wir. We all expected that when the war was over no more requirements of this kind would be needed, but untortunntels for un and unfortumatety for the whole Empire that war is nint to-lany appareatly any nenrer conclusion than if was at that time, and therofore we are asking this lomistature to ontict a measure to allow Great Britain and

Prance to export pit props from the Colony and to carry on that industry which is necessary for the leeptug up ot thetr manufictares and works and to keep the armies of France and our other allies eupplied, and it is oaly fatural that this House should unammounly adopt the messure. Both stdes ehould agree to rise above mere party erftelsm. The tim whith was ivtrođuced tast Sesslou passed unanimous-ty-that the export of pit props should be allowed for one year. As I say the aro extenaing that prfvitege becatur the termination of hostilitties is niot in sight at the prisent time and probably it will be necessary to extend beyond that period. Both sides agreed to that position last fall. I say now that there is no fntention to contlaue this bill as far an Newfoundland is concerned, after the termination of the war. The member for Twillingate said a few minutes ago that he trusted the Govermment would not extend this privilege beyond the two years. I give him an undertalding hare to-night that the Government will not extend the privilege of exporting from Newfoundland beyond the end of the war. It may be that we might have to exterd it for another year, if it should happen that Eugland was sttll at war, but as Mr. Kent hiss naid we should not besitate to offer any resourees that wo have to be used by her and her allies in tuy possiblo manner. These are the oniy conditions under which the Goverament is auking for this extenulon as far has Nexfoumiltanid is concorned, Kut 1 elafin it is a different proposition when we come to look at Labrador The Latirtitor is an Immense country, very largely waste land, with rin enormous quantlity of trmber, enormous Falls and Inland seas, whose bankes are covered with a thick growth of timber that has latn there for cenfurien and will remaln there for centurien to come unless something
such as we propose is undertaken there. We want to give them the riglt to take from that resource, and we hope that it will bring in something to the revenue of the Colony, that it would not do if it were not developed fin some way.
in these days of depression it would be a blesstng to open some of these our mitustries. 1 biate to see men have to go away to get work. I hate to see men not working but getting rellef when they are willing and eager to work. I hite to see a totirce of work closed when men are standing tdle around. For these reasons, Mr. Chairman, I think the passage of thls measure witt be an insplration to our men, and also that no one need be out of a job during the coming year at any rate. The temptation would not be as strong to then if this measure was but for one year, for just as they had acquired the knowledge of lis working, the time would have explred. This leaving it for ten years was in the opinion of the Government the best thet could be done in vew of the present conditions In Europe, Bneland and France. This in viow of the neceseary depreseion which must follow the fimmediate conctuston and tait stagee of the war, will keop our men at work and at the same time doing work asked for by Great Britain.
1 therefore, Mr. Chiatrman, support this measure to open the wilderness to our people.

MR. HIGGINS-1 would bay Jut a word or two Mr. Chairman. I appreclate that anything I may have to say will not have the authority that some of the speeches here today have showt, but I wortid thee to express my appreciation of this measure. Two mambers of the Exsecutive Government linve spoken, and as they spoke I was tryfrig to thitik if anyone in whem they or anyone else might be intergated, had great faterests at stake in

Labrador, I may say that at the present time 1 fmow of no person inter. ested in this venture 1 think that it is a measure advanced fin the best futereats of the people.

When the firat epeakers of the ODpoattion spoke, I thought with them that not uniskely some of the mem: bers were intereated in this bill, as by It they might reap beneftrs from thefr Iand which they did not deserve; but es. I have sald, to the best of my knowledge and bellef such is not the cuse, I confess, however, that I was strick with this sttitude when the bon. gentleman who made the refuark was speaking. Having sald this I will make one or two oliservations of the bill, which may have been suggested by the remarks of the two members of the Executlye who have spoken.

While this is in some ways a war mensure, yet it was also the fixed polfey of thls Government before war wan thought of. Some of the members who have apoken spoke of ft as a war monsurc. Now I would like to say Trankly that as far as it appears to me it has been clearly explained that that is not ao. The Premler has fully explatmed the sttuatton and you wIII remomber that be said that the Government had consldered the war only in so far as If was the wish of Great Britain that we export some of our tumber to England. This yon will also remember was curried out under an act made lnst year, which authorized the cutting for a period of one year. I would uniler no circumstances approve of the export of our raw materlas but for the fact that the war lias made it a necessity. It is a well known fact that Newfoundland's wealith is in her unworked industries. and to thius open them to the world vould be to sive them up. I am hoping that the Goverament is keeping a strict eye on any who may be contemplating a wholesale export of this
timber, where the same is not justifled by necessity due to the war.

I would say as a member of the Government that the lines lald down by my hoa. Triends, Mr. Morine and Mr. Coaker, although perlhaps sald with a little foundation, yet may be laid aside. It is my hope and belief that this work will be undertakon by Newfoundlanders, and that any benefits which may acerve may come to them. I agree with Mr. Kent In many of his remarks on this subject. It is a privilege to Newfonndland to have those industries, and it ought to be a privilege of Newfoundlanders to work them. My hon, friend, Mr. Coaker, has showed that a lot of this area has bean granted as timber areas, some 22,000 miles. It is not reasonable to suppose that when this land was taken this step on the part of the Government was anticipated. They were in all probability sincere when they took it, but now that this industry has been started they may be able to get enough to pay the taxes made upon such land.

I may say, Mr. Chairman, in closing, that I think this policy of the Government will be brought to a euccessful issue by the introduction of this messure. In all detalls the interests of the people have been conserved as far as this was possible, and it is my opinion that as a result of the adoption of this measure great benerits will acerue to us as Newfoundlanders and to our country.

MR. HICKMAN-Mr. Chairman, I do not intond to discuss this matter at any length at this hour here tonight, but I would just like to say a word or two. I was struck by a statement made here tonlght by Mr.Coaker to the effect that he had been offered a great sum of money if he would use his influence to introduce a bill into this legislature to permit the export of pulp wood from the Labrador. Now in the fall of 1913, Mr , Coaker told
me that he had been offered by $a$, gentleman resident in this city, on condition that he went over with hifs party to the Morris party, and on condition that if elected he would bring in a bill to permit the export of pulp wood, a considerable amount of money. The amount named was $\$ 250,000$. The promoters were prepared to pay an export tax of $\$ 1$ per cord. I would give thils House the name of this gentleman, but for the fact that his name was given to me privately by Mr. Coaker, and that eonsequently I do not feel that I ought to do this withoat permission. I may say, however, that he is not a Newfoundlander, but a resident of the elty.

The members of this Honse will apprectate the fact that In view of such information as this, one cannot be too careful when considering such a matter as this. I thought I would just say this while we are at this juncture.

MR. KENT-Mr. Chairman, I would like to sey a word or two in reference to the remarks of the Colonial Secretary. From artteles I have seen in the "Standard of Emplie," one of the leading papers of England, and one of which I think the Hon. Robert Watson, until recently a member of the Executive Council, is the Newfoundland correapondent, I should judge, in Niew of the fact that the writer was a member of the councl, that this matter of exporting timber from the Labrador had not come before the consideration of the Government until very recently. This would contradict the statement made here that this was a fixed policy of the Governmont. At any rate a matter of such great importance as this ought not be held over until so late in the seasion. The Premier has given notice of suspension of rules, and here this a most important bill is just about to be introduced. There was no just reason Why this matter should not have been

Introduced before in order that this House might have more time to think over its prorisions.

1 think it was a fair inference to draw that that campaign referred to did exist. Now if is quite possible that the action of the Government may have been entirely independent of any campaign that was going on. I think that the very presence of a member in this House discussing this matter is proof that he has no interest in it. For a member will find himself in that position that his interests will be effected by Legialation; in which case it is his duty to withdraw. Evvery member who votes in connection with this measure, will do so with the samo clearneas of intention as I do myself. There is another remaric which I wlsh to make in reference to what I sald about this bill being brought in under the guige of Pit Prop Resolutions of last year. Now you are not asking to extend that for the duration of the war; but fastead of that you come in here and amend that section to extend it for a period of ten years, not for pit prop purposes but for any purpose: That justifles the remark that the resolutions were introduced under the dissuise of Pit Prop Resolutions of last year. We are prepared to respond to the call of the Empire. It is a duty that we are bound to fulfil. But we are not prepared to vote for the measure in its present form. I do not think thet there is any reason why we should go further than that in connection with the matter before the chatr.

MR. HALFYARD-Mr. Chairman, it has been said by the difterent speakers that there would be no opposition to any resolutions that would help the Empire in any way to meet the great conflet now engaging the attention of Enrope. We all agree on that point: that every vit prop required from Nfld. we will be too glad to supply, but when it comes to the
question of the general exportation of timber resources, it is another thing. It will not be confined to pit props, but everything will be mowed down. Timber for locat use has been a great asset. Now those living in St. John's will have to buy all their fuel. If there is not a substitute put in its place, the result will be that they witl have to leave the country altogether. We do not value our timber. We think that cutting pit props will be a grand thing for the country. Yes, but only for the time being. Those who prosecute the fishery are depending on timber for fishling purposes, and also for building houses. If the men hare to carry their fuel down to Labrador, it will be such a hardship that a great many will not be able to prosecate the fishery at all. If you cut off this sapply of fuel what are you going to get in its place. Now I do not queation the sincerity of the promoters of this measure, but I certainly disagree with it, because the best of us make mistakes. Dean Swift said that he did not wonder at a man being wieked but he did wonder at a man not being ashamed. Mistakes have often led on to fortume. We have already passed one contract and cannot retrench, and now we are entering upon another such project. As it has been stated here, I belleve that this has been brought down to this Legislature in favour of those interested in timber on Labrador, under the guise of Pit Prop Resolutions. These people want to make a good thing out of it. This Legislature had a policy which has now been reversed. What for? Because we arn up against bad times? You will not get men to go and cut pit props. Our men are not going to stay in the woods If there is a sood fishery. For these reasons, Mr , Chairman, I will not support tho measure in Its present form. We are giving these people a license to clean the country out. There will
be no reforesting and the plice will be soon in a wilderneas condition, ower one thitf the areit of Newfoume. land. I fo not think that this measure is wise or patrintic, for patrintiam is that whrch wiII loring prosperity to our futare gencratiout, it fo only th keeping with the policy of the Goverument which is to let things go ahead.

MR. WINSOR-Mr. Chatrman, I feel it my duty to ssy a few words with rekard to these resolutions. We should. Blt, look atter tho people's rigtos. Thid Premfer stated that the three mile limit was in good condition, but the little that is left should be looked after. "We want to help the phor of our coulistif," In oHe of the crien, It seems to mes, Sir, that we are up against something very hard. If we are going to help the people It shoute to done tong ago, for thers are humdreda and thonsands of them leaving the country, I think, Sir, that this is a sertons matfer for the Govermment to constder. It the pramter woutd take any suggestions from this aide, there would be some machinery to protect the three milf Ifmit, but as the resolutions now stand, I cannot support them.

MR. LLOYD-Mr. Chairmme, 1 Want to kny a few worde in reference to a disclatmer that was mude in this House, by hir Fimerson: that he is trot intercsted in this bill. I accept that information 1 did not understand him to deny that be was solleitor for ar client who was intervited. I to thot thith that it mas elther deeont or proper, I am glad that the wame gentloman disclairas a mattor that las leen one of motoriety for mant reats. Prom Misy toth ceit in Iocuments wore circulated around this elty. They were in my possession from that time. Buc until thin epentues ! tht not hear a dtactatimer etthor from that sentleman or from anyhody elseg. At the leacier of the Oy-
bonition has sald: no member of thin Howne. Interested in this Mill, zhould take part in the debate. The owtietn of timber lands sre getting all this for nothine, and there ahould be a clear vnderstanding that it shoold not extenit beyonat the periot of the war: and last year we were given to madergtand that that was the sentiment of the Government. 1 want to record any ntrong diavont from thil poticy.
Mr. Speaker resumed the Chatr.
And it being after midulght
FRIDAY, May 28th.
The Chairinan from the Commituee reported that they had consldered the matter to them reterred, and had passed the Resolntions without fumendment, and recommended that a bill te Introduced to give effect to the same.
On motion this report was recolved,
On then motion for the adaption of tho report Mr. Kent moved, and Mr. Lloyd seconded the following amend-ment:-
"It shall te lewfal for the Governor In Councll to arant a license to any pobson to cut timber for pit props on Crown Lands on Latirator and to export the timber cat under such ticense to any port in the United Kingdom do tir the Reguitte of Farkice tor jit propis and to grant a license to any piorson tielng the liolder of a Hocense to cut timber for pit proper on lands on Labrador to export timber cut on any area hold ander and included in such license to any port in the Tulted Fitis dom or in tho Repuatic of France for pit propes. All Hiconses granted bermunder shall be subject to the folbowine conditions:-
(1) The licatise shall continue in foree uatil June 30th, 1916 or during the duration of the prerent war if it be not then terminated and no longen Prorided that the Lifensee shall
have the right to export as aforesail timber cut before June 90th, 1916 under the mald license at any time up to December 31, 1916, and in the evont of the war continuing after Juhe 20, 1916, wood ent for the satt purposer between June 30 , 1016, and the termination of the war may be exported at any time in to six morths nfter tho terminution of the sald war.
(2) The licensee shall pay an export duty on any timber to exported of more than $\$ 1.00$ per cord.
(3) The Ifcenae shall be aubjeot to suat conditions and regulations as to the time, manner, place, and area of cutting and for tho preearvation of the growing trees and of thit torest arens in the Governor in Council may from time to time proscribe,
(4) Before any export eutry therefor to krantal the jerson applying for such export entry he ehall satiafy the Collector of Customs on oxth that the timber tor whtch he is seelding export ontry was cut on Labrador and that it is exported solely for pit prope only, and that all other condltions contained in this Act and in the ficonne have been abserved and fulfilled.
(5) Nothting fir the ticense contain: od shull authorise the cutting or exporting of timber eut in Newfoundland.
2. Any persen exporting pulp wood or pit props without a license under this Aet or befing a hoider of such Heense without entering the same for expart or without paylig the export duty thereon shall be lisble, in addition to the penalites provided by the frown Lands Acts, to a penalty for any such offenee of $\$ 500.00$ and in amount equal to double the amount of the duty payable on any pil props so
expurted to be recovered ifs is summary tnanner hefore a Stipendiary Magistrate"

Wherempon the House divided, and there appeared for the amendment Mesars. Kent, Eloyd, Couker, Holfyard, Stone Target, Winsor, Abbott, Grimen (9); and against it: Rt. Hon. the Frime Miniater, Hons. Colenilal Socretary, Mintiter of Pinance \& Cuntoma, C. H. Fmerson, J, C. Crosble, Minister of Putilic Worki, Messra, Deverenx. M. J. Kennedy. Moare, Moulton, Parnons, Le Feavre, Currie, Higgins, Watioh (15): so it passed in the negative.

Whereupan the original motion for tie adoption of the report was put ant there appeareit for It: Rt, Hon. the Prime Minister, Hons. Colonial Secretary, Minister of Financo and Customs, C. H. Bmerion. J. C. Crosble, Mindeter of Putild Works, Mcaara. Deveroux, M. J. Kemedy, Moare, Moutton, Paraons, Le Féivre, Currie, Higatise Whtin (i5); and Bgitist it: Mesars, Kent, Lloyk, Coaker, Hallyanh, Stose, Targett, Winsor, Abbott, Grimes (9); mo it passed in the atfirmative and was ordered accordingly.

Wheroupon the Bill entitled "An Act to amend the law respecting the Inyportartoh of Thmtior" was raid ia firat time and it was ordered that it bo raad an seoond time on to-morгож:

## REVENDE BTLL

Purauant or order and on motion of Hon. Minister of Finance and CuHtoms the Bll entiled "An Act Further to amend the Revenue Act 1905" was read as sacond time and it was ordered that it be referred to a Committee of the Whole Hoise on to-morrow. TEATN FERRY SYNDICATE, BILL.

Purauant to order and on motion of Fit. Hon, the Prime Miniater the Bill entlited "An Ast to amend 4 George $V_{1,}$ Can. 6, entitled "An Aet respecting the Newfoundiand Rallway and Train Ferry Syndicate, Ltal." was read a
second time and it was ordered that it be referred to a Committee of the Whole House on to-morrow.

## MESSAGES FROM COUNCIL.

Mr. Speaker informed the House that he had recelved a message from the Legislative Council acqualnting the House of Assembly that they had appointed a Select Committee to cooperate with Select Committee of the House of Assembly on the subject of the Bill entitled "An Act to Regutate the Employment of Men engaged In Logging," and that such Committee consisted of the Honourables J. D. Ryan, J. Anderson, J. Harvey, M. G. Winter, W.C. Job, P.T. McGrath, and John. J. Murphy.

Mr. Hallyard gave notice of motion.
The remaining Orders of the Day were deferred.

It was moved and seconded that when the House rises it adjourn until this afternoon at three of the clock.

The House then adjourned accordingly.

FRIDAY, May 28, 1915.
The House met at three of the clock in the afternoon, pursuant to adjourament.

## QUESTIONS.

MR. PARSONS asked the Hon. Colonial Secretary for report of Harbor Grace Water Co, the amount of water rates collected in $1914-15$ and expenses; also, to ask a report of the Marine Dock Co., Ltd., for the year 1914-15; also, if any property acquired, the amount paid for same, and to whom; niso, to aak for a report of the Harbor Grace Industrial Society, the amount of twine given out, how much knitted, and returns for same.

HON COLONIAL SECRETARYMr Speaker, in reply to the hon. member, I beg leave to lay upon the table of the House the report of the Marine Dock Co. of Harbour Grace: also a statement regarding the Harbour Grace Industrial Society. I beg
teave to lay upan the table of the House, additional information asked by Mr . Stome: the poor rellef In the distriet of Trinity. Also the reply to a question asked by Mr. Targett.

## SUPPLY.

The Chairman from the Committee of the Whole on Supply reported certuin Resolutions which were read a first time as follows:

Additional Estimates, $\$ 89,415.00$.
The said Resolutions being read a second time it was moved that the House concur with the Committee therein, and the said Resolutions were agreed to.

## WAYS AND MEANS.

Pursuant to order and on motion of the Hon. Minister of Finsnce and Customs, the House resolved itself into Committee of the Whole on Ways and Means.

Mr. Speaker left the Chair.
Mr. Parsons took the Chair of Committee.

Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had consldered the matter to them referred, and had passed the following resolutions:-
"RESOLVED:-That towards makfing good the supply granted to His Majesty on account of certain expenses of the public service for the financtal year ending June 30th, 1915 , the sum of $\$ 165,120.97$ be granted out of the Consolidated Revenue Fund of the Colony.
"RESOLVED:-That towards making good the Supply granted to His Majesty on account of certain expenses for the financtal year ending June 30 th, 1916, the sum of $\$ 2.351 .104$. 87 be granted out of the Consolidated Revenue of the Colony.
"RESOLVED:-That a Bill be introduced to give effect to these Resolutions."
On motion It was ordered that this

Repart be mowirnt and aboptel, and that leswe ber eranted for the IntroTuir tow of the satt timL
ptenta survice bits.
Wherrupoe the Bill entited; -A s Act for the manting to Mis Majeety
 eertatn expenses of the Patille Serr. vino for the finanelal years andine resoectiruly thin 30th dar of June 1915. कuit the tothi this of Jamm, Thtt, inht for ather purposes relating to the PabHe servien" wan introduced and rent a first time, and orifered to be ront a fimbond time on tomorrow.

## Mr. Apesker 1tft the Chair.

Mr. Pursonn took the Chatr of Cum: Eiftrae:

RT HON. PRIME MINISTER3ir Stpesker, wis I have explatned to the Ifrom atrrats, shie bill le merety sur the parpose of exteatine the Nrt. But of the entednent surt, कn that the war will wat by countat as mapntor in in time limitied in the sriginat art. Ihnoumale necmbers = II remember the nature of the sat Thte smess. zuist merviy proyides that sbe time to be computed in weetipn 4 of the titl ratting upoin the Company to operate

Within three years shall be extended so that the wur shall not futerfere with It. In other words, the time is to run as if it began after the war. Under section 12 the Company was given the right to import mnterial for construction of the rallway for 20 years, duty free. This time ia now to run from the conclusion of the war. The same thing is true about the sections 16, 17 and 19, under which certain rights are to run for terms of yeara.

This amendment now provides that In the computing of time for the conclusion of the railway, in the act 4 , Gea. 5, Cap. 6, and sluo the times limited under sections 12, 16, 17 and 15 the time from Aus. 4th last untll such time as a proclamation shall be issued stating that a state of war no longer exists, shall not be counted.

Mr. Thompson has asked that this be done, and be has associated with him ueveral prominent people, amongst others a prominent man on the Fisherles Board of Scotland, Provoet Smith, a member of the Department of Fishuries under the British Government, and a member of the Fisherfeas Board of Scotland. It may be that Mr. Thompson may be able to induce this man to come here and bulld the railway and take up this question of fresh fish and ether matters. I think that the request is a very reasonable one because he can do nothing in the way of ralsing money while the war lasta.

Mr. Speaker resumed the Chair
The Chatrman from the Committee reported that they had considered the matter to them referred, and hall passed the Bill without amendment.

On motion it was ordered that this Report be received and adopted, and that the BIII be read a third time on to-morrow.
ERPORTATION OF TIMBER BILL.
Pursuant to order and on motion of

How. Minlster of Ftnance and Cus: tomb, the Bill entitled: "An Act to pimend the law Respecting the Exportation of Timber," was read a second Hime, sad it was ordered that it be referred to a Committee of the Whole Honse on to-norrow,

SALE OP CODFISH BILL.
On the motion for the rocond read. Ing of the Legtslative Councll"s amendments to the Sale of Codfish Bill. Mr. Morine proposed the following am-endment:-
"That the amendments be not read a second time but that a message be sent to the Legislative Councll to communicate the rensona for disagreeFing: and that the Premier, the M/nIster of Marine and Fisheries. the Leader of the Opposition, Mr. Coalsbr, and Mr. Morine be appointed a Committee to draw up such reasons."

MR. MORINE-Mr. Chairman, in Felation to the Bill now before the Chair, I move that the House return Ehase amondments to the Legislative Council, stating that the House cannot agree. I think that I shall have no difficulty in persuading the House that that ought to be done. Seotion 2 provided that one of the persons appofnted should be tho President of the Newfoundland Board of Trade, and another the President of the Fishermen's Protectlye Trion. The third to be appointed by these two. The Upper Honse sabstituted "Flinh Exporters of Newfoundland" in place of "Board of Trade" We have not giren suyone the authority to say who shall be considered exporters. A minJority of fish exporters can select a person at that meeting.

The Board of Trade is an incorporated body, but the Fish Exporters have no existence as is body and no authority, not being of a corporate character. Then on the other hand looking around for some corporate body that could be said to represent the Interest
of the mellers, 1 flized upon the Prespdent of the F.P.1: bot he I masured the- Houne for partian purpones liut becasse it was the oaty tiscorporsted boaly that mutelit be sald to mpriseat the interest of the seiters. There are alt mortis of mocleties in Nem tinutland tur oflter porjobes; thiat there was an trade eorporation that firently repreburited the flating chans that 1 contd. fis upon except the V.D.t., and my olject was to have two siliea-itie merchants on one side and the fishermion on the othor. Now the Councite' amendtronts provide that the second tuember of the Board ahall be appointed by the sutport members of this House as directed tiy the ffouse. Now whit power liss ithis Howise to dfrect that anything shall tee doue by the outport members. In the secout place what ts an outport member. If I tive In Cxtalinn or any othur jhare I sup pont if am an owtport metaber. We in this Colony wae that phrnse to mean peopte potalite of \#H Jotin'z. Ix not the member for St. Johmr Kiant an oatport memher in relation to the town of Torbay; anit has lie not a irviat deat mote to to with the finhery down on Labrader than the mumher for Portune Hay. I cannot soncetve uniter whint procuss of reat onitig the member for Burgeo and La Poile und the member for Fortune Hay and the membor for Bt: Georgea are to select the mets to sotule the pitied of thin on the Lahrador, with wluich the peopte of the Eant Coast are particularty concerned, while the itr memtern fir st. Johns mat ant Weat are ahut out. 1 think that this is a mareastion that vould moly ortirtaute is par House of Lamts. There corfatnity seems to tie atruins thicrimr Ination akainst the City members. They are mot thousht fit to aelset a member of thie Bourd. Then I fook at the portion of thie Trowie of Lords that rebelled against the Proaldent of the Fishermen'n Eninn. They had no

Houbt of the progriety of redacing the whole matter to a petitical guestion letween the outpart representatires fin this House. We must gat together A ibernl and Tory members and give i poltitul aspect to the whole thing. lastead of letring the finhermen be Fopresunted by the only fishermen's hrganitation tis the country.

My Hill winhed no infuatice and caanot while the Board of Trade and the FPTH, appofited is member each, and the thitrd was selected by these two by the Suprome Court.

The next thitug the Lords do in to deal with Section 7. That Section provided for two posalble contingoncles. If elther party failed to appotat un arbitrater, applicatlen could be made fo the Court: and if the Board was appolnted und fafled to mame a prico. an appllication corald be made to the Court for that purpose Now the learned sentlemen above have struck out the richt to make application to the Boart for the appointment of one or sther of the arbitratars. 1 do not know s.by, I vuppose they do not know themantren Under the amended hill, It the fish exporters or the memborm fail to make an appointment, no appllcatton can be maide to the Court at all, und the whole matter utterly fails. Under the Aet as it went up the Supreme Court had power to make a price wherw is Board had been appotnt. ed and had failed to make a prien: and if the partien failed to appaint a Foard the Court could do as, and it that Hoard failed to fix a price the Court could fix one. But there had to be a Board and it had to fall to fis a prico betore the Court could fix fan Now the learned reatlemen above have alisolutels strickes out the rieht If the Court to appoint an arbltrator. fuld you cannot have a Bourd to fall; and it is the falture of the Board which gives the Court power to fix a price The emnsaquence is that the

Whole thiog wil be bung wip hy the tallure of elthin party to wame an arbitratur, unt the whole ser will be cutwe vath ;-pirs

Now the nowt mintier is thlat Ele ties 3 gave fie Cuars of the Bount tho samp powto to matorco itit ht tealatice of witauses and then evic: eace an is siven to Uomminimimerst uniter cur F'abtic Inçuiries Act. This in a umivermit muly every Doard of Inogulry in the vorld. These Bentiemen ere so afruld of enquiries into thoir attairs that they lave shimotumby stitikem od of flife IIII the right of the Board-constituted either by the supression of this House ow the one hind or the Buprome Coult की the कीthir-to रोtा \#thneska or send tor linoks or take evidence or wayithing of that timd. New, Sir, for thrse rensons my motion Io muide 1 centr wish to say two or flitee wohts la thie way of commont epoit sotme of the reazoma gfvent in anether place for appostition to this fiti. In the whole debate for the Horane of Toonde shle Bifl was miereprenented. eifther because it wha misunderstood. ir becrase it was opposed I to not love whltch. I nocept the lidea that it тй mikunderstaod, becines member afler membet got in in the Upper House and complained saginst the wnfalmes of mxing by a will the price a man would have to pey for flish. Now this hill dones mot fix a price. It tions not aim at the fiaing of at price. It leaves it guite open to the bayer ind wetter to fix thuir own price. It only requires that the bugir and selt. Ir whall tix a price. I take it that the iniole effect of thes Biml would be to fay to the buyer and sefler "make four own sarreament, and make it in fiefinitu terma it yon minken it in indiffrite or deceptive terms that are tulculated to decelve, this Boant shall Hive the rishe to fir a fair setce" Now this iw guith clear from the Bill itself. ont yat man after man. futeltigent turchants. infembers of the Tpper foush wet up is their places ant opquese the bill birterly berause it tixes the jorkee witich is man must pay for finh Thicy tell the worlit at
large how much they have lost in the Labrador fishery, deplore the condition of this industry and say this Blll will mate it worse. The only thing this Ball does is to let the seller know whes he is soing to get inr lafe rish if wa doos not make a descrein or if the ma guin 18 in indef inte terms. The BHI is for greator certainty, for greater fairnuss, for greater confidence between the buyers and sellers between the fishormen on the one hand and the merchant on the other. That is what is needed in this country. The gentlemen who opposed this bill are principally entlemen who have made a great deal of money out of this industry. They get together at a hole and a corner meethig and fix their own price, which they will give the fishermen. Phey try to make up one yoar what they liave lost in another, because we have evitience this year these men in the fish business have sworn that they paid the current price thif year which was fixed at a rate that allowed them to make large protits and they justified these profits because of the loss os they sustained last year, even though the profits this year may be made from different people than those upou whose account they met the loss last year. The menl who have done these things for years past are now taking the position to continue the same class of operations and the result will be that if it goes on much longer the Labrador fishing business will have to be conducted as a Fishery Department of the Goverament in the faterests of the whole people. The fishermen will have to be protected. Their catch will have to be iaken from thom and reallsed by the Government and the proceeds divided pro rata amongst the people who caught the fish after the raturn comes in because if on the one hand the merchants are continually losing money and if on the other hand the fisher-
men cannot carry on the industry under the present conditions the only thing left will be to have the business carried on under Gaverument control and have the profits divided amongst the people entitled to them.

Then one prominent member obJects that this Bill imposes an im. proper duty upon the Supreme Court. Now, Sir, if we had in this country a Public Utilities Board or a board of that kind that they have in other countries then matters of thif nature may be dealt with by such a board, but as we have no board of that kind and as we have to make the best use of the means at our command the Supreme Court is the best body we can get to deal with matters of this kind after the Board bas failed to fix the prices. The Supreme Court of the Colony is not a hard-worked body. It is composed of men who have the confidence of the country. It is composed of men, who, although lawyers, are yet well versed in the public and commercial affairs of the country. It is a body that is accustomed to taking evidence and examing information and I refuse to admit that the Supreme Court or any of its Judges have any right to object to duties of this kind being imposed upon them. I don't know any body that 18 more capable of dealing with a question of this kind in the publie tnterest; and it must be remembered that it was only on the failure of the board to fix a price that the Court would have to do this work at all. There is no reason why this Board should fall. I do not belleve that it will fail.

MR. COAKER-Mr. Chairman, I rise to support the position taken by Mr. Morine with reference to the amendments made by the Upper House, and I am strongly of the opinion that if the amendments were accepted the worth of the Bill would be destroyed. It would be a useless thing
and moperative and would not fulfil the purposes for which it was intended. One of the most surprising things in connection with the conduct of the gentlemen of the Upper House is the somerssult some of them performed in comection with the appolintment of a Board to fix the price. One day the sentlemen of the Epper House argued that clause was a fairly rood ong, and the titea of giving the Preafdent of the Board of Trade the Fight to be one member and the President of the P. P. U, another was all right. The neat day wo find them dfacusaing the same clause, and some one movine that the whole thing be eapsized, and nearly every man in the Upper House voted against what he had said the diry before Men who bad formerly opposed the clause on the other hand voted for it when the vote wis tateon that day How ean you explain conduct like that We cannot now have any conflidence in members of that House.

This BIII was brought in with the idea of creating greater confilifence between buyers and aellers in regard to the fabrator finhery, if you cannot extablish it Board on the lines augsented by thls Bill as if went from thil Houno all our efforts will be in vafin to create that conflidence. The men consider they liave not been treated fairiy in the pant because they have not had a say in the fixing of the pitce There has been is strong agitation around Conception Buy this pait four of tive years in relation to this mattor. Our Councils have taken the matter mio and have given it conaldorable attention-a great deal more attention than members of the Upper House Thas BIII was not brought in here after beins consferet is pew weeles or a few daya or a lew hours. It had been givan montlis of consideration by teiecates from Conception Bay who wore frtureated in the mattar, and they had gone into it in all

Its mepects and they arrived at the concluasion that this proposal would be the most satable for all concerned. Well our ifforts to improve present tonditions will be in vain if we are to be blanked in everything by gentlemen of the Upper House. Conditions zunst change, They canniot continue ins they have bean going. Who is gofink to bring about this change, the busincar men or the Covernment. The buniness man certainly will not, is the Govermment going to do it. You cannot get a Government sufficiently united on a quention of this kind without bringing in politice or bringing in rersenal reeling. Camot we look at this thing from the standpoint of the community without bringing in polftices at all.
Another thing sumgested by the UDper House was that you take the power of being in member of the Board from the Prestlent of the F. P. U., as representative of the fishermen and place it in the hands of the members of thil Honse. How many men in this House are interested in the Labrador fishery? How many men In this House know Labrador fish from shore fish? The Conception Bay nembers are the only ones interested the this Bll to any extent. Thero are tery tew ment from Trinity Buy or Boniavisia Bay or Placentia Bay that हo to the Labrador. A great many of tue Botuvista and Trinity mon who go down there are hhore fiahermen. The Concention Eay men are the men who are most interented in this Bill and in the conditions which prevall In the Labrador fistuery. No district in the country is as much intorested fil these conditions as are the Concoption Bay districts Thipy know the conditions are intolerable. They know that in the puat they have had to take the pricen eiven them and that they knew nothling whatever about the fixfug of thint price. A man may say to tifs merchant "another man offored
mé four dollars and your are only giving me $\$ 3.60$," and his merchant would reply, "I am giving you what the majority of exporters say is the proper price and you muat take it." These conditions must change. The class of merchant who conduct the Labrador fishery at present are different altogether from their forefathers.

RT. HON. PRIME MINISTERMr. Speaker: Just one word in reply in support of this motion. We have sle listened to the earnest address of the hon. geutleman that has just sat down, and I would like to congratulate him upon his speech, which was worthy of him every way. It came from his beart, and I may say his sentiments are in thorough accord with the sentiments of us here on this side. The Bill which was proposed was an honest attempt to deal with the diffleulties that have heen existing throughout the Island for years. It was regarded as auch hy every member on this stde. I can only regret that the Upper House has not been able to make this law. It was regrettable particularly as it did not take away the right between parties to fix their own price. Another thing is in relation to the effect of this Bill on the Labrador fishery, I may say that I regard this fishery 10 -day as amounting to a tragedy. I belleve I stated that when I supported the Bill last year. there was something Hike 90,000 cuintals shipped from the Coast, and it is gradually getting less every year, and it seriously affects the trade of the whole country. One of the chifer causes of the trouble is the uncertainty of the price of fish, a subject which has been causing incessant trouble for years in this Colony, 1 think I mentionod two casos where men refused to ship their fish when the shlps went down there. Now I repeat that I am sorry this effort did not meet with the approval of the Up-
per House. I can only hope now that when it message goes up to them that they will reconsifler this matter. It is a very momentous and important question, the whole trade of the country is affected and particularly Conception Bay.

It has been pointed out by Mr. Coaker that the peopte of Conception Bay are poor but I think he will find that some of the people on the north side of Conception Bay have as large bank accounts as any fishermen in the country. In that way alone they own over something like a million dollars in the Bank of the country, which is a large amount for Conception Bay.

MR. KENT-Mr.Speaker: I must say that I most thoroughly agree with all that has been sald in relation to the amendment made by the Councll, but I think it were better that this BIII should wait yet another year rather than let it go through in the condition ft is in at present. I may say that this wns what I regarded as a fair remedy required by conditions which exfsted on the Labrador and in Conception Bay; and it was one which I think should have presented no difficulty to the Council. It was made in the hope of establighing the current price of fish and definitely to fix that which was uncertain, and everyone is aware of the difficulties that this question has up to this present time presented to the country. I think it is imperative that these conditions should exist no longer, and some means ought to. be provided wherehy a romedy mieht be effected.

As regards the means for selecting the representative Board for the fixing of the price of fish, the substitu tion made by the Legtalative Councll is, to my mind, very absurd. I think the members of St John's east and west ought to feel flattered to be left out of that, because it appears to me
the only object of tntroducing amendments is to better the original bill. As it ntands however now, it can be onty regarded as unworkable. I think the only thing we can do would be to refase to accept their smendments, for It would be better to have the Bill thrown out altogether than let it pass in its present form. Personally It think it would be better to reject the BII in the form now proposed, for it would only tend to make conditions worse than ever. If the Council still adhere to their poaition, we shall have to let the measure remaln over until next sessifion when we come up again. The Legislative Councll cannot always throw out our Bllis; in the long run they will have to accept them. I think the motion put by the hon. member for Bonstista is a fair and proper one for us to aet upon.

DR. LLOYD-1 would like to add Just a wond to express my concurrence with the motion before the Chutr. I was plessed to hear the Leader of the Government give his assent to the proposition now before us, for I consider that it would be unworthy of this Houee in any way to concur with the pmendments made by the Lesialative Conncll. For they are unreasonable, and absolutely illogical. The machinery for appointing the Board is wirworkable. They have not provided any means for this Board to carry out their suggestions. You will notice in the first place, the Board has given the power of flaing a price in case the party do not fix it, but the means of obtaining the necessary data is absolutely not touched apon. This is taken from the Board but given to the Supreme Court. The Supreme Court has a power, but the Board has not. It in si fnsult to be asked to concur In a measure as illogical and absurd in (thil. I think we ought to give of blank refusal to accept these amendments.

MR. PARSONS-I teel if I did not rlse to expresis my sentiments as the repregentative of a part of Conception Flay, 1 should be actiak not quite fair. If to the peopte I represent. This Bill la one of the questions that luas been before the people of this country from time to time in many forms, and I may say that I was very glad when I realised thet this mession would see a direct attempt towurds a matertalization of the steps which were considered necessary to constitute our firat lesgislation in this matter.

And this bill in its original form did not call for any unreasonable thing as far as I can see. There were some who thought that thle bll was going an unreasonable distance, but is far as 1 can see the proposals are very reasomable. There are cases on the Labrador every year where in order to get awny a steamer cargo twenty cents a guintal is offered in ndalition to the current price so is to hurry up the cargo and save demurrage, and there were sotne people who thought that thle bill might interfere with that but 1 think that the tenor of opluion is that the bIII is reasonable: that it will be a settlement of a problem that has been agitating the poople of Conception Bay for sometlme and I think if it passed In its original form it wonld be a very good bill.

MR. GRIMES-3fr. Speaker, I wish to agree with the remarks of the honcorable member tho has just sat down in regara to the interest that is teen manifented in this bill, partienlarly by the people of Conception Bay 1 represent one of the districts of Conception Bay and know the finterest that they have taken and the attitude which they have assumed towards the bli, and I feel as If I would not be doink rimy duty if I did not add a word in regard to the amendments made by the Upper House- It is certain that in sending back the bill with
these amendments if we accept them we would only be making the labrador flishery worse than ever. The bill was introduced for the purpose of meeting eases and providing machinery for fixing the price of fish and in order to bring back confidence in the minde of the fishermen towards their merchants,and we find the Upper House interfering with a bill for thls purpose when they know that there has been a great lack of confidence for a number of years. In introducing this bill one of the hopes of the party was that it would revive the interest in that fishery on the Labrador which of tate years has bean decllning. It will have the opposite effect if these amendments are passed, and I wish to agree with the honourable introducer of the bill and all the other members who have spoken upon these amendments in stating my opinion that these amendments cannot be accepted and that the only bill that should be permitted to pass would be the original one as it was introduced.

MR. MORINE-Mr. Speaker, 1 have bean drafting an amendment and I find that in order to comply with parliamentary practices it will be neceasary to alter my original proposition so as to give the Legisiative Counct! the chance to withdraw from the position that they have assumed. My motion will, tharefore, be that these amendments be not read a second time, and that a message be sent to the Legislative Council saying that "This House is unable to accopt the amendments they have proposed and that the Prime Minister, the Leader of the Opposition and myself be a committee to draw up the ressons for our inability to accept the amendments". That will allow them to withdraw from theso amendments without throw ing out the bill. If we refuse to pars these amendments we would have to draft the bill again. I ask that this
resolution be accepted in the form that I now propose it.

On the amendment as proposed being put it was carrled; and it was ordered accordingly.
RAILWAY LOAN RESOLUTIONS.
Pursuant to notice and leave grented, and on motion of the Hon Minis. ter of Finance and Customs, the House resolved itself into Committea of the Whole to consider certain Resolutions in Relation to the raising of a sum of money by loan for the extension of the Rallway Syatem of the Colony.

Mr. Speaker left the Chair.
Mr. Parsons took the Chalr of Com in ittec.

HON MINISTER OF FINANCE A CUSTOMS-Mr. Chairman, this Act is the same as the Act of lazt year with the exception that the interest on the money ralsed is four per cent. It will be remembered that the Act introduced last year wan fos a sum of $\$ 2,000,000$ to complete the rilfway branches, and when the Premier went across to London he was advised by his financinl agents there that our per cent inscribed stock was more ac coptable to the people than three and a half per cent, and that the amount of money recelved from a four per cent loan would be so much greater than that received from a three and a half per cent, that it would practically off-set the difference in interest. We all know that last year Just about the time that the Prime Minfster went across to England the money marketa all over the world were very short. and it was very difficult to ralse any money at three and a half per cent. so ho dectded to raise a temporary loan of $£ 1,000,000$ to carry us over last year. and to take the advice of the financial agents as to the four per cent. loan instead of the three and a half. The difference of a half per cent in the interest, as the House
knows, was provided for in the Estlmates brought down a fow weeks ago. The matter was then fully alscossed and all the explanation that was necessary was kiven. All the papers I think were tabled at the time and any information asked for by honorable members on the other side in the nature of correspondence in connection with the amoments rassed by the Premfer last year was tabled. If there lis any forther information that the House requires I shall be glad to furnish it.
MR. LLOYD-Mr. Chairman, if my memory serves me right the only information that we had was certain advice siven by the financlal agents twelve months ago as to the condltoons that were provalling then, That advice was that a four per cent. loan was more attractive and that the pubHe were expecting four per cent and that a four per cent loan would give more money in proportion than the difference between three and a half and tour per cent. That was the attractive feature. Acting on that advice the Premler did not proceed with the floating of tho toan, 1 almo wish to ask whether up to the present time there has been any correspondence In the nature of adrico from the same fimanctal agents as to the present conditions, and as to whether the rate of interest there is being offered now under tho new conditions will be sufflefently attractive to raise this loan.

RT. HON. THE PRIME MINIS. TER-Mr. Chatrman, 1 am very glad to give all the information that is possible. As to the conditions that exist now. I may say that there is no money belng raised at all. The British Colonies are not making any loans in Eag. land at the presont time and we have no correspondence apon the condtions.
MR. LLOVD-I have already discussed this matter betore and I do not
fintend to go into it at any length now, but I wisk to make clear to the leader of the Government that he is absolutely in ecror fin reference to the question of no money belng raleod in London at the present time. Loans are belug flonted, I have clippinga here showing that a similiar loan to thin was recently raised by the Victorlan Government within the past few weeks. They offered four and a half per cont. for a loan extendins from 1920 to 1925, and they issued two and a half million pounds, that is $\$ 12,000,000$. Now 1 have nnother cutting stating that the loan was a suecens. The Candilin Government has floated a loan at four and a hulf per eont. at $99 . \mathrm{I}$ am only siving you Hinge two instances of large loang which are belng ralsed at the present time. The point of $m y$ question was as to whether the Government had recelved any advice as to whether it wero better to offer four and a half per cont rather than four?
rt, hon. the prime minister - No, nothing has been done, except that the temporary loon is being continued at Bank rate of interest.
Mr. Speaker resumed the Chair.
The Chalrman from the Commilttee reported that they had considered the matter to them referred, had passed the Resolutions without amendment. and recommended the introdnction of a bill to give effect to the same.
The House went into committee of the whole on the public service loan.
On motion this regort was recelved and adopted, and the Bill entitlet :an Aet for ralsing a sum of money by loan for the extenslon of the Railway Syatem of the Colony' was introduces and read a first time, and it was ordered that it be rend a secona time en to-morrow.
PUBIIC SERVICE LOAN RESOLUTIONS.
Pursuant to notice and leave grantod and on motton of Hon. Ministe: of

Finance and Customs, the House resolved itself into Committee of the Whole to consider certain resolutions In relation to raising a sum of money by loan for the Public Service of the Colony.
Mr . Speaker left the Chatr.
Mr. Parsons took the Chale of Committee.

HON. MIN OF FINANCE AND CUSTOMS-Mr. Chairman, this loan of $\$ 500.000$ is intended to earry us over the anticipated defielt at the end of the fliseal year. 1 think this lras been fully outlined already by the Budget on Thursday Inst. It is intended to obtath a temporary lonin to pay off the detielt which is represented at $\$ 516,000$. The loan bill now proposed is a short one in point of years and it is expected that in ten years provision will be made to pay off the amount. It is expected that within the ten years normal conditions will have smified agath, and out of surpluses from time to time we will be able to pay back the amount. The several debates of the House have shown that we have had surpluses within recent years amounting to $\$ 1$ 000.000 . We hope to get back to that position again, and when that poaition is arrived at it will be easy to dispose of $\$ 500,000$, that we are asking for by a loan this year. I may say that I have already arranged with the Bank of Montreal to get $\$ 500,000$ at five per cent. It is the lowest obtainable rate to-day and I think we are Jastified in accepting it. The amount of $\$ 25,000$ for interest has already been provided cor in the estimates tabled a few days ago. There is no other information to be given and if there is anything required I shall be glad to furnish it.
Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had consldered the matter to them referred, had passed the Riesolutions without amendment, and recommended the introduction of
a. Bill to give effect to the same.

On motion this Report was recoived and adopted, and the Bill entilled 'An Act for raising a sum of money by loan for the Public Service of the Colony" was introduced and read a first time, and it was ordered that it be read a second time on to-morrow.
PUBLIC PURPOSES LOAN RESOLUTIONS.
Pursuant to notice and leave grantod and on motion of the Hon. Minfster of Flance and Customs, the House resolved Itself Into Committee of the Whole to consider certain Resolutions in relation to a temporary loan for Public Purposes.

Mr. Speaker lett the Chair.
Mr. Parsons took the Chair of Committee.
Mr . Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered the matter to them referred, had passed the Resolutions without amendment. and recommended the introduction of a Bill to give effect to the same.

On motion this report was received sind rutopted, and the bill entitled 'An Act for raising a temporary loan for Public Purposes' was introduced and read a first time, and it was ordered that it be rend a second time on tomorrow.

## RULES SUSPENDED.

Pursuant to notice and leave granted, and on motion of Rt. Hon. the Prime Minister, the Rules of the House were suspended in relation to all matters now before the House or to come before the Hoase.

## MOTION FOR SDLECT COMMITTEE,

Pursuant to notice and leave granted, Mr. Halfyard moved for the appointment of a Select Committee to enquire into and report upon the expenditure of looal and main line road grants and spectal grants. In and about Victoria Village, in the District of Carbonear, on appropriations made In 1913 and 1914.

MR. HALFYARD-1 might an well state the circametances of this enguiry: I was asked bo several anembers of the F.P.E. Council of Carbonear to ank for the returnin from the ruttle Worke Departmant, tor Vletaria VIIlage for the last year, I dlul this, and I find that there are down here paymimte to cortatn tinatituaits of Chat place who recerived no paymants. One tuan is dowa here. Mr. Clark, in reeufving \$\$00. This man to prepared to \#wear tint mttativit thilt he iftit not wirk for or fet this menay, For this reanoti 1 thoucht it would be well to ank for an enguiey.

RT. HON. THE PRINIE MNISTET -i wevid augrest to the hon. messber that lustead of sending a commlssloe of legairy the oustpart Inspectar
 ahout ihs can pervaually. This is the first 1 trave heard of it.
MR. MORINE-Myght I ofter is was gostion. Perhaspe. Mr, Haligant will nitbitaw hie request anid the Governmant ank the Aaditue-Gentral to hold en Entetry. Aver that then AndttorGenerat ran commumicate with the ham, memben difeet Mr. Haltyard ran Ifiew the Aufitar all the informaHion at his diswoes! and wo help tirve this mister floxed up as soon as bor witle.

MR. HALFYARD-lin Fiew of thene Fisferntions, it would aik leave. Mr. Spenalies, to withdraw my motion. I whe that the Governimnat ank the Aadb Im-anemit to hofit an emiqutry abd rimisuntrate wefti me altect.

MR. COAKER-With regard to thls mester, Mte, spenker, 1 wodld esy that the -hel- is a ters rontoun thing tridend. At fosist tweenty mea have remimuitated to tae that their namen ura down there lacorrectly. I would utwomety ttren that the toc canffrittint bid 3 stiff ene, so that the dellnquente may he atopped in their work. Thin thing has heell gelag on for the past 10
goonths, and I hope that the Governsaent will nee that jastice is done fm. sindlately.

The sald motian, with leave of the troure. was withdrawn.

## PETITION OF BIGHT BIL.

M- Kent, on behalf of the Select Eommittee, preseated the following zemort-

The Sefect Commirtee to whieh wan rnforred a Fill, entitled tAn Act Fenpecting Procendinger Against the grown by Pettion of Richt.' have conFidered the matter to them roferred, and beg to roport the Bill hersto atrfexed and recommend its adeption by the Hause
Si. Jotin's, May 29. 1915.
(Sel)
J. $\mathbf{3 .}$ KENT,

W, F. HOYD E P. MORATS, ALPAED B, MOHINE CHAS. H. EMEREON:
On motione, thls report was recelvel and adopted, and it was oritered that En Bill entitied Am Act Herpecting Procentings Against the Cruws by Petition of Bight,- be reterred to a Commitive of the Whole Housic on tomorrow.

Mr. Hallyard ante notine of anesHon.

Mr. Kent geve notice of quastion.
Mr. Whasur gave notice of question.
ft wais moved ant seconited that when the House riges it adjourn un ti Manday nest. May 31et, at three of Ine clock in the afternoon.
The Hause then midjourned acoordHus.

MONDAY, May 2ist, 1915.
Tha House met at three of the clock in the afternoun, pursitiatit to adjournment.

## QUESTTONS.

MR. HALFYARD asked the Minis ter or Pubtic Works to lay on the table of the Houne coples of the returas of
all local road granta, and apecial grants, for Chapel Cove, Hr, Main Dis. trict,for the years 1913 and 1914, If any money was sent to Chapel Cove in the fall of 1914 to repalr washouts, to give a detaifed acount of expenditure of same.
MR. KENT nsked the Hon, Minister of Flance and Customs to lay on the table of the House a statement, in detall of Fines and Forfeltures recefved by the Government from July 1. 1913, to date, and of the appropriation thereof.

MR. WINSOR asked the Hon. Col. Secretary to lay upon the table of the House a statement showing how much coal was supplled to the Court House at Greenspond; aleo, the Magistrate's dwelling house, for the years 1910, 1911, 1912. 1913, and 1914, and price per ton.
HON. COLONIAL SEGRETARY.Mr . Speaker, answers to questions (1) and (2) are in preparation. The third question should be addressed to the Public Works Department.

MESSAGES FROM COUNCIL.
Mr. Speaker informed the Houso that he had received a message from the Legislative Council accuanting the House of Assembly that they had passed the Bill sent up entitled "An Act tor the Contirmation of an Agreement with the Newfoundland-American Packing Company, Incorporated" without amondment.
Mr. Speaker informed the House that he had received a message from the Legislative Council sequainting the House of Assembly that they had passed the Bill sent up entitled "An Act Respecting certain Retiring Allowances" without amendment
Mr. Speaiker informed the House that he had received a measage from the Legislative Council that the Leg. islative Council were pleased to subetitute the name of Hon. Mr. Bishop in place of Hon. Mr. Murply to act on the Select Committee in conjunc-
tion with the House of Assembly upon the Bill entitled "An Act to Remulate the Employment of Men engaged in Logging,"

Mr. Speaker intormed the House that he had recelved a message from the Leglalative Councll acquainting the Houre of Assembly that they had passed the Bill sent up entitied "An Act Respecting the Bank Fishery" with some amendmente in which they requested the concurrence of the House of Assembly.

On motion of the Rt Hon, the Prime Minister the said amendments were read a first time and ordered to be read a second time presently.

Whereupon the said amendments were read a second time and concurred In , and It was ordered that a message be sent to the Legislative Couneil acquainting that Body that the House of Assembly had passed the said amendments without amendment.

SELEOT COMMITTEE REPORT.
Mr. Morine presented the following report:-
"Mr. Speaker:-The Committee appointed to draft reasons for the refusal by the House to assent to the amendments by the Honourable the Legislative Council on the Bill sent up from this House for the concurrence of the Council, entitled "An Act Relating to the Sale of Corffish on the Labrador Const" beg leave to report as follows:
"The amendments refer to "fish exporters" and "outport members" of the House, but contain no definitions of sald terms. They provide for certain action by such outport members under the direction of this House, and the House has no authority to direct. They would create partisan political differences in relation to a matter which eliould not bo treated In a partisan mamner.
"The provislon for the appointment of members of the Board by the Su preme Court or a Judge thereot is stricken out of the Bill, by the effect
of one tumendment
The proposed Board is by another amendment deprived of all power to summon and exsmine witnesses on aath, and so left withont the means of suquiring necessary information.
"The provision that fees and expenses may be allowed witnesses will tend to make the work of the Board expensive: there is no prowisIon for imposing the costs on any person: if it be intended that it shall be borme by the Consolidated Revenue F'und, this House is the oaly one which can originate such a proposition.
"For these and other reasons, Your Committea are of opinion that the proposed ameadments would destroy the usefulness of the proposed meas. ure.
(Sgd.) E. P. MORRIS,
A. W. PICOTT,

ALIFRED B MORINE, d. M. KENT:

St. Jolin's, May 3L 1915.
On motion this report was received and adopted, and it was ordered that a message be sent to the Legisiative Coumcil in accordance therewith.

## RESOLUTION OF SYMPTAHY.

On motion of RL. Hon. the Prime Fttrinster, micounted by Mtr. Kent, the following resolution was adopted:-
"RESOLVED-That thls House desires to express its regret at the death of the Hon. James Baird, who for many years was a member of the Legislative Council, and that out of respect to lifs memory this House do now adfouri.
"RESOLVED:-That a copy of the Resolation be forwarded to the famtly ot the deceased."
It was moved and seconded that when the House rises it adjourn until to-morrow, Tuesday, June Ist., at four of the clock in the afternoon.

The House then adjourned accordingiy.

TUESDAY, June 1et, 1915.
The House met at four o'clock in the afternoon, pursuant to adjournment.
NEDVOUNDLAND BUHDERS ASSOCLATION INCORPORATION BILL.
Fursuant to order and on motion of Mr . Kent the House resolved itself into Committee of the Whole to consider the Bill entitied "An Act to Incorporate the Newfoundland Bulliers Association."
Mr. Speaker leff the Chnir.
Mr. Parsons took the Chair of Committee.

Mr. Speaker resumed the Chair.
The Chairman from the Committee reported that they had considered the matter to them reterred, and had pass: ed the Bill without amendment.

On motion this report was recelved and adopted, and it was ordered. that the Bill be read a third time presently.

Whereupon the Bill enttted "An Aet to Incorporate the Newfoundland Builders Aseociation" was read a third time and passed, and it was ordered that it be engrossed, being enttited as above, and that it be sent to the Leglslative Councll with a message requeating the concurrence of that Body in its provisions.

## MESSAOES FROM COUNGL.

Mr . Speaker informed the House that lie had received a message from the Legislative Council acqusinting the House of Assembly that they had sassed the Bilis sent up entitied respectively "An Act respecting the Grand Bank Water Company"; and "An Act to amend and continue in force for a further period the Aet 5 , George V. Session 1. Cap. 4, entitied - An Act Respecting a Volunteer Force In thls Colony" "; without amendment.

Mr. Speaker informed the House that he lad recelved in messago from the Legislative, Councl acqualnting the House of Assembly that they had passed the BIII sent up entitied "An Act Respecting the Seal Fishery" with some amendments in which they requested the concurrence of the House of Assembly.

On motion of Rt. Hon, the Prime Minister the said amendments were read a firgt time.

MR, COAKER-MT, Speaker, 1 have Just been looktag tirough these amendments, and I thlnk a tot will have to be cut out. I think the best thing to do under the circumetances is to have the whole reprinted. The origit. al on one side and the amendments on the other. In thts way it would be enaler to trace them.

RT. HON PRIME MINISTERIes, this is an excellent suggestion. I move that the second reading of these be deferred, and in the meantime we'll have them reprinted as has been suggested.

On motion the further consideration of the Baid amendmente was deferred.

Mr. Speaker informed the House that he had received a messaze from the Logislative Councll acquainting tho House of Assembly that they had passed the Bulle sent up, entitled respectively, "An Act Respecting the Nowfoundland Rallway and Train Forry Syndleate Limited": "An Act for Raising a Sum of Money by loan for
the extension of the Raflway Syatem of the Colony;" "An Act for raising a sum of money by loan for the Publle Service of the Colony;" and "An Act to provide for a Temporary Loan for Public Purposes" without amendment.

## PETITION.

Mr. Moulton prasented a potition from certaln owners of sealing steamers, protusting against the Sealing Bill now before the House.

NOTICE OF RESOLUTION.
Mr. Kent gave notice that on tomorrow he would move the following resolution,-
"That in the opinion of this House no sufficient justification has been stown or alleged for the fallure of the Government to have the Departments of Justice and of Agriculture and Mines represented in this House each by ita proper responsible Minister or for the appointment of the Ministers responsible for these Departments respectively to seats in the Leg. ialative Council."

MR. GRIMES 1 would ask the Prime Minister if any attention has been given to the petition from the women of the W.C.T.U.

RT, HON. PRIME MINISTER1 may say, Mr. Speaker, that this matter was referred by the Governor to the Government, and thoy decided to do nothing at present. The petitlon asked that our volunteers be prohibited from purchasing intoxicattrg Hquors.

Mr. Coaker gave notice of question.
It was moved and seconded that whon the House rises it adjourn until to-morrow, Wednesday, June 2nd, at three of the clock in the afternoon.

The House then adjourned accordIngly.

WEDNESDAY. June 2nd. 1915.
The House met at three of the elock in the afternoon, pursuant to adjournment.

Hon. Colonial Secretary tabled Reports of United States Officinls on treatment of British Prisonera of War and interned civilians at certain places of detention in Germany.

QUESTION.
Mr. Coaker asked the Hon. Mininter of Finance and Customs whether Mr. Walsh, the member for Placentia, was paid $\$ 1,000$ for services during 1914 in connection with the Customs Profective Service, or if any payment was made to Mr. Walsh by the Department of Customs.

## MESSAGES PROM COUNCIL.

Mr. Speaker informed the House that he had received a mussage from the Legislative Counell acqualnting the House Assembly that they had passed the Bille sent up entutled respectively, "An Aet furthor to amend The Revenue Act 1905", nnd "An Act for granting to His Majesty certain sums of money for defraying certaln expenses of the Public Services for the financlal scara ending respectively the 30th dny of June, 1915, and the 30th day of June, 1916, and for other purpases retating to the Public Service" without amendment.

Mr. Speaker informed the House that he had recetved a message from the Legislative Councfl sequainting the House of Assembly that they had nassed the Bill sent up entitled. "An Act Reapecting the Prohibition of the Importation, Manufacture, and Sale of Intoxicating Liquorn," with some amentments, in which they requested the concurrence of the House of Assembly.

On mution the sald amendments were read a first lime, and ordered to be read in second time presently.

## SEALING BILLL

On motion the House resolved itself tuto Cammittee of the whole to conalder the Legislative Council's smendments to the Sealing Bill.

Mr. Spenker left the Chair.
Mr. Parsons took the Chair of Committee.

MR. MORINE-Mr. Chairman, the amondment to Section 2 seems to be all right. My objection to it is that If is unnecessary.

RT, HON, PRIME MINISTERIt if not correct that the seals belong to the owners of tho sealing steamers?
MR. MORINE-No. That is so. I move to strice out "belong to the owners of" and Insert "shall be part of the voyage of" in section 2.

On the amendment being put, it was cartied.

On amendment to Saction 3.
MR. MORINE-I would propose that this be made "Terms which the minleter considera reasonable""
in Section 4 say "In Colony" not "In St John's."
Amendments adopted.
Iti Section 11, if you change the "of" to "not exceeding" then you ought to have a minimum fine; say $\$ 100$ or $\$ 200$. Under the present system a man may be fined ten ceats.

Amendment adopted.
MR. MORINE-On amendment to Section 11 as to fines, say "not less than $\$ 500$ or exceeding $\$ 1,000$." Insert after unlawful, "for the crew of any steamer,"

This brings up again the old questian of the three mile limit, and Sunday sealing. Make it illegal to bring in any seals so ktlted, no matter where they were kitted.

MR. MORINE Section 11. I suggent that the section read in this way: "It shall be uninwful for the crew of uniy steamer to kill any hoods beEween March 10, 1916, and May 2, 2919, or bring into any port in the Colony any hoods killed between the pald dates under a penalty of not less than $\$ 1,000$, to be recovered from the owner of such steamer by any person who shall sue for the same."

## Section 12

MR. MORINE- 1 think the section might read in this way: No seals shall bo killed by the crew of any steel whip prosecuting the seal fishery in any year after Aprll t5th, nor shatt any seals killed after the said date be brought Into the Colony by any ateel ship under a penaity not exceeding $\$ 5,000$ nor less than $\$ 1,000$. All such seals shall be confliscated, and the proceeds thereaf shall go to the Marine Disaster Fund.

Section 13.
MR. MORINE - 1 propose we dieagree to any amendment to the 13 th section.

The motion, on being put was adopted.

Section 16.
MR. COAKER-Substituting " 15 " for " 10 " would be very unfair. What steamer is going to trouble about landing her crew on the 15th April? It would be just as well to stay out untll the 30th. If it is to be of any benefle at all tt must be reasonable. After a vessel misses the seals-and they will know by the 2nd or 3rd of April whether they have missed the seals or not-the Captain will have until the 10th to make up his mind whether or not he is goling to come in. If you are not prepared to accept the 10th, it would be just as well not to have the clause in.
MR. MORINE-Compromise, mak it the 12 th .

RT, HON PRIME MINISTERYes, make it the 12th.
On motion, the amendment was adopted.

Section 1.
MR. MORINE-"After the word 'any" fnsert the word 'Captain.'" what does that mean?

RT. HON. PRIME MINISTERI presume, Instead of "person."

MR. MORINE-It is not in the 6th Ithe of manuscript. Some of the am-
mondments appear to have been num. berod from the printed bill, and some from tho manuseript.

MA. MORINE-The amendments to thit sectlinn can be agreed to.

RT. HON. PRIME MINIBTER1 think so.
on miothon, the amentments to Sec: tion 1 were adopted.

MR. MORINE-Then the only other onn fa section 10.

MR, COAKER-The chlet reason for putting In that gectlon wais to glve the cooks a clafm upon the services of the asisistant cooks: At the present time the asetetant cools are ordtnary memhers of the crew selected by the chlet sook to do thls work. Now take last epring. These nssistant cookn had to be up in the morning at 2 or 3 oclock and lad to work untll 10 or 11 at uffit and they gat un mure for thelr services than the men who wore in theit honice all day dotng nothing, and all wight wn well: and matarally men du not want this work. The object of the section is to give the chief cook the right to be able to commanit these men, hecause they will be shipped as anisistant cooks. It is In the fnterests of the owners an watt as the men that thin section lie put in. If the wervices of the men were not satisfactory, the owners would liave the risht to refluse to pay this amount; if the nervices were eatiafactory, they ought be very glan to pay It. This in a very importient sectlon, and would liave in lot to do with raling tha cooling a suecese,

MR. MORINE 1 wonld auggeat that we chamse that whole section, and go is tttue tift further than we went before, really. Put it in this way: "At the end of the voyage the chilef eook shall the patit a bonius of $\$ 20$, anit the asifitant cooks a bonus of \$15 each" -strilke oat the worils "by the owner of the ship," beeause it comee out of the voyard-"untesif the wark tias been inefficient.' That woutd enttite
the men to sue for it before the Clourt and would eniftie the owner to show that efficient work had not been porformed. The men would have the right to make the clalm, and the ownEr would have to show that the work was not efficeent.

On Sectiona 5, 6, and 7 ns amented by Counclt.

DR. LLOYD-Mr. Chairman: I move that we do not consider this quention of the taxation of neators. That is an Invaston of the rights of the Crowa. becnuse na such taxatton should be considered by thils House unless proposed by a Minister of the Crown. I move that we do not enter listo the consideration of this amendment: the clauses 5,6 and 7.

The motion was agroed to.
Mr . Spenker resamed the Chatr.
The Chatrman trom the Committer ruperted that they had considered the matter to them referred and had pass. ed the ampniments with some amendments.

On motion this report whe received and sdopted, and the satd amendThents were concurred in. It was or Alered thint a measage be sent to the Lesialative Council acquainting that Eody that the amendments nent down find bean passed with some amentmentes, in which the concurrence of the Legialative Council was requented. PROHIPITION PLEHISCETE BHLL.
The Leglalative Councll's amendpontn in and upon the Bill sent up fntittet: "An Act reapectlus the Prohibition of the Importation, Manufactyre sud Sale of Intoxieating Liquors" were read a seoctul time and concurred in, and it was ordered that a mees pago be reat to the Legislative Coun(1) aequainting that Body that the amquiments had bern passed without amendment.

MESSAOES FROM COUNCIL.
Mr.Spenker informed the House that the thad mecelved a mesange from the

Legislative Council acqualnting the House of Asaembly that they had pasaed the Bills seent up entited respectively: TAn Act to Incorporate the Newfoundiand Muster Builderst Assoclation," and "An Act respecting Proceedings against the Crown"; without amendment.
PRODVETS CORPORATION CONtract bitl.
Mr. Speaker Informed the House that lie had recelved a message from the Legisiative Council acquainting the House of Assembly that he had recelved a messiage from the Leginilitfve Councll acyuainting the House of Assembly that they had passed the Bill sent up entitled: "An Act for the Confirmation of a Contract with the Newfoundland Products. Corporation. Lirmited" with some amendments, in which they requested the concurrance of the House of Assembly.
On motion of At. Hon. the Prime Minister, the sald amendments wore read a first tima

MR. MORINE-Mr, Speaker, I gave some attention to these amendments yesterday, and I have also discussed tham with members of the Leglslative Counctl, and with the Premier. The amendments proposed ure of no particuiar importance. except the that one, which is very objectionable. in my opinfon, It ts section 20. There is nothing in the Products Contract which krante water. It only grants those water powers which are not already ownod by somebody elee. It does not apply to the people of towns and settlements. The word "domestic" proposed is so extremely narrow. We mart remember that this is a perpetuat franchise which is being given, and the drainage area of the Humber is the most extensive that we haves. Thif umendmont kives the Company nil righti over the water. Therefore. Mr. Speaker, I have great pleasure in moving that these sections be accept-
ed. with the exception of the last, section 20.

It was orflered that the said amendments be adopted with the excepthon of the proposed new section 20 , which should be expunged, and that a message be sent to the Legislative Councll to this effect.

Mr. Speaker Informed the House that he had recefved a message from the Leginlative Counell, acquainting the House of Assembly that they had under consideration the message of the Honourable House of Assembly in relation to certain amendments mada by the Council in and upon the Bill gent to the Council, entitled: "An Act relating to the sale of Codfish on the Labrador Cosst", and in reply beg to state as follows:-
(1) Labrador fish exporters are a wrell known and recognized body of bualness men in this country and the term or phrase "Labrador Fish Exrporters" is, they submit, a sufficient definition. The plirase in the amendment, "The members of the House of Assombly who sit for outport districts" defines clearly all members of the Gonse of Assembly who represent Districts in the House of Assembly other than those who represent the Dlntricts of SL John's and West.
(2) The Council regret that they cannot agree with the contention that the effect of one amendment takes away the power of the Supreme Court or a Judge thereof to appoint members of the Board.
(8) The Council submits that it is not necessary to give the Board powor to summon and eximine witnesses on oath, ull facts neceseary to enable the Board to fix a fair and reasonable price for fishli shipped off the Labrafor Const when no prive is agreed upon, can be obtafned. To give a Board constituted as it will be power to exumine books of account, business dealings and other like transactions con-
neceted with the aale of Labrador codfish would not be conducive to the successtul earrying on of trade and business, and is Invidions and objectfonable.

The Councll has no objection to rescinilling tie amendment in retation to fees and expenses.

For the reasons stated the Councll is of opinion that the amendments made to the Bil do not destroy the usefulness of the proposed measure, but are in many respecta recommendations aimilar to those of the Commissioners on Fishery matters:

On motion of Mr. Morine it was ordered that the sald message be considered thils day six months.
RESOLUTION RE DEPARTMENTAL HEADB IN UPPER CHAMBER.
MR. KENT moved and Mr. Morine seconded the following Resointion:
"That in the opinion of thts House, no sufficiant Justification has been shown, or alleged, for the fallure of the Government to have the Departmente of Justice and Agriculture and Mines represented in thils House, oach by its own proper responsible Minister, or for the appointment of the MInlaters responisible for these departments respectively, to sests in the Leglshative Councfl."

MR. KENT-Mr. Speaker, it will be remembered that in the debate on the Address in reply to the Speech from the Throne I denlt with the subject matter of this resolution very fully. Therefore I do not fintend to deal with it at any length this afternoon. The object of the resolutions is to assert a rule of great practical importance fil carrying out the principle underlying our system of responaible and representative Government which requires the executive heads of the principal departments of the Government to occupy seats in this the Representative Chamber. It is not a rule of law. It is rather a convention-
at practice which has grown out of the modern dovelopment of the constitution, especially in those Colonies Iike Newfoundland in which the Upper House or Lesislative Council is fllfed by appointment on nomination by the Government party which happens to be in otice for the time being Another object is to condemn any departure from this useful rale of practice unless fall and ample justification can be shown for such departure. No excuse of party exigency is surficient. No mere political advantage ought to be allowed as a reason for not observing its requirements. The present Government lins ignored thie rule by appointing Messrs. Squires and Blandford to the Epper House in order that they might quallify for bolding the offices of Minister of Justice and Minister of Agriculture \& Mines respectively; and in my opin. ion the Government deserves the censure of this Honse for what it has done in this regard. We owe this duty to ourselves as the ropresentatives of the people, and to the people at large who sent us here. The time has come when we ought to infist that Ministers holding such important portfolios as those of the Justice Department and the Agriculture 6. Mines Department should hold a seat in this Hoase. During the pre sent session we have had examples of many matters of very great importance to the Colony in which the Department of Agriculture \& Mines has been particularly interested come before us in regard to which it would have been advisable to have had the responsible Minister of that Department lere to deal with them. Both the Justice Department and the Agriculture and Mines Department are ontrusted with duties over which the public through its duly elected representatives should keep direct and constant supervision. The Agricultare and Mines Department is on-
trusted with all the internal resources of this Colony. During this session we have had the Bill relating to the contract with the Products Company and we have had also the Bill dealing with the cutting and export of puly wood in Newfoundland and Labrador both of which are very extensive measures which come under the jurisdietion particutarly of the Department of Agriculture and Mines. The duties belonging to the Justice Department of course, enter into and relate to the work of every Department. The Justhee Department is the Department the responsible head of which should be here to keep in touch with Iegislation and to attend to the framing of all legislative measures. We have had evidence throughout the whole session of the necessity of having the Minfster of Justice present in the Heuse all the tlme. Now it has always been-except on rare occassions -the practice to have the princlpal Departments of the Goverament represented here by the Departmental Heads, the responsible ministers. It should be under very exceptional circumstances indeed if at all, that the appointment of these responsible Min. isters should be made from amongst the members of the other Chamber. It should not be permitted. This is the Chamber where they should be This is the Chamber where the responsible work is done and this is the Chamber through which these Ministers are responsible to the country for the work of legislation and administration. It is our duty to see that the principles underlying our constitution of responsible Government should be carrled out by this Chamher as much as possible that, for instance, the Minister should be responsfble through this House, directly to the people, they should be men representing some constituencies and sitting here in this House.

As stated in this Resolution no jus-
fification has been shown or alleged for the appointment of the present Minister of Justice and the present Minister of Agrtculture and Mines to the Upper Chambar. In the case of both these Ministers they were defeated decisively at the Polls in the autumn of 1913. One of them-the MinIster of Agrieulture ath Mines-was defeated, and hetd at the time of hls defeat the porttolio of Agriculture and Mines and notwithstanding that and fin spite of the pronouncement of the people which must be held to be a vote adverae to his continuing office. he still holds that portfollo and quallfles to do so by being appointed to a seat in the Upier House. I regard that nis being in defiance of the wishes of the people, and as putting the Legislative Council to a use for which it was never intended it should be used. In the first place, a pronouncement by the people such as was given in the District of Bonarista last election should bo accepted. Again, the appofitment to the Legislative Council in the manner in which they have been mate is using that Council for partiz. an purposes, which should not be allowed. In the case of the Minister of Justice, he himself was defeated in the District of Trinity. On his appoint ment to the Justice Department he took the place of another Mintster who was also defeated. He was appointed to the Department and in order to qualify him he was appointed by the Government to a seat in the Legiala. tive Councl. Both these Departments might have heen filled by men holdIng seats in this House. It is probable If the Government sought persons in this House from amongst their foltowing they would find men equally qualifted to fill these offices as the men who now bold them.

Both Mr. Blandford and Mr. Scuires tare men for whom I have a personal regard, but when we come to deal with matters of this kind we cannot
consfder our personal likes at all, especfally when we find that there is materlat in thls House which would be equally able to andertake the duties of these offices. Then the position of these Ministers is not the more objectionable by the fact that two byeelectlons have been since held, and nelther Minister offered himself for election. I think they were bound to do so or surrender their office.

There is another feature in connection with this that I would like to mention, It appears to me to be wrong. that we should have so many of the Executive Government, Including these two tmportant portfollos occupyIng seats in the Legislative Council instead of in thls Chamber. We have at the present time four out of nine of the Executive Councll in the other Chamber. That is not in keeplug with the apirit of the constitution. It may be said that there is no express law or authority directly against it. That is true, but it certainly is not in keepfing with the spirit of the constitation, which in recent time, and more partfcularly in the setf-governing Dominfons, more and more is tending to have all members of the Executive Government, except auch as are necessary for conducting the Bxecutive Government business in the Upper House, in this represeniative Cliamber, My object In moving this resolution is to glve expression to my own oplnion, that this trend of the constitutional Hine of development ought not to be retarded, and we ought not go back at till ith matters of that Idnd, but ousht to try to keep the responsible Ministers here in the representative House where their work will be more ngetut, and where they will be more tn touch with the people through their repres entatives. I beg to move the Resoly tion.

RT. HON. PRIME MINISTER-Mr. Speaker, I would like to say a few
words in reply to my hon, friend on the motlon which he has made I asree with the general principle laid down by him that the modern practice tends towards having in thls Chamber a preponderance of Ministers holding departmental offices, especially of the class similar to that of the Minister of Finance and Customs and 80 , to put it more clearly. the motion made by my hon. friend reads, that there should not be in the Upper Chamber a preponderance of Ministers over those with seats in this Chmmber. Mr. Kent's motion was as follows:-

RESOLVED:-That in the opinfon of this Houke, no sufficient Justification has ben shown, or alleged, for the faflure of the Government to have the Departments of Justice and of Agriculture and Mines represented in this House, each by its proper responsible Minister, or for the appointment of the Ministers responsfile for these departments respectively, to seats in the Legislative Councll,

There was no fallure. What was done was perfectly constitutional according to precodent in thls country and in entire harmony with the practice in the Mother Country for in hundred years, on which Constitution ours is hased.

There are some slight variations in some Colonfes where they dealt with the right by enactment, but generally the principle is well recognized that there must be a fall representation in both branches, but the preponderating modern tendency, Is to have a greator number ta this Chamber and especially of that class of department like the Finance Department, and a class which was placed here to deal with money matters., But, when you come to deal with Departments like that of Agricultural and Mines and with the Department of Justice, I think I will be able to show the Honse that in making these
appointments the Government has been quite in harmony with practice. It will be interesting to go back in the matter and point out the practice in Aagland, but I want to make it clear rrom the start that I admit that the tandancy tm modath times, the gractual trend and growth, is to have the principal offices, a mafority of them in this branch, anat if we were here today, bringing in legislation of a permanent character affecting the principle, it may be Hifferent. Look at the practice in England back in 1804 in Mit's second administration. There were 18 in the Cabinet, and only P. the and Castlereigh in thia branch, all the others were in the Upper House, and out of an idministration of 12 there were only 2 in the Commona, This will not now be tolerated, and in the administration of the prosent Goverament it was 14 to 7 ; now It la 7 out of 21, 7 in the Lower House and 14 in the other. In the Duke of Portiand's administration in 1807 there were 2 in the Commons and 9 in the Lords. In Earl Grey's, 3 in the Commones, 12 in the Lords; in Lord Mefbourne's. 3 in the Commons, 13 in the Lords. Thene are departmental industrial heads, In Lord Metbournets administration, thare were 5 in the Commons. 10 in the Lords: in Gladstone's, 8 in the Commons, 8 in the Lorden in Mr, Diaraeli's, 6 in the Commons, 6 in the Lords; in Gladstone's second admfnfatration, 7 in the Commons, 7 in the Lords; In Solisbury's firat administration thers were 2 in the Commons and 14 in the Lords; that was onty in 1885. In Gladstone's third administration, there were 7 in the Commons, 7 in the Lords. In Bullsbury's secend administration, there were if in the Commons and 10 in the Lords, showing the gradual tendency of having more departments in this branch. In Gladstone's fourth
adminfitration, there were 11 in the Commons, $B$ in the Lords; in the Rose: bery Cabinet there were 11 in the Commons, 6 in the Lords; in Sulisbury's thiri Cabluet there were 8 in the Commons, 19 in the Lords; in Balfour's Cabinet. in (1903) there were in) in the Commons, 10 in the Lords: In Camphell-Bannerman"s ailministration of 1906, there were 12 in the Commons, and 7 in the Lordes; in Asquith's Government tin 1914 there were 12 in the Commons, and 8 in the Lords, and in the present reconstructed Ministry there are 15 in the Commons and 7 in the Lords. The most Important department. Secretary for War, is in the House of Lords. I marely point to this to show that it bears out the position 1 take, What we have done in rupolnting two department lieude in the tpper Chamber, if not out of proportion to the practice obtafining in Eingland, and, as I will show, In the other Colonies; and further, that it has boen the practice in Nevfoundland, because within our own recollection findeed, the Colonlal Secretary there continued for fifteen yeare; the holders of the office beling the late Sir E. D. Slien and Mr. Maurtee Fenelon, and the Colonial Secretary and the Finandal Secretary, the tate $M$, Donnelly were both departmentit beads in the Upper House at the same time within our own recolIection. And now, coming neirer home, we had a Prime Mitnister and Attorney General, the late Sir W; V. Whiteway In the Upper Honse, and Sir Robert Bond sitting alde by side and the late Hon. A. W. Hirvey and present Mr. Justice Emerson; four members of the Erecutive Councll, Ineluding the Atforney General and Colonial Secretury These ramuined for some time tiil they found neata. In February 1885 Sir William was elected for Harbour Grave. We had then four mem-
bers of the Executive Council and two departmental heads, the Hon. A. Harvey. Mr. Emerson, the Attorney Genaral and Colonial Secretary. This 1 admit was an exceptional and extraordinary oceaston, but the principle is the same. If it is good for six months or a year it is good for a whole term. What is trie of a month is true for a year. These are cases which occurred in our own country and if right and constitutional for Ste Robert Bond and Sir Wm. Whiteway to take their seats in the Upper House even for a week, it involves the principle as to whether it is right or wrong for departmental offices to be held by members of the Upper House. I say it is perfectiy in keeptag with the Constitution, in harmony with it, and also in the Old Country from which the constitution here is modelled, and with the practice prevalling in the other colonies. In Canada the Minister of Justice for many year, Mr. Mills was a member of the Senate and at the same time Minister of Justice and Attorney General and at the same time and in the same chamber the late Mr. Scott was Secretary of State. Both were membera of the Cabinet for years and members of the Senate. Mr. Graham Attorney General was a member of the Upper House of the Cape of Good Hope for a number of years. Mr. Findlay Attorney General of New Zealand was in the Legislative Councll and momber of the Cabinet for a number of years. Mr. Geo. Foster Pearce,was Minister of Detense of Australia,held a seat in the Legistative Councll and was a member of the Cabinet for years In 1911 in Victoria two ministere were in the Upper and six in the Lower House; in Queensland, two were in the Lipper House and six in the Lower House; In South Australia two in the Upper and four in the Lower; in West Australia two in the Upper and four in the Lower House; in Tasmania one in the Upper and 5 in the Lower;
and in the Australian Commonwealth in 1910 there were three ministers in the Upper House and seven in the Lower. I am quoting from the last word on constitutional government by Keith. Barrister at Law of Inner Temple and Oxford, a work in three volumes, a great and acknowledged work on Constitutional Law in the Colonles. In 1910 in New South Wales there were two in the Upper House and eight in the Lower: in Victoria four in the Upper House and eight in the Lower House; In Queensland two in the Upper and six in the Lower; in South Australia two in the Upper and four in the Lower; In West Australia two in the Upper and six in the Lower, New Zealand one Minfster in the Upper House. If reference in nat to Tod's "Parliamentary Practice Government in the Colonies" the same principle will be found enunclated over and over again. As I pointed out, not alone two members but two Ministers, Mr. Scoth, well known here, was Secretary of State for years, the most important ofrice in Canada, and the Attorney Genersl was Mr, Mills.
There is no question whatever, it is quite in harmony with the constitution that we should have one or two ministers in the Upper House. There was never a question as to members. of the Cabinet being therc, but as 1 have said, within our own recollection we have had as many as two, which wo have to day. My hon, friend sald We have sufterod this seabion by reason of there beling no Attorney General and Agrieuttural Minister in this House. But I think the House will admit that generally spealing during the sesston now closing, the same attention to detall, the same generat satisfaction has been given as if the ministers wore hore. There would be a question if the Colontal Secretary had continued in the Upper House as heretotore, and yet it may be a toss up as to whother the Colonial Secretary's office is not as important and necessary to be in this chamber as

The Attarney Ganeml and Minister of Agriculturn and Minen 1 thata if it was is auention of Asctifing hetween the Celonial Secretary or Minister of Jeetice helng here wn suruld say the House is more te tourh with and more In aiset of thie Cotontat sacretiry touphinis as he doet every degartment of pulilie life. As 1 have polnted out, if the past we lave lad the Financial Secritary of the Cotiony tenttrig wifti all the ftanaces, und the Colotial Seeretary for yeare in the Uppot branioh Sir Edward Stien went in, in 1874, and came out th 1589 nerrfag undor three governments as Colouial Becretary ant never went to a itistrict. He was nicoueded ay Mtr. Mimeton. Mtr. Donnetty wan then avpotntet in 1874, and vent is Placentis is 157k. If wn atmit that practice. if there was incurveni-

## BELEET COMMITTEES.

Mr. Suenker laformed the House that he has reostrod a maseure trom Din Lagislative Councll sequalnitier the Houser of Avernlity that they bad sppointed a Belect Cemmilter of that
 Johe Harrey, ME P. Giblo, K.C. W. W. E. Johe, M, Q. Wiater and P. T. Mer Crath, upreik Als atuenilmente inate hy Be House of Avembly in and upen the amuestromts mate hy the Cownell it and upus the Bill ment ap. mentited An Aet fospecting the Soal PrahHir"t and ther request that the House if Avermbly will be ploaned to appoitur
A. Oommittise of thetr Body to canfer with the Committee of the Councll upon the said amendments, wifh power to sit out of saasion and report at the next sebsion ot the Legislature.

MR. KENT:-Mr. Speaker, In reference to that message from the Upper House I wish to point out that this House has no power to rppoint a Commiltee to sit out of session. All Committeen 59 out of existence. The only thing we could to would be to appotint a Conmiesion.

RT. HON. PRIME MINISTER. -ME speaker, I have jusi pointed ont that position to tho Speatier. It has nor. er artsen before, and if the Hause sarees to 14, there would not seem to be any ereat objection to dolng it. There would be no objection if this House desires to appoint it Commission embracing members from the UpDer House as well as from this House, Bo thest the dealre of all might be Accomplished bufore the next session: There may be some suggestions to go futo the law.

MR, MORINE-Mr. Speaker, I would suygest that thie message be nceaptert with a slisht clange Appolat a Cormmittee here now and that enn be addof ito Liter on by the Govermment appefnting a Commission. I move the adoption of the propossal with the amendmont that the wards "with powat to stl out of sesekon' be striciten aut.

MR. KENT-Mr. Speaker, I do not think you should appoint a Committse whout power. T think the same thing misht be doue as last year with reference to the Fishery Commission. The matfer was referred to a Select Committen, and afterwaris to a Commisaton. You cannot appoint is Comrultee.

Qit mation of Mr Morine the request of the Eegishative Counefl was agreed to with the exception of the clanse having reterence to power to
sit out of gession, which the Houne of Assembly had no uuthority for agreeing to.

It was ordered the following Committee be uppointed: Minister of Marthe und Fisheries, Messrs. Coaker, Moulton, Winsor, Youngi, Jennings, and Hon, Mr. Cashln.

It. was ordered that a message be seint to the Leigisfative Coumcil asruainting that Boily accordingly. PENITENTIARY REPORT.
Mr. Kent, on behair of the select Committee, presentea the followfig report:-
THE SELECT COMMITTEE ON THE MATTERS RELATING TO THE PENITENTIARY.
Have enquired into the matters referrel to them, and beg to submit the following findings and recommanda. thons:-
Sanitation \& Health of the Prisonera:
The liesith of the prisoners appeara to be good. but the Committee find thare are elreumstances about the Penitentiary which would tend to betLer thair present conditions if clanged.

Tho complaint ahout a pit for mulssnce was well foumded. In the northweat corner of the yard there in a fargo pit in which human excrement is dumpal several tlmes dally. The -Il-effects of it are somewhat mittigated by dumping lnto it refuse matter from the broom department. It is emptied only once a year-luring May, ind at that time lime is used. During The bummer mantha flifes in excescive huantilies are found about the yard, the kitchen and around the food. It in fortunate that no Itl-effects have arinen from this, The Committee reiammends that the Government serit fown the Superintendent of Public Worka to provide means of doing away with the pit and get something to tatce its pisce

The Committee also finds that there is but one dry closet for the use of the
prisoners, who use it when they are working in the broom factory. There is also another dry closet used by the cooks. The Committee recommends that these closete be done away with, and that the Government obtain the serviees of the Superintendent of PubHis Works to recommend some scheme of water closets which should connect with the drainage of the institution.

The main building around which the male prisoners have their cells, is airy, bright and tairly well ventilater. In the winter time the cells appear to be over-crowded. The accomodation of the male prisoners offers a marked contrast to that of the female prisoners, whose quarters are dark, close, damp and badly ventilated. The close proximity of the washhouse also adds to the ill-effects of this unsanitary accommodation, and it is further intensified by the fact that wet clothes are hung out to dry in the hall facing the cells.

The Committee recommends the Goverament direct the Superintendent of Publle Works to devise some means of surmounting these objectionable features of the female department.
Nu,sance Kettles:
The Committee finds that up to the time complaint was made in the House of Assembly, prisoners used their nulsance kettles for serubbing up their cells. Since that time the practice has been discontinued.

The Committee recommends that separate kettlen be contizued to be used for the purpose of washing out the cells.

## Surgeon:

The Committee finds that a practice has prevailed of prisoners obtaining the services of a surgeon only when the Superintendent judged proper , and that the rule calling for a weekly vislt of the surgeon to the Penitentlary has not been strictly adhered to in the past. The attention
of the surgeon to this rule was not dirented at the time of hils appointment. The surgeon kinew nothing of the rule until his attention was called to it by the Select Committee.

The Committee recommends that the weekly visit be made to the Penttentiary by the surgeon, and that every month he Inspect the whole Penitentiary and its inmates, and that he be recuired to formulate a regular Medical Regiater which he gholl onter up on his visits.
Food:
The Committee finds that complaints in reference to Fish and Potatoes are well founded. In the case of the fish the fault appears to be due to the unsuitable veseel in which the rish is watered, and, at the time of the Committee's first visit to the Penltentlary, on removing the lld from the receptacle, a very offensive odour came from the vessel. In the matter of potatoes, in their raw state, they appear to be good and sound, but the evidence tully establishes the fact, that when cooked. the Potatoes are wet and unpalatable. The Committee had some of the Potatoes cooked out of the Institution and found them dry and palatable. The Committee finds that the potatoos supplied are good and sound and that the fault lies in the cooking. and recommenns that better provision be malle for the superintendence of cooking. The Committee recommends that a glazed earthenware veesel be substituted for the wooden cask at present in use for watering fish. The Committee also Inspected the fish, the hard bread, the oatmeal and the peas. and found the supply of good quality.

## Clothing:

The Committee finds that some of the prisoners who were serving terms longer than a fortnight or a month, were clothed in rags. Miss Danphy complained of the difficulty of ob-
tafning supplies for menting purposes. This appears not to be the fault of the Boand of Works, as the latter han nover refused to send in suppliea requisitioned, but of the Bygtem in vogue.
The Committee recommends that Miss Dunpliy he supplied with requieition forms and counter foils which sile may send to the Board of Works through the Superintendent of the Penitentlary; and further recommends that no such prisoner be compelled to wear rigss The Commlttee itso findis that in the severest part of the winter the bed clothing is insufficient, anif recommends that this matter be attended to. The Committee also finds that the complaint in reference to the heary clothing of the male prisoner snowden belng tuken away from bim. was well founded. and that he was compelled for several monthe to wear thin inaide clothing without any means of changing them.

## Remand Prisoners:

The Committee finds that the correspondence of the Remand Prisoners is opened and read by the Superintear dent of the Penitentiary in accordance with the general rule that the corres. pondence be read by $\mathrm{h} / \mathrm{m}$.

The Committee recommends that thls rule be clianged, so that it will apply only to prisoners committed to the Penttentiary orr a warrant of conviction; and that prisoners not cenvicted, who are hold thore merely for aafo custody in lieu of ball, be allowed to receive and send letters to thefr Counsel or Solicitor scaled and unread by the Superintendent.

In the matter of interviews between Sollctor and Remand prisoner, the practice of privacy prevalls. There 18. no need for any recommendation on this matter.

The Committee fride that the braw tice of placing Remnnd Prisoners in cells with convfoted prisoners pro-
valls at times. The Committer riscommends that this practice be difs conthueli:
Juveniles:
The Committen finds that ulthough suvantles ure usmally kept from assoclation with sdult prisoners, in the cells, and are clatalfied as tar mas possible according to uge and denominafion, still the Committee finds that in one case a Juvenile prisoner was placed in the same cell with an ndult witroner convicted of Indecent Assauts, and in snother case convictell of tatest.
The Committee chusiders this himbty peprehensible, and recommends that ander no ctrcumstances Juveniles be akain placed in cells with adult pris. nuers eonvicted of euch offences, and conslders also that the practice of flacing Juveniles with udult prisonerd fhould be discontinued.

Thes Committeo rocommends that the House direct the attention of the Department of Justice to the hours of the ofticials and generally to the staft of the institution, in referance to the fength of duty und the slze of the staff.
In conclusion, the Committee denires to state that they find the Penitentiary otherwise clean and well kept and the grounds tidy: the Matron's quarters ara close, amall and badly ventilated, and recommends that better accommodation be afforded, and that provision be made for an annual yacation for her. The Committee regrets that the time at its disposal did not afford opportunities for as full an investigation as might be decired.
tespectfuify mibmitted.

MR, MORINE-Mr Spesker, I want to itraw the attention of the govers. freat to the master of the Supremen Cour bue clrwit In Court thle mernest 1 hat ocraston to mope for then
tranafer of a suit to the Circuit Court, and 1 understovd from the Juojers that they had been notifled that the Court was not gwing on circuit wcst. The Judges expressed the opinion, in which I know the members of the Bar concer, that that is a great mistake. thope the government will reconsider the matter. The usofulness of the Court on circuit if not to be measured by the number of cases it tries but rather by the numiher it does not in - ti-i number settled and the numbi-. that do not come before the Court at all. It was suggested in Court ther the reason for takirg the "Fiona" from circult was in oriez that some perion raight tse her for rome other purpe. 3 es around the coast, not connected with the public service It was not stated for what she was intended. I think the Government should take this. matter into their serious conideration. A number of cases have atready been transferred to circuit, and doubtless others will be.

RT. HON. PRIME MINISTER.-I have not had an opportunity of consulting with the Attorney General on the point, becanse I was not aware that any Departmental instructions had gone to the Judges in connection therewith. It will be remembered that when we were at the Estimates it was suggested that the cost of the circuit would be at least reduced, to what extent I am not prepared to say. but the vote usually passed was \$3; 000; this year it was $\$ 1,500$. In othor words, this was one of the Items in connection with which the Government thought a reduction might be made; but I don't know that the At-torney-General has dectded to recommend to the Government that the whole efrcult be abolished. It may be that the Court will go to places where it is known there are cases to be tried, for instance, Bay of Islands, Codroy, Placentla, Burin, Ronne Bay.
can all practically be dealt with now without sending any special shlp. In that way the only expenses to be pald would be the travelling expenses of the Judze by train. That was the idea at the time the Government made the reduction. I will be very giad to take the matter up.

MR. KENT.-In ference to this matter. I think it is a pity that the circuit court is not made a fixture, I mean that the dates for the calling of the clrcuit court are not fixed, so that IUtgants who might have sults would know during the winter when and where their cases would be tried. Last winter I had a case which it war deelded to transter to northern dircult. to in place tn Notre Dame Bay, which was a port of call last year. There were other cases which were not transferred because there was no fixed time. The Court travelling in the why which the Prime Minister has pointed out is a very Incoaventent way. I was on circuit one year when the Court travelled in that way. It was delayed at certain places longer than was necessary, the whole schedule of sittings was thrown out of gear. and there was a lot of confusion; and so much expense was incurred in litigants and witnessess that it would be almost as cheap to have the cases heard in St. John's. I think the Cir eult Court ought to be a fixed estabtratment, ind ought to have a fixed mode of coaveyance. As to whether a Circuit Court should be held or not is not a matter which should be declded nt the last moment. The principle of a Circuit Court is, I think; a good one. The moral effect of the calling of the Court is healthy: and every lawyer who has gone on clrcuit knows that for every case tried, five or six have bimn settled out of court. A lot of expense is saver and a large number of cilisputes are settled which might ctherwise have to come to St. John's
and go to trial. If the Court is going, I think the 'Flona' ought to be put on the route for the convenience of the Court. It gives the Court more dignity and standing to travel in that way thnn it would have if it were to travel by the ordinary modes of convevance, finding board and lodging as best they can.

MR. MORINE.-Mr. Speaker, I don'4 think that the saving of the trifling sum of $\$ 1,600$ would justify the withdrawal of the Circut Court, and to send the Court by rall, coastal steamer, etc., is undignified, in addition to the inconvenience which Mr. Kent has referred to. Furthermore, the most important thing is certainty. At the present time the Court will not set down a case for circuit, becanse it has been notified that the circuit will not go, and if there has been any modlfication it is exident that the Court has not been notified of it; and the result is that if you ask the Court today or tomorrow to have a case transferred to circuit, the request will be retused, and confaston worst confounded is liable to ensue. I thithk the Premier should supplement his promise by having the matter attended to at once.

MIN. MARINE \& FISHERIES. I may say for the information of the House that for years the Judges have been going to certain places by rall, and have afterwards picked up the 'Fiona.' The 'Fiona' has been on circuit, but has been able to go off on other services while the Court has been travelling by rall, picking them up afterwards at certain ports.
MR. HIGGINS.-I would just like to add a word, as a practitioner who has been going on circuit. I think in practise it has been the case that the least possibte use of the steamer has been made 1 agree with the hon. Leader of the Opposition that the efteet of going on a regular circuit boat
is very much more digniffed and very much more likely to have beneficial results than going in the casual way and arriving at places at all hours. I Join as a practitioner in the spirit of the remarks that have been mude, and hope that the Government will give consideration to the suggestion that the circuit be sent as usual.

MR. COAKER.-With regard to this matter of the Court going on cfrcuit on the 'Fiona.' I would consider that as long as you have a circuit court the Judges should proceed by the 'Fiona.' As the member for St. Johin's Fast has pointed out, a great deal more respect is pald the Court when it proceeds in that way. There is greater dignity attached to it , and it has a better effect in every way. If it is desirable to do away with the Court, by all means do away with it, but if it is going at all it ought by the 'Fiona.' If the 'Fiona' is not required for any more important service, she could not be used in a better way.

RT, HON. PRIME MINISTER.-I shall be glad, as I have said, to take the matter up with the Attorney-General. I don't quite agree with the argument that it would be lowering the dignity of the Court to have it travel by train instead of by the 'Fiona.' Judges travel by rail in other countrieg, in Eingland, for instance. Conditions have changed here considerahIy during the last fifteen years. I remember when it had to be done by steamer, Now, you can get to Placentia by train and do all the circuit from Bonne Bay right down to Channel, and there are only the intervening places-Burgeo, one part in Fortune Bay, and one in Burin, and it could be easily arranged to have the bont take the Judges there. I entively agree with my frind, Mr. Kent, that it is desirable that there should

Delia certininty at to ith thene mlen ther-Gourt le pitas to hre at a pas: thenlst glezes; but I don't knew thant the Caint hiut lose any digntry to tran elling around Craceptica llag, az it lase bert delne by trim. lloweres. this was obe of the matters th wtidch It was ctrught itat in miturtion mithtr be munde but it will wee the dttorney Gevirnal fin consectlou with it.

## SPEECH FROM THE THRONE.

His Excellency was then pleased to make the following Speech to both Branches of the Legislature:
Mr . President and Honorable Gentlemen of the Legislative Council:
Mr. Speaker and Gentlemen of the Honourable House of Assembly:
In relleving you from your sesslonal duties rendered unusually arduous by the lateness of the scason, and the consequent interferonce with your personal atrairg, I destre to thank you, in the first place, for the spirit in which you have responded to the call to perform your legislative functhons at a necessarily inconventent perfod, and, in the second place, for the unanimity that has marked your deliberations in all matters of Imperfal interest

I also warmly thank you for the measures you have taken to ensure the Colony's participation with the rest of the Empire in the great war which is calling forth all the resources of the British race for the maintenance of the world's freedom and the advancement of civilization I earnestly trust that the Colony's contingents towards the naval and military strensth of the Empire, will prove effective in proportion to the numbers engaged, as they will serve to make manifest the desire of the whole people of

Newloundland to ensure an early and successfal termination of this great struggle through an honourable and lasting peace dictated by the allied nations.

The provision you have made for penstons and allowances for those of our men on active service by sea or land who may suffer disablement, and for the dependents of those who may fall in defence of the flag, is highty creditable to you and testifies to the praiseworthy spirit in which every aspect of this overpowering problom is dealt with by the Legislature and people of this Colony
Mr . Speaker and Gentiemen of the
Honourablo House of Assembly:
1 thank you for the appropriations you have made for carrying on the Public Service and for meeting the obligations which the War has brought upon the Colony. The money so provided will be expended with special regard to economy in view of the trying circumstances which contront us and the world at large.
Mr. President and Honourable Gentlemen of the Legislative Council: Mr. Speaker and Gentlemen of the Honourable House of Assembly:
The Bill which you have passed providing for the establishment on the West Coast and on the Labrador of industrial enterprises of exceptional magnitude will, 1 trust, result in the early initiation of those undertakings and the providing of further means whereby great numbers of our people may secure permanent and remunerative employment and the Colony a further addition to an enhanced and lasting prosperity.

In bidding you farewell I earnestly pray that the appalling conflict, now raging in the Old World, may be brought to a speedy and honourable sssue, and that our country, with the blessings of Peace, may then renew the conditions of material wellbeing which were its portion for many years past.

After which the Honourable the Assembly be prorogued until WednesPresident of the Legislative Couneil, by Command of His Excellency the Governor said:
"Gentlemen,-It is His Escellency's Will and Pleasure that this General
day the fourteenth day of July next, then and there to be holden, and this General Assembly stands prorogued aecurdingly".

## APPENDIX

## 1fruan of Awsetnhly, Newfoumilasid

THITHEAAV, Muy 1 Min, 1515
In re Agremment and Amendell Agretment between Newfoundiand Govermment and The Newfeundland Products Corporation Lid. Speech by Mr. William R Howley, K.C. at the Bar of the House proteating on behalf of The Labrader Pulp and Lamber Co. Lete. The American Newfoundland Pulp and Lumber $\mathrm{Co}-$ The 5t. Oeerge's Lumber Cos and The International Timber Co. againat the ratification by the Leglslature of Newfoundland of the Sald Agreement.
May it Btrane Yoar Itewour and Honourable Sirs-On behalf of the faterents efick I repreaent to-lay 1 have to exprese biy excending thank and uspreciation for the courtesy which has been extended to its in perzututise is the prifilege of being bearl at the Bar of this Ronourable House. 1 proposes Sir, to show you briefty
whis this Company is, what properties or rights it lans acquired in this Colony, what the acquirement of these rights has cost it, what actual amount of money it hail at stake in this Colony at the present time, and then to show how and to what extent the proposed measure with the Nowfoundland Products Corporation meroaches upon these rights. The Labrador Pulp and Lumber Company la a Canadian Compuny incorporated in the City of Montreal about the beginntug of 1909, for the purpose of acquiring. developing. and operating timber and pulp lands on Newfoundland Labrador. In pureuance of its purposes that Company en. tered into agreements for the purchase of two large areas of timber lands on Labrador-one with the late 8. P. Benfamtn, comprialng 387 mquare miles on the Kenimou and Kenimiche Rivers, purehase price of which was one hundred and stxty thousand dollars; the other, with the Messrs. Job Bros. and Co. Ltd, of this city for the purchase or some 2,000 square miles of timber lands at Sandwich Bay, the purchase price of which was four hundred thousand doliara. These agreements providad for the payment of the purcliase pifice in finstalments, and the finalisation of the paymenteHomewhat retarded by the fact that Ittigation ensued and has only recently been concluded-has been made, and to-day the Labrador Pulp and Lumber Co. are the possessors of all the right, titte and thterest of Mesere. Job Bros, and Co. in 2,000 Gguare miles of timberland at Sandwich Bay and of the late S. P. Benjamin in 987 square milles of timber lands at Kenimou nad Kenimiche Rivors; for which my elients have paid in cash the sum of five hnndred and sixty thousand dollars. I have heard It said, Mr. Speaker, that none of the people that I represent here today, has any rights. 1 can harilly belfere it possible that any intelligent mem-
ber of the community, mach less any member of this House, can enteriain that lden for a moment. When I tell you that we own theeo properties today, for which we have made a cash outlay of over half a million dollard, Is there any sane man who will stand up and tell mo that wa have no righte? 1 will admit, and I want to be perfectly fisnk and to have the Honourable gentlemen who are Hatening to me in posseasion of all facts that will bear upon the case, that we have to-dey no expressed water power rights. I shall show later why we have not any water power rights or rather why we have not 10 far taken any steps to get possesslon of the sume. Now, Sir, if I may ask yon to turn to the proposed Agreement with The Newfoundland Products Corporation, with a view to ascertaining how far, if at all the proposed agreement interferes with my elfents and their interests, I shall, first, with your permission analyse the rights and privileges which this agreoment confers upon the Newfoundland Prodnctir Corporation; and Sir, will you permit me to draw the attention of the Honournble members to the fact that when at any time after this measure is ratified, if it be ratified, any queation comen up as to what are their rights and where the boundary uarle comes between what they can do and what they cannot do, it will not be decided by what it may be said they intended to do or what they want to do, it will be decided thy the languege of this contract, and by what this contract gives and what it does not give.
Now, Mr. Speaker, if I may draw your attention to this map which I have had prepared from the official records of the Colony, you will see that the areas of timber lands held by my clierits on the Kenlmou and Kenimiche Fivers, aggregating 387 square miles, and purchased by us for a cash outlay of one hundred and sixty thousand dol-
lars, are withln the Aratnage area of the Hamilton River, between Lake Winfeapal and the eea. And the consequence is that all the rights which shall accrue to the Newtoundland Products Corporation under thla agree ment, will directly affect our property on the Kenimot River. I have made a iort of analysie of the righte given the Newfoundland Products Corporathon under section two of the agree. ment which I shall, with your vermis: sion, repent, Sir, and then propose to show how these righte interfere with un. Under this section the Government gives to the Newfonadland Products Corperation the following rights, first. for a minimum period of five yeara (I say "for a minimum period" advisedly) it reserves from grant to any persom any water powers or wuter privilegen within the sadd dratnage area of that part of the Hamilton River above named, that is, the Hamilton River from the hend of Lake Wlnicapati to the sen. That includas the Kenimou and Kenimiche Rivers and their tributaries; that is to say within the area which my clients hold. (2) For a minimum period of tive yeary it grants to the Newfoundland Producta Corporation an frrevocuble optlon on these water powers and privileges. (3) Thint option if exercised carrien with it all the rights and privilegen, daties and obligations granted to or fmpesed upon the Company by thle agroement: Now, Sir, what aro the tights and privileges, what are the dutleis and oilfgatloris ereated by this contract so fur as regards the Newfoundland Products Corporation ! First, they liave the right to dlvort, stop or dam up any stream. lake or watercourse within the said drainuge area, Including the sald area over which my cijents have timher thfite. Secondly, to make, construt or maintain any dan, watercourse, culverts. drains and reservolts, Thirdly,
to compel as to contribute a portion of the cost of their dams and of their matatensuce and oporation. FourthIs, an exemption from taxation of all stock, dividends, debenturas, debenture Etoch, mortempens zud other soculties of the Company. It am not spentlag now of the exemption trom Munfeipal tasation of the lands and works used fil nonnection with the mamofacture of farilizets, but of the stock geterailly) Tithly. Section 9 virtually disnocsesses the Crown of control over tiny pubilic lande within in dtatance of fifty mifes of the Company's operafloms untll sueh time tis the Company has taken op Its uit guota of Innd firreunder. Sixthly, they hinve the right under the amended resolutiona to aegaire compulsorily tands of prisnte furtles or corporatlons anywhere en Labrudor, Seventhly, to mubmerge, destroy, damage or infurlouely affect piryate rights and interente, land or property, Elghthly, they liave the Might to use an the watera acquired by them minder thls ngreement subject to very Ifinlted private rights and with a proThno that evan these limited private righte athould not serionaly interfere with or projutlice the Newfoundland Proslucts Corporation.

As to the dutien and obligations, they imidertate to furniah a certain amount of power to peranis enguged In other kinsiness than the manufac(ure of Partilyer at certafn rates to be settied by an arhitration tribunal appointed in the manier set out by Seotion 3 of this Agreemant. They sitso lurve the otitgation of compensafion for injury to private rights in the munner preacribed-by arbitrationunder this Ant. There if the creation of at very limited easement as to the use of these waters in favor of certhln partien uniler certnin conditions. Now, what is the effect of all these fightis? First of nil upon our properHas an the Ketifmor and Kentmiche

Bivers?. asd before I conalider that eqeathan, Af: Speaker, with your permiesion 1 aball briefly state to yout hoor it in that my clients have not so tar takeis any stope to acquire any enter power to the openine of my remarke I told you that my clients had outy euite recently tiatived the purelinse of these proporties an a watter of fact the litigation which arose out of the purchase of these properties has orily been completed withis the lust month and the formal uties have puesed luto the hands of my ellente since the first of April tant. So that the actual fall owneratip of these properties aid not vest is my clients matil a litule orer one menth ugo. Hellics so steje have yet beed taken by themi to tmanrurate or to prepare tor any extanatve aperation of the de velopmeat of these properties; bat When 1 tell you, sif, as 1 have alresaty told soo that the purctare price hast eaceeded stae.gos; when I tell you that the persoos amsociated with this Company are men whowe weath is xell knewn to he up in the milliots of dollars the Mesers. MeMartin of Cobalk and Porcapine-and that their position and finazctal standing and somnection with different literests bring them into closest toach with all thate largo tinanclal centron which zuast be appeated to for the backing ot any enterperise involving tarme am: oumts of moner; then 3tr. Speaker 1 think that 1 shall have siven auft: ctent ausurance to any reasonsble man that I ame not apeaking en behalf of aubotantial men with unbetantial is. terets in thes colany, stich 1 mbinit desarre-hot alone deserre but com-pel-a yroper mad of protection from this Colntry and those in authority sithin it Now sir. if the NewfoundJand profucta Corparation ie allowed to exaretse the ryphts given under this arreement in its present form, what happenas to our tatereste on the Kentminu and Kenimiche tivers? In the
tisat place all water righty within the territnry cownem hyy our timber graats ase reterved for a mithimum period of five reank. We cannot do anything. We cannot met any water rikhts tor at least five yerar. If the Newtrundland Produrts Corporation elects to exclete tis option is faror of therse Witers, we canson ent them at all. if the Neef undland Protucts Corpora: that, huring exercleed its option. proeveds to exercise ite riftits under this centract is it now stands 1 submit thar it is not ouly imposalbie for us to own a water power, but, under tbe torms of this nerreeruent as it stands at present, it will mot be poosilhle fur as to drive a log down the Keninou Biver. One of the most objectionable chases in this serrement to all tis tiects that 1 represent bere today is Clases 20. Clame 30 without the Enal grovistos is obfectionalie; wint ut thanal prevition it ts more objece thanale: with the flasl provision an marsided it is stifi more obljectionabie. avil 1 would explate to you why. Cinse 20 stthat thle prorime is objectionatle lerause it makes all other rifhits over waters subject to the riedt of and exatelse of rights by the Nextomiland Prodects Corparation. I suibmit with all respect that the Cluse dealing with this phase of the attuntion should make the exarctes of zifthts siven to thle particular Conspany subject to the seneral rights and to the rifthes of ethers; that the poalUin stwelf be just reversed; that this large concemilon lirie should be mbject to the exerclae of exiating richte in indivituat and in the pabilic. insstend of that the pathle and holders of extetine rights are made subject to thir Corporation, suid with the as ditional proviso that me will not, to the exercise of thinee limited subject rimate. faterfern with or prefadice them. 1 say that th an excuse for a rigat; an expase for having taken
away a right-I do not say done deliberately by those connected with this House:-a blind to our eyes to try to diskuise us that rifhts which are al solutely ensential to us are bo taken away from us I thike the position for the Compony, on whase be Lat I now speak, as well as for the Companies on whose beheif I shall a i. i.ens you later, that we must inkist uron Clause 20 ompling out; and I sary "Insist" not in the sense of dictating to the Members of this House as to what they should do; I say "Insist" in the sense that Clause 20 in its pregent form absolutely deatroys all power to use their properdes by my cllents. I say that the deletion of Clause 20 in its present form ts abcolutely essential to the use, in the sllghtest degree whatever of the rights which my cllents have; not alone essential to an operation, but essential to any use whatever, hecause under Clause 20, as it now stands, we cannot bring a log out of that country if the Newfoundland Products Corporation chooses to restrain us. Then, Sir, the rights of expropilation granted to this Company, I submit, are so broad that they threaten us with regard to every finch of land which we own either on the Kenfmou or Kenlmiche Rivers or dowit In Sandwleh Bay. The rights of expropriation are so broad that they can expropriate anywhere on the Labrador; not withIn the drainage area given to them, not within a certain limited area of the drafnage area, but anywhere on the Lahrador. They can come down Into our Sandwfeh Bay property, many mifles atwiy, hardty connected with the properties or operation of this Company up in this Hamiton river secthon they can come down there and expropilate our property. We get compersation,-compensation under a system of arbitration under this Act.

I shall further on deal with this ques: tion of compensation, and the method of assesament. I also propose to reserve until the conclusion any suggestions that I may have to make with regard to amendments that will properly protect the Intereats that I reprosent. If the House wiehes, Mr. Speaker. I shall be very pleased to leave this plan so that they can consider it. I may say that you will notice that our timber areas on the Kenimou and Kenimiche Rivers are colored pink, whereas our areas on the Sandwieh Bay section are colored yellow.

I shall next, Sir, with your permisslon, proceed to deal with the case of the American Newfoundland Pulp and Lumber Co. In order to be perFectly frank with regard to this company I shall state at the outset that thls Company has no water powor privileges in this Colony at the presfent moment. I will go further and I fwill say that by special agreement made with the Goverament of this Colony and ratified by this House in 1912, this Company was granted an option on water power privileges more extensive that ordinary. I mean, the concessions with regard to water were more extensive than could have been dealt with in a formal applicution under the Crown Lamds Acts, I shall go still further and atste frankly that the option under that agreement his since been relinquished to the Government. and that we at the preaent time hold no water rights expressly 80 , in this Colony; but we hold some 400 aquare tulles of timber lands on the Humber River and Deer Lake, for which we have paid $\$ 300,000$ in cash. The Am: erican-Newtoundland Pulp and Lumber Company was Incorporated in the Stute of Michigan in the year 1909 for the purpose of acquiring and developing certain timber and pulp land

In the Deer Lake section of this com(i), In pursiance of its purpose it bought out the timber lands held by Messrs. Rood and MeGregor of New Glasgow, and the Humber River Puip and Lumber Co, of Newfoundland, the purehase price belng-elther $\$ 280,000$ or 3300.000 I did not act for the Company at that time and I am not abselutely certain which of the abova prices was pald. At the same time there was penaling two applications for water powers on the Lower Humber River, onie from Mr, R, B. Job and 46 foint one from Messres i. B. Job and Eifward E: Haryey-both of whom were interested to some extent in the Companfes who were selling to my cliente. These gentlemen had given the umal notice of applying for water powers in the Gazette snil had filed their appllcation In the Crown Sasods Office: but the application for some Teason had never been passed upon by His Exsellancy in Couneli; ana at the thue my clents purchased these timber lands, any interests that Messrs, Job and Harvey had in those two water power applications were aleo assignei to thom. In purguance of the plan of development which my cllents hat in mind. in-the year 1910. followins their acouisition of this pronerty, they arranged with the firm of G. F. Hardy, lyydraulic enginears of New York I think the men who desiened and superintended the orection of the Harmsworth vorks at Grand Fallo - mes of international repute:to make $n$ complete survey and ex. huination of the coontry surrounding the-areas, Its toposraphy, Its possibilities of water powen The yenr 1910 and some sonsidorable portion of 1911 war spent by Messs. Hardy's staff it considerable expense to my clients, in making a most camplete oxamination, followed by a report upon the possibilities of that country:
Fardy's report, which I have lad the
plessure of seeing, was a most exhaustive document, and went into figures showing the cost of construction pf necessary dams, ete., made provisIon for all neeessary works as far as could be cateulated (e.g.. plpe lines; ptes) of a large pulp manufactory, and filso recommended to us that in order to carry out the undertaking which we had is view it would be necessary to obtain certain concessions with refand to raising Deer Lake and storing the waters on Grand Lake. The consequence was that in the winter of 1911-12 I was instructed to approach then Goverument of the day to ask for the necessary concessions. We were aware when we came to ask for these concessions that the exeroise of them would to nome extent damage or in. terfere whth the existing Fights in pther people; and when we approacher the Government we informed them of what was absolutely necessary to the successful carrying out of our developments, and said that "we are prepared in have attsched to the grant of these concesslons every reasonable precaution that you can suggest to gafeguard every intereat both public and private" The result of our ne. gotiations was the rgreement of 1913 -an agreement whloh was ratifled by the Legislature and which appears on the Statute Book as wThe Deer Lake Pulp and Paper Act",-to which I shall refer more particnlarly later At the time that we approached the Govermment with regard to this matter the plan outlined by Meaers, Hardy and figured on by his firm involved an outlay of $\$ 7,000,000$. The contracts for the underwriting of that $\$ 7,000,000$ were signed and executed in London, securing to us the necessary $\$ 7,000$, 000 to earry out our undertaking: but as we proceedeil with our negotiations It became evident that other rights to properties over which the Government of this Colony had no control were ne-
cessary for our development work: and we were compelled to negotiate for the acquirement of these. The conditions upon which it became poesible to acquire these wore such that upon the figuring of Messrs. Hardy and Co. It was found that it would Involve an alditional expenditure, the extent of whileh they could not then tell, but they placed it at a minimum of one and a quarter million dollars, and the financtal experts who had rigured upon the cost of the proposed operations and the probable returns to be had on the investment turned the measure down with this additional expenditure attached to it. The consequence was that we were compelled to sbandon our ldea of development in that country, and after some delay the concessions granted to us or optioned to us under Government contract of 1912 were surrendered by un to tho Government. But that is all we surrendered to the Government-only what was granted to as by the contract of 1912: what we had before, and what we paid our money for we still have, and it is in reapect of that that we now seek protection. Upon the ifnal realization of the fmpossiblity of carrying out the 1912 agreement, with the super added burdens, my cllents last year entered into negotiations with some large American capitalists for the establishment of a sulphite mill in connection with this property; and last year the representatives of these people spent the summer on the property making a most exhaustive examination of its capabilities with regard to a sulphite mill proposition. It was late last Fall when they reporter. I have not seen their report, but I have been told that the report was entirely satisfactory, and during this past winter the necessary negotiations followting that report to arrange for the financing of the new proposition have been going on and are not yet com-
pleted; and if this measure goes through the House, as it now stands, they will never be completed, and the American Newfoundland Pulp and Lumber Co, hed as well gone down to the wharf and thrown their $\$ 300,000$ overboard; and that is the reason we object to this contraet in its present form. Mr. Speaker, if you will permit me to draw your attention to a Map which I have also had propered from tho offictal records of the Colony, you will see thę Tands of the American Newfoudland Eulp and Lumber Co., colored pink, situate on both sides of Deer Lake and running up on the north-western side of the Upper Humber River, nearly up to the extreme limit of the watershed of the Humber. This map which with your permission, I propose to use in illustration of anything 1 have to say on behalf of the American Newfoundland Pulp and Lumber Co, and the other Companles of whish I have not yet spoken. shows all that western section of the country extending from the south side of Bay St. George up to Hall's Bay. The lands of the St. George's Lumber Co., are colored green, the lands of the American Newfoundland Pulp and Lumber Co, are colored pink, and the lande of the Intornational Timber Co. are colored yellow. The watershed of the Humber River, within which it is proposed to grant this Newfoundland Products Corporation water rights, is outlined in red. The ten mile radius of Corner Brook within which certain rghts are given to this Company are marked by a yellow circle: and the torty mile radius is outlined by a purple circle. A glance at this Map will show that the proposed grants of the waters within the entire watershed of the Humber River includes all waters flowing through the lands of my ellents. Now, do not. please, let any honourable gentleman misunderstand me. I do not
othlect tus a grant of water powers while this section to the NesfountInnd Producta Corporation, Mrat I do eblect to a crant in the terms of the mesarure new betore the Howse, hecatise 1 say thene serme are such as practicatty render unoteas the property of my cliests: these terms are waeh that they place nig elleuts in the poattion that therv If entr one poisthte market for their property, and that martien 'ts the Newfoanitatid Profucta Corporntion: and that market can only he avaltable upon whintiver terins the Newfounilland Prodects Corporation chinotes to itfer us. We have nes other market because any othnr prarchaser would be aubject to the teras of thle contrat as we are ourselven.
Dis behait of the thternationat Timether Co and the st. Georgeln tamber Co. a sood many of the oblecttoun and somit of the prinelpat ohjectlons which we had th this mensune lave beell done sway with by some of the amendminitis whtch have been troupht dawn; but they are still tin eertafs matters objuctionabte. The Intornationat Tinsleer Oo. was incurpornted in Mifchlgan In thas for the parpose of aegutring ond teretoptne certaln thatier tiande in Hallin Blay; They did acuulre some zill milien of timior lands in Hallis Thas und the totat suttay, whith 1 mis-stated is the peition presented to this Howse through an error arising fiem pressure of work, the total outtijg wis sine tiumitriot ind thity thouwand fotters. Tyan peaple lawe been operatinc two saw millo dowa there sinen tien surchase, lut have liees contrmptettre the thitathittici of is butb mill for wous time-and I wish to lot perfectly frank as far as thes ane cancerned. They have not at the gres
 is the country where their timbere is situited. I go furthor and any that a ywat of two ago we applied for certhtr mitir powirn fown theri with ai

Wian to establiahing a july indastry, and our applications, so far as regards Treo water powers, were approved by the Governot is Council. but our application for the thind water power wis refosinc. and although no otfletat teanon was gisen far the refusal I un4 natood at the time that the refumat wis in puesuance of the pollicy of not granting to any one man in water power that flowed through land of aniother man. We applied for the water powery on Indian Brook, Banbury Brook and South Brook. Imdian and Bastuary Hrooks flowed through the terthery awned by my cllents: South Broak flosed through the nimull territory held under license by other people. We dif not aet upon the approval of the two Brokes Etven un at the times the reason was that our application was mande in purrwance of an exurulnation and report made by a hrdnalic. enginner: and the two Airoviks which were approved to us wirn not In themeelves eufficlent to tive the power that we reeded; sod wo let the mattor aloue, walting for the time to cume when we could negutlate, un we thought to negotiats. with the parties who held the other places or to muppir the deffedency in water power by having South Brook teft out. We have to-lay no exprensed sater power rights in that country. and-to be perfeelly frank-we are todiy in the posttion that the two water powers that sere approvel to as have beos allowed to lapse. The rmason I *y why we have not acted man that thesen two powers in themsitres wer Gusfficlent; bat we have our timber Intact: we have our arichal levestminnt in operstion; and under this comtract or under the contract as amended by the resalutions we ary in this pourtion that the matershed of the Humber over which richta are granted to the Newfoumdland Prodnets Corporation enturn in upon our turr)-
tory and therefore creates certain rights in the Newfoundland Products Corporation which may, if exerclsed by them operate to the detraction or diminution of value of a section of our property-for which I admit under the contract as it now stands a tribunal to assoge compensation is provided; but we say that is not enough to gatisfy us; that is not enough to protect its as we submit with all respect the Hon. Mambers of this House should be prepared and anxlous to protect us.

The St. George's Lumber Co. was Incorporated in Newfoundland. I believe it has been said on different oceasions by those who wished to critteise my Rt. Hon, friend the Premier, that he is a shareholder In the Company; but when I speak for the St. George's Lumber Co. I speak not so much for that practieally defunct Co. to which the Rt. Hon. the Premler belonged, but for the bond holders who have subscribed and taken up two hundred and fifty thousand dollars of the bonds of that Company. The St. George's Lumber Co, was incorporated in Newfoundland in 1900 to acquire and work cerlain timber properties in Newfoindland. A purchase price and expenditure of two hundred and ten thousand dollars was made on the property when those in authority in the Company issued a prospectus asking for a bond subscription of two hundred and fifty thousand dollars, and that two hundred sand fifty thousand dollars was underwritten in New York and the money was suliscribed, and spent over there in St. George's Bay in connection with the development of this property. When I say "the money was spent" I say it was spent with the exception of sixty thousand dollars when Intermal friction eave rise to Iftgation ra. sulting in the afíairs of the Company passing fitc the hands of a Board of Directors who renlly were a joint Cors: mittee representing the original
shareholders and the bond holders. The property is there to-day still held by us; still representing an outlay on our part of three hundred thousand dollars, that is one hundred and ninety thousand axid the original hundred and ten thousand. Now the contract iss amended is not as objectionable to the St George's Lamber Co. as it was originally, but a slance at the map will show that the same objections which obtain on behalf of the International Timber Co. Ltd. apply on behalf of the St. George's Company with this additional objection-that the rights of water power which it is open to the Newfoundiand Products to bbtatn umler section 1 of thelr akreement, that is rights within forty milles of the Humber River, will, according to this map, give them rights over waters whlich flow through the property of the St . George's Lumber Company and also afford them opportunity should they so desire it or should they deem it necessary to destroy by flooding, sulmerging or athor aee of these waters a very large fection of the lands bold by the St. George's Lumber Co. These, gentlemen, briefly are the particular objections raised in each of these four cases against the measure in its present form. I think that I have satd enough to show you that the present sgreement will affect my varlous clientsaffeet some of them more than others; I think I have said enough to satisty even the man who laughs at the idea of our having rights, that we lave rights, substantial rights, rights that may be valued at hundreds of thousands of dollars, rights which we have acquired at an expenditure in the aggregate of ovor one and a quarter million dollars in cash; and I wish now Mr. Speaker to draw your attention to the Doer Lahe Palp and Paper Act of 1912 -this Act which we relinguishfal to the Government. As I stated carly in my remarks, when we found
upon the report of our Hydraulic Engineera that certain water power concessions beyond what we could obtain under the ordinary procedure provided in the Crown Lands Act, were necessary for our development we approached the Government and asked for them and reallizing that other people's rights ought to be respected and protected, we informed the Government that we were prepared to accopt our concessions with overy concelvable safeguard to other interests at tached. Personally, Mrr. Speaker, I can speak with first knowledge not alone of the contract of 1912 but wth regard to all that led up to it because 1 had the privilege of representing that Company then as I do now, and the first draft of this contract was prepared by me and the subsequent amendments that were interchanged between the government and me up to the time when the Act was finalized, passed through my hands and mine alone. If you will permit me to draw your attention to that agreement which will be found on page twenty seven of the public Legislative Acts of 1912, you will find under Section 2 that-"The Government hereby grants to the Company for a term of ninety nine years from the date of these presents the rights (a) to raise the waters of Deer Lake aforesaid to the height or level of fifteen teet above the level or mark of high water and to take, impound, dam, store, use and enjoy the waters of said Deer Lake so raised; (b) to raise the waters of Grand Lake to the height or level of ten feet above the level or mark of low water, and to take, tmpound, dam, store, use and enjoy the waters of sald Grand Lake, so ralsed; and (c) so far as the Government can, consistently with any grants heretofore made and actually subsisting, grant the same, to use the waters of Junetion Brook, below Lot number 40 , granted to the Reid Nowfoundland Company, and the

Humber River above Deer Lake aforesald, and to use the waters of the Humber River, below Dear Lake aforesaid; provided that the rights to use the several waters granted to the Company by this section are not exclusive rights, but are to be limited to the use of the sald waters for the purpose of furnishing power for the operations of the Company and in connection with the lumber, pulp and paper mille and manufactories which the Company proposes to erect on the Humber River, below Deer Lake aforesald; and provided further that the rights hereby granted shall not be taken or construed to prefudice, obstruct or in any ways effect any publife rights nor or heretofore used, enloyed or exercised or which may hereatter be created or granted by the Legislature over, upon or in relation to the said waters or any of them." but the Government of the day deemed it necessary and desirable in order to fully protect outstanding rights, in order to fully protect other rights, in order to fully protect such rights as I represent today, to add a proviso"Provided that the rights to use the several waters granted to the Company by this section are not exclusive rights, but are to be limited to the use of the sald waters for the purpose of furaishing power for the operations of the Company at or in comection with the lumber, pulp and paper mills and manufactories which the Company proposes to erect on the Humber River, below Deer Lake atoresald: and provided further that the rights hereby granted shall not be taken or construed to prejudlee, obstruct or in any way affect any public rights now or heretofore used, enjoyed or exercised Now Mr. Speaker, 1 asis you to insert that proviso in this contract because the private rights which I represent here to-day are Just as much entitled to this measure of protection as the Goverament of 1912 though: it desir-
able to provido againat the Deer Lake Company. Next Sir, 1 do not immediately propose to suggest any objec. tions to the tribunal for assessing compensation provided in the contract now before the House, but I would IIke to draw your attention to the fact that you have two different tribunals provided for assessing compensation and two different modes of procedure. In the case where the other man has to pay and the Newfoundland Products Company has to recelve, you provide one system of arbitration and one system of procedure to assess the damage, but in the case where the Newfoundland Products Company has to pay and the other man has to recelve you provide another system of arbltration and another system or procedure. I do not mean to suggest for a moment that there is anythtng disastrous to any interest either to the other man or the Newfoundland Products Company underlying that clear distinction, but what 1 do mean to say is this, that when the 1912 contract was drawn up the Government when asked to protect the rights of individuals did not consider either one of the tribunals or the method of procedure you have in this Act sufficient to protect private rights and they established a spectal board of arbitration with a special procedure, with a special right of appeal to the Supreme Court with special powers of ruling under Section 8 of the Deer Lake Pulp and Paper Act. Gentlemen, I say that if this enactment was necessary to protect private rights in 1912 , I who now represent the class of private rights which were protected in 1912, aslc to have this enactment put in here to protect our rights. Further than that, under Clause 9 of the Act of 1912 the Government deemed it desirable for the protection of other peoples rights to make it incumbent upon the Company that was getting the concessions to use all reasonable diligence

In deciding upon questions of compensation and the same having been deelded to pay promptly if that was necessary then. is it not necessary now? Further, Sir, in 1912 the Government of the day dealing with the Company that had assets representing an expenditure of three hundred thousand dollars deemed it imperative that before they exercised any of their concessions they should make a deposit of a quarter of a millifon dollars to secure the proper compensation of any private rights that would be injuriously affected. Is not this necessary today to protect such rights as I represent here? Is it not more necessary because then you were dealing with a corporation that had three hundred thousand dollars invested in your country, and to-day you are dealing with a corporation that has not a copper. It is perfectly truo that you have on the share list of this corporation men whose means to pay are beyond question; but their liability so far as the Newfoundland Products Company is concerned only extends to the amount unpald on the shares they have subscribed for. Therefore 1 ask, Str. in the interests of the proper protection of those rights which I represent In order to secure that the properties held by my clients for which they have pald their good money shall be properly componsated for if injured or destroyed, that a substantial deposit be required from this Company before they do any injury. Now, Mr. Speaker, just one more point : I have already referred at some length to the objectionable nature of Section 20 of the agreement now before the House. I have drawn your attention to the fact that it not only greatly curtafls-(tako the most generous view of it)-that it not only greatly curtalls existing rights but it makes thom subject to the exercise of the provisions of this Aet; and it is absolutely and unreservedly objectionable. I have outlined
and suggeated that it not only should come out but that some substitution that shoutd create the reverse condltlon is the smatleat, the least protection that $\ln$ my humble opinion this House ought to provide for people in the posttion of my elfents, or any: body who has got any right in that section of the country. In addition to the reservation provided for in the 1912 agreement contnined in the latter part of Section 2 of that agreement we have in section 14 the proviso that the vested rights, if any, of all persons holding land, whose interests shall be affected by the use of the said watere, shall bo reserved. That was necessary in 1912; in 1912 tho Government of the day insisted upon that clause belng inserted in order to protect other peoples rights from the infury of interference that would come to then from the exercise by us of the privileges given us under that contract. I submit that it is at least as necessary to-day.

Now, Mr. Speaker and Gentlemen, I do not suggest nor do I wish anybody who listens to me here today to think for a moment that 1 wish to suggest or Insinuate that these omissions to safeguard public rights have been de: Ifberate on the part either of those who are seeking those concessions or those who propose to give them-much less on the part of those who propose to sive them. I take it, Sir, that every member of this House has been in a sense carried away with the prospect of a large industrial concern such as this measure gives promise of; and if he has omitted or overlooked how far the Act or Agreement in its pres. ent form infringes on already existing rights, that ho will be only too ready to make good that omission once hle attention is called to it. I gay, Sir, that I think it would be a great pity, it would be a great pity if the scheme of development proposed by the Newfoundiand Products Corporation did
not have its chance and that this country and ite poople did not have the opportunity of having such an industrial enterpitise undertaken in its midist; but I say that the concession which provides for the establishment of that findustry ought not, and I submit need not, so far as the success of the thing fe concerned, unduly interfere with or prejudice the rights of anybody whether it be a forefgn company or anybody eise who has got rishts whether they be in timber land or water power, or forest woods, or farms, or anything else. Any man torlay who has Ihis money invested in this country whether it is the humble home of the fisherman or whether it is the big rallway undertalding of the largest contrectors of the country, is entitled to have all his rights and his investments conserved as fally as possible consistent with development. If this plan of the Newfoundland Producte Company and those they represont, the development of the plans of construction work, may encroach upon private rights then the fullest and completest methods of compensation and of determintigs same, and all proper securlty for the payment of that compensation, should be provided by this Legislature before this contract is ratified.

Mr. Speaker and Gentlemen, I must again thank you for your courtesy to me and your patience in listening to what must necessarlly have been a dry uninteresting address. Your time is valuable, and I have been privileged through your kindness and your desire to do what is rigit to come here this evening and occupy your attention for an hour or so. I have presented to you as shortly and as clearly as I possibly could the position with regard to those people whose interests have been entrusted to my care. I leave the matter in your hands individually. irrespective of the differences that bxfist betwoen one party and another-
with which I have nothing whatever to do. I leave it in your hands trusting to your sense of right and Justice, trustity to your realization as botng custodians of the honor of this Colony of the effect of any action of this Leghinture upon capltal alreaify in-
veated or capital that you may hope will be invested here in the future, to give the proper measure of protection to such interests as I represent, the fullest and fnirest conalderation. I thank you Mr, Speaker and Honourable Gentlemen.

# PROCEEDINGS of the <br> Legislative Council of Newfoundland 

SESSION 1915

## WEDNESDAY, April 7th, 1915

Thls belng the day nppoluted by Procismation for the meeting of the Legislature,

At five minutes to three otclock, p.m., the Councll met.

At three o'clock, p.m., His Excellency the Governor, having arrived at the Councll Chamber and being seated on the Throne, the Hon. the President commanded the Gentleman Usher of the Black Rod to proceed to the Commons Howse of Asaembly, and inform the Speaker and Members thereof that It is His Excellency's will and pleasure that they attend at the Bar of this House; and they being come thereto, His Excellency was pleased to open the preaent session of the Legislature with a graclous Speech from the Throne

His Excellency the Governor then withdrew.

Mr. President took the Chatr.
MOTION FOR ADDRESS IN REPLY.
HON. JOHN HARVEY.-I rise to move the customary vote that a committee of the Houne be appointed to draft an Address in Reply to the gracious Speech with whtch His Exceltency has been pleased to open this aession of the Legisiature 1 feel that the Speech is well concelved and admirable in expression. It reviews a large number of events that have hap-
pened silnce our last meeting in regular seasion twelve monthe ago. It reters to the vtatt of His Royal Highnens the Duke of Connaught, a signal honour to the Colony which called torth a burat of loyalty whtoh was so speedity and unexpectedly to be put to the test of this period of stress. That burst of loyalty has proved to have been no mere matter of lip service. The apeoch tells of the vieft of the Royal Commission, a viatt that was extremely interesting. and none the less so because a member of thli House lad the honor of serving as a member of that very important lmperial body, and one feels, as a Member of this House, that the House to some extent shares the honor. It refers to the visit of Mr. Duff, who with Dr. Hjord of tho Norweginn Fishery Department, gave such Muminating and fiterestlog addresses before leavIng lere It refera to the vieit of Professor Dunstan, which we hope will be fraught with much ultimate good to the Colony. It refers to the intlcipated report of the Joint Commisaion appointed by the Leglalature on fishery matters it mentlons a fact which we mist have all antlifpated, en unfortunate fact namely, that we have a defleit in the buiget, a matter which no Government under the dircumstances could have avolded or reversed. It rafers to the possibility of the introduction of a large new indus.
try. I do not know anything abont that, but I do know that anything the Government may do in that way will have the warm support of every member of the House. It rofers to the commercial conditions which have obtained since the outhreak of the war, and it righity indieates that the Colony has come through this time of streas immenaely better than might have been expected. Referring to socfal conditions, it does seem opportune to the to say something here in reference to the extraordinary resulis that have been obtained from the stoppage of the IIquor tratie in Russia. If it were not that it hae beeni stated upon the highest authority, it would almost be impossithle to beHicve that the stoppage of the Ifruor traffe throughout that freat Eampire had resulted in ineransed produetivity of from thirty to forty per cent We see to-tay what a heart semrching matter is this question of the Bquor traffic for Grent 1 tritain. Thet an apprecitible percentage of the workors In Great Britsin are to a serlous and alarming extent Feing demorallzetl by the drink traffic, is evilent. "3at ts a temperance comitry, but no one can live vory long in Ei. John's without being aware of the inroads that the Hquo: traffle has malle on the wat is ing people in this luwn. 1 woud filce, Sir, to see someboily egain malta the attempt to push forward en acitation for the prohflition of the retail Hquor traffic here I belfeve if a stop could be put to drink, and it conld be fol. lowed by the other part of the programme which I have mysell often ndvocated in this House, a measuro for compulsory education, it would do more to improve the soclal conditions In the life of this town thrun all the civie commisaions and new muntelpal logielation, desirable as these things may be, that we can ever devise. Commerclaily, we have come through thig crisis so far wonderfully well. but
while I was one who at the beginning of the war believed that in its early stages there was no need to antiolpute any derions commorcial difileulty, or any need for the enforcement of pry drastic legislation, no need to expect any sort of local cataclysm, I think we are by no means through the wood yet. I think wo have probably hsorder times ahead of us than behind us, We begin the year 1915 with umprecedented prices for our staple products. These values, in my opinton, are more or less artificial and temporary. They are hased upon values ruling in only one of our markets. No ather market warrants a price at all approaching the figure at which fish has ruled here for the last three or four inouths. I belleve that with a normal fiahery this yetr theBe extreme valace for fiah have got to come down. It may be considered by some injudlelous to refer to this vew in this place, but I think it better that the facts should be weighed. Unfortunntely our staple product has not got a world-wide markgt. Value đepenas to a large extent upon the financial stat. us of our consumers. Unfortunately our customers are moatly poor. In Portugal, which for years disputad with Brazll the position of beling our Largest cugtomer, you will find the currency rates of exchange have been dropplng for a long period, and since the war began here como down with a. run. The same condition of things oxists leas acutely in Spain and in [taly, and in all those countries it is likely to Erow rather worse than betor as the war goes on. I belleve that the value of codflah hat got to come down by and by owing to the Europesi financind conditionis. The trouble is not that these people do not want our fish. or are not prepared to pay a very large prfce for it. The trouble is that they canniot find gold in London. Some years-ago the value of the Portuguese milirefs was about fifty.
four to fiftyfive permies, and alttiough the price for fish in Fortugal is highor than ever, although the poor minn pays more for it, otil the amount which that currency will remit to Newfoundland is very much less per quinfal thinn if would hive been lad the oxchange not falten. The difference In the exchange betwean the remitted value of a quintal of fish aelling at 15 milrels, then and now, would be over $\$ 2.00$ a quintal. We have got to see, 1 think, of falling of values of coufish from recent extreme levels, and the process of scalligg down vatues is often dificult, and sometimes dangerous alion. From this opinion of mine, and for general reasons, I draw the derfuction that the Colony will want to exercisc individual fndustry and beneral economy to an unuaual degree, ind what in true of indivifuals Is equally true of the Government. Thle must be a thme for well thought out and rigld economy on the part of the Government. I wiah to say that 1 am now speaking absolutely for myaelf. I have had no conversation with the Government or any member of it I am not criticising the Government, nor am I speaking for them. We have got to realize the fact that the purchantug pewer of the Colony ts tikely to be less. We begin the year with the sealfishery at a virtual blank. That means a virtual reduction of the purchanlige power of the Colony of borhaps tireequarters of a million dollarz All these things mean reduced imports and reduced revenue. En the other taud the Cotong tuis very heavy obllgations, some of which while they have been incurred, have not yet been serlousty entered upon. Tilintion tis about an titgh ae it can be put. If it is not to cense to be productive, and the Colony's buiket will have to be bulanced by economica. For a good many years past we liave heen borrowing very considerably,
ond there is no donbt that the pubilic Itcoline has been materially increased by the fact that a certain portion of these burrowings, being in the oretinury course of business annexed throogh the Custom House, have been showing as normal revenues, In the future it is perfectly evident that borrowing is going to be much more dimcult thas in the past. Very much richer countries than we will find it difficult to borrow. I would like, Sir, to see fome arrangement atteripted aiming at the holding over for bettor timea of poasalbly even at cancelling obligatlonn which the Colony has Incurred, but which have not yet been fully ontered upon; such thinge as the Fortine Bay raffway find posably the Boune Bay rallway. I do not know if It io possifile to hold over such things, but if it in poastble I shonld like to soo home effort made to do so, ft is Ituposstble for any man not in close touch with the detalls of the Covernment administration to say where, or how, or it, important econotiles in public expenditare can be effected, and I am a perfect amateur with remard to Goverament accounts, tut runniag over the digent of these nccounts which appears in the Journal of the House, there aro several ricads which atrike one as belig such os might be cut out for a time or reduced I have made a note, for listance. of "dredging." I think that the eatimate for dredging in the last pubHehed accounts of the Howse of As sembly is $\$ 32,000$. I should think that dredging, white a very desirable eervice, misht be smapended untll we can better afford it. I netice that the cont of operating the Fiona for I fancy about elis moaths of the year. is $\$ 29,000$. I do not criticlse the expenditure it may be reamonable but 1 thift it miglit. be reduced without anybody suffering seriously, Take
the tuberculoals campalgn: I fon't
know what the actual cost is, but I see the estimate for it is $\$ 24,000$. I think that it is on expenditure which may be greatly reduced, because I don't think value is being get for it. I do not wish to crittelse the gentleman in charge of the work, who is no doubt an enthnsiast, but I do think that the lines on which it is being run are a mistake. I note such things as agricultural exhibitions, most desirable, but on which the expenditure misht temporarily be saved. Take the matter of expenditure on new roade which might probably in times like these be at least partiy, if not Wholly, saved I take the matter of suusidies for extra trips for coastal steamers not included in the permanent contracts. Some of these may be necessary, but when not absolutely so, they ought to be cut out untll we can better afford them. These are only a few things which I notice in golng through the accounts, and I would like to add that I think it would be a proper and gracetul act on the part of this Councll if dering the time of war, it titlmated that it was not anxious to recelve the usual sessional payments. There is po doubt that growing through the country there is an increasting sense of the nearer possibll. Ity of Confederation. I do not think to-day there is any greater desire than there his over been, but there is a feeling that it ts becoming possibly more tnevitable Personaliy I beHeve that the instinct of the publie in this matter, the many instinets which people sometimes hold, but which they may not alwaya be prepared to give entirely detailed reasons for, is a thoroughly sound one and I thtrk it is strong enough to be proot against superficial and alluring arguments which are frequently brought forward upon special detafla. I
would, if I were a Canadian, be a very strong confederate. There is no queation that from a sentimental point of view confederation with Canada would be very desirable for Canada, and I do not entirely ignore the sentlmental pofnt of viow, but I do not beHeve, that practically speaking and as an actusl fact, confederation will make any great difference to Canada in any other way. It would make us a sort of "tled house" We should be forced to buy from Canada many things for which we are free to acour the world to-day and she would take nothing from us except the fron ore upon which one of her great industries already depends. It is true we occupy the lodge of her domain, but whlle we atand at her gate I do not think Canada is going to suffer by that, because we may fairly claim to be fully as loyal and as devoted to the Empire as Canada herself. The interests of this Colony at present are specialised, Itmited, insular, if you will, Canada's arc unspecialised, unlimited and continental. We are today free to treat our owa speciailzed problems in the light of our common sense to make or mar them as we wish. In confederation they would of necessity bo dealt with from the point of view of quite different interests and aubjects. I can only visualize the linhing up of Newfoundland with Canada as that of a traction engine and a runabout operating on the same road. The runabout in its mad career may very well find Itself in the ditch, up to the axies In mud, and it may be tempted, or it may have to link up with the traction engine to get itself out, but in this case it must be remembered that when once linked up it is thed up forever, and I do not think the partnership would be particularly advantageous to efther, lesst of all to the runabout. However these matters are sunk to-day
in the wider fesues upon which the speech dwells. I think, Mr. President, that we are fully Juitifled in congratalating the Government on the broad and fearleas wuy in which they have dealt with our part in the world emsis which has arisen, and we may fairly say the same of the Oppositfon, which has acted as every Newfoundlander would deaire. Thees thinge miny be fairly entered to the Colony's credit in the great ledger of history. This lins been Newfoundiand's chance come at lant to do something worth while in the world, to get away from thit small and artifictal extstence whteh tends to benumb our thougits and to deaden oar charseters, and fustead, to know somethitig of true service, to do something for the great realities or tre. The Colony has fatrly Jusulsed her clatin to be not only ancient, but loyal too. For I doubt it any othor Colony or Dependency has provided anything approaching the percentage of native born sonil that this Colony has done. I doubt It any clty under the flag can mateh the native volunteering of St. John's. I imagine that no Colony lias at this time writton the samo proportion of liven upon the hero's roll of honor. Ove of the most fusplring things about the early daya of the war was the rush of holpere from every portion of Greater Britatu. When war came the question upon everybody's lipa, triands and foes, allke was this, what about the Dominions? Shall Great Britain fight alone? Those little letands which we th our isiand look at aeross the Atiantid and to whom we owe so much. They hatd fought alone before,for right, against the world in arms, and whether the Dominions had helped or not, they would have done it it pecessary, once more, fought ungrudglagly, vfco torlously, as they flave alwaye fought.

The Kalser asked the question,and
he answered it himself in the blundering, stupld way with which we have How lecome so fumpliar. England did not ask, there was no need for her. But to those who did ask the answer was not long in coming. Promptly, proudif, glorlously, it came from every curner of the world where the Britinh curigu waven. This is our quarrel. Thie in the Empire's war. We are the Eimpire, we and you togother, and we clatm our right. The Inbred quilities of race, the tles of blood and of obligation. the common memory of a sreat past and faith In a great future, theale things spoke IViee an instinct, and that intangible thing we call Nattonnility, Ignoring all personal, petis.parochital clatms, zliowed that It lived in every part of the great whole. It showed that the Fropire was no ill-related and looseis bound series of Indopendent units. but a living organlom, a ercat moral force. It ahowed that the Empire's bond waz certainly not any matter of military force, not merely the bond of race, or of language, or even of color, but that it was rather a epiritual understandter manlfesting iteelf in the Britiath character, in Britinh ideals and in Brifish institutions, All the Dominions are sending men, but in one reepect at lesst nono of them can send the men that wo can send. You connot make a seaman in a week. Thoy cannot anad these man because they have not got the type Inured to all the hardahips of the seas. We have hardy, fearleas, true seamen, who have lived with the sea, who have braved its terrorn a thousand thmos, who lnow it in all lts moods, and I say Mr. Preaident, that whlle we are juatly proud of our ftrst Newtomaland Regimant and of our reserve force, we miay be prouder sitill of this, that this Anclent Colony, the oldest in time, the nearest in
space, the purest in blood, haa ntone among the dependenctes of the Crown been able to send thome seamen in response to the call of the Impertal Nary. For myself, if there da anything which I would have altered in what the Colony tas done, it would lave been that more of our energy and attention would have beea devoted to the Naval Reserve. The Colony has assumed a heavy burden. not alone financially, but aleo in flesh and blood. What are we who stay at home, who huve perforce to send others to do our fighting for us, to say of those who have fallen and to those who have offered them selvent When we contemplate the steadfast herolsm of the British army displinyed upon a hundred flelds of death, the terrible wartare of the trenches, the dafly horrors of eighta and nounts amid which they face thelr work, when we contemplate tho untiring and splendid work of our seamen upan whose vigitance etvillzation Itself seems to lung. I think we may say that it ever the famlitar words of Macaulay were applicable, Hf ever thoy held new meanting-they do so to-day:
For how can man dle better Thon facting fearful odide, For the ashes of his fathers. And the temples of his gods?
Where are the anhes of our fathers? They have rieen again in the moat wonderfut Emplre the world has ever known. It has risen upon their ash-es-lt is thelr montiment,-an Empire whose past has been wonderful beyond Imagination, far beyond the dreams of those who founded it; whose future 担 the lope of humanity. The men of Dorset and Devon, the men of Scotland and Ireland, direct forbeara of thoee who inhabit thit Colony today, buitt that Emptre upon foundations of Freedom, Truth
and Chrlatian Honor. Those principles the Empire has plantod round the world, and it is not the eathedrals and the fanes, however beautirul, that the barbarion has been able to batter with his guns and dostroy, but it te these same princtples; the principles of Freedom, Truth and Chriatian Honor that are in reallity the Temples of our Gods, Ot those who have fallen, and of those who rlak thetr tiven, we may surely say that never bas there been since the world iegan, never will thare be in the time to come, a cause more glortous, wherein a man shall spend his lifo.

HON, MR, MCGRATH-In secondfag the motion, Mr. President, so admifatly presented by my hon. friend, In an address that in the clarity of fte presentation of local conditions, and the tilgh tore of patriotic spirlt which It reachea, in its references to the war, has never, I fhould wink been axceedel here, 1 am fully conaclous that I can but poorly perform the taak asalimed to me, and do but very tradequate Justice to the outatanding thame of this occasion. We have entered upon a new era in our colonial bilatory, one calling for a summary which none but a master mind should easay, for Newtoundtand liss in the past tew mouthis attained, for the first trme, her full intatus as a partner in the family of daughter nations under the Artish Crowa, by her participatlon in the war; and has soaled the patent of her now dignity with tho Hives of sixty of her mons who have thed on the sea in trattle-harness to help puy the price of Admiralty, white 2,000 others, by flood or field, stand ready to do Hkewlige, when the moment comes which nhall demand the same sacrifice from them.

These are times that try men's souls. A year ago we met in the very shad-
ow of the sealing disaster which cost the ilves of 250 of our hardy seafarers the most appalling in our Island's annale, Half a year later we met sgain in the first shock of the moet momentous intornational confilet the worid has ever seen, or, let as hope wII ever ayaln see-our purpose being to rank our amelent and loyal colony with Its sister Domfulons beyond the seas, in support of the Motherland in this cataclyem, the magntude of which few couid even more than dimly dis. cern, though today it is so erystal clear that he who runs may read. Now we meet once more with the greatest nations of Europe locked in a death grapple, to which those who love liberty, and freedom, and what these stand for, clearly recognize that there can be but one outcome, and that the utter and complete destruction of the German militariem that has over spread the world the a cloud, growIng in density and awesomeness with each succeoding year, untll it broke last Juiy in a storm that has ravaged and lafd desolate tho fatrest portions of the European Continent, and caused the world such an excess of sorrow and misery as nought in the his tory of fiuman kind had yet approachad.
So much has been apoker, and wrib ten, and printed, in parliaments and pulpits, in lecture halts and public as sembleges, in daity printa and histor ical volumes, by thateemen and preachers, and sehotara and fournallists, the ablest men of every civlized coun try, regarding the causes of this conpuleton, that it would be as presiumpthous, is it ia unnecedeary, to say more bere to-day than that, at bottom, the war which now tnvolves all Europe and menaces the whole world, is hurzanity's own lifo strugsle, a struggle for freedom, for national integrity, for tree citizenship, in a free
demoeracy of the nations. It is the old struggle of the spirit of hamanity, libcrated and impassioned, agalnst ar* rogant and privileged autocracy, based on the atsumption of "the divine right of Kings: to rule wrong," and the exerciso of territying outrages by the maned flast of milltary power. It In a new stage in the world's fisht for liberty, which has gone on from age to abe with varying success at different perlods, Dut always gaining a new goal along the pathway that teade to democratle freedom as agalngt autocratic deapotism: and from the world-wide shadow of the horror now flooding Europe with blood and bringing surrow and suffering to millions of fanocent, fnoffensive souls, we can see emerglig a new sanity among the nations, a new conception of the Highte of peoples, new 1 imitations to the powera of monarchs, and probabiy puch a reaction atter the existing struggle, as will end for all time an appeal to the sword in the settlement of international grievances.
In the words of Burke the attempt of Germany In this war "represents the miost odfous and formidable conspiracy sagalnet the liberties of Europe, and of mankind, whith history recorde " and fortumate for Britain was it that in thils extremilty her destlnles were entrusted to men who were glante in their respective spherea, nind whore prestence at ker counellboards may atmost be held to bave Lieen a dealign by Providence tor the saving of the nation, Wheh full confideace in the capacity of Asquith, "tho errey-hafred Atlas whose unwearled hands hold up the burden of Imperial state," the British nation met the shock of battle, in hle own words, "onited, calm, resolute, trusting in Qod." The direction ot ber forelgn polley was in the competent hands of Sir Edward Grey, of whose state-craft

It truly may be sald, "whatever record lears to light wo never ehall be shamca." Condueting her fiscal affairs she rejolced in Lloyd-George, magnetic, resourcetul, and seer-like in hts viston, whose measures are "watched by the concours of unnumbered lands." To the War Ofllce at the first elgn of danger came Lord Kitchener, organizer of victory and creator of confidence, inspiring as no other could, tested In Egyptlan desert, and Boerland veldt "steadfast and firm, despite all dread alarms, no threate can make him flinch." And at the Admiralty our Motherland fortunately had the far-seeing and sagely-audactous Winston Churchill, who had the sllent victary won for his country before even war was declared, by the masterly dispositions of the British fleet which doomed the German mayy to the Ignoble role of lying hidden in harbor while the Gorman flag was ewopt from the seas,

Assuredly, slr, our motherland never showed to greater advantage than in the days when, after striving for peace until such was seen to be hopeleas, she unicheathed the sword and ranged herself beside the Allies who bravely bore their part in this most righteous of wars, and assuredly nev. er dld British statesmaushifp approach as high a plane aa in this dark and peril-swept period; when German diplomacy, through its blunders and incapacitles, brought that empire to undisputed shipwreck amld the outapoken contempt of press and people of all neutral lands, whille the plain, unvarnished tale of the singleness of purpose of British diplomacy in its eflorts to avert hostllities, earned for Britain's leaders the admiration of the world, and formed the completest justification for her cause.

Likewise, never did British patriotfem as nobly thine forth as in the
abandonment of all partisan warfare by ther political groups and the swarming to the colors of her young tren or all classes; and when will the deathess story fade or the moving taie of British valor cease to thrill, of the achlevements of Gen. French's "contemptible little army" agaltist fearful oilds, once more establishing the fame of the British as the finest tighting men of Europe, and adding a new chapter to the imperishable record of the nation's army renewing the glorles of Agincourt, fought 500 years come next October; of Blenheim, fought 211 years ago; and of Waterloo, whose centenary the Empire will celebrate th June.

Sth1, it is no hollday task that confronts the Motherland and the Emplre, but a prolonged and degperate struggie with one of the strongest and best armed empires tn the world; and one, moreover, preparing for thls for well-nigh thirty years. There will nelther be omulation nor despondency in the Eritish race at the inevitable vicissitudes and changes of tortune which the war will involve, Britain has learned to tace heavy losses and retriin from rejolelags; she la run ping a stern race and will nether exult nor lement till the final victory is won and duo punlshment is meted out for what Mr. Balfour described as "the accumulated infamy of the Belglan transaction". The time is one for deeds. As a nation she has to translate her sympathy with the opprested, and her passion for righteousness, into vigorous and unrelenting action, and so, whether the end comes swift. 1y, or, as many capable crities beHeve, only after long months of bat the snd suffering, the nation will go forward steadfastly until the final deHverance of Europe is achleved, sparIng nelther sacrifices nor exertions in
the giorlous cause she bas espoused.
How history repeats itself in the present criais Is seen by recalling that of Fredericlt the Great, King of Prus. gifa, whom the present German Emperor is ambitious to eclipse. Macaulay wrote in a celebrated passage: "On the head of Frederick fs all the blood which was shed in a war which raged during many years and in every quarter of the shole. The ovils produced by his wickedness were folt in Jands where the nama of Prussia wan unitnown; and in order that he might rob a nelghbour whom he had eworn to defend, black men fought on the coast of Coromandel, and red men sonlped pach other by the Great Lakes of North Americs." So, today, we see the war occasioned by Prus sia's ambition to domfnate Europe, Involving peoples in the world's remotest regions, and threatening to envelope with its devastating influence, nearly all, if not all, the countries of Durope which are etill trying to maintain some semblance of neutrality against ontrages of a power which regards International treaties as "scrapa of paper" to be repudiated at will.

But we know that whatever the Euffering. whatever the loss in store for her Britaln will meet the peril to her own and the world's Hberties, not Indaed with a light heart, but with that same sober and fixed resolution With which In another sge she con fronted similar dangers, and confident that to-day-as one hundrea years ago, when Bonaparte beatrode Europe Ilke a Colosnus, as two centurias sgo. when the Grande Monarque sought domination; and as a contury previously the Spanish Armada was crushed-victory will come in time to those who fight to prevent a single power dominating Rurope. Ranke, the German hetorian in his ereat worl naya, "but whenever any prin-
cipie or power be it what it may, alms at unlimited supremacy in Europe, some vigorous resiatance to it, having its origin in the deepest springs of human pature, fnvariably arlses and as invariably succeeds." The thought to which the hintorlan here gives utterance might well have formed the gubject of study by the Kafeer, since It is no less true of the present hour than It was of the days of which Ranke was writing. He wrote of Spain and the Great Armada that Spain launched as the first atep towards the conquest of Furope, but the thought In the quatation just made is peronnially nound,

The present war is Just as much a war of liberation as was the Amerlcan Oivil War, and the Allied Powers can ao more agree to an ineonclusive settlement than President Lincoln could have compromised with the Southern rebela: The Germans, in a very Ilteral sense, are rebels against civilization, sguinst pubile law, against all the securlites of a tolerable existence, and every fresh development of "frightfulnest," as Frederick the Groat, who concelved this Bystem, descrlbes it, must only norve the civilized powers of Europe more determinedly to the tasls before them, the stamping out of this barbarous creed and all itn hateful nocessorles, even if it involves an appailing sacrifice in blood and treasure, in a struggle of terrible proportions calling for long patience and the highest patrlotism The pity of it is that a nation ahould be so led astray and that the German Fathseland, after rlising to unprecedented heights of prosperity and power, has been betrayed to fts own destruction, and all its fine ambitioan brought to rufn; s3 that she appoarz ready to go down to utter defeat It a blaze of doubtful slory, and after a display of combined rocltlensneas.
courage, and inhumanity, unequalled in contemporaneous annals.

Among the happlest and miost inspiring features of the war was the splendid and spontaneous rally of the whole Empire to the slde of the Motherland. Autonomous Dominions, Crown Colonles, India and its appanages, all alike animated by but one spirit, promptly rose to the occasion. They all realized that this is a life and death struggle, not only for Great Britain but also for Greater Britain, and all British ideas of liberty and Justice; all saw that it concerned them as directly as it did the parent Isles, and that the Empire must either sur vive it or perish; and all, too, were fired with a single determination that the Empire should survive it and not pertsh. So they reaponded to the unspoken appeal of the Mother Country almost ere it was conceived, and this response will go aown to history while the world remains a world, $a s$ the most marvelous manifeatation of the unify. ing influences of a colonizing race of which the human family has any record.

The onrush of this tidal wave of patriotic enthuslasm through all the realms over which the Union Jech flies, saw offers of ships and troops, of foodstuffs and money, of help in every coneeivable form. These poured in unceasingly and were accepted with gratifude; they strengthened the natural consclousness that in this atruggle Britain fights as the champion of the world's libertles and that all neutral countries know the situation is such today as it was a century ago, and the position of Eng. land now is the same as then when the younger Plit delivered his dying message: "England has saved herself by her exertions, and will, I trust, save Europe by her example" At that time, bistory tells us, England did
not sheathe the sword until, after nearly twenty years of fighting the freedom of Europe was secured, and the same end must be attained now, though we hope and pray that the struggte will not be so prolonged.

We rejoice with His Excellency that Newfoundland, the oldest and loyalest dependency of the Empire was quick to range frerself beneath its banner. Gems nor bullion we had not to give, nor golden grafn, nor fatted stock; fut we offered full toll of our best and bravest, and my hon. friend across the House, who proposed this motion, enjoys the proud distinction that the first of the sons of Newfoundland to make the sreat sacrifice in this war of liberty, was bis brother. Lincoln says that He who lays down his life pays the last measure of devotion to a country or a cause;' and Ruskin emphasizes that "the willingness to die, not the willingness to kill, is the reason for the honor in which the defender of bis country is helã."

On the subject of colonial participation the golden books contain no more prophetlc lines than those of William Watson to England and her colonles in 1905:
"She gtanils \& thousand-wintered tree By countless morns impearled;
Her broad roots coll beneath the sea, Her branches sweep the world;
Her sends, by careless winds conveyed, Clothe the remotest strand
With forests from her seattering spade.
New nations fostered in her shade, And linking land with land.
"O yes by wanderligg tempests nown, 'Neath every allen Btar,
Forget not whence the breath was blown
Thst wafted you afar!
For ye are still her ancient seed On younger soll let tall-
Children of Britain's island breed
To whom the Mother in her need Perchance may one day call."

And ir todiv, sir, we look in tmanhuation bryond the sea-rlan, and plo ture the mallint flects in thetr tin-
sleeping patrol of the watery wastes that are the theatre of the naval porthon of this appalling strugele, our sturdy sailor sons can be found in every class of British war-craft, from submarine to super-dreadnought, doIng their part to maintain the supreme object of the Allied powers, the deotruction of that Prussian militarism which, as Lord Haldane recently said, "has driven all Germany into courses that are frcompatible with the freedom of Furope and the growth of elvHizing finfluences." Already our seafarers have pald in generous meas ure the price demanded by all, and by none, or at no time, more than In the shock of battle by land and sea, proving their manhood and verifying anew the great saying of Carlyle's that: "Never pleasure, but suffering and death, are the lures that draw true hearts,"

Our soldiers have not yet taken their place upon the battle line but when they do, their fellow-countrymen are confident that they will aczult themselves like men, standing shoulder to shoulder in defence of what we belifeve is right, and for the maintenence of the best that is in the world; and Motherland and daughter nations united in this convietion will go on in the spirit once expressed by President Garfield, "A nation is not worthy to be saved, if, In the hour of its trial, it will not gather up all its stores of manhood and Hife, and go down into the conflict, however bloody and doubtful, resolved on measureless ruin or complete success."

The manner in which the work of ensuring the Colony's participation in this struggie was enterprised merits the warmest commendation. The Government and Oppositton co-operated splendidly and every class and element amongst us likewiss lent its slapport. The enlisting, training and
desaptching of the naval force lay with the Admlralty, but the efforts of volunteer speakers were secured to stimulate enlistment. The organlzing of the Flrst Newfoundland Reglment was taken in hand by a nonpartisan concern, the Patriotic Assoclation, whiely representative, and which, throush its various committoes, porformed its duties most creditably, His Excellency the Governor did excellent service, ably seconded by Sir Joseph Outerbridge in the organizing work, while in the financiel department, Hon. E. R. Bowring sup. plemented his efforts here last seas. on by giving close personsl supervis. fon to the work in England the press ent winter. As every member of this House knowe, the gentlemen composing the various sub-committees labored earnestly and unselfishly in their varlous departments, making the whole most creditable, while the splendid gift of Mr. W. D. Reid, of two machine guns enables our Regiment to take the fleld with an equipment as completo as that of any battallon in the regular army.

Moreover, provision was made for the dependents of our soldiers and sailors and thanks to the liberality of our citizens of every class, among the most generous being several members of this Houee, a Patriotic Fund has already boen raised to assist the families of those who have gone on active service, and to provide help for those who may return disabled, or for the cherished ones of those who may lay down thelr lives.

And while the men were doing this part, the women, under the equally capabie leadership of Lady Davidson, were proving no laggards in thelr de. partment; and In providling materials for the sick and wounied in the war. and comiorts for our own soldlers and sailors, they achieved what I think the
records will in time prove to be an undertaking that, in the revulte, to other Dortion of the Emptre can excoed.

I should Hike bere to briefly pay trfiute to others of our women -to the wires, and mothers, and slaters, who lave seen their loved ones go farth to war without murmur or comphatut, thomgt It livelveet substanthat sacrifice to themselven, It has rallea to me in the work of the Patriotio Fund, to hear the storien of those of them who have sought asilatance from ita resources, and I say there ta no more apleadid or inepirltine phase of this Colony's part in the present atrugele than the qutet herolam of thene womenfolk, the reanomableness of theitr requests and the fatr appreelation of the all-tho-plitrut triflie it if proving posalhle to allow them.

This fa a phase of such a period that, it weomis to me, alwaye gets too titue recogntictio, We apeed the wherior on bis way with cheern and handAhakes and every manifestation of popular enthushaam and well we may. for he goes to riak, of may be, to give his life on botinit of his country; but we sthould not forget thone he tanven at home, the wives, and mothere and uistera, the chilldren who wre often 4oomed to misery and privation. Let aia remember that life is in ithelf a great battiefield, that victorten and diffeate are wan or lont in the woman's walled ap heart who sees her sou or husband take his place among his country'e defenders, and that they derairs is mard of recognitton ith any enumeration of these who arn soting thetr part ta auch a crlata; and that 4qually deserving of a worl of pratirs ire the fittiers who sro ment? ing forward thetr somes to play their part in this war.

That this Colony mhould fulfer in itin overstar commeree and in its in
ternal trade as a result of the war whe Ineritable. Not alone are the eountries engmged in it, and thetr dependencles, even in the remotest paris of the alobe, striltariy affected. but teutral countries are nleo aufferling eeveraly, and the United Staten liat had to make provielon for an expected deflett of a thundred million dollars In lis manial revenues this year, in conseguence of the dislocation of trade resulting from the war. Our attitude, however, in this matter should not bet one of complatit, but one of thankfutnens that we have not faced worne than las been our fortune. Our fish fe being carried with virtually in Interterence, to every market we pos mess, and although one cargo was sumk, get, ar agalust that, we have to met off the fact that this winter we sustalsed no losses of local ehlpping from stress of weather. We might have sepen the ocoan unsate and our thah supplles rotting in our stores; but, thanks to the Britinh navy, the seas are as free to un as ever. We can better apgreciate what thls means by pondertug on the contenation emhodied in the memorandum Justifytig the German Nisval Law of 1900.
"An unsuccessfal naval war of the duration of even only a year would destroy Cermany's sea-trude, and would thereby briag about the mont dianstrous conditions, first in her ecotuomic, and then, as an immediste consequence, in har social life Quito epart from the consequence of the posallile peace conditions, the destruoHon of our sea trade during the war ponld not even at the clone of $I 4$, be thade good uthin meauurable time, tind would add to the sacrificer of the -

That the present season promines to be profitable for those cangazid fo thts atapte fudustry we are encournged to hope, and
though the senl fishery promiseg to be a total blanic yet we may reasonably expeet that as the war progresses towards a conclusion and the clouda begin to lighten matters amongat un will take on an improvement and our people be able to enjoy a raturn for their labours sfiniliar to that which they secured in previous years, and the Colonial Treasury benefit accordingly.

I do not propose to follow my hon. friend in his review of the local eituation to the consideration of which le brings the Enowledge and experkence remulting from his active fientsfication with the staple industries of the Colony, but I certalnly agree with him in the view he takes as to the absolute necessity of economy both on the part of the State and of the eommunity. Some years ago Hon. Mr. Flelding, then Minfster of Finance for Canada, sounded a warning to that country that the time had come to "shorten sall," and I think there is equal need for us in Newfoundland to hearlen to a similar warning end begin to live less expensively both as individuals, as communities and in the admintetration of our public affairs. We have enjoyed soven years of plenty, and whlle I do not suggest that we are In for seven years of advers. ity, I think we will be well-advised If we see in the present occasion a period when economies can be judlefously practised, and steps taken to husband our resources to the fullest extent.

The syesch from the Throng indicates a decided shortage in the revenes and I should think there is hitte arospect of an improvement while the war lasts, but in this respect, aleo. our Colony is not singular, becanse the Mother Country, Canada and Australla, are confronted with the same state of affairs, and neutral mations
as well. We can only trust that a solution of the strugele may be ensured before many months, so that it may beoome nosatble for the energies now being expended in slaughter and destruction to be turned to the producthen of articles and ohjecte whleh will make for the comfort and advancement of the world, and that our country may enfoy the benefits of peacaful progreas.

Hence it is encouraging to note that a constructive measure of much promise, in the way of immediate emp:oyment and comprehensive development is stated to be embraced in the undertaking to which reference is made in the Speech, for the estabHshment of an findustry of exceptional magnitude in thile Colony and Labrador, involving the outlay of many milllons of dollars, and I am sure that at any thme, and especially at the pres ent time, when the need for new industries is ao imperative, such a projeot will reeelve the most sympathetio consideration of both Houses of this Legialature

Not nlane are laborgiving enter prises destrable now, but it is even more destrable that we should, if jos sible, set on foot such enterprises In crder that we may be able, in some degree at least, to solve the greatest problem that this war is going to present for the Colony; and that is, how we are goling to re-absorb into the industrial life of our country the 2,000 or 3,000 men who will return here after the struggle is ended, to take up the pesceful battle of life amonget us lignin and to carve out for themselves an existence In their native land where new conditlons will confront them and bew obligatinns will have to be met if we are to re tain them here permsneritly and not see our Fsland home suffer the permanent losis of virtually all thesa
fiot yeusg fellown.

## COMMITTEE ON ADDEKNE

The modlint was them siopted and fhe Presidint mamed Hom. Mesars. Harvey, Medrarl Skelton. JD. Hran and Tolinisun as a Cotrmittiee to draft the Addrens in Reply.

## INTERENAL ECONOMY COMMIS. gron.

Hon Afr. Blimop then tabled a meurorandum from His Excelleney the tioverner, covering a ecrtified eopy of the memos of the Hen. Trecutive Councll, appolnting the following to Se the Cumminion of Internal Nownday for the Leclelature the present ©esrian:

The Him. Th. Prealdant of the Lep: Abathe Cuanell.

Hinc. IL. K. .ilihop.
Heni. P. T. MeGrath.
His Mrobir ith= Speater Memse of A"wembly.

Rt, Han. Sir E. P, Morris.
FIon: I, R., Bemnett.
ffon. C, It. Emernon.

Hon. Mr. Bishop also preseatec reports of His Excelleney, Sir W E. Davilisot, as Presifient of the Patriotlc Association, on its work up to March 31st; also the annual report of C. E. Schools for 1914.

On motion the Honse adjourned until to-morrow. Fridny, at 4.30 p.m.

ERTDAY, Aprll 9th,
The House met at 4.30 D.m. Dursuant to adjournment.

## REPOR'T OF COMMITTEE.

Hon. Mr. Harvey submitted the report of the sub-committee on the Address in Reply, and moved that it be read a first time.

ADDRESS IN REPLY.
The address was then read as foltows:
"To His Excellency Sir Watter Edward Davidgon, Knight Commander of the Most Distingulahed Order of St. Michael and St. George, Governor and Commander In Chief in and over the Island of Newfound. land and its Dependencias.

May it please Your Excellency:-
We, the Leglslative Council of Newfoundland in session convened, beg leave to thanl Your Excellency for the gracious speech which Your Exopttency thas adressed to both Houses of the Legis)ature.
(Sgli) JOHN HARRIS. President.
Counct Chamber, April. 1915.
On motion of Hon. Mr. Harvey the report was read a second time, passed, atigroseed, and ordered to be presented to His Excelleney by a deputation of the Whale House .

## REPORTS.

Hon. Mr. Blshod tabled the Fourth Interim Feport of the Dominions Royal Commission relating to New foundinnd.

Also the report of the Resident Physician of the St. John's Asylum for the Insane for the year ending Dec. 81st, 1914.

Atso the report of the Schools of Newfoundland under the Salvation Army boards for the year ending Dec, 315t, 1914.

Also a report of the examinations Leld by the Coumell of Higher Educatlon for the year 1914.

On motion of Hon. Mr. Bishop the House then adjourned till Monday nex at $4.30 \mathrm{p} . \mathrm{m}$.

WEDNESDAY, April 14.
House met at $4.30 \mathrm{p} . \mathrm{m}$, purauant to adjournment.

## PATENTS AND TRADE MARKS BILL.

Hon the President informed the House he had a message from the House of Assembly acquainting the Legislative Council that they had passed the Bill entited: "An Act respecthig Patents and Trade Marks," and requesting the concurreace of the Council in the same. On motion of Hon, R. K. Blehop the Bill was read a first time and ordered to be read a second time to-morrow.

Hon. R. K. Bishop begged leave to tay upon the tabte of the House the Report of the Internal Economy Commassion and asked that it be read by the clerk.

On motion of Hon, R. K. Bishop the House adjourned until $12.15 \mathrm{p} . \mathrm{m}$. tomorrow.

THURSDAY, April 15th.
The House met at 12.15 p.m, pur suant to adjournment, and proceeder to Goverament House to present the Address in Reply to His Excelency's Speech from the throne.

Fetnrning to the Colonial Chamber, the Hon, President informed the House that a deputation of the wholo

House having waited on His Excellency, had recelved the following reply:

## ADDRFSS OF THANKS.

Mr. President and Honourable Gertiemen of the Legieiative Counell:
I thank you for your Address in Reply to the Speech with which your present mestion was opened.
(Sgd.) W.E. DAVIDSON, Governor.
15. April, 1915.

On motion of Hon. Mr. Biahop the House then adjourned till Tuesday muxt, the goth instant, at $4.30 \mathrm{p} . \mathrm{m}$

TUESDAY, Aprit 20ith.
The House met at 4.30 p.m... pur: suant tc adsonrnment. PATENTS AND TRADE MARKS BIL.
HON, MR. EISHOP-On August 25 th of last yesr the Secretary of State for the Colonles forwaried His Fxcellency the Governor, copy of this Imperlal Trade Marks Act of 1914. passed by the Imperial Parllament on the 7th Auguet, 1914; also a copy of the Imperinl Act reforring to patents and designs, passed by the tmperal Purliament on the same date; algo at Act to extend the powers of the Boarl of Trade during the continuance of footillics to make rules under tae Patents and Deadins Aet of 1507 and the Trade Marks Act of 1905 , paseed by the Imperial Parliament on the same difte. These communicatione Were not recelved by His Fixcelleary the Governor in sufficlent time for a mill to be drifted dealing with thip matter at our spocial war session. keld during the first week of Septembar last. This Bill has for its obJect tho carrying out of the saggestions of thg varlous Impertal Acts nhove referred to in so far as it may be necessary to deal with the matter of patenta, trade marks and deslgas in, Newfoundland.

The object of the Imperial Legists tion was to set tree British manufacturers add others from having to pay royalty on German discoveries patunted In the British Emplre.

At the present time there are some fourteen Newfoundland letters patent in force granted to German and Aus-tro-Hungarian subjects, and thle Bill now before the House empoweri the Governor in Councll to make rules and to do such things as may be deemed expedient for avolding or suspending in whole or in part any such letters patent. The Bill ls strictly in accord with the pollicy of the Imperial ParHament, as get forth in the Imperial Acts passed on the 7th August, and consequently should commend itself to the favorable consideration of the House. I beg in move its second reading.

The Bill was then read a second time.

On motion of Hon. Mr, Bishop it was ordered that the Bill be referred to a Committee of the Whole House on to-morraw.

Mr. President Informed the House that he had received the following tmessages from the House of Assembly that they had passed the Bills entitled, respectively:

An Aet respecting the Naturallization of Allens;

An Act to amend the Act 4 Geo. V., Cap. 17, entitled: "An Act respecting the operation of Saw Mills," and

An Act relating to the Sale of CodPiah on the Labrador:
in whieh they requested the concurrence of the Legishative Councll.

ALIENS AND CODFISH BILLS.
On motion of Hon. Mr, Bishop the Bill respecting the Naturalization of Allens, and the Bill respecting the Sale of Codfish on Labrador, was read a first time and ordered to be read a second time on to-morrow.

## BAWMHLLS BHIL.

On motion of Hon. Mr. Gibbs the Bill relating to the operation of Saw Mills, was real a firist time and ordered to be read a second time on tomorrow.
On motion of Hon, Mr. Bishop the House sidjourned till Weanesaay at $4.30 \mathrm{p} . \mathrm{m}$.

14 WEDNESDAY, April 21st.
The Coincil met at $4: 30$. When the Order of the Day was called, the Hou. R. K. Bishop rose and proposed the following Reaolutions:-

## RESOLUTIONS OF CONDOLENCE.

The Commetl, having learned with ereat sorrow of the very recent death of the Hon John Bray Ayre, hereby records its unfeigned regret for the sad occurrence.

This event has deprived this Body of a sagacious and sound Councillor, the business comminity of a progressive and prosperous Merchant, and the whole lsland of a friend.

The decessed gentleman was highly regarded in Church and social circles, and was one who ever contributed bountifully and in a sincere spirit, not only when public emergencies demanded philanthropic action, but every appeal for any deserving person or object met his ready and generous response.

RESOLVBD-That a copy of this Berolution be transmitted to Mr . Ayre, expressing the sympatly of the Council with hor and the family of the late Hon. Mr. Ayre in their bereavement.

RESOLVED That the Counell do now adjourh as a mark of reapect and esteem for their late brother member,

## HON, MR. BISHOP sald:-

I rise for the purpose of moving the foregoing resolutions. At the present time, Mr. Preaident, I could
wish to say a great deal. I find it die. floult to say anything.

In moving these resolutions, referring as they do to a Member whose seat has been next to my own for many years, I am impressed with the thought of a closer connection, for during the past forty years of more I have been honoured by the rriendship of John Bray Ayre $-a$ friendship Intimate, unbroken, and upon his part manifested so spontaneously and sincerely on more than one occasion that with one posatble exception I could not but regard him as the truest and closest friend it has been my privilege to possess: Mr, Ayre occupled his seat here when the present Session was opened, but the condition of his heaith. Which has boen failing for sometime, was known to all of us, and We felt that his recovery was not to be expected. Mr. Ayre was no ordlnary man, his genlal disposition made everyone his frlend, and his kindliness gave scope to his unusual talents, for it was mainly for the public benefit that ho employed the time he could secure from his business enzagements.

As the Senior member for many years of one of our largest, most enterprising and successful mercantile firms, and as director of several of our manufacturing concerns, his ability was marked, and his public spirit was genuine, He was a bellever in his country, and in the value of its enterprises. He was also an architect. an artist, and a musician of no mean order, and all those giftg were employed unstintedly and gratuitously for the benefit of all who needed them. All such work was performed by Mr. Ayre as a labour of love.

His benefactions were many and important, but not because of these will lie be best and longest remembered, but becauee of his geauine,
sympathetic, and attractive personality. "He was a man take him for all in all-we shall not look upon hils inke again."

1 feel sure the deepest sympathy of the Council goes out to-dny in fullest meaaure to Mrs, Ayre and all other members of the family.

After the resolutions had been for mally edopted. the House adjourned until Friday afternoon.

FRIDAY, April 23rd.
The Council met at 4.30 p.m., pursuant to adjourmment.

## PATENTS AND TRADE MARKS BILL.

On motion of Hon. Mr. Bishop, the House went into Committee on the Patents and Trade Marks Bill

Hon. Mr. Milley took the Chair of Committee.

HON. MR. SQUIRES-This legislation ls a special legislation desirable because, and only because, our Empire is at war. Under this Bill certain powers are vested in the Governor in Councll to make rules and regulations which might have the effect of modifying or cancelling the rights and privileges siven under the Newfoundland Law to peraons who are now Alien Enemieg. On Auguat 7th, 1914, the Imperial Parliament dealt with this matter. A copy of that legislation was sent by the Secretary of State to His Excelleney the Governor, but was not received in time for a bill to be laid before the Legislature at our special war Bession of last year. The efloct of this measure is to empower the Governor in Council to make rules and regulations governing these matters, which rules and regulations should certainly be in conformity with the pollicy of the Imperial Pas: liament in cannection with this matter. In view of the fact that our Empire is at war, it is most reasonable
that the Legielatire should empower the Governor in Council to conform with the polley adopted by the Imperlal Parllament to deal with patent. rights which alien enemies may have under and by virtue of Britigh Statutes.
The Committee rose and reported the Bill passed without amendment, whereupon it was ordered that the Bill be read a third the to-morrow.

## NATURALIZATION OF ALIENS BHLL

HON. MR. BISHOP-This Bill, Ike the one just passed through Committee, was sent by the Imperial anthorities in August to His Excellency the Governor, and repeals all locat teglsfation, and substitutes for it a eopy of the Imperial Act with some modifications to suit local requirements. These can be pointed out in commttee. 1 beg to move the second readling of the Bill.
The Bill was then read a second time, and on motion of Hon. Mr. Bishop, was referred to a Committee of the Whole House tomorrow.

## LABRADOR CODFISH BILL.

HON. MR. GIBBS-In moving the second reading of this Bill 1 wish to point out to hon. members that its obfect is to appoint a Board for the purpose of fixing the price of fish shippod off the Labrador coast. The first secton of the Bill defines the name of the Board; the second makes provision how that Board is to bo appointed and who shall compose it. The third provides that if appolntments of any of them be not made by the ffrst Monday in July, then upon applifation to the Supreme Court or a judge of it. such an appointment shall be made within ten days of the application. This is a very neccosary provision, because unless the power of thlis kind were included in the Bill it would be of no value and thoperative. The fourth section makes provision that
the Minister of Marine and Fisheries shall be notified of the persons who constitute the Board, and then he causes this to be published in the Royal Gaxette, and the publication of the names of the Board in the Garette shall be conclusive evidence of the appointments under the provisions of the Act. The next section deals with the question when the Board may proceed to fix a fair and reasonable price for cod sold on the Labrador, and as hon. members will see, it is not obligatory on the part of the Board to tix a price within the time limit there specified, viz., two months. They may postpone their action in this respect if it appears desirable and in the public interest, but they cannot postpone it for any later period than the 1st of October. This provision, I think, will commend itself to hon. members, becauss It may not be in the fiterest of the trade or the fishermen, that the price be fixed within two monthe from the date on which the appointments are published in the Gazette, for the reason that the trade conditions or markets may be of such a character that too high a price may be fixed withif a period of two months, and therefore by having a provision of this kind, that the time for fixing the price may be postpened until not later than October, when it can be shown that it is in the interest of all concerned that this be done. The next provision deals with the possibility that if the Board do not fix a price (becanse it may happen that the Board may not fix a price at all) for that purpose we want machinery whereby some procedure may be followed for the purpose of compelling the Board to fix a price, in order that the objects and aims of the Introducer of the Bill may be accomplished, and for this purpose, that if the Board does not flx a price, it may be done on application to the Supreme Court or Judge thereof, and by any member of the

Board, or in view of a sale, a person who has sold flsh without any specific price having been agreed upon, and Fithin 30 days after applieation, the Supreme Court or Judge thereat may fix the price by which fish on the Labrador is sold. The next section sfmply provides the form of procedure, and it is done upon application to the Court on motion betore a Judge, either in Chamber or by aummons, and the summona bhall bo served upon the Fresident of the Board of Trude and irestfent of the F.P.D, both of whom are entitled to be preent at the hear ing (by counsel), but no costs are allowed in connection with the application to tho Court. Section 8 giveg power to the Supreme Court, when necesiary, to appoint counset to asslat in the examination of witnerses rnd allow proper remuneration therefor the mount to be patd out of the revenues of the Colony, upon the certit:cate of the Juige of the Court. It may happen that quite a number of wit. nesses may be examined as to facts or what is falr and reasonabie price for finh, and that would necessarily bring about the introduction of counsel in the matter to have the examination conducted as expeditiously as possible anid according to the rules of evidence. For this purpose this section is introdueed. It also gives power to enforce the attendance of wltnesses and compel them to sive evidence, but witnesses attending the Court are not entitled to fees or traveling expenses, must do so at their own cost. If a witness sives false testimony with re gard to the subject matter beforo the Court, it is punfatimber as a misdemeahour. Section 10 refers to the circumstances under which prices may be fixed. It is only in certain events appearing that this Board whall be called to fix a price for flah, if there is no eatisfactory agreement between buyer or seller when a contract is made. If the fisherman on one stde and mor-
chant oe the wher agron to $m$ price there is ap mecensily, nur cas the Boars of Cruart latersuber, bat it the price named whes the sale talies place If the curreat prlon, or if the agreetwent made is sot clear is its terms then the Bourt may be cattet upat to fix the price. The mirat woctoon deatr with the ganstion nt a lowus. Hina. mumbers eagaged in traile will know, that often men arn promfirod if tionus in mattition to the pricon, unit otten coume to seek for it, fant can't ret it. ta nome cases they buve to sue for it. shat the quastion of contracts itice bunus and other questions have to be adjudend upon, trweiving expanie and delay. This Section provides that whiets the acpernient to curfitil priee for the fioh or worme soch indeflinite phrase and finheriees are prowiend a borus is allition, the shall have the fietit to fuceive then hosus in miltulon to the griee of the Risb flaed by the formmiliee of Beand The arxt SeeBlete itit provities that the Mtinfiter of
 the price under the Act, and ahall Is ane a wetice to be pabitiahed to the next traue of the Gavitte, and when puthtished to be tatein in conctuitve evidence of the priee fixed to the Board. Thase are briefiy the aubstasce of the provisions of the Bill. Hon. mombers ary, ho dutub, fally conversant with the troutles and difficulties wilh which all permuth enraged in the Labraitor fiehery lane to deat with is relation to tish whlyped off the Kabridor coast. MON. MR, JOB-Thle nill. Mr. Fraidenic gives us an opportumity of commidering what muit certatsly te dmalenater our miost valuable in. fuatry, it is an enterprise which emnot se compured with any thithe slee hers. in it is ixvolred no laiport: od labor sud ad prot vility and whis $=0$ consfiter the drav Iscks to the peoples who pro to Dir Lalirniter ta thib anit ar a makes whicn fick fors anit foue are thelr compations; I thtel cantumplation of the indertry is a tatter that ahould merte the earneit. conslderation of theme Honses und that We alimuld afrive to make the fian knting of their prodace an mimple as
possible. For the lost 20 or 30 years I do not think much consideration has been given this industry, but strange to say after so many years it is left to lawsers to bring in such a bill as thls and I must say it is a reflection on the trade generally that they had not attended to this duty themselves Now before I refer to the objects of the Bill, I want to mention the fact that thls flshery hiss fallen to a very low ebb. This हreat industry that in 1884 was about its heyday exporting no less than $536,000 \mathrm{qtls}$. direct from the coast, this year is only 91,000 quts. Now at that time there were regularly 400,000 qtis. exported The firm of Munn, a single exporting Company in 1882 shipped 128,000 quintals themselve日; in 1883 182,000 qtls.; in 1884, 124,000 qtis.; in $1885,172,000$ quts, bestdes what was brought home. In other words one firm was responsible for 200,000 qtis, and nowadays not one firm can elnim to be exportors of 30,000 quts., even while last year the blggest Labrador exporter shipped only 20,000 qtis. This is what has happened to the Industry and it is hard to find a reason because conditions to-day are far better for everyone engaged than then. Now there is the Marconl, plenty of metor boats, two mail boats, hospttal aceommodation and better schooners In addition, and last but not least Iargo equipments of twine not to be had in these old days. Thls last year was not the only year recently when we had such a small fishery. The year before was as bad About 111,000 qtls. only were exported, a state of affairs which affords people interested in this fishery no satisfaction. Then, again, the price Is better pow, In 10 years from 1878 to 1889 the price averaged $\$ 3.04$ per qtl.; the last ten years current price averaged 88.50 . The weather conditions have partly accounted
for the difference, but only partinilly because we find unfortunately it has been diffeult to get statistics prevlous to date of Mr. LeMessurler's going to Custom House but since that date most useful information is available. The number of people engaging in the Librador fishery for 1894 was 14, 500 persons as agalngt 10,000 for last year so that there were about 4,000 people less than twenty years ago. People hisve other avenues of employment, wh ch nio doubt took some away, and lese men have been avnitable the past two or three years while there is fese creat avallable to-day than ever before in the history of the fthery, for the reason I think that it does not pay to export fish from the coast. it is not a paying venture and older exporters have got out of it. The direct object of the Bill is to protect the flshermen and that is why it is lirought in. But I think at the same time that it does not harm the exporter I can bee nothing in it to object to and indeed if there was anything in it that would discourage the fisierman or exporter at present it would be bad then to bring in such leginlation having in view the fow state of the industry There may be some present who do not realize how this current price is fixed and 1 will explain it. The seller in exchange tor his fish is हiven a fish recelpt, the price being left blank but the worde earrent price being on the rocelpt and this recelpt or blank cheque becomes current coin. There are few people dolng busfness who are not interested in the value of thls roceipt as it therefore is not only a matter botwen rishermen and merchant but every rmall shopkeeper and trader is interested. It is important that this should be made complete Instead of which we find that for months the price is unsettled and the people may hold back the
recelpt and in fact all the recelpts of last year are not disposed of and some are now the subject of nnnoying titigation. I to not know how this current price has been decided on. One man says the priee should be such and such a figure, another man fincther and the thitg is crooked from boginning to end and it is about time that some means of aettleraent was originated. Another view to talie is that it is a most Mideculonsly onesided affair for the purchiaser to have the settling of the price white the seller has no say: 1 think that each party ahoutd be represented in tho fixing of this current price srd therefore I think the measure is a good one as far as it goes. But thero are difficulties which will be appareat, whan it has to be applied, seeause the tish shipped in the eariy part of the season may be more valuable, some years and fish shipped In the latter part of the year may be more valuable another seacon so that it may be necesaary to make murs than one price in future. I want to make mention of the statemient made in the other House that an unfair advantage has been taken by the merchants in flxfing this current prices. I think the records will prove that such is not the case. If you look at the list of shippers of 10 to 20 years ago and compure them with the list to-day you will find the old shipiers not there. The Labrador used to be supplied by Water Street largely, all took an fntorest in it but now the namea are abseat from the list of exporters because the losecs werc more than they could atand. I look to a settlement of the price to help the exportor We all agree that the man who ships the fish from Labrador should get a corumission and he will be able by representation to the Commissioners to claim that a commission is procured sutu in thits way to put a little
life into the filhery. Some say the large supply and demand should settle it. But this is imposaible with those far from the haunts of men and the Enowledge of markets; theretore some fish will be always shipped at current price.
The question of date is an awkward matter. It wis first intended fo fix the dato earlier in the scason and 1 understand, that some wanted It in July or August. Thie is absurd. First because the extent of the catch must be comsidered and the conditions of the market must be known betore the price can be arrived at. The perEonnel of the Board should be beyond भuspicion and the flshermen, as well us the ahpper, should be welt represented in tho selcetion of the Commiselon. The queation of clause 9 is is somewhat serious one. It is the onIy cluse that I can sey I linve a doubt about. I ask you to imasine three Commissioners being appointed,who are competitors of mine and ask me to expase my private prices. These can call upon a merchant or shilpper (it does not matter whether he boukit at the eurrent price) he If havied betore the Commissioners fits books must be exposed, else he will be penalized for contempt. Whether this can be modified, I do not know, but when the Bill comes to the Committee stage it stiould be very carefully considered. I want to say in conclusion if we are going to fm prove mattore on the Labrador, if thinge are going to be better and fleh caught and sold at good prices, the people who know most say that something muat be done to improve the eyre or else to increase the value of the eatels will be futle.

The Iceland people have driven us out of some of the Italian markets on account of our cure. These Commiesfoners are likely to have a difficult task, but, I thitik we ought
do all we can to aasist them and I propose to heartily support the Bill.

HON. MR. GOODRIDGE-Mr. Pre. sldent, before we pass the second reading of this bill 1 think we stiould have tome time to constđer it, as it is adopting legislation almost unprecedented, viz, the prieing by law of any commodity which should be fixed by supply and demand only. I would, therefore, ask the hon. mover to adjourn the second reading. SureIy if, as Hon. Mr. Job states, 850,000 quts. were shipped from Labrador in 1884, and priced without legislation, there should be no difficulty in pricing the smaller quantities lately shipped from the Labrador Coast-only 91,000 que, last year. The bill, in my opinion, is unworkable. It provides for the appointment of two gentlemen to settle a price for Labrador fish shipped of the coast and such price to be fixed not later than 1st October. The one is to be appointed by the Presldent of the Board of Trade, the other by the President of the F.P.U. It provides for no remuneration, and I doubt if any one competent or deairable will accept such a position and be exposed to the dissatisfaction that would exist elther from buyer or seller or both. The price for the season ts to be settled before lst October. Now the early shipments generally sell at good price, and the price for the season would no doubt be based on satea effected thus early. No doubt the promoter of this legislation is desirous of protecting the fishermen from what may have been an injust. fice in the past, but whatever there may have been previously, it is certain that of late years, the fishermen have recelved full value for Labrador rish shipped of the coast, and I am of opinfon that this BiII, it passed, instend of protecting the fishermen'a Interests, will result in injury to them. What exporter is going to charter ves-
sels to proceed to the Labrador, load late in the seazon with a knowledge that he has to pay a price probably fixed on a hasis of early cargoes mold, and instead of getting off their catch, the flahermen will have to bring it home, and possibly some of them have to leave it on the Labrador for want of tonuage. There are certath for, efgners who have of late gone to the Labrador to buy cargoes, but it will be found that fishermen will not sell at any fixed reasonable price, but will insist as at present on current price and a bonus thereon. I am strongly of opinion that this bill-a species of legislation almost imprecedonted should not pass, but will ask the mover to defer the second reading and give it further consideration.
HON. MR. GIBBS.- 1 would mave the order stand deferred in order to give hon, members a chance to atudy the bill.

SAWMILLS BILL.
HON. MR GIBBS.-I beg to move that this Bill be now read a second time, and avall of the opportuaity to polnt out to the House that the last session of the Leglslature a law was passed regarding the operation of saw mills on what is called the three mile limit, and under that act free licenses were siven to bona fide fishermen who had mills there and cutting not exceeding ten thousand feet per year. Notice of application had to be pubHished in the Royal Gazette for three months and the owner was also required to take out an annual license and the renewal of it was at the dis. cretion of the Minister of Agriculture and Mines. The license did not confer upon the owner of the mill an excluaive right to the three mile limit, but only a right in common with the public, and the llcense was subject to the provisions of the Crown Lands Act, except that no royalty was paid on the timber manufactured. of
course there were other mills operating thers of greater capacity, and the Act doalt with them. Thes were contributling nothing to the general revenues of the country, but under the Aet paseed tast year they becumin subfect to the payment of royally. The number of mills operating was, I think-25\%, of that number 120 were fishermen's mills, the rematnder were of greater capacity. The Act of last year made provision as follows: "The Glovernor in Council shail have the right to reaprve by prociamation in the Roynd Garette suci sectlohs or areas of Crown lands as may from time to time in the puibin interest be deemed expodtent, and to prollitit the cutting on such lands for milling pur. poses, and the penalty for catting timber on such lands shall be fixed and dotermined in such proctamation: prorided, however, that no wuch rerervation shall be made until public noHee las been given to those restiding In and near the locality in whicis the land proposed to be reserved is siftuatod Mr. Jemingso, the member for Twilingate, introduced this Bill in the Lower House and fion, memberi wit gee by section six that the object of the bill was to probibil the cutting of timber on the sections which may be reserved by proclemation of the Goveruor in Councll, but people have been erading the-object of that section und hirve gone in on those rescrves and have cut logs und hive ifturwarde tiken them to the mills to be sawn into lumber, and that some arean which have been reeerved may be denuded of timber. Thle bell then is introduced for the purpose of preventing porsons from dolhg so. Now hon members are no doabt aware that it in a common practice in the country for people to go upon Crown tands and cut large quantites of logn with the object of desposing of them to mill owners or tome other person.

Ind when they have not bemen able to so dispoee of them, the logs are Ieft in the woods to rot and decay, and if Home orhur persmi fints them and has fuse for them hef cannot take them. This section provides that if any perHon cutting timber on Crown lands, excopt, of course, he fins a the finse, to cut, he nhall lose the right of property in the logs if they are not removed within a year from time they are ent.

HON. MR. HARVEY.-T am not opposian thils Bilt becaune 1 do not anderntand It, and shall requirn turther explanation, 1 do net understand seethen one ha it stande, and section two as explained. Section two admits the Hetht of any person to go on Crown limes and cut timber if the takes it away and saws it. I thought there was a very heavy penality for cutting wood on Crown lande without a 1 cence. I do not want to oppose the Bill, but would Ilke some information as to it. I uhould like, personally, to benr the Minister of Agriculture and Mines on it and if he is not prepared to say anythins now, perhaps he could do no when we meet agali.

HON. MR. BLANDFORD:-As far an I am concerned at present I know sothing whaterer of this Bill.
HON. MR. BISHOP-Belng a priv. ate biII it has not had the conilderathon of the Gorornment, and it in for that reason that I rerused to take charge of the bill 1 kwow nothing whatover about it, and I am more in doupt elace the explanation of the kentleman in charge of it than I was before, and cannot help thinking that he ta misinformod. I therefore think that the suggeation of my hom. friend on my leftuthat the second reading be deferred is a good une, therefore I would suggest that the gentleman in charge of the bill have it deferred.

HON. MR. GIBBS,-1 bes to move that the second rearing of this bill be deterred.

Hon. Fresident informed the House that he had recelved mesaages from the House of Assembly that they had passed the bills emtitled respectively, "An Act to Amend the Customs Act; 1898: 'and "An Act to Amend Act 5, George $V$., entitied, "An Act to increase the reyenue by the Imposition of certain duties on the estates of deceased persons:, in which they requested the concurrence of the Council.

On motion of Hon, Mr. Bishop these bilts were then read a first time and ordered to be read a second time on tomorrow.

House then adjourned until Mon: day next at 4.30 o'clocic.

MONDAY, April 26th.
The House met at $4.30 \mathrm{p} . \mathrm{m}$. pursuant to adjournment.

PATENTS AND TRADE MARKS BIIT.
On motion of Hon. Mr. Bishop the Patents and Trade Marks Bill was read a third time, passed and sent to the House of Assembly with a message that this House had passed the same without amendment.

## naturalization of aliens BILT.

On metion of Hon. Mr. Bisthop, the House went into Committoe on the "Naturallzation of Allens Bil."

Hon. Dr. Skelton took the Chair.
Committee rose and reported that they had passed the Blll without amendment, which report on motion of Hon. Dr. Skelton, Chairman, was received, and on motion of Kion, Mr. Bishop it was ordered that this Bill be read a third time to-morrow.

LABRADOR CODFISH BTLL.
Hon. Mr. Gibbs moved the second reading of the Labrador Colfish Bill.

HON. MR. HARVEY- 1 want to refer to the very interesting remarks we linve had from my hon friend on my left, (Hon. Mr, Job), at our last
meeting. because I think that so me deduetlons which are liable to be drawn from his remarks are perhaps not such as he would wish hiniself or intend. He quoted Mr. LeMessurier, and I endorse all he sald with regard to that gentleman and his statistical work; I wish we had more tike him. But, I think the figures quoted by my hon. friond, unless further explained, are liable to give anyone not personally familiar with the conditions a wrong tmpression about the Litrador fishery. 1 understood the quotations given to be that in $1884536,000 \mathrm{at} 1 \mathrm{~s}$. of fish were shipped from the Labrndor, and 14,000 people went down there, and that in 1914, 10,500 people went down and we only exported 91,000 gtls., showing a reduction in export of about 400 per cent., and a reduction in number of people of abou* 30 per cent. Those figures given with. out explanation appear to me to be Hable to an interpretation which 1 don't think the hon. gentleman meant. Of course, these figures given, 536, 000 in 1884 and 91,000 qtls. in 1914. refer to bulk shipments off the Labrador, and the catch for the people going down now and those who went down then does not begin to show any such difference as these figures Indicate, that is to suppose that people eaught in tnose daya five times us much fish as they do now, fs er roneous, I do not mean to say that my hon, friend intimated that, but that was the impression which might be drawn. Of course the business of the Labrador, the methed of handling has changed considerably. Instead of fish being sent oft in bulk very much of it is now being brought home and cured hard. A great deal more than used to be handled is brought home green and cured and shipped from St. John's in casks. The fact of the matter is that the whole export business here is changed. Instead of
most of the fish goling away in trulk the tendency has been in the direotion of cask shfpments by steamer. Some of this has been due to the direct lines operating here and perhaps even more to the more regniar sen viees meross the Atlantle ria New York and Liverpool which has greatly stimulated cask shlpments, and enabled the fish to get across more gutekly and helped consumption on the other side. The fizures from 1884 do not snow either a steady decilne in exports or in the number of people solag down. Por tnstance in 1884 whes. we had a large export some 14,000 people went down to the Labrador, but it in fnteresting to note that in 150514,000 people went down and it 1906, 16,500; in 1907, 16,700 and in 1909, 14,900. The figures drop then In 1912 and 1918 to nine and ten thousand. and last year 10,500 . The deeline has not been stendy sines 1884. It ta also worth polnting out that in 1881, 1885 and 1886 the business whis a mort disastrous one on the Labrador cowing to the large catches and the competition of the Fronch, and on the other finnd to the local conditions at that time on the coast. it was in fact these large ablp ments on the Latirador which laid the foundation of the Bank crash in regard to these statistics, I wish there fore, to point out that the inference should not be drawn that the decline has been anything apprometing tha comparioon as siven by his fgures. What it has been no one knows bat nothing approwehing that.

Another matter to which he refor red and which might concelvahly ereate a wrong impression, different from what he intended, I am aure, In ft regard to the fixing of price. Ho stated that it was totally unfair that the price should be fixed by a combine of persons, representing one nlite only. The inference ahould int be
drawn that it was unfairly fixel, and that Labrador fish had been bought at prices far below its value That, of course, has not been the ca,e. The question has arisen, every yesr what las always been the higheat competition price pald on the Labrntor, and that price genernily made the curront price, has just as often as not beea fixed, not by the merchanta in St. Jolin's at atl but often by forelgnus and by shippers outside of St . Joln's. The faet of the matter as to the price of Labrador fish if that year In and year out the foll value has been-pald. We know that nearly every firm operating on the Labrador, exeluding the Straits, has been efther rufied or gone out of the busfineas before they were ruined. Look at the hiatory of Munns, Duders, TesBier's and others. Take the oase of my own firm. We were some ten years past, very large exporters, on the whole, year in and year out, but the bueiness was so speculative and uncertain that wo ship no fish from tablorador today, If there had been a margin on the average year of 25 cente a atL is it ilkely that we would not be in the business today? From year to year the price pald has been the full average value. 1 am not crit. iclefing my hon, frlend's remarles, but only want to correct the frapression that. it seems to me, might have been created.
In regard to the Board I have not much to say. I am in favour of come wein Boand of arbitration to flx the price of fish on Labrador, as there is always frietion about It, and many times it was either brought betore the courts or very nearly so, 1 think the price of Labrador fish is one that is worthy of belag upheld, and 1 am prepared myaelf to endorse it There if one point in the Bill that I think needs serious conslderatton although I have no alternative to enggest at
present, thint is the constitution of the Bosrd. I would IFse to seee bome other board appointed mither than ath regremetative of the Boari of Trade on onic stde, and the Preeldent of the Fishermen'ie Protective Unton an ths other. While the Board of Trade is a recognited body the Fishermen'a Tufou in not an official or a publiely recoimized body liere, anil while to-day It is a very influential bods and represeats a large number of fiahermen there is nib cuarantee that the Fistiermen'll Dialon will so contiane, or will not have a spiit, or as to how long it will last. It is quite ponafble that it will break inte liulf a dosen unions in the fature. It neems to me to be doubtful leglehation to put upon the Statute Flook of the Colony a per. thanent bet, nominating a pelvate ruid unoflicial body of the mature of the Fluherinen's Usion un a permanent mernitier of this proposed bosird. However, the clause th the bill to whlch I itholutely object is one that my hon. frienid hue already animadverted upen, that in an to forcelng unwliling perivale persons, utider penaliy, to हive evidease at to their private businesm, It may bit to prodnee private corresprudence books sud papers, beflore a board of thls kind. Dhelosures as to methede and cuatomers, is to indlv. launl profity and Inswes, and it in oftem a more suerlous matter for a bres faess concria to hive to dieclose its fosses that ita profith, are I thinle quite undesimale. The Board can pet Ita fiflormation withent any such inesuinitorial machlaery. When I lirst loarnt of thin bill botng brought in. 1 find expected that it was $\pi$ bill siaply dealgned to arbitrate upon the prices which bad been. fired by compelition upon the Labrador, and thas to avold dirputes, law suits and der Layn. I Ion't belleve that it is posslble For any Board to name in October or porsibiy at any time, what in a fair
and reasonable picien for Labrador Sath, 1 inhoula not like to be a metrber of it Board charged with atry moh dutr, Shipments from Labrador Fary esormoumly and often unexpectedif in valwe Farly fish is often worth a dollar more than later fish. and quite otten later fisk is worth more thas early fles, 1 think and 1 rather hope that the uffeet of the bill If it becumpn taw, will be to do away with current price altogether. and that re: celpts wal in naarly every case have the price stated definitely, and it is partly because I rather hope this will be then renult that I farour the seoend rending. But to permit a Board mech as chis to overhaut the affuirn of any prisate erincern, it loolse surely as unjuititinble.

HON. MR, ROBINSON-Mr, Presl解, no many dispitas brve arlisen in connection with prices that the fefabilishment of in arbitration boari may be dustribien, and to that extent the irinclple of this bill cornmends itpelf. In other rempests, however, it is both impolitic and urwarkathe. That it is the latter is evifient from its Involved and complicated character The numerour ontingenciau in con\#nctios wish appointments surgent That no appointments muy result To meet the wiabes of the fixhermen the minimum eurrent price must be lmown Aarinf the sessont. Under this Act, if Bil itil termis and fatentlons are carficd out, It may be well finto November hefors the deciatos is arrived at. Incidentaliy is is diffeult to underIntand bow prices can be fixed in July for commodities waich đepend upan the conilltions of four montha later. But the mnat objectionalute feature of the hill is found is section 2, which provilus thist fwe members of the projected biosrd shall be appointed, pun by the Bnaril of Trade President, and the othir by the Prealdent of the Winhermen's Protective Union. The

Board of Trade has dote usefut and veluable wark slect its inception, init tias tolte if th the trice of the es roenous, but popular belief that it in dominated to the merchante of Wh ter Street, and lte oely laterenta are tif protect the lititeresta of the fiah trade, in other words that the Beand of 'Trade was a Floh Fixporters' is mocfation. Now, we are aaked to Innd Finatiative matoriement to a viev whieh in eateniated to seriousty is. fare the suefuiness of the board, by veating If Its Prenident the appoin:ment of 8 reprementintire to fir the priet- of Labirador fiah it in worth re membering aiso that the Iresident ef the Buard of Trade may have no istireif itt of thowivedge of the flith is duitry, and any nominatlon he would make mirht be opon to the name ofJection. The more nerious objection thi to the esratifir of a ristit of appotntvient to the Prealdent of the Fiabermen's Protective Union. The hor. sentlemah, (Mr. Harvey), has sate, In itfect, that the Thehermen's Uatos In ant in recognited body, that there in no guarantee of its permanence, that it may become disorgantred. mht wiff tuto factlons or separate besHems. This anay of may met be; though the probatitity is, that in some shape of furim, the unfon will conttine ane, If it were-what its name purports, its influmet on the fisheries, and on behalf of the flatarmen, miteht bt utundant tis mood. Bit tt mast be re membered that tie thr present torms the FiPil. is primarily a politicat orpantanthes. it lo admitted so to be: is TH Prestitut, who Toasie a clatiset political party in the Assemhty. And te are serionaly anked in the face of the sotortiomty partimn ehirnater of that argoniastios to give Its Prealdeat, by soleme Aet of Partiament, a powerful, if ant a controiling influence is the enmmerelat Hffr of the Colony, tie place in the hands of one political
party out of thrie of more nues pasties, pewere which the uapreme tribs: aat misht wefl tesitate beforn seeepting. it is difficule to collicelve a propoeal merve opposed to the prinitsles of Aenocracy and etementary Jortion The averestion that the cointig't ehlet inturutr shoolt be costrollind by the hesder of a molbeveties of thin oppouttion the the Asembty in *) estriordianer and so inodeal that the mystery is it shoula over hare proed the Houne of Aasembty, untess fre a facetfous moet, or sitb a feet. tine that executton elserliere was as gured As to the Bill itselt it cannot fin its present form lie adminhintenmi. All it would requit in woult he the adaltion of another to the many chapteri of lieperative acte now on the atatute books. But the Itmit ts prached when it is proposed to ondow hiny political party with perpetual powern. This in a serlous mateer and foot to te lightty regarifoct. HON. MR. GOODRIDGE-2tr. Fre thent, I would suggest that this matter be deforred. We all know that thure to a tegdatattre Commiltee aittivis. and abeut to make ite report with. recaril to the fisherieg and 1 think that when that report In reculred it will no doutt caure is certalit aniount of leglalation which may nni-
body the princlple of this bill. Under these circumstances, I would ask the gentloman in charge of the bill to defer the matter.

HON. MR. BISHOP-Mr. Prealdent this Bill comes before us after having received a great deni of consideration both before its introduction to the House of Assembly and during tis passage through the Committee stage in that branch of the Leglishature

If the Bill meets the approzal of hon. membert here it will mark a dititnct departure in legtatation in this country, but whether it will prove advanced legisiation or retrograde legislation none of us 1 think can determine, but I anticipate much argument and diversity of opinion upon it.

I am propared to admit that the settlement of price of tish shipped to market off the Labrador coast is often unsatisfactory and dimeult, but I strongly suspect all difficuity and dispute will not be obviated by the passage of this Bill.

A previoun speaker alreaty refarred to, quoted figures showing the great falling off in the catch and ahlpment of codfish from Labrador. but 1 submit that such shortage of shipment has not been occasioned because of dificulty in arranging a settling price, but arose from entifely different causes.
It may be moat desirable to have finowledge of what is to be the price which will be patd for conet fish as early in possible in the season, but I do not consider any price dimioulty or delay in arriving at it is so vitaliy important that it calls for legislation, unless it should be to provide for a Comilttee or Board to decide at suggested by the Hon. Mr, Harvey what is the current price paid upon the coast.

Now, in connection with this Bill there are verious matters to be considered, and I should lite to bo informod what is intended within the meaning of this Act as Labrador. Will it include the whole coast from the Cansdtan boandary to the most northerly port of shipment? In the absence of any defined area, we mast it tiink, assume that the Straits of Belle Isle is included.

Now, it is known that the shipfaents from the Straits are usually made early, and before any great portion of the Labrador fish 1 e caught, This Stralts fish is almost frvarinhly profitable to the shloper, let us suppose then that a steamship is dispatched from Blanc, SaLlon or Bonne Eeperance in Iuly, ans the markets are found quite grod, but Inter in the season, becanse of a very large eatch or other causes, marketa are bad and the Board when called up to fix a price find they must name a comparatively low price Why should that low urice apply to flsh which has been sold long before and realized it may be exceptionally high prices?

The Labrador fishery will not be etimulated by the passing of this Bill and it in quite probable that it may result in grest disadvantager and lose.

The provision in this Blll for secur3ng a Board is pecullar and it may be found that a Judge of the Supreme Court must be called upon to lay down a price at which buyers of habrador fish must settle. Could anything be more absurd than an appeal to our Supreme Court to fix the sale price of codtlsh?

Everybody knows that the all imporfant matter in cannection with the Labrator fishery is to Improve the cure, WII the provisions in this Bill tend to imprave the cure? No Slr, but the tendency will be the other way.
for it declden that all fiah alktpped of the coant wuot be at the eame price in wifter whit The पuiltts, ailit tt wit dentroy the elance of a man with esceptomatly pood fiah getting more than blie onightior who has badd fish.

Now section 10 of the bill masy be quoted an preventing this unfairnesa, but 1 mubtuit it does not, for the man with infirfiof tif hiatly curkit mis witl but fis a prion with the buyer, it wit be to has intereat not to do go , and wif tutereat inthences most people Whother they bie liayers of setheris A lower price for inferiar cure to the oniy incentive for improvetannt of cure. I contend, Mr. Prendent, that पा को the extithy conftumtir when we have itequeat commenication wth the liakredor Boant by steamer, and to moat of the tmportant ehipplag tharbouirs by telcatraph. the fixing of a price for the whote seanon ts an akuardity aad destructive of compe thoni. But was euppose that the Boand monts ond ftxes Be prion whten to proclatured by the Mtinister of Martae and Platerien in the Royal Gazette. sut saih bugers deatrour of हettis fist oftur a higher frice and pay है thelese price, in what way wit the bill afford protection to the fluhermen Tho carmot put uff thetr fliti to much caal bayersi, and what *ill happeat will the promoters at thte bill flacthe that meverat eargoed of fioh have biem puricharit at prtces bieyond that fixed by the board, atand by the townd and fankt that all mast abtde by this fixed prifees, iven nhauls thetr sethation faccived miore?

But supposp ajeali that belas awarn of the fixed price and their selghborn Tetting morn thiy refunt to initp to the vescels provided to take thelr fish, with the reanit that the veasols are recaliod and the peopin ieft with no Theturt of Itatthe thatir flat to mation. What then will be the advantage of
your leghishtion? The last atate of buch moes will be worse thas the firnt.

We notice, too, that the members of the board must act without pay. I douti, Mte Freatitart, if the Mrentitait of the Rluand of Trade will find it enary to uecare bie pomisee. The Prewident of the F.P.U; wili, of course liave no ilficuliy in that respect, bue. 1 iffil equthing is the bill compolling any person appointed by a Judge of the forpromm Court to met: thirefore finmalet that happen there conld be no hoard, and the price of Latrader codflob will have to be coaplidered and parthat tiatureuth this buycri and ietiers, which fa the ouly seanable and proper course Failing to get a board of three appointed there will be no Doard, and cobinequently tio personi to apply to the Bupreme Court. This it surpriains when we remember by ethom the bill has been fintroduced, for imindy mon might eqpect any legtita that emanating from that souree would be unmistakially clear and free of amblruity.
$t \mathrm{am}$ not aolas to vote agelant the lill, sor am I conuldering the proporal of any amendmanta, but I re poat it is extraordinary legislation, nad I helleve it wIII be found anwort: able.
HON, MR, WINTER-Mr. Fresldent I should like to make a tow re tuarke on this Bill. I conaider the fili s wery dangerous and undeatr alle one, and I belteve we would bave fiesard nothiont about it, but for the fact that last year the shipments frum i-atimador turned out proflitable to the ihlpper For the last elght or tea fears with perhaps one excoption. phipmentes from the liahrador have frour of umpruftatien to atitppers, anit while such was the cose there wai found to be no noed for thly leginlation. taat your the ahlppers made a food profit and they were entithed to it. for a zreat many of them required

It to offiset the losees of previous years, and now there has arisen a need for this lanislation. It may be of Intereat to nome of the members of this Hanse to know haw the current price was arrived at last gear. In October when the eijpmenth ware about to be made from the Labrador, a telegram was received by the MinIster of Marine \& Fisherles from a fishermun on the Labrndor saying thoy would rofuse to sell their finh unlosis they recelved $\$ 4.75$ in quintal. The Minister of Marine \& Fisheries called a meeting of the Labirador Fish Exportors, produced the telegram and asked what anower he would give. The meeting discussed the matter, and the price that the majority of those present were prepared to give. at that time, was 83.60 . At that thae I may gay the wor wns on, ther a whe no such thing as forelga exchange, and it was tmpossible to nell fish in the forelse market. we could not sell to Italy, Greece, Spaln or Portugal, the markete to which we usuatly send our Labrador fish. Un der these eircumstances it way al most fimponetbie to mentlon a fatr and equitable price It is imposelble for anyone to put a fair price on an article which he is unabte to sell or get en offer for: Many dill not know at thit time whether the fish wond be worth, $2,3,4$ or 5 dellars whether. in fret, it woatd be worth anythilng at all. Many thought 83 would be the figure it woald be the whese to offer, while others would be willing to trike the fulk of giving is ttitte more I may bay it was running a great risk, It was imponaitie to seil or know what yon were zoling to get for It , and 82.60 whis assented to by moat of these present. There was no agreement. but it whe understood we were all willing to gtve $\$ 3.60$ and no inore. The Mthatster of Marine 在 Fish. crice telegraphed that the price tor
fith ehipped off the coant wan $\$ 3.60$ per quintal, and sfter some delay that prica was acceptad by the fishormen, and It was shlpped in the usual way. I miny observe here that while filh whe being shipped off the Labrador at 93.60 , very large quantitios ware coming into St. John's and solling at $\$ 3.50$. (and more than that, I belleve more fish was sold in SL. John'e than was shipped off the Labrador altegother at $\$ 3.60 . \mathrm{J}$ Aayone who understands shipptig fish of the Labrador will know that rish shipped from there at 53.60 is equivalent to 3400 , because it costs 40 cents or more to bring it to St. John's, therefore, those who nold ta St. John's sold for from 40 cents to 50 eents less than those who shipped off Latredor. For the shippers off Labrador in sulling vessela, 1 believe there was a difference of from $\$ 1$ to \$2 per quintal between what was shipped from St. John's in cusk and what was sent in salling yeasels from Labrador, As I have anid betore, the Impresistan got out liere finons the tikhermen that shippers lare made more than a legitimate vrofft, and they think thls has been kolng on year after yenr. The Bill os the Hon gentleman on my right tias stated is a dangorous one, and most undegtratile, and so far from having of good effect. I belleve it will hare a contrary effect. Sonie of the provisione in the Bill are outragform, some are ridtculour, A aection kere provides that a Board stiall but appointed to but a price on the flikh. tooling at it consually one might say it is very reamanable, and as far as the fisherman are concerned it is very remmable, but what about tha thippers: The Prendent of the Board of Trade taay or may not be compe tent to appoint in good man, and the than so appotnted may not fully regresent the Labirndor intereats Why not the shippers from the Labrador
uppoint a man? The fishermen are represented on the Cominittee but evidently the sbippers are not entitlet to conffieration at all Beetion 5 pro vides that the Board or a majorts thereof must fix a price and that within two months after its pubisea tion in the Royal Gazette. This is in my opfinion an utter Impoesibility. Y 3u are askec to tix a fafr and reasonable price by the Lst of October befure rita have any idea what it will sell for In the forelgn markets. The satling veiselef usually loave Latiredor about the 15th or 20th of September. last year they left about the mindila of October, and It was not known what their cargoen would sell for unbl they arrived over, which was some: time in November. How can you fix a price is Octaber for abipmento if you 40 fot know what you will ofat for them until the infdate of November. Wheever framed the Blll flld not know mucb about the mode of shlp slag filli from Labrador, or the mode of gitting paid for it. Suppose fer tha sake of argument that the first ooe or two cargoes get away early, the chances are that you will get a good price for these, but everybody knows that whin the markets get sup piled, the prices begin to drop, and when they do it fir impossible to ahy Where thoy will stop. You must wait tif the buik of the fish is marketed, otherwise you cannot put a fair and renaonable price on the fish. If this Bosrd does not act, you cat appeal fo the Suprame Court and the judges of this tribunal arit arked to put in price on Tabrador codfish I do not know how they will look at it, or what they will think of it, but I think they will rint eare nbout acting. I think the Judges of the Supreme Court are whout as competent to fix the price of fish as I would be to interpret some fonotty legul prohlem in internatlonal law. The whole Bill to oljectionable

Hind Ludicrous from boginning to ond nod 1 camnot but feel that this Bitt (If such event will occur) will have a very bad effoct on the businces of the country. An to whether the Labrador shippers in the past lave been gesting larger profits thim they were entitled to does trot demand much explanstion. For the past thirty or forty youre the business has been so bnd this sill the men who had been In it either falled or went out of busfacsil. while those in buslnean at present are younger buslness men mostly, and it is my opinion, after a few yearn more experlence, that these will be lifely alse to drop out. As tar ins the bueiness people in $8 t$. John'e are concerned they have ittie intertost in the labrador rishery. Many yeara seso, as Hon, Mr. Harvey has atated, a few of our merchanfs carried on conidderable brginess on Labraidor, but they found it unprofitabie and dropped out. This shows that the merchants have been paying the fishormes more for thelr fiah than it was worth, and if such is the case what is the necuasity for thles Eill? If the mer thod wes have has worked fairly well during tise past 30 or 10 years, why fhimald it not contimue? it is a very difleult matter to arrange a price that will la all cases bive satifiraction. but the ithlppers have been the sufferers in the past, not the fishermen. The whole thing has been concelved in the interest of one clase and it strilies me forcibly that we fave neen too much of thls clasis legfatation. If eevms to me that persons can br'ng in any sort of Bill, no matter how outrageous and put it through the Lower Bouse provided it beneflit a eortain clisf, and it were better itiat we in this Chamber should wateh closer the legislation coming un here for our enflorsation, and seo that nothine is ruahed through unduly and withont proper conslderation. When
the Bifl soer isto Committee 1 may have more to sury.
HON. MR. TEMPLEMAN.-MIF. Frenident, I would tike to make a few remark in connection with the Bill now before thi House, and mikht may that its paasing would only infure alt comeurned and mgerivatio greant conditions and make matters worse than they nally are.
No taatter what the abject of the tilt migtit be if can do nothing bettur thas trip up a luw abiding peeples. Who are arzioun to keep the prace, and whose purpose is to be equituble ant fort.
I hook upon the Biti, Bir, an nethine atiort of as attempt to fool the peopile. Which, unfortumatily, han lieen the caise of provlour fithery ruter.

We wouid all like to aee a lan on thet Etatitei to restilate the price of finh., If atuch wore workahle, but is not within the powern or means of uny persean of pernons to fis the price of tifte arttete wtien we reattei ilat every toon coumodity for negutated in price by the law of supply and demanit

It woutt the Juit as reamointiles Sir, to appotas a board to fix the prion of toodnturfin in then different storis of the country and surely this Howse
 ating trom a sane mind.

You will observe, Sir, that the Bill thetare the Hoane onty artempts to fix the pretee of finh thlppet frum the tiri brador coant but in ao way refers to the Labrailer fiab that is Brought trow the coast abd moll is 8t Jolain and elwewhere where rery wetern it it sold for 25 ochts or cifiy centa per guintal lenes that that pald for it on the coast.
Itast ywar the pifiee of $\uparrow$ enbrador finh offered on the coast wan $\$ 3.60$ pir qut. wbtch was becepted and bealdes thil the huyers in mont unses had te pas frelsht to coltoct and fomurumen wi the itbroad,collection and other inoldental
expenser liringling the cont of the artiele up to betwoen $\$ 4.25$ and $\$ 4.40$ puer g̨tL whille at the same time the same quality tish was brought to St Jolm't and sold to buycers here at from f185 and $\$ 8.50$ and some of the huy: ern ouly bought it fur 12 se but sold ti mgain at the same price an will be ween when the case bow threatened tomiss before the Courts.

Apparently accordine to tho Bull all thie fuerchiants brying fiah and ehip. plog it ofl the coast aren manidered un fair and the merchatat who buge it in SL. Johntr at mach less cont be airight.

Thie peoplon are alwayn erying out atiout the treatment they recelve on the Latirnator cousit and then come to St. John'r and aell thelr batch for 1125 and 83.50 . This war the caune W) obe finhermian last year to my owu Hhow te tibe wha, aftor rifutine to sell it Labrador for swice came to St . fohn'z and after walking about the atreet for several days trylng to sell his fish came to me and aalid be wan enty abte to get \$t:50. I also understand that arme men took their fiah thame agaln aot belue able to find a purchaser.

All the trouble if with the mans who Burchases oft the easat, nor is there daythine atiout fish betne purcluimed et $\$ .00 \mathrm{in}$ the Straits for which a better price can be obtataed boling in the market earlier than that bought. ou the labrador const.

All that the Bill atows is the unfairtean of certain people in criticiaize then Lathrndar buyer onty of the cosat and it is not the wiab of the fisherpien themsetves.

I repent here. Mr. PresidenL,that thil 1 Iill in oot the work of the fishermen of thle country, and should it pase this Floure it wift be tumworkitile and unfair, and one of the mont unsativfact. pry bills that ever was pluced on the statute Book.

HON. MR, GIEES- 1 beg to move that the second reading be proceed-
ed with. and that the Bill be referred to the Committee atage, until such time (as Mr. Goodriage has askad.) that the report of the Commission reaches us, and which 1 understand will bo tabled shortly. I therefore salk, if the Hon. gentleman has no objection, that the Bill be now read a second tume. and that the further hearlag be deferred until that report comes in.

HON. MR. GOODRIDGE-While I am ntrongiy opposed to the principle of the bill, it is not my deaire to lsnere the wishes of the Lower House, and I thersfore bog to withdraw my motion.

On motion of Hon. M. P. Glbbe, the Bill wan read a second time and ordered to be referred to a Committee of the Whole House on Thureday. All the other Items on the order paper wers, on motion, deferred.

HON. MR. MCGRATH-Before the motion for adjournment la put I would wish to auggest that an the Nowfoundland Products Bill debate in the Lower House is set for Wednesday atternoon, and as it seemn the Bill as foreshadowed is a most important one, and as we will not have the published reports of proceedings for weeiks to come, il would suggest that no sleting of this Honse be hold on Wednestay, so that those of us who may care to attend at the Lower House that afternoon, to hear the dischaston, pro and con. may to so, so that we mas have an Inteltigent understanding of its provisions when it reschos thle House, and I would sug. Bert that the House adtourn untll Thursiay.

On motion of Hom. Mr. Biahop the Honse adjourned till Thuraday at 4.30 p.m.

THURSDAY, April 29th, 1915,
The Councll met at 4 pm parivant to ar Journinent,

NATURALIZATION OF ALIENS BIIL.
On motion of Hon. Mr. Bishop the Naturalization of Altens Bill was read in third timel and ordered to bo sent to the Areembly with a message that this House hart passed the same without smendment.

On motion of Hon. M. P. Gible miotlon for committee on the Labrador Coiffish Bitt wiar deferred.

On motion of Hon. Mr. Blahop seepad reading of Saw Mills Bill was deferred.

## CUSTOMB AMENDMENT MLLL

HON. MR. BISHOP.-In moving the fecond reading of this bill I would eny that the parport of the bill ts to fect. Brate the bandting and dellivery of goods arriving at the princlpal piere. It is found that considerable trouble arisen and delay is expertenced in delivering because of overlapping of cargoes from time to time, and ie occanloned fraquently b-y consignees neglecting to have the kooda removed within rensoanble time. Those who are anxtous to get their goods and who require them luuriedly are often provented from this cause. Thelr goods are tound stowed away undor goods of other people who to not require them so quickly, and much confuston and nometimes difficulty arises from this cause. This is the object or the Bill and it is framed with tho ehfoct, as I have safd of permitting anch zoody as I have referred to bethif removed to another sufferance warehouse and held there utider Govfament control and authority until they may be passed for by the consirnees. It also provides that the expenses neceusurily facurred shall be a charge agalnat the owner of the zoods.

HON. MR. HARVEY.-Before the bill is read a second time I want to siy a few words on it. In section 6 it provides elght days for the retroval of the goode. It is a pity that wail thot made saven days for this reaten, ramely that ta the case of
the New York istemmern thiy run wn ery seven days and in orter to de the wark of the town proparly ane carge macht to be out of the way before anubler arrivent otharwise when a lot at tryifite provinusty stifppod to tatt in the steamatify premises it le apt to make ditileulty for the rest of the manens owian to mooln Retting blockat Thaw wh thtr mattur hat beat thrirouzhty thriuhed out in the Lower Honese and t am apt solus to ralar any pbionction, tagre eapecialiy at wy जैfettion कoult tir jut down to trime ustod motiver, but 1 would say that if News Yark and Tiderpoel the time aliened for the temoral of soote th fipluलtivety two, of three tiys at spalnit elgest days dowa here at now proposel. What I want more particularig to draw the attention of ther
 ins it has been publlicly stated in the Lower Hinase, that wharfage uader the primeut law ranaint be legaliy coilest thl intent it wiss intint that thit trale should take the position of refaytug to pay whartage, and at the rist of ineing tohif that I am wing my peetr
 I want to may that that lak oukht to lie atuended se an not to shlow this thyone who knews any thing atout the mailor fulut limpe that it in atmotintely tmponsithle to provide nteamshlp sheds and kerp thum wis without charging whortnge, While the new piea mas
 to inking sacts a position: and I subfift it it umereanonable to expect that emneerns san keep larhe shods ete., whithout theisi sitic to claintio whint: arn. If wralit like to mumest to the brai. guntleman in thurgen of the Bill that it might bo wett to clango the soctton wheti prectuiten tho ctiar ating of wharfney nad ammeding it no that wharfuge might ber chargod for it hau mot to be charrot mtethor turntity or timpratly and if thin anction is pumed It will simply meath that tho wiariane
will be added to the frefght. The Bill in the minin is on the right linen. If If thme that momefhing sua dune bure.

HON, MA. J. D. RVAN-There in tinother matter im connection with thie that sppears to have beat lost flabt of While some owners of preZlines take the zoods and put thoon for auch conaligree togelber when

The till wak rend a smoond time. Gaid oh motion of Hon it. K. Hishop fals aritacy to be senit to a Conimit. tou of then Whole House to-morrow.

IIEATH DHIHES BILL.
HON. R. K. BHBHOP-In moving the monond readine of this till $I$ do hot know that sumch is refutred to tho asid in renpect to it Every memhor unferntands the mosatity of the

Bill. It ts of course a Bill for providing rovenue, and antll the present time nothing was exacted from the estate of deceased persons, excepting the asual charge for probating wills. It provides that the full estate of a decoased persen abatt be chargeable with certain fees, and refers not only to Individuals but to companies. The Bill I assume, is in fairly good shape and lias passed the Lower House oftor a sreat doal of criticiem. I beg to movo the second reading.

The Bill was read a second time und ordered to be sent to a Committee of the Whole House on to-morrow.

On motion of Hon, Mr. Bistiop the Hovse then adjourned untl Tuesday next at 1.30 oielock p.m.

TUEsDAY, May fth.
The tisutill met at 4.30 pursuant $w$ adjournment

On motion of Hon. Mr. Bishop the seeond reading of the Latbrador Fisheries Bill was deferred.

On motion of Hon. Mr. Gibbs the second reading of the Saw Mills-Bill whe deferred.

On motion of Hon Mr. Bishop, the Committeg stage of the Customs Act Bill was deferred.

## DBATH DURIES BILL.

On motion of Hon. Mr. Bialiop the House went into Committee on the Death Dutien Bill.

Hon. Mr. Andergon took the chair of Committee.

HON MR. MCGRATH-Might 1 ask the gentleman in charge of this Bill what is the object of all these provisions. I anderstood originally that the Bill was introduced to make provision for remedylag the Bill of last year, curing a defect in that measure, whereby the estates of partles who die shall be held to include any bequent or provision in the nature of a. disposition of his property uniess made within two sears of his death.

But there are seven clauses here, and personally 1 should like to know why all these varlons matters are included, and what is to be the effect of this Bill in supplementing the present Death Duties Bill. Also whether it is Intended that eatates that have come under the notice of the Treasury stnee September last are itcinded. In other words, whether it is retrospective in Itr action.

HON. MINISTER OF JUSTICE Section 1 of the 1914 Estates Dutles Act imposes a tax on the estates of teceased persons. Thls Bill entarges and defines In part the word 'Estate' and provides that it shall include seven clasees of property, enumerated in sub-sections (a) to (g) of section 1 of thifs bill.
Sub-section (a) is the general and troad proviston: All property in tht 4 Colony of whatsoever description. Sub-gection (b) Includes a "Gonatio morths causa," which is a gift of persousl property made by one who apprehends that he is in peril of death. Sub-aection (c) Includes a "donatio inter vivos" uniess the gift was tusde at least two years before death. The oblect of this is to prevent propte from evading the estate duty bs disposing of their property by gift during their lifetime and within two years of death, A donatio mortis canma is given in the immedlate fear of death. The donatio fiter vivos $x$ suld, if it were intended for the purpos $\geqslant$ or grading the Act, be in the foar of death, but not in the immediate fear of denth. Thuse sactions ure very clear.

HON. MR. MCGRATH-Yes, clear to a lawyer, perbaps. There ara one or two addltiouat questlons which I would like to ask the Attorney General. Is this Aet retrospective? Does It apply to all estates in respect of which letters of probate or administration have been issued slince the
basaing of the War Senmion Act.
HON, MINISTER OF JUSTICE -

takink the Chair of Committee.
The Committee roac and reported the Bill without amendment, and on motion of Hon Mr. Birhop it was ordered that the Bill be read a thind time on to-morrow.

## SEALING BILL.

HON, MR. BIBHOP-This is the well known hardy annual coming up to us rgain. The Bill, or the firet seethen of it, arises out of the report of the Commission appofnted to consider matters relating to the seating voyage. The latter part of the Bill does not arise out of that report, but embodies the views of members of the Lower Housg which moved amendments and they now come before us in thelr present shape for constideration of this Chamber. I beg to move the second reading

HON. MR. JOB - in reference to thes Bill 1 weuld point out that there are sevoral very good clanses, but there are some which show the matter has not been consldered from the vlew. point of the owner or the Industry it self. In fact, Sir, 1 think some claur ea are calculated to make the indue try well nigh impossible, I do not think it was the intention of those who brought in this Bill to make thif difficulty, and 1 am sure the most tumble senter in the fisland woutd not like to have seen some of the clauser before us toloy. Nobody can benofit by the cripping of this industry, and to case it is setarcled in any way we all will suffer. Now thase of us whic can recall the leicisfation of the past two yente ori this subject must admit that the owners have made an effort to meet the demands made upon them, and that they have all been met in a liberal spifit, and the extra expendfture incurred has been umgrudgingly ngreed to. I would point out, Sir, that in 1906 there were 25 steamers employing 4100 mon at the ftehery, and this year wo had only 13 steamers and
about 2900 men. Furthermore it looks to me as if fhis number of stcamers would be at il further reduced, ae that this is not the time to give any great discouragemant to the Industry. In 1897 there were about 4000 men employed in consequence of the larger crews carriet then, and it is to be deplored that now loas than 3000 have a chance of a berth. Theen steel ateamery cost a lot of money, and whan one or two of them drop out it may not be very easy to replace them, and flerefore we shoula act with great caution in passing legislation that will drive them out of the business. Thers is ayother point that ehould not be tost slght of. These steamers are not only sealers but are used for the genaral tride of the port, employ. irig flremen and seamen, and working in the foreigu trade which ta Hikely to encourage business with the countries thoy go ta and therefore it should be the pride of everybody in Newfoundlend to see thene steamery lncreasing, and make SL. John's finstead of a port of amall salling vessels as in the past, one of steamers Capital if elvitve and we all know that it takes very little to discourage people from puiting money in an industry of thls sort. Now, Sir, the objectfonable part of this Bill is the making the owner responsible for acts of men over whom he has no control. That rofers epecinlly to clanse 11 and fi. Claime 11 is specially unsultable, to put it milaly. The owner is to be fined five thousand dollars it one young hood is put over the slite of the ship. Now, Sir, we can lmagine 270 men in a stoamer coming in, and In the rush and buatle of discharge ten young thode befing landed on the Whart withont anybody befng the wiser. The Captain may not lhave been able to chects the thing himself, and. fhey might have been brouglt on board malictously, Now I think the
owner ought to be blamed if he encouraged the faking of those boods but not otherwide. The thoods ought to be confiscated, but to fine him five thourand dollars because some man choeses to bring in a hood seal is not fair play.

I am not going to refer to this Bill at length becauro wo shall have a chance in committee to discuse it, but 1 would like to kay that I belfeve In the first two clauses, the second especially. It is one that has always appeated to the and to the peopin interested in the induatry, and I hope there will not be any doubt about that clause when we come to the committee stage. As I know the Hon, Mr . Harvey is going to refer to clause 5 and 71 shall have nothing more to may at present.

MON MR. HARVEY- đo not want to detaln the House much on this Bill. The Bill has in detall a numbor of objectionable foatures such ail we nlways Het our faces agalnst in this Councll, and which 1 have not the least doubt will recelve ameadment here, and I have no doubt the principles undor which these minor smendments are mide will eommend themselves to the justice of members of the other branch. I refer to clauses providing ftres recoverable by any peraon whe may aue for the same without discretion. Then again take section 12 which my hon. friend has refermen to it Is concelvatite that a dishonest maz on board a ablp might bring on board that ship a few young hoods and tow in the world can the master ever know, and his reward for doling such a thing and breaking the law wouti be that he could recover from the ownors flve thousand dollare, of course such a position is eimply monstrous, and I have no Goubt when pointed out to the other branch of the tigfstature they will agree with this Councll that any such
provision as that requires modification, to say the least A number of the clauses regaire changes In dotafl and verbtage on these lines, see14 does not say who is to pay the fees required by that section. I have not the faintert fion who is to pay them. Aa regardir the fees to be paid by second hand, and master watehes and masters 1 do not quifte see myself how that stands. The section to which I wonld more particularly call the aitention of the house is number five. This section provides for compenan. tion th case of injury or death. An it standr lie my opinion the section will reguine campiete alteration. It is the most importast section in the bili. The pirinelpte of it has of course been recommendad by the Commission conalsting of tha Supreme Court Judges who sat upon the sad case of the Newfoundland, and it is far from my whah to do anything to prevent mon boing properly protected, but thif clause as it stands is not a protecting clauae to me at all. To begin with it vitintes every priselple of lasuriace. It calle upen the owners of the ship topay one thounand dollare for every man who has been out after dark ane loses his life, and provides for compensation to be paid by the shlp. Now take the case of the Newfoundland hernelf. It may be known to mem. bers of this House that the Newfoundthind han fust been sold for $\$ 8,000$. There weif 78 men who met thelr death in tho Newfoundland case and thle Bull calls for the payment of one thousand dellara for cach man bositues payment for injurtes In other words, $\$ 78,000$ would have to be patd ty a ahlp which has just been sold for $\$ 4,000$. Now that obviously dereats the objects of these who brought this section in. I consider, apart from that, that the entire obua of insurance cannot be fairly put on the shlps. It ia a risk absolutely imposis
ible for them to take. The ships can only do it by getting an insurance company to take the risk. There is not a ship that dare go out with such a llability not covered by insurance. I am not prepured here to suggest anything. but I think an amendment is required by whith insurance companies shall be held liable for the death and not a ship which may not be worth sufficient to pay the losses, and which may be unable to prosecute the sealfishery with such a danger hanging over her head, Why should we ifmit the insurance for such recidents and deathe which might oceur only after dark? This can be done away with by changing this clause in such a way that a regular and proper insurance be taken out by every one of these men. I do not think it quite reasonable that the ship should have to pay the entire cost of insurance for all these men. Thes can probabily afford and be quite willing to pay a substintial part of the premitum, but to pay all I do not think It foir. Whether the Colony pays part which I think perhaps the best way. or whether the men do, I think a substantial portion of the premiums ahould be pait by the men or on their account and not all of it by the owners of the steamer, which, as my hon, friend polnted out are colng out of this businese fast enough. In any case the protection of the men is not corered by that clause as it stands, and however it may be altered it ought not to stand in such a way that the insurance is not good. The first prinIfple is to see that a company bound In insurance is able to pay the losses. In this case no guarantee whater er la given. In the case of the wooden ships, there cortainly will not bo enough money forthcoming to pay any large number of clatms.

HON. MR: ANGEL-Before passing this Bill, I thluk that by the time we
have attered the bill and amended it, and some of the clauses have to be seriously amended, it seems to me that it will be impossible to make it workable or satisfactory for the men themselves, for the steamer owners, for the general public or anyone else. it seems to gre that we are goling to tegislate the sealfishery out of existence as tar as Newfoundland is concerned. But what about the steamers sailing from the Juriediction of other countries, the Norwegian steamers, for instance? They adopt different methods than we do; the men supply is Dour, and the owners of the ship and the men are paid $\$ 15$ a month and get a certain share of the seals. There is no law in connection with the sealfishery pertaining to these rossels at all: they are perfectly free to prosecute the fishery in whataver way they choose. If we pass thits Bill now before us, we are simply legislating to put Newfoundlanders out of the seallishery aftogether. Sydney and other Nova Scotian ports have the same opportunities of prosecuting this fishery as we have, and shipe can ge from port to port and prosecute tho fiahery without such disabilities as w6 fathour under here. They have no such laws by whtch steamers are made 11 able for large amounts. They have no laws in relation to the food which shall be supplied on board the ship. nor do they require to have the Marconl aystem on board so that they can prozecute the finhory for very much leas than we can. It seems to me from past experience, that the Bill which It is now proposed to put on the Statute Book will have the offect of putting an end to the sealfishery of this country and 1 would have no hesitation in throwing out the Bill.

HON. MR. MEGRATH-1 do not fatond, Mr President, that my remarks whoulit be lengthy, but 1 would
hay that I hope hon. gentlemen who have advocated the rejection of this measure will ruconadder such th litel. The major portion of this Bill comes to the Leepisiature with the endorsistlon of the judges of the Supremn Court, who in their capacity of Commissioners to inveatigate the nealing disaters of last year, made recommendatlums, now embodied in this Bill, tending to tessen the risks our sealers have to face while engngod in that pursuit. For instance, section $\delta_{i}$ to whleh Hon. Mr. Harvey has referred. is I think printed in thil Bill exactly as drawn up by the judges: and that being 80 , I think for thie House to reject the messure would be to put itself in an exceedingly false position before the country, I do not esy that the Bill does not require nmeadment, but I do assert, Without any qualitication, that so far from uny proposal to amend the sec: tions providing protection of the liv: ef of the sonling crewn, I would be sorry to see amy amendment even siggeated. It in all very well to say canfital must be protected and that ostablished industrios must be sufegrardea, but 1 maintain that even stanting above all of them, must be more thun eiflier of thest thinge, protection of lives it is bareiy a year aiso alince 250 men engaged in that fndustry were swent inte the other world in in twinkling of an eye. When the country recorered from the sense of berror with which it was etricken by the ditester, there was a infversal demand that gteps should be taken to nvert as far iss possible, slmilar calamities In the futire. I do not say that any laman prosiston could pre-vent-such a catatrophe as the losa of the Sonthern Cross involved. As all hands perisherd with the ship it is impossible to know under what conditions she went down, but if we put her case aside, there remains the case
of the Newfoundland's crew and the evidence in that chese hos been taken at great length and given wide publl. eity, und overy man can form his own eomclualons, Not all will agree in thees conclazions, for even the ladiges thembelves differed, but few will questton that if all the senllift stenmers hud betn compelfed to provide wireless equipmente there would hive been the traxedy lin that case. Those Who go down to the aea in shipis lave to encounter perits so virled and oxfreme that we camnot glve them too much protection. and while I would not have it supposed for a moment thit I imply that any member of thils House lif lank willing or desirous to she such protection afforded than I im, ! would emphualve thint where Comminsioners of tho experfance and fitandmge of the judgen of the Supreme Court have jut it on record that in thelr opinfon certain reforman are deairable to Bifeguard the lives and the fealth of the then engaged in the Industry, the member of thin Heuse shonla he the lain to ralsar any yuewthon as to the propriety of enacting these recommenifations into law. I ean quite muleratand the vfew pofint of thene who miny fear thint too drabtic tegishition may drive the induatry from our shores, but I do not think that even the suggostion that such is poskitile khould intturnee un to uthate one Jot any measureg which are thought to the exsential for the saying of lifn ctrif protecting the trealth of the sealitis crows. I quite agree thit we shonld not impose too hascy financlat burcene on thowe whin own mealing steamers, Decause if freely ad mit that, from ail the evidenco avall. able, it does not appear that the veb ture In any bonama, espectally of late years. at the siame 3 me, the judses, after having conaldered the Whole problem. rocommanded tant the provlalons of the Worleman's

Compenantion Act be extendod to cover this industry, which means, fn other words that the owners of the ahipe arc tiable for the denth or lisjury of the crews in certain contlsgencles and up to the extent of $\$ 1,000$ per man, It ts represented hire that this ts the tax which it is fire possible for tae ownera to bonr. That may be so, but I would point out that, altematively, the fudges provide in another section that this provislon stull roit upply where the Government are sutustied that the owners fand the creais likve agreed to hin insuranea molieme wherety the same resuit is eifected. As against this it is argued that even the inamatice mulfit not to be a tax botely on the uthip-owners. and this contention is put forward with much strength and with no mmall thow of retipon, it bon. getithmeis feet that the burden ts too heary; I think stepis may be taken. if this Bfil te nent to a Seleet Commiftro, whurebs somid other compramise cua be reached, as 1 am sure notiody atins to mutn the induntry or dirive it froan ear Golony, and that uny rebiomitie representattons from tho capitalistis intarestod in the in. dunitry, will recolve, the vary boat con. staterations.
Thavine mat thits mincti with regard to the Bill in its more important aspect. 1 would express my concurrence with thoac speakers whe have preceded line, who hive ctatmed that the rent of the mill calls for radical att. endments. Section 10 sives certala boncaes to the cookn, and if the cooks ard to esot tomtisics why thoutit not the firemen and engineers also. To
 eeal is treusht In, seems absurd, asd 1 mifectit. thit porithly it miny tie that 8 Bi wan intended, and that it is a mfirtake in printings. One or two otssatisitind men could aiways put a fow hooda utioard in shif aftier inght
and thas brealk the law, and they could collect the fize when the cargo was brought in and the seals were found. The proposal that no hood sentir bid zllod for three years comar from the Legisiative Commission on Flehertes, but the Commisslon never fathered the imposition of a $\$ 5,000$ fine. The providion that no maals be killed by the crows of wooden itteamers atter April 15 also comeen from the Deigslative Comminsion on Fisheries, and while I do not say that the kilh thg of one achl after that dato would call for exemplary puntahment, I do anfert that where a flagrant violation of the law rasults, the tine should be thie shme as that imposed for killfing before the 13th of March. Section 13 also is from the Comminsion. It did toi provide, however, that there should be only fifteen rtfles aboard fony wooden ships, but that not more than fifkeen should be used on any Efren day, it being contemplated that a few others might be taken in case some got out of order. Provision for a board of examiners is desirable enongh in its way, and the final clause which enabies ships to return and land part of their crews and then renume the royage is oue that was rejected last year,but that is mut again, and apparently is regarded as a set. thement of a question that is becomlige an increasingly diffonlt one to deal with.

HON. MR. ROBINSON-It is not may intention to weary the House with any lengtiy remarke, but I desire to ask the hon, memter who represents the Qovernment in thls Chamber, whether there hes been any correspondence or communication with the Gcvernment at Ottawa, with reference to the Sealinir queation. The reason for the question will be obvious to overy member.

HON, MR, BISHOP -in anawer, if I understand the hon. gentieman
stirtht, Uure has been no cominunles. tion with Ottums reapectly the Bit bre any of ite propisions.

HON. MR. BISHOP- 1 am ratber atrald when we conetder that thiv Hill lan already been pasped by a toulmittor of the other Hount whar when it comes before the Jotes Commiliten famed by the ifon genthanim, it saich a cotamitteo be mpithend and they vere cuable to narroe, we would he in a warne pos ttion. It seemn to me tho conatidet tuten of the tfom eloult be ifves to the Mil an it stands. I think somethinge could he arrived at better by the appolntravat of a Select Commiftton till blumet by Hon, Mr. Har ver. Not mech time can be tosit by fot reporting till Wentnesdry, an wo are not thely to mont more than wee Any in betwieth.
The Committee rose and reportof that the bum bas been referred to * Solect Comumitten

On motrote of Hote. Mr llyas the repert wan read.
Hon Atr. Itreltatent appotuted then followinn to the Select Committee: Houn Jots, Whater, Harves. Mothath and GBhe

## 108 anva ritcl

Hun Mr. Harvey aseled finat the putitintis premented by the A. N. D Ca. and the Albert E. leed Co. to ivferwies to the lopaing Bill, be read.

The petwient were rent \#fecorttuly
HON. MR. GisBs-t bes to move the semoned reading of the Logetny
pill and for dolng so 1 dexirs to polnt out to the House that ther Jint enctioes of the bill provides that 4 logeer whall have no right to terminste his employment excent li) efritag a weez's notice of the inhenttos and if he falls to give fact sotice be shall forteit a week: Trimen This section tis fo the ts terest of the emploger. I andes ytar d that berefotore men may leave tail without airing notice and thit fection was inserted in onter that those engaged it logging may have fun notice when mes wore leaving unt an opportunity af: forted them to replace them fith others, if necenuary to do so. There is the section deatlog with the quention of payment of wages is ramh. This providen that payment thall be made on the day when time ticketa are presented by the men at the place where payment is usually buader, and further that if ther employer falla to pay the logser thin the fecuris a penalty of \$1 per day for each fay be keeps him waltur for lals vages I might say that thls provi fton with regars to the pagment of fagen is not a new law. It is alreaty Is un Att equerning the emplayment of fieteramen engaged in the finhery.

Section I deals with the faralsh ipr of a statement to the logerer of thin rate of सapes which be lin to be pald for hts werk. It calle upon the operator to supply this statement of arcount within two weekin after the fagamement of the logger and then wery twe renky thereafter similiur statementy munt ben furntatied. Thit pill be a benefit not only to the ment fut to the employer beramse it will frovent troutle in the future. Those of tue who have been practiwing law frow that nut many yeara ago it was gext tu- Imposalble for a logrer to get a statement of lis aceounts, This
rection is embodied in the Act to prevent a repetition of the difliculties heretofore frequently arising from thin cause. It will not operate as a aindranes to the carrying out of the the work, but it is sfmply a measure of protection to the employee and no tijustice is sought to be done thereby to the employer

Section 5 has reference to Hiving accommodation of the logkers and provides that there shall be separate compartments for sleeping and eating, and that these ahall be consitructed in a manner satiafactory to the Government Inspector. There is no reasonabte objection to that provision. These apartments must be fitted up in accordance with what the Government inspector may necuire.

The necessity for it arises from the fact that men engaged in logging operations are at work many miles from the settlements or towns and unless some such law and inspection be enforced the men would be compelled to put up with conditione that would not be tolerated if they worv enisaged at work near towns or settlementa; The next section givea power to the Government inspector to preseribe the manner in which sleeping quarters shall be fitted up and notiee of such Improve ments as are deemed necessary by him Is 20 be given to the employer not tater than the first of September. The publication of such notice in the Roynl Canotte shall be concluative evidence of tis having been given The question of the fitting up of sleepting quarters is a matter upon whteh thare shonted be no two opinions. That Inboring men should be given sultable places to sloep will not be ourstioned by any Hon member. It Is absotutely nacessary to the health
and strength of men ongaged at * queh arduous work that thoy be provided with comfortable and sanitary 4 tleeping puarters wherein to rest and rocuperate after their long vours of labor. The absence of such proviation for our laboring men'a comforte in the past has been the cause of much suffering and has been the indirect cause of sending many of the prime of our ceuntry's manhood to an early grave or left them prematurely broken in health. The conditions under which our men tolled and lived In the past cannot be allowed to continue, and must not be tolerated in any part of this Island again.

What is Newfoundland's greatest asset? Is it her fisheries worth about $\$ 10,000,000$ ? Is it her pulp industry worth many millions? Is it her mines that produce a million or more tons of ore? No, Newfoundland's most valuable asset is her citizens, her men, women and children. CapitalIsts and legislators sometimes forset thts. Dollars are apt to be account ed more than human lives. The country that allows employers to wax wealtly at the uxpense of the fabouring classes is on the downward path that leads to destruction. Every industry or enterprise that does not provide for the comtort of its omniloyees and that rohs men of their health, also robs the State, crippling it. I have no doubt to-day the employers of tabor are not only willing but anxious to provide suitable sleepfig and tirlige accommodation for men employed at the various centres of Industry and will readily provide quarters of such a kind as will be approved by the Government Inspector. I may add that I feel safe in saying that no Inspector will Impose vexntious or unfair regulations in thfis matter upon employers.

The next queation deale with the question of food to the aupplied to the Iogsers. A sehedule of foods is to be arranged by the Ministor of Aericulture and Mines after be has made Investigation and enquiry from the employeer as well as from the employee. This will be publiahed in thid Royat Gazette so that there will not be any question during the logging mason as to what the achedule of food may be,
The niest nection, 8, proyices that the employer shail upon the request of the logger supply him with the necusnary bedelothes at cost and ex. porisen. The reason for fiserting thils clause is that in some cases when loggers have gone into the woods many milen away from settlements they were competted to pay exorbltant charges for coods of this kind. The object of this section is therefore to safeguard the men agalast extortion of this nature.
1 do not say the Angto-Nina. Derelopment Co. have done this. 1 may add that 1 am satiefied that they have not it has, however, been done and there in uo reason why it will not happen asain in the future it is to prevent a recurrence of this practice that thits proviston if pinced in the bill.

The meal seelina protects the employer as well as the employee, with tugury to axes and axio handtes, If a logeer lonep an axe or breaks more than one axe handie the cost of theae artioles can bo deducted trom his wasee.

Seetios 10 deals with the constructhon of eampa and there can be so groit reason why men engeged tro work of thin kind should not be provided with proper places is which to live. We, make lawis for the pretection of eome, togn and horacs tuit Ittte concorn has been shown in the past for hjow, wlio in the superior of the ant-
minl creafion. If companies are not villing to equip camps in the logking Industry or bave knowingly negtect. ed to provide for the comfort of their workmen in this respect they munt be held liable. Abuses have existed which in the intereat of the men and of the familite depenaling on them should not be permitted. There are, moreover. In prospect new and extensive operations in the foreats; men, snknown to us who may not as humane as the present employers, will take charge of them and we have got to look to the future and protect those who may be engaged in the work.
The next section makes provision for a doctor to vialt the logging campm where more than 100 men are employed in the induatry and permits 40 c . per month to be deducted from the loggerg' wages where medical attendance fs provided. It is not so much with the small logging operations carried on near towas and settlements that thle section deals, but with companies operating in the interior cartylng on operations upon a Ir Irge scale. In the tatter case there is greater danger to Hife and limb and also to the thealth of the operative, and 1 thtak the compantes should have no objection to this provislon. The next boction makes proviston for the appolntment of inspectors. The inepectore are to be appolnted by the Minister of Agriculture and Mines. The reason for this can be readily understood. Unless it is some responsible person's daty to see that the law Ir carriod out impartially evasions and infringements of the Act will make legisiation ineffective. Io order to saferuard aganst dishonest government Inspecture this bill gives the right to toggeri to appoint a representative whore duty it ahould be to see that the provinfons of thls bill in their entirety are not rendered abortive. It may happen that the employees' re:
presentative woald not be afforded accommorlation in the way of food and lodging whille performing his duty and the bill maken provision in this re: saect by making it incumbent upon taose in charge to provido acommmo is tion of this eharacter, not, however, free of charge. Hon members tray see groumds for objection to thls but we runst remember that we are liv. ing in a materialiatic age when the possession of wealth is very often the synanym of power. Thie logeger is very wisely safeguarded by the proviaion that he shall have the right to appoint some person who will be in sympathy with the alms and oblects for which this bill is Introduced.

The noxt section deala with inspectors who are remiss in their dutfos and provides that on the protest of 50 logsers, the same to be verified by aftidavit an inspector may be rs. moved and enother appointed. The next sectlon provides for a report fo the Minfater of Agriculture and Mines by the tnapectors who will be connect ed with hif department. The next sec tion deals with penalties for visile tions of the Act. Section 17 makes provialon that all breaches or the Act shall be reported by the inspector to the agent of the company, and unlers the grievances are romedled, proceedfinge may be tmstituted.
The last section deals vith the de: finition of a logger. Now the A. N. D. Co. hare presented a petition raisIng certain objections to the onactment luto law of this blll and one of the objections raised is to the pny; ment of wagen in cash because it may happen that the mupply of ensh might rus ont ard if the men are willing to accept cheques the employers ahould be at liberty to pay labourers in this manner. There is nothlng to prevent that, if the mea agree to take it. The next objection rafeed with regard th. payinent of cash is that the company may be called upon to make large
payarents without sufficient time to provide specie The bill stipulates that they shall not be euddenly called upon for paryment of wages in cush. It provides that at least one week'a notiee be given of intention to quit work and that ought to be sumficient length of time to enable the company to provide cash. Every employer of fabour ta this city has to pay the wages right up to the hour when work ceases, and why-should not the sume principle apply to companiez operating In other parts of the country, Another obfeetion in to the keeping of time. If this were enacted into law it would keep men ont of employment. If men't time be not properly kept how are they to recelve what is Justly due them? Where 50 or 60 men are ensniged In certaln sections of the country logsing, whould not the company provido some means of keoping their time. It is as necessary in the interoet of the company as well as in that of the lotger that their time be properly kept.
With regrard to sections 5 and 6 that matter should be eaatly romedied becanne if the time Hmit in the bill fs ton late, then there is no objection to nif amendmont. The noxt clause to which they object is that which authorlistas the Minister of Asriculture and Mineie to draw up a food schedule. It is not contemplated chat this should be dane by the Minister af Agriculture and Mines alene. It will be only after the proper inveatigation that a schedule would be prepered and, 1 have no doubt, it would be as much to the benefit of the employar tas well as to that of the men. The company have entered an objection to camps beins IItted with board roofe because their operattons are - I long dintance from the mills. That le no reason why the men worling miles from thelr camps ind coming back in zero weather to uncomfortable und cold sbeds ahonld not be provided with propur
once. If we are golng to look at thits bill from the standpoist that it is not rietit to pervide for such comforts. then we are placing a higher valuation upon the induntry than upon the indivicual, without uthoge afid it ecases to be profitable. Why shomle not men who work in the woods in the winter demand comfortable quarters. and Why ahoutd thoy not be provided with thioge things necessary to gituguard their hiealth and streagth? Why should they be compelled to get out of their bunk and uten, on the frozen sround, whitte they put on thetr cloches? With regsard to clause 12 . there would not be any oldjection to that becnule 1 can Eee the force of the srgument that any mian mas represent hifmeelf na ncent of the loggers and there should be provisions as to the firm of thit sppofntment. Section 14 is objected to upon the ground that the comsiatnt should be made by the tongers whe are conversant with the finte. Stherwise signatures might De ohtained from anybody or course they lonk at it from thetr own standpalat, but we have got to look at it itero trom the atationtht of the men. 1 have known men who have suffered in body and alind simply because the oblizations of home and family compelted thems to auffer hartisitpis whitch they otherwlay would not endure; and 1 have often hat it impressed upon me that it was the fear of losing their employment whtch made men to eubmit to it. They realized the neceasity of trying to improve their conditions in this respect but were deterred by thic teat of tosing theit emplogment, snd that in one of the reasone why a provision of this kind has been put tnte the bilt.

I think I have pretty well dealt with the abjections raited by the AngloNewfoundland Bevelopment Co. in their petitifon relating to thie BIIL. This legelation fo only of a kind which has
been enacted over the civilized world. The principle outlined in this legislation is the same as that which has been enacted into law in England, the United States, Germany, Austria and every other country, and it has for its object the protection of those without whom these industries would be vilueless, What has Nowfoundland to protect? Any induatry whifh is not prepared to protect the lives of those who wark in it should not be estabfinhed here and if so established theald not be allowed to continue; if the logging companles are solicitous for their employees' welfare, then they will have no objection to seeing thls Bill passed into law. If we put oureelves in the pocition of the loggers living in camps, which are not properly protected overhead, we would not tolerate such condtions for one moment. This is the way to look at it, put ourseives in the position of the loggers, and ask ourselven the guestion are we prepared to put our sons there and liave them work under such conditions, or would we not have legisiation enacted by which proper living accommodation would be provided? We are rapldy approachfing the parting of the ways. Many hundreds of people are forsaking the fisherles and are going to work in industries establehed in different parts of the country, and heretofore unfrnown because the vast bulk of the people engaged in the one Industry. But now that they are belng established, and the work engaged in is danserous to health, it is our duty as legislators to see that legislation is enacted and put on the Statute Book to protect them in the pursuit of their calling, because there can be no greater loss to the State than the ill bealth of its people. There are forcen today in the country which must be met; there is no use in ignoring theq.

A campaten is being conducted to redrese certain grievances complained of, and it is our duty to meot those charges and answer tham. If there ia no trath in the statements made, it is our duty to refute tham. From the forces operating hore today for bettor conditions thes BIII comes. Men were content to work under conditions years ugo that would not be borne now. Men were then content to live a merely physical existence, but they will not do so today. They want something more and must know the reason why they can't get it. He tooks for it and ls goline to get it, and we must ruake up our minds to that fact. We are prepared to grant concessions to companles who establish fudustries here. The Auglo NTld. Development Co. got rich concesslons from the people of this country they obtained part of the national heritage, 200 square miles of the country free from taxation of every description. If we are prepared to make concessions of that ldind to bring capital into the country, surely we ought to be prepared to see to it that our people are protected in their work. The Companias say they aro earrying out the conditions outlined in the Bill, Perhaps they are. If they are then they should not objeet to have onacted futo law the provisione of this Eill, because ufter sil, we are not denling with the Compantes aperating here but those to be operat ing in future. We mal be prepertil to meet the altared condifions of industrinl life in the country by the ensetment of suitable laws th olthor countries it was looked upon as only fitting that employees thould bs fol and provided with alt things necobiary for their life and heatth, but here 't was rezarded as bordoring on anar chy. We see the absolute nacosilty of it now, because there is an srmatir

Toss to is oomminity than ita workingmen or population sufferins from III healtin, becauace of industrial conditionin that can be prevented. I hevs rinch plessure in moving the second reading of the Bill.

HON. MA. KNOWLING - I think it would be wiso if the petitions of the two companies in this subjoc: were printed and placed betore the Heuse before we go into Committee on the Bill. They employ largely and up to the present time we have not hears complinit of the manner in which they treat employees, but they are worthy of consifleratlon, although we fre bound to do what is right as regarde amployees and their finterests. But they certainly know more about It than we do, a日 very few here have marked cannection with the lumber busine4s. The petition which has been reid in a rather perfunctory manner maly have pointa in it wothy our fonisfderation, and 1 therefore would again suggest that it be printed for the Howse before the Bill goes to Committee.

HON. MR. McGRATH-Before the mintion is put 1 would llise to ask the hen kentleman fin clarge of the Bill If the is to anply to every logging enterprife in the country, igreat of small?

HON MR, GIaBS it applies to all.
HON. MR. MCGRATH- Then the Bill will near amendment in one es sontiol particular, and that is, that If there in a logging enterprise employing less thin 50 men , there fs no machinery by which any grievance pan be remedied, because you canpot net on a igrlevance that has not the Hefnatures of 50 loggers. If the tmepactor ts not doling his duty is thle partientar camp, where there are leas than fil men then under the terms of the Bil! you lave no remtuly. The Iuspector cannot be dis-
misaed if be fails to do his work. The Government cannot dismiss lifin untaxs the pettion in aignod by tio people. What machincry have you got ts get any attention to this matter at all?

HON. MA. GIBBG-If one logger drawe the attention of the Miniater to the fact that the Inipector does not to bits duty, the Mintster will tivestigate. But this is giving an arbitrary right to 50 loggers to sign exich petithon, setting forth the facts, which, if proved, will cause the afsmiasal.

HON. MR. MoGRATH If you can schieve the same reanit from one log: ger where ts the necessity of having the 50 slga? When the 50 loggers slgn the petition the signatures must be certifled or proved by aflidavit, and that meane golng before a Justice of the Peace. I would like to tay I think this Bill should also go to a setect Committee, 1 have no oblectlons to the Bill on some features. bn! 1 think as we have it here, it is the best juatification that could be provided of the action of this House last year in declining to put on the statute Book the logglag Bill then introduced here There is no provision, in the Bill for bathe of hot water, of the number of men required to keen tally of the number of baths berns taken or provisions of that kind if the House had not asserted liself last year that Act, an Act Imposins auch obligntions on logsing companies would have been put on the Statute Booke. With many of the provisions of the Bill no one ean quarrel. If there is any infustice belug done in the nature of Itf-treatment of the men employed in the camps, then 1 think everybody ta wiliting to eneure that ail the necessary leglalative machtnery shall bo provided to lessen these grievances. Bat in connection with the Bill there are several of the particulars that it seomis to me,
we ought to congider seriously be fore the Bill goes through in ita present form. For Inatance, soction 6 provilies that the Government Inspector shall each prescribe the manner of fitting the sleeplig berths and shall notify the employer by the 1 st of September. Io he to be Chlet Inspector or ts be to be only one of Eeveral Inspectors, for section 13 says the Minister of Agriculture shall apvoint one or more Inspectors to see that the provisions of the Act are obrerved and enforced. It seems to me that if the work called for by tho Bill is to be done properly we wilt want a small army of Inspectors, not one. In the BII last year a provision vae made also that bunks and mattrenses must be supplied by the Company. That clause is cut out now, and logging men are abliged to get these materials themselves at their own cost. Section 15 provides that Inspectors shall report once a month to the sininter of Agriculture as to the number and condition of campa, number of men in them, wages per month quality of food sumplled, particulars of all bresches of complaints and other information upon camp life. Unlesa tie gets that information from the men themselves no obligation is enat upon the Company to supntr it. If there is any obfect in securlas, that information, a clause shound be frkerted by which companies shall be obliged to aupply it. With regard to the question of an agent representing the togzers, that is a provision we should have some fruther informathon about. The logers have no organization that 1 am aware of, then how is any person to be recogulzed as thas representative? Who has the fower to appolit him? What is to be his status? Next, there fo the matter of doctora for camps of over 100 . Why ifint thia to 100 ? Why not apply
this to camps where 70 or 80 are em ployed. These men surely are as much entitied to medical asmistance as the men in camps of 100 or more In the Sealing Bill it is prorided that evory ship carrying 150 or more men shall have a doctor. It seems te me that where men are in the lumber woode there ought to be a doctor for at least 75 or more. That ought to be the minimum, not 100 , 1 should eay that most of the lumbering concerns In the country employ less than 100 men. When you say three milles from the sea shore' you must remember is our outporta medical men are not call ily accessible, espectally in winter outside of SL. John's, and there are not 40 certificated physicians around the whole lsiand; certainly not in the elty. There is one clause not in thla Bill on which we may congratulate ourselves, and that a year'B postponement has secured. That is that part of the fine is not given to the informer is in last year's enactment. We should deal with these mattera on their merits. Inspectors will make complaint whon there is genulne cause tor it, tut undor the Bill proposed last year, every possible oncouragement was provided for men to complafin and share In the fine I should not oppose the second reading of the Bill in vlew of the fact that it is an improvement as compared with last year's, but in Committee possibly we shall have to amend it constderzaby

HON. MR. BISHOP This Bill, Mr. President is an attempt to secure legistation which 1 propose to show from the speech of the Introducer of the measure is not alone sectlonal, but unnecessary, and requiring the serlous consideration of hon. members in this House.

The ostensible object of thin Bill Is to imprave the condition of men
engaged in the winter and spriog months in catting and driving timber for mamufucture at Baw Milt or Mulp sinile.
A Bill way passed during the last resular peastion of the House of Asnembly, but was rafnctec by thir Chimber, and very properiy sa. I hand tert St. Juha's before that Bill came up but I take this opportunity of saying that had 1 been here, 1 should liave been is accord with those who opposed it.

Now we are confronted with the Bill again, not ibcluding all the provisions embodied in the lest year's bilt, but with some of the least oi. jectionable provisions eliminated.

Juat at this DoInt, Mr. Prosident, 1 would ask why any alteratiou has been made, why anything considered imperative last year in unnecessary thla year?
We lave no explanation which is clear or convincing respecting these changes, and the inference is that tad the tilt of last year become law, these reeponiblble for it would now be soeking anuendments fuit suen as they will be seeking next year if thit Howise does not save the men engaged is the lumbering fodustry from their friends or thelr profensed friends; but, Mr. Preaident, serious damage may have boen done in the meantime, and I think I dipclose ne reeret if I ssy will be done to the men it is sald this Bill is to proteet.

1 sulimit, Sir, that nothing whintever has been shown to Justify any legfitation. No evfl exists, nothing is contemplated which requires preventive measurea.
The Entroducer of tha Bill satd when moving the secoud reating in the House of Assembly on April 12th, as follows:-
(From Dally News, April 26th.)
"MR COAKER-Mr. Speaker, in mov-
ing the stcond reaillige of this bill I do aot tatead to drlay the Hoese with
 mech tike the wae proeented last yesr and that pasied through this chamber with obe 偪 two allight alterations. tait yar's onl provitiot that eines man should be sappiled with a mattrean. Thast clacue has been taken out, and we are leavtig the matter of bedin to the discretlon of the Covtrament Inapector, who wns to be appointed under the the Section of lant year's Bill. I do that because I flut that that amployeril are afixtous to do all they can to fit aleoptng huinks ai comitortabty as posefbte, and It think it better to leave that to the Government thepector, Another tilug I discovered whitle up visiting the camips and that to that mattresses "enth provitet in meverat eamper, put at the end of the anseon they had to be thrown away, They could not be aned again. Tha systeri of employting mivn in the cumpe कar much that it would be unsanitary to keep mattresime there One krew would come thern and stay uatl Pebruary. Then anothir lof woilt come. Thie inime bed would be used by three men in nuccesation. That wat a suntter which tast year coused somo friction amenkit employers.
The Anglo Nnit. Developtinent Cormpany have agreed with me to provide is enarai thortion fo the hiunte. It they do that, all the troathe whe dif comfirt will be removed. At the are sent time there to trowbie similiar to that th matart to the watioe stoun en. The bottemin of the bedn are formed with mough iumber. The man put dewn green houghs. The A. N D Co. prontite is katrim cormite, an which the men caa put material, al ther hay or apruce tapes or birch rinit which they can always हnt around the camph. Then whien a man fontes, he Jeaves the sovering, and the next man

Emonisg alour can make a new eveen tine for himinelt: Thite covering is talin frow ther camps at the end of the scasen and washed, so that it is esed a cals atext meaven.

Thure is alop as alteration in See doe i. This section mow efven tes Zuys afier aisy comptaint le made by the Inmpector before any action in takin. Laut Fear'e Act provided that tpe Inspector should complats, and If there wan no remedy for it, lie could take action. Now, 10 days are given botore action is taken.

The clause about a minimum wage Tran taken out last year and it can stay out.
"All the other claseen are exactly ntmillar to the act of last jear.
"I do not think there is anjthitng to phis buil that employers cis onlest to. It is rery clear and very reasonatite When we consider that there are *irch is large number of men engasel In loksing. we ment come to the collclunion that it is fmportant to hare the induatry property rum. These compunine have made it a permanest bdustry. They fatead to go en from yoar to year cutting loges and so ther thunt ane that it is to their own benent to make the men comfortable The ment are more content than ever. and are getting more uged to the bus: fuens.
"They fled the food is improvitic. aceommotation is improsinge and there if is thiprownest to the camien firouphoot the past twelve moverts. Wany of the camye buill slace last y ara hare been futted as latd down dit thln fiun. They have pat in toord tlooriag and Boand roche. No ane toald comptatia of the toon I foant Is the campe at Hadger. I belit a theetting thare one night, and ashel fin tren if they had any comptatiti. Some of the bossers were thern Ona or two thought that they ahould
have some change from beans as breakfest. It was a continuous feas: of beans. If they could get potatoes It would be a change, and the Com: panles are going to give the men fish and potatoes for breakfast. Some mea thought they should get a little cheese for tea. The Companies are dolng all In thelr power to make the men content, bpeause thoy will not be able to get the men to do the work unleas they make the camps comfortable.
"They get a good wage. The men are promised $\$ 25$ a month but many get $\$ 28$. Some men whe go up with a promine of $\$ 28$ get only $\$ 24$ because they are a tittle slack. There were very few complatnts, and they are not having as much trouble as is In the paat, I do not want to lave any frletion botween the Companies and the men.
"They are dolng thelr best to help the men out. But the mon are of oplaion that the Legislature should take the matter up and something should be done we found tremen. dous teeling at Council meetings agalnst the Upper House in not passtige this measure. I hope wo won't have any trouble this year. The memhers of the Upper House ought to reallize that we do not send a measure up from thls House waless there is cause for it. We know the situation, and we do not introduce a menaure unless we know there is reason for th. 1 beg to move the seeond readtige"

1 think, Mr. President, it will be evident to any member of thls House that while Mr. Coaker can state publicly that tho wages are goed, the accommodation in Improving in the camps that no one could complain of the food as he found it in the camps Inst season, and all the complaintis be could find were that
one or two men thought they abould have some change from beans for breakfast, thouigh they said it was always a bean feast, and some thought they ousht to get a little cheese for tea.

The companlex, he says, are doing all in their power to make the men content. They are doing their best to help them out. Mr. Coaker maya be does not want any friction betwreen the enmpmias and the men. He toes not kay there is any friction or any sugecstion of friction, but that mome of the men thought the Legislature should take the matter up. Take what motter up? If there is any necessity twr legislation it his not been shown by the Intreducer of the $1 \mathbf{1}$ II or anybody elso.
Legislation affecting established industrfes should surely be remedial or preventive, but it has not been shown that thare is anything connected with the logaing business that calla for either and yet interference is aought with on industry sumittedly wellconducted, and where perfect harmony hetween employer and employed expote.

Legialation should always be folly and carefully prepared, so that it may merit the co-operation of all clasees and particularly of those who have been, and still are and desire to remain law-abiding. It sloould not be prowocative of antagonism, it ahould not be such as to compel persons either to soeh meatis of evaling the law, or to nbandon thefr businesas. Father one or the other of these courses must follow if the assant of thlo House should be ziven to thls BEIL

It in not, however, concera for the compantek and iadividunls who will at once hie minfolanty sffected by the mill which laduces me to so strongly oppose it, but it is the damaslug effect buch legratation will have upon other

ing more comfortable. The objection to the bill is not particularly in regard to the building of camps. atthough if Insisted upon and carried out it will prove a batidhlp In many cases and is unnecessary. As regards the sleeping bertha, last year the demand was that every man shoula be provided with a matiress. Now the futroducer says this is impracticable, that it is unhealthy; that the Goverument Inspector shall prescribe the manuer in which berthes shall be fitted, and ang geete in his remarks that the Inspoctor shall declde what id the proper bed for the loggers to lie upon. They can get shavings or bireh bark or spruce boughs. We all recognize that the Minister of Agriculture and Mines is a fairly allround man; If we want Information on law or land we can get it from the Minister, but I do not think he would be nble to preacribe proper diet for the men logging ta the woods. Section 8 is too trivial to insert In a Bill.
9.- Employers shall supply logsers with axes nnd axe handlea free of cost. If an axe be lost the value thereof shall be deducted from the wages of the loger. A logger breaking more than one axe handle during a week shall pay the cost of handle or handles supplied to him in place thereof.

The companies are doing this now and have been all the time Some have adopted the wise practice of charging a man's axe to him , for their own protection but if he breaks twonty axes they are not charged to him.
11.- Employers shall canse a physlclan to visit eacs logging camp at least once in eac. month when toggers are occupying the same except in case of employers with less than one hundred employees. No charge shall be made the loggers for medical services of a doctor so supplied, unless sueh employers own and operate a Hospltal at Headquarters, in which case forty centa per month shall be
pald us a doctor'is fee by each logger.
This has been touched upon by the last speaker. I wonder if the mensbers of this House have any fidea how many logsing camps there are on the Island. I have no doubt it might be a eurprise to them to know there are at lenst the. How many doctors would you want to visit these camps? The employers must pay for the doctors unless they operate a hospital. It is not very clearly defined as to what ctass of hospital is required and this In only one section of the bill that we would have to try and get around. The ownern would be compelled to seek means of evading the provisions of this bill or otherwise they would have to be got out of business,

13 - The Minister of Agriculture and Mines shall appoint one or more Innnectors whose duty it will be to see that the provisions of thifs Act are observed and enforced.

You would want to employ at teast fitty.
15.-Once each month Inepectors shall report to the Minister of Agriculturo and Mipes upon the following, in writing:
(a) The number of camps visited.
(b) The condition thereof.
(c) The number of men occupying the same and wages pald them per month.
(d) The quality of food supplifed.
(e) Particalar: of all breaches or complinints under this Act and the nction taken in connection therewith.
(l) All further information bearing upon camp life and its operation.

That means that the Inspector muit remnin some time in each camp. He has to enquire as to how many men are employed there, and the next month has to check that. It may be more or less, and he has to write that report of every camp and send it In. Therefore you would want an
army of inspectors instead of an individual one.

The report of the Select Committee appofnted at the last winter session to consider the Bill, which had been sent up, reperted as follows,-That aving to the absence of evidence before the Committee and the fmpossibillty of aecuring evtdence during the present sersion, the Bill be not now proceeded with. That report was actopted by this House as all will remember. Well, Mr. Preaident the only additional evidence before us to-day Is that given by the introducer of the BiII, who finds that what he considared most important last sensonf it in not now necessary to thelude in the bill of this year, and who admils that the circumstances, as be lifmself found them, are excellent.

It luspection of the camps is thought to be necessary I am of oplnion no employer woutd raige any objection, but you must remember there are not less than 600 camps, and if they aro to be visited and reported upon once a month, which in all cases would mean not loss than vix visite, and In many cuses etght viafts, durthe season, how many fnspectors will you require? I have no besitation th atfirmigg that the work cannot be carried out by leas than filty inspectors, and where are you to find the men competent to undertake this worls, and how they are to bo paid?

This proposition coming from a person conatantly attacking the Civil Service and clamouribg for decreas. of in pubilo expendture, is amazing. Any man competent is unilikely to take a position which lie may be thrown out of a month lator if he refuees to ugree with some fow men who woutd be incited by this Bill to make unreasonable demands. Now as regarda the agentig representtig the loggers, for it must be assumed there will be many, these are to have no defined
duties, they are not to be responsible to anytody, and can be regarded only an agitators. Mareover, and what is, I submit, more objectionable still, we are asked to give legal status to io responsible men.

We are asked to compel employers to provide board and lodging accommodation at all the campe for men who are admittedy only sples and ag. ftators, responatble netther to the employers nor to the loggers.

Who are these agents, by whom patd. how appointed, and how to be recogntzed? It has been sald they will be appolnted by the loggers, but when it is remembered there is no logkere' organization, and no aggregation of loggers at any one place with any authority, it will be seen that appolutment by the loggors is imposifible. It is not intended that the men shall have any volce in the appointment of these agents, and I make the statement with fall knowledge of the real intention, not from hearsay, for 1 have the documentary evldence in my pocket.
Now,Sir, what is the history of the jumbering business in this country?

Without going back beyond fifteen years, a very short time, permit me to name persons and companies engaged at some time since the year 1900, in operation of Lumber Mills, under License, In a large way.

Saw Mills operated Since 1900.

Amyune who frat the interesting thary of Str. fuakr, an petnted reentis in the Mall and Adrocate, must have recos 7thit train blin mexperiences how en. triety erroneous in the maln were fie
statements put forward in the press and clsewhere previously as to the deplorabio conditions which the loggers employed by the blg logging compantes were called upon to face in the great fumbering industry. There wore those In this House who had frequent personal experience of tre in many logging camps and who knew that these accounts were erroneous. But in any case the action of thls Council was constantly miserepresented through the country, and it has been most unfairly pilloried for the very proper aetion it took at that time, I with to say, Mr. Prealdent, that apart from the evidence of the true facts as now generally admitted and apart from the changen that reconsideration by its framers has induced them to make in this Bill the responsibility for what occurred in connection with that Bill could notexcept unfalrly-have in any case been laid at the door of thls House. The fact is that if the horrible condltions whleh were stated to exlst in the logging industry, if as we heard afterwards the camps were places where no decent man would keep his dog, then Sir, I aay the reaponaibility for what occurred lay solely and only with thoge who,knowing that theve conditions existed, falted to make any move, faited to do anything until the very lant days of the session, failed to provide any fiformition, to this House, at least, regarding these evils and fixally sent up a Bill of the type of last year's Logitng Bill requiring In any case close study betore the rosponsibility was taken of putting it through its various stages as it was without examination or proper discussion, a responsibility which the House very rightly rafused to take especially in view of the many protents made against scme of the detalls of the Bill. If those who were reaponalble
for the Bill had really thought that couditions were so bad them they falght have taken the trouble to have brought the Bill in at the time that its supposed importance demanded, and it would have recelved the fullest attontion and so far as fustiflable, the cooperition of this chamber, fuat as the present Bill will receive our bost attention. Referring to what my friend the Fon. Mr. Gibbs has sald about try ing to Improve conditions, the Hon. sentleman knowa of course, that there Is no man in this House who is not very keen and anxious to see and to belp them improve, and I would polnt out that one way among several and perluaps the most effective of all is to stimulate and to multiply industrlal operations, to help as well as to curb the omployer, and to create such \& demand for men's services that they will be able to dictate thelr own terme and to impose conditions by natural means upon employers.

The time is late and I will not contlave except to repeat that 1 approve the motion for a Seleet Committee.

On motion of Hon. Mr. Grbbn, the dehate on the proposed amendment that the Bill be referred to a Select Commiltion, was adjourned.

The remainder of the Order paper wan deferred and on motion of Hon. Mr. Mishop the House adjourned till Mondsy at $4 \mathrm{p}, \mathrm{m}$.

MONDAY, May 10tb, 1915.
The Councll met at 4 p.m. pursuant to alfourriment.

On motion of Hon. Mr. Gibbs the Committee stage of the Latbridor Codtish Bill was deterred.
(7n motion of Hon. Mr. Gibba the vecond reading of the Saw Milla Bill ywas deferred.

On motion of the Hon. Mr. Bishop the Committee Stage of the Customs Amendment Blll was deferred.

## Loging Bit

Secoud reading of the Lapring Hull. HON. MA. GIRES - Mr. I'rnilent, is
 king fill I misht kay that meverat ob Jectiona have been arged by Hanatable mumbers why thif timf as taketh bere Ehcuid wat the pasted by thil Houme, and otie of these abjections is that it lin seetlonal anid unnecessary It cannot be mald that tectafation Which has fur iti abject the tenefitling of nuch a large body of our people In mectional. Lesialation of a sootuant charmeter apptici zuty tio rtatits
 tain-from the pubtic or to the taking away of some pultio rizht which a neettion of thr chmmuntty enfor or to the erating of wotac franchlse ehich ecabtes the indivitual or cor: poration to do something for which It fre mectioury to intiats fuctilitfore sakiction. But Lestelation whech ulvis at the protection of the ereat masp of the commanity lu not meetionat. member thas whed: -Why to but the Bill of the sionen kled as that year?

 an ant atursating billis every tersion wit se hat jaised the pevifion ied
 lives recotaderting and imprevise wamethive that $=0$ and the previcus day' It In for the purpose of Bavige Thidatation in tiour parficiloti har pow athle we amend it. Nothine is pertect in thle materiat worlid of surn. The quicker any man who batlerea the ts perfect, ilies tiou briter. This seat of impertmition is ntamped on evury act. Nef matier how much thoacht or study wr hifler to hemr upen dether or nets: saticobs in cure to liee somehtag erenif in them, and nest diny we are sury to sen somy way to improve on thim If in thir mental thite thint imphits the calleavour to tmprove. That matirymen than ine threen away is uned as its argument agatingt thelr trec Ther fart tif thrtr bertar throurt away should be no reasum for their tomplist nlatitioe II a riand cate toe wiact muat if that the reanan why whern shouth shirtaitn frem it* is it Socnure some abuse thingi that athora must ruffer, and it nome do not treat miftrmett property, that is nit ranvon why others ithcelt meffer throueth thatr s-igher inat tudthence. What are *e dicine whe are nuppeped to the the taitict it thir terithoctumt the of the cosantiyt tre $=\frac{1}{}$ Nabr anythitar to edacate thime peughtr in to the necer-

 are forgectal of tiae fact that wn mant aut live Jar ocrisives aloum firat mast lise for olsera, und make thins thes
 slbe. Thes anether argument moticealite is that texamen no complaint has liciat maile tos thie fichictature ve Thov't ntt part घpon th Be w! wait (or a netigthour te build upaia ofar faill before pattink up our fence? We

Ro bot wait fur compluints to apprat io rumedr thedh. We should mot walt For surh complaints to arime intoren tieconsing tor legtatute: Suppose orst Tiliar or alpe winter after, canips of in improper kind were sapulied man. Ere thumside of mes to autler for sla mouthe of the year, zfeply because thie goar we refuse to iegialate in erder that things of the kind may sot luypen. Another argument ased If that this in an interference with as Induatry well conducted. If the foduntry in werli conducted then Ieginlathon of this kisd can do no barm, but will te is antien to others engaged in it what the law expects of them with regard to those mmployed in the induatry and the coudtilene under which They have to be exoployed. We do not know when there will be a change in cenirtige conditions. We do not know what schane is managers may bring about, and we munt anticipate by our femialation how we are golng to protect the interest of the labourve, Angther arrument put forth is that thin cill have a bad effect upon future inAustries, How can it have such effect If thin induatries to-day are well con dueted and are ebborving all the provisions if thin Bill Then murely thone about to be estatilished can conform *ith the emadrtoses in an Induatry vilels to betnr carried on now. Capital comilng into the country is another arcument meed. Its representativea If ta heli, will ask as to the fawn we bere tearing apone the industry, and fr cuch tave as we are discusitng are jut upon the statute book capitalists will not eume ha. If mock be the case Thes 1 eay, let them stay out, because \#f we are potare to permit the eatab Shabmat of industries bere whlich will pot give a reasonable and falr protection to our people employed is them,that vill ant protect their healih and atrubath while they are at work, that will not furniek them with a
correct statement of the the they are at work and will not do those things peceasary to protect their work; then the quickor such people stay away the better for all coneerned. If I had my way 1 would herve notice upon avery captallst of fils hifit that he would have to conform with conditions exlating in countrien whose leginiation ta more advaneva thian our owh, Stil anothar argument is that this Bill would compel the operator to carry canh threugh the season. It would not compel anything of the lind, because where a workman is about to leave he glves a week's notice and during that week cash can be provided to pay him. Industrles in this town earry eash all the year round and do not find it a burden. Employars in the city, whether on Water front, or fishing work pay the men in cash whon they want tt , and coisequently there le no hardship for the logging people to hold eash to pay their men whan they (should men want to leave) get proper notice. Affer all. there is nothing to prevent the operator of the industry to make a contract to take hifm out of the provision of the Bill and it this is done it fis the men'tis and operator's buasness onty. Thore ts no law passed but in way is found to get around it. But the majorlty of the men will take adyantage of laws made to protect them and will work in comformity with such lawes. People right here are living under conditiona far worse than in the logging eampa but this te no reason why men should Ilve in camps not properly built and protected. It people are living in this elty under conditions which do not make for humnn tecency and for the comfort and mrieguarding of HPW, then it is to our shame to permit it.

We point with pride to any industry about to be established here in
8. Jotn's with tig newsiniper headtimes deallug with the capital fuvesteil and thot employment to be given but the bad housing system does not receive such flowing advertiang, if it were made a regulation of the Muntelpatity of other such bavern: fog body that as anon as such ladurtry were started, side thy silde with It ahould grow up, the building of supprior houses for operatives, then we shonld not have the unfortunste conditions that now exist here. One of the food thingn that this Hill doen la the makting provision as to the way in which wage earaers like the loggers are to be boused. If we apply the samu principle in eatablishing new industries here then we will got rid of the ofle houstng conittrons exlsting for not alone do such conditions inflet a leas to the peopie tut is toss to thie whole community themase if the pmople suffer through finpaired health their offapring suffor as well and thern is no greater topes to the community than the III freath of its citizens, The rrgureent is also mate that no complain: luhf bieth made to reader it beces eary to fix a beate of rood. I havs nin doubt but that after due in vertigution we will be able to fix a scale of food to meet the appravil of the owners of the lndustry as weil an the warkmen. Some peoplo fmas fie that becatise a man fills the of fice of Agriculture and Mines and has bud no experience or has nerat been engased in logsing or flahing He te unabie to form rulos and re folutionis governing such industrien, kat look around the world and you will diverve taen who never had any traln fus landling the latest projecte and Eolving problerns of is tremendour character: One of the brightent pargen fii British history refers to the manner in which Lloyd George

It in nut so in the sense that we want to interfore with hla eapital or to take hlin lunatien or pulp. We nre goling to $\mathbf{t h}$ terfirm with tho manner in which men will be smployed. In which they are undiur to be fod and houned, for thin in is publie matter and that fe a Juntif: carlon of pur Interference No man has the raftht to steal or destruy the prom perty of a compazy or individual. beither has the company or indirl dual the rifht in steal the healts of the operative or sak him to worl funder conditines which may enidan gur his lesaith Efe las ao rikit to " cive him food whleh is pat sutmclently nelt-watalsits ant metrithous Th the lecialatine of other cocmtrien they go to the extent of haxian hoseses of rest, aed presilie that the falr of rueh shall le ruperwed an maxy Hises taring the hours of text, biat Fren shoulit thre isi a certain temper jourm, and that tonls lantlied by them fhalt he kupt in a rertalin tempern fure no that the cold venther may not affect them. You talk about firstotation elsewhere: Why you Fill find listulation which layn down how many cuhile feet of air opern
tives are entitled to, and how the wall $_{3}$ and celings are to be covered to protect not the machinery but the men who work in such places, and that is the prineiple underlying this Bill. The State has a right to interfere on behalf of its citizens to regulate the conditions under which work shall progress and the right to protect the people. The same applies to landlords in this eity. They are compelled to do certain things that are necessary, and if he claims undue interference with what he considers hile privileges we hold that we have a right to protect our eitizens. In etfect, we say we do not represent you. We represent the eftizens and are here to protect them. One hon. member cited the case of the "Bonaventure" whose crew stole the fish beef, ete, and an instance of that kind is ctted where men might be sued and fined for a breach of the law. I beg to polnt out that the prosecutlon will not be sustained in such case, because where the owner or agent has done all that the law requires him to do, and puts food enough on the ship necessary for the voyage, and those on the shitp afterwards steal it, he is not respousithle. The breach of the law is not oven a technical one. He has done all that a reasonable man shoutd do, and he is not asked to do impossible thinge:
Another argument made use of to insure proper conaltiong of work is to increase competition by increasing the number of companies and by making companies compete for mer. Now the hon. members could not have given much constderation to an argument of this kind, labor coudtilons are governend by the law of supply and demand. That is the axiom that was once and Is now by some, accepted, that the law of supply and demand governs the wages of the workmen and the
conditions under which they work. If you examine that a little more clasely you will see how that operaates. Man has a natural right to live from the bounty of the earth to get for his toil that which will enable him to live as a decent member of aociety and anyone who prevents him from so doing is depriving him of this right. To do otherwise is to reduce him to the status of the lower order of animal life. If fresi meat be plentiful and the demand great, then the price is going to go down; if the domand in great and the supply not plenty, up goes the price. If there are plenty of horses and the demand not great, down soes the price of horses, and vice versa. According to the argument the only way for a man to leep ap the price of labor is to prevent the propagation of his specles, to kill off enough of his brothers to prevent worktien from overerowding the labor market. Could anything be more materialistic Man has right to live from the frulte of his toll as a docent member of soclety and you caunot consider any question of an industrial or economic eharacter with out considering the right to live from the fruits of his toll as a decent member of soclety and you cannot consider any question of an industrial or economic charactor without considoring the right of the workingmen in connection with them. What are his ebjects, his ambitions? He is not sa:isfied with conditions as they were 20 or 30 years ago, and it is fust nas well for us to make up our mindy that be is going to got what he wanta, ald we have to make up our minda also that if we do not pass thls Loggray Bilt scmebody else ts going to be here whe will some time in the future: Twelve years ago the Workingmen'e Compensation Blll was thrown out of
the Hause of Aosemily, and plasel there five years later. It we stedy the history we iltt flit we hre atets tratntlior a path that was beates sevee bundred years agn. Bathe were prorided then in cerfain formis of lowins untid eipplajmucat fur wortimati.

HON. MR. MECRATH-WBy were they dinecontirwed)

HON. MR. GIEBS.-Tlecaum of wars and dilturbance which wure taken advantace of hy the powerful to enalave tnautrially the many. I hope the day witt come when hinthil will be provided. We have to gtart in on a eampaign of education and show the people the benefita and ancenaities to be dertvet troui thitr une ant wirn art pot dotef, our work it we do not eda cath the people ap th theit meode in many of the indastries carried on eeman cinturfos xgo remitithons vere made whereby food priese sbould be foir and reamoabin, and it wan forAdiden to bry up rive matertas thus pirveenting munopottoc, tiut spparectis to this twentieth eentary we have natived these copditioas whea manter and man livel on good terms and earh popecselited the righti of the ather, and each endeavoured to to hils part. In this twentieth century dividetals ate of more lmportance than the limath of the operator.

With regard to the motion that the Dill be referred to is melect commitues I murt object, Mr. President, to this filt betige soi referrect, becaune 1 think the principle to beatn with ie wrone We have no power to refer thie Bill IS a setect commituee Mits biti lis a putitte one, sot so privite oue, fout ast for cupferring nethis or cumceasoess upne indtividuals, promotel by individitc, Bot in Bitt by wta tottranat seeka franckliee from iha state whert th a commitren would eramine as to how far it would aftect the state. A-tact enmmittees tre met ipporitutat to Inok into matters of thie kitnd Bilis

It this kint are sot reterred to asket aomumittees elaewhere; anly bille of a private character where it beenmes ancesaary that invendigutfos and re sarch be beMA is order that members may make ep their mind as to bew far that which is saked affects the indlatitual sir the riaht of the, indiritual tre so refernad. They bave ta other partiamebts what are known as atabitar committrees, but 1 thitak we woald warcti til vall where an bitt of btili kind whinh affects the Colony an a thole was reforred to a select com. miltees On these grounds 1 muit atbject to the motton.
I beif to move that the Bill be now thad a seoond time. The House is not comamitted to the principte of the Buit entil it is rasd a second tume. there Fore if the amendment carrien how EIn it ber ruterred to a sethet coth: zitten when the lfouse is net committed to the principle. If the Bill is fost or tha mevibit reitling then the HitI to hov, and there is no more mecont riad tos ahout it.
HON. MR. ROBINSON-I think the Bob. pentleman ls alsolutely correct fir that The onty coarse ts thyt the Iender of the Goverament in 5 thin House ahould withdraw hls motion ana tot the necond reading so throush.

HON. MR. McGRATH-An a mat. tiar of fact 1 think thas on ruflection both hon. geattemen wIII find they five takens the wrons positioti. It miny cases a hill is referred to select rimmitters betore the mecond reading Becruse thin House is mot prepared to a corpt the primetsle of the Bill an it *hanits, anil the Bill is eent to a sulect comilute in onder that it may be guotitied. At the game time 1 do not if $(\mathrm{nl} k \mathrm{ive}$ oughit to stand our any atrict conatruction of the rale at the preFint timen 1 eugcest that the hon. entleman whe mioved the zmendment Hithitraw it und give the Bill a mecond roading and the same objoct which
he desires many be attalsed tomorrco 1 think it better to let it ge inta com: uiltice of flie whole and $\mathrm{d}-\mathrm{at}$ wih it there. The footion fur select cotirmattee can be mate aftur the seconal reading passei

HON. MR. SQUIRES.- -1 Enideritund that the motion is that the Largens Bul be now-rest a mecond time, and to that there is an ameodmint that the fill bo referrat io is select cornmitise. I proposen to vote for the second readinf of the Bill. I feet that this House mhoutd endorse the prineiple of thin Bill and pass it. If it fa the will of this Councll that the Bill be then referred to a welect conimittie that to a mitater for the Council to conatder on a sabneguent motion. 1 am of the optalon that the present procedure although it was the procedure followed lant gear with regraril to the same IBII la Irregular, Let the nill be now reat a second time. The following motion will be that the Ball be referred to if Chmmittee of the Whole House on tomorrow: The amendment now moved by Mr. Bishop to the soconad remaling eould then be moved and debated hut at thif itagu the amendiment should not be pat. I eossequently propose to vote for the second reading because then principie of the Bill han my endornaifon and support.

HON. MR. BISHOP-I nhall mot oppane the necond realtig and ask leave to लithitraw my amesitment:

HON. MR, MeGRATH, - 1 thmk my hon. Iriend ls atill wrone. I ippenk now merely out of my experinsee in the Lewer House The motion now is for commition of the =flotic to wifch aill amendmitht is made for a select coesmiltee and ant commalter at prisent thens. Let un ansume the motton in carrind. The select committee roporti hack In due courne to the House and then the House reters ite repart to a committen of the whole. When the antect comnittice Peporti the mitt ifter giving it consideration then my
hos trinal cas more that the Bill he tefarrad to as committen of the abole foure oif fomintrow. Lit us follow the chits if Hitte turitior if wer go I to or manitued of thin whole antl we finclde for a weleet oommittee suit then flable it trit hie mat lion witer combsultos, the piteot commitie to ap Tounted by itse Prusldent is full Houne; the ablect commitime talics the fill anil comes buck suit seports not to then C-pumitutie of the Whole but to tan Iloume The Commilter has ne power to appotat selent committies: that power rusts bily with the Houne hnd when the seliect corumittien makes Its report to the Hoase the Houne reforn that mation bark to committen of tho whole It is perfectls clear to tuy mind; it occurn every weelh of thim rominti of the Levert Houte

 LOCAL AFFAIts BILLL
Secend ruading of tacnl Affalrs Iill.
HON. MR. BISHOP-The Bill ro frin to the admitsiatnation of focil asfalm It in not ereatly ehanaed from the lav as ir now atanitr ow the atatute twok. A bill was poured a number of fiary ifm kintis zathinty to THm of 3ectione of the oxorntry to alect Bearis for then mexapenteat of tocat aftaise. The machinetry is fresol to he- umber tumes, wnit the streent fitl is to alm. pilify and make calarer ifin atecition of these Boarts iter far flan lowe: branch of the Legislature han ano teedent in eimpirylne the Hill I am bot prepared to was; hut we sill pur: tally esecover what its preweiti provis

Ions are and how they are eoing to be carrlet into etfoct, and pessibly it mny be found thist it requitora acme amencmenta. I move that the Ball be read a mecond time.

HON. MR. SQUIRES. - 1 rise to support the second reading of thie titil. There are some sections in it which It if exceedingly difticutt to uidersitand. There must be atome mplaplacement of parastaptis or similar artor ns some of the paragraplas do nut make rense. This is a matter whitch can bettor be dircusaed in committee rather than at this atage.

Tho principle of Local Self Govtrament must commend Itself to every member of this Chamber. Any ane who his any porsenal knowleflge of the adminiatration of diatriet affaliss known that the prosent system th capable ot very great fmprovement, arid 1 am convinced that this Bill is an honest endeavour to improve condttiona. Distriet representation should have nothing whatever to do with the allocation of money. It is not fatr either to the representatives or the poople that such ahould be the case. For al ropresentative to secure personal lmowledge of a large constituency containing 150 or more settiaments scattered over a very lurge coastline ls atmost frupossille uniess he devotes his whole time to district affairn, and has an offiee in St. John'a with at least one stenographer to handte correspondence.

It is not filf to the people because the present system has brought many pereons to look upon rosid money an Government moneg for distribution among the people without having any regard to the fact that road money should be as honestly spent and as honestly earied as any other money. The present aystom has developed the tiden that moad money is akin to poor melfer; fuy change that will help to abolish that ifiea muat the welcomed by
all who desire to see value secured for money spent:
Thife Bill is based upon the Act of fy9s. That Aet remained on the sitatute Book ever since with one or two amendmonts. It has been inoperative because of the extreme difficulty of working out any self government meatare in small communitios if comparntively poor peoplé
I feel, however, that this measure is it suhstantial improvement on the 1598 Act and any effort to develop the idea of local aelf government is well worthy of encouragement. Democratic government is hased on the people themselven. Under our system the dis: tricts speak ss a body. Why not let the town spealk for itself on ite own local affaira? if in the small towne ground our coast there enh be got puble apirited man who will be prepared to make a sacerfice in the interest of thes general welfare of his town or gettement, then an improved condition rumst follow. It it a natural developrient of the principtes of democratic koverament to extend the system to local affalirs. It may be doubtful whether an elected board will be able to be na firm with the people whe elected them in enforeing value for monay epent ras ic boant not subject to the popular will. I know of places Whers 1 am sure the money will not be sid vell apant 1 know of places where I am sure the money will be bettar speat $A=$ to whether the matter on the wtiole will be improved time slone can tell, but 1 belleve thia experiment should be made, It can not cause the people to get lees value for rond money than they have been gottifig and it mey hy the development. of viblife spirit improve conditlons in my opinnin it matters not who has control of the expenditure provided the maney is pald out kor value givan. If the money is spent at the proper time for road repair under intelligent
supurvision by those who not only plan for the year's expenditure but pian years ahead in the interest of the roads sad bridges, it matters not who Eppoints the person in control. I am hoping that this local affairs aet will so encourage local intereat and devplop public spirited diainterestedness whicl will inuprove lucal conditions: I consejuently hesrtisy support the princifile of the measure.

The Eill was read a second time tind ordered so he referred to a comwittee of the whole House on to-morrow.

GENERAL HOSPITAL BILL.
HON. THE FRESIDENT Informed the House that te had recelved of message from the House of Assembly that they hadi jaseed the Bill entitled in "Act Respecting the General Hos: pital" in which they aaked the concarrence of the Council.

On motion of Han. Mr. Bishop this Bill was read a first time, and ordered to be read a second time on to-morrov.

## SEALING BILL.

HON. MR. BISHOP,-In last sitting but one, question was asked by Hous. Mr. Robinson whother any communkcations hat been exchanged with the Dominion Government respecting the Staling Bill to which 1 replled that there had not been, which was correct. Eut an there land been at communicaflon from the Gevernment of Newfoundland with regard to the Guif seasing, I deaire to read for the House a copy of that mesoage of 25 th March. 1915:
"Haye been informed that Norweg lan soaling steamers which cleared from Canadian port of North Sydney, to prosecute the sealfishery in the Gulf of St. Lawrence and vicinity intend remaining out till June if this be so. destruction of old seals by guns of these ships will have a very detrimental effect upon the fishery, as not alone will they capture a larige num-
ber of seals bac wil: also injure large numbers, whinh will afterwards pertsh. The law of Newfoundiand prohibits killiteg of soale after May lat. Would recommend that your Government would onforce fams in connection with Norwerifan stetumers."

Con motion of Hon. Mr. Blshop, the Houne adjourned until 4.30 p.m. on fo-morrow.

TUESDAY, May 11th. 1916.
The House met pursunit to adlournment.

## LABRADOR FISHERY, BHLIL

Cornmittee orr Latirador Codfish Bill.
On motion of Hon. Mr. Gibhs the House went into Committee on the Bill, Hon. J. D. Ryan in the chair.

HON. JAMES RYAN.-I would like Mr. President, with the permission of the House, to make a few remarka up on the measiare before the Chair and at then ontaet I cannot refrain from asaerting that while proceeding with the conniduration of this measure we should sive it most earnest attention before entering spon any definite course of action. It in in my opinIon a very difficult matter for any percon to fix the price of fish shipped off the L-abrator const so an to satis fy the sellers and huyersand I cannot see how it is to be done unless a satisfactory fisure is arranged between the buyars and sellera themsolver In my opinion it would be mare in accordance with the fitness of things if the buyers and sellers would fis the price at the time the goods aro boing delivered. The fising of the price is an impossibility top Erest for anyone person to assume nefore the keots wry sold or even at offer can be drawn from prospective hayers. In my opinion two prices ibould prevail; one for finh Bhippod from the Labraior without uny allow. ance to the sellers for bonus or freight as thif would leave an open door for

Litigation. The Straits fish is undoubtedly better than what is caught on the Labrador coast more particitar Iy what comes from the northera parts of it. Those interested in the indus try know, that buyers of fish abroad Who understand their business properly sometimes refuse to treat for shipments of fieh trom Northern Lav hrudos. It is certainly a poor article whon taken out of the sea; the Iivers are poor and yleld very little oll. Experienced buyers are aware of the quality of the flsh and I myself have seen fish taken from the northern parts of the coast though well treated and properly cured, that was hardly fit for humin food. It was so thfckend dark and of auch a generally inferior quality that possible purchasers looked asknce at it and it was most difficult to obtaln a market for it. I have beard 3 sreat deal about the necessity for new markets, but, Sir, wo shall tose the markets we have unless the cure In Improved. An I view it, the care effects prices and unless it is improy ed we will be compelied to take much tower prices in the future for the flifh. Good fish is more valuable than heretofore and unless we endeavor to itoprove our curo of Labrador cod we vary hhortly will have our catch, 28 wrell an prices greatly reduced, for we tmust face a fact which is quite ap parent, and that for the kecnaces of outulte compettion. We have had ouly French competition until recently, but now we have not only French but Norwegfan, Icelandic, Shettand Island, Faroe Islands, Gaspe and othor people as competitors, and 1 may say that Italion merchants have establishof plants for buying and curlug flish on the east coast of England and send if to Italian hounea to sell. In former yeara hundreds of thousands of quintate of rishl were athipped off the Labrador coast to foreign markets, but the industry has been dwindling, is becom-

Ing more and more umprofitable, and a conple of yeara ago the induatry had ulmont reached its nadir, while last year only 91,000 guintals were shipped from the coast. The cause of thls unfortunate condition is imperfeet cure. Wo must readjust as it were, our views on the price, and minst give particular attention to cure if we are to get aven fair prices for our eatch, and it ncums to me that unless we improve the cure we will run the risk of losing the markets which we possess already. Not many years ago ten or twelve steamers were chartered to earry cargoes of fish to different mar-kets-last year only one steamer was employed. The employment of steamerg to take the product to different inarkets was a very grent advantage to everyone connected with the Labrador flshery, because the fish reached the marketo so much carlier, and a great portion was consumed and somo marketh were bare before salling vessels coutd arrive with cargoes. This means of getting the produce to market and fit consumption early had to be abantoned owing to the fishermen holding back their fish and refusing to deIlver it. Every strike at Labrador has resulted in loss to the fishermen indirectly, it has ted to the curtallment of mupplies, the withdrawal of steamdirs to carry the product to different markets of the world and, finally, it has tended to Influence merchants to withiold supplies for the Labrador fishery. Formerly one of the largeat markets for our fish wan Genoa, which would take about thirty cargoce ,hat we gradually lost it, and 1912.13 the shipments there had fallen to three cargoes only. No more fish is befing consumed to Europe than of old, it is difficult to sell our fish. owing to the competition to which I have already referred, and to bad cure Icelandic fish and other fish is better cured than ours, and they can
conserquently reap profits thoukh they sell for less than we do. 1 wish to be excused while giving one instance from my own experience. In 1913 I thad a cargo of fish on demurrage at Gilbraltar a long timeand eventually was compelled to consign it to one of the largest fish merchants at Genoa. That merchant was ketting fish from fceland and Norway and solling it, but could not sell mine, the price belng too high. He did not complain of the cure but the price was too high for him to dispose of the fish, and the last of it was not sold for thirteen months atter being shipped. I lost $\$ 1,500$ on that cargo and might have lost $\$ 10,000$ but that the cure was really good and this shows the value of having good properiy-cured fish. I relterate the assortion and cannot improsis as forcentity as I would like on hon. members here the necessity for an improved cure if we are to hold the markete we now possess and expect to get fair prices. A number of firms have abandoned the Labrador fishery, not that thoy lave made enough money, but becanse they have lost money by it. In my optnton wtthtn a very few years the fishery will be prosecuted only by planters owning schoonars who, with thelr crews, will catch the fish and briag it to the ahorea of Newfoundland and care it and sell it in the open market. Merchunts cannot go on supplying men and motor boats and traps to go flishlng. with hooks and lines to eatch fiah when they are losing money by it. I think the Goverament should appoint culfers to supervise every shlpment from the Labrador coast, with power to fesue certificator with each cargo co prove it is No. 1 quallty. This would ve a very great advantage. Very often now a sale is made and finalized, so to speak, but is not conttrmed until un expert is sent to Glbraliar to examine the cargn,

HON. MR. ROBINSON-it is not
my inteation to oppose this Bill on its keneral prineiples, although I have not any bope that benefit will accrue from it it is experimental, and some times great things do arise from ex periments, but I fear very little of any value will arise from this. There ts one section in it to which I have no alternative but to take very strong exception, and that ts the one now under consideration. The Labrador Fish Prices Board if it is to be formed, ahould be representative not of a sectlon but of those who are mainly interested. There are two classes of people who are interested in this mat ter-princlpaliy interested; the fish exporters, who may be sald to Incluide the finh buyers. and the fiabermen.) fall to see, as it have already sald that the Board of Trade represents the fish exporters. I fall also to see thint a political party represents the Cshermen. I shall therefore content myself with proposing an amendment and leaving it there. The amendment I propose is as follows:

That section 2 be ellded and the following substituted therefor: "On or before the first Monday in July in each year the Labrador Fish Exporters shall appoint one person, the MinIster of Marine and Fisheries another the two so chesen a third, and the three so appointed shall constitute the Board. A meating of the Labralor Fish Exporters. of which a full month's notice nhall be siven, shall be convened by the Minister of Marlne nad Pisheries in SL. John's not later than the 30th day of June In each year, and the appointment of the aforesald representative shall be made by a majority vote of those present"

Flab exportere will then have their representative, and there can onIy be one representative of the fishermen of the country, and that is the Minister of Marise and Fisheries appointed by the Government,duly elect-
od by the country.
HON. MA. GIBBS-Having charge of the Bill betore the House I cannot consent to the acceptance of thie amendment because that which the how. member wants to eliminate, by lifs amendinent he perpetuates.
HON. MR ROBINSON-How?
HON. MR. GIBES-Because the Minister is a member of a political narty und is roturned by a minjority vote of the district he represents, and the same ldea of poltificsand the same fenr that politica will intervene tin the appointment of the Board ts Just as apparent, and no doubt it will be sald ao, Just as much as if we were to allow the sectlon to go through fin ts presont form. There is no body in thit country known as the Min Ix. borters' Assoctation ;they are not an organized body. The Fistiermen's Protective Union is an organized body and represents possibly the majority of the fisthermen. To rofuse it the right of appointment would not le fair. In Elagland the present Gow erament fa made un gf different elements and some of the mupporters of that party are what is known as Labor members. These members represent Trade Unfonists and were first electod to the British Parliament throumth the agency of the funds of trade organizations there And you will find that the Goverument in England recognize the tahor party and Trade tnfonints by nominating them as boseris of settiement of induetrial disputen and other things, and surely when in England that right is recog: nized and conceded there is nothing wrons in couceding the same right here on behatf of the FP.U. In New Zoalana trade and labour organlzationg are given the right of representation on boards of difrerent Etucir relathing to the sceate of wages and simllar matters, and thoy claim the right and the rizht is conceded.
and that is all the $\mathrm{B}^{2} \mathrm{P} . \mathrm{U}$. elalm here. The fish exporters have no statue as an organized body, so to speak, and 1 think hon. membors will agree that the section in the bill us it stande wis meet the wisties or all concerned very much better than the amendment proposed by my hon. frlend.

HON. MR. MOGRATH-In New of the tone the discusston has taken and with the fiea of a compromise. may I suggest that if the Fish Exporters are to name one member of the Board, the other might be nimmed, as the Legisiative Commisfiton on Fisheries has suggested, In reference to the cull of flsh, by the outport members of the Assembly. These Assomblymen. it could be chatmed with much justlice, are the best oner to choose the nominee of the fishermen As 1 understand this Bili, it is not so much to fix prices as to ereate a Board of Arbitration yearly to dectde what tigure is meant by the term "current price" 1 may be wrong. but as 1 understand the situation it is that thousands of people go to the Labrador to flah and are supplied by merchants or pinnters, to earry on that Industry, nind because it is more conventent for both parties to wait untll well on in the acason before decidtig on the price, nothing is tane to fix this at the start or when the flish is bourht from those who eatch it and put it on boand vessels for shipment to market. I have tried to leara what part of annual eateh is sold under the term "current price," but have been unable to get any clear idea thereon, thoush apparently a large proportion of it is 30 sold. Then, we muat conclude that the practice is of benefit to both parties, or it would not be continned: nio, if it nuits the fisherwan because he hopes to get better prices later in the
season, and if it suits the merchant because he is unwilling to fix a price untll he knows what the market is likely to bring. I think, then it is only fair that both parties to the transaction should have some say in settling the price when the time arrives to do so. Accordingly, I agree that the man who catches the fish. as well as the man who buys it to export.should have a voice in fixing the price that If to be pald under the arbitration which this really represents. With reference to what is said about the Pres ident of the F.P.U., the fact should not be overlooked that whille he speaks for a large number of fishermen, so far as one can Judge from the results of the last election, there may be other fishermen's organizations tater, and therefore, it is questionable whether we should recognize In an Act of Parliament any personality if we can devise a scheme that will meot the requirements of the case as well and prevent possi bilttes of trouble in the future. Accordingly, 1 sugrest that we leave the appointment of the fishermen's representative to the outport members of the Assembly. At present the effect will be the same, because Mr. Coaker would probably be appolnted, but this step may obviate friction In the future. Another difficulty which arises is that ander the Bill, it may not be possible to get anybody to act either for tho exporters or the fishermen, and even if men can be got to act for them, it may be difflcult to secure an umplre, and then the Supreme Court will have to name one. This I think will not prove easy because it is fairly certain that the first two men chosen for the Tribunal will exhaust the poasibilities of the community as to getting a derirable man for an umpire, before they go to the Supreme Court, and if they aro unable to get him before they go there,
the chances are against the judges getting one afterwards. Still, 1 do not think we should reject the Bill. We ought to give it a fair trial, rocognizing that the fishermen have a grievance, that they belleve they are not getting a square deal as regards prices; and that the broad principte Is a good one that if two people ugree to buy and sell an article on a price to be fixed, both ought to have a say in fixing it. At present the fishermen have no say in fixing the price. This is done in some vague fashion; and, when one is digzatistied, he bas to go into Court and sue for what he thinks is the current price and that, too, agalast alleged combinations to keep the price down. There is, however, another way of dealing with the problem, and that is to abolish the "current price" and provide that no agreement regarding the sale of fish on the Labrador coast shall be legal unless a specific price is fixed at the time the article passes from one party to the other. Then the exporter would know what he was paying and the fishermen what he was getting, and there would be no further trouble, but while things continue as they are, endless cisputes are bound to oceur. From what I have heard, my preference would be for a Bill that would oblige every quintal of fish shipped from Labrador to be bought under a specific price, but if merchant and flaherman prefer the other policy, then we ought to legisIate so that both shall have a say in fixing the current price on that for which they are bargaining.

HON. MR. GOODRIDGE.-On the second reading of this Bill I asked that it be deferred in the hope that when the report of the Legislative Commiesion appointed last session to report on the fisherles was recelved. some tegialation would follow, in which
to some extent, the views of the introducer of this Bill might be met. 1 am totally opposed to the princlple of the Legislature fixing the price of any commodity by law, as tts value must be determined by supply and detand, and 1 know of no precedent for any such enactment as this. Of late years the compotition for eoafish on the cosst of Labrador bas been most keen, and it occurs sometimes, owlag to vessels chartered tor a certain quantity, requiring only two or three hundred quintats to rill up. and atio the super-cargo belng anxdous to get away and catch the market he offers some great inducements. Some hon. membera say the BII only establishes a court of arbitration. It is, in my opision, wo such thing; it is a court to flx the price that buyers shall pay to netiers and without reference to any fuctuations in markets abroad and that pried must be fixed on or before 1st October, at which time there will be insufficlent evidence available to fix a fair and reasonable price for the senson. Some sales of early arrivale by steatmers will probably have reached here by cable and no doubt have an effeet on the opinions of the gentlemen fixing the price for the Whote season, and 1 contend that a hard and fast price is going to injure the fishermen as much as exporters, who will be very indifferent about charterfing veasels to load on Labrador, and probably many fishermen unable to bring thelr catches home will have to let it remain on the Labrator the winter, If lils was a bill to nettle what was the fixed current price for codrish ehipped off the coast $\alpha$ ? labbrador for the sesson, it would not be objectlonsbte, but surely our courts are fully competent to take evidence and declde that question without our creating any tribunal to do it. When the price la ilxed at what may be considered a tair and reasonable price, no
fisherman will care to sell at less, and should markets decline or show a declining tendency our exporters will cease to chartor vessels to proceed to Labrator to load, and thus an insuff. ciency of tonnage will caune a quantity to remain there. I consider if the Bill passes it will be quite unworkable. It providen for commisuloaers to the appointed to fix the priee of Laxbrador fish shipped off the coast, and these Commlasioners are not to be paid. What competent or eligible person will accept such a position with the certainty that he cannot please both partfes, and in alt probabitity will displease both? I doa't think that this Bill will settle any difficulty that has been felt with regard to the current price. Fishermen will not sell their flah at the price fixed by the Cominissioners with an advance pald theteon by others, and the same aifricalty will be experienced, and aupercargoes anxious to get their vessels away will give receipts to that effect. 1 am opposed to this legialation and shall voto agalnst this Bill.

HON, MR. GIBBS.-With regard to the arguments urged in favor of the mmontments and againet the Bill, I would pofnt out to the House that the outpert inember is not a representative solely of the fishermen. He repreents supplier and supplied, all cinsses, and consequently, while his interests mayt be tidenttcal with the fishermen, still he fias other Interests to domand his consideration as well. There are people in the diatrict he represents who are exporters of codfish, und because of their trade and busincas they have considerable polltical influence which the outport representative would healtate in antagoulsing. and it would be unfair to cast upon hifs stroulders the duty of appolnting him a member of the board to represent the fishermen. The objoct of the Bill is giving the Board of

Trade the right to appoint a member wo that the merchants may be reprosented by one of their mumber who is able and competent to ileal with the question, and the object of the DII in giving the right to the Prealdent of the F.P.U, to nominate another person, la that the fintierman thall be represented by somelody appointed by that body representing as it does 20, 000 flehermen. This is not a bill 10 fix the price of fish, but a bill to fix a fair and reasomble price in cases where there is no agreement upon a price if the fistiermen on the Labrador sell their flah at $\$ \$ .00$ to A. B. or C., this bill doos not apply. It only applies when fishermen sell to a buyer their flish at a price to be agreed upon Inter, namely, at the "current price" Now, that is a very different form of tontract. And abould not a fisherman have the right to be heard in the matter of what is the current price all well as the man who buys from him? This is what this Bill does. In a court of arbitration each party coald reprosent their side of the case and the facts as they bear upon the current price; then after the subject matter is Investigated these men could meet and fix the price according to the tacts and evidence. Now, it has been said. and I diou't know but it may be true, that Libtrador fishing operations have tioen carried on at a loss, in it not time that the fishermeh should know Lint? What better means of demontrating thint, ofico and for all beyond thoubt if this industry is going down. and if the men engage in carrying it in are operating at a loss, is it not time that the fishermen should know it in order that they nay govern themselves aecordingly? You cannot have a better means of doing that than this BIL. I hove not the least doubt that we can get men in this communIty ouly too slad to net upon that board and discharge the obligations

Which this bill timposer. If each goes - wre to do his duty honestly and fearIVsity thorn will be no trouble or dif. fiealty in arriving at a fair and ress quoable price. If the findings of the foard are golng to be unsatiffactory to the futhermen as some hon. members argue they win, that which busiHess interests now pretend to take slam at will be of no value to the Hishermen. Hut 1 do not agree with thete contention. A great deal of geoa vili be accomplished, because it will tiave the effect of removing distrust and susplefon from the minds of the Labrador fish catcher. Give this bill a fair trial. There is a great deal of discontent in the minds of the fisher zaen, who thiak they are not getting at suuare deal. It is as 1 have said. only whon the fishorman and the buyer fall to agree upon a price, that this Hill apmies. It does not intertere with the condtlons described by the hon. mimber: It has reference solely to the fish purchastad when no price has boen agreed upon at the time of aale, but to dependent upon the extent of the cateh and prices in the forelgn marikets. Surely it cannot be seriously eontended that the flsherman has no right to be heard in relation to the dmount he in to receive for his fish. wheu no price was agreed upou at the time of sale. It would be a manifeat tnjustice and wroag to hold that if I sell to an exporter 200 atls, of codfish at the current price, that I should pot have any say whatever in the fixfigs of the price Why shauld 1 be confont to inccept a price fixed by three or tour men who export Alih. This sill is possibly of a character we are zot calted upon to deal with often, but it if the peculiar condiftons surrounding that trade that call for it and it faght not bo at difticult matter in Septomber or October to determine what if going to be the current price. The fishermen in thls country aiffer from
any sther products of tood in the worlit if a farmer in the Weaveru Staies is malaer eraln fin cas Inil whit the prico of wirat is in any pari ef the worli There are fintormatum Burnaup where the Coverumanet atpoly bin with the pifices. HON MR. HARVEY-I am very antives indeed to try and help thin Chiruogh and ent a workable biil for various reasobs one is that, no stoubt tharie th amune the fisterment A. ntrong feeling in favoor of some evich hill. Another is that it is very expliamant, and a course that tobody fin this Chambier floes to turn Anen or to ammad beywail minor detalls, bilis that conme up wanaimounty pasied by the other Houne, Peraonally, I would the to uen char lim so throuigh in somn form and 1 am prepareal to lielp it Shrunsh althomeh peraptially, I do not think it will prove in practice ony runt bemafit 1 sear a krast many firficulter about ithe 日ill. I that not lintusdes to speak at this stare. fut for the sake of charity, 1 wowid the to catt attention to nemer petatm that lave atriak wo whilie Tlistening to the Arbuts, as instances of misapprehumalos of the facte How. Mr. Gible fald he thought there foucht to the ne tiricult in pettine the members of this toard. whe wowld te slat to oet gast to do their fuity well Well, 1 dif. provith lum, for thle reasm, that the fint as It entmite matres it froporither for any appointer to do his duty, that is to corry out what to meputred of titm by this Bil. I daty anybody on
the date named in this bill, if, indeed at any date, to name a fair and reabornble price, applicable throughout the season for Labrailor fish. It it a question if the price of Labrador fish can be fixed falriy and reasonably under any circumistances. There cannot be ramed, ab a rule, and between fudividuals, a price which can be descrithed as fatr and reasonable for fish shlpped throughout the season. The buying price has been pure and unadulterated speculation, and it ean harily be anything else. It has not been what 1 can fairly pay on the Labrador, much as I may wish to pay a fitr frice that 1 am prepared to give, berause I don't knew what that Is.

When I buy fish on the Labrador I do tt perforce in the dark. Reeulte dopend upon the quality of the firth, and the speed the vessel makes which carries the fish, the question of ses damage and the date when the fish gets away, all varying factors, and 1 doubt whether anybody can exer say what Is a fair and reasonable price for an articte, whose value varies bo coarstantly, I want further to say that the presant current pilce system, unsatisfactory as it is, has been metually adoped perhape ase much as for the purpese of protecting the fishermen as the merchants. A man fishtug off the Northern Latirador hitherto has lieen eatirely out of touch of the mar rets and similtarly with tho man to whom the is shitping fish, It was itupossible for hifm to say what was a fair apeculative price even, and the reault has been that in order that matther side aloutd get ahead of t.o other, a recelpt has been takzn at the 'current price.' which has treep daffuited afterwards, both sides pulling therr own way. All this woull be impossible if the man on the Labrador had to name a price, henee the birth of the 'current price.'

Let me make clear another pofut It is-argued outside and in this House that-thle But will only touch a amall quantily of the flish shlpped from the Labrador becatike it will only toucb the fish for which no price has been fixed. I bolleve after thin Bill goen through expecially in its present torin that no fishermen will want to settic A fixed price and that men will refuse to ship except at the current price: This may not ocear the firgt year, but it will eventually be the case The trouble then lies In thia can we expect the exporters to buy fish at a price to be tixed by in tribural later on, who may, or may not be unfrienilly and upon whose Judgment they may not bave confidence and whose persomnel they do not thow before supplies are given out Men who thoroughly understand the Labrador markets may of course be found willing to 80 on this board, but I lonow many desirable men who would not undertake to name a fair and reasonuble price. To fix a fair and reusonable price ls in my opintion so eifficult that I would not like to be a member of the board charged with tixing auch a thing. To decide upon tha present so-called current price te n very different thing. That is based apon compotition among buyers on the Labrador itself.

What I fear is that this Bill ie gothe to curtall the numbor and reduce activity and compettion of export. eri, because they will not feel like gofing down to invest large sums of thoney in an articte whose cost they thave no control over. This is not but iness and no prudent busheas man. who ls not tied to the Labrador so that he cannot help himeelt, would apeculate on such torme In ell hur man probability hereafter the fishermen will not want to ship except at the "eurrent price" to be fixed by thits tritbunal of whom much will be
apyecte1. We are well aware that the thaturmes are not saliahnet with anfirime condtinnsi att that to the tree reawnif for fikin nitt, ifi: thatit ifier what erroweonply that ther haver but lene kitine vatat and thay want tis

L. pernonally, do not think it woutd be wise to put this matler in the hander of any Mintiter of me Civons. Lecaucic, witfo be may bave a rieht to recognition in the admalsiatration of hakery mattercuttil to in veat htan with the arthorly eurcrated tir rimat to flite protien woutd be to turpone duties upou Blan, which I think ouipht not be limpoted is rlew of the necessarily partian charact: Ef Whict bee mut posterss, secing that he is a member of a poltieal party and to niwiys liatin to be open to ther elurge that soy setten he talies may to in पike Titerent of hit potitical an soclates rather than th that of the fithermen of thil country, Reterense Is muide in the fill to the loard fix thif pirices 1 shoutd tike to sek if terre in to be more thas one price. and If so tor what contingeney?

HON. MR. GIBBS-The contitiseacles, are provided for in section 10.

HON. MR. MEGRATH-But Yvir will nut fix a differunt pirice for aath of thene coniditionie it uppears to me it Iy tatesided to have ouly one price -the 'current price' I do not know whist is litiditent and what to meart as It standis. T have been under the tmpresaton that the purport of the nill was to fix a price which would ithait an thie 'eurrant price', aceord ing to which everybody would be

Alald who had not made a bindins contract for a satishectors fixure
HON. MP. aistor. -The intro aser fot thin monaters thi the leaert House Buformed me that the bill ouly contempletes cne eitting of the Bowrd of Arbitratorn, and that til future or at Iny other time it may be nerensary po grade fish on Latirador, if it doen poccur, it would be noceswary to fis the price arcording to grade, not that thare witt be a difterent prise fixed during flu seanon, but it may conie ahout an foikented by the debile What is fuctarary domts there is better cared flat. and zame atake better cured fish. fut do not ent pald more tu the fien of fith being हr=iलd, different prifers would be palt according to the Erade There will be otily one ulttiog ir thin hoant beraume if hone membern
 tec thas if the Board falle to act, the tiupremer Court ahall art. It ouly cons-$t$-implates ooe price for the seasons. Int if it fails to ampee thenf dilfarent prices will be necerning.

HON. MR. HARYEY-An we co wid fith the BII, it serme to me to low: foule muer airti mere than it witio dif: ficulted of all sortis, sand 1 see more furfeulties as to the detalle, but this fo sot necbinariy a reancii for throw. ing if out With remern to thile seotinn, an every speakist has pointed ous, It is almost impougition to fix what, कudicr all rircuritanices, iv a yalr anif ramomatle price and ₹ut form any grifit of riev as to the way thls Bill Will work out is practice I would like to Bee the dite fore newd price minte 4he laf September. and 1 =ril explats Nay. I foel this कत्y sith meara to fits Section it the date is to the fixed 2ns tho Ist Novembeir or December, it Hatuly means that prople wili send founels ta Lalorador, und if unuble to fotien to terms with the finhermen. thog will liave to load their vesaels at filit curreat price, and they will not know what that tia. WIIt any sane
busimess man Bernd a shamer to Labrafior to inveat say 8 to 0.000 in fith it a prices to be flxed by a Board, whose very conetilution he has no knowfetge of, but who aro to inveet his money wthout his control? i say no bunimees wat who in Dui already eo tied to Labrador that hu cannut help himsetf. cun reancmalily he esjefeted to to mo. ant I expreas my own oplaion, knowine that thervi are other opinions I pey I do nat underetsind how emy sane buaines\# mun can look forward to chicterlug at steamer or aren at salling vensel, fendits lier dawn there lind investing a larige sum of money without the varasest utation of what the ftsh will cost, and lisvinis the price on what he must pay puit in the hatids of it Bainal whase persominet he may or thay not liave conflituce ili. My feeling ahout it is that if the current price lat fired on the Ist September, It cannot be a fair and reasonable prios, exefer t by good tortuse, hur-ic tlse price伟 '1xnd at rome ifgure that anybody trap loads vapsets on the Lalurador wil at letst kxow whetel he lif. He will मHy than murcunt preer, or if the currant price is hishar than lie cares to ship it he will be alie io bylyg the ship thelk a spet if the people on Labbrador wIII riccept wiy 20 etuts below the price or maybe tie mas give more thun the current price. My polnt is that untess le has some knowledge of That lee la to pay or control of what he is fraltit to pay for is earso of fish You ilatar him from sanding ta the Lataralor it ell for the flib. That in Lhe Aifleruits aboub the soction, and I Goult move fhat the latter part of the sectlon be stricken out, atid fnatead of thie Iat Octoher. Eeptember Ist be hamed 1 haow that you cannot fis a niroper peten it that time, but at lenat veul eni fix bria that will emable the busimun to bectartiod out upan someHhitis approximating business princiblou Thie is my private opinion, and Iflo nat wati to fufluence anyone It

Will deter people sphuling down steamata and veasels, from londing them, unlesa they have it least a rough ldea of what they will pay for fish.

HON. MF. JOE-1 entirely distgree with Hon Mi. Harvey in this matter. This Board would aimply be taking the place of the merchants who fixed the price before, and if he will be afraid to mind down vessels to load after the Board ts appointed, he ought to be afrutd to send them down when the infechanta fix the price in the fall, or try to fix it. I cannot see any possibility of talking ahout thet fixing of these prices, at any rate when we do not know the cateh. A lot of Labrador fisir is caught up to the end of SepLember, zurf the fact is the 1st November is a more suitable date; at the satilus the they might be fixed on the 1st Octnber with the knowledge of the fishermen. The question of this Bill hisylng any encouragement upon poople fitting out for the Labrador is an Important one, and you may be sorfy efter if you passed, the Bill that it vould hove this effect. But I would like to nay now that there is very lit. tle inclinatian, ut the present moment rone are Inclined to supply for Laturador, elther in Conicepton Bay or other yarts of the Lsland, because it does not pay. It would pay under the old circumstances, but not now.

HON. MR, McGAATH-With reference to October 1at, section 6 provides for thist. If a majority of the Board do mot fix the price by the let October then in judge of the court bus 30 dayis to fix it. It is a question for the gentteman in charge of the bill. Is he preमHered to consider another day?

HON, MR. GIBES;-I judge by the deabate on the bill that the busineas carrted on in the Labrudor has been In a state of chuos. This Bili propoutes - fo liring order out at clatos, be cauke if the rifguments of hon. gentlemann und the reasous advanced agalust the Bill are correct, the sooner some
such legislation is introduced to bring about the cessation of the probecution of the Labrador fishery, the better for all concerned. The argument of hon. members is that if the bil goes through it will bring about the cessation of the fishery. Is not this the hest thing for them? I can hardly belleve that statement to be correct in every particular. In all classes of industry money is lost. Some make money, some have made money in abrador and others have lost it, and it is the same with every other industry carried on. Men have started industrles and amassed fortunes, and sloe by slde are others who fall. It is because of the greater executive sbility and business ability of the other. The argument advanced against the fixing of the price is that it is frrpossible. How is it that buyers go down there and fix the price of 3,000 or 30,000 qtis, as the case may be. Surely he fixes the price with the bnowledge of the market where he sells and exports the fish. Others may say it is a gamble Why should it be made a gamble by any body of men? There is no getting away from the fact that though we may defeat the Bill we see the necessity for some such Board as the Bill makes proviston for.

In view of the lateness of the hour, I beg to move that the Committee rise and report progress and ask leave to sit agaln. The Committee accordingly rose and reported as recommended.

## LOCAL AFEAIRS BILL.

The House then resolved itself fut? a Committee of the Whole on the Bill relating to the management of Outport Local Affairs.

HON. MR. BLANDFORD (Minister of Agrlculture and Mines),--Be. fore section 2 of this Bill goes through I may say that 1 should like to espress an opinion in connection with its working, although it is a ditficut"
task to know exactly what to say, as 1 feel fully convinced that the tenor of the Bill from beginning to ond is impracticable and can never become workable, and I am rather surprieat that a Rill of thie nature should be passed in the Lower House and then brought to this Chamber for ratification. It must not be understond,how. over. that I do not believe in a Bill for the election of Road Boards; on the other hand, I think something should be done whereby the neople in the various settlements in our outports should have the power of choos ing their awn Boards; the best would thus be appointed, who would get the best of work out of the men engaged in reconstrueting the roads, which would result in the advancement of the interests of each particular eettlement
I am thoroughly convinced, however from my own personal experience whilst representing one of the largest districts in the Island, that an Act with one or two sections could easity overcome the difficultios which ure presurted in the many sections of the kill now before us.

I shall only dilate upon one of these sections now under consideration and which, in my opinion, is perhaps one of the worat features. viz:-Section 11. "That the cost of the election shall be paid out of the moneys granted to each Board."

Now, Sir, my experience teaches me that to deduct any amount for such expenses out of the infinitesimal sum which is allocated to each Road Board would be disastrous and I eannot believe that the Act should permit this tax upon the Board's allocation.

As an example allow me again to refer to the district of Bonavista which I had the honor of representing for eight years. Bomavista, if my memory serves me correctly has
a grant of S1,5nena. which the Boort had turing that perisat. by us elec thon, to manilpelate fo any way ftey desired and thit amburit covered the sectuon trom Cape Freele to Clanailte -ta oither voris. it fichluind the Cape Shure, Mayly's Cove Mocklekekr, Red culfe, |-onavista Proper, and Canalle so one can reatily apprectate the very small atnount each would recefve when the whote hind bomin trvided, amonget tham, and which would be eonsitiently reduced it the expensen in connectlor with the election of the troart hind to be deducted, and $T$ thitrl it would be a great injustice to make a Roan Bloand reaponsible for such expmses The ery throughour the Colany is that the Road Boards ars not recelving sutficirnt money to keep the roade in eves ontinary repait, to अभा mottiog of prorlaters for the eorn atruetion of new rowds, mues lese to thear the expenses of as efertion, ot conuse sew roads have bewh construet उt by upectat grant and utt the momen that are avatiable should be atron to the ltoad Bloarte to keep them In decent repair instead of anking the Board to pay the expennes of an etention out of their fundir, and if the people belonging to the virious locall then ars so futerested in their particular neetion the election ihould be voluntary and no num for meh shoutd te taken from the pittance whteh is at present prorlded for the Rowd Tolardie

HON. MR. BISHOP-The han, kentlemas anrely knows that thly Bril will not appty to the litile nottlements be refers to.

HON. MR. BLANDFORD-In ruply to my hen. friend, 1 desire to say that his argument geemis to be rather weak and if he will permit me I woald point out that ta one or twe of the tirgkest antitementis Chat tie cin thitit of, for inatance, as 1 hire said a fow momeata azo, such a place as Bons-

Tista. I think that would be a thle fepresentation of asy of the other pettlementis 1 bellere that the masid foard woufd not recerte any ervater fmoruht thati 11 poee.e0 for then places that I mestitined tio my upeaing re: Barkn, in other words, that the Ros. Ilaard for Bonavista wiuld not tecelve iny sreater amount than 11 . 200.00; I do not, of course mean the spertal irmat and I tielieve that the slectiona which have been taking place furing the last elsht yeari free of expenne is an tmprovement upon the Aet which is now before us. Thore las not been a corner of Bonavista Bay where an elective Road Bosrd has pot beon in effect and from my expent sace the veople were well matisfind with the working of such boards. but this section sreates an fmmediate eliarer wpou the Buari, and ahowht sot, In my opinion, be placed apon the Statute book, At all eveata, time will gell, but as 1 have sald betore I do aot belleve that the Bim is workable and do not think that the Road Bloaris themselves will be satiafied to fay the expenses of thelr election out of the pittunce which they recelve

The Committee rone and reported the Bill without amendment.

On motion of Hon. Mr. Binhop the Buit was ordered to be road a third time of to-morrow

STAMP DUTIES BILL
HON, MR. PRESIDENT informeo the Howse that he had recelved messapes fram the House of Assembly part they had passed the Bill entriped -As Act to amend 5 Gea V., Cas Is entillet An Act rapecting Stamp Datier in which they ro suest the concarrence of the Coumeli.

HON. MH. Brshop-Mr. Trestant: 1 move that the Ball. An Act to amtha 5 Georne V. Cap 18, enitled -An Act Respeetins Stamp Duties- be read A firat Itme. The Bill what thes read a flirat time and orderad to be read a necond time to-morrow.

HON. MR. BISHOP-MIr Prestdent: In appointing yeatentay the Select Committee to consider the Logking Bill, you were good enoukh to mention thy name i wiah to say that i denire that you relleve meef that duty. It in known to hon members bere that 1 have considerable tinterest in Inesing and lumbering in the country. and for that reason I feet that whatever I may say phould be sald fo open nesslon of the Houre. For that reasou I ank you to be rood enourh to allow the to retire and nominate another in my place.

HON. MR. PRESIDENT-1 would nok Hoa. J. D. Ryan to act in the place of Hon, Mr. Birhop.)

HON. MIN. AGRICULTURE AND MINES-t beg teave to thy ath the table of the House the roport of the Roand of Agriculture.

## MARINE Disasters Fund bul.

HON. THE PRESIDENT informed the Ifoune that he had recetred an mes sage from the Honser of Asuembly an gualntime the Combell that they had pansed the Permanant Marine Themetern flund Bitil in which they asked the concurrance of the Council. if

On motion of Hon. Mr. Biahop the EIIt wis read in firat time nhid order ed to be rend in second time to-morrow.

HON, MR. BISHOP- 1 beg leave to tiry upon the table of the House the Henort of the Publle Sehools in Niewtoundlund under Metbodiat Doards for the year ending December 31, 1914.

On mettion of Hon. Mt, Mran the Howne adjourned tilit foum of the clock to-marrow.

## WEDNKSDAT, May 1zth.

The Houke met it 4 p.m. pursuant to adlourament.

LABRADOR FISHERY BMI.
On motlon of Hon. M. P. Gibhe House weat tito Committee of the whole on the Labrator Fiub Prices Eiii. Hon, J. D. Kyan renumitis tho Chatr of the Commiftee.

MINISTER AURICULTURE AND MINES-hotorr ther amentment is put I wiak to exprese my opinione rekardlas canting 昒y vote for or amolnat thie ameadment. Ao far ae I call see the amenifmeat fo wery little fmprovemont on the Bith With reford to thr Bili ecaarally it think that satnething showtd be dore soi that mintiers on the Labrador both frome the itandpotat of the fishermen and the experters nhould be put on euch s basle that justice will be doan to all. At the aamet time 1 ean readily ap sroctate thi stiffeultfes in the wily, and ation I Aum atrald will secur at a futurn date is that if arrangements are not etfected hetween the fintermen bist thin cuporturs wambint tr gaturn to be driven out of the baviness which will Ithlict a great bariatile. Cleneral. ly epeakitrg 1 am in accord with thin Bitt in tir mitt gotar for thio infuacefaest of the country, mat regard it an is step in the rifht direction an be tween the two partles concurned. Whether this Bift will be of value to tithor Is very doubtfel, and I am only epoaking at this tuorment no that I mitght be in a poiltion to juatify my-
 Dut forwarif by Hon Mr. Robtnson, at I think at thi moment onf in av good 24) the other.

HON. MR. GIBAS-1 dentre to proint rut to hot. mombers that the amendment proposed by the tions, sent. Iemus is dinfective In many rospects Thls bill, as hon membern will moe on penteal of it makee proviatos in the ireat of certain thioge not hap penine, what shall be done. Now the nmundment proposed by my then Friend ankon that ths Artnister of Mas Inn ind Fhitertes stall convern a rareting of thin Latrador fish export tre and that ther shall at that meet. ing nominate one member to represent themi. Now the Mialster of Marine ntul Ftaberien eonds out notice. The
fiah exporter eays: "I am not golng to attend this meeting, What becomes of your amendment then? The object of the Bull is to create rinchinery by which its provisions can he cerried oit. If the amendment goes fur ther and ways that in the event of the fish exporters refusing to attend the meeting they wili be liable to a sentence in the Penitentiary of not leas than thirty dass. It would be alehght. But it is uneleas for us to dracusa the amendment, is the event of the Presudent of the Board of Trade not appolnting or fixing a price, then by application to the Supreme Court it may te done. We ahould have to go to work and amend this Bill right through in order to make that amindment ef fective, Then again the bulk of the Labrador tish exporters are not living in the dity and are not golng to come hore merely at the bldding of the Minister of Marine and Fisheries at a senson of the year when it is possibly of mord beneflt to them to rematn at home at their businesa, Now these are Home of the objections to thill am ondment, with all due deference to the mover of the stame. The nettve members of the Board of Trade are thnee whe are interested largely in the trade and business of the country and the members of that boand are going to see that nome person will be nominated, who will be competent to deal with this matter and whio witt took after the intereats of the people be is supposed to represent there. Why shoutd not a similiar right be given the fishermen? What obsection ean there be for the Prestdent of the F. P. U. to represent them. Suggestion has been made bere that outport members be हfven the right to nominate They are also a political body. it is not fair to throw upon the shoulders of them the duty of nominating a member of the Bourd becauso they do not
represent the fishermen only, but all infereata, 1 think that in view of the fact there is so much aggravation as to the current price on the Labrador that something ought to be done and this Bill alms to bring about a netUement. If it fails, then we can remedy It later.

HON. MR. MOGRATH-Before the amendment ts put I would like to kny a word. Apparantly we have reached what, without exaggeration, may be called 8 deadioek with regard to this BuL 1 evgrested yesterday the fiea of liaving the outharbor members setect one member of the Board and the firh exporters the other. The hom. gentheman who moved the amendment is agreeable that the amendment should be wifhdrawn in favour of one whimh will embody the princlple of having the fish exporters and outport members make tho selection. But it would now seom that perhaps the simpler method would be to place the duty of appointing three mernBers of the board upon the Judges of the Supreme Court It may and poss. Ghly will come to that in any case. We can eaally understand that the Trautdent of the Board of Trade or the nish exporters may be unable to make a selection. We must take it on the other hand that the members of the House of Assembly can secure in member but it wfll come to the Judges of the Supreme Court to appolat one of posaflly two, so Ithink to remove this whole problem from the arens of politics it would be better for us to leave it to the three fudges of the Supreme Court to name three members of thli bosrd, a solection that would be, I think, in the bent finterest of all partles concerned, I think we ought to sflim the principle that this is to be an arbitration tribunal, and we onght to get proper men who will be fmparthal. i fion't think we are golag to ket fm-
purtially from the representatives of the exportens or finhermes mader the Biti wi ht prevent. If wo leave ft to the Indyen ve protably will be nMle to ket men wito will command the confldence of the country.

HON. MR. OIBES-The sergention of the honourabte member if eertainly a unigue obe becaune it goes lieysad the prinelple be sdrocaten, namely. artiftratton in the evait of their fafling to uppoint artittratorn. He propones that the Judgen of the Supreme Court should be asked to act. But in the flrit Diace to ant the fudgees is a procending for which I don't think we oan find any procedent. It is aaly in the suent of parties not belng able to mila an appotintment that the Juiges are ever anked to do sa.

HON. MR. MEGRATH-I would potut out that it wan only yes teriay in the Lower Chamber that the Premier ahatidosed that priact ple in connection with the Fertilizer Bill now before the House, is or fler to subutitute $n$ proviston whereby the Sapreme Court would appoint an urbitrator with the neccenary expert knowledge to act an an umpire between the nominee of a wealthy corporatton, and the man choaen by aome poor settler who could not afford to secare ant appointice with the expen fence to warrant hle boldtog the bab ance eveniy between the twi:

HON. MR. GIBES-The reason fat that le auch as will commind trielt becanse it wrould be unfair to aak a man having property in flay of is lands to appolnt an artitrutor with the necessary expert knomtetser to act in ecolunction with the arbitrator appointed by a rieh eorporation. Ab arbitrator eattect upors to tant =ith quenttons which muist neenseartly artre in the expropiriation of tand and property mast posseas abillty and fits hemar for the work, mint untess, the one appointed by the owaer of the
property be sufteienty expert he shoee tund is taken will auffer masterial leas Hut In mutters arlatios usfer this inill buxifrels of people sos tero thin, revolaito knowlefige to set tif momibeth of the boserd for the thavon that aft, wo matter that our station in aft may be bave on intimite hameliedge of flahery matints.

HON MA: MCQRATH-To my hon. friend If merely reply that if ouly ? enterany it was admitted that the thupreme flourt whe a more proper autherity to appoint a third arbitratar unded the Fortmear But thin any pther authority, the Supreme Court would be equaliy and more likely to choose a sultuble man as amplre in Thls mattor, becaune thle Hill is colng fo have its oura complicatlons too. artolnt out of the varying prices pald For Thith in the Turopean murkats, not zlone in different yeare but at differont tumes in the mame year, the resolt of markets bining ctapty or glutted ow:tiie to the number of reisele arrising at the princlpal ports together. We have heard enough the paet day or two in regard to this to indieste that thereln will he a probtem that wif eall for arbitrators of exceptional judement.

HON, MA. Bishop-There in no doubt that the sugzention tirown out by Hon. Mr, MeGrath srtaen from the feeling that we appear to lim at a htare which rearmbles a deadtock In relatton to the pllt and that that tulsht be recarded an a trasonable way out of the ditmealty. Nome of us conld bects fo guertas the rettatitity of any melevtiona maden by the fudges of the Suprome Court, but it secran fo me that we may be placlas apos the Supreme Court dutfes which ther sre toot at all fin accosd blth theit well known dutles, ande wei may be dras king the Axpreme Court tnte at cantrornmal miattor. Which in not ex cusable, it thes oecurred to me that

1 might suggest another course, as it is apparent we shall be here a very tong tlme before we can arrive at unanimity and 1 would suggest that to begin with. We shonld, for a year, at any rate, empower the Minister of Marine and Fisherles to select two men, one representing the interest of the scllers an far as possible and the other of the buyers and that these two be empowered to select the um: pire.or that the Afinlster himself would act In that capacity. It seems to me that that might be worth conelderligg, if not preferable.

HON. MR. BLANDFORD- Par don mo for giving my opinion the Becond time with reference to sec tion two. As I sald before 1 belleve there is a gricrance on the Labrador with regard to shippers of fish, and 1 think it is agreed by every member of thif Chamber that there is a principle at stale somewhere and the principle of this bill, in a measure has touched the kernel ao to speak of getting over the difiluilty with regard to the 'current price, But how are you going to sdjust matters between the two partles?

If am in accord with the principle of the Bill and verily believe that the fighermen on the one hand should be protected, and the merchant on the other hand, hut I have to admit that we have a large sectional body - the flshermen of Newfoundland, being represented by the F.P.U, and I can't see any person who would be better able to look arter thetr interests than the President of the F.P.U. I have no briof for stating thits, but 1 am speaking an far as the fishermen are concerned, and whatever might transpire, 1 belleve that he is the proper person to tooic after their fnterests. On general principles, I belfeve the bill fnoperative, but I think we nhould glve it a trinl, and then we shall find that at the next session there will
be grievances for rectification. I think the Bill will work out its own salvation and that is the only way so test it. If we start in and make famendments to section 2 then from dime to time amendments to other sections and send these down to the fower Honse. I don't know what will befall the bill and we shall probably be here till August or September.

HON. PRESIDENT-I did not intand to speak on this Bill for the rea. son that 1 am not familiar with the Labrador fishery, but I may say that I am in favor of the principle of the Bill. What 1 mean by that is that it has often occurred to me that the method of arriving at the current price of Labrajor fish appeared to be unfair. The producer of the fish on the Labrador appears to me to have no volce in assessing the current value of Lebrador fish. Of course the obvlons answer the merchants will give to this position is that whilst fishermen have had no volco in the naming of the vrice,yet somehow they appear to have got more than the fish was worth. If the fishery were a profitable one we would not see it abandoned by merchants in Conception Bay. I heard also to-day that 200 fishermen from this bay are looking for supplies nad cannot get them. Well, if the price given for Labrador fish by the merchants were below the value sureIy this condition of things would not axist, hecause their prafits would nacurally be large. The question is a rather complex one, but an effort should be made to convince the fishermen that they are not unfairly dealt wth. I prefer to vote for the bill at present hefore us, objectionable though it may be, rather than run the risk of having no bill passed this scssion. Thore are certain objections to the Frestdent of the F.P.U. acting as arbitrator, as pointed out by Hon. Mr. Robinson, but 1 think it would be

Betier to hurve the Prendelank one of thas arbitrators, ap lie eppoaxe to lave the eonfidvave of thet fiadieritas at the probetai thren, and sa Hon. Mr. Blasidfort rayk if this dill vert patared ant coctul unworlmble, then we evith iturud It. It is for the sarpone of removize from the minds of the Thatermen the Imivemelcal phat I stisidi entertaith, if I Nern a fikherman, if the pricer of a scrmmentity thut i hud for sath wan to the maile by a purchaser, As in rule the purchaser doces not kive a higher prioe than in nocemary when buying The rule of trade is to liny th flas Jowest market and acll is the sighentIn reaitiag over the bui I wan trpisg to see how it woald work out in pens tione anal I faited to follow the thing fostenlly and the soualtie courne thinct. will take tarlne the ramlige season, trat I shoud sut the one hit stiryrised if the very astan thins that in coing an to-lay wili be moing of even if we fene this bit. Hat eny prineipal rea san for rhing. Mr. Chairmin, is to niny that I ism lo farvit of a Mitl-It may not be thls hill-tt mas be Hoti. Mr. Rablunpo's or Kon. 3ir Befirnti's smentments which ever it hes, 1 am is favour af a bill to ragulate the eurrunt filee of Labrador nish. I cautiot help saytur that I rathne think there luas bekn an good deat of mitmmanagethent with meanf to the fishory, and this managrment very tikely led to present couditiona with rekani to the Labin: Ior Elaliert. Laat Year I wail tula that. there wore 10 carmpet of fiah it aibfaitar on utse dis. Thls whiself bot be it muy be mald it wan tuavold: able I say it wam inot. It twist have fand a mant, fismstruan effect upos the wice of fish. There are many wayo of uvoltitis that. Oue of ive occur to ise. Ticnt ziny lie lapracticable, but I flon't thak so. The margoun inhould loe in the luatis of A, cotumittre, who nhould dole them out as the markents rined them it mey hos that it wonld rituope the chancet of indivilual ship-
feers mahteg is his pernfic tuat it would silwa have the eftoct of preweyting bik lavas. it soulil stahilitate the lnider ury and thr prine, and encourage the fmurchants to rupply for the Kiahery. It Foftin oncurred to me that it woold have hovil if gond thing for this ecounpry if Canads owned the 1abralor cक्षा ho yours mpa, I sald $I$ ज्ञात not fares much experieace with thite fishery. I had nome experience of It three or four yeturs aco and I don't wish to have It agoin Anyway, Mr. Chairman, I am in Savor of a bill having for ite object. the intnution conveyed by the mection fuer rad, and preterrine it to no bili at all. I thtund to wote tor the otie fuefore us.

HON. MR. KNOWLINE, Theri It no dinght but a mill of thite mort will be serfel, hot if vill be citricult to so shaps it as to malie it cortable It is [-wil known to all cemnected with the trale that every fall theire is ereat Uimiruliy to ancertaln what in the cus rnat phice, You lasve men coming in Tha want to know the current pricn. Tou telephone to one merchant. He does taot know, Yeu telephernem anpther, he ghes you in prices still anpther, and he gives you another fiewire, and you set no definite informathan Jrom otse end of Water Bt. to the other, and, by and bye, you find remetjore comini in; one with 80 much had frolisht, anuther with $\geq 0$ much and 10 cetits boaks, and anothar with 15 to 20 cents bonus. This th mont anmatisfactory 1 -naz of x number of luas whier the borns and curreat price were in dispute, and some never _out what thoy cxpected they would isct and it way not worth their whlle to to to law, as it would be a mont Aimeult taek to decide. in the explanations given ue by the hon. genflemuts in charge of the Bill, he says thern is onty to be one sititig of the finard. Thifi nurnly ls a mlatake. The lioard nhould eIt whenever reguirod. and whould be a board of roference
both for the fisherman and merchant -It-may fix one price right throush the seasion. That is not falr. Thicre is a certain time of the season when the fish is worth more than later on. The fish caught and shlpped from the latter part of Ausuat to the midale of September gets to market flrat it goes to a bare market, and reaching there, everybody in on the lookout for tinylag ald is prepared to pes much himher prices than latar on Sealag thls if the case, one price ehould t.0 pald for early fish and another for the fish to be shfoped from the 20th to the laat of September, and another price for the October shlpment, while after that the greater butk of tho fish left over wonld be brought back to the outports and roanh st John's or be shipped from the outporta. it is scarcely futr that flsh bought on La: brador. where it would be stippect earlter and marketed eartier should not get a ligher price than Inte caught Hoh, whet is marketed lnter. The probsbility fs that a number of vessels reach the merhet about the same time and pricee come down rapidly, bo that If you hind onty one uniform price through the season it would not be fair. I make these supgestions, though I to not put, them forward as as amendment, but solely that the House may consider them The BIII, no doubt, has some weak polnts, but we must have a BIII $\alpha$ a some sort, so that the fishermen might lenow what they are going to get. There should bo no Question of coming to some falr and sintisfactory eotution of this matter. At present it is aifficult to know how to aet. I have often oceaston to try and find the price of Labrador tish, but camot get sattsfactorn, und after neking half a dozen firms, am as far off as ever.

HON. MR. WINTER.-I thlak it te quite impossible to earry out the provisions of the nection now betng considered It anya here that you must
fix a falr and reasonable price for fish shipped off Labrador and must decide that price by the 1st of October. This is utterly impossible. You can fix a price certainly, but not a fair and reafonable one before you know what you sire going to get for the fish, or can have any tos. The bulk of the cargoed of flish will not leave until after the first of October, and you cannot nell your fish cven when it leaves Laprador, and must walt for cargoes to trrive before the price is mentioned. Juatigig from past experience we will not know what we get for fish until the and of October. We milght get a Yensel off about the 20th of September fad that veasel may take three or four weeks to get across. Then a price will be named for one cargo which will be . very high price, probably. But the other vessels arriving later place a cifferent aspect on the situation. The How President referred to so many vessels leaving Labrador and arriving at Gibraltar at the one time, thus facreaning the difficulty of realising the firh. It will be difficult to avold thes. When the eargoes arrive is large numbers a general slump in prices occurs, and it is only atter we know what the first cargo realizes that wer can form an ldea as to what will be the current price. How can anyone put a price on tish the 1st October when be does not know what it will biring in the markets? It is alisurd. You do not know when a vessel leaves Latirador whether you will get 25 or tio shiflings. You may have an Iflea of getting a sood price, but may not get as shillings when the vessel arrives over there. It all depends upon conditions, and it is impossible for any company or anyone to put a price on Labrador fish, until you have aome fides of what the great bulk of the fish ean reatlire. In past years after we knew what the first carzoes would pell for, we could then form an idea as to what the balance of the voyage
sontd raslize, and then average the price up: this Is the ouly why in which you can arrive ut a reasonable price. If one price must be fixed we must heyes a fair fifea as to what all the fish will sell for. If you fix the price on the firat silipments or on the basis of what they bell for, it will be too bligh; and if on the late cargoes, it will be too low, You muat averago the prices up. In place of determining on the price on the 18t Qctober it would be fur more reasonable to take the 1st November; then you can get an Iten of what will he a falr and reasonable price for the whole voyage on October 18t.

HON. MR. GIBEs.-We are golng to arbltrarliy fix a price which a man has to nay in the absence of any contract to tho contrary, if that price is going to bring ahout loss to Bil, then I think this is the best posstble bill the Labrador exporters could have. Now, what would tiny three men sitting at in board of arbitration doz They would first ask what is the catch of fish on the Labinulor; what are the conditlons of the market to which the fish is to be exported; what the price which should be obtained, and what price can the fish exporter pay to the fibherman and at the sime time give him a legltimate and fair profit on the invortment? Can anything be fairer than that? No board will ask a man to pay a price which will be a loss to him. It is not common sense to assume that any three men will do anything of that kind. Except when conditions auch as have existed the past cight or rife months arise, the finh eaporter will always get a fair proft. We want to mee him do so, and if ho does not it is his rault. He lus been etther praying too much for finh or has been too anxtora to fett the fish over to market to get nheged of his neighbour. The Hon. Presslent of the Councll made, 1 think, in very good sugeeation as regards a
combination of the merchants to markiat their catch of fish. If there was some sort of exporters' combine so that tens of thousands of quintals of fish would no: be seat to the market at the fame mands of quintals of fsih would not be sent to the market at the same time, bat only in such quantities as the market can take, it would be much better. The debste upon this blli, ar I hive pointed out, shows that chaos oxigts on the Labrador in connection with this mintter, and I think the Bitl will only croate order where chaos now exists.

HON. MR. HARVEV-I want to point out to my hon, friend (Fion.-3fr Job) as to fixing the price, and as to the situation being the same on thls Bosen as when the price was fixed by in combination of merchants. It the price was fixed by a combination of merchants, at least I knew the conatitution of the combination and 1 myself would have a vofce in it, but to alfow another combination of this sort to inveat my money for me is a differ tht thing. To draw a parallel betweer thin Board and a combine of ahippers if unreasotable. I do not agree that郖 long as I had anything to do with the Labrudor fishery the price was fixed by a combine. What practically happened was that active competitton among buyers on the Labrador, nnd there were a good many spot cash buyers, fixed the eventual dealing, or current pricos. It was practically fixed at the highest price that thes: cash buyers pald. Several of these buyers wern foreigners, or buying for forelgnere* account-like Captain Jersen-who had nothing to do and no communication with Newfoundland ehippera of any kind. They competed with Newfoundland shippers, and Newfoundland ahippera competed among themselves actively and the current price was not fixed by any
cotuline I protest against the wuggestion that any member of this House shoald allow his judgment to be warjel thy any fear that his attitude may be misundefitoed and misrepresented outside this House, quito as emphatically as the hon. genteman (Mr. Bishop) bas protentend aguinat the House perwituing itself to be luftuencen by any outside threate regarding a eampatign to abolieh it. The position of members of the House may sometimes be untortunate and thable to unfust tnuento and attack, but members must act and do aet without regard to such criticlum, and simply aecorting to tho best of thetr fudsment. Uufair outside criticirm has to be faced and should not isfluence thls House Criticism generaliy has to be reckoned with, and so tong an it in fair is to be welcomed.

HON. MR. TEMPLEMAN-The thoukht bus ocearred to me that it might bo wise to make ata amendment 4tatingulahiog as between Straits fish and fint taken on the tatirnitor. Stralts flah, which is earlier fish. is the beat, and eariy eargoen feteh better pricer than the later ones, It made some remarkis yesterdny that i considered the bill a useless one; perthap the beat thing to do is to pase it, but as a whole I do not think it will de any mood any wiy. fr mil opinfout this dis? cuanion is "much melo ahout nothiug," hat I tho think that 4 we prase it an it ie we elhould mate two prlces; one for tho stralts and-one for labrntor flish. Hin. Mr, Gibbs apoke about the inv dautise of the lunienene, but would he expect any one man to to biafness oft the Labrador and be nubject to tliree mes to fix a pice who have never ongayed in the fichery and probabiy do not know the Attrirence betweiti is hedifock end a codrish 9 That, to my mind. ie Just as unjuat, for 1 do not Witak any huyer will go to the labrafor tutt buy ftath in Auguit subjuct to

Three mex who will sectle what then price of tish is to be is Septemiter. jetober of Nowemher. If it is so im. fortast or necuasary to foring is a Bill to fix the pirtict of Latrictor fint. why 1.t bring in a bill to fix the price of theh cold to St, Jolin'e? It in just an Feasonable. We very oftem bear a tot pif talk about no prtoe boing offered tor Latirador fish on the coast. In my
 prico, and last Septemher 17th 1 teleEraphel my negent on the Labrador to pay 83 for for fish and to put the price on receinte, All my dealere who pald cailh for finh have been nettled, and Ne have not had any dispite whiatever t5 to naything over the price offerad, vir: 83.60 , which price they wern wware of whea thiey stripped it.

The marketing of Labrador fish Prome the comet has not been very proHeblie durine the fust few years, and 1 cas masure you that the busmess of fils monant in lose to all merchanti That thippeet Laturnfor flahi in bulk from the Labrador const. Some of thene carroues had not been diuposed of uf till the time that the new nem soure reht reazht in 1911 whis tu the martent. Thes are fhets which can be proven.

Laint year cargoen werc uhilppent is Her than other years on account of the fate entelr itnid coutit not bel iuld before arrival at Gitimitar, and even fhen they arnived there they could tiot find a buyer, cunsepuente? a ktwat many carcoes were heil at Gibfaitar as lone as twruty deys and Frare costios four pound aterling a thy for demurnate I hill two carkue there mysett and aifter spending a troat deal of money in cables was finally atvised to send the ressels on to martert on conslikament as other boopin were datug so. After all this delay and cont of cable there was atill no sale maide and the vesseln were ordered on, and we hive not yet re-
fetred thin accorint sales of these can goos.

HON. MR, HARVEY-I would sugreat is the bun. gentleman in charen of the biti, betore the section under comaiduration goes through, that we sulistlitute for the Jufges of the Su. prome Court, the Minister of Marine and Fisheries I look with a great I6al of concern on' the drafelnif iti of the Suprame Court Into commenclal ansterie of this kfrid, whiels are cempletely inutitide of thetr proper func: Lawir is this Coluay. It has bewn Hatod that Jaflsee of the Supreme Court are to att an arhtrutern ifi confiection wibl the expropriztion of maite in the whilsers bill. if it is eoprect. I ars afrald it is a bad preceetent and is be reavon for putting that forNand as a precedent to a case of thit nort. I do not thini that they abuald se matdied with wurlc of eurl a kina ar nil. They are the higheat ambodf. munt of Juatice and require the ereist. int amount of respert of any instity. Hens in a civilized cocestry, and to nadr Ite them with this. I conalder, fa dere citory to the Corgt and the Celory. f mim not moing ts move this an an ansendmear at this ftme perkaps other manibers ivill exprese thetr vfesrk, but It is fue to the dignity of the Court Ihat thoy should not be saidlled with futhes of thilis sort. I am going to take another istop and propese a motion Whith Io much more ifratic, I have
axpressed from the beginning my afremment with the general proposition that the preseat syitem in fin trom pertect, 1 hau - thit it heeds raviston and tmprovement, and 1 wish th sonsp was that 1 could see how it can the revised and improred, and 1 will give my hearty support to anything that appeals to me as an improvement; but I cannot, honestly, in my position of responimitity and trate, vote for a Bill which in ray opinion is going to do a great deal more harm than the wretched system we now hive. Hon Mr. Job, the value of whose opinlon on this mattor is at least second to that of nobody else in this House, has pointed out the areat reduction in the export of tieli off the Labrador. That is a thing which we all want to soe changed, and it is essential to see a clange if the Colony is to retain its independence. But 1 cannot belleve this Bill will have any other effect than that of further reducling the outfitting and exportations from Labrador. Personally, notwithstanding what has been sald by others who know as much about it as I do, I cannot see how any reasonable man who is not forced to do an, owing to lis being already involved on tabrator, can go down to Labrador and frivest money in tish. is to the value of which, and what he is payiug for it, he has absolutely no control, and as to which the parties who have to fix the value may not thow as much about the gencrat tusiness as he does. 1 think the effect must be to curtall energies in that direction, and to discourage business people frotu colnk down there. I can: not concelve of a good business man utanding up for such a principle as this, It will reduce the output, the outfit and the mipments. And admitting ar I do the evils of the present atnte of things, and very much averse as I arn to taking this position in regard to the Bill, I do not feel that 1 can, honestly, belleving as I do, and

With mas judgment as it is, I do not feel 1 chin vote for it. it will do more fuarm than good, and it is with the fitmost regret I now mave thin the Committen rlse.

HON. MR. GOODRIDGE.-I have very much pleasure in supporting the motfun of Hon. Mr. Harvey. From the first I have been opposed to the principle of this Bill, but did not move the refection of the second: eading out of deference to the views of the Lower House, but from what I could sather, although it pasaed in that Chamber unanimously, it lis generally bolioved that the Bill will be unworknbie. I am unatite to understand how mombers of this Chamber can uphold the Bill, for if we pass it, it will be with tho expreas knowledge that it Is unworkable. I thiak it will reflect upon un an an legistative body.

HON. MR. HARVEY-1 would like to add to what I have already sald, that objectionable as $t$ think the Bill to be 1 would infinitely prefer to sed the Goveriment Iteelf take hold of tho fiathery and export the fish and gire them everything for it, to letting tho BuII go through, because this would trulate the exportation. I thinit the Bill as it stands must tend to kill the Labrafor fishery.

HON. MR, GIBBS-The arguments which have been adranced here that this Committee rise, which means that thle Bill be thrown out by the House; I submit are not sufficfently grave to warrant any such action by the House it is admitted by the hon. members who have just spoken that the present condftion of affains on Labrador are, to use thefr own words, wretched, and that they cannot concelve of say business man standing up for the Bill. I would like to nik where the consistency of hon members comes in? They admit that such coniftions exist, and further say that tha industry is being carried on at a loss.

Why then the oppontlon to thils Bill? If the indrufry is thay a lons, wheme it the theoesaity for the ofpoition to Aris mansuret Surely no dink will emfane in an indiatry which is currted oin at a loss Anid then theie is thin utabtion of coumin over prices. Why should not the mon whar aell es woll we the men who buy Thive al hily if the tmattert Arowis so taie to Efve the man who catchen the fuh to any in what that price shall bey, th the absence of a price being fixed at the true it sile is made? Should he not liave as much fight to be heard in the absence of a price being fixed, an to what he will soll the prosuce of libe soll and swent for, as well as the min who giveg him his outfte or goes there to buy fish? It is not otilgatory on exporteris of coiflish to go and Invest their money in it. It iff if Yoluntary act upon thefr varh and if they ean buy fiah at prices which will give thom a restonatle and fair profit upon their inventment; this is their awn business. Why should other people hufter" None can compel then to inveat money in an industry which would not kive them a proflt. But here is the act that causeas ruin wift regurd to the industry. It It not about time to do somothing to bring order out of the ehaog extstlige there? Thle Bill does not prevent a man from golng to tabrador and sughing to a Plihherman: "I will give you 3,50 ," and the other saytug "yea I ngree." This Bill does not affect a case of thia kind; It only affects the question whore the price is not fixed It two pernoni gat together and sgree upon the sate of an article on whtch no price if fised at the time, but the pitce is to be determined by condrtlons not apparent or existing at the time, but depending upon conditions remote whan thits sale takes place; the man whe sells has a fight to be
hisurd bufore the man who buya flsfis the prieg for the axttole, What better poaition to assume then that If I nell an artieli atha no prime is fixed at the thme, woilld it be falr for flite persian to whinm I sell to jay: "I fom efvinis you so cuich and yos must to satiatied" " This is si most untais
 Ging man to net up in consuotion iwith furli a mintter. Tharn ard two par. tien to mivery barguitn, zuia both fhould be heard. Why fliculd a merchant have the right to sisy to a fishermin In November: 'I am golis to give so rauch for that fiati fhat I boaght in the month of September." is not this Yery unfate? The Board atepa in and Eiver the right to both parties of being heard and then deefdes what in a fair ami masomathe prices. We tuay defeat thls meabure; If we do it will be history repeating lteelf but Juat so aure as it will record defeat it will record vietory. The world over lagislation emanating from the thasses has had to meet the opposhflon of the powerful buifness linterests that are ever apprehensive of the capItal invested in them; clash upon clanh has resounded of industrial war fare because he who has will not. give lim whn lias not that which he is ontilled tio. Oppostion to this measure Is only adding fuel to the tire of atrife already oxiutting in this country. 1 ask this House to rise superior to disy business or commercial intervete and look at the question from the viewpeint that he who sella ftrould bo heard tir the flising of a price as well as he who buys. Thle 2n tha position I take and have al shays followed in matters of thla Lind the brond standpoint of what is best for all concerned. Every attempt by the people in the lower walles of life to rise a little higher and have their idens made a little
easler of attaitiment is alwaye op posed. What does the history of the prosent Ouvernaient of Brfi uha teneh un The introngly entrenched burfmese and ranked fatereita oppreed legisfation emanating from the poople's representativeit but quickly ant effectively demooracy curtailed their powers. If we continue in the coursib we have pursued with in rerard to thlis BIII the $\begin{gathered}\text { ame will hap- }\end{gathered}$ pen here.

HON, MR, BISHOP-It seems to me that the hon gentleman in charge of this bill finds himself in a postition he has unquefationably found himatelf In often before; he haia a bad case and must do the toent he can. The bon. gentleman is barily logicni in all his arguments. He says be objecte to the principle thint men have to sett and the price is fixed monthis afterwards, out he avers and atrongly that this principle shall be applied to the buyer. That is Rivan as a reason why We ure conslderitis the bill at all today, that the merchant doen not have to fix the price unill later to the season. We have agreed to the prisefple of the bill recognizing that there are dirficultes in eotmection with the Lahrador fintrary and the shlpping of fish from that coast. We consented to the second reading of the BIII with the idea of proposing momething better than this form in which the bill comes to in but all are sgraed that tha bili cannot be amendea in any way that is Litroly to prove beneficinl elther to the fiahtrraian or to the buger. The Hon. gentlemen seld that the seller shoutd have representation and that it was unfair that he should luve no word In the sustlemment of the price of firht. Now Mr. Chatrman it minet not be sald that we here arguing agalnst this bill are lonking only to the interesits of the buyer. I protent agninast any
fiuch remarla that have beep mande hem, and thitik there are thoan here who art inclined to do more to lrelp the fiahermen than the introducer or angone tlue whe has fathered this BHI, I say further, Sir, that the real kuowledga of the circumstances is to be found in this Chamber and uof elsesWhere, and if any who have consitfornd the measure fiera are intar ested (I myself nm rot. I So not inip fiph from the Lubrakior), If they are Internsted they are just as keen for the benefit of the Hishermen as for their owa poekets. Their efforts are to help the fishermen and thome who rapply the practionl part of the fiehery, 1 zould infinitely prefer fo see a aill to the effect elther that there ehould be no espont at codfish fruen the Lelbralor, ar, If Lhere lie, that none shall be shlpped without the price beins fixell between the bryer and the reller. No pate semies the right of the sefler to bave a say if that is practicable, and he los lis right if we asy that no fish shiall be whipped without the price fieing fixed, und 1 um sure that nine out of ten of the shippars of fish from Labrador would rather that they Telionald not be pormitted to export unfill the price fie agreod on, than that they bhould be bound by the condiflans of tho bill we are how conalder-梠, Surely, Mr. Chalrman, the hon. fontlemats in clarge of the bill spoke carulanty when he reforred to an akhtation Hguirist this Chamber, and the possitile remulte it we ahould segt differcutly than aome people whah. Is bay hon gentlemnn grafis to be infifenoen by a threat. no matter where If comita fromt If we art fo scmalder fur poeltlons here, and value thase ponttionis highty, and constider it an pumos to be hers, we are golng to do our beest in the intereatis of the whole people in all tegistation that comea before un, and I bubmit that any effort to influence ush or thrent to wipe this

MON. Mr. HARVEY-1 Ilstmed with much eympathy to my hon. frient ntr mo richt (Fion. Mir. Aishop). in fefeftidee is ais protest sgminat this House beise thrlaesced by siny threats of Itw andoine, smit I muit protest nim farity spoinint the position usaumed, as I suideratand it by my hom. friend op poulte, who has fast mpokes. I under ritood him to say that cote masot why we should not reject this bill is because poople warle aty outalde we wore pbjocting to it, becmune it was A"MAnt ors own interests.

HON MR TEMPLEMATL-MT: Chairmin, while itstening with much internat to the remarks of the Hon. Mr. Gibhe I cmald tact belp monderias why we waste to turh raluable titme of the furstion of the Current Price of labradue tisk. why not hrine in fi mearure comapelling the merchanta [if name at poict no miatter what the circitmatances of consergances are. such a atep wagla be ais reamonable fer that cellel for itr the Rill betare buy nbw, or why not let the fishermen watr the prion ther mant foe the an ficis. Ibe mamu na angbody elee does that has unyshine in soll, and then it is up in then buyer to refuse thelt offer or acoupt it. Doe zosld travine frum What we wet and bear that the mer Chaute talas buzincen at Iahrador fare been very imfatr to thefr deal ligen wifli their degfirs or custamere, bat is my experiegice 1 do wot acreen with It, for in my opinion there in a fruin that ot unfalranern practiand by thin Hibliermen it I abrador aminat the iupplier, who when the voyakn in over
finds that the denter did not have as much finh shipped to the supplier as he was given to understand tun deat er had secured. So you untr seo whare the unfatrnese cotnes in, and on wheh side it is

Regarding current price, it is very hard to define what the words mean. "Current Price" In fact, to my mind there in no such thing as Current Price to govera the price of this article, and there should not be any mention of such a thing, and in my short experlence the price is generally known ot named at the time of shtpment, and the words "Current Price" is brought about by the fishermen themselves by askang the buyers' agents to put it on their recelpts, and in most cases the agents giving recelpts for Labrador fish when takIng it from the fishermen, although biiving beon imstructed and advised by their employer not to do so, but the flshermen demand it thlnking it will be to their advantage when they come to settle up their shipments of fieh, more especially if they think there is any chance of the market advancting.

Now, Mr. Chatrman, I would Hke to be able to devise same scheme or plan whereby the price for fish ship. ped of the Coast of Labrador could be fixed so that all partles would be satisfied and have any misunderatandin ips between merehants and fishermen rumoved. I fall to see any way unless it is to name in price at the time the purchase or offer is made which may or may not be accepted, is is the case with everything bought or sold all the world over.

I consider the Labrador merchants thways padd as good a price at Labrator as compared with prices pald at St. John's at the same date. Most of the Labrador flsh bought at St. John's liast year was purchased at $\$ 3.50$ per qt1., whille the merchants at Labrador shipping off the coast pald $\$ 3,60$ per
qt1. This compared with the extra high Insurance and the cost of collecting, ote., briage the coat of the product very much tirgtier than the cost at SL. Jolin's, where there was no expense to the buyer until he took it at his whart. which goes to show that the fishermen did better at Labrador with hia fiah than at SL. Jolan's at the same date.

The Labrador fishery is a very inconvenleat and expensive business tu conduct besides beling very precarious, much more so than the Shore fishory, therefore 1 think if we are golng to foster the Labrador business and fishery we ought to be careful how we legislate regarding aame

Regarding the price for Labrador fish and an to fixing a price on it we must remember that the Law of SupDly and Demand governs the price of the article as well nas all other food stuifs. It is impossible to thitik of fixing it otherwise than by the supply and demand of this article and I cannot see that this Bill will help in any way to fix the price, wid it placed on the Statute Book will not be workable, and will not bring forth any fruit, and it is not much aifference whether it is passed or not. is it is useless

I would auggest that a Bill be brousht in compeling both buyer and seller to make or settle a price at the time of buylag whilch would avold all disputes and misunderstandings.

1 consider that the poople who want fish and are buying fish on the Latrador coast in the future will make it their business to name a price at the time of purchase which the seller may accept or refuse as he wishes.

1 endorse all the Hon, Mr. Harvey has said and I say that I am not opposed to this Bill because I see anything in it in favor of the figher.
men but becanse I see nothing ta it I agrie with a price betag eamed on the Lalirndor as I tare sald. and thit jifice to put oit the recolpta, ant I think that ts the saty way we can fix a price becaupe when you come te think of if the curruat price is pretiy welt tnown ant metwonfinted shon the fish is bought, and there is not muear ebanse afterwards whats thatermen sere othered it. 60 the part year some of them refusoct, and firewatht their fish to 8 It . John'e with po tngurasev, at great riak, a dio tance of five of itx tumdrud bithes and sftersards accepted क17. 50 . That shows they unet thetr own mituite. $t$ understand the batk of the flath sold th si Johnte lait fatt tetched only $\mathbf{t a}$. ze .

I eonsider that the men whe rev fured the price and came to BL. John's dill nof to as well as thone who secepted as. 60 . I see nothing ta this Hitl to heseft the nibermens, but 1 Fontt the ptenndt to mee a Bm to make matten agreeable with the merchant and the fahermen. The merchant and fiahermen in thly ease whotid be at one ise a botue dribed arulnit ltwelt esunot stasi.

HON. Mh. gibas-There ta a firm dotne business ou the labrator who don't setth up with their dealers untill the followink sprine and it le te preveat conditions of this kind is connection with the finheries which the theturnmen conmetr min inponition this this legialation the propesed. With regard to some hat. members' ertttcinm of my atatemesats alomi then threats of puitfine asis end to fith Hoase, 1 merely stated that an was Who is asrieus to see the Institutions which have grown wp with this country and are part of lisi life, whith are the very fommdatinns of Inw and aw: thority, perpetnated anil continued. That is why 1 am anxtoun, and it is

M. hut at to lathe and other cormmoftites her can cut as minch as he feitrux milliens of feet, and 1 deem it wine that this amestment be made. and it farther ereates an equality betrien section 1 and 2 This then peccuarity interteres with section 3 tind 1 sak that the following be fotded riz: -2000 berring or other larrel stares shall equal $1,000 \mathrm{ft}$. B. M.

HON. MB. BISHOP - It you dropbot the word "herring" and say "2. see barrels' you will accomplish the rame thing

HON, MR, BLANDFORD-1 serZuinly agree with your sugeestion and there will be no need of the amendtrent which 1. have proposed, eausepuently 1 shall withdraw ft, via: itrliting out the word "herring" you *III have the mame reault.

The rugrested amendments and the sdifition of the other sections yenturday I explained. The see: yona arn in eatogorical order and

I take it now that it in rimpllaity itself. with the exception that then hoon. gontiemas ahould put some of these amenalmesto in snother portion of the fint then they cese be moved, hut you wIII aotice that these sanendmenta are realty a Bill frum thin Lower Eicaso brought in by Mr. Jenninge and 1 have amended them and inuse other smendmentas and addef a new neettion, hino renumbered tho spetions.

The Bill before un passed in the Lower House, but I do not know why they were not incorpornted in the first Bill. Mr. Jenninga' amend ment is practically a definitens of
 to mean, sasing or otherwine manufactarine at a mill it propoge In amemiment to go farther. If recintis - Euthis of oftierntise manufneturing at a mill" no that any tudividual or persion whe deairen to bulld a vemsel, punt or boat. and who stintt the the ttmber off the reserve shall be permilted to carry the timber to a mill and have it sawa for thint epecifie reaoon. If the Bill which pramed the Lowar Houne went through an it in, a fisherman who desired to build a schooner, puit or beat, would be unabte to biring life timber which he fad cat off the reaerve to a mill to he mawn and convequeatiy would hine to returs to the old syatem of smu'tig thmiter, via, by measi et a pif. saw. This would be more expenslve and would aecessitate a longer pertod for the construction of the veesel, punt or hoat, husce my fohiuih tor making the amendment.

A further amendanent 1 vish to mahe in in meetion 1 of this Bitl, which
 carest in the ponstruction of any boat ar vesael may le pormitted to have much quantity of fumber as may be bonn fife retufret for nuch actual colt atruetion, sawa or manufactured, in a

Fors mill, anil such sawisg or tmone foeturting whall seot be in violation of fer prevsiskett of thas soction:" Whether Hhis athull form a ar- mectime arter TY toctlati in the mitt of becomery a tut-mectlon of it, remalan to be determinet.

At all evente 1 would ank that the Commitee rise and have the amendmenta printad in proper form to give the honarabto geattemen time to critficine and expreas their viewn upon the mections. I beg leave to ask that the Committee rise, ropori progress nat nsked leave to ait agala.

On motion of Hon. M. P. Oibbe the Committee rose, reported progreas and lasked lenve to alt again.

HON. MR. BLANDFORD - Betore The Committee rises I ber to atate, is foply to Hon. Mr. Harvey's ques fioh that under section 2 bhere gre 101 mills working at present; under section 1, 110, not liectred 72 , and uot working 15 .

Whth refereace to the royaltien paid 1 may may that some of these people fave Ieft thelr 'cute' rematring on theMonnks; thie 1 understand has been lirought ahout owing to the war, and they have been unable to dtspose of their timber or mill produrts, thene are tome of the excuses which I have focelved from time to ttme but we have reason to believe that the presfint information is rellable and that Fuch to the case.

QENERAL HOSPITAL BILL. Second reading Hospital Bill.
MON. MR. BISHOP-ThIs Bitl in wine of the moat tmpertant that will pome before the House during the present susslon. The Ganeral Hos pital is proper! called our most lmportant fantitution, the one that coatir $7^{\text {the country the sreatest amount of }}$ moovy, and we may falriy assurn s That one atso of the greatest benen: Here nome ttme ago, from causes which we nend not attempt to enlarge upon, the conduct of the fustifution
was unsatiafactory, and after evidence of considerable triction in its inter nal managemant, the Goverament decided to appolint a Commisalon of Barcuiry. That Commission went Into the Inveaticatton of atl the matters cobcertifor the finstitution very fully. must have devoted a great deal of time to it and after very considerabte lapse of time prepared as report which whe kibmitted a short white ago, and of which all hon. members have re celved a copy. That repart provides moat fnstructive reading, and an the result of the report a Bill has heen propared to provide for a better and foller mamagement of the Hospital. It seems unnecessary to deal at length with the subject matter of the Bill It provities, as every hon. member knows, for the management of the Inatitution to be under a Government Board in future, which shall be appointed by the Governor in Councit. who shiatl take coutrol of the finatttutlon, to whom all the officlals of the Institution shatl be subject, who shall hear any complaints which may ariso, and who will strafghters out any rittlo differences and we may hope that in a short walle the institution will be pot into suell shape that it will be ruin smoothly wind satisfactortty and prove that the Inatitution will become a creait to the country, and of inuch sreater beseffit even than it han proved to be. We admit that there has been a great improvement there, that under the present administration it bas grown, and from belng a place that the majority of the people of the Island sousht to avoid, the dimiculty now la to find sumfelent spaee to necommodate those clamoring at Itik doore for admisston. It affords me much ptanare to move the second reading of the Bllt.

On motion the Bill was then read a seconid the and will be submitted to a Committec of the Whole Houne on to-morrow.

STAMP DUTIES BILL.
Second reading of Stamp Dutleh Bill.

HON MR, BISHOP-Thts BII IE timply an enlargement of the Bit passed in the last sesston of the Legislature. A new departure was made when that Bill passed, and it hat been found to occasion a great deai of trouble, in that under it all Gorernment cheques must be stamped. This is taking money out of oue pock et and putting it into another, mareever, with a great deal of labour and time in the operation. This Bill prowides that no cheque passed by a Gov orument department, postal or money order ahall be stamped, and shall be foeld to be valid and good in law. That fa that instamped chinques issued by the Govermment departments will be perfectly valid. 1 beg to move the feccond reading of the bill,

On motion the Bill was read a sooond time and will be submitted to a Committere of the Whole House to morrow.

Serend reading of Marine bisustera 1iII.

HON. MA. ROBINSON-As we arr only asked at the second reading to commit ourselves to the general prinfiplea of the Bill, and as I tm absofutely conflident that there is no member of this Chamber who will not मpprove of the establishment of a pormanent fund of this kind I will content myself with maving the second readiug of the Bill.

The Blll was then read a second thioe and will be submitted to a Committee of the Whole Houso on tomorrow.

## MUNICIPAL AFFAIRS BILL.

HON. MR. PRESIDENT Informed the House that he had recelved a message from the House of Assembly acquainting the House that they had pasmed the Bill entitled: An rct to amend 5 Geo. V., Cap. 10. Sec. 1, en-
titled an Act Respecting Munleipal Afairs, in which they asked the concurrence of the Aseem Dity.
Ot motion of Hon Mir. Anderson, the fili was read a first time and wain ordered to be read a second thme tomorrow.

On motion the House adjouraed uatil tomorrow at 4 o'clock.

FHIDAY, May 14, 1915.
The House met at 4 p.m., pursuant to adjournment.

## LABRADOR PISHERY BILL.

On motton of Hon. Mr. Gibbs the Houso resolved itself Into Committeo of the Whole on the Labrador Codrish Bill. Hon. J. D. Ryan in the chatr.

HON. MR. HARVEY-I would move that the "Minister of Marine and Fisheries" be sutssituted in the Bill for the "Judges of the Supreme Court."

HON. MR. GlBBS- 1 regret that I ctanot aceept this amendment. A great deal hair been said in the course of discusiston on the Bill ag to the poitical complexion of it by giving the right to the Prealdent of the F.P.U. to appoint a person on the Board. If the argument holds good with regerd to the obfection to the President of the Unton appolnting a person on the Board, surely the argument lacks consistency when it is now proposed to placo a man who must be a pottical partizan of the Government to give tim the power of appointing a third arbitrator if we want, in the ovent of a dlapute aristug bietween two persons, who are named as arbltrators as to who the third arbitrator shall be, surely we should go to a triDunal tree to act in the matter of the chotee of the third arbitrator. Whoever the Minister of Marine and Fish. eries may be he could not be held to the atrietly free from the charge of partizanehts by ote slice or the other. is selecting the third person whom the
may name: and it is simply casting ridfeule upon the bill to have a man empowered to nomionte is third mir bltrator. Whoever beard of such a thing? Search the recorde of courts and you will find uo authority for any such proceeding as the to ank the Minister of Mariae and Fisheriea te appoint a third arbitrator. I have known casen, disputes aristag between two arbitrators, ate to whio shoutd be the third arbitrator. It is always re terred to a Jadicial tribunal of some tidnd, some court or person in a judtcial capacity. Why? Bocause it becomes absolutely necessary to select zomie person agalnst whom no suggesthon of partizanshif ts Imputed etther by one slde or the other, who will hold the acales evenly balanced so ab to act Impartially between the parthes; because it is the third party nomInated who is to defide the matter, and his position is of a fudicial and not of a partizan character. But it may be sald that the second arbitrator tappolnted under the Bill,will endeavor to maintain the position eet up by the reapective parties who are reprosented at the Boart. But comlug to the third person, he stands in a different position befig the Judgo between the partles. His appoistment ahould therufore be left to the diucretion of Pome Judtcial tribunal Thin to the policy parsued, in Figland. It a man'n property be taken for puhlife surposes under Land Clauses ConsolfCatlon Act. two urbitrators are to be appointed, one by the person whose property is taken and the other by the persan who clalmg to exproprlate it. If they disagree as to amount of compenartion and the appolintment of a third arbitrator, then the court or fudge nombunter the third perion. The least we can to with regard to the Bill is to follow a precedent prevalling elsowhere, that is in case the parsona actiog as arbtratori fall to
agree on a third he mhould bo elencted by a juigen of the court.

HON, MR. HARVEY-I aza hut ob feeting to thil appolntmont of a thind arcitratear by the nourt. but the drugrifis in at the ount if they fiat te agree upon an ar bitrator. I have uready explained that 1 think it is mont deropatory io take a rourt of justice to come In and settle the price of fish

MON. MR. McQRATM-I would like to pofat out to the gentleman who moved the ameadment that if it becomes operative it will alses iultify section 2. becaune provialon in made there for the appointing of oun or ponellis two artiltritors, ate oricinal members of the Boaril by the Suprespe Court Yenterday I suiceevted thint thill matter be left entirely to the Judgen, becaise, as I showefts the Sudgen had to act to till up vaoancien that could not he filled up otherwise, and had also to set in case the Board, when consiftuted falled to fix a price, and therefore it Heemed to me that the logieal thing was to elimisuate the Board altoguther und leave the whole matter to the determitnation of our higheat Triburial. Curlonaly enough my hon. friend, Mr Giblis, then took the very oppoulte porfilos to that which he sdrances now and arcued agaluat the matter being ieft to the Juisen, while to dar he contebilil fir the umpire being bamud by them. At the wame fithe I wrould polnt out to him that he Is mistaken in asacting that all third arbitrators are appolnted by the Court because in the Crown Lanile Aet it is provided that the Mininter of Asciculture and Mines, or a persop to ber apmolnted by him, Is fixed by taw an the third arbitrator Permonally. I favour lenving it to the Judges to fix the "eurrent price" tor Labrador fish, becauke. ise thly in a
matter having a direct luterest for thomazitis of Iisibermen there will be. muats Bupn confletiee felt by all parHes if it eots to the judges of the Supreilin Court to deelde than if it is feft to any loard that may be chopona pother wise.

HON. MR. ANDERSON-1 have Hatuned wheti a great deal of pleat ure since this debate on the Latira don fiak prines hus commenced, and I vilimely agree with my hon. friend Mr. Harvey, 1 do not know whether the derlsion of he Supireme Court have been cossulted on such a bill an fhli, luut ft eecmes to me to be unreatomable to place by act of Fa-liament the final decision as to she tmarket value of a commodity on Ibe decisyat of the Supreme Court. The price of a commercfal commodity is based upon the rlise and fall of the market, and I de not know whether the judges are prepared for the reapotisflility after we pass thle nil, sad I question very much it they would not aak the Covernor not to give hill consunt to the Bill.

If we could arrive at some other tribunal to bee the arhitratar it would be inuch better. What of the market value? It has been stated here that tome shlpmentis go orer In Asoust and ofhers $\mathrm{K7}$ in September. October and Novemher, and if the price is fixnd at four dollars, and some carkoes fet E0/- and athers 30/-, others may get leas, but how are you golng to arrive if s happy medinm ens to the value of Huit commollity? As my hon, friends Hon Mr. Harvey and Hun. Mr. Job intated the other day, are you going to produce sour invoices; and what fir to be she profit on the one atife and the prite fo lie pald on the other toullow u profit of say twenty-five per cont on the intestment It eeems to me, Mr. Chairman, while I have not the stishtest desire to object to the bill that it hate either to go through or
be referted Is it a good tult or a had onet We have argumients brocepht firnarit there trimin thmis tif thio thit it to monertatite Why in it sot Vrous the complicallotis that zarat neces sarily arlse when ahlytnents are made on thin Labrodor untll the cloat of the neason. I thinte the amendment aus gested by Hon. Mr. Harvey is a good one. There may be quentionin arining in connection will shipmente from the Labrador that will come betore the Suprome Court to be adjudicated upon, but I do not think It right to embedy in this bill by act of Partiotuent that the Judgen shail be the an bifrators as to the price to bee pald and Ther to support the amendmeat suatcoeted by Hon. Mr. Harvey.

HON. MA. BISHOP - It shems to me another strong renaoz why the Judses of the Susireme Court should not be ninked to fix the price of Labrndor fish nhippent off the roast in that thil bill with net prewent litigation with re mpect to the Lalrudar fimhery in eny event. There are other mattern which may come up, and I presume that the Sripreme Court would not be asked to unt Judielally in such casea. 1 think it a very strong reason why they nhould not be asked to try cases whieh miny come up from othur caunes to be indjudtcated on, and there might be prejudices which would ant appear if liey had had nothing to do with tixthit the price 1 teit 1 ilaitl lave to vite for the amendroant untess anyone Itr Ineltand to mame nomesocy else thinie compeisht it mevmn to me to be rether nhound to zryoue thit the Mrmtiter of Marine and Pinherles represcuts the Government. Where the Gov* ument comes into this question at
 3 Minter of Martso and Fleheries I think there has been ample evidence, an furima the present Minfster is concurnod, that ine if not is partisan. The
fifinimer of Marine and Finherion has I Fier ateppot to looke into partisutivalp turliuz the derious timus hen has haro
 Dexiles of finhurtacip who tont their Irme. ant in mimitior mattern wheres thif welfaro of the fahermea was conpernol. I am not weddited to havine the Mininter of Marine and Finheries excepths that I do not think that any the has a thetter knowledge of the particalars of the Labrador fistery fad fte cuntoms than has the gentlotuin wha nuw occupies the poidtou, and as to hls feelinges for the flahasfain, that has beell demonstrated time and arain.

HON. MR. GIBBS.-Mty hot. friand presupposes that the greacut Minister fiti remaith therk We will have many Mitatern furlog thie thime thita 1 imi is in fores. and tay have some who, as in the part, know nothing about the fishorien. We have had lawyers filing that pealtion, and they may lawyern Lnow mothing about the flisherien. Thinn usain this rery question was dif culoed by the promoters of the bill in to then appointment of the Minister. and there is one gentleman nlatad for fao position (I do not know whether het in critnir to fitt it or not) and aro focding to the arguments of hon. genilomen, it would be most uufortunate for everyone if he occupled it "The Bon. member who epoles Just nuw refermed to the objections to the produe Fton of toroicot. WeIt, in that not domie every dis at the Castoms floune, onat to al bond of this trint it it te t unit bickimary, tromase no Court Fould permit any board to pry tato af max'l buninces, and if parties on that Board were taling sdrnntage to If ma, then the court could by manAlamas rentraln them from showing Involcen In order to give confldonce to the Heherman and exporter, It is teccmary in the givent of tho bourd failins to fix the price of tiah that it
be fixed liy a tritumat, and you caunot fit a better mate than this.

HON. Mt. ANDERSON.-So Tar as tho retertanee to the 'Oustumes botase sovin, there to owiy otte way to arrive at a wtvulard priee of the Labrador
 eatrh was stopee qthe, and lat yerr 91.poe quts. The unly way ta tor put in the whote eatch and embody it in the T-fore, tend thim sएe whtt picuftis the anerchanie arn entulied to. How arn Jou colng ta arrive at what is the proper vafue? it gou luy fil = zaarket कातt vilti to fil is cortitit ithittird hime for a commodty it muat be taved upon the realiratton of that sommodity ahiosit. 1 de not think any proper way
 trib dingree toge he rale of thumb. Bo bot mieuniteptasd me, bexause 1 tupge ofies the Hitt हowd thiniant the flatiermien atil recelve then Michest price that han ever hesm pala. but at fir to complicifet that I tall to see ther it ir to to worthit fint in in ras nuable wing, Het keep the 8uprome Count elear of it

HON. MR. McQRATH-Mrit thin tinth. proilhmin whid hat movend the surutudment ocratilered the bearing of aoction ntwen? lied will eem under the prom Thtrini of that wectan that verf berf mon and onerour dutles wit be plaved apou the Mininter: He will have to te kiveb pewer to appoint counsel
 production of beoks, eommitinent for perjurys, ote.  Colony It matters ont to me who pocuplen that position: he is the proper onas ta de thle work. This House has
 II the fot prefiared to xatport thite arieadmont. I ani sot priperod to ansp pert a proposition that a mat *to
 then ot the Boaril is filtex to moke the price.

HON, MR, $100-$ When this BII Thit came fin I supportad it lesartily, and I am today more tirnty convtheed that thin Bill In toctensary, and we thilt sut tio datog oir tuity if wee io not give our best conaldoration to ev-
ery clume. This to my mind is a veri tuportuat asciliti. Some hoe portletirn exy it will be belon the dimily Ir the Juikes of the Supreme Court 1 doin't thinis a topre imporinht it thition exuld be gtrve ive thmme derlied If wholo veun it liss diten lown waht feat हuntimmits $=111$ net be called op on to sert There in. Sir, enowali public wrirti left for atome to find the position an lionarahte onit and it vill arver rench the fuiteas of the Suprems Court I Admit whit Mre Githe nase is eorrect when he sisye the Mininter of Prarine nut Maherien will not be the beer man, He ruprosents a ronstitu eniry anil the woltare of that conatita enes, will dopend upon the price. I Rutmit that the judres of the smpromur Court if it combe in that, are the prom fer people to declde it

HON MR. WINTER-I thlnk that the Juignis of the Eupreme Court woald bie autte competmint to plames a T tivh if thay have sulticient vvitonse Broukht before them, trut under this Eill it in frupomalile to liare peoplo t foen them who coold rire eridence Dhat will enatile them to arrive at a price, for the ntimplo reasure that they fixed the time tor makline the prien fint ister thint the flrst of Oetober. It fe impourible for the Judgees to do that then The fleh would not have been gold oth halt the lalerator conast and biry das't lnaw whether the eargoes Ere fintry 60 reatise 30 shmmps or 40 Killinan The oals way thery cun arFive at ther peffed witt be ty takfin 0rFivace of the prices rellited tor thel fin strouit Who can eive ovidition as to the srier of fish at that ttime? Te may be atie to make a cuens at If at that time. The prices doa't boc. fiarkat and thiy dou't teave till the Blidde of Oermier and how enn we fix if irice tor fill until Norember,

HON. Mh, GIBES- 1 would the to
point out to the hom member that if the Judgess of the Supreme Court have oo erldence before them of a character to criblte them to ffx a price sure Iy he foesn't fmagine that they have. zot to fix a price They will do nothing of the kind. They will take the ahand that they have not suffictont eq. ittence to emable them to decide it that evidence is not forthoming, and the Judges are called upon to decife the question, they are not golng to tix the price. Thoy are unable to do no. Hon, members must net forget that the man most interested if the man who catches the fish, and if he is prepared to put the result of his toll thto the hasnus of these people then sure: ty those who do not ought to be prepared to tho the same thing. Thin Bill is the nuk.ome of petitions which have come from tlishermen trom all parts of the country perticularly thterestert of thls Bill. 1 am not socus ine hon members that they are actuat. ed by improver mofives, but sfmply pointing out that if the men are prepared to leave the decialon with the judgers of the Supreme Court, thon the shtppars stuant be preparod to do the name

HON MR MEGRATH- Why wot the lon. member In view of the argument put forward, set the date bsck to the firit of December. We ought not be bound down atselutely to the frst of Outster Hind. Mr. Winter's arpament is a strong one. Surely if thes date is too early, and the fixing of the hater dinte te kolng to ashlat the eettting of the price of tish, the firat thirg to do in to alter the date. If we are gotmp to have a Bill, we otght to have one that can be made opurative. Theratore I sogerest that we change the date to the first of November of the first of December: which ever is most likely to be the beat to fix.

Hon. Mr. Harvey's motion that the

Committee rise was put and lost.
HON MR. ROBINSON-Perhaps this amendment may meet the objec tion raired . What reasouable objection is there to makins section 7 consietent with eection 29 "Notice of rald fintton ghint be putilated tit Royal Gaxette and any shipper or any fishermian fhall have the right to be reprosented"

MON, MR. McGRATH- I sugkest that the Committee rise and report progress. gn that the hon. gentloman Who moved the amendment may have the opportunity of diecuasing the mattar with the Law Clerk and have it put into stiape.

On motion of Hon: Mr. Gibles the Committee rose reported progress and asked leave to sit agaln.

## SAWMILLS BILL

On motion the Hovise weut inte Committee of the Whole on the Saw Mitie Bill. Hori. Dr. Skelton in the chair.
The Comlttee rose and reported progress and anked leave to sit agaln.

CUSTOMS AMENDMENT BILL.
On mation of Hon. Mr. Bishop the House went into Committee on the Customs Amendment Bill. Hoa Mr. Miltey took the chalr.
HON. MR. GIBBS. -1 beg leave to move an additional section to the btll now before the chatr. Hon. mortbers are no doubt aware that in view of the statement made in the pther haHsm and which I have no feanon to question is correct, the cwaera of gremifecs where kooda ate arriving on board eteamers and aro discharging have no right to charge wharfage Now both the trade and the public are Interested In the matter, and it is only right that where the system has siven fatiefaction and current rates are changed, there should be no departtiro from it, I thith hon memberi

HON. MR. GIBES.- 1 beg to mare ther mammitmient of thls Bill to conselidnr a sllzhit ampendment which is aecnasary. Hon. Mr, Mrobrath took tho Clinit at Committice

The Committee rose and repurted the Bill with sorme umeniment.

The Hill was then read a third ture parsed, and it was omtered that is mes prese be sent to the Asmentibly that this Elouse has passed the same with votur名mendmint.
to motion of Hen. Mtr Blahop the Stamp Durlisa thill waa read a thint thrin, parred, and tt 7 mes ontered that 3 moange be sent to the Assumlity thict this Howase tand javend the mame Without amendment.

## LABRADOR FIBHERY BILA

On Huntion of Hon. Mr. Gibhs the I Brasor Codflat Bin, Hon. \&, D. firan turing the Chalr

HON. MR. JOB. -1 am going to propote an amendruat to thin clanat that thet wordz "and the ioard" be eliminntti. The reason of thent is probabily mpfurent to all. The boaril may be compoach of mercantile competiturn or hisippers, und of coatee it would bu yafair tus at legree far thean compoth omin' bookt to be efinsad to the Board find mide puhlie, uad poasility to people who have nathing to do with can
nat price It doenn't follow that this applies to people whe have been traidine in carrent price rikeetpis. Por that reavon I thiniz the worfs ought to comp out. It mizht reniter the Bosrd lowe efficient iti its duties by not having all the information that they moulif get by having theme voris in the section, but I think plemity of iaformatton conid be obtained mithout farning upside dowa the private books of huainess peopie, and I see no necesaty for tt.

HON. MR. GIBES.-Nr. Chairman: I would point out to the Hoane if the smendiment of the bua. member he ailoptec, that it will simply toren that this hiti fe of mo valus. If the bosirl has not the power to compel the attemilatice of witneases in order that it tioy lis o. Fair and remwotable price for finh sold on the Labrador coast. thin it is entterty umeleas to appolitita Bount Arbitratorn appointed unifer miy Aet, ne matter how trifling or gremt the Aifpate, have the ponker to enmpel the petemdance of withenses hetere therd in order that they may, from fridunce elicited at the inventipation, be able to arrive at a proper Judgment. Her, if we almmate the boierd sitirely from this saetion and give them ao powier to compet the attendance of تItnensen, then how in the board cuing to eimpute what if is fair pirice? it is utterly useleus to conaritute a boart under this Act, and then duprive them of the porerer neceesary to enable them to fulfil the obllestions which this hill impoeses open themi. With repard to then contention of the hen. member thet the books ruay be farmed apaide dowin in the courae of the proceedingt hetort the Bourd, for the determina ilots of the curreat price of Labrmator codfiak, I musy fay that books of as count are ererying preducnd in court for Itrepection by counset and wit. newach. If streh has long been the practice of the courti, inurely wa are

Introdecing no her inacuation when we lavert this elanse in the Bill, givina the Eloarti a power thas is absolutaly fecemaury for the surcese of their efforts. Booke of accounts are ho more turned upstete dewn th tha courne of fudicinl procemitose that they would bo at thin hoard, and If anyloody wantis to take afvintige of thls BHIt for the purposes of turning a man's burfneas upride down, the comert would very rtidily grimt an Infuxetion to provent that Buppoine for Instaace bome axpurter of codlieh from Labrador reatiling in sume part of the coustry, had in dimpute with the \#ain who sold. Litim hil that ar to the curreat price, how is the Beard going to Aetermine what is the current price, it It campot coutiref the mas to whotu hte feh was folld to appear and state hie rwasonn Por betlevine that the price be pald was it Fowsonmble cone is is abourd to cocuntitute a hoard and sive chem no fowern whatever. They cannat carry on their work and wit be unable to fivi stfect to lestilation of thls char. arter. There are exporter: fa thle coun try whone word sould mitice without the pinduetions of thefl homes becaume the board moala be quite satinfled witi thofr word, but there are ofhera in Newfoundiund whope buth no board wauld belierve, unleus corrokorated by foune nvilunce, that the price thay proponed payleg in a fair une This lill propoive doulinf with the unreliabile. ins wioll su the restatile It in ait for ithe purvaike of Aenlige with the dast huilifian manis that thls, bill tim primarily intended; but thome who mre ans Hpricht mant also be dealt with. It wiuld lie unfatr to make the Board to Fir and detrrmine what in so falr and Fessmakle pricesul at the same time gtve thim no power to ask $A$, $B$ or $C$ to cotm before them and show that it Is a reamonahte price. Where sre they froitib to get the evidence upan whleh they base their fladings. Why ahould
not the board have the power to compel the fiukernwin to come betore if
 it. 5 in is a rearoazalies price. If wis strike out these words them this bill becomina at once froperntive and of no affect:

HON. MA. MegRATH-May 1 ask the hore fentommen is eharge of tha Bit ane quastion with reference to thificiectron. 1 with put it to ithis way: Amarning that he fa a Latrador Tish mxporter, that be zoes to that coast ab Capi, Jemhen or Mr Htecoch dit, End buys fish for cash and has no tramectlona whatever under the "current prieet and that then, after he cention buck here, the matter of fixlige in "enrrate price" arisom at the clese or the searon, is it contemplated thet thin exporter, who is not the tifestent at att in the phase of the maiter comprehendias the "current Dticn" ta to be called before thle Trk bund anid required to protuce his hobly and accourst, and dieclose what ifititi, If lithy, the made on a tranaliothay wilich in 40 why comes with in the purviow of thin Bill?

HON. MR. GIBBS-No, he is not.
HON, MR. MCGRATH-Well, 1 subhistud that guention to aupther legal foniluman today who took an entire If difioment Hiow, and I subralt that it is wifitr thit people wio are hot fistereatind in thit question of the "rurrat pricell at ail should be it abie to tin sragesd bofare chil tribenat Ind roglifind to make pubtle all thelr private buiness affairs when they may not have purehased a guine Iat if fiat sublect to the "current ifice".

HON. MA. G1BBS-If it becomen noceasary for any troceeding in court and the quection of price of an artiele is in dispute betwean two parties then other party may be eubpoonsed ande compalied to attend or partiess who finve tio miore finterent than a man

In South Afrion: The general presumption fo that it will be only to those interested in the diapute that this will apply. They may be asked to prodnees thelr boolus. That is a powur vestad in the court alwaya,and courte of law will not permit persons to be lanled before boands of arbitration simgly for the purpose of finding fut what protils thay are makige.
HON. MR. ROBINSON-It seems to man that we have got to a new phase of thls Bill now. 1 think Mr. DieGratlis contention is unawailable alas that of the movor of the Bill. We liave two distinet poaltons. My tmpreosion was that the intention of the Bill was to settle the curront giflee of filli. Now trom what tha hon Euntlemat in charge of the Blil says thite is to tee a court to settle prices rat if so, of colirse it must have certatn powersis but be soon further and uave that it la to be a court to a.t.tis dispufes.

HON. MR, GlaBs Only a court to netthe thin price if diaputes arige,
HON, MR. ROBINSON-The fdea that I hud of this was that it wan to fir a price and prevent diaputes. if this to to the a cillast Jumeliti tio bunal then the more cautlous we aro the better.

HON. MR. HARVEV- 1 only want to say th word. Thin Bill lif not a bitl to fix the eurrent price. The current price lias been a recognised thing op to thik date. It may have feen very oftion that the current pried wen very mbels ligher than the price thin Bill may fix. This Bill te to fix atir and reasomable price which te totally different froin current prite.

HON. MR, Bl3HOP - I beg to say biso that it ta murely clear that thin EHII Is intonded to obviate difputed not to settle them, and no disputes ean surise after this BIIL becomes law between the liwyer and nellar. Thero will be no room for thera be-
cause thle teard tmay fix a price which teper and wilise must mbile Dy. Once the Bownt arrives at a prices, that jarice ls a fixed price and there can be as appral beyund that.
 aftect Hie fish sold withret any antHed price but will alpe erfect tbe alos at the flesed priee provided is bit tsian thats that which the Board ung Iix.

HON. MR. ANDERSON-I Wouid ark the fon guntleman in charge of the Bill how zauch of that sseop qtin, phlppod taat your was bought for cara? It aeems to me that If any body ean go down there to September and buy thel catels right oet for call and that caab was curreut for ifer itnie, that the curtent price mast lave leves fised. Thle is the most le: porsatit iscction of the whelte fill, and hirtipes as hack, tas the oft stacy as to wherther yoe cosh fis a fair abd reasonatie price for thin finh in the nionthe of Oetober is November: is has been states bere that gou cana0t fix a falr and ranacaable price tufere the fiah is shiptied but bow cath jou find that price except by an entimate of the fikure ruling in the marketa abroad. The hon. genteman stated that In order to arrive at a whes and fair price for the fish if. If necenanary to await tis atepoand Hent the only way to get at if in to uhus your lavoloe in eourt. Now 1 de not think thare is any intentions lis thla Hotise th tuke anch it conires find I thitik a fair and reasomatile irfics can be arrivent at withere foine tute the propia and shevies up the hools of stilppere ar te mhat carwoes sont in Stptamber and October hitaht reallige The hon. gentlemat whould be wery earefal an thts seettian fo the most Important of the lot.

HON. MR, GiBBS-In reply to Hon. Mr. Asderson 1 may mey that thite

Bill fowe seit interfitr with The ficyut of swliat asreelter upest the frica. if I ges to Laverwet ans hay toper gix ar fir, for per yth and the folivrernis accert this, thly dim Fowe noct affect that popttion. Thin fill prorlde s fer asch a cobtienency It where I wil mar 7 will kive zou the eurvat price for four finh ar Aume sieh warith Then the Boanl frivet may what if o falr and reaantistble prlos with regard to tranknettony of thit character and for order to onwible thenm to liny it, it sives them powers of investigation, becaume they patinol atite at a filr anil rmanonable price if they have so gowes, if they wont to stumman witheases liefore thrim.

## SAWMILLS BILL.

On motion of Hon. Mr. Glbbe the Hiouse went tato Commiltee of the Fhicio on the gat Miths Bin, Hom. Br. Ekelten in the chatr. The Committen roen asd reported the Bill with nome amendment, and on motion of Hen. Mr. Giblus, it was orderod to be reail a third time os to-morrow.

Hon. Mr. Bishop muved the House tito Committee of the Whole on the Homplast Bill, Han. Mr. Job taking the Ghair.

On motion of Hon. Mr. Biabop the Commiltee rese and reported progrees and anked loave to sit agaln.

MARINE DISASTERS BILL.
On motion of Hon. Mr. Robinatu the Houne werit into Commiltee on the Mlarine Dianatera Bill, Hon. Mr. Blandporl taktas the chnir.

HON. MR. ROBINSON.-When thle Fill was reed a second time the only remark 1 made its referesice to it wan that 1 was sure that no member of this Chamber could posestbly oppose the Driselple of the Bilt, which is to entaly Eab by ruch manns as may be th the sower of the Committee that will be appolnted, a Permanent Marine Dtaytor Pund. We have kad is receat yeare some very terrible dimatern. is hive tive vessels were lonk, and it became beceasary to establish a reliof Tund, gunerally called the Erna. Fund.

Laat year wo had the terrible trasedy of the Sonthern Crose and the lons of so many men on the Newfoundiand. TVvery momber of this Haun witt ro motuher that is priveloun years there have been case after came of vessels befter lost. and apmalu belng maile for these aperial purpoaia. All thee ap peain have heea worthy onee, and have will bom turroumen th that mpirtt hep pily characterintle of the people of Newtoundlanit, It has been empectatty sratifying to knew that the assistane 10 withurty gitit tius bot beaif confined to any ano section of the is land, hut that outport has vied with eity, anid city with outport, wat unbserthed tundementy. There have bien many inatances of ameroalty, too, on the part of Netwoundinnders abiroad, as well as at home; sad nhao of the triefitio of thoi Cotony in Hiftatis, Ganada, and the Btatea A srave grievance, however, has arfeen in connection whth these mattern a gravured witch it flit itetit tr mot appareat, but which becomes very real. May 1 illuntratef Here is a whitew whe has leat her humband is the "tutie Jip' tivmer ituegntite in other who has lont her lunsand to the "Bouthern Croas". They are both gentting analatanes from the funds Eidrtro hetwems thims is inother whtow: She has little childrom, and has loat the father of these litule onen, but sot is any of thase Athuaters No col toettorn in mate; nathitng tir ctone for her, but her suffering is funt us acute. Har nelghibourn are goting amsistance, she kels nothiag Another objection to the hap thenent ryitems to havt tiad is the past is that it has liewn found that the greater the tragody the great er thit benafiction, and then rucipienta from one find ret mure thrin thin equally denerviog beneficiaries of another. A further objection and a very anrtous one tin that the lack of mothod ta not the nort of thing to encourage
the exerclae in tis hest form of true tharity, the grentest privilege of cith tenstulp. The ldes has been for culte a long tume, that some fund should be formed which would always be there, the Manakers of whicll would be ready to हrasp the opportunity if the sad neceraity came for maklag further appoals. The attempt has been made pefores hut for various reasons falled In 1912 when the Erm Fund was en tatilfohed an attempt was made then to form a fermanent fund. The answer zome that if you mule that now the entlertious may not be as good as if you appoal tor the oae object. The *ume arkument winn ralsed last year. Fot when the meeting was beld undec: the Ghatrmanstip of the Chief Justice apectal powars were granted to the donamittee therenfter appotnted, one of whica was the formation of a Pormanent Marine Disastera Fund 1 many nay that it had been the inted tom of that Cotrmittee to liave got te wort before soektag tegtalative powvra, but the war interrened, and the mone tmmediate and Ercater duty had to be mut, our duty to the Emptre, and to thone of our wonk whe may have fallen or ahall fall or the crippled in the war. The name spirit which had yeen phown by the people of Newfoundiand in 1912 ntad agsin lact year, Was emulated or pertiapse exceeded by the ganeruality displaged by the people of Canada, the Tisited States and the Gid Coumery Tbe amount We thourtit vis ahould roquire at that time would I dyor $\$ 300,000$ was aubscribed, and it thas not thoupht too much. The whole of that pmount has teen practically dllocated, and 1 took becastion to place 6n the denks of every memher a tew daye ago in copy of the repart of the Committes, to nhow how the money tad beon allocated, how handled, and tow if in hept. A great many of the peaple cantributing ware of the opla-

Ion that some of the money should be given to a permaneat fund; It was so urged by zeverht of the danors, many of whom believed that thelr contrifortlons were towarls a Permanent Fund. Thite view wae emphaalzed by Mayor rifte and othors who had been in close touch with many of the doners and charitable socteties abrosd. Of onutio no Committio tias aby right to allocate one cent of thils Fund or any tound except for the purpese for which aubacribed. The Coramittee, bowever, ritt that it woutd be fuittied th appealling to the Sapreme Court of the Colong and asking for three thinga: (1) To हlfow theni to apply for disall torn other than the rad one ot last year bay Aonatlona, the donors of which desired thets to be applied to a permannnt fund. (3) To alfow the Corimitten to place the intereat on the money to a permanent fund. (3) To allow the young widows a vete for five yeara. At the present time 1 think about fifteen or twenty widews are remerried, and, of course, when they re-marry, the krunta tapse.

Annther class of tapsee is this. All the krants are based on actuaris! figures. Old people are net given grante for five years, but for tite. The actuarial tables gave, say, to a person of risty an average life of fifteen years. Suppose that party Alee teifore ten yeara have elagaed then it in asked that the balanee tuny go to the permanent fund. On the other thand, if that party ilves over tho fiftion years and more is repuired, the monies of the por nuanent fund will be Just as applice nhte to this case as to any othars. the other wonfis, the lifea of the pers raanent fund is to make it supplementary to the othor fends, not fesurnins their scope but widoniuy Ita range so att to emhrace overy call of the kind for ald. The Court very properly replied that it wan
seyond its power to accede to the suggestion and that leglsiation would be necessary. Later it whs found that practically sill the funds subscribed would be actually required to meet the obligations, whilst the unexpected recaipt of about $\$ 15.000$ enabled un to ralse the rate for chlldren from $\$ 30$ to 835 . There are cases where some of the survivors may be beneficlarien of the fund for 30 or 40 years, or the whole of thelr life time Some of the poor fellows liave been malmed and Will be Incapneltated for yeare,again there is many a man who was out on the tee fleldr and is apparentiy fecoveryd to-day, who has, we fear, kot whitith lifm the seeds of a diseaso whitch same day or other will come out hnd make it necesaary for htm to tisue somethtrig to fall biack upon. Such contforencles must be provided for The 1914 Committee have dected we aball want all of the money suliseribed exeept much layses as may occur. We therefore ash the Legfilature to al. low is committee to be formed by the responsible authorities and give power to that committee to carry out the work in connection with the Permanent Dleastern Fund and to allow that committon to place the lopser and the interest from the 1914 Fund to the aredit of the Permanent Dionsters Fund.

Thle Ball is to a certaln extent unlque. We are nothing from the Government of the Colony, absolutoly vochlar. There it at presont in foree ni act, rathor a mised act, and the oniy thing anked for here ts the anthority to act under a asction of that Act which came to us in the form of an amendment and was paesed is 1013, Thin Bill has been druwn up by two lnwyers, Mr. Rlackwood and Mr Conroy, who vary kindly consented to do so There is fuat one amend-
ment If will have to propose when we read the section it affects. 1 am glad to ace that the Bill has recetred the unantmous support of the other chamber There is no need for me to say anything more. Both the Bill and Its obloct speak for thomeelves. The honour of ite introduction tato this chamber has fallen upon me, as the President of the 1914 Commiltees, who la Treasurer of the 1912 fund, occupies the Presitdoncy of this Chamber. Of his writ Indeed of the work of every one of the members of the Committee, with whom it has been my honoar and privilege to be aesoclated In connection with these matters it is fmpossible to sporic too highly.

HON MR, PRESIDENT-I think the Introducer of thle bill has gone pretty thoroughly into the objects for which it had been brought forward. 1 don't think 1 need delay the House) nt this late hou: by attempting ony lengthy remarke except to say a few words of nppreclation of the work that has leen done by thy hon friend In connection with thls Marine Disastere Fund of last year, and alro the pear ot 1912. He te secretiry of the latter fund and for thls reason the work of the members and chatrman did not amount to very much. All the thinking was done by my bon. friend. How he got through all the work I don't know, When we come to think that there was 250 canes in one loss and 77 in the other, and that every individuat case had to be gone futo. and posaltity three or four letters to bo writton to magiatrates and clergy in cousection with aach case, we get some idea of the work He, howover, peralatently and perseveringly clung on to the work, for 1 don't know how many moathr, and eventually completed it, so that now everythins in going nwlumingly with regard to the funel. It oceuris to me that it is very strange that in a coun-
try like this which depends for ite existence on the realization of the producte of the sea, euch a BIII hand bot beon Introluced yeare ago. Suppose for instance, that any hon. gentleman in this House, when he thought he was approaching his end was destrous to allot aome portlon of his wealth or revinge to the Marine Dfensters Fund or some fund for the benetit of mariners, there is no provision for auch a case and I suppose, for that reazon we have had very fow in stances where legacles have been left for any such purpose. 1 don't know that I ans aware of any at present. It If a positive relief to read this bill, when we remember the nature of the - Blin that have been before us this season. Thite bill is quite clear. It is earily understood. I hope the benefit to be dertved from this fitl may be felt at once, and that in that way my hon. friend will recelve some recompense for the tronble he has taken to creatlog it

Hon. Mr. Roblnson asked that nection 7 stand over.

HON. MR. MEGRATH-1 Ehould like, with the other hon members. to add my word of recognttion of the work which I know from similar experfence must linvo acerued to my lon. friend, and from all I have heard. I think there is no question that the hon. gentleman did more than one man'il anare in administering the Marthe Disasters' funda of 1912 and 1914. In connection with thls fund, 1 ehould Hike to ask juat one queation. Is not the provislon in section 19 meant to epply to seamen as well as fishermen?

HON. MA, ROBINSON-As a matter of tact this ts the only section that was not in the original Bill. 1 agree with the hon. member that the word 'geamen' ought to be added. It is an orldent omission.

The clatue was amended aceordingty.

HON MR. 'ROBINSON-Before the Commttee rineo may I express my exceoding sratituds to those gentlemen who tave upoken of EIndly of what Htule asalatanice it may have been my privilege and pleasure to render, The work done has been that of no individual but of the entfre Committae. If credit to ctue it is peculiarily so to the Hon. John Harrle, Hon R. Watson. Hon, Goo. Knowltog, Messra, Eith, J. S. Mann and J. C. Hepturn, who have teen present at almost every seeeting, sometimes several wockly, each of from two to thres houra duration. The abmolute harmony and sin. gleness of parpose, displayed by the membera has, however, removed the tedfum, and enablod much to be mecomplished it eseh meeting May 1 also say that the Committecte arransements have been carried out with a mitnimum of trouble. Thil has beon inrgely due to the system which provides a trustee for avery beneflelary. Througs the hands of each trustee, who in almost evary case is a etergyman or a magistrate the half-yoarly paymenter pasi, thas sefeguardtus the beat lnterests of the benefictaries and keoping the Committion in touch with the indtividunt hivtery of eneh case 1 thank you gentlemen, and move that the Committee riae.

The Committee roma, reported pro kreas, and asked lenve to nit agsin.

On motion of How. Mr. Blahon the second readtog of the Munlelpal Eill was deferred.

On motion of Hon. Mr. Bishop the House adjourned until 4 o'clecli tomorrow.

## TUESDAY. May 18th.

The House met at 4 o'clock purmuant to adjournment.

On motion of Hon, Mr. Gibbe the Sew Mills Bill was read a thitd thme. noul bent to the House of Ansembly

With in mensage tiforming them that the Commilten hat pasaed the Bill with pome amendmotith.

Lastitnor compsh Brit.
On metton of Hon. Mr. GHbes the Hoase weat futo Committee on the Labradot Coafiah Bill, Hon. J. D Hyan talking the Chiatr.

HON MR ROBINSON-Iti vIEN of the amondmenta made.to aection 2f of this BII it is obvious that in mimendment ts necessary to nection 7. I now move that section $\%$ be deleted and the followlag aubnitituted therefor: the applicatton aforeanta to the Court may be made on motion to \& Judge In cbambers on summotis. Thom whall be publistied to the Royal Gas. ctle af least one waels betore the hear afg of any auch applicution, a noti: geving the time uad place at which sald upplication shall be heard, and $\ddagger$ copy of the sutd aotice, or, if the appitcation bo by Eurnmons, is copy of the sald summons shall be served capon each member of the Board created under sections 2 and 10 of thly Act Each momber of the stild bolltil and Hay other persou intarested in bald application shall be entttled to bet represented at the hearing by counnol, hut to conts thall in any event. be allowed to any person."

Hon. Mr. Roblnson'e amendment on beine put, was carried.

On mosuos the Committee rose and reported having passed the Bill with same amendments.

## MARINR DRASTERE BLLL.

On moftom of Hon. Mr. Robinaon the Houre rosolved tisuif into Committee of the Whate on the Martne Disasters' Bill.
Hon. Mr. Blandford in the Chair.
HON. MR. ROBINSON-I would ask that another section be autisttut. ea in 1 He of suetton 7 -The Committee may invont its funds in such inveatment an truatecs, aro now or hero-
after may be authorized by law to Invest truat funds." The reasons for whith ! auk it, aro as follows: it is obvious that it is desirable to have the assets of a fund of thls description to as tiquid a form as prosilble. When the funds whre collected in 1914 the Managers of the Banke doling business bere were asked to tender. One Banle offered to take it at 3 per cent. compoanded quarterly; the second offered $3 \%$ per cent compounded quarterly; the shird 3 友 per cent compounded thonithty and the fourth 4 per cent. eompounded quarterly. The hilghest tender of course was accepted. Tho result if all our funds are with the Bant of Montrest drawtig 4 por cent. quartery, avallable at a month's notice, and the rate of interest is about as high as can be had. 1 do not say that we cre Justiffed in aseniming that a almitla-bargain may be now secured, but we hope so, and if we can conthaue this it will the very much more deilralife thain havtig the responithllity of lnoking for such Investments aa may be liquidated at demand, 1 therefore ask that this addition be made.

The amendment was put and car red.

On metton the Committee rone and reported having passed the Bill with nin amendment.

On motloa the Bill was ordered to lie read s thind time to-morrow.

## MUNICIPAL BIEL.

HON. MR. BISHOP- 1 beg to more the second reading of the Mrunlcipal BiIL

HON MR HARVEY-Before this Eiil gnts Into Committee. I want to say that I object to what may be said to be fis principle. The oblect of the BIt lie to to sway with the prese ent Commlasion before they hava reported, to do away with thelr powern of government, which. I think. is a
krwat piry, and I think that the Council ought to arnend the BIII so as to permit the present Commission to continue its work uatil it has reported, in onier that the next regular election of a conneil shall take place unier reviaed and approved rules. We all tugreo thint the government of thls eity has not been what we should bave thrid to nee up to the time the present Commassion took charge nor do I say that it is so since it tools charge, but the only chance of getting improved government to my mind is the opportunity that exists of leeptig the present commission in power uxtll it has been able to repgrt apon whit, lif itn optrifon, should be done. If, as arranged for here, the elaction takes prace ander the old law, and the Commisalon does not report untll sorae time after the new Cominasion takes othec, it is golag to be axtremeIy dimentt nfter that to make sny practical aiteration in the governduent at St John'i. The Commlation, in I underatanil it, cannot passibly roport before at any rate, 65 months, and $I$ fain) the act of the Legistature sught to he to keep them in power untll next June or aufficlontly loag to eunble them to lay before the nost hemslon of the Legislature, thelr report upon efvie buatness, and to allaw the Lagntature elther by arranglas for a plebisctte, or by direct rote to dinal with the new charter they will roccmmend. We know that the trouble to not so mach with the Munfeipal la vs of the city. My hou, frlend on my left. Mr. Grbba, tntroduced and carried some moat admirable regulatons in conncetion with the gavernmant of the elty. The trouble has been with th- machinery of adtufnistration. and I halleve that the present Comcolasion is particularly giving attentien to the question of admintetration, and to perpetuate by mother election the conditions whitch have hitherto ox-
isted, without giving there gontlemen an opportunity of putting their viewn before the Legtstature and the city will be a grave error, so that I hope the Bill will be amented so as to prevent any new body taking office until the wark of the Commisston has bech before us.

On miotlon the Bill was then read a second time and will be referred to a committee of the whole bouse on to-morrow.
LOGGING COMMITTEE REPORTS.
HON. MR. HARVEY-I bes leave to present the report of the setect Committee appointed by the House to consider the Bill relating to the employaneat of men engaged in logging. They have lad the matter under doliberation for some time, and have made some ameadments to the BIII.
On motion of Hon. Mr. Harvey the report was recefvect.

HON MR. QIBBS-Mr. Presddent. 1 would suggest that as this is really a now bif (Logging Bill), the original bill be printed with the amendmente now proposed in order that hon. memhers miay see the muture and scope of the amendments now proposed and thas it be rent to committee of the whole on tomorrow

It was orderad nceordingly.
On motion of How Mr. Blahop the House then adjourned until Thuraday next at 4 otclock.

THURSDAY, Mny 20th.
The House met at 4 o'clock, persuunt to atjournment.

LABRADOR CODFISH BILL
Third rending of Labrador Codfieh Bill an amended.
HON. MR. HARVEY.-Mr. Preeldent I am anxious to have recorded in the Journnl of this House the fact that this Bin, or at least that section calling upon the Supreme Court under certatn clrelambancea to fix the price of Labrador fish as an ordinary part
of its business, ahould not go through without a protest of some sort, and I tave to make a motion that the House so tuto Cummittee again apon the nill for the purpose of conaidering that particular gection. I wayt, at the silime true, to say in relation to the Bill generally that I hope It will not bo urged herenfter that the Councll amended the BlI out of existence or twen changed tt serlousty. 1 am opposed to the Bill myself on the ground that in its more particular features it truverses the obivious principles on which if commercial community must exist But the alterations which have been acfually made here have been practically of a formal naturd. They hive aitered nominaliy the method proposed for appointling the Board, but that alteration is more formal than netual. They have changed the method by which that Board gets its informatton. They have to get ft voluntarily fastend of under compulsion. But this will make no difference in gotting the information required by the Board. They can get it from eversday information and will cet it from voluntary cvidence, so that those alturations are formal and hardly change the measure at all, and the Councll are not open to the accusaflon of tiavigg itampedod the Bill or of havtag improved it out of existence. It Is golng through practically as it came up. My point, however, Is that the Supreme Court is the one fantitution in thiss country thet ought more than inv other to lie Invfolate and kept wifitn lin own striet tunctuns. 1 conslider that the precedent now being est fabliahed by which the Supreme Courl is brought down from tes proper function und called upon to deal with matfere of this lind is a precedent at onee phectronaite and diugerous 1 cannot see tiny reason why if the Supreme Court is to be called upon to fix the price of Labirador fish, they may not be catled upon to fix the price of any.

Thing: for iastanen the price of pastringe lestries of of acals. The value of loutr tirumet tir tir probitit filty kjlesi es che average to the value 9 ? daherailut ftrit shipped aff the cmak an huduatry mare roncentrated, in few.

## PATRIOTIC FUND BHL.

Second readtug of Patriotis Fund Bill.

HON. MR. BISHOR.-Ag hon. gentiemen are conversant with the aims and abjectis of the Bm, I will bot deling the House with any remarks, but will move its second reading.

The Bill was then read a secomul ttral, anid ordered to be referret to a Dommittec of the Whole Hoase on toक.

LABRAIROR CODEISHERY BILL.
Thifd rualing of the Labrador Codfishery Bill as amended.

HON. MR. JOB I hope this mattor of reconsidering the Bill will not be prased, as it will render it Inoperin. ifve. The hon gentleman who has brought in tho bill thinke that it is probable they whll not get men to act on the Poarct. If thls ts so it will aither become Inoperative entirely or the Suprome Court must take it up. The hon. gentterunu's contention ts that the Judires of the Supreme Court are not the proper persons t) deal with the Bill. I submit that such togal glants as Sir Edward Morrls, Mr. Morine and others In the Lower House conaidered the miattar, thoroughly diocursed it and passed the mencure, and if they think that thits ts wonc that the fudsea of the Supreme Coart can do. I fo net ese thy lay membern of this thatye khould view it otherwisat. Wie Hifowise must rememher that we have Iegal members of thin Hows:, I notion at the prenent moment three logal genthemen here, and possflyly any of these three legal gentlomen may beoome Chief Juition or a Judge at aome tuturo time- 1 bope they will-bat they have vated hefore this in favour of this clase, the three of them, and all the other logal rucmbers of the other House; therofore I cannot see how we can guestion the matter as to whether thitis tis tho port of work Judges should do. The Bill has eaused much dimcussion and has nlrendy had the up-
groval of a minfority, I would liken it to a ship coming into a dock for repaira after a hard voyage. The Bill ngeded repairing and got it. It was then takens out of dock and was eallfas zaliy on its way to the Lower Houne when it hat been unexpoctedly been torpedoed, and the torpedo will tink it as far as 1 can see If we are thit carcful. Therefore, I beg teave to ask that the third roading be [assod.

HON. MR. ANDERSON-I think the hon. gentloman himsolf as the lay gentleman who han charge of the Bill. raade it unworkable by the erasing of the wards "and the Board" from nection 9. As resards the observa tione referring to the legal gentlemen of the Lower House embodying in the Bill that the Judges of the Su prome Court aliall fix the price. I beHeve they are competont and qualified in every way, but it does not seem our duty to place them fo that poaktion. May be questions will arlse out of the fixing of the price, that they thuit deal with. They will probably have to deal with prices and other questions arising from these prices; and if somebody elae could be declded upen to be tho final arbitrator, I smis of the opinton of Hon. Mr. HasFey this would be better than the appolnting of the Judges though 1 atm gure that there is no hon. gentleman but has the figheat confideace in the quallifortions of the Judges, bat it is the unfairness to compel them by Aet of Parliameat to fix the price of any products, that I object to.
HON. MR. ROBINSON-If t underxtand it rightly,-the motion hifore the House If that the Bill be now read a thirc time. There is an amendment that it be cveommitted, so that sention 6 may be ceconstdered. It would. I think, be fairer to the House if the hon member who intro-

Aerest that amindianit twivid revoos: fifer tite motian. I may lve eet of onder is ethecumine then purpose of hin mmesdment. rather than the amendminst ltealf, hut the boas membir bas elearty exyremed it an hie destr" to have reeorded the napmen of thoer whe spirnve the princtple of the prophent amenduribt to inctlon $\%$, and of thame who displytire 1 mulntain, Mr. Frealdent that sio dirision ean give a eorrect rweord. HON MR. ANDERSON- 1 hilly theur 7/is thr verzy expressed by Hont itr Harter to thtr mutter, ned therufarm hes to mithiraw the mupfort malich I sars to the nmendmont.

The fill was read a thitd time and passed, and ordered to be sent to the House of Assembly with a message thint this House kad passed the rame veith nome amendment:
On motion of Hon. Mr. Blabop the House adjourned witil Tuesday next Bt 4 pm

## TUESDAY, May 25th.

The House met at 4 D.m... purauant > edjorirnment.

On motion of Hou. Mr Bishop the Hospital Bill was rend a third times, pussed, und sent to the House of As: sembly with a measage thet this Houne had passed the same with on amendnumt.

## MUNICIPAL BHLL.

HON, MR, BIGHOP moved the Houne Into Comimittee of the Whole on the Maniferpal BEII, Dr. Skelton in the etmir.

HON. MA. HARVEY-I beg to move an amendment to section 11: "It shall be Inwful for the Municipal Counofl in aflition to their other powery to impouse a tix upeas every Con. tractor or Builder not domiclied in this Colony for one year prior to the acceptance of any contract. Is. the sum of $\$ 500.00$ (five hundred dollars) per annum. The firat payment of such tax whenever tmpored or paid shall be a payment only for the then cur. rent ealender year, and the second and eubuoguent paymentis shall be diue and payable on the necond day of January following such payment. Provided that they stuir not ippuly to any contract entered inta before the pneaing of this Act."
Hon. Mr. Haryoy' amendment wan carried.

On metion the Committee rose and reported havlos punsed the nill with nomis amenitments.

On mation the Bill was ordered to be raad a third the on to-morrow.

## LOGGING BHLL.

On metton of Hon. Mr. Gibbs the House went into Canmittee on thif Eill, Hen. Mr. Milley in the char.

HON MR, GIaBS I beg to polnt out to the Houed that to my mind there in a detect in the Iat saction of the Bill reported thy the Select Committen. The int section reade that in the tHill - the ewployer shall be held to mean the indiridual or company who enguges or pnyif the workmen of a concern." Now it is ponsible and is of frequent occurrence that the man who hires the workinon may have nothing whatever to do With paytug lifm. Ho may be employ: od tor the purpose of hiting a certain number of workmen under an agree. igent, and when the performa the worl for which he was engaged bie employ mont ceares, There if eridently nome miatake, and 1 thinik that the Select Commitee shonld reconsider this seclon, because hundreds of cases may pithic whore a man may hlre, but not thave azything to do with the paying of the mon. We are not legtstatitn. for todiay, but for the future, and miny cason mas arise were the man who engakes the workman hat nothing to fo with the compenation ne II to recelve. Consequently thill Eill would be thoperntlve so fir u : the emnloyment of logzers are concorand where surh contingeneles is that would happen. I thle it that it if not the intentfon of the Solect Commitiee that dirifeultiea of that Find snould artsin in future with regard to any action of theirs in the drafting of the Bill. In the next mection, 1 do not think tho definition of the word "Toqgar" is correct. The Bill referred by the Select Committee delines iogeer an $n$ man emgabent fo the "phyrical work of cutting, fisuling. etriving ste, of logs" There is no surh thing as phyalcal
work, there is physical force, as for instance the army or navy of a country reptezente its physical force. Man does aot warl, he lators. Whin speaking of rights, you would not nay the right of werk; a honse may work, but it canact labor, it an elaborate totinttion be necesaary, and It to acelrabte to hive the wrord "phystent" retained in th. thon the Committee should insert "men engaged in the phynical exerctise for the saik of Enfr or reward of cutting, hasulling, driving ete., of loge." I cannot secopt the amendmentis made by the Select Commititee to the Bill.

HON.MA. HARVEY-I cannot quite follow the hoo. sentleman as to his arkumeat apon the lit section. Can he susgerit any other word, for to have a clear definition to most essentlal.

HON. MR. McGRATH-llit might be as well ir Hon Mir. Harvey, the con. vener of the Select Committee, would give us an explanation as to why they Lave claneed the BII, 80 that we mity have a clear understanding as to where wo are.

HON. MR. HARVEY - The Trasin Why thet Itrat clause was inserted. was because there was no definition of the word "employer" and tho de fintetion of the word "logerer" was at togother too vague the the optnion of the Select Conmittee. The runson why the word "physical" was introdueed wht to differentiate the ictiuas work of cattig loge from work tneldental to the working of pralp and paper. for inalance the cierical mtaff. Torionatiy 1 witt wot mate murh phithi of this but as the originel Act devitued loggers it appears to us that it tmight concelvabiy be held to apply to ciertas propte in tumber complites offictes and others not engaged in the actual work of cutting loges, so that the Committee thought that thes mmendment illoutd bo clearly confli-
ed to the physical work necessitated is the haoillingt of logs In soing throumb the Aet I shall suggeat another saight altaration to the Comteo biecane it is doubtful whether the noction aa it stands covers the work of cutting plt props. The Select Comtaltee Interfiewed Messre. Harrle and Horwood and also consldered the proteat put fa by the two companies. the Anglo Nfld, Development Co and the Albert Reed Co., and the prim elpal uiterations-except minor ones Ehreth to not afteet the Bill but de away with amblegities and unnecessar: lly harsh obligatlons which are now put in a less harah way-the main atteratlons are the intended ellmination of the no callod logger's agent. The Goverument has got to appoint an inspentor whove duty it is to viait the Campe otd, and seef that the Act lif carried out. Every man in the camp hase free access to him , and the Mintitor of Agrientture and Mines, and, why wo should put on sin outatde rearcsentative of the rogeers. who In only "the fith wheel to a coach." and is personage who may make a rereat deal of unfatr trouble to these companies, we could not see, or any food from this presence or the leant thenanlty for it. and the main alter. attion of the bill le ns regarda to the mo-called astent of the logecras. In any case thero could be great diffleulty in ketting an agent of the log. surs. The Bill does not provide for bin selection. It would be impoastble to get an arent properly selected by the man to begin with and these compames hearly att replace thatr mea three times in a season. Mr. Harris has shown us that. Now how can you got a reprepentativo of the logrers themselves under these circumstancea? The Govarnzoent appofntee himsolf is really the representativo of the logsers, so af-
ter discaunlon the Cominittee wern of gpibion that it secons thepector wail melpertluoth ant is fact no rea.
 ad. There are aome minor altera those 1 may har, and partiontirty the the timt exutheman th charke of the Dim. that there has beas ar fatration to shamere the primelpie of then Trit.

WON. MR. BISHOP-ThNTE neetms in he a timpouttion to rugaril thas bill se operutiar only segainst thrie latge companien, This bill If guneral find eppllei to all companies ongeged in the lumbering induetry. It would fos wasy fur the bie compntion to brevide the means, but by no menana so fory for the majority. How those writ golves fo piry chint I don't Rnown Ofz the eontraft I \&now the carh will Fot ber ta Mheir will. The workmes Fil hare meliher the mecillabie of Jour mur the cash. If me are legcistatInes. fir the benuflit of the legever it frout la horne is mint that all these feise ary pot whiقgरe ky the three larce coumpanlea.

HON MR, MeGRATH-Wenlt that I frul by lwaine chepues ne benk.
 While subody wanta to hamper the
man engaged in the logging industry, yet I certainly don't think we ought to open the door to anything that will make it dificalt for a log. ger to get the worth of his labor.

HON. MR. BISHOP-The majority of them will have taken up supplies and will not bave a large amount coming to them when the spring axrives 1 think it would be well to cut ont "negutiable paper."

HON. MR. HARVEY-May 1 explain the meaning of thla gection? First of all 1 recognize the weight of Mr. Glbbs' critichsm. The teason why this was done was that employ. ers are liable at a moment's notice to pay enormous claims. A man comes In and demands cash, Now these companies don't koep the casb there. Not that they would want to pay anythlag but cash, but the ifea is to give the companies reasonable chances to get cash. In winter it is possible that the ratiway may get blocked up and there wonld be no means of getting carh in. 1 don't know of any case where one order in the logging industry was over dhatonored Tlant of course is no artament for fustifylng them and I parfectly asree that the words "nesotiable orders" ought to come out of that section it is a question whe char it te hinchi to omilt the word cheque or give more time to the omployer to get cask bat to mator it binding that they she. get crell at \# moment's rotted woutt te a sreat Gardship. I think + maxy say that the Committee wili be giad to do anything in regord to that matter the hon. Fentfernm tri charge of the hift may wish. It is soing to, tie very awkward. The representatives of the companfous say it will be neat to tmpossible

HON, MA: OIBES-If the companios are prevonted from obtaininis cash bocaune of storms there could be no successfu! prosecation agatnat
the company, that if the act of God. No action could lie for a faliure to bey caab tue to the act of God.
HON. MR. MCGRATH - Suppoaing 100 men conapired to come to the company and ocsaund thelr money?

HON. MR. HARVEY -1 would like to point out to the hon, gentleman that the statement that the court sbould sllow time fs erroneotis. It is aurely taken for granted in the orlgfral bill that the money elall be on thand.

HON. MR. BISHOP-I think that We should heritafe bofore we demand that employers shall be bound to tiave cash at thetr places of business We taive never keard of any dishonoured cheques. 1 do remember that sone companies' cheques were held up, but not so far as the workmen were cancertied. The logger received hils remumation promntty I have no knowledge of any person suffering by taking a cheque from any emplaytor during the pat 30 years, In faet thoy trke them in preference to eash. Chegres ure necepted all through the trade all through the eometry.

HON. MA. GIBES-Eicept for thls fact. if a flaherman bas a cheque for \$70 in an outport fie can't get it cashod unjess he mays a premium, and if he pays for goods with a cheque be (11) pay more than if he had the fash. That is the porition. Circumetnices and conditions so operate that the men with cash can make a better bargain and get more value than it he had the choque to present.

HON. MR. TEMPLEMAN- If we out out cheques from that section it will have a poor effect upon the busithese of the whole country.
HON MR, JOB-1 think we all frcognize that there is a good differpoce hetween a cheque and an order. 1 thlink if the words "or cheque" were inserted it would meet the dimeulty.

A man in Thale to al huary fine if to siens a cheruo wilhout fuade. But he tha biue orters whowit turing th mintig tithtit hitm i that tur \#t campromine if we inaert the wonds "or sherque" it vocld mext the titi cutty.

Thy thindmest Tre eertine.

The ameadtumit on belhe put =an Earried.
The Cotumittee pa the Logging lilil row asil reported the bill with some amorndhent, whict, report was ficelral and on mption of Hon. Mr. filbles if was erderod the bill be read a third time on to-morrow.
Oe tuvtion of Heel. Mr. Biahop the Gomie veiat lato commulttee of the vhole ob the Patriatle Fead fncon porabom Bul.
Fon 3tr. Wister for the chalr.
Thin Coumpltter rose and reporthed 3.e bili without amendment which f bint wiflucifroit ast of wivitio of Hons Air, Bithop it wan ordered thut the hill be rest a thind time on tomerrow.

Han, Preddent annousied that the Hoil mocitvid messuges from the Howe
 Ciccompanylan tillap entites rerpectively. As Act cocfirming an arreotivat between the Qevernment of the folony and the Nhi, Amorican Pank ife Company: As Art respecting car tefn Hetiring Allowances; and an Act ronpecting the Bank FYabery, la whlch thoy rerwhitted the entecurrutien of the Councll. Also a minesage that the House of Amaemhtr find pakaed the timeniment rent dova in and upon the sul mopectint the Evtublimiment of a flarime Dtmeters Find without
amundtrant.
On motion ot Hon. Mr. Blahop the shove bills were then read a first time and ordered to be read a sooonl time on to-tnorrow.

On motlon of Hon. Mr. Bishop the House then indjourned untll tomarrow. Wednesday, at tour o'clock:

WEDNESDAY, May 26th.
Thy Hoases met at 4 p.m. pursuant to adfournment.

On motion of Hon. Mr. Btahop the Mundidpal BII and Lokylng Bill were read a thitrit thme, passed and sent to the House of Assembly with a message that this House had passed the same with amendments

Third rending of the Patrlotle Fuad theorperattoa Bill.

HON. MR, Bishop- 1 beg leave to iifk that this House be recommitted in two names had bees omltted from it and we want to have them tminited. On motton of Hon. Mr. kintiop the Bill was recommitted to a corntaittee of the whole House.

Hon. Mr Wiater ts the Chair.
HON, MA Bishopll beg to move that section 2 be amended by the namen of Capt a Ttmewell and Capt: A. Montgomeric, betng finserted atter the name of Erie flowring. Eher.

The motton on leting put to the Committine wan carried.

On motion the Committee rose and roported havtar passed the blll with an amendment

The Bill wan then read a third thme, paszed and ordered to be seat te the flouse of Assemb' Y wth a mes sage Ititmating that thly House had tamed the bill with an amendment BANK FISHERY BILL.
Gecond reading of the Bank Flatiery Bill.

HON, MR. E'SMOP-Thls Bill has not yat boen printed to put into the oands of Hon rembers, it fis how.
evor a very simple measure. ft provides that no vessel can get a clear. nnce unlesin the Customs orficur sha: he satisfles by the manter of the veip eel or otherwise that she han ou board (a) three life huoys, (b) sutficlent life belts for every persoa employed on beard: (c) a compass for every dory carrienl, and (d) an approved patent fog alaril. The bill further provides that owners of vesseln essaged in the Bank Fishery who pertait vessele to go on the voyare alth but ench applinnces shall be liable to a penalty of $\$ 100$ or to detault a thonth's 'mprisorment 1 beg leave vo move the steond reading as the bill.

The bill was accordingly road in cecond time and will be submitted to a committee of the whale Houne. on tomerrow.

## RETIRING ALLOWANCES BILL

Second readting of the Retiring AIfowanees bull.

MON. MR. BISHOP-Thls bill refers to retiring allowances for the tollowing versous:

To Knte Roisas, late afteuitant, Departmental Bullding, \$8x,
Th John Blarnes. Later Wurdes Larwatic Asslam, $\$ 350$.

To James Dentinf. late Warden, Luzatic Asytum, $\$ 400$.

To Patrick Howlihat latn Wixht Keoper, $\$ 400$.

To Thoman Ilyan, late farmer, $\mathbf{\$ 5 0 0 .}$
To Timothy OBrien, late farmer. $\$ 400$.

To George A. Moutton, late P. O . Keeper, $\$ 500$

To Gerrge R. Lilly, late Magistrate, $\$ 700$

To Eillit, late Lizht Keeper, $\$ 900$.
To P. Christopher, Iate 8.8. Monu $\$ 520$.

To J. A. Preston, late LAght Keop or, Change Islunds, $\$ 232$

The Bill was then read a sec and time and ordered to be referred to a commiltiec of the whole House on tomarrow.

## PACKING COMPANY BILL

Secoud reading of the Newfound-Innd-American Phelding Co. Confirmation Bitt,

HON. MR. BISHOP-Thls BIII Te Integ to ani agroement entered into betweon the government and the New-foundland-Amerlean Packthg $\mathbf{C o}$, in. corporated and the purport of it is that the company proposes to erect Cold Storage plants, factories and other buitdings fo different parts of the country. We have had before as on different eccasions slmilar bills and agreoments, which unfortumately for the Colony have never become effective. From one cause and another the companfes securing franchifes of various kinde falled to procure the necesaary capital to establiah the frtunded industries I most afneeraly hope that we are now dealing with a corporation that will be able to eecure the necosary capital and establiah what we all desire to see, that te particulariy, some means of Cold Stor age which will eanate a conslderable part of the product of the finherles to be exported in a fresh condition. un well as providiog bait for the fiahermen of the country. It is an impertant measure and I hope hon. members will-read it carefully before the Bill is sutimitted to the committoe stage I beg, therefore to move its second reading

HON. MR. HARVEY-AB regards the verbtage in the Bill I would like to draw the attention of the hon. Introducer to eection 3 which does not appear to be clear. Thls section of the achedule calls for the payment of a हuarantee. There is no doubt that the futention is to pay a guaranteo only on the amount of the investment

In case of such plants only 28 are befing regularly operated and this ahould be clearly put and if as I think the section fo not clear on this polnt it should be amended to make it no, If the company put up four or five plante the Goverament ehould not ho obliged to pay interest on any except on ench of them as are operated. I am not clear that the wordtng of the contract deffies with sufflclent clearness, whether If one plant should be operated and tho rest be loeked up the company are not allow. ed to elafm for 5 per cent on the whole and I think it will bie of assiotance that they should be in good condition and will make the Bill more workable.
I do not sugy that tt is so, but it in not clear that it is not so. How thle concern wilt contliue operatiak wh.ithuously, f.e. for 12 months in the yenr when the senson ts limited herg to say ofx months-how the plants are to mafataln continuous operations when the fishing season is over 1 fall to see, and the chances therefore ot a de mand being made under the strict letter of this contract are small. But the mifo pofnt is that the Govern: ment should not be called upon to pay Its guarantec except on the plante reEularly operated; otherwise 1 am propared to support the bmL.

On motion of Hon. Mr. Bishap the IHII was read a second time and will be sent to a committee of the whole House on tomorros.

Hon. the President Informed the House that he had recelved from the House of Assumbly a mesenge that they had passied the Bills entitled reopectively, "A Bill to Incorporate the Grand Bank Water Con, and a Bill for the Contirmation of a Contract with the Newfoumiland Products Corporntion, Limited in which they ashit tin concurrence of the Councli: also that they have passed the amendments aer:
denst by the Lumptative Coumeit th the Genemi Itopital itil without arm endizenc.

 If Be duts whina it cormes into effect. 1 went to mate it the 3nt Jary,n 1918

HON MR. ROBINSON - Why?
HONe MR BISHOP-Becruen thr tuthery in in grourres sow, and the a path will not be hime betice the eid of the thelvery and it woult not be fir fer make the come into port, and ey it mtaides by matume ofticers will Sure no opthas lat to enforee the Act

MON, MR, McGRATH-kight Jomirthat that in Serthou I we mioht tnsort ffter fle wirt math ' rafirithe to tifobelts, cumpaakel, fogborns, etc the sorate tin thout condticen' Ther miny hare all thee thitnes on hoart shlp. tee if ther ure not in gnot condition. of what vatum ati they?

HON MA, BISHDP- 1 thint that aninilmat it nearnety necomary.

When the law demands that these articles shall be on board, it implies that they shall be in good condition. This BIII is roally to cumpel owners to carry fog aiarms. Compasses are unually carriod now, and are the property of the Bank flahermen themselvea. No crow will go to yea without the patent fog ainrm being in kood condition.

HON. PRESIDENT.-Will it be necessery to amend the socond Section in vlew of the amendment to the first Section?

HON. MR. BISHOP-That can relate to the thme when the Bill is to come into effect. In riew of tho question raised by the Hon, President, it eeems to the that the better course would be to pass the mill ins it comes to us, and add a third section, that this bill will not come into effect till after Jan, Ist, 1916.

HON. MR. BLANDFORD.-1 rather favor the addition of the few words that Mr. MeGrath has mentioned I take it that the Minister of Marine and Figherles, when befaging thin Bill into the Lower Houne did it with the beat intentiona and considered that by 8eetions A, B, C and D he was covering everythitng. From phat experiences he has found that these articles have not been kept en hoard, and 1 think it would tie well to stipulate that they shall be kept in good conctition.

HON MR. BISHOP.-I think we might tanert the words "in good condifion" if If is the inith of the House

The amendment was put and carried, and the Commiltee rose and reported the Bull with some amendrients, and on motton of Hor. Mr. Blishop it was ordered that it be read a third time to-morrow.

On motion of Hew. Mr. Biahop the House went Into Committee on the Retiring Allowances Bill, Hon. Mr. Templeman taking the Chair.

The Committee rose and raported the Bill without amendment, and on
motion of Hon. Mr. Biohop the House went Into Committee on the Nild. American Packing Co. Ineorpora. thon Bin

PACKING COMPANY BHL
HON. MR. KNOWLING,-WICh refard ta Section 4 there ate companifs manufncturing forms at present in this Colong. Do thiog got the same privitonem ar thie Compmis Bets?

HON: MR. BISHOP,-As far as 1 am whare they do not.

HON. MR. KNOWLING Then I don't thtak we ought to grant these people coticerchans which would mitt. gnte agalnst the fictorlen already vorkitis
HON, MR. DISHOP.-The Hon. geatleman rather meant to may that he thinken other pereoris zhould alvo be necordad utmilar privilleges? It doen not peem to me that thlis privilege should be refuzed beesuse othora have not recelved it it it an sgreement made with thin particular Compuny.
HON. MR. HARRIS. I have an Iden that there is aomo mueh concension in the revenue hill with ryeard to local zums exportel:

HON, MR. (J.D.) RYAN.-I may Ray thet I am toterented in such a manefarturimir Itriuntry hare and I hive bever heard from the manager that they have any much concoaslons.

HON. MR. BISHOP.-This only ap pilios to export

HON MR. RYAN - I thinls if is it veculfar thine If the exporter setn that concemalon way can't the consumer gat it as well? It looks to me to be Th ther odd if we give conceartons to this Company and dan't apply the same to ournelves. We ought to look after ourvelves firat, and outaldars next.

HON. MR. BISHOP. -1 am rather nurpilsed that the bon. gentleman advances that argument He ts old Enourth th parlismuntarlon to lonow better. Tho cobeceasion to given to onable
these then to emitioy oar people and to tue our fretth that havi bitherte sone to wrates. and an a concesalon we any that we will rotum the durtion they pay ob mogres and pthor presurvattres usod in the groate which they may export. That poiticy in not num. it has been affen by oflar Eovernmanta th onder to craste sew aritiche of - nxport,

HON. I. D. RYAN -Thir aection if to very troportait init rogutrent sectous couniderntion, anit we may get'a Company who will perform what they propont earrytuic out. $t$ have heard it saft that it te is very rich Compary formed only ahout a year ago, atid this betan we I tlatik that $\mathbb{N}$ a mection tike Ahis were tir the thtt, to thin event of Itn not belag a paying concern, that is If the Company were fairly atarted undit good managument and weat eb promperomity for in for Tenrt-the er leinal promoters mus well oul, you may pat a manager for thie company weo witi he wntirely unabios to earry out the thritrime ent muit pers bo per cent. tor whatever ahinutage may necur in their earatage. This is in sevioun matter and anfate to tho mitipleynti of then coutritry to that then, if the Company was not aurbunsfully opersted to pay 5 per cent or it. pertion of it to the fnvestors or prophintort of that rompiny, in unt cant ationation of the matier lofore ailoptlas Sections 5.

MON. Mr. EISHOP.-ln anaver to Hob. 3fr. Ilrous ant for the sattefocthen of than Homme I weald eall atterthen to the fact that thrs gunrantee appities neaty to the cotit atange of sach
 Eempang, fat net te ite eperatiotis as apptied to zlue factories, fratt fucterlea and euch other franclies of thin forinsitr, We art ift maner thit it has tova the devire in thin Coinay for a fain time to hava the mpportittin of fresh fists enturprtaed. but frum one citime or amother mothing has beon as-
campilished, and it ls with a dentre sin glve the emportation of our freab till is fir trial tant the Government Efontolt to eacouryie thts entencise to the rxteat of glvent 5 per cent. fuas Enteu toir it yuara. in does atot prom: face as will her aocm later, that they witi 2 thioy turve tome what thoy undertooh \& do in operation. They nay thes will drnet ontid torilge stanta one cach year fir tared years, and not until the firat flant ift in operation for 18 monthin Gumtinanualy wit the Governmant be t his for the peymunt of any num to burpliment thair earitugs if they do fot mum if porr certs, and then conaesquratly the aecoud year they mast es thblimh azaitier plant, anid after that fo is uperntton tretvo monthr the anme farantoo appltes. They have alno the fertoas fuireas of erncting three tand zlictir to mabetitute one boatior fac $4=7$ This sereement has beets under ofindarration for a long time and hus Yera caruhully deltherated upon, and I thilnk thin Colang's faturestis have bees fully eateguarded. I hope that we stall \$ee at least the first of thrse plainty procted biotore thin end of the present foar, and an atteropt madn for the Randlines and exportation of our treeh (tint is cold itomge.

HON, MR , SQUIAES-May I be per culted to a fow brief werda to explath \%ivatom A of the Bitl if, for example, thin Crmpant firverts 5100.500 for the Treah fiath and cold steraite bualnesa" Tsil makias bo dividend at all thereon, thr fotomer to thato fort क port rout. inatoly trana if it maken two per 2exti the Colany be lable tor 3 per toat. numily, Th,ion. If it maken of Ior oent, the Cetarty is suifer no Inbilite.

Thin gevtlon is in aecord with the Tolliy of the teveral monomt cold thorsese icts and the many cota atorake contrnite confirmed by thin Lerishaiuri. Seetton 1 of the 1910 Cald Stor-
lege Aet provides as follows:-
"It ulanll be lawful for the Gorernor is Coanelt to gurnutes as bethatt of the Culany fur one or mare yaare, not exceeling fitteen yearsthe anmal pay uciit to any persob, Hirm or cotupitas vimenod is the traxtrese of cunt ithorurse kad other buituess comneted with the fimheries anil hait aupply of the Coluny of a sum by =fich the not an: must prettis of sueth person, firm of tompany may be lesen thans of per ceat. on the rapital intented by any surh pimatr or patid up lif any suct culit Bnay"

In thia case the guaruntee appllies to eapital inverted "th the fremh fan onit chfit ittoramen turistruss" Thime worde are of a more limited acope than the worily of the Act. Tins the Houne is mot bathe asked to sinetion a contrict in scrinectton with which in gaarantee it buing given for purposes widor than the parponee named in the cold atonage wit. but we a mattor of fict for puipoiken wore 1 mmited than the wording of the Aet allowit
it is true that the Company pro posen to enarise in the chumine of lobr uters, the making and packing of tish. the delyydration of fish by the special procusn in which they are intersated, tut of ift thetr ectiterprians it is anty on the actual caib capital Invested is the "frenh Hah and mold stornge bent Eens" that the kuarautee appilies

I Anthertit kupe thitt the intarphlio =Ill find the eapital recesnary for thelr groposed undertakinge. I um zat. iniled that If they can he fatuced to trime terem mpitnt trito Now toun thent to lavest in thil enterpirise. it will be protitable both to the Colony and the © ©

HON. MR. MeGRATH. -1 would like to hauw if the effect of the section is the name as thr section ia previous mits* of the lanmalio for thir cimen 1 tall to nee why *e shiould apprebend any ereator danger than in the pant,
firery time that a cold storage act mes tirought us in the Lewer House this polnt was inavitably brought up and Sabisted at length-the effect of the fumaition thiat t vanted to be clear Alout was whisther the genernl tenor gf the sumrantee was increased in this sill Dues section 6 mean that it is sot lavfal tor the Compasy to export atiy bult Iistes? Sro barring pmhibt: A from thin Compmay, and all batt tinhest Hecrink may be cennstrued as a lait tinh. 1 want to be clear as to hother this will not prolifit this Granpany trom exporting borring, capith or strult We exported soutd to fapas for food parposen a tow yeurselm. If may be a mistalen th my readIn to prohthit the exportation of any binit flimes.

HON. MR. BISHOP.-If will be nofiond that Section 13 of the achedale tif identical with suction 6 of the agree tiont: and it ippears to me to be perzoctly clens if you read it. it readn:

FNothing whatever in this ngreeThent shall be thiken to permit, nor flatt it the trufut for, it my thme dur Ins the contimuance of thle Agreement or afterwards, the Company to export any bivithish or any fiskes to be nued ior the purposes of batt tnto any place whateover beyund the furislictives of thit Colony, This is clearly and dis tiucty umbentood betwertr the Gorimmint and the slmatories to the fercrment, and there la no doubt upon fictr minits any more than on the tirt of the Government. The mitter has bern fully difocuated, and they undentund that they cannat export halt diahes. They export for food yurposes tily, and they would not ret elearfincte for shipmunte under nity othur sondtion.

On mothin the Committee rose and Tpertiod taving passed the Bill without mmentment. On motion of Ifon. Ifr, Blinhop then Bill was ordered to be
road a thlril time on to-morrow, GRAND BANK WATER CO, BHLL.
Second reading of the Grand Bamk Water Company Bill.

HON. MR. ROBINSON.-There ts probably no town in Nowfoundland that is further advancef than the town of Grand Bant, and it is as privilege either in this Leglalature or elaewhere to be able in any way to further the interests of that thiriving cantre. The peopte of Grand Bank have feamed the spirit of citizenship. Again and agaln there has been strilking illustration of that spiric. Thoy beve tared themselven, they have renderod velantary aerviet, been matuah ig hetptut, and atways self-rellant. Then there is a spirit prevaleat there of perfect unlty botween morchant and fisherman, between the supplier and the supplied, Whthout eulogizing the town untecossarily, I may sum up by saying that the town of Grand Bank might well gerve as a modet for many a clty or town in the tstand. The Bill 1 km Introducing to-day is lengthy, but it is not novel There is no necessity to say a great deal sbout it. becauec already tho House has had before it similar bills in past years. The object is the establishment of a water syetem for Grand Bank on sound business prtnciples,-an object which 1 am sure all would like to see attained in other towns. There is no country in the worta where there is better water, where there is more water, and whore the water is in so many cases so easily to be availed of. Placentia, Harbor Grace, Heart's Con tont, Car Bobigar, att hive that own ind:ply. In Granit Bank they are asiking permission to do whist other towns have done. The Bill generaliy is the вame' as previols Witer Co, Billis, With the exception to which I shall now refer. Section 2 providen thint the capital stock shall be $\$ 30,000$ with

Dower to raise it to $\$ 40,000$. The eapital stock of the Placentia Company is $\$ 16,000$, Carbonear $\$ 40,000$, lla-bor Grace $\$ 76,400$. The next seefion in which there is any change is number 13 , and this is a change whith I am sure will be welcomed. Section 13 provides for examination of the Company's affaire by tho Au ditor General. This is an entirely how section and docs not appear in any of the other sets. The next section to which 1 would draw attention 10 22 Grand Bayk owned vessels undor this section are to pay ten cents per ton and other vessels enterling that port flve cents per ton. In the Placentia Act the taxer are flve and three and one half cents respective1y. That sct exempts fishing and foasting vessels, but the Harbor Grace and Carbonear Acte include these, fund now Grand Bank aeks the same privilege, In other words, the people of that settement who, as this House knows, are an exceedingly independ-fut-class of people, are at one with the vossel owners. Sections 41, 42 and 43 do not appear in the Placentia Act; they are copled from the Carboncar Act, and provide for arbltraton, and also for such action as may the necessary in connection with the taying of plpes. I do not know of any necessity for further trespassing on the time of thi House. It we pars this Act we will be simply doing for Grand Bank what we have done for other towns, I accordingly move the fecond reading.
HON. MR. SQUIRES-I second the motion made by the hon, gentieman. Ifeel that the prosperity, enthusiasm, business sense and energy of Grand Eank and immediate nelghbourhood, to due In no small sense to the bustness ablity and fndustry of the people who occupy that section of the coast of Newfoundland. Our island,
our commerce, our elty of St- John's itself ta due in no small measure to Grand Bank, whick made revenue for this country. I am not acquainted with Grand Bank but 1 do know that the Hon. Mr. Rebinion Eimeelf has done mueh for Grand Bank and veleinity At Grand Bank they labor en der very great atrieuthes in connecs Llos. with the water auppiy. This means a ver considerable expendt (ure, much greator than Carbonear or Placentia, but they thought it better to bring in a bill providiog for a subsequent alight increase than to bring in an inadequate measure, and then hive to come to the Legtslature to make a further licrease. It to think that with the energy and buslneas ability which the Grand Bank people will put behind this venture for themeotves and for thelr own induetry, they will have a service there which will do credit to the town and to the whole island,
HON, MR. HARVEY-1 have mnch plensure in adating a word to the eutogtes of Grand Bank, as having been connected with the buclness of Grand Bank for a long time, 1 feel that everything that has been anld ta fustified. At the time when every othor place has given up the bank finhery the people of Grand Bank without much aseintance, though located in a small port, traccesstble and open, continued to prosecute that flahery successfully simply by the personial ability of the peopie there. They are undoubtedty an exampter to every other place th Newfoundland. They buitt up their buaficse with the finest possible schooners, the tinest going out to-day, and their energy and mittlative in taxtig themsolven to dredge that port a few yearn ago without any assistance to make posaiblo for achooners to enter there is a thing 1 have alowige ro-
kerded with admiration. I wish that every fishing town in the country was an energetio and selt helping as Grand Bank, and 1 have much pleasure in supporting this Bill.

HON. MR, MCGRATH-I would the to may in addition to what has already been sald that it does one good to realize the poople of Grand Bank bave unflictent falth in the future of the country that now, despite the depres ston witch the war has caused and the uncertainty as to how long it will poutinue and the effects it will lave on the future of individuals and com Enunitles they should now the found to come before the Legislature with such is splendid evidence of enterprise and pubife spirit as to seek legislathon foe a water company.

The RIll was then read a second time, and on motion of Hon.Mr. RobInson ordered to be sent to a Com: mittee of the whole House on to-morrow.

On motion of Hon. Mr. Blahod the socond reading of the Nflid. Producta Corporation Ltd. Confirmation Bill was deferred.

On motton of Hon. Mr. Anderson the motion to present a petition from the American Nfld. Pulp and Lumber Company whe withdrawn.

Hon. Mr. Job asked leave to prenont the report of the Setect Comnittee of the Sealing Bill, whtch was resd.

- On motion of Hon. Mr. Andersan vetition presented by him yesterday tilth regard to thie Bill whs read.
Hon. Mr. Biehop moved this Bill be submitted to a committee of the whole House on tomorrow,

Hon. President announced that be 4-d recelved messazes from the House of Aseembly that they had passed the amendmente sent down in and vpon the Patriotic Fand Incorporafton Bill, and the Act respecting Mun-
iefpal Affairs without amendment. Alse, that they had pased the accoupasyian bille esititled rempectirely, an Sel to continue in furse for a farther pertod Aet s Gea, Sesmion 2 , Cap, 1 entitied an Aet respecting a Tolin. teer Nores for the Colony; and an Act reapecting the prodibition of the Impartations, manufactare and sale of
 moquested the enneurrence of the Council. Also, that the fouse of As aembly hat appotnted a Selnet Consकrttee conslatlas of Mesirs Coalur. Kent, Llagd. Hon Mr. Eimergot, Hip: sfon, Moulton anal Clspp, and request eit the Couneth to appolnt a commit: trin fromi thetr simitier to coufer with rekarl to the amendments of the Coun cif In and upon the Bail sotitlent: "As Aet to regulate the mmptogment of mint mentent tin tomitim

Hen. Mr. Harvey moved then aspelntment at a Select Committee an reguented.
Hoin. T/otment ibpotitid the tot towing to evastitute the commitue: thums i, be figun, 2. Amderion, 2 Harrey, M, G. Winter, w, C. JobT T, Mittith, ant 2. 5. Hfirity.
On moties of Hen Mr, Biahes the Prohitition mill and the Votonteer Prorce Bill wete then real a first ttme, fint oriteriat to tie tiant a socibet timb on thatharreve.
On motion of IIIn. Mr. Mtuhop the \#7 Till Tridiy at tour otchact:

## XEWFOTSTHAND ITODTCTS BHIL

Biccond readfire of tie New Thund: Yind Pricuitte Corporatina Cotifirma flom liill was juerved by the Ifon. If. A. Soulres, the report of whose apeoch tar mot freat recelvet.

HON, MR. MILLEY-Mr. Premid qut. I mat conarntaiate How. Mr. Efufire tor the anit and concter mathnur fis which he has presicsted thus patter to ma todar, be has mate clearer guite a few potnts which ip to now f harn biern sunble to indecitand fuitb

There if no doubt that when this Houso groes into cummitter op this thmature there will be ample oppor tumity for the allurumition of it in enteli I wish, however, betore nneond resatar partes to emphantze two Prifuts whfoh upput' to me very forct tily when dealfie vith such import.
ant legislation as that now before us
Mrat, 1 tiave aiwaye been, and at waya will bie strungly opposed to log. islation for lonis periods of time. I consider it highly fmproper for 48 to ait hese and grant righte to any person; or corporation, for such a long term of years 1 consider thint a term of fifty years is as far as w. Thould 50 itr a contract of this lifad. It showid of course, be made possib A of renewal for a farther period, by those who will be occupying our places at that tfme AN I took around thlhouse today 1 do not think many of ue 'will bo here in fifty sears time, why then strould we tle the lande ot all onceediting legtotators in mattors of auch supreme Importance7 My second point is this, When large rights or soncesatons (auch as we are now ask(id for) are erranted, thls country phould rocefve a direct ravenue yearly for It. I don't mean by this that we ahonid demand a tax for the first year oxit two, but 1 do thithit that niere whould be provision made in this contract whereby it may be possible, at a given time to asir from this enterprfie if difect yemily tay of say twen-ty-five to seventy-five thousand dollarm, naid tax to be decided by the growth and aucecos of the Company'a konlutites 1 know it will be sald that we shall get in inditect revenue from the fahour that will be given to our seople, 1 admit thit is true. At the theme the I ata firmly convlaced that thith Colony shonid be able to collect 3 dirnet yearly tax from this and all other Corporations that apply to, and recelve frotm us concensions anabling them to orkanise and successfully condeet farge business relintions in thle coumtry. Boll Tstand paye large sume in labour, but it also pays directIy into our revelune taxes which are bised upon the successtat operntion of their warks. The legislation before ue torlay caile into being "an fadus-
try or industrien" with possibilities farinitely greater than Bell Ialand, and yet we as a people get no direet tax or contribution from it.

If this country. Mr. President. the word "deal" has come to have a very efrensive, or, to say the least, unplear fint meaning Since it was first introtinced futo our legislative language it has fincreased our debt somethins over twenty millions of dollars, and I bave been wondering if in thls "ceal" we could not incorporate something that would make the word have a meanling in this Newfoundtand of ours altogether different to that which It sow enjoys.

While speaking thus I what it to we distinetly understood that I sm in favor of all teglatation that has for the obsect the opening up of our country by the eatablishment of lerge induetrices which will give labor to our people, but I do not think it right to tuath too oulckly to the acceptance of coutracis which sive concesslons for a hundred years and which do not contribute directly to the revenue of thit country.

HON. MR. TEMPLEMAN- 1 rise to say that I agree very much with the centiment expressed by Hon. Mr. Milley. I thinic his teens in regard to rushing such a contract as this aro quite right. They have had this bill in the Lower Honse for fixe or aix weeks, and from what we hear from the introdncer in this House vie tuist rush it through in two or three minates if the House of Absembly took tive or six weeks, 1 do thet thitulk we could go through it to cet any iden of it in a fow hours or zilnutes. 1 also agree with $\mathrm{Hon} . \mathrm{Mr}$. Milley In Baying we should not give thin Company or any other the adrantage of being free of taxation for 411 these years, Every other commerclal enterprise in thli country has to pay taxes: our forefathers had to pay
taxis, stid every day wo hases to pay sux, and the Government of the thay is now teving things which they said would not be tased, awad ethil they mant to make this comiany frem of taxe for a loog aumber of yoars. and atwe them all theet onbcenilota for a bine pertiot of seare. it think with Han. Mr, Mitley fhat nith yoats in lomer esought for any euch eompany Thin te's bif thinge and, as Hon. Mtr stilley says. the word "deal' in thes Amuitr is becotuitur nather stacaloun Uur delet has inereaned at a raple rate, and now we are going to make a Mif plunge and grve eway anotber Stir allice to a lot of people who own a lat of the country today, and with that, give them everything fren that thay watt, while at the satue time tumple now in this country are faxed Fiethe up to the hilt, and a fow daye nro the flahermen were tased and aur-taxed. The people whe are supporting this bill are belige taved morn and more, and yet in the face of at thist the Gorerement is sithafterf to fthe this compary all the materfat they winh to bring is free of tasatios. Why ubvulit win to this whitn the pess then whie are thin maftrstay of ther corrstry if the prusent time are havlike their taxes-inereanedi) I thini it is very lacomsiatent on the part of the fincminist to nut ise to illjport is tili of chat kind I thisk we should dare tetten time to eenplder this ailit. and knt be espocted to go throegs in to ton ar thire taje viuc thag post tive werlat as it is the Lown Howne II will tale a dey to rand it

freedom of the citizen in matters which appertath to his own conduet enly, and do not afreet the pubtic. welfare But to every rule there fo an exeeption whick the adage says tproves the rule" This Bill will When passet, have the effect of curtall tas personal liberty. The Lestelaturs tas ite right te eurtail pernonal therIf ir it is an ureed an to loe inforioun to the publie good. The Legtulature lias then riath to curtall pernetal literiy for tin public zool. There ars many people in Nowfoumdland who use wines. Beren or upirite just as they or others wse tea, coffee or temansite und to onveat stell pursone from the une of wines, beers or splifts, sotili, inder 4ritinary decumatances be is lodefematble interfierebice sifi persobal Tlatits, bot 1 am golte sare that the irvat majority of those who mo une cheme articles will fer the wollic cood Be propared to make the periosal ase rfice of thelr ows richt, plearare and favenirses, and support thle merarare 1 rupport thls Bill mot becanse If concider that the man shen, fin a tempernte manner, malies uer of of intoxscating lipourn ie ecmmitting a critac. But because I feel that the tutal proammen of the tmportation, mamuthe tere and male of intoxicating tigwors In Newfoundlund for sill, save sucres It ental and medietnal purposers, vill be for tho material and moral uplitit of thin comaunity. I bellere temperite a wirs will gladty make the perammal earrifice for thir bunefit of those whon fer finsacial, morral, or constitutlotial pyamiss are not capotile of using, with. out abusing, these drialis To give the ficht to one man to may what another guan shall have or shall not bave on Its dinner table is puine st long way in leginfation. Were it not for the fact that intoxicatire tiquorin are to many kn instuious poismn leading to phymcal, mental and moral wreckage in mo many cases, the interferctice would be *ithout jurtification. Our hivitorg,
however, contains so many tantances of bright mimitn butoereed, happr hounen wreeked and carnims capacity lesiacied by the istempirate une of th: toxicating liquors, that the community will do weil in mavinit the woak from thelr weaknemen and in restrainiaf the vieloms from vice With that to view I foel that all puhtic apirited nem will
 of the prolifition movament I do bot propose to enter into aay discuralon (in the mocral or pirycholosical aupect of the matter. As to how fur as Act of Earlliment ean take the place of tedtividual backbone; as to how fur a emmanaily in made struager ty the removal of a tomptation-are questions sull warthy of a ptace on the eatenter oft a detatiac orcanteation, hot for me Tro denire to soe some procest matertal tmproveraent in elty conditifnas, and deelre to protect the young man who comes inta the efly from lacal Optive diestriats frems the ponallility of the debuuch which leste to the pollce station, and for this there is but ane courme. Thit courne is to ank temper. ance yeopio to bevome probibitientits, and temperate prople to beccume ex trenists for the uplitting of those whe are luatruinente of their own rute and the suffertug: sorrow, and shame of theat dependente and triende.

HON, \& D, RYAN - 1 wewh like 76 ank in nonsectlon with the Bill, what
 shiternhly tato the manufuctare of to Inees. Jerhape it in the intention to atlow it to coase fis for the purpose of manufacturint tobacto, because after prohibition pawes, malean apeclatly provided for, ho tum will be imported for the munufacturn of tobacca
On motlice the Bill was then rual is secend time and ordered to be refervend to a Comanittee of the Whote Hewter tomorrow.
Second Readiag of the Yolanteor Force Bill.

On mation of Hons. Mr, Blalioy the Bill way ruad s gicond time and ordurof to be refurred to a Cormititis it the wheie Homas on tomarrow,

SEALTNG BuLL On motlon the House went Ieto
Committee en thle Bill. Hon Mr. milley in the chatr HON. MR. BLANDFORD-Junt wine punstion with regaril to soction 2. which saye that the right of property Wr ensln killed shall cease if ther be Ept takes on boart within 24 hours Bet taken on board within 24 boums
it sot this unfatrt it may be that Menh have been rillod a lone dhatance
from a ship but owing to the shlp Menh have been rellod a lone dhatance
from a ship but owing to the ship becomlue fammed, it is not poralble to ptok them up fithin 24 hours. Would it be rifht that the hand work of the men who killed these suals nhould en for nothing? It appearn
to me to be unreasonahly and unveo nhould in for nothing? It appearn ceasurily harsh.

HON. MR. $20 \mathrm{E}-\mathrm{Thle}$ is a matter thist has been dlscuised for a long timie. This clause, 1 will ndeali in thot perfect but it is as sear to perfee toa an wn can met it. Now 1 wrould Whe to say a few wordin as to mection 3. We do pot want the pruvent the nuan whin it is rupulred, trom thix. tien proper medieat ald. But it =ill he Miticutous to keep stesmers from the seatrishery and deprive the man of thitr tatears with the conseyumal Ioun to the owners. it they are unatie to ret doctors to go to the fee Doetors, as a mattar of fact, ephnet ze got exally; it to werg alficall to get them to go, but the owneris in Thelt own latereat, will make every pomitle effort to have doctors on poard, and under thls moetion they must prove to the Mintatar of Marine and Flaberies, whel sucb in the cune that a foctor cannot bee procured. Thin to ss thuch as the owners cnit do.

#### Abstract

On motlon the House weat Isto Committee en thie Bill. Hon Mr. Mr

HON: MR, WINTER-AB a mamtier of the Beloct Committee on this Bill, 1 roald the to mention a feir of the ressond whieh prompted the emeatimint of thle mection (9). "Tt shall be uninwfut to kill say lood eenle betwemn Harch 10th, 1516 and April 13th. 1315, or brine fate aty port of the Cotony way veate wo 1 ft ed. under a penalty of $\$ 5.500$, to be recovered from the owser of ewch stesmer by any person who shall nup tor the sume" Now thls bection monat appeal to everybody an belog most unfalr and onjectionable. A steamer geos to the foe and the raptalh eote instruetions to ktll no hioode, but whilfe at the see anid oubtrary to the laitructtous received, a member of the crew litlin some hoode without the knowietpe of taptain er nemierk and, milturtur them on board. they $\begin{gathered}\text { Ire } \\ \text { trouitht to fit Intime when }\end{gathered}$ this mang nay tahn aetien against the owraere and recover tsime. It te so utterly anfatr and tuaresanabable that tho womter fir that nuct in incutof could be fnpurted the the sull. The aperalument that iy bew recommended In to alter the penaliy from $\$ 5.900$ to Triet for mith ti tremil of the tat to be recovered trom the offender by any person who shall mue for the same Yourve sot to flad out who the offerstir lis titiore prieucution and malthef Mim suffor, not the owners and it le aime propesed that any surh hood seats so 1 itheil, shatl be contiscated mint the proceeds of thate withe edvin to the Marise Disaatern Fund. This, se doubt, wili appeal to hon. memhere of the House to be a mien more fationiable anid Juint way to treat may parties who may stih to treak the law

On motion the Commiltee rone, teported progrens and hiked teave to nft agath:

HON. THE PRESIDENT-OwIBg to the Illuns of Hote Mr. Murpily 1 woukd sumest that Hon Mr. Bish op'e nume be substituted for Hife on the Jolst Committees of both Houses.

HON. MR. HARVEY- 1 beg leave to move that a measace be sent to the Houre of Assembly advinfor them that the same of Hon Mr. Blehop Firs been substituted for that of Hon. Mr Murphy on the Jofnt Commilteen of both Hauses

HON. MR. BiSHOP-1 give motioe that of to-morrove I will move for the tuapension of the 33rd Rule and all gther rales at thle House in rolation to sil Bulle nom before it or to comit before it for the remainder of the yresunt sesulion.

On motion of Blon. Mr. Eliohop the Homee adjourned till to-morrov at 4.30 of the clock.

## SATURDAY. May 2sth.

The House opened at 4.30 pm , purnuant to nillouriment.

HON. MR. BISHOP-I beg to move the muspenston of the Alul and all cther rules of thle Howes as regards sil milis Addreases and other miatfers how bitores or to come belore this Howee for the romalndar of thls 4 canlot

The motion being put wae carried.
On motion of Hen. Mr, Robltison thu Grund Bank Water Co. Bill wan read a third time, pammed, and sent to the Assembly with a thesenge accominting thoin that this Houne had prasued the Eill without amenitment.

## NEWFOUNDLAND PHODUCTS HHL.

On motion of Hon. Mr. Sculres the House Fent fato Coramittee on thili Bill Hon. Mr. Mlley in the ehair

The manuscript of Hon Mr． Bquirem＇s speech on this measare has got been recelved．］
HON．MR．MARVEY－Mr．Chair－ man， 1 think that the Committer may be cogernatuluted upon having hers a contract whith，on the wholk，is a tatr one 1 bave elven the matter －laree amount of attention and 1 think that the Cotupany and ite man． agern hare been larsoly miedudeed． Somis of the expresuloan th the orls inal cestract were ao douth whoertant nid misiendine．wid it than been as auried that the Company were amxt． ouen to obtatio water powers which they really dit mot mant．As for as my knowledge of the mathir goes they have shown un emtenently deats：
 und terande the reftita of other peo pie who mieht to operatitus aow，or whin mikeht be lie fature aperattis is thelr nelfhherhood There arv．Bow． aver．attin ene of tro peltis to the cantraet that struck men as meeding camalderatios and 1 intend now to nak aboat them：The frot tis is the proc nentile or whefule at the top of page I．As it is ererted wirs ll ealle for the Government to hold beck for five sears，water pervilegos on that part of the trainagen area of the Hemilten River named，and the meceeding five yeare during ehld the Company are to buth，the Gavimument te not to krant any wich water pawern on the itralmaze aree remuired hy the Comb pany－That， 1 frasg，is a mulatale is the ererbings and may met be aut⿱亠䒑日心 clentiy tmportant to call for sayrating the the way of a vote en the Henclu－ thon．The peint to that for the first tive years the Dovernment may re aefre that part of the draingee area on the Hamilton hiver named．and for the second fise years the whole of the crathuge newit may the reart． of．This is a mintake．Now I uup．
pose that the Gorenment ane perfeet： if antinfied that thts gotileman，Mr． Jewn crite King cotio has dembend Sle patents ip the Compoay），han e0－ vered late an anerement with the Cotapuis by whith be is atotindy pro－ tected．No dootit the Doremment Vil rem to that otherviae they ＊ould not have givee erer ail bis in．
 atre preferred that thit Company thould havn henu brourht in with a special act of lecorparation．instend of having it incorparatiod under the geteral last of the Colung it an con－ staced that that should lave pers fean the memonnpiam of Aumels thot of the Company eastite，it to mo weto any or all atinas of bustares noch as syourtin comanutian bining of willing prowal prochion of abithing den tor tertises．hey conld entir is to thir fibarr loethem and the Cors pany is virmated trom be tuention If tiont to ther comernis bere to Wruld be allowed under its Mermar． anfoum of Ameclatien to wo inte the nib butness or Emeery taithos． atit mans the prtactpoly dies so tas． al os is leried as it is in evary orher builesen of ceurne this is a the tant ponilutity，und is urilkely to be cimin o prackeat owit tere that ther tray bo to competition with ordionery prople But 1 do most enertatily ciliak．par ibe cempuption from taxa vous neptht to nifior so far as ninclas． alarn－one divilisuds am emmernind． te the farticular fintorse duall with If the Cuatroct for whith ithan facill If ene xtrib．ned ibe uriper wny to to mis wis to mulk a apectat set of trenoramation to limit the privitions kiven to the purtivitar vork the cous． pany has is havil I do mot whati to br captimas ahout the master，for the present intevtionn of the Company． of tar na 1 knam are birroat－mituted sad liberal，and thoro tn no intention
no their fart to ume their power un ju-tly or unduls. I think it to a case of tive and lot live;, and tio order to be indnced to give thelr money to carrs out thetr operations, they uoed uturual privifege. There is, however, no prospect that they will be used in in thith mumer, tind The have suffictent externarcisio the bill to ethtirely protect anybody in any essenthal, shouid they deaire to act unfair1y. This Ctoverament sire to be conkrmeulated on gotting the Farious modIffcatfosh without any pressure at all. It in essontially a matter of fair play Enotwech the Government and the Company, and the question of floating down logs through the siutens of the Company, the uge of the watern for towna or sillages that may be eetabilshed in thetr nelghborhood, the une of water powera for manufacturing were given without pressure at all. And no, 1 think the wny in which che amendmenta were brought in , Atunds to the eredte of the Government and the Company, and we fn this Chamber must have much pleasure in dolog what we can to give the Company a send off, and whah them Goi toped and success, not only for thatr own weirare, but for that of the peopie of the whole country.

RON. MR ANDERSON- Betore the Bill passes through thls stage. I Nth to say that no Bill which han erer come Into the House has had such in rink of sticerity about it as thels Bill Tho first thing that atruck me on pornaing the Biil was the libcrally and magainimity of this Company. Here no manopolles are crented; there in Ibberty for all, and I have not come across In any of the sec tlanis of the Bitl nnything to prevent people eatering finto business at any time withln the Company's domains. if they aro maxtous to take sites to baild shope or stores. Thla is not so

In the other casi, whore monopolies are evident, and I tharerore Join with Hon. Mr. Harvey in wishing them God epeed and succeas and hope to see the day when they will have $\$ 50,000$; 000 succeantully invested in the devalopment of their industrles.

HON. MR. MCGRATH-I have a few worls to asy on the Bill, but with the permiselon of the Hause will roverve them for the third reading.

On motion the Committee rose and teported having passed the Bill with pome amendments.

On motion the Bill was ordered to bo read a third time on Monday.

PROHIBITION BILL.
On motion the House went into Committee on this Bill. Hon. Mr. Winter to the Chair.

HON MR. MCGRATH - is there any reason why the fine should be two monthis in section 29 and three monthe in section 30?

HON. MR. BISHOP -1 am not aware of any reason why there ahould be a difference. As the Bill comen to us a medieal practitfoner is only 11 able to two months imprisonment and a druggist three monthis

HON. MR. MeGRATH-Section 28 has also only two months; I Buggeet making it throe monthe in all cares. White I am on the question of penal tfes might 1 call the attention of the hon. gentlemaus to section 20 whlch provides that no person shall Import under a fine of ten dollars. with no proviefon for imprisanment, at all. 1 mugest we make it throe months there alien.

HON, MR, BISHOP-The condl toms here are entirely different to 29 and 20. The one relatep to importation which is a taatter which must be very much more severely denlt with than the diapensing after the liquors aro hore Splits are not-supposed to be sold oxeeptitig for medicinal pur
poses, and thers in a miohey porality or imprteonmeat allowed, but in sec thom 24 I do not think thire should Le aiby thipetwantikut tut is thit.
mon. mh, MoefaTh-i would like to point out uloe that thit aection 20 is the onty one is the mil whiel forW4ts the tmportation of Hgeer inte the Colony, and these is ae fimpritose ment at aft. 1 auhmit, with all fue deference to my homi. frivnits sppentte. that it yos have noot the trisat of the Jeaitentury over these people, wher mitght smarele in is whotumali war. the aet will le wertitrai.
HON. MR. BISHOP -1 quile agree *Th yoe now, ano think the pernalty 16 thet

HON. MR. SQUIRES-TMITE sD' pears to be wome minunderstandige on the matter of peanily. The sevtion now roatir as followt:
"get-From the day named in the Proclamation tastued in section 17 ne perion exeept the controllet athath fm port fite the Cotony any fmeoticatime Liguors exeept for Sarramental purposex. under a peantry not lees this ten dollars, and not excendise flys tiuntred efflan=

An Act for ralatus a aum of moner by lnan for the extenation of the rall. why ayatem of the Colony.

Ah tat for rifitias as sum of monely by Ioun for the Pubtic stervice of the Colany,

All Aet to provide for a tomporary toan for publle purporien. HatLWay LOAN BULL
ith raution of Itan. Mr. Bistarp the Bhatunv laoa fili was then read a firt time:

HRN, MA. BISHOP-In maving the foon' realing of thin Bill I may nay ktht it कि the katine an tait geark act Grith the exeprime that the rite of internet pruvidied for under that Act was foly throe unit onohalf per cent; and it having hoen found by the Prime Rifisiater whes he weat to Landon that it was imponible to get meney at that fatid is temporary loan was talien trom the Colong's binikers, Glynn, Mills, Turrie a Cow and thls bill provides Iut taluing a mim of money as soon as noditions improve in the money maarInt at four per cont. Otherwise there i mu difierence I beg to move the promit ruattig of the bill.

HON. MR, KNOWLING-Is this a furtber loant

Mori. Mr. Btshop-No, the bame 2

On mition of Hon. Mr. Blehop the till laviag bees reall a second time the House weat into Commitioe of the Whote therron, Hon, Mr, Milley taking the chatr of the Cammittee.

The Committee rome and reported the Bill without amedtment, and ot tuntion of Hon. Mr Bishop, the Buth Was thin rend a thited tfren, passent. int it man ordunal to be weat to the Ascminly with a mesage that this Houm hout peomed the same irtthour traundancht

## FTHLAC SERYTCE LOAN BHL.

Hon. Mr. Binhop moved the firnt Trulting of the Bill tor raising a sum Aif moneng by inan for the public service of the Colony.

The till was read a firgt time.
HON. MA. DISHOP-In moving the berond retating. I may say that this IIII Lif tatanded to provide funds to phy the antiefpated deficit at the ond
of the current year: The money th estimated at about half a million dollars, and it is proposed to ralse it by temporary loan Srom the Bank of Montreal as outined by the Flisance Mintster in hia Budget Speech. The Loan Eill as now read provides for a loan for the short time of ten years, and it is hoped that during the currency of the Bill the war will have ended, and that we shall have returned to comething tike former condtions when our revenue will be ample and more than ample for current expenses, and abould we lave surpluses approschlog anything like those we have had withtn casent years, we shall have provided for this withth tho time allowed in the Bill. In fact should we be fortumate enough to recelve surpluses agsregating haif what we received during three or four years, the whole of this nd vavee will be provided for and not beeame a permanent debt against the Colony: The rute of inferest is reasonnble, and even if it hus to be casHed by the Bank for mors than a yenr it will not be a burden, and the interest is provided for in the Rev. enve Aet of this aession.
The Binf was then read a second time, and on motion of Hon. Mr Bishop the House went tato Committen on the Bill, Hon Mr Htimitford in the chantr.

The Committee rose and reported tho Bill without amendment.

On motion of Mon. Mr. Biahop the Bill was read a. third time and passed and was sent to the House of Aspembly with a message that this House hitd parend the eame entthoul amendment:

TEMEPORARY LOAN BILL
On motion of Hon Mar. Blahop tho Bill, "An Act to provide for the temporary loan," wan read a first time.

HON. MR. BISHOP-This bill is in relation to the loan hill we have just passed. In ingreelng to loan the moiey
the Bank of Montreal asike for detien. tures cowering the amount, and this bill is for the purpose of furaishing to tho Bank of Mantrenl as debenture for the amount during the time the loan baiay bo outatanding 1 beg to move the second reading
The fill was then roud a second time, and the Irotise went Into Comzuittee on the Eill, Hon. Mr. MeGrath in the chair

Committoes mase and reported the fit! without amendment, whercupon thit hill was read a third time, passed, und sont to the Assembly with a mesrate that this House had passed same without amendment.

On motion of Hon. Mr Bishop the Billa cotitied "An Act to amend the litw reapecting the exportation of timbor," and "An Act respecting proceedIngs agalust the Crown." were read a first time and oritered to be read a sechnt time on to-morrow.

## RESOLUTION OF SYMPATHY.

HON. MR. BISHOP. -1 have no knowledge that at any previous sesslon of the Lesfitature bas the LegIulative Council tont two of its mem: bern by denth.
On the opening day of the prosent fession the Hon James Baird and the Hon J. B. Ayre both occupled thelr seats here

The tatter we followed to hils last roating place some weeke ako, and on last evoning the long active and honourable career of Mr. Batrd came to a peacetul end.
Hon. Mr. Batrd has travelled a long Way beyond the allotted span, betng in his elishtyseveath year, and although he had retired from business zetivities for some years, ho his unth quite recently maftitained a vers active interest in Newfoandland and ite affatre Appointed to a eent in this House if 189s. Mr. Bafrat atways civlnced a keen interest in all matters affeeting the welfare of this country, and often brought to betir upon ques:
tuins ander discuspton uffacting the intorist of the country, the keen sualytical juigment for shich be was notid, and throwgt wadeh be hecame such a prominent figure th the commerchat Itth of St. Johin's.

As a busthere mas the Hon. James Hasint has ntways boen perthaps the most natable example of everusa that whe tivioumit fil thiti country durtuik the past hate century. Though a layal Scotchman, be has been no lean a notnhte Newfonndlander, so promtonent Tha he been the att of our citumerchat life und particuliarly ta the entabliahment nud difection of weversl of our most prominent local induatries A man roted for finiusiry and integrity he has been a cosspicuous and unlvernally respected cltikes of SL. Johnte tor ever neventy y ars, and ond who tuid fown his armour onty when well past four score years of active induatry. Snch minh form the mont valsable anaet ot any country, I beg to mave the fullowist resolutions:-
Remolved,-That the Loginlative Couscil recorils with deep rogret the death of the fion James Baird, inte thember of thls House, whone decease Jan deprivad the Councll of an excellent mamber and the community of an whtnemed citiann; ond one who huld a himbs place in the pubtic, noclat, comanerctal anal infustrial ure of the Cotary:

Itrantred-That the Council sithcurely syausathfarn with the famely of the Hoa Jamen Hinlrd to the hernatrempat; and that a capy of thene Ifraniutiona be trasamitted to them
 Pounic

HON. TAR. ANDERSON- 1 stiould tike nt this occarion to makn a tew tretef otrictuttotic on the remotutions Just before suhmitued to this Howse. I was brought to that Colony by the hon. seatieman who has Junt pansed to his pert, 10 yetril men lint willer: Duritg

211 the perlod of my assoclations with Ziun, I alwayn found him fust, uprizht and straight in every particular. I entimly concur with everything the t ader of the Government has sail. In fooking ever the list stnce I have had IV neat in this House, no less than 8 nambera have departed. As has been fatd, this for the first time that two members have passod away during one nession. We never know whe will be next, but I hope all of us will be aparfd many years to come, and the lesson that our esteemed and honourable friead has left for us is one we might well follow.

HON, MINISTER OF JUSTICE1 truat if will not be considered Improper on the part of the youngest member of this House to add a Ford of appreclation and eateem. The Hon. Jnmes Balnd has passed away st the patural close of a distingulshed carreer. His 87 yeare did not prevent bls attendance at this Chamber to but a few whekn ago and that fact alone evfienced his aetivity of mind and continuing Interent in the welfare of hir adopted home. His life was a ftrenuour one, given not merely to hla own pernonal intereste but also in zo amall mensure to the upbuilding and wise governing of the Colony.

His career hat been one of great pirsounl muccese. His big brain. warm linart and untiring induatry would have compelled succeas in atiy line of activity whlch he would Inifertake thut it is not merely in the recurds of hiz own Ephere of Jormonal commercial activitles that Je has achleved succeps. He has written hle nanie In ietters of gold In the financlal and Intuatrial hiftory of the Colony. His success has fot boen nuccess at the expense of otheril and of the Colony but a muecean which has brought pronperity to others in its train. These of un who
are of a younger generation can eee the magnitude of the work of the great captalns of industry who have risen In our midst, men who liave borne the weight of Newfoundiand's commerce: and of them all the Hon. James Malrd was one of the ereatest. His mental activity and resourcefulneas, ble breadth of vision and fnsight tnto affalin both of commerce and of atate ranked him as a man of worth not merely in the commercial enterprises with which the was lamtlfled but also in the publie sad potitical splere with shich his activities were continuously associated.

His prospertty has been the prosperity of the city in which his businees interests were centred, and the dovelopment of the trade of the Colony has been materlally helped by the many undertakings with which his name has been assoriated

The success of our city and our colony depends in no small mearure upon the integrity and zeal, the ability and enterprise of smeh men as the Hon. James Bolrd rud the Hon. John Ayre both of whom have so recently laid down the weapons of eartbly combat for a sphare Where perchance the ability, fategrity and zoal of which they gatned such wisdom here mar have scope for $\pi$ fuller developmient.

HON. MR BIBHOP As a further mark of respect to our deceased brother member, I beg to move that this House adjourn tfll to-morrow at 4.30 ar after the funeral.
The House adjourned accordingly,

## TUESDAY, June 1.

Tho House met at 3 p.m., purnuant to adjournment.
N1GWFOUNDL AND PRODUCTS BILA,
Third reading of Newfoundland Pro. ductis Corporation Bill.

HON. MR. MCGRATH-Before the sill is read a third time. Mr. President. 1 would avail of the opportunity to offer some oluservations on the measure which 1 had intended to tnake previously, but which, owing to the fact that the Bill invited so Ifttle eriticlam, 1 have reserved until this atage. That the messure has gone Chrough thie House with comparatively no oppocition, is, I take It, an evidence that the changes made in the Lower Clamiber during the past month. bive bees such as to render it acceptable to both Hruses, and that being 60,1 think wh jave reason to congratuinte oursolves on the part the Legislature has taken towards securthig for the country an industrial enterpritie catcutated to te of such material atal abtiding benpfit. As origiaally preseatent, the Bill provoked subetantial opposition, much of which. there is reason to thitnte, arose from malstumleratandings as to the purpose of some of its elanses, and to the Impreasion. emphasizeal in the other Chamber, that in certalin of its fea. tures it simed at the absorption of Induvtries already exfating and befog carried on by other corporations.

Hewerer, the rendthess shown by the prowoters of the p-ofected enten prise to withdraw from the Bill entirely the clauses whicb were held to conver rach a meaning proves that there whs really no etich Intention; uko the Covernment on Its part. by Ite readinene to necept all reasomabto amendments and by permitting the dehate on the mensure to extend over a longer reerlod that that attending any previout emactumet in the bletory of the Colony, showed its good falth ani Its purpose to avolve from the resulting dincussions much an onactmes: es would minet the v'sws of the publio Eenerally and safegunrd th: richts of the country, while at th.
tame time atfording liberal cart ceislune to those who were nenking faclililes to entatimin this enien. prise.

Thist is fate enogifi from some viewg.frits liwt it must nut be forgotten t it iviry curporatloa promoelis entiririmas of this kinid, demande the writ urmont it thinks it porsible to accure, while wory Government, on fhic other humi. confronted with sarh proposula, trien fo mulbe them effective tith the granting of $n s$ few econces thiss as passible. When the hon. genthomein wha luye previoualy apoken it this Roune lire Intereated in companthes of unturprimes, they work on the tume pritncipis. They make the larefuef deanuds pobilble, not, perhaps, exthetige til gut them all concedoct, tiut tope that iventually by compromise
and concessions on bath sides, a worlable arransement can the effected Thife is the apirit in which thie meanure tias been deatt with from boith blites, ams the outcome, it seenis to me, is lididily creditable to all concerned.

One critictam wo hare heard is that the concession should not outlist fifty years. Well, all I have to may to that Is, that the genttemen who advinced it here would not go into business on Water Street to-morrow on property held under a 50 year lease, mueh lews undertake to pit thousants of Collare Into the conistraction of bultalnge and the catablishment of a plant for the taunching of a new industry if the tand was fiotd under a tease of onty rifty years.

My hon. friead. Mr. Anderion, at our last sitting, in his commentis of thie Bill, prafsed the Fertilizer Company for not erenting an monopoly as the Harmswortha did. thave no brief for the Harmaworths, but I am somowhat famillar with the condtrons whitet innuenced them to create a monopoly at Grand Fails in some respects, and I think that their reasons do meseh to Juatify them in the coureo they took. It is true that they created a mono poly tu dry goods, grocerles, prorlastons, and other business, retained control over the housidg waterage, sewerage and sanitation syatems, the supplying of tullk, mest, ete, and, fo nther ways, made those liviag in the town dependent upon the Company to an extent not hevit on this side of the Allantie. The-reissons ware thit they wished to provent underirabie enterorisen being started, unilesirable methode being put into affect, underitable people setting in thatr town. This policy ls mave or less gevernt on the other side of the water; but they did not adopt it; nor is it adopted there, for purpiases of making profit For tastance, they buit their owa houses, assesed their own rentals, re-
gulated their own tenants. But they have made no proflt whatevor out of this side of the buslneas. Indeed, both there and at Bimhop's Falls the return from the frventment in houses is not 2 per cent. The poason they did it was that they mught bave control of the eniftation of the village and be able to enforoe thelr own regulations. In the sume way, while they established drapery and grocery stores, they did not do this to make a proflt, but accually turned over whatever profitu accrued to these businusees to a town committeo chosen by the people themtelvos, who were the equivalent of the Muntipal Council is this city, and who expended this and other funds coming Into their hands for the general good. Stmilarly they controlled the milk supply to provent cattle, etc. belng kept in the viliage, and may be, tuberculoue mithe from bolig supplfed; but, on the other band, they ostablished a farm at Rashy. Tond, three miles from the town and stocked it with the finest of Engliah cattle, facluding a bull that had tuken thind place at the Royat Agricultural ahow in Enghand the year it way broukht out here, and on this form they located two capable Figglieh farmers to run it. I am not prepared to alay that the system gave satisfaction. One member speaking on thls subject in the Lower Houme tho other evoning, sald that ft might ho perhapa better than our own way of dolne thinus on this side of the weter, but the people did not like it. That I think describes the situation rary ncourately The people did not the it, and ultimately the Harms worth Company recognized this fact. and withdres from the position in some resperts. Thas transferred their stores Io a St John's Company, under a conruact that this Cotapany would sell at st John's prices They turned over their meat and provision bustress, for which they had Inetallod splendid re
frigeration, to another Company on the same basis. They now allow any workman who wishes to have his own house, to belld it on plens to be approved by the town authorlties: Juat as lhere in St Jolan's with the Munielpal Council, and only demand a ground rent of 20 cents por year in order to nissert their mupreme authority. The Company, on its own account, has bullt a uplendid school. superior to nnything in the Colony outalde of $8 t$. Johnth, which it maintaine at is cont of nome thousanifs of dollarn a year. It hins atso provided a hospital at somel what simitar cosi, which far matntafio ed on the name scaie of perfection. It has eutabliehed a fine club room, too, nud 1 make beld to any that it would bie al forturate thing for thite Colony it we hiod many pther towns as well rum ind as hyglenically up to date als Grand Falle.

My hon. friend also tuade some comb mont on the uature of the concembions and the vaitnesa of the land granta given to the Forttiver Company by this measure, which the deplored; but It is interesting to compare this manar ure with the Harmaworth Bill. The Harmiworths had five years within which to expend $\$ 250.000$, and fifteen thore years in whith to spend $\$ 750,000$. If other words. they had twenty years whein whifh to expend is million dol frete. The Bill now before us requirea that the Fertilizer Company shall thent flee mittion đotlars th thet तfilit five years in this Colony, ten million: within the next five years in Labrailor, and five million dollars in the foftowitg flve years in thit Catons bgatn, or, the all, would apend fittoen million dollars in fifteen yearn, white the firmisworths aeed spend hut a niftuon fil twenty years.

Surely this must be our all-sufficient anmer to the arzument that the coneesniome granted now are toe kseat. Anctien, und mait p-्चull ir titsuppere
humcion regurding thie Bill is that the Colony pives thie Fertlizer Company latese urear of tanit. it emt protumbly he n aurpriee to mosit members of this Howes when I say, and the facts will boar me out, that the Colony is not Fiving them an acere of land. All the lande that are boing given to them tre lands aiready held by the RefdNrid Company, and the tite of which is merely further guaranteed by this zecasure, The asme applfes to water powera. Whatever powern they are fetting on the Humber River are watAT powars thit wery given the Reld Company proviously, and it in merely the risht of the Itelide to thase water bowers and the ceeston of them from the Retd Comping to the Ferillizer Company that if conifirmed by this Bill. Anything elae the Pertlizer Co. may get is merely a right to take cortain lands und certain water powers teceseary to the carrging out of thelr operations on the comprehensive seale they propome, but with regarit to these nither lande and water powers they can onty toke them by comporiating the present boldera:

Tider thene circamatances it is unfair to argue that vaat mablic righta are being deeded-orar to these people ror nothing it is quite true that comghinint has been marte that the rights of tnilivifunis pobsessinig certain thalmn on property in the Humber Walley may be offected by this Bill, but on the othar hand it will hardly be sterfously dieputed that if an industry (f twelty million dollars is to be fivproduced, those who are prepared to fel it our fort and to fureat that money 4 mol thitited to be protected againat the exactions of parties who many be meroly uning their nominal possesslon of certaln territory withln that trea to beld up such an enterprise until they nete pald extravarant suma for what Hehte, only shadowy in some Hustancen, they may possess there. The
utmost such people can fairly claim is that they shall be bought out at a price to be fixed by arbitration, and that provistion is embodied in this Bill.

The aspect of this problem which mont appealod to me was whether the demand for fertilizers throughout the world was sufficfently great to make possibte the establishment of wich an enterprise in this Colony with aay reasonable prospect of succoas. Some atudy of the matter soon convinced tme tt was. In a little voluthe on "Agriculture," by Professor Summerville, in the Home Univereity ulbrary, he atates that "ex. cept under thinsuat circumstances, the only three aubstances that the furmor requires to consider, from the polnt of vlew of manuring are nitrogon, phosphorus, and potassium the two latter being usually denignated undor the name of thetr oxideg and called, respectively, phosphorle seld and potash." The firat and last of these subntances, nftrogen and potasslum, are obtainable very extensively in the form of natural salta-the nitrates of Chill and Peri and the potash of Germany and, knowing that thls matter was under discussion, I was struek, When then war began, by the fact that one of the first cablegrams from Germany following the outbreak of hoatilitica, recounted that the German Relchatag, at tie spectal sesston convened in the firat week of the war, consildered only two aubjecta, finance and fertilizera, making provistion to cope with financlal problems that were invelved, and providing against the export of potash from the German Empire. As many people know, potash ls one of the chiof items of export of that country. in in little book on "Industrial Germany," by Profeasor W. H. Dawson, wheh I bought after the war began, I found mach matertal of interoat in regard to the potash
export of Qermany: On page 146 it sives the value of potach mines now korking at $\sum 35,000,000$ and of those about to be opened, $£ 10,000,000$ and it sayy "it is suggested that if the induatry were nationalized, for the State han a substantial interest in the monopoly which at present exlsts, and if, fastead of potash being mined in over a. hundred placea, in many cases under ungeonomic conditions, it were ralsed orly in a limited number of efficlent works, these belng operated at thelr full capacity, there would be an immediate surplus of from two to two and a half million on a sale of elight million pounds, rising in the course of a few yeare to thrics that amount, as the use of potash for manurial purposes tmereased."

On page 124 he deacribes at tength the history of the potash eynalicate. which the says "is the most powerful in the chemical industry of Germany, existing since 1879. Potash mining has increased so rapidly that the number of works has grown from 68 to 80 and the number of shafts from 26 to 97 . while over 100 additional shatts are betng sunk, and so colossal in this industry that the syndicate sets apart a large sum for the purpose of advertising both at home and abroad the value of potash for agri. cultural purposee, the expenditure of this mosey being loft to the Federal Counell and $£ 230,000$ being expended fa thif way in 1911."
Ae a aidelight on this matter, it may not be amles to point out that in the despatches from Berlin on January ? of the present year, it was stated that a suit win being brought against the Imperlal Chancellor, Bethmann Hol. wregs, by the German Potash Syadleate domanding from him the return of 82 , 000,000 , torming the so-called propeganda fund for advertiaing the merits of the German fertilizer at home and
abrosd, whleh amount wna rassed by impostag a tax on all potash mined in Germany under the law of 1919 , which law was deitgnibd to conzorve the natienal reservei of potash in Germany to ensure the prosperity of the Germun Indistry and to prevent Americans from eetitig a too chiosp supply. But it was atated that this had been \& partlat fallure, that new potain mines were batig conitantly opened up and that the time was contig when tho bars to the freer and cheaper production of potmit must be lowered, unless more effective methods of discouraging potash mining in Germany are devisod.
Aesoon as tho war began, Germany, as 1 have nlready stated, at once prohitited the export of potash and a problem of no small international interest has uthce been created in consequence owing to the fact that the worid at large wonld be left without supplies of this substance. Various expedtents have theet suegereted. The Canodlan weekly cotumerefal pulletin of January II quotes an exhanstive article from the Gheszow Herald on the ush of scavelit is in subistfute. The International Agricultural Jour aal for April reviaws at aome length a special publication on the new potant tepositis fre Spaln. Thit Amertcint Department of Agriculture hes sent experta Uroadeast over the United Stater reekias potach deposits, and the Saturisay Eiventris Post of Mot. 7 . commenting on thila matter, points out that Franklyn K. Lane Becretary of the Iaterion, has shown that large deposits of potish are known to exist in Culiforniat but have not been worked because uniler free competstlon with the huge and fully developed deposits of Germany, thero seemed to be no grent tnidueement to work them, but with the Germin, zupply eut off and the price consequently ad.
vaneed, potaith mining becomes a more tempting field here, and. in fact. in the latter part of Soptomber it was arnouneed that the first American potaik made is California would be reudy for the market early in the New Year."
With regard now to nitrogen, I need only gay that thite element as a fertilteer te obtained either through nis tural nitrates in various countrlea, auch as Chilf and Perv, or through artificial nitrates producod in various waye, and the magnitude of the South American export of nitrate is an evidence of what a large part this ferthllaing arent played in the agricultural industry of the world. A recent publication in Canada showe that the worlid's consumption of nitrate of sodin from South Ameriea has grown from 100 tong in 1830 to 150,000 tons In 1904 and now totalling more than $2,500,000$ tons. In a recent pubilication Mr. Frank G. Carpenter, a well known journallst describling (trip to South America he in about to take says: "I want to inveatigate the guaso tstands, off the coast of Peris, and alno go tnto the nitrate fields of the great South American desert, which now so largely sup. ply the nitrosen tor our American farms Thoce decerta have already ytelded several hundred million dolfura' worth of that fertlizer, and they are now turning out nitrate of soda by the blilions of pounds. As ft la now we are taling one fifth of the whole produet, and there is scarcety a tive orchardist or market gardener In our country who does aot nourlsh his crops with plant food from Chill 1 want to go out finto the desert and visit the mines, anc tell you how the nttrates look in the ground. As to the gusno islemle, they are scattered along the Pacifle coast some dittance above
where the aitrate desert besing. They are froquented by milliots of birdis, mot the dropinimi truir thase trive at ready soduced imore than iwelve milh lina lote of manure as rich as that of your beibuane. Thuy liave braught futs the treanare viatts of Pera same thing ever a betilied dollars, and althaurk almost eahausted are still yivitury Ewhm"

Anothor fortis of chemical mixuure of nitrogesous tertiliter tie galphate of ammonia, which is sery exteratvely tuend in whrlown eutmitices, wnt metably is the Dritish Isles. A publication of signed to show the alivantagen of this fertilizet maye there is no kind of pinnt ifte whtat will not benteft from a gonerous application of sulphate of ummunia, for there in no isint of noll which will not be greatly eariched by thin unte. Nitromon many ber mita to bo tndirecty the ataff of life because it ta the vital principie in the formar tion of the nourlatiment of crope.
 phate of nmmonia in an toeal form in which to apply aitrozen. It fende the crop throurth all ita stagen of arowth. white pruverting suy exuern of ton or coarsenties through over-sttuniation. From what I ean ascertain, it tipestrs that Mre Wiltron'rim argument in that authticte at ammonlic eminedtus a large perceatape of material which is eot reaily ef value in atimulatios the growth of plante but is mercity the whitcte of cintilmir ty whis the thecivine element is bandled fuat as ousar, mawdust, or oand la meed to abworb

fint Sumpervilie is not mo caully accurbilubient, anif liere it io that Mr. Trition't leduaity we of the greatent promias, Mimmrto it has been suppliod Eonotly by auper-plaophate of lime.oltelsed by tivatier pbusphatie rook: Bith wigutine nel4; and by baste ztar: which or mont people knew, is a by Irofuat et thi masuficture of steel fromi the plopphoran. in malting steel the ploopphornar has to be elimimated. azd this is done hy biomier air throush the taitton iran until all the plans fhorth is corverted tuto phopphorie Fold by ansortarion with llye and this It then taken off as phosphatic lime In the slay fas the murtace of the melteid metal This is auhsequently eround tato powder and applled to the f tul an manure All of theae artieles of fertiliser have been used in thil Colony, morv or leas hut Mri Willeon'a flatm tis that tiln proviact, phosphate of ammonia, will in due course, and at so dintant date, ampernode the other thementh altomether, fin moat canca - biere artificial fertilizers are used.

It in clear, then, that there is ample eromail for belloting that thle profect cun trcomm if oummarciaf mecters. Atr. Wilton proposes to erurh plowThato roxk, extruct the plonomboric told thervfrom. comblut it with lime and ammentia and theroby profuce a \#alarial that sill meut the requ're: fiunts of the warth io this respect to a dreren wut wherwiec powable. Mort cour, the war in proptiting a reason fir the criation of this enterprise Thich miebt thot ochervian exirt. At fir prozet times the chlet srea y hesen plosplate rock is obtained, is the weaters athore of the Fharide Penpirche, frontios on the Galf of Mexice. Tere thore sm numerous beacties of bebliten, mominwhat like our beaches to funception Zay, whela pelblea are armed phouphinte rrelk Steam shovela Ere put tul work on them and the merterial fir scooped up and thrust tato
the folds of stemmers and then it is taken to localities where factories are established, and the rock is crushed and the phosphoric aeid extrneted. The only other place it appears where phosphate rock exists in anything ithe similar quantity, is in Northern Africa, in the territory now controlled by Frances Thus the argument is adfanced in some quartere that one outcome of the war will be thit the German potash and busic slag Industries, as fertilizer products, will be wiped out after the astrugale, because on the one hand Hritain ie planning to use a higher grade of tron ore from Brazil, which does not yleld as much phosphorms and therefore will teave less basle slag as a by product, consequently giving room for a greater anpply of materlale, such as Mr. Wilson proposes to manufacture, and, on the other hand, because the pollicy of both France and England will likely be atter the war to discourage trade with Germany as much as possible. Infleed, so much is this realized that American technical fournals are making a protest agalnst the United States continuing to permit the unrestricted export of pulp wood, on the ground that if the raw materinl is retained at home domentic manufacturea will be kreatly silmulated. It ts apparent, however, with regard to the local Industry proposed under thls bill that If, which is unlifely at present, the United States were to atop its export of phosphate rock, other material of equally good quality coutd be obtainad from Northern Africa and the Industry therefore be permanently assured in that way.

Moreover, In addition to the making of fertilizer, which is the princtpal fenture of the enterprise, It is also proposed to manufacture wood pulp of a very stupertor quality, for use In making books, as compared with that Which is at present made in the Col.
ony at Grund Falls and Bishop's Falls, rind which is used for ordinary newspaper. Besidea that, it is Hikewise in contemplation to undertake the manufacture of cement from the waste materlal from the output of the furnaces, and 1 belleve it is estimated that about 8.500 barrels dally of the finest cement could be produced from this waste material at the Weat Coast plant, which is about three times the output of the largest cement-maktng factory in Cenada to-day, that at Ot tawa. Indeed, the mere item of making barrels for such a quantity of cement would be an induatry of great magnitude in Itself, prohably equalling the whole of our present lambering findustry. Furthermoro, it must not he forgotten that in the converaion of coal into coke, certain by-producte are avallable which are coming into more general use lately. One of these ts toluol, which we have read and hoard much about latterly, awing to Its belag an ingradient in the manufacture of high explosives for use in torpedoes and great suns. Toluol is t white licuid somewhat like gasolene. but produced at a different temperature, and this toluol, when properiy treated by mixing it with strong acids and by other processes, turns Into imall clear crystale of enormous explosive power, but only explodable by the use of special contrivances, thus making it very safe to store and handle qualities of spectal value in war time. As many of our readers know, toluol if now being made at the coke overs of the Dominton Steel Com: pany's plant at Sydney and with other fingredients to form tri-nitro-toluolene, is beling every dia more largely utilfred by the British and other armies for exploeive purposes, it is not impossible that this may also be made at the West Coast works.

The next question which arises then, it secma to meis whether Mr. WIIson fs a man likely to bring auch projecta
to a successtul issue. In thls connec tion I milght say that a gentleman in this Colony, a momber of the Canadfan Soclety of Civil Engineers, has ricently sent me a copy of a vublication of that Society for last year, wherein is reported at length a paper "Maiding our Water Powers Valuable," by Mr. Arthur Surveyer, In which that observer deals exhaustively with the varfous uses to which energy derived in this fashion is applicable Among the products so obtainable, he mentions calclum carbide, which will be one of the principal elements in the manufacture of the proposed phosphate of ammonit in thits Colony, and as to that he says "the Induatry of calclum carbide was started in 1805 ,with Mr . Willeon, of Ottawa, as one of the ploneers. There aro now over fifty plants eituated all over the world capable of absorbing $350,000 \mathrm{~h} . \mathrm{p}$. In their operation, and the world's production of calclum carblde for 1910 was 250 . 000 tons; it was 300,000 tons in 1912; and It increased to 340,000 in 1913 . The prineipal experting countries are Sweden, Norway, Switzerland and United States, the latter producing in 191370,000 tons and exporting 15,000 tons mostly to South and Central Africa, where the demand for acetylene house lighting is raplity increasing. Germany, England. Australla and the South American republics are chief importers of this product, while Canada, with three plants prodices about 12,000 tons a year, half of which is exported, these three plants having been recently merged under the name of The Canadian Carbide Company with a capital of two million dollare." Of this Company Mr. Willison is, I understand, the President, and it is satd he proposes it to make its base of operations in Newfoundland. There is much matter of intorest in throwing uew light upon this contemplateid fertilizer enterprise in the paper in
quegtion and in the discussion thereon by a number of other stadents of this problem but it is unnecessary that 1 should read pages of such matter at the preeent time. What I have quoted will, 1 think, surfice to show that in the present instance we are not dealling with a mere company promoter who has come along to try and get a concession from us to farm out to nomobody else, as has been unfortunately too often our experlence in the past. Mr. Willsoa, Judging from hls record, is a sclentist of repute, with a business capactity and experlence, the outcome of many years of assoclation with large commercial enterprises in America and Canada, and therefore we may take it that in coming here with thle profect he means busluess.

It being therefore very evident that this enterprise is both feasible and Hikely to be commorctatiy profitable, the next question that arises is, what concessions is this Colony asked to give in order to secure the establishment of such an enterprise within its borders. These concesslons, in the shapo of certain rights on the Weat Coast, In the shape, at the outset, of other rights on the East Coast since abandoned; and in the shape of Fights on Labrador, have been dis. cussed in such detall in the other Chamber, and through the newspapers that it is unnecessary for me to devote much attention to them here. I will content myself with merely bay--ing, as 1 remarked at the outset, that we have not given, in this isiand itself, at any rate, either lands or water powers or any other public assets to the Company, All we have done is to provide legal processes by which the Company can aequire lands, water powers, or other rights held to bo essential to the estahitshing of the enterprises, when in the opinfon of the Governor in Councll it is necessary that the Company should have these.

On Labrador, it ts true, we have gives rights to a water power fo Hamilton Inlet that has been milde the subject of criticiam, bat whife that water power may in thine attain the value which some parties sot upon it, the faot romaine that at present there is no ovid enco of any prospect of nuch a water power in such is remote locality beins commercially exploltod, and unlens this Company ill able to extund its operaHons to Latirndor, it is very doubttai) If that water power will be turned to commerclal use in our time. More: over ft mint be remembered that oporationa on Labrador are not likely to be attempted untt thle enterprite proves a paying ofie tti Newfound. land, and that even it they are succersful in Newfoundland it by no moans follows that the Company will he prepared to ga to Labrador at some future time, though the Colony is certain to gain the bencfit of a proper survey of the Hamilton Inlet area In the meantime under the termis of the contraet, which mintorial may be of value at nome future date ag a factor fin negotinting is contract for some other purpose.

Among the crittclams drected at the present Bill to the fact that the Company has froedom from taxation, That, 1 thtnk, all of tie woutd prefer to see ellminated from the measure, but apparently such could not be got, and that being so the quaetion the Government tind to ask themsetver wus whether they would sacrifice the profect or grant this conceasion. They chone the latticr courte, and in Justlfication for them, It muat be rememi bered that the Anglo-American Telo graph Company got such a corticenston nearly suxty years azo, and that the Blackmint contract; the Reld contract; and the Harmaworth contract, ot mora recput years all contained sfillar provistons,
Another complalat fis that the Com-
piny to usempt from the municipal taxation on its mills and town sites. That toos would be very desirable not to have in the measure, but the same difliculty arose. The Company claimed elmilar exemptiona to those granted provions contractors contemplating enterprisen amongst us, and the Government took the view that it was bet ter to grant auch concesslons and enaure, as far as could powelbly be onsurve, the eetrbitehment of this industry here Moreover, with regard to this Penture of the matter it must not be forgotten that any Company of this lind locating in Newfoundlund will hava to bulla ita own town and provide lts own muntetpal facilities if it hopes to secure men to work in Its mille. The Harmiworths had to do It, in I-hnve niready pointed out. They went tuto the wilderuess to establish an tndustry calling for a certaln atnount of highly-technical labor and operatives from large American centres where every modorn improvement incldent to living in up-to-date towns exfated. Therefore, to retain these mea the Harmsworth Company had to bring out an eminent Englist municlpal architect, who planned tho town of Grand Falle. They thad to provide houseg of a clase auperlor, taken nll in all, to those in any othet part of the country outside St. John'ia. Next they had to bring out an eminent Englith bacteriologist to geudy the whole problem of the water supply when a typhold eptidemic occurred, and thls involved in time, the installatlou of a system of sand filtration and hydrochlorie treatmont of sill the witer used in thet town. I eny, therefore, that if this Company comen In and establishes $\mathrm{If}_{\mathrm{g}}$ industry, it witi be obliged to create a town out of nothing, with all the accassorles that go to make modern exiatence endurablegood houshs, waterage and sewerage, electric lighting, hospituls, achools,
elub rooms and places ot Amasament

HON MEL BISHOP-The Bill which ** beve last ernalitering. tho Prop durte nit, has toes mo steniralty and abuatively refiered to by Hinn Mr Eiclinith shast it semms uneromsary ti whl awytine eloc At thet aame tume it might bet meld with evigent to if and indiond it is sa important, and tie burduean whilith it las eqpected wtit Be undertakist in the Bill in so vant, that it in doserving of the very tullost eonniderstives of thr liph. manmloern lerv, whd it has been to me, at tr\# erontine che Dovermmerst partioulars 1. pleasiger to mote the atrimite of all Itraritine the fith down to the lant. And miarifos Whille mecocualos the timhe it ocarne of the hoe matteman
 Ihat he shauld have felt tuyelled to It men that this Bill should the on the thlite for slx momths Not street the Hirmpnarti mil. sa called, wae conbulered bere, liase wes had a hill ot

of such magnitude, and no bill since that has received the discussion given this Bill in the lower branch of the Leglstature, It has been discussed from every standpoint; has been criticleed day after day for some time before reaching this chamber. PracticalIy no bill has ever been discussed here more important to the future of Newfoundland than this Produets Bill. it is not often that we are called on to deal with bills involving the expenditure of millions of dollars, and now when such an adivanced enterprise is profecter, and we are asked to make concessions th the Company who purpose to come here and spend euch vast sums of money, the attitude of certain people, not in this chamber, has been such as to be exceedingly regrettade to all lovers of this country 1 can quite understand why any man with proper patriotiem would be anxious to see that no concesslons shoutd be given, and no terms be permitted which would bear heavily on the Colony and Its intereats, and on future generations, but, str, I submit, with all due deference, that there is nothing remaining in this Bill which any honest man, I mean any honest critic, can Justly object to. The concessions, first of all, as has been exptained by Hon. Mr. McGrath, as regards the water powers in thifs country, Junction Brook, Is a matter with which the Government had nothing whatever to do. These were conveyed to the Reld Newfoundland Company by a former Government, and I am not concerned with the actions of that Government in conveying those water powers. The present Bill merely confirms the transfer of those water powers. As regards the timber areas, the Colony or the Government has nothing to do with that We do give them the right to quarry limestone which has lain there for centuries, and has yielded nothing to the Colony, and never will, unlese
thls Company or gome other comes and develops an enterprise there. The concession of freedom from taxation as has been shown by Hon. Mr. McGrath, amounts to nothing, because if these people lay out a town they must of necessity give such conditions there as will induce people to reside there, and which will be in keeping with modern civilization. If they want those conveniences they must provide them themselves, and it is a matter of no consequence to this country whether they are free from munfilpal taxntion or not. We have heard a great deal, Mr. President, about the enormous concossions convoyed, but we all know very well that no Company will come in here and spend enormous sums of money unless they get reasonable protection and concesstons, but if sir, what we are now conveying to the Products Company is hall as valuable as some persons would make us believe, surely we will have no longer to wait for capitaifste to come to this country and develop every resource we possess. The water power on Labrador, the Hamilton River, flowing there for centuries and centuries, better known In the Dominion of Canada, if not in the United States than here, is idie, and yet nutll withln the last few months, no one has been around there or thought it worth visiting to see what could be developed there. In sayligg that no one has visited the Muskrat Falls powers, or the powers on the Hamilton River, I mean with the Idea of ostablishing any considernble enterprise there. It is true, however, that a water power right was given to a party on the Muskrat Falls -an excluaive right was kiven some years ngo by a prevlous Government -but we all know nothing hns beon done there, no enterprise started there or anything done to improve that water power. With those who talk
abont secrificing the rights of the country I have no patlence, and 1 consider that those who state that the water powers which are being conveyed to this Company are worth one humdred and fifty millions of dollars are fit subjects for an fnsane asylum. If this Company are getting concessions to establish a bustness from which they are going to obtatn enormous profits, and the expendifure of enormons sums of money presupposes that there will be profits, why should they not have them? What will be lost by their gain? Nothing whatever, I submit; but their success must be ours. They cannot make large revenues out of handing the products of this country without this Calony obtaining direct benefit. The attitude, however, of opponents of the measure, I repeat, does not extend to the members of this House, and it is very gratifying to me that it has not. I consider that It ahould be a prond day for Newfoundland when the first sod is turned for the laying down of the plant projected by the Newfoundland Products Corporation, and 1 for one wish it all the success it can obtaln.

HON. MR. HARVEY-I had not meant to say anything on thle third reading, but would like to refor to the position, with which anyone can aympathize, taken by Hon. Mr. Ryan. Mr. Ryan is afraid of the effect of this development on future generations, frightened at the ninety-nine years' lease. Well, there is much to be satd for that point of view, but with future gonerations in our memory we must atso constder this point-that the best thing to do to help future generations Is to cause direct development to-day. to bring in wealth and prosperity today, to provide means for educating and looking after posterlty, and as my hon. friend on my right has stated, if we nllow our asgets to run to geed, and if we allow them to lie idle year after
year, we are not doing our duty to pesterity; and my riew is that whife I sympathize with that position, it is purely a matter of jadgment whether to develop now or gamble on the chasce of development in the future. for it is a gamble. We do not know what other comntries may develop, or what may happen if we do not develop now, and our duty calls for the exercise of every effort for development, not only in the interest of the people of to-day, but of pesterity Itsalf, which these gentlemen are so much exercised about, though not wisely, i think.

On motion of Hon, Mr. Squires, the dehate on this mensure was adjourned until to-morrow afternoon.

## PROHIBITION BILL

On motion of Hon. Mr. Bishop, the House went into Committee on the Prohibition BII, Hon. Mr. Winter in the chair.

HON. J. D. RYAN-The amendment 1 suggested at the last meeting in seetion 24, 1 now beg to withilraw.

The Committee rose and reported the Bill with some amendment, which report was received, and on motion of Hon. Mr. Bishop the Bill was then wal a third time, passed, and a message sent to the Lower House that this House had parsed the same with some amendment.

## REVENUE BILL.

On motion of Hon. Mr. Bishop, the Honse went inte Committee on the Revenue Act, Hon Mr. Mlley belng in the chair.
HON, MR. ANDERSON-MT. Chairman, before the passing of the Revenue Bill I wish in the first place to make a few observations on the Financlal Polley of the Government, and In the second place to kive our people an fidea of the financial strength of the four great bauking institutions that are doing the bustriess of the Colony.

## GENERAL STATEMENT.

To the Creditors of the Commeroial
Bank of Newfoundland.
I beg to submit for the information of the Creditors of the lece Commercial Bank of St, John's, Netid. the tollowing intormatton of the afratiri of that Insilitution:

The Commercial Bank, suspended payment on the 10th of Decembor. 1894, and by Acts 58 VIC., Cap. 3, 11 was enacted that it should be wound up. as and from that date Section 4 provided for the resting- of the Assets and effects of the defunct Bank in three Trustees, one of whom was to be elected by its Sharebolders, a seeond was to be appointed by the Supreme Court upon the nombation of the majority of the Creditors, and the third was to be appointed by the Governor in Council.
In January, 1895, the late James Fox was appointed by the Governor in Council as one of the Trustees. On the 3ist of the same month, the late Maurtce Fetelon was appolnted as Truatee by the Sharcholdere of the Bank. In February, 1395, the tate Robert L. Mare was nominated by the Creditors as Truatee, and such momin-
ation was confirmed by the Supreme Court on the 19th of the satd month The late James P. Furlong was appointed in March, 1897, by the Sharoholders, to succeed the late Maurice Fonelon.

## LATE TRUSTEES.

Maurice Fenelon died on the 31st danuary, 1897, having occupled the position of Trustee for two years.
James $P$. Fox resignea his office of Trustee, 8 nd on February 27th 1899, he died, remaining as Trustee for two years and nine months.
Jamos P. Furlong died on the 9th of November, 1901, having served as Trastee for four years and elght months.
Robert Ln Mare died in April, 1904, oecupyling the position of trustee for alue years and two months.

GOLD.
The Commerctal Bank had ft its Treasury at the commencement of thete financial year, 1894, goli amountwig to $\$ 158,000$ of this amount $\$ 142$. 880 was pald out prior to December 10th. The belance of $\$ 15,180$ was paid out to the Government Savinge Bank.

## SILVER.

During the finaneial year, 1894, the amount of sllver which pussed through the Treamury Department was $\$ 30,740$. The amount pald out was $\$ 23,920$, ioaving a balance on the 10th of Decumber of $\$ 6,820$, which amount was sho pald out to the Government Savthg Bank.

## NOTES

The notes of the Bank in circulation on June 30th, 1894, amounted to $\$ 527$, 911. From this date until the 10th December they Increased to $\$ 638,401$ This amount was reduced by $\$ 16,749$, leaving the holdere of the balance creditors to the amount of $\$ 621,65 \%$, which is accounted for as follows: Notes registered by the

Government . . . . . . $\$ 574.245 .00$ Notes regiatered by Trus-
tee Bank
$20,231.00$
Notes lost, utc. . . . . . . ... $27,076.00$
\$621,652.00
Notes outatanding or loat $27,076.00$
Capital Commereial Bank $306,000.00$ leaserve . . . . . ...... .... $110,000.00$
$816,000.00$

## LIABILITIES.

The late Trustegs had great diffeulty, due to the various complications of accounts, in arriving at the actual liability of the Bank. During uny vislts to England since my apvointment as Truatee, I have fiven considerable timu and attention to thls matter, and I am pleased to be able to report that complications as to British accounts bave now been adjusted. The London and Weetminater Bank ranked as Croditors originally for $\pm 132,0857$ 11 ktg . This amount has since been decreawed by realization of Hypothecated Securitles, payments on bills of exchange, etc. by $\mathbb{E} 65.24695$ stg. leaving them ereditors now in the sum of E66,738 9.5 stg . There lave also
been general redictions made in the elaime of the Bank of Liverpool, London and Coanty Banking Co. National Dtscount Co, Frescot, Dimsulale \& Co, and others, ns per statement I sive. you in detail further of. The amount of e e10.429 610 stg. recovered by ar rangsment in Landon from three cargoes of fish pooled. I have trieed and made the necessary reductions on the Bills of Exchange for final dividend. This was divided as follows: Bank of Britizh N.

Late Truates and Remuneration for Services.
narias the tirat 4 yearn from De cember 10th, 1834. to Jsnuary Itst inas, an upplieation vas mpile on behaif if the Trustees to have then umaunt tue to them as compenamtion for thnir sorvires ascestrined. In addition th the amount pald at athin time to the Truatees it cost $\$ 15.527 .51$ for salarios.

Amaunt collectel in rour rearn-
 had been collected rep to she time of the death of Mr. Feneion; \$61,55E.45 tientwerme the time of Mr. Femelon't deasth and the reslguation of Mtr. Fox. and the balanee $\$ 112 k 3 k+5$ between Sir. Fox'e realcantion and the J1at. De cember, 1898, on a harif of 24 por evnt enmmisulon amolutet to 324.317 r 22. Mr Feanlien ithed the firet two ynars: the late Mr Fon restgned after ervthir two gasis and mlne menthas; late Mr Mare was the whole of thls times, foer ywark, end the late Jamee F. Furlini wail ooly in office one Fear and nlezes montha Thin question hroee as to the buafs upon which thite aminent should be distributed smong the Trustees.

Twn rethode were suggested. OBe method was to distrifinte the amornt rateable smoas the serveral Trustesa necordint to the amounts realized
and collected durlng the respectire perfods of their tenure of office. The other wis suskested by ene of the Creditors represented en this appllcatton who proposed to fistribute the Comminuton among the sciveral Trus tees ca the basfo of the length of time during which each Trestee beld office The Court earatully cobsititered Both methode and declded that in the preteat case the latter will be more equit. able in its operation, thit in making the distrifution and following the method, we have not made it a matter of exact calculation, but we the Court. have practically accepted it as the basie for diatribution. On this basis the mmount pagabte to oach of the Trustees will be as follose:
Jai, P. Fox, 85,400 , and for extra Berviees $\$ 8.400$ or ath average of 83 ,100 a year for two yeare and nilne monthe.

Mairlice Fenelon, 84,600 , or an aver: nge of $\$ 2,200$ a your for two years.

Robert L. Mare, 78.937. 24 or an aven age of $\$ 2.235$ a year for tour years,

Jan. P. Furlong. \$4.400, or an average of 82.200 a year for one year and eleven months

Total pollectiont from Dece I8M, to Dee, 1809, 81, 100,238 th 15 yeark You will pote that in four years 8972 . fett 78 सnis entfocted, mint that it took eleven yoars with more wark, worry and trouble to collect \$13s.74t in of this latter amount Mare and Furlons collected tek.65s. Mare. Firiong and Andersen, 752, rat 21, Mure and Ander son, $\$ 1$ 894.10, Anderton, $\$ 48,188,91$ Thie tant amount wan collected after the deart of the late Mr. 3Tare from accounts that had been overlooked both at home and atroad which were Impoasille for the late Trustees to ket af whout belng in England, In my opialon une of the Trustees should have gone to England ut least onen
in avery two yoars in the interant of the Rank.

EXPOHTATION OF TIMBELI BILL.
Bocond readius of tire till mmpect. itige the exporiation of timber.

HON. MA, BraHOP-Thin Will, Mr Priufitent, in to furthor extetil the thine permitfied for the culttige ind ax-
portition of timber, known as "ptt yruan" At the last seselua of the Lakislaturk, lanowa ma the Wor Sos iturn, in compormatice of $=$ request from tim autharittes in Fagtand. the ex portation of thls clase of timber was fermiltied of to the 1 st Soptomber? 1als, and the exportation of palp wood trom Labradur, up to J1st December If thlu whar. The war econtirued, untirfuratity: mut it was tomet noetr bary that the thme athombl be evtenilod and at the seypurat aloo of the tepres. sutatives of the Gerethment of the Yremith fiplatith coe of mer Attes, thr tipart of the tiaber is to be permaltted to Pranos as well as Creat Belialin. Cheme is af phanm, bowever, in the Aot from that of last Jear, to that tumber for polprowed is to be vernaitted to be asported fram Labrallor for a pertod if it main, ind wjom nuch empirts : resule of 31 per ment is ta be paid. Ganthir change is that the cutting of griver timiet for export must sot be Timits thiree fillow from the seck. In netur wirde what wae knewn as the Yiron Mile Lhmit madat still be zinewirrull, sat thle swiands to put props ating, thy Chitit kit $\mathrm{B}=$ cat os the thrue bule limit, Bat furtber Inland. Su thls lember alep cut affer Sept. 1st a raport rogalsy of one dollar per Bond witl harv to be palit. The nim ne aclated pruvides anty for wood cut flur to the paskine of this Aet an. be Inr feee trom the export futy, That. himetre to ant errur, wed the Full will fe amonited tre comantter stere br flanesing that date to the lat of SepIfmber anal bringing it into accord tills thiut of last year

YON. MR. HARYEY-I wat only goIfer tol niy a wuet in eupport of this Tilit. Fir a etrat many yean there Was a stroaz feeline azainst the export at ift lirobr anat pulpwhad froms any. thate I was atrongly in favor of es porther from the Labralor, and I think thin iefrnlogment on the Labrador han fich rutarded by the Colony refiuturs
to permit the export under any terms whatever. I am sure that ne long ago as elght yoars the Cournell of the Honri of Trade pussed resolutions recommending that as far as the Labrađor limite were concerned the export of wood in the round should be per mittest froin that const, and calling attention to the fact that there were really targe lumber resources down there, and I think that whion the export, of pit props and pulp wood ansumes falr dimensions on the LabravCor we may after that look with mach conflifence perhapis for the Industrtat development of the lumber resources of that district, but untll attention is called and people abroad are aware that there the really wood down there which is accessible, it will be thed up. Ithave very mavh pleasure in smpportIng this Bill, because I have been for years in favour of such a polfey:

HON, J. D. AYAN-Acecraing to the first aection of this Bill, last year we wort anked to pass it for one year; now on secount of the war we aro anked to extend it for, tom yeara. I am not so sure it it is on aceonut of the war, but it has been hinted abroad that there wero beverat tracti of land down there hung up by parties who have po tieaire to operate those tracts whith they have obtatined kranta for, but imply to trotd them ub and see what price they can get for them and dispenes of them to eutsidernc and it in on the strength of this that the tex gears hive been granted. Whale I woald like to see the war endol peat week. If peasalbie I think we would be doing what I connifitor a fatr share of our bunimese in this Leglatature if we extended this act Lor another year, bat 1 think it unfair to the generat pubite of thite country that a few enterprising ineh, If you wish so to call them, who have uvver intended to cut a log of wood, bist stmply take out thene grante when the previoue grant would be ex
bausted and pay nothlng for - It thould be thus advantaged; for now that we are asked to extend the time for ten yeans 1 fear that it in freatly in the faterests of those specalators, and that this country will never derive one cent of benefit by such an enactment. I would like to see, as we bad th the last Bill, something to protect the interests of the people coming after us, and when the Bill comes into fommittee I hope to see something edded that will protect the thbabitants of thts country under this Act.

HON. MR. MCGRATH-1 have no objectior to the principle of thls bill but would have preferred that the perlod for which permission is Blven was shorter than ten years. Whth the proposal to permit the exportation of pit props as a war meas. are there can be no quarrel. The permission to export wood from the Labrador tor ten years stands on a difterent footing. Last year we were satied to pase this for a year on the ground that it was a war moasure; also that if would give employment to eiar people. That argument could be advanced thls year with greater force because of prevalitig conditions of unemployment and the small prospect of tiehery aupplies. There are sald to bo mubstantial areas of timber on the Labrador from which consiterable quantities of thls wood can be cut. Therefore, it is but fair that the people of this country, in view of exlsting conditions, should be permitted the opportubity of eutting this wood and Eaining whatever advantage there is from the export of it, but to allow that for ten jears is I thisk a mistaken princlple at this Juncture for thin rea. gon: Laet year when this Bill was trought in in September the promis: conus cutting on tand arean on our Cown inland was allowed. Wo now find courselves, as a result of the wasteful methods of cutting that were

RON. Phesiornt futnrmed fine Thome that fin fial recelvent a mes faen frum the thoum of A mumbly that thes hait parned tho amenidments sent fown ith tenf upen the filt ment up,
entitled: "An Ant roapectiag the Sealfiehers' with sime amendisente is which they refursted the eomeurritece of the Legistative Council.

On motion of Hon, Mr. Binhop the amontmunts were read a firat and second time and the House went into Courmittee of the Whote on the same.

HON. MR. BISHOP-The firit am. endment made by tha Aswembly is an ameniment to thefr own Fill, Duder rection 2 of the bili, an it stood it might lie held that woal pelts not takth on botind within 24 haure shall bev lons to the owners and not bo a part of the voyare

The smendment to bections 3 and 4 appear to be perfeetly reasonable and I prestame thore will be tao objection.

HON, MR. $10 \mathrm{~B}-\mathrm{It}$ strikes me as pomible that this fifth wectton may he capathle of enme arraturement As hon. Rentlemen wfll remember the originat clanise imposed a fine of $\$ 1$. 000 for every man lost. Now it was contended by the owners that thile was firactically impoasihle. There are stonmers going out to the sealfiahery valued at about $\$ 50,000$ which might be Hable to pity $\$ 200,000$. The owneri wery propared to compromise thit matter and offored in thetr petition to pay part of the prumilum of insurance. This was considered reasptiable by minny mumbere but unfortunately, when the clausen which wss parsed in this House went to the Lower Heqse They torli umbrage at our haviag urarjed thelr powers, and the clange Was not lifecusted at all. Thin Is the mont tmportant clause in the whote Bill. anit it is moet Important that the Eill should not be thrown aut becaune of it, and I think that it we can arrange ten mianten convermation with the Committee of the Liow or House, it could be nettled antinfactorily, When we consfiler that this House is as an-
xioun to proteet the mes going to the Sealfiuhiry as the Lawer House I think it a pity to sllow the Bill to be therown out.

HON. MR. MARVEY-1 cevtainly filsil if woald be wise to malie a farwher effort to comes to somin akremment cin this inntier The original clause renderine ahiga lialle for $\mathbf{3 1 . 0 0 0}$ fcr bevery min it loet at the iceflelds under certain conditions, was of euch a chnr aoter as would have made it lmpossIble for aent any more wooden ahlpm to the lece, and might have involved the selling of the steat shipa also. On the other hand, if the Eill is dropped there is no protection whaterer fa the men geinis to the senifishery, I hotd that it woukt be deplorable if the Legehalature ahould allow this sesmion to jums withort some s roviniou tor the nafery of the liver of the naal-保 crewn, Analgnes of the original Bill reveals the fact that what wa? menat as a protection was really no protection at all. The steamer Newfoundtanit under that section would have been llable for is sum of $\$ 78$ 000, as Bavisp lont 78 men. As a matter of fact she wae sold the other da) for 34,000 and being owned by a lim ited llability company conld not ac further procoefed againat. ConaequeakIy, commeniuble as wan the motive $\theta^{\prime}$ the Bill, ne originally conntructed if in apparent that it will have to be mo conatructed if the ideas of the Seler: Committee which reported the mess ure to the Lower Hotuse are to be put Inte effect mow, All will agree that, on the eme hatid, thla is mot the thme to see our scalink steamers driven iaway from the Colony, while on the other hatid it would be crimianl to do mothing to protect the men's lives atter last year's trasedy, consequently the comtromiee has been made, to Htart a melieme of Ineuranee wherehy the men would be insured for the
whole vagagn trom the dian at bex tise wath the ahipe towe back, mil thle stalies me as buing the fient
 A mant verald coat we sre tolt toly p2se. Any man wanting tw on to the seninahery would be reguifed fo pay loif of tibls or II it to bo tuanef tor thbe. thwaume of a matmubterntanding In the fower flouke of the motivas of thie (baniber, the amendment wiate by uir with this object In view wat thrown cut, and now if we rotuse to ancept their rimentmett thin filt tr kitled. and there viti the how rietur ure is effect at the thas at the nest mealtinhary. HON. MR. BISHOP.-Etotory that finction tor per I wiah to lay that the a -milmiar to mar ammetaients as now ont up by the Lower Houne, 1 am incfeoly willugs at this late ntage to agrme to hut thie penatoy for $=$ brearh of mut complyier atrictly fith the fooud thetaln and which was mase alould ( )4 he marn thin kex, and which io $f$ fine rdot, to br mot tian than tis fad mere than \$500, That appears to fes to be so perfectly utrrawanabin That I thall recomit $=0$ wate apalast If to that rutent.

The ewrent ahowld nut be liahle to a fine of mare thas JIS of sny wae Fi, unt the saink net chy provic: fit there te bab bure itan cone kamp for find is a har. Ocherwlee 1 am dient arrivable that the amendmests RH. cht panc, tat 1 finter ant witt agree with mis that morh if poralty for aueb 3 hroerl is quite sheuret
HON. MR. HARVEY-1 Bok to aupwirl ther bens, gattiemantiv motion. 1
 3 in hur this is tialife to cause to. Juntire The dittirence is thiss for f frocith of whedaite of tocal any the fhey the ammdment frows on the ctiendias mameny $=$ tax of not less than $1=5$ with is maximum posilile finin or 1500 Thin Cousell affur conWhitriut the mattir and on the advice of the whecommittue reconmuended thut the tax whould not excend 部 for Hark tresech out any une dsy, One of Ahe fatems anked for particulariy by then representatireit of the logsing frampaloy who were bofore un wan Ghat-there shrimtet be no force misfare
nsed againat thom in thie respect; the raflways may be blocked and it may bo fmporaible for them to हet supplies to some of the campik, and under such eiroumstancers I thitik the Courts mhouth be allowed some diseretion where a company if not doing wrong intentionally, I think thit thits is a case where so much injustice might be done that even at thir late date we should oppose it.

HON. MR. GIBBS- 1 cannot arree with the Hon, member that a penalty of five bundred dollars is too ascessive, to be infleted upon a compnny that has dieregarded a regutation made in relation to the ampply of food to men engnged in loging. Any company that would flagrantly vinlate a regulation of thits character, the Infliction of a fine or flive hundred dollara would be a small one compared with the Injury done the meh. Let us look at thin matter, not from a commerclat standpotat, but from a tismane one. A hundred nr more man ure engaged in fogsiuk The work de mander food of a character which will pable men to porform it and at the same time not impnir their hentth, or strength; consequently, it in necessary that it be wholanome and nintritfous, and if it fe not, then it the not only right, but in the highest degren ner oesisary that the company dtiregarding the regulation made should be eubiected to the extreme penaity. It is only in enses of a wifful disregard of tho law and pot an unintentional one, that a Court would infliet such a penalty. If as the Honourable member argues, the railway should benome blocked by reasoii of the atorms, no court is going to fine a company for not havtag food required by the regalation. If the offidule of the company can show that they did all that reasonable men ought to have done
to obtain It, no wilfal breach of the taw has occurrad. No law calls upon an official of a company to do impoaeitifirtes. In cases of the lrind, it they have done all that rennonable and prudent men should do, then the law castos no further reaponaibility apon them. This gives the Court a dfecretion to inflict the extreme penfity if the case is onf of a flasrant charneter, and if it in not, then the the may be as low as $\$ 25$. If a number of men in a camp be given fnauf: ficfent food on any day thin montd not conatitute a breach of the act in respect of each man, but would be conatrued ns one viatution of the law and the penality provided for will be imposed in respect of the offence commiltied on that day. Our duty as legLislatorn fs to protect thase who ber cause of the lack of wealth and trifluential friends at court ara umable to hareguard thelr own rlghts. Corporatlons or Individunls carrying on industrlal work at which a number of men are emplayed should not be allowed to do so, unlona thoy give fuil and ample protection to the Hives ind health of the operatives. If we would look at it from the proper standpoint, the bunlnesa is in reallty a partner. ship. The members of the company fnveat their capital, and the workmien their skill and muacie. A coma Jany aifoguarda its capltal by neekfog concenstions, in some cases, of a most extraordiuary character, from the pubHic and by bringing to bear in the development and carrying on of the wark, sill the knowladge which skill. expertence and foresight teach, as Deing necessary. The pinnt is insured aminat loes by tire, the stock is almilarly protected. everything that human skill conl do, is done to protect the eapital invested. Why should not the other partner, the worker, be protected while employed? Are we to
legishate one rule of conduct and management in relation to the investment of money and then he who is superior to capital, whose rights and claims etand upon a higher plane, be told that he must be content with that which comparifes or incividuals may offer him, and as he must win bread for himself and famlly, he can only do so, under conditions whifeh may be infurious to him and bring loss to those depending upon him. Our duty is to protect the individual, the bread winner, capital can always find whys and meaus to protect itself, while the other party, man, has to suffer wrong and injustice.

HON. MR. MCGRATH-I would suggeet that the hon. gentleman agree to a compromise such as has already been suggested. viz: that we hold to the maximum penalty and cut out the minimam. I move that the word "minimum" be struck out

HON. MR. GIBES-1 think before passing this amerulment we should enrofully consider it. In every penal. ty there is a maximum and minimum fixed. There fa very Iftile difference between steallig a man's money atd stealing hif health and tho degrees of gull can very easily be detormined by the Judge. I don't think we shoutd compel any man living milles and milles in the interior of the country and who is under the control of the company to nabmit to things to which he would not if he were nearer bome. And after all companies have very Wttle sympatily with the maividual. The boss t . there to get all he can out of his men. He is not there in the interests of their health, and if there is a flagrant violation of the Bill, I cannot see why a fine of five mundred dollars should be considered excessive.
HON.MR.MURPHY-My experlence
of supplying logging camps 40 or 50 miles away from headquarters, is that there are times when it is quite impossible to get supplles out to these camps, and when haviling a load of supplies over the country with a pair of harses it is out of the question. Then Just hecause these camps happen to be short of a few items thelr owners are to be fined. A man not on good terms with his boss will be only too gind to make a fuss, and the Magistrate will be compelled to fine the employer not less than twenty-five dollars. So far as the remarks of hon. gentlemen with reference to the treatment of the men are concerned, the companiea for thelr own interest are going to treat their men well, so that they will gat the greatest amount of work out of them. I take a great interest in the men after thirty-cight years experience in logging, and I thinie that this law wilt not affect the big companles as much an this small strugging mill-owners, who employ in the agmergate considerably piore men than do the bis companies agalnst whom thls bill is afrned. The small mill owners who cannot comply with this law are the ones who will suffer most, and in their interest I mulntafn that it is unfust that a magiatrate must be compelled to fine them a minimum of twenty-five dollare, and that poasibly two or three times a month. In the United Statea and Carada with their immerise lumbering induetry, as compared with our vory small one, they have never yet been called upon to make a law between the lumbermen and their employers, yet we must start in down here, and make laws that will bear harder on the small mill owners than on the big companles, I do not see nay Justice in this. It is easier for the large companies to supply thelr camps with luxurles which are out of
the question for the small mill owner, who merely employs bls velghtours tn the settlement and who should the allowed to butla end mupply hie camps to sult himecil and an best he can. and whose employnes do not expect his camps to be equipped in the masner reguired of the ble companiea by this law. Even the maximum tine of $\$ 500$ would make vary utto difference to the bfg companien with their larga business. If the blg compantes do not trant thelr men properly, by nll menm fine them up to the llail: bat it is harilly falr for the amall mill owner to have to pay a mlalmum of 395 for every offenso agninst this law, and I consider that it in perfectly mofe to leare the amount of the fine to the dfecretlon of the Magistrate.
HON. MR. MCGRATH -1 move ar an amendment that "Tood as prescribed shant be supailted ly emplogern, to lomerrs worhing tor them, under A ponalty not exenoding 8500 for each offence, provided that no more then one permily ethatt he payable as penalty for breaches of the section ea any ona day fa any one camp."
The rmenifment belng put win car. red.
Oa motion the Comilteo rono and reported the amendments pamed with an amendment.
On motion the mill wan rear a third time, passed, and sent to the Ascertibly with in mennepe Intlimnting that the Councll had passed the amendmenis with an awendment.
Oa mation the Hense weot lito Comrmittoe ca the Seatiog amendments Hon. Mr. Andormen to the Clatr.
On mation of Hon. Atr, Biziop the Commitive rosc.
Hon. the Prealdent finformed the House that it was the intention of His Exeollency the Covernor to clowe
the Leglilature at three of the clock an tormurrow Saturday.

Oa motion ef Hon. Mr. Binhop the House sdjourned till 250 p. m. to. tanerow.

## saturday, June b.

The Houne met at $2.20 \mathrm{p} . \mathrm{m}$. . pur zuant to ndjournment.

HON. MR. BISHOP tabled the Teport of the Public Schools under Romin Canholie Boards.

HON. .PRESIDENT informed the Houne that be lind recelived in meskase from the House of Assembly that thiy had passed the amendment ent down by the Councll in and upon the nmendmert seat op by the Houre of Astembly in and eponi the amendment sunt down by the Council in and ugon the Bin entited "An Aet rowsectins the employment of man engaged in Logxing." withont amead. zunat.

His Exceilency tho Governor havlay arrived, and being amated on the Turnan Hon, the President Commanded the Gentleman Uwher of the Black Fiod to summon the mombers of the Howae of Assembily to the bar of the Howse, and they betng there zasembled, H1s Excellency wna pleas ed to nancobt to the Bills passed durfins the semalon.
Hia Excellency was then pleased to make the followias addreas to both Tranches of the Legtilature:-
Wr. President and Honorable Gentlemen of the Legislative Council:

## Mr. Speaker and Qentlemen of the

 Honourable House of Assambly:In relleving you from yeur sesalonni dutles, rendered umasually ardncun by the Latencia of the siasoa, and the consequent interference with your persomal affairs, 1 desire to thank you, to the firat place, for the uptrit

In which you have reoponded to the call to pertarm your legtelative tunethiur if a mecessartly thconventent perlod, and, in the second place, for the unanimity that has marked yout detlberations in all mattars of Imper. iat futerent.

I slso warmis thanfe you for the meaurrea you have taken to ensure the Colony's participation with the rest of the \#impire in the Ereat war which ta calling forth all tho resources o? the British mace for the mairstenance of the world's freedom and the antvancement of civiliaation. I earzeatiy trust that the Colony'i conitingents towards the maval and, millitary atrength of tho Emplre, will prove effective in proportion to the numburs engazed. as they will nerve to make mantrest the dealre of the whole peopte of Newfoundlind to ensure an early and successful termination of this ereat atrugete through an honor able and tasting peace dletated by the attred billtons.

The proviston, you have made for penstons and allowanees for those of our mea on active service by bea or fand who may surfer dimablement and for the dependents of thore who may fall in defence of the flam is highty creditable to you and teitifies to the pratamorthiy spitt th whiteh every aupect of this overpowering problem la dealt with by the Legintature and people of this Colony.

Mr. Speaker and Gentlemen of the
Henourable House of Assembly:
I thank you for the approgriations you have made for carrylig on tho

Publle Services, and for meoting the phlitgations Which the war has lorought upon the Colany. The money so pro vided will be expended with special fyrard to ocometuy tin vew of thin try. fin efrcumitances whtel confront ua and the worid at lirge.

## Mr. Prealdent and Honourable Gentlemen of the Legialative Councll:

Mr. Speaker and Centlemen of tha Honcurable House of Aasembly:

The bill which you have passed provilitig for the eatahilishment on tha Weet Cosst and on the Labrador of induvirial enterprian of exception1) megmitude will, I trust, rosult in the early initiation of those undertakfrime and the proviting of further treans whrmby great sumbers of our feop's may secure permatent and retnumerative employment an: the Colony a furthier addittion to an eatirecod and luatigg prospority.
In bldaling you farawell 1 earnestly pray that the appaliing conflict now tuging In the Olt World, may be trought to a 日peedy and honourable Issue and that our country, with the hlesslags of Peace, misy then retuew the condlitions of materinl well-being which were itis portion for many years past.

## PROROQATION.

After which the Honourable the Prewillent of the Leglalative Council, by commind of Its Excellency the Governor, declared the General Assembly prorogund antil Wedneslay, tho fourteenth day of July next.

## INDEX
