“The vision of the Department of Natural Resources is a Province that realizes the full benefit from the sustainable development of its resources.”

Mission:

The mission statement is the priority focus area of a public body over its planning cycle. It represents the key longer term result that the public body and the responsible minister will work towards to achieve a component of government's Strategic Directions. The statement also identifies the measures and indicators that will assist a public body and the public in monitoring and evaluating success.

The St. John's Land Development Advisory Authority considered its role in assisting the Forestry and Agrifoods Agency in achieving its mission for the planning period. The Authority has a role in identifying and facilitating opportunities for agricultural and agrifoods resource development activities and diversification by making recommendations on applications for land development in the St. John's Urban Region Agriculture Development Area in consideration of direction under the regulations to ensure development is consistent with agricultural purposes. As such, aspects of the following general statement from the mission of the Agency related to agriculture and agrifoods sectors apply to the Authority:

“By March 31, 2011, the Forestry and Agrifoods Agency will have: implemented programs necessary to sustain the province's forest ecosystems; identified and facilitated further opportunities for sustainable agriculture and agrifoods resource development; and optimized the benefits received from these resources.”

The Authority determined that it has no material impact on achievement of measures and indicators of the Forestry and Agrifoods Agency's mission statement.

The complete mission of the Forestry and Agrifoods Agency is found in its strategic plan for the period covering April 1, 2008 to March 31, 2011. The Agency's progress toward achievement of its mission and associated measures and indicators is included in its annual performance report for 2010-11.
